The understanding of the totality, of the total essence of the creation in the D of P, in the D of what we call, the Gans state of the soft tissue existence, does not count. The essence of the creation of the STM, which counts in the D of the existence. In time, those of you who leave this planet as a STM will recognize each other in the D of the U, even if you become a star, and the other one becomes a planet, the other one becomes a seed of meteorite, (1:08). when you see and understand the strength of the soul, hello friend, we meet again in the D of creation we both came from, in the essence of the same source.

This is what the intro (video) told you, and now we understand. The essence of understanding, that the creation of the P is the time, place, and position in the physical dimensional strength of manifestation of P, and in the essence, has nothing to do with the strength of the soul and the creation of the soul, and emotion of the soul, but in a way, the soul is the creator of the D of the P, which shows its emotion in that D in the strength. This becomes important for all of us as we become travelers of the U to recognize the emotion of the soul, and with it understand what the soul tells us, and not the physical creature in front of us, "um, you look delicious " Where your soul tells you, keep your distance this body is hungry to take what fields it can steal from D of the U. This has been the habit of the man in the Universal community, and that's why the correction in the STM had to be done.

The habit of killing in the D of P has to stay and confine, and finish on this planet, where we elevate the STM, (1:10). that he learns to absorb the other 20% from his environment and not from another collection of fields of plasmas, what we call, life.

Maybe if you understand, maybe now you understand the first thing we gave you as a CO2, what it means, what it entails, what it has, what it does, and go back to all the teachings, we always said when you start a system pray for it, as that soul within the system creates that protein layer on the top, which is the boundary of the fields between the outside and the inside for the STM.

If you understood this in totality, then you come to understand one fundamental point, have you ever up to now, treated, processed, and handled the Gans's you made, where you took the skin off. Now you understand why we keep on telling you to keep the AA separate. It's the jacket of the soul of the system, that when you need it, you can put it back on. Then because it's the separation point, understanding of the creation of the whole thing of giving and taking, then it is effective and it works. Not the Gans in the bucket. You are happy to ?? plate, because you forgot the process of creation. You have not understood the process of existence. (1:12).

The teaching of today, is to open the eye of the KS, that you become to understand the process of creation in true essence of, and not by the magic of the spaceship EU, and everything that we have been trying, and has been tried by you, and has been the whole vision of the human race. What do you think when you see a man standing and watching a UFO, what does he think, oh they are more intelligent than us, they've done. What about the cat or dog, which is on the leash next to you watching the same thing. Does the dog feel the same way, these are intelligent people, I wish I was a dog in that ship. Understanding the science of creation is the purpose of the teaching of the KFSSI, not understanding the process of containment, another containing, another box for another soul.

We teach the freedom of the man in the U, .. the freedom of the STM in the U, .. the truth about man to understand what is to come, when he becomes part of the U Community, and then we take steps, then he can understand what we want, and then we can go to the next level of understanding of the totality. I made man in the image of Myself, and surely God doesn't have 2 arms, 10 fingers, and 2 toes and god knows, everything else, that the man see in D of P of himself. (1:14).

Then if you understood this, you understand the reason for your C12 and C14. You understand, what you call C, is the line of connection, it doesn't have that word anywhere else except the brain of the man, because now he can categorize it. And does not have the D of P in every aspect.

I hope from today's teaching you understand, and understood in a deeper way, that where and how the new systems are just an intermediary systems for you to understand more, to be able to travel the span of the U, easier with no restriction and boundary of what I call the spaceship the car, the donkey, and the back of a mule and the rest of it. It's the freedom of the man to understand the truth about the process of the transmutation and transportation of the fields of the U.

Then manifestation of it in respect to the position, field strength of the time and the place. A drop of water, moist on the window, the same drop of water moist in the room, not to be seen, and the same drop of water in the freezer to become solid ice, manifests itself again, differently. The window, room, and the freezer, are different conditions of the field strength of the U for the STM. How would manifest, how would you be manifested in the D of the window, the space of the room, or the free field strength in the space of the U. (1:16). This is what the man has to decide, in his travel and the D of the travels of the upcoming time, as the knowledge of the man reaches the T&T of the fields, and not the body of the man. I made man in the image of Myself, have you seen the Creator in a UFO, then why do you expect the STM to travel in it. Then you understand the restriction of the knowledge, which you have created for yourselves to be able to confirm your existence in the D of P and the physical life of the man.

We go for a break I hope I managed to open your eyes to a better understanding of yourself and what to expect in the coming time from your soul and your P, and how to treat, .. behave, and how to respect life, that I don't like my body and soul to be eaten by another structure to become part of, would I become the same, and I expect what is in the U freely available for me, that I do not have to commit a crime of killing.

Thank you … today KF Sale Team has put in new packages for Easter time (1:18).

>> 1st BREAK >> Easter Store promotion 423 KSW March 10, 2022

(1:33).

K- have to do a PCR test so I can travel … (1:34).

Q: .. question about the 364th KSW about the purpose … of life. If the Creator's love is universal and unconditional to all, does that mean we the created are still immature, if we display a bias love as we strive to become Him and a part of Him?
K- Yes, don't need to ask, you should have come to that conclusion yourself.

It's very much what we see, and have seen many times, and we see repetition of it, when a mother sits at a table ignores one child, and the other one is adored to bits. Do you think that child doesn't feel, "why I don't get it?" (1:36). What have I done wrong, that I am not entitled to it. We see that with many parents the minute they have a second child, the first one becomes ignored. The first one is not there, because all the attention goes. And what do we create the condition that soul, that soul in the first child? Looking, seeking for attention that I exist, seeking for the love, that I am part of the existence.

What does the child do, pays more attention to the second child, that by paying attention while the mother is there, she might see me too. Then what do we create in the second child, me and me and me, and possessive.

Psychology of the family is the best demonstration of the life of the man in the cycle of existence. We see that 99% of families. They put the picture of the second child on the phone, and the first child doesn't exist. How come the father (first child) every time opens the phone, sees him, not me, I don't exist. Then looking and seeking for that confirmation of existence allows the abuse, because when I am needed, to receive it, I allow anybody to show me love, that it confirms I exist. We do this all the time, it's the process that the man has not understood.

Next time when you see a friend or a family member, with a picture of 1 child on their mobile, ask them where is the second one, and explain to them, if they understand it, they become aware of their own shortcomings. (1:38).

You have to acknowledge the existence of all created things in equal measure. The best example is within our families, even if you been there. And what do we create, we create monsters in the second child. It creates hyperactivity, it creates a seed for a lifetime of abuse of the second child, of the whole ?? family.

Because we have not understood the process of creation. Then do we, are we, should we, be aware of it, and how do we react to it? What are we responsible for? This is what, as a human race we are responsible to understand the position of the same. Do we love another nation, another race, and not the other, or can we collectively love and respect all. And you see this in the structure of the KF, when we open the phone, we don't say only the Americans, but the Iranians (can speak). Whoever comes on, gets a chance to share knowledge, to be part of, because we are all one. This has to reflect in the operation of the life. To become wise to it, takes a lot of effort.

Any other question. (1:40).

Q; Salomea … is related to … solidarity is needed, is KF ready to create solidarity and peace with the 5plus1 talks, or it's ready to do it.

K- I don't understand, to make peace with 5plus1. We made peace with 5plus1 a long time ago. I don't know if I mentioned it, I was in the American teaching on Sunday, or if I mentioned it in another conversation. We brought the peace process a lot ahead, and ore or less we expect it to be concluded this week, because this is the whole plan of 5plus1, to come out this week, before next Monday. Agreements have to be reached, otherwise Iranian government and officials cannot deliver the peace message to the Iranian nation. As next week has time to adjust it.

>> Proofed to here >> skip over 1:42 to 1:54

But in an accidental sudden appearance of out of nowhere, the head of IAEA, Dr. Grossi in Tehran last Saturday. And what he said, that we do not accept the, what the Israelis have put out, (1:42). and terrorized Iran for being in possession of nuclear weapon. It's the first time head of IAEA directly referred to misleading information, .. lies which was created by the ex-Prime Minister of Israel to create Iran a nuclear state, a terrorist state, and have to bombs. They created pictures of it. On the 15th of December last year, KF at 11 AM transferred a full 6 pages document to Dr. Grossi, which I said before shared automatically with US and Israel. That it brought to show how much Israel has lied about Iran as a nuclear weapons state. Americans had to keep their face, they had been fooled by a criminal man, and in that process Grossi going to Tehran … has confirmed that Iran doesn't have a nuclear weapon T. We have seen the process of peace speeding up. Literally .. through and one day visit to Tehran was to confirm that we exposed the liars, and cheaters. KF played this game, its role to bringing the truth, and bringing forward the peace process by huge measure.

I am meeting with Iranian ambassador in next few hours. (1:44)

.. After 15th everything changed, and this is the work of the KF (in 5plus1) We released the email to Dr. Grossi, that it is not just talk, we always keep record of it, everything. As I said, .. we have established the same position, if the present situation in Ukraine leads to leakage of nuclear material, KF in its factories in China and in Austria, we have enough material to contain any nuclear leakage the way we supported Fukoshima. Therefore, we have the knowledge, we are part of it, and our message is peaceful. (1:46). We have seen since December, Israelis don't talk about anymore nuclear weapons (in Iran). You will see huge cancellation of the weapons orders by Arab states, because this dossier has been printed in 20 copies. So 20 heads of sates will receives copies, and it's the nightmare for the state of Israel. That Iran has been correct, we are not after weapons T, we are after development of the T which is peaceful for our nation. .. for the first time ever, if you go and understand .. when I entered the arena .. in 5plus1 Iran would not loose its T. .. in future to sell nuclear T and not just fuel. Everybody thought is was a joke, just Keshe talking ..
Russia now is using the leverage of receiving nuclear material from Iran for the first time in the 5+1 negotiations. (1:48). It means Iran is still enriching uranium in a vast amounts, but through 5+1 is can only sell it to Russia. Russia in exchange gives urocoke to Iran that we use it in another next cycle of the process. .. this communication of the 5+1 comes out of and the Americans can't do much, they have to lean towards Russia, because if Russian refuses to buy the export of Iran nuclear fuel, which Iran is producing as an exporter of the fuel, we are not exporting machinery, we export fuel to Russia and we get paid for it. Russia under sanctions from Ukraine will stop as it cannot trade with any nation, will stop buying nuclear fuel from Iran. Is America .. or any of the 5+1 prepared to buy the fuel which Russia is buying from Iran. Then it has put pressure on the Americans to back off in the Ukraine situation, because Biden needs the 5+1 to create

jobs at this moment in US, and a lot of other promises, plus using KF T in the upcoming T of the US. Now you see how much we are correct and involved .. We made

(1:50). When we negotiated 5+1 with Biden and Obama, we made sure the nation of Iran stayed solid as a leading scientific organization in the process of nuclear T because it is the backbone of the space T. I explained everything to you, that you understand, and I have done this for years.

Now we know we sell. Nobody was supposed to know. We know that to sell, we need to develop the T to get better. We know that in developing we become the exporters of the new T, we just don't sell the fuel we want to export. 30 nuclear reactors are coming operational in next 10 to 15 years, and another 100 by middle of the century. Western world gradually what we agreed, makes Iran the producer of the nuclear fuel in certain categories for the world.

I got out of giving the keys to the Americans in 2012, the freedom of Iran as a nation, as a nuclear T, and I backed it al the way through .. we opened the lying cheating .., not nation, the government of Israel, that now Iran is not a nuclear, we had confirmation from … head of IAEA. (1:52).

So yes, we are part of it (5plus1), we have been part of it. Exchange of the knowledge for peace ..
(pause ..)(1:54).
So we come to the position that we are part of the structure … KF will stay this way. .. because once the 5plus1 negotiations are completed we have to decide how to transfer the new T, international operation, regarding space travel. We'll be traveling, .. shipping nuclear material with high-speed across this planet, form one nation to another, all this has to be negotiated, and it's in the pipeline to be negotiated. At the moment, we see the rigman with shipping nuclear materials .. this is all part of what is to come.

5plus1 will become the nuclear club in the world and this was what we said, at the outset, from the beginning. Iran has become part of that nuclear club. For the first the Russian foreign Minister has confirmed it, that if we are getting the sanctions .. we cannot buy, so we can't buy the nuclear material from Iran. Now we see Iran is selling nuclear .. purified nuclear material, but on the agreement, to the exclusivity of Russia. But soon it will expand, because 5plus1 as nuclear nations cannot meet the demand of upcoming ?? ? ? nuclear expansion. Soon it will become preferred in preparing nuclear fuels.

We did a very good job in our negotiations, (1:56). bringing Iran straight away into one of the leading nuclear nations. Some people abused it, but now we opened the hand of the state of Israel and we've seen how beautiful a confirmation came this Saturday, that IAEA does not believe Israel and all their lies, and killing of Iranian scientists. Iran was never after nuclear weapons, because we have a much bigger target which is the space T,

enrich 100% ?? ?? we have the knowledge, the knowledge belongs to the KF, we know where it sits. ?? Iranian organization and ?? the human race. But with it, we'll change the condition and the position.

We have to go for a 5 minutes break I have to do the PCR test ..

(1:58). Video .. (2:06).

Proofed again to here >> continue ..

Q; Mark Dutchman, .. regarding subconscious. Does the subconscious include the STP and STM, or parts of it?
K- We as a human race decided to call it subconscious, but is in fact, it is a connection between both dimensions, the STM and STP. What they see to be, we have subconsciousness in the level of the STP, and we have subconsciousness about the STM. The subconsciousness of the STM we denied it, because we never knew where the soul is and the rest of it.

Now we know, we have the same, the same words can be used, but in a way, we don't have a subconscious of the soul, because the soul is aware of everything. It is us who does not understand it, so we call it, a sub condition, or subconscious of it in the physical D. So it is in a way, the communication of the STM with the STP and the D of the emotion and transfer of knowledge, of the existence.

When it comes to the STP, we say, oh, I am not going there, because subconsciously I am aware of what it is, or was aware of it. But that subconscious is, the way we say the STM is connected to the soul of the others, or other whatever. Our STP, (2:08). is connected to the soul of the cells of the body of the man, what created the man. This is what we have to understand. We become aware of, but in a way, the STM brings the information, passes it on to the STP, or what we call, consciousness of awareness of the man, and then we call it, subconscious, subconsciously I do this. Part of it, if it is physical, we twitch or whatever, but subconsciously we become aware of knowledge's, or something which emotions, which we are not aware of. One is to do with the STP and one is to do with the STM, which we translate as, to knowledge of subconsciousness, or awareness.

Q: .. that's what I thought how that works. To reach your self, the STM and be aware of it, is that something we can do with the vessel we have now, or do we need wait till our vessel has changed?

K- This is part of the teaching of the present time, for you to become aware of it, and in control of it. Up to now we are not aware of it, it is within us, and we are in control of it. We allowed the religions to come in, and then we allowed the abuse of those who used the religions to abuse our emotions, our life.

So now you are aware of it, you can actually, we had a, one of our friends last week was saying, he puts two rings around his fingers, and if it goes (kinesiology - to decide if something is good for you). It's another step towards, we know there is something inside, which knows more than me, outside, in the D of the soul. That's all it is, so now we become aware of it. (2:10). We can do it, and the whole teaching is in that process. You do not have to die to free the "bird." The bird is free when you choose it, but understand its limitation to fly, and what it can do.

Why can't we bring the soul of us. I explained this to a child of mine some time ago. In a way, it's the easiest way to understand it. We decide to go and hunt, to kill a bird, an animal to eat, because we are hungry. We make that conscious decision to do that job. You go consciously to a supermarket to buy a chicken. So we are aware of our physical need, and chicken will give us certain energies which we need.

Why don't we do the same with our soul. That why don't we train ourselves to allow our souls to expand beyond D of P, that it can tap into the energies of the U, that I don't need to kill that bird. This is what we'll be coming more an more with. On the other hand, if you become inner conscious of, and you can bring it, you don't need to extend the STM beyond the boundary of the P to get the fields, you go in and replicate the fields you want with the strength of your soul, that you absorb, that you do not need to kill a chicken to get the energy you need from the chicken.

As I said, in very recent past, and you'll see as one of the products of the KF in the upcoming time. KF will sell little, (2:12). very much like a marble, that when you put this marble in your mouth you can absorb all the energies, all what you need as a food, then you will not kill.

In the next few hours, this is one of the reasons we traveled where we are. In the next few hours KF will sign an agreement, and KF will become one of the largest scientific organizations in the parallel system of the new knowledge, and world knowledge. In a way, Nano T, plasma T will come, and emerge out of Iran, in a way, that is not imaginable. One of the biggest scientific organizations will be born today, that will bring the new science of the Pl T, which becomes food, construction, life, energy together, and we establish the biggest scientific organization from the nation of Iran.

But the condition is, part of the agreement is, the knowledge is open to all other nations on this planet. We just crossed the "T's" and dot the "i" this morning, and this afternoon we sign. We create a structure, which will be unique, and be collective collaborative structure with the scientists from some 40 to 50 nations, which already work in the space. In a way, we establish the KF as an international space organization, (2:14). headquartered in Tehran. We, the foundation has spent a lot of time and effort and everything else to make sure this process completes.

Today we'll celebrate that day, that the signatures will go on the paper, and you will see the birth of the first international plasma space T to be born. Hopefulness of it is this, that we will start, and you will see new innovative products from the KF in the coming

days, things which will change our process. This is an interim development, that the next step will come in. We will explain to you very shortly, by next week you might see some of the products.

This is a structure, the knowledge that, what we call, we let the knowledge to go free, and the freedom of that knowledge has come back to KF. People of the same line have come back. We have established, it will be rapidly growing to one of the biggest space organization, under the banner of the KF. That we don't need to kill anymore, we understand the process of the creation of it, we respect each other, because of our soul, not because of the power or the money. Because we all have everything what we want, we can create.

Q: If I am aware of my soul, aware of my true self, does it come, show itself by itself, (2:16). or how can you stimulate this process of awareness of your deeper self.

K- You can do it internally and you can show it externally, depends if you are what I call, introvert or extravert. But you go within the soul, but then you want to show the beauty of what your soul has achieved. You can do it, you don't need to be. It's not a dress to wear, or a car, because it is the latest model I have, you see I can extend my soul out, and look at me, yeah? But it's the freedom of it, that the one who wants to see your soul, has the freedom to see, to recognize the beauty of it. This goes back to if you've been a KS for a long time now, I said, the members of the UC never need to introduce themselves, as they will be recognized by what I call, the shinning soul they carry. They are there to serve. We see that. People. We won't see the UC members with a bright light walking everywhere, "oh, there is a guru." No we see the beauty of it, because we see the, we sense the beauty of the soul within. This is part of what is to come. We move away from D of P, but with the knowledge, not something just to follow, with the knowledge, that we are in charge of it, we control it and we can extend it to what we want.

Then when you want to go back and reaching the Creator, then you have to think the reverse of whatever you've done. Up to now you raised your hands and you said, "I raise my hands to God, the Creator." (2:18). Now we know the STM is within the man, and the house of the Creator is within the STM, we go within. This is the beauty of understanding the new T, the new essence of creation. You don't need to raise hand, God to help us. We go within to find the truth, and the way we have been.

Any other question.

Q: .. To reach the Creator we need to become only energy?
K- Yes. Just ask yourself, do you see that way, or you are still entangled with the D of P?

Q: Will we one day cease to be, and manifest ourselves in P?
K- If you decide to, yes. This is the whole purpose of the teachings. You decide when to manifest. You decide if you want to be the creature of the planet moon, Jupiter, or planet Zeus, or another D with no planetary system, but in the fields of the U. Then you become

a star in that U. (2:20). because there is nothing for you to be attached to, you are there, you become the star, you are the center of the fields.

When you have a dynamic Pl you are bound to attract fields to you. When you are a ray, you just pass through. When you bring your soul to be in a position in the U, then you become the star, then you become the source, because you absorb other fields and with it, what you receive you expand, then you can shine, you shape. This is what we call, the earth is the nursery of the souls. Where the STM frees from the shackles of the P, and it has to find a space for itself to position, as you put a magnet on the table of magnets, and in that point, because it's in a dynamic position, it becomes the essence of the creation of new life, new Pl. Then will it shine to absorb enough life, enough fields, to absorb enough from universal fields of the existence of the physical D. Did you give enough, that you receive enough, that you become a star in that position. Or would you become, what I call, just a dust in the fields, and not even absorb, the lowest of the dust. Don't forget in terms of Pl T the lowest is not to get inside, it's the further you are from the source, because you give so much to go further, so you are further from the point of the creation and Creator.

Any other question.

Q: Will planet earth stop being physical some day, will it become an existing planet with its beauties only being energy? (2:22).
K- We are already that, but in the D of matter state. But sooner or later we'll go back to the mother. The gravitational pull of the sun will take us in. Then there are no mountains and no rivers, we all become part of the plasma, so. I explained this to a cosmologist a long time ago. We see meteorites, .. and asteroids, we see them coming to planet earth, and they burn into the skies or they get rejected. But how much our scientists have observed, how much of these meteorites or whatever you call them, go back to the sun?

Many of the meteorites we get hit by, they are on the journey to the mother, and we are no exception, we are just a bigger piece. We have some Pl as time goes we give more and more. We gradually get pulled in and become part of, and become another Pl. If your body is buried on this planet the day before the sun absorbs us in, or you died thousands of years ago and it is just a bones, would it make any difference when you become a mixture of the Pl within another structure of the ??. Then you radiate back out. Then you become part of it. Then in fact you see, we are always a field in change. (2:24). We are always a mirage, what we call the existence of life.

Any other question.

Q: . .. Can you reassure us about the risk of atomic war?
K- What you want me to show you, you get a nuclear bomb. I don't know it depends what crazy leaders we choose to be there. But what we see, at the present time … We have to see what we learned from Corona. Two years, the frightened us, the injected us, and as we saw in the state of Austria yesterday, threw everything out, we become free. We don't need to have injections, we don't need to have anything else. Maybe we see PCR for a

few days, and then it will go away. Because we went through the cycle, they brought that for us. But it brought a lot of attention to the knowledge of the man, what the viruses are.

As KF, in a very short while, as we are doing, and other institutes like us, we explain the viruses, and then we add it to our knowledge, because you've seen it, what it does, how they can abuse us. Next time we'll not be afraid of viruses. It became like the black plague, but this time the black plague was created deliberately for enslaving our nations. We paid heavily for past two years. Our great grandchildren will pay for the moneys borrowed to pay, and other things from the .

We got fooled once. Now we see the wars. and none of the superpowers, (2:26). are objecting to anything in respect to, or threatening of the reality of a nuclear war. Because the arena is not on the list, it's not the Arabs, .. not China, .. not Australia, and Africa we can do it, the way we killed them, we promoted. Now the arena is Europe. You drop a nuclear bomb anywhere in Europe, and the Americans and Russians play the game. Sorry, Western world doesn't exist anymore. They are not entering the arena of nuclear war at this moment in time, because in fact there will be nothing left of Europe. So the Europeans bark, but they have no bite, and that's the only thing they can do.

Because we saw what happened in the same country in 1986 when Chernobyl went. Today some 35 years later there are farms on the mountain of Wales in west of UK, that cannot be farmed, because the radioactive material from Chernobyl landed there.

So we will not see nuclear war, not in Europe. If it was in Middle east, yes that has nothing to do with us. But you nuke Europe you have finished with Western civilization. I think there is nothing more than this, the Chinese would like to see. Let them test it, then there is no superpower. Then there will be only 1 power, which is China, and nobody will risk it.

I see countries like Poland, which they are now prepared to give Mig's bla, bla, (2:28). to the Ukrainian army to be used. Watch what will be the response of Russia on Poland. They are considering in Moscow to flatten the embassy of Poland, in Moscow and never allow no Polish work contracts to come into Russia, The harshness of it will be much worse, because Russia has other powers behind it.

Then the teasing of the Western nations, then we want to go from Mig to F fighters, has no meaning. Look at the bigger picture of the politics, there won't be no nuclear war, not in Europe arena. Europe just after some 70 - 80 years is coming off the pressures of the WW2. This time, it's going to be flattened. It's the Western world which will loose, and none of them are prepared to press that button, they bark. But as a nuclear physicist we do the study of the nuclear weapons, don't worry about it. It's not the 1950's and 60's, that one person can push a button. Collection, and collective members have to release sequences, that the nuclear bomb can be released.

It's possible we might have a nuclear leakage, but that is something that we have already confirmed to IAEA, that we are ready to support them with material being held in

Austria, that we can share with, that can literally be flown to the frontiers, very near. Don't worry about nuclear war, it's a lot of barking, but there no bite, and if anybody bites, (2:30). there will be no Western Europe.

Any other question.

Q: Any news on the ongoing negotiations between Iran and 5plus1, but I think you may have already answered that. Perhaps you could add more details .. answered in the weekend Keshe American Knowledge Team?

K- It is as it's going, I explained earlier on. The Russians confirmed, they can play their game, and we'll see what comes out. It's a state of art of negotiation, which who can do, and what can be done, and we are in that position in the moment. We expect and we announced weeks and weeks ago, if the Russians don't throw the what we call, the French spanner into the work, we expect to see the signing before or around next Monday , Tuesday latest, as Iran is going through the Iranian New Year celebration for 21st of March, which is the following week.

They don't want to do it the last day, the nation, or they might do it the last 2 days before the New Year. That to bring a new .. hope for the present structure. (2:32). But in effect we knew it from mid-summer, the negotiations will complete around this or next week.

But the only problem now is with the Ukraine situation. If Russians don't accept buying Iran's nuclear surplus material produced by Iran, then somebody in-between, maybe American will say, we buy it. This is another option which is considered by the White House. But on the other hand, this gives validity to the Iran nuclear weapons T, in not being real, and Iran will become part of the nuclear club, opened now since last week.

Everything was setup by His Eminence Ayatollah K of Iran to finish by next week. Everything fell out once, but we brought it back in. Everything in how to behave in the 5+1 was rehearsed with the KF and Iranian officials months and months before. How we expect, who to be, and what to be, and who has got to be. These are all done in writing and verbal communication to the Iranian government and we are in that position. We succeed because we know how to do it. There are a lot of deviations from it, but one way or another, we are on track. The American asked for a lot of unnecessary things which got nothing to do with negotiations, 5+1, and they came with 16 brackets of new demands, which are out of the negotiations, some has been met, some not, but more or less it has been agreed. Iranians came with the same thing, it wasn't just Americans. But over all everything is set. It should have been signed, (2:34). actually today or tomorrow. Everything was set to complete this week that it is set for Monday to be announced and be completed …

Because it is a very important day in Iranian culture, it's the last Tuesday night where by tradition we do a lot of fireworks, and they want that fireworks to be fireworks of freedom and return back to all the sanctions finished and the rest of it. We are on target if the Russians don't mess everything up. Because that is the prelude to the Iranian New

Year. It's part of our culture. We are Iranian, Zoroastrian, Islamic nation. Our belief in our nation and the culture comes before the religion.

Any other question.

Proofed again to here >> further now

Q: R: I am wondering how the oil production around the world is tying into this. We see the US has cutoff Russia, or sanctioning them for their oil, which is, kind of, shot themselves in the foot in a way, now they don't have enough oil to cover product needs in the US. The US is looking towards Venezuela and Iran their chief enemies last year, to be suppliers of the oil that their missing, and trying to make ends meet, .. (2;36). Pressure in US and Canada to restart the Tar sands .. plus it is totally against the climate change people, that are in those governments . They are forced to look at alternate energy supplies right now. It seems like a perfect opportunity for the Keshe Plasma T. Is it possible , .. you said Iran will be selling their nuclear items to Russia, but if they get blocked .. they would tend to build up the nuclear materials in Iran, and that makes it, everybody nervous.

What if Iran took those nuclear materials and made space products, (2:38). out of the purified uranium, or what ever it takes to make a safe reactor. I know you can make a safe reactor both H and uranium reactor, and you know how to do it for space T, and for making power … Is it possible, that it is time for the transition now to allow Iran to become the world leader in this new T, because it has to. Not allowed to go the Russian route, and they'll to divide up all that radioactive material (the excess buildup in Iran from Russian sanctions), … spread all that material around the world in small packages, it's a prefect way to get rid of it all.

K- But the thing is this equation of nuclear and oil is what I call, as somebody said, since Ukraine came into operation, Corona doesn't exist, we don't hear much about Corona in the news. It's become a new Corona. We have a beautiful Iranian comedy guy .. I was born in UK but I am from Iran .. so I am "Ukrainian." ..

The structure of the oil industry does not support the pattern of the ruling of Biden. We've been in the oil industry for a long time. The refineries are keyed up for a specific .. refinement (oil from a specific area). (2:40). It's not so easy to change refineries to new oil. If refineries are set for Saudi oil, Saudis sell the oil, because that's the only thing you can put in. That's why Japanese can only buy and consume Iranian oil, because their refinery was set for that way.
You can boycott Russian oil, but you can't buy Iranian oil so easily to replace it. We know this. Believe it or not I have been in one of these mistakes. At the beginning when I was young in oil industry, we never considered, but there was a need for oil, so we sent oil to the refinery, but it was not keyed up for this kind of oil, it created huge damages. .. …

American refineries cost hundreds of millions to convert it, to be able to receive it. Russian oil is a specific mixture. Russia when it was the USSR, the oil industry was hit, brought oil from Siberia, Kazakhstan, and put them in one pipe. We sell Russian mixed crude oil. . You have to mix it because the refineries are set for this kind of mixture ..

(2:42).
Pushes the Iranian production to 5 million barrels. Creates a lot of wealth.
When Iran comes out of sanctions there will be a lot of changes for Iran. I am an example of it. For me to open a bank account in some countries, because we are under sanctions, as Iranian for me it is impossible. In 2 weeks time when sanctions comes off, Iranians can open bank accounts. We have this problem with the KF companies. But we solved this, .. in a very beautiful way, in ?? But today we had it this morning. .. in one of the countries we are trying to setup up, the bank has objected, I carry an Iranian passport. I suggested you wait for a couple of weeks, they'll come and kiss your hand, can you open a bank account. So we see these come up .. change. But essentially this has produced a benefit for the oil producing countries back to 140 - 160 ($ per barrel) and some of the oil fields only become profitable at certain price bracket …
(2:44).

Oil industry is a very complicated industry … It's just a good news making .

Any other question ..

Q: … about CO2 Capture Building with one of the by products are used for agriculture. (2:46). Can you go into it a little bit more what else can be the benefits of the CO2 capture buildings.
K- Space Technology. Space T will be one of the main beneficiaries of this process. In a way, we were just talking about the oil, what kind of C you can capture in your CO2 Box shows what kind of flight system you can create for your system. Is it a space fuel, or for running your power system? It has a lot of usages, it's not just for agriculture.

With the knowledge we have we can create a sustaining power system using a CO2. The power system is not that you create, and what you call it, energy. It's you create a condition … that part of the CO2 stays at the matter energy level, and part of the CO2 becomes C14, which taps into universal energy. Then you have to know where you tap in to it, then you have everlasting energy. MaGrav systems are setup to do this work. (2:48).
Q: the MaGrav systems .. sorry I didn't understand that.
K- The MaGrav systems are set to create this energy production using CO2. I gave a very big secret away. …

Any other question.

Q; Kay … (2:50). When the planet earth gets absorbed to the sun, obviously the human race will be left out, in a way, that we don't have any other planet to exist. .. would another planet be available that the conditions would be that we could exist on that planet.

My bigger question is, when the sun itself will become part of a bigger absorption, say a black hole, does in mean the human race will be wiped off, say a few billion years when the sun becomes mature enough for it to change its D, does it mean the human race will die away, because it is dependent on the AA which belong to earth, as well as to the SS. Are we going to be wiped off? Has this every happened in the Unicose to other races, do they get wiped off?
K- I can give you an example, in a very simple way. We have an island (Atlantis), which has happened to us many times (as a human race). There are people who live on this island, and suddenly there is a volcanic eruption and noting left of the island. But we have citizens of this island who have traveled to the other part of the world and taken sanctuary in other countries. Would the name and life of the Island which doesn't exist, it's submerged under the oceans, die off, (2:52). or its citizens have become the remnants, and the sing of that island.

The STM has traveled the spans of the U, and we are those left the island. It does not matter if the island exists or not. The soul of us, man at the moment, who leave the physical body takes a position in the U, it's not just gone. Part of its energy will go somewhere but as a dynamic Pl, it'll find it's own position. It will carry .. the fingerprint of life on this planet, that where it came from, and maybe as it is part of a structure of it, it will create a condition of AA, the same as what it did, or near to it, of this planet.

So it doesn't matter, sooner or later this little dust will be absorbed in a bigger field dust, and the bigger field dust will be absorbed in an even bigger field dust. We are just a field in motion, and why do we fight for, a few seconds of manifestation. We are not. You are worried if you are going to go and become part of the SS or the sun, but in fact, long before that you have already become part of the U Community by leaving the physical life.

I used to come from earth. would you be able to create a DNA RNA of what you become a star of , and become a sun of, (2:54). to create another planet, that life can exist on it. Would I create that DNA, like the physical life you create with DNA in your child? That's the dilemma that you don't know yet. Don't worry about it, if it is going to happen tomorrow or a billion years, you have already carried, you left the island.

Q: .. but we need the AA, Mr. COHN, in order for us to stay the human shape in P, that we do .. ..
K- Do you need the AA, or do we need the fields of the AA, that's a different thing. Or you need a combination of the fields, which manifests itself in the D of that AA of the man on this planet.
Q: So presumably there would be an environment where the fields of our AA can actually manifest there, or we can trap, so it can create its presence and shape.

K- Yes, but it doesn't mean you are going to have 2 legs and 2 arms again.
Q: Yes that's what I am referring to. I was trying to say, does the race, the human race, the way we stand actually dies away in a few billion years.

K- Not really you just evolve in different field strength.
Kowoss did you hear the American teaching last Sunday, somebody said, Mr. Keshe was in London .. did they meet ..
Q: Yes .. I kept my mouth shut quiet ..
K- It was an honor to meet you ..
Q: the honor was all mine, (2:56). The pleasure is all mine, every second of it is like a lifetime, trust me.
K- Thank you very much ..

Any other question

K- .. hopefully we share more knowledge in the coming time. In a way, the world is a better place even though it looks a little rough on the edge, to what it was 3 - 5 years ago. Man is not going to war, man is becoming aware of the use of the energy fields of the U, in the form of viruses. In a way, if you look at it, the credibility of the world leaders with Corona and now with the other parts, which are coming up, has been dented heavily. Where the population and mankind decides the future of this planet, then those who thought they can control the money and control other bits, and food. We are on that verge with the new T, to give that freedom, that you can decide, and how you decide it and how you bring it. It's not an easy job, it's not so easy to be in that position.
Thank you ..
(2:58).

424th Knowledge Seekers Workshop; March 17, 2022

(Quick index done mostly - Proofed and transcribed completed ; need to Key phrases, Words,) Excerpt Replication Unit 1:35

Watershed teaching of communication of the soul; Communication system has a soul; Food from surplus energies of U not other beings; Replication Unit - You are the Cup; Nowruz Table includes every life on planet - EU; 5Plus1 Negotiations details and piece of cake - Iran accepted supply fuel - T come out this way; NASA to get FEU; NASA return to moon; World leaders children of UC - need strength of soul; Hair - Nano material release and absorb fields; Soul becomes a sun; Soul is M field you decide if particle or wave; Elevation of soul become allergic to this U;

Communication through STM in the Universe:
The purpose of today's teaching is to open your eyes for future teaching of understanding the method & line of the communication. Through the STM we do same as P, but with emotion of love, unconditional giving, understanding ones own creation.

ENGLISH TRANSCRIPTION

proofed 424KSW

(:20).

K- … We hope we extend our knowledge and understanding with how, and the things will come to be. What and how we will send our knowledge to each other without, going into understanding of what the man has made. (:22). How we change our ways of communication. We used to shout, .. howl across, we used the drums to communicate to. We became advanced, and we found a way to communicate, 1944 we called it telephone poles, telephone lines. We advanced further, and now we have made all these fancy systems, we have mobile phone, wireless communication, but has there been, is there been any wireless communication, has there been cables, has there been drums for our souls to communicate with each other? How do we feel each other, emotion of each other? Have we had systems, that we not knowingly, deliberately made for our souls and our emotions to communicate with each other.

This is where the new T comes in, .. the understanding of the T of the creation comes in. Now we have to understand what mobile phone, what wireless phone did the Creator create, for the Soul of the Man (STM) to be in touch with another soul. For you to dream and visualize it. (:24). We look at our mobile phones, and we think we are so advanced, now I can fold it, and the screen doesn't bend and cracks. I made it so small I can put it under my skin. But still has a system failure in it. Still we have not managed to do it the way the Creator has done it.

If I concentrate and understand the work of, my work, I can tell you "I love you" and you'll feel it, you'll feel the emotion of the love, of being loved. Our present communication does not include emotion. It's cold, it's cold as ice, what you put in it, you get out of it. It doesn't carry any sense of understanding of emotion.

But how come the communication of the Creator carries that? How much more do we need to understand, .. to learn, just to become a speck of dust of the knowledge of creation. To understand it. When the mankind can make systems, that carry emotion, he might have just, just managed to scratch the surface of the knowledge of creation (KOC), as the creation is dependent of the emotion, emotion of the soul, the emotion of understanding, is very much the way you feel it when you dream, of your mother, and you hug her, and you kiss her, and she kisses you back. You feel the emotion of the skin, .. of the breath of the mother, .. of the love which has no physicality (P) but is all in the dream, in the dimension (D) of the interaction of the STM.

So the mankind needs to develop, (:26). its own intellect to understand the method of the creation and communication in the world of the Creator. We have a long way to go. The moment today, we are developing T, that still use matter state (S) conditions to transfer

the emotion. To transfer the emotion between the STP and the STM. Those of you who have been in the new systems know how it touches you. How you feel the emotion in the brain of the man, and then it converts itself to the STP in the heart of the man.

How you settle your emotions with the things, which in the past you could not solve with the parents, friend, or brother was alive, but now you can do. In a way, I could not speak to you when you were alive, I could not settle the misunderstanding, I could not explain it to you, when you were alive and were with me, or you are still alive in another part of the world or U, that we take away the conflict. We bring the essence of the love and creation between us. But now with this new T you can do.

Those of you who have been through it, know it is so real, even interact with daylight. You see it you feel it, you understand, that the emotion of the presence in the D of the soul, through the work of the systems is so profound, that it changes your life, it brings you comfort, .. peace, .. understanding, .. to the point to understand, there is more to life, (:28). than a mobile phones, and pictures, which comes with no emotion.

Now the new enhancement units (EU), the brain units, which we are developing, carries that emotion, .. love, .. understanding, not only with your uncle, mother, brother, but with the whole of the U, with the whole of understanding of the process. In the coming time when you fly from one planet to another, you are not aware of the stone, you are going form one city to another, you are not aware of what is there, happening dangerous, the soul of the people of that area, the soul of the people of the earth tells you not to come. Be careful, Or we need your help, rescue us. There is no SOS message in the STM, we don't have irons and woods and ribbons to make it SOS, but the STM, soul of the captain, the soul of the flyer of the system has become aware of it through the KOU.

This is what the new T will bring, .. the new step in delivering the T to humanity. As you remember last week .. we tried to bring this up, step by step, that you understand it. It's not to you, that you are the listener of the teaching of today. These recordings will be listened to for thousands of years, for the new generation, for the new Knowledge Seekers (KS), and then they develop and they understand, the progressive development of the creation of ?? peace and understanding, not will be only the level of the physical .. the planetary system, but will be amongst the men, amongst the men and other creatures, .. and travelers of the U, when the man himself becomes the traveler.

In a message (:30). to NASA headquarters in the past few days, as know we intensifying the delivery of the systems, was very simple. We give you a system as a gift, for you to develop the T, that with us we become peaceful. As I explained to the head of NASA mission to Mars in the past few days, the reason we withheld the delivery of the systems to Arizona (AZ), as I explained to John many times, and John understood fully, and we both agreed on it. Was not to put the T of the space, advanced from Iran, in the hand of the Americans to kill more Iranians, and create more sanctions with our own T.

Now that the peace has been achieved, now that the they have agreed to sign the peace treaty in Vienna in the next few hours and days, we share the knowledge. We have gifted

a unit to NASA headquarters, Marshall's space center, and we've told them, you want it, you want our help, you can do, but we leave it to you to develop it. We leave it to you to understand the new era. As I said to the Marshall Center, they just announced the delivery of the new flight system, more rockets, I said, is this still a joke going on. They say, we have no other T, what do you want us to do?

In this process by sharing, and giving the knowledge, that if you want to fly from Tehran to New York , you just need to be thinking of it. If you do not manage to reach the level of understanding of the motion of the STM, in the EU you do. The whole process of the communication is to understand, (:32). the way even some of our own creatures on this planet work and fly.

We see millions of birds as I said before, we see millions of the fish together, they never touch each other. They never come even in contact with each other. Because they work through the dimension of .. the M fields, the interaction of it. You bring a minimum setting in your flight system (FS), it means that it cannot, does not matter at what level field it is, even the emotion, the physical body of the man, a lamp post, a stone, a dog, that minimum strength M fields, will not allow the two to touch. Keeps that distance, the way the fish do in the oceans and birds fly in millions across continents. We don't see birds falling off the air, when we see hundreds of thousands of them are flying together. You want to see this beauty go to Ghana, .. Accra, and then watch every morning, and every afternoon, hundreds of thousands of bats take to flight and come back. The sky goes black by them, but you never see a single bat to fall off by accident, by hitting another.

When you set the minimum, .. a condition that no soul in the strength of the G field of the earth will come to touch another, accidents become impossibilities. You communicate to the strength of the soul of the system, with the Soul of the Man (STM). You even have to understand the strength of the soul of the stone, that it don't hit the stone or the lamp post. If you remember in the teachings before I said, (:34). it becomes impossible to have accidents with the new systems, now you understand why, .. how. We set a minimum interaction of fields within our FS.

Hitting a meteorite is impossible, because we can set the system according to the universal minimum standards. Meteorites are this part of our game, what about meteorites outside the solar system (SS), which are much bigger and more effective. What about the meteorites in the U, which is the scattering of the SS and galaxies debris. Which one piece can be even bigger than the earth itself. This is the beauty with the new knowledge, … when we set the minimum FS, do we set it for the minimum flying gap for the earth, SS, galaxy, and the U, and for Unicose.

This is the knowledge the man has to gain, .. the new enhancement center (EC) systems we are developing, I have (in a) hidden way built into. Look at what you were taught months ago. You should have understood, you should have grasped the whole idea, of why we gave you the 5 Stacker Unit. Hidden in that structure is the minimum limitation interaction of the STM on top, and the G field of the earth at the bottom, which carries

the Inertia in the second level, which means man has been given a full FS in the 5 Stacker unit. Now you understand, now you comprehend (:36). how we have covered all the bases, with you, that when it comes to it, you say yes, how come we missed it. Because you didn't have the knowledge you didn't know what it means.

When you have the bottom stacker of 5 units, it means you cannot touch the soul of no matter state (S), which is the gravitational field of the earth. On the top you carry the STM, it means you cannot touch no soul, you cannot come physically in touch with it. Killing is not just by, not taking a life, it's by preventing the thing to happen. This is the beauty of the teaching, which I have given you. I have hidden the knowledge of the creation (KOC) within the simple instrument, in a simple unit. Those of you who have destroyed the 5 Stacker Unit with what I call, clandestine activities of enemies of the man and the KF. Now you understand what you missed. The Devil lays in different clothes.

If you understand the system, why we gave you the enhancement unit (EU), in 5 levels is to understand, that even the Soul of the Physicality (STP) of the man cannot touch another. It's impossible, if you understand the knowledge behind it. You have to integrate all this knowledge in your FS. Do you need communication system, do you need to understand where the gravity of the earth ends or begins, because even you are on the other end of the U, you can go with the speed of, million times the speed of light, past the earth, but never touch it, because you set that minimum to all planetary systems. (:38). Now you understand, the communication is not just words and emotions, but by respect to travel, in respect to understanding the position in time and space.

Today's teaching is fundamental for those who take with us into the space T of coming up. What is to come. As I said, to the heads of KF teams, who are responsible for different aspects of it, we start the FS from now. KF in next few days will fly the units across to US, to NASA, to Arizona (AZ), to Tehran, and Vienna. We'll ship the control system in a different way to AZ from Austria. We are back in track, as we achieved what we said, the peace process. As was said, in the past few hours, the world leaders (WL), peace has taken, and claimed its position to create a world peace. His Excellency President Biden has taken that position.

Which means the wishes of Universal Council has been fulfilled. Now we have a leader who takes peace serious, and is committed to it, to the wishes of your wish, to guide the WL into peace. I was on the road to the American ambassador in Vienna in the past few hours, in response to the signing of peace treaty with Iran and the end of sanctions, that America cannot use, and committed itself to peace, the T of the KF to harm another. We have gifted a unit to NASA.

Which means AZ and NASA, hand in hand will fly together. As I was speaking to John last night, if they want to work together, they have to bring the two units together in AZ, or in NASA, that we have the twin systems to fly. (:40). In a way, the KF knowledge and the governmental knowledge of the American government, will come hand in hand as one unit. The way it will be with Iran, .. with Austria, and the same with China in the

coming time. We need the Chinese leadership to commit itself to peace, and they will receive the T and the know-how, not as a competition to be a superpower to impose.

We see this situation in Ukraine and you understand why we have never included Russia at this moment of time as part of the KF delivery system. As we were aware of what is to come, and the situation in Ukraine was very clear to us, some 6 to 7 years ago. When Russia commits itself to peace, will receive the T the same.

As I said to the heads of the KF in past couple of days, we have between 3 to 5 units a week to allocate. In the next week or two, we open the channels that you vote, as the KS who have supported, to which nations you would like to see, to receive the units in the following weeks. But there is one thing, we won't allow all the Brazilians to vote for Brazil, .. all the Italians to vote for the Italian unit. You have to vote for another language and nation outside your own.

The question here will be simple. (:42). You will see the delivery of the EU freely by KF to all the nations we promised in the coming weeks. Now that we have found a leader, who leads for peace, and soon we'll see the same thing come from Ayatollah K of Iran. We'll see the end of the politics and the religions in fighting each other, but work in unity to bring the condition, that what we asked for, for years. The unification of the politics and the religions in setting up the new standards for humanity for peace.

So we will try to do it this week, but it will be next week hopefully, you can vote, as KS who have supported us, to which nation, you would like to see their scientists, to receive the next unit. The only thing we have to do, is to fill in the destination for delivery. I kept my word and promise, and we fulfill the promise.

If you remember last Thursday in teachings, that I told you I will be meeting with Iranian officials in a few hours. And you saw the reaction of our meeting within a couple of hours after our meeting. When the Iranian head of negotiations, suddenly and with no notice, left the negotiations and back to Tehran. The evidence we provided to the Iranian officials was so profound, that they saw no reasons for carrying on with negotiations till certain points were settled. (:44). We saw, with our communication with the American embassy and the White House since Monday, explaining the situation why we standing out, has been resolved. We got what we wanted, and the peace is on its track. The signing of the peace will be a few hours, maximum of a few days. We try to do it before the Iranian New Year, it is the wish of the nation.

But it's communication between the souls, which sets these things up, not by accident. What you see in the clay, we see in the dust before the clay is made. What you see as a flower pot, we see it, when it is the dust on the ground, that what flower pot it will make and what beautiful thing it will be. This is the essence of the knowledge of understanding the communication of the souls.

As you ask, can you come to London to see me, from Washington, I have buy ticker, I need time to arrange, so it is the same with the soul. When we tell the things to happen

we need to organize everything else, as the souls now have agreed. Sometimes we push it, we get it done faster, sometimes we wait thousands of years to get everything sorted. Now today we achieve both, on the agreement of the souls of thousands of years has come to an end. As the agreement of the few hours and few days has come to completion.

So it's important for the KS who enter the development of the next cycle of communication, to understand for the first time, even your communication system has a soul. (:46). Understand the work of it, understand the line of communication of it, and then you'll find we'll make one of the best communication systems, even for translation of the languages, and translation of the emotion of the creatures of the U, across the Unicose.

In the new EU, .. the Vision, we have built this, it has a soul, the system is based on the creation and communication of the soul. We have hidden the knowledge in such a beautiful way, that man will take hundreds of years to unravel. These units in the next few days, will be flown to AZ, as we made AZ the center of the excellence for space travel for KF, for what we call, northern America continent. Tehran will follow the same as AZ. Let's see, as we have not managed to complete the full negotiation with the Iranian government.

There is a problem, which has to be solved, in the offices of Ayatollah K office, his leadership, Iranian government, and KF. The problem they have, and I have explained to the American authorities and the others. The man who is leading Iran in the new T is half Jewish, and they cannot swallow the fact, and they cannot sell to the nation, that we have a Jewish blood, is devoted to Iran. This is why we never received open support, (:48). of the Iranian government. As how can they blame a nation, who is the matter of the offices of the government kills, and another Jewish blood helps. So we .. we are committed to peace, nation, color, race, or religion is irrelevant, it's how we manifest ourselves. Now you understand how correctly we have conducted the work of the KF.

You as KS carry the emotion through your souls, your teaching and your understanding of the knowledge in totality. The process of the communication through the understanding of the STM, is the biggest step for man to be able to travel the span of the U. Developing interim systems for him to understand, step by step, is what we have done with what we call, the EU. In coming time the next generations of the man will not need the systems, as he will learn how to do it. It's literally as I said once, it's like a man who knows to walk, but is on crutches, he is wounded, and he needs to learn how to stand up, .. walk , and then with it he knows how to jump, to dance, and what I call, do a marathon of the knowledge of the Universe (KOU).

Your understanding of the creation of the systems, which carries emotion, .. the essence of understanding of the emotion of the man in the D of physicality (P), (:50). and emotion of the man in the D of the soul, is the prelude to total understanding of the work of the Creator. When you can translate the emotion of the soul to the emotion of the P, irrespective of the place, position and time. When the time starts, from when you manifest yourself, so the time is at zero point, at any point when the man manifests

himself, and has not been manifested. But he still exists in other realms and the strength of the fields of the U.

The birth of the child is not the point when he manifests himself from the womb of the mother. The birth of the child is the fields of the origin, where you emanate from the soul of the Creator (STC). That's the knowledge, which man has to understand, and then in that position of the birth of a child, just a, what we call, the STP to live in the D of the womb of the mother, or the atmosphere of this planet.

Then one of the biggest problems for human race will be, how do we give birth in the D of the U. We have no delivery rooms, and no we have no .. physical D, what will happen to the souls, which will take the shape of P? Do they need to emerge from the womb of the mother, the way it does on earth. Or we communicate with the soul of the child within the womb of the mother, within the structure of P of the life of the soul, that you are getting manifested in this place, even though you carry the soul from the amino acid (AA) of the earth, you decide how you want to manifest yourself. You're still the child of mine, I still love you as a soul. (:52).

It's the same when we give birth to a child, if it's handicapped, if it's blue eyes, .. red haired, it does not make any difference, we love it, because we created it. Blind or without arms, still loved by the creator, which is the mother and the father. We are blind to the rest of the disabilities, even we are knowledgeable of these disabilities.

This is how the man is going to be in the depth of the space, when we give life through the STM. Our children will look as they need to be, in the environment of the time and place and the space they are born. We are used to 2 arms and 2 legs, our child will have 20 arms and 20 legs and no P in the D we want to see. We have to accept the new understanding and through it, develop our senses through the emotion of the soul of the child, irrespective of its physical manifestation.

The way the parents do on this planet, when you have a child that has all sorts of disabilities. The love of the father and mother is not limited to the P restriction, or the beauty of the child. It's to the soul of the child, and this is what the man has to learn. Because the child will feel the disappointments in the parents soul, "I don't look like the ones from earth, so they don't love me." Where it has to be you're loved irrespective of. This is what the challenges the man will face in the coming in the opening of the space to man.

When the man comes out of the monkey suit of the NASA. (:54). We shall not die in space, because we don't wear a suit. We'll survive every condition in the U, because we travel with the suit of the soul of the Creator within the structure of the D of the STM.

Man has to understand, that the new ways of communication, that the new ways of interaction is not just by the phone. You communicate with the guy on the street, you walk first, I walk behind you. You cross first, and I go after you. Please you go through the door, and I go after you.

There is no word language. The space is the minimum gap of the fields, will dictate that. The one who is the weakest will get the preference, that he gets at the time of passing, elevation of the soul, from the one which is stronger. Mankind has got to come to understand the point of the existence, the emotion of the planet, the emotion of the galaxy, the emotion of the STM , the emotion of the U.

Some of us, now that we understand the next steps of development, will not be to tolerate through elevation of our souls, the condition of this U. We call it, we become allergic to it, because we can give more, we want to give more. And for it, there are other universes, which work in the higher level that our soul fits into. We become the passengers of the new universes, through the elevation of the soul. (:56).

Now you understand why some of souls, which are created on this planet do not exist in this U. They are already passengers of the other universe in the Unicose. Because they elevated through serving humanity and the others, to reach to the point of higher elevation of the field strength, that they have taken the position, in that position in time and space.

Go back to some of the teachings of the past and then you'll understand. Then you will understand that the elevation of the STM. Why we are here to serve and not to be served. We are here to serve other souls to elevate, and with it to elevate that soul, to become better, to serve more to become the sun, sources of life, of the completion in other D, and not necessarily on this planet, in this galaxy, and this U. Don't forget the spiral of the M fields, the higher you elevate, the stronger fields you carry, the close you become to the Source.

You don't need no prophets, and don't need no churches and temples, where your churches, becomes the Creator and no one else. As you understand the KOC, .. the line of communication of the existence. You elevate to receive the KOC from the Creator, on the direct line of the KOU. Why do you need Mullahs, Ayatollahs, priests, (:58). Popes, rabbis, to put the touch of their own mind of what I call, tainted life into it.

The whole process of these teachings today, is to open your eyes for the future teaching of understanding the line of the communication, the method of communication, understanding that we communicate in the D of the STP, in the voice, touch, smell. In the D of the STM we do the same, but different smells and different touches, in a way, confirmation of existence. Emotion of love, emotion of being there to give unconditionally, is the level of the maturity of the STM to understand his own creation.

We are not a sect, we are not a religious organization. We are an organization structure, that understands the reality about the process of creation and how mankind can work, endeavor to reach a better point of understanding of the process of his own creation.

We used to look at the sun for millions of years, we saw the warmth of it. Then some of us decided to make everything, from SS and everything else from its rays. We learned

how to convert, now we have to understand how to convert the knowledge of the Creator even with the systems, and then man on its own, to benefit of the elevation of the STM, and not to heat a water, or boil a kettle on. (1:00).

The understanding, the process of the teaching has been step by step, that you have time to play, to mature. When we have a baby on the playground, never seen anything, we give her a little toy, we give her something to touch, that she can understand "this is my finger, and this is my toes," and then, when she understands more we give her another piece, and then we give her something else to elevate, to learn more about the vision and colors, what color is what, and then the sounds. In all my teachings, I have done nothing but this.

Human race is at the infancy of the knowledge. So we gave you the MaGravs, we gave you the Stacker Units, .. other bits, that you don't only see the colors, but you become aware of the fields, the emotion of the fields. Go back on the teachings of the past few years. I kept on telling you, you are looking for P, where you have to look for the fields. This is the reason, now you understand why.

You cannot fly with a MaGrav, but you can fly on the fields of MaGrav. You cannot get energy from the U from a MaGrav, but you can use the fields of MaGrav to tap into universal energy. I gave you the most powerful generator, and you are still after the crumbs.

The purpose of the teaching of today is to open another channel in the line of communication, which up to now we have not covered much, in the teaching in the past 10 years. Now that the KS, the governments, and the scientists are ready, to take that step towards peace, to be able to communicate, to be respectful of each others existence, not only on this planet, and beyond, we open the knowledge of communication, (1:02). in the world of … U. In the D of the Pl fields, .. of the creation and the Creator.

Maybe one day you'll understand, and some of you will elevate to the full understanding of the teachings, how we built up for you to feel the fields. We gave you the Cup of Life to understand, it goes in my body and does something. I cannot do, and it's there. Nothing was better for us, than the Corona, for humanity to learn about the creation, work, interaction of the fields, within the body of the man.

Many people said, but Corona killed many. Please go on the .. statistics of the world and look how the statistic has changed from influenza to Corona. So you haven't died by many more, you have just learned about the effects of the fields. As I said, .. if you look at the statistics of the Corona, and influenza, one has replaced the other, and even less have died of influenza and Corona put together.

We need to understand this process, we need to understand when the man does not take the step, we take steps to teach and to learn. In so many ways, we have no choice, man has been too lazy, too self-centered to learn about the works of the creation. So we do the job for you, in different shapes or forms, (1:04). as a Cup of Life, as a MaGrav system,

Gans's, as a FS, that gradually man will learn. It's that toy to teach you about the first noises, .. the colors. Now you see the color of the beauty of the Creator.

Today's teaching is another .. watershed in the teachings of the KF, for man to become aware of the communication of the souls. I touched on it in very simple ways in past few weeks, but today you received part of that understanding.

How do we make these systems of the emotions. How do we understand, how do we connect each emotion with what. As I told you before .. when you stand in front of another creature from another D in the U, you say, does he want to eat me, or do I want to eat him. The other one never has the intention to eat, because he knows he takes whatever you don't need. But the intention of the man has been, I put it in my mouth and I taste it. If it kills me the others learn. If it doesn't kill me we eat it as a new source of food.

This is where it comes to an end, the soul of the person, entity in front of you gives you what you need, it saturates your soul with a shortage, of what you are short of, you won't touch it. Now you understand how the system works. Now you understand the orange and the Cup, where the Cup is the man, and the orange, is the one in front of you. (1:06). If you need it you receive the fields of it. And if he needs you, he becomes the Cup and you become the orange to him. Would you eat, would you feed your child. It's the same.

How many of you have a dilemma, when you grow an animal in the house, you never kill it. When you look after it, you don't eat it. Have you eaten your dog, or cat. Have you eaten your goldfish in the box. But the others eat the cat, dog, and goldfish. I remember when I was invited by the South Korean government to Seoul in 2008. I was taken to the highest .. to the main streets of Seoul by the team, which we were taken there with officials. As we passed a shop front the translator told me, please don't look. I said, why? We went to the next door shop, it was a beautiful restaurant. After diner, I asked him to explain why he didn't want me to see the shop. He said that's a restaurant. He said, that's where we eat dogs. It's a specialty of the restaurant. I didn't want to insult you because we were going for a diner on the next door.

That time it didn't click on me. But later on I explained to him when I had a broken ankle lying in bed in Seoul. Coming out of the hospital I had nothing to do but to think. (1:08). The image of going to that restaurant came back to me. I called the translator … I said to him a simple thing, I said these two restaurants are the same in the back kitchen, isn't it? He said, maybe. I said, have you made me to eat, what I don't believe to be touched, even with the knives and the forks, which touch in the other restaurant, and shared with this restaurant. He said I am sorry .. we should have thought deeper then this, to take you to that restaurant, but it was one of the best in Seoul.

If you understand, you don't need to communicate. If you communicate in the level of the STM you become aware of the totality, what is going on, and what is need to be, and how it needs to be.

We have to understand, with the new understanding of the knowledge of the soul, of the P of the man, no object, no entity in the U is food for man. It could be source of us, (1:10). becoming the energy feeder to it, or we'll receive energy from it, if it wants to, if it has spare to dispose, that is at the strength of the body of the man, and the STM to absorb it. Where we receive the energy through the STM and by, in a way of conversion of emotion, we deliver to the P.

The progressive development of the science of the creation, is obligation for man to understand, it does not matter the place, the time, the position. Now you see the feeding does not become a matter of importance, shelter, we shelter ourselves with the fields of our soul, but the P doesn't feel the cold. The food comes from the surplus fields of the U, not from the life of another being. This is what these teachings are about. To understand now the creation, the communication line of the soul, and interaction in the field strength of the soul, as the soul itself has a field strength, and is part of the world of the Creator, and in not the exclusivity of the man, and the life of him.

Try through the systems, which we have developed for you, and I even gave you more extensive versions of it to be built. Why is that? That you cover the minimum and maximum, and understand the composition of fields, that you need to make, as a sample, (1:12). that you can test with your soul, to what level you have become mature to. That which part of the U you can become, what we call, the traveler of.

When I made you the Cups with so many different elements and different shapes, spiral, and flat, or whatever was to bring you that minimum connection, understanding of the strength of the soul. Then you stand in front of what you created and see if you feel the emotion. It's another creature, which you have created. It's not in the womb of the mother, it's your imagination, it's your creation.

Then you understand how I explained to you that I will make a fish in the tank for the man in front of it. I make the soul of the fish, and that soul takes the shape of the fish in the tank instantaneously. Now you understand the line of communication. Now you understand the knowledge of the soul.

Maybe, maybe we become wise to understand the totality, and appreciate the beauty of the creation. I hope I brought you a new D to think. And I hope I brought you a new understanding to understand, I hope soon all of us will come to the point to understand, (1:14). more about our own creation and the Creator.
We go to a break .. and try to see if any of us have become knowledgeable to that point of understanding …

Easter Products .. This Sunday 3/20 celebration of the New Year in Iran (1:16).

>> PROOFED to here >> continue

>> BREAK >>>> 424 KSW March 17, 2022 (1:34).

(Excerpt: 1:35:00 to 1:43:36 Replication Cup)

Q: … When you set fruit on top of the jar of Gans, how does the taste of the fruit go through the jar and get into the Pl water, and do you absorb all the vitamins, minerals and nutrition?
K- You even absorb the soul of the orange, or part of the soul of the orange, a reflection of the soul of the orange, too. You have to understand it's not just the Cup, it's the structure of the Cup. (1:36). When we make a replication unit, which is the Cup and the orange, it's not just a Cup. First of all you have created, D of life on this planet, which is salinity dependent. You have filled in the Cup with water, So now you have created a condition of life. That's the position of it.

You always, the best salinity is 0.9%, which is the salinity of the blood and the STM . Then what we have done, if you look at the replication unit, we have created, or we have placed bottles of different Gans's in this .. containers. These Gans's are M field dependent, so now this water inside is not anymore water, it's a M field water, of both strengths of what we have put, but we have pre-selected these what to be. So we know it will be at the strength of the AA. So this orange has a magnetosphere, it radiates. It's not just an orange as you are used to it, because you look at the physical D. Now you are absorbing all its essence. You created a communication, a line of interaction. This is the beauty of it.

Now change this Cup, with the brain, (1:38). and the P and STM. Do you need that Cup. Or if you understand the interaction, you create a condition of wanting the orange, you will receive what the orange doesn't need as a field, it is there to manifest itself, to show itself, so it has already given it out, and you have picked it up. That's why you don't need to kill the orange to eat it. That's why you don't need, that position and interaction.

Many of you have opened many oranges during your life time, .. have opened many nectarines in your lifetime. Many of you have eaten apples and other fruits. Have you ever paid any attention, when you open an orange, between the segments there is a space free, even the tightly packed one have it. When you look at an apple have a look where the seeds are. Ask yourself one question, would this be the soul, the place of the soul of the orange? Where in the brain of the man we found that hole (dot on MRI).

This is what, (1:40). we have to become, not accepting just because it's said, understanding the process that we do not need to accept, because then it becomes intellect (a concept). It's us who has to understand how to expand the fields of this (STM), that it covers everything, and the strength of the orange becomes part of its strength, that it does

not need to create P to kill, to destroy the orange to have its essence. Then maybe if you look at it in another D. One orange on earth is enough to feed all the wishes of the man in U, all the ones from planet earth, on planet Zeus, or any other position, to feel to taste that orange wherever they wish.

Do we have Alex from Nigeria … No. He is very busy this month. .. Alex did one of these experiences with 3 different things, with orange, with something which makes you drunk, and I think it was a banana. As he wished, he received and he tasted it. Alex carries a beautiful pure soul, and he is one of the leading KS, (1:42). does the most strangest things, which the professors in the universities won't accept, because he doesn't have a degree, but he is 3 professors, 10 professors in one, because he is not reading the books. He understands the process of the interaction of the fields. He can explain to you, if he were here, because when he did it he was shocked how he got drunk at night, and how he was feeding himself with banana, and how he received his orange juice in the morning, and the taste, the emotion, and the feeling of it.

He didn't need that Cup. He in a way, became the Cup. So when you ask do you feel it, even the what I call, that soul of the orange has a M field strength. You just look at, do I taste or feel it, but what have you received from its soul D. This (matter part) is 20% of the pleasure. This (soul part) is 80% of the pleasure, and mankind always looks for this (20%).

Any other question. (1:44).

K- I would like to share something with you and our Iranian friends, as you know it's the Iranian New Year celebration coming up, this is as you have seen. It's short of one thing, that should be there by tonight. This is the .. Iranian New Year celebration table, and embeds in it, the whole history of man, what man has received as a gift from this planet. The plant, flower, egg, the sweet, and the apple which is the creation of life, and in totality when you put it together.

When you make an EU it has to carry the emotion of all these, to make man the traveler of the U. That you carry the memories, the strength of the soul of the apple, and the orange, that we do not need to destroy it, or come to earth to see. We can manifest it through our soul in the D of emotion.

This celebration goes back to time of Mitra and Zoroaster. Even the light, which is the candles in the form of light of Mitra and the Creator is on the table. The egg represents the earth and the Unicose and the U, and it's in the shape of what it call, (1:46). cosmic D and structure. If you look at it, it's very much the shape of the EU. That's why we built the EU in this shape. The shape of the interaction of the M field, one end slightly stronger than the other, that allows the interaction of the fields of the U.

I wish all the Iranians the best this year can bring, we hope that the peace treaty in Vienna will be signed within the next few hours, and even just before the Iranian New Year .. for

the Iranians to celebrate a change, and for a lot of us to receive a new D in life and T, as we share it now openly with the rest of the world nations. Happy New Year..

What is missing in the center is the bowl of fish, which is a sign of the liquids, of the life within the D of the oceans. It'll be there by tonight.

Any other question. There is something in this picture you haven't noticed, is the mirror, which reflects the light of the Creator on His creation. That's why we put the mirror on top of the table. Where it reflects all of its creation within it, which is the light of the Creator.

If you look at it, in a way you still see the Easter Bunny, (1:48). or what you celebrate as an Easter in Christianity with the egg. Then you se the Christmas, with the plant with the lights, we put lights on the Christmas tree, and the other ways you celebrate in Christianity in totality of the coming of the New Year, as it, what I call, the child of, what I call Zoroaster and Mitra, in different shapes and names and forms. It's beautiful to see this. I remember every year, how feeble the man is, and how man is still physical in every D of it.

Thank you … I wish you all of a beautiful new year. It's going to be beautiful, we know what the souls are about to bring and how the man will change this year.

Any other question

Q: .. Did you say you can materialize a fish with a thought?
K- If you wish to you can do. There is no limitation if you understand it. Thought is the field of the emotion of the brain of the man. There is no reason why you cannot. Have you ever been through the process of visualizing somebody or something has visualized in front of you, but it doesn't exist. It just exists because you want it to be visualized. (1:50). Your dream isn't it one of them, the interaction of the souls.

So we fulfill that dream. You might see in that fish, the goldfish, somebody who would likes to see a crocodile will see a crocodile, somebody .. will see that. We create the emotion of the fish, you decide the taste of the orange, sweet, sour, it will be red orange, or an orange I used to pick on the tree of grandmothers garden. We provide the D of .. satisfaction of the emotion of the STM. Then man will paint it the way he likes.

If it's the New Year as we saw on the table, we always have a goldfish, maybe somebody would like to have a piranha in there, you'll see it. You decide through the D of emotion. This is exactly what I said, when you go to other D in the U, you decide how you manifest yourself, because it's the emotion in interaction with the field of the time and place, which gives the D of the survival. The soul cannot die. It cannot be destroyed, so in condition of interaction of environment, and the STM, P is created, to satisfy the emotion of the existence.

So in a way, I can create Christ in front of you, because it's what will satisfy your emotion to understand, to confirm his existence. (1:52). The true resurrection, but through the field of the wishes of the man. So would you like a fish, or would you like to see the Christ on a pole, or in the pond, or in the container. It's you who decides according to the wishes. Now you understand the knowledge. This is not a magic, or whatever. It's you who decides the manifestation, not somebody else. We provide the energy pack, it's you who colors that energy pack. It's a plain canvass, you draw your own painting, through the emotion of the STM. Now you understand the knowledge behind the T, there should be no much problems for KS.

Any other question.

Q: Nikolai .. it's been a few years since I was in these teachings but it is good to be back .. (1:54). …. about a certain realization I had about the CO2 Box, it .. related to the 5plus1, that I heard you speak about but in a different way. I wanted to … share …

When I drew the box in my minds eye, I had a plate of Zn on one side and Nano coated plate on other side, and I considered this the first skin. Then the difference between those 2 plates I considered the value of 5. My second skin was between the AA on the top layer, and the CO2 at the bottom layer, the difference being 1. So … I had 5 + 1 as the soul of the middle of the 2 fields, and it struck me for the first time, that I had perhaps understood more, in the CO2 Box, then I ever had before. I wanted to bring that … I wanted to know if I have the correct understanding or I had made a mistake, that's all ..?

K- We understand it in different ways, (1:60). and we explain it in different ways. It's beautiful the way you interpret it. I always said, we take from this T, according to our understanding and intelligence of what we are intellected to. I said to, .. we see a flow of KS, but they always come back, because they have been beaten with the knowledge. They went away for a short while … in 1 or 2 years, they come back. Or they just come back to listen to the teaching, because they add to the knowledge, because they received it with love and care.

You interpret the way you see it, and maybe that has been a way to elevate the soul of the 5plus1 leaders, that's why your soul comes to contribute to it. There is nothing wrong in how you interpret it, or nobody can say no, it is this or that. It's to be respected in what you share and what you understand from it.

In a way, if you add it 5+1 it's 6, and 6 is C, is this what we extract, CO2 from the environment. Is this the line of communication in D of the soul, that you understand. In a way that you look at is, that CO2 Box has a whole lot of knowledge, a lot of ways of application.

That CO2 Box what you call it, 5plus1, it is 5+2 as well which is the connection to the universal line of communication. There is a huge amount of C14 created in that Box. (1:58). It's interesting to understand it.

If you make what we just saw in the teachings, they were talking about the bunny gifts (KF store) for the agriculture, if you just get the, what we call, the growth Gans's you might do 20 to 30% better, but as I said to our production line, add the AA of the material you put in agriculture, then you get 100 - 200%, because through AA you connect to the dynamic soul of the system, not just the energy system.

In trials we always have seen this. When you make these systems understand, if you are dealing with the matter S, Pl S, or if you are dealing with a soul state. You have to follow the procedure A-Z.

I watch what comes in with the … secret society with Jalal with making MaGravs and it makes me laugh sometimes, when I just see them flashing up, I say, they haven't understood yet. They haven't understood the work of MaGravs yet, they are still peddling in the matter S. Some of them … but still you have to understand, it's the essence of understanding what counts, not the P of what you produce.

In what you understood 5+1, which brings you back, most probably, that you would like to see the success of it. You added your soul, (2:00). to the weight, to elevate the soul of the world leaders. From the beginning of the time of this 5plus1. I have been in it since 15th November 2012 with Obama started it, we set it up, and we continuously stayed out of it, but we gave them a bit here, and a bit there to keep in touch.

When I met with the Iranian officials last Friday in Iranian embassy in Vienna, there was a puzzle, that why we didn't know this. Immediately Mr. Barbarry left Vienna within 2 hours. Because in the information we gave, and I have supplied that information, now to the American government directly to the White House, and we saw immediate change, again in the White House behavior, and they gave it, and have taken it to the Russians immediately.

We saw a strange phenomena, we saw the nest of the scientists of Iran being killed, centered, in ?? Arbell was flattened out. All the Israeli agents who were involved in killing Iranian scientists were taken out. This is a public information, I don't give you anything hidden, but we saw the reaction of Iran, into knowledge shared, and how Iran was victimized by the Israelis. In bringing, killing more scientist, in bringing the position. It was done in the middle of the night, not to kill, but to destroy the position. As far as we know, nobody was killed in that attack. (2:02).

It was just for Iran to know, now we have the information, now we know what we have done to it, and we show the American government. Immediately, now we know what you've done to, with whatever you've done, through Trump. We saw immediate guarantees, which was needed for 5+1, and now we are back on track. We hope that the Iranian leadership and the ministers will be in Vienna in the coming days, maybe just before the Iranian New Year, or just after .. to sign this agreement.

Because we went in with the soul of bringing peace. We saw immediate interaction with the Russians and Iranian foreign ministers in past 48 hours. We do a lot of work in the background explaining the truth, putting the elevation of the soul, and we always get it.

As Wang Lynn (WL) is here .. .one of the Chinese security people said to us, that he has been in meetings with the world leaders (WL) and they discuss the KF in the meetings, in what we do, at the world level which ??? Because we partially share this with all the nations. WL you are in the background would you like to come in.
WL: yes, but I am not sure what you mentioned.
K- Yes, but what I was saying we share all knowledge with the Chinese as much as we do with the Americans?
Q: yes exactly.
K- We share the same with the Iranians and the rest.
WL; Yes
K- Do we hold anything back from them?
WL: No
K- Doesn't this puzzle them, that how we work. (2:04).
WL: yes, I think we are going to get some goods news from government, they accepted our project application forms ..

..(2:06).

K- This is the new version of the latest evolution … it has changed to a new strength.
WL: it's already involving 28 provinces.

WL; Not much cases in our factory area

(2:08).
Q: Nikolai, if I may I had one other experience, that same evening. I poured a small bottle of Lugal's iodine into CO2 Box. .. My intention was to create the Gans of this for the ability to put into the fields of a MaGrav, for spreading the fields of the iodine, for people who have a deficiency . .. the day before the waters had been very orange from the iodine, and in the morning when I looked it was completely clear. There are AA on top and white Gans on bottom in some places, not a lot. Every trace of the70 mls bottle of iodine was gone. It struck me that this was the zero time communication in action. But it coincided with my understanding of the 5+1, at the same time, and I thought that was very interesting.
K- Let me ask you a question, what was your wish, did you have any wish about 5+1 before in past 2 -3 weeks, whatever?
Q: I have only listened .. I heard in passing (basically no) .. I didn't always know what you meant by 5+1. .. (2:10). .. but I am maybe not consciously getting the message. So at the time I didn't understand 5+1 … I didn't have a specific wish about that group, I didn't understand what the 5 meant until last 48 hours ..

K- It sounds like a Carbon, 5+1 (= 6 number of matter C). That's beautiful. .. We all understand different things on different levels, but at the end it comes to one point.

In so many ways, 5plus1 has always has been 5plus2, because Iran wasn't counted as one. Iran was counted, 5plus1 against Iran. Now it has become 5plus2, and we'll see beautiful developments coming up. It's by the wish. I hear Brazilians have every night a program for elevation of the soul of the leaders, and 5plus1. But it comes to one point, what happens once we receive that elevation, are we going to stop. Or we elevate the soul of the world leaders to the next step, to the next understanding, to the world peace, to sharing of the knowledge and technology. Would it be the end of the suffering for a few, millions, maybe 80 million Iranians suffered long enough with it, or would it be another dimension to opening. (2:12).

As I said, the delivering of flight EU to NASA, Marshall space center is an olive branch of peace to the scientists. As I said, before. to the Americans … the reason we didn't ship anything to AZ or NASA or to anywhere else, was not to give access to a T, that can kill, and bring more sanctions on Iranians by them using it. And the rest of us. The tool of war has to come to an end. Now we'll see in the beauty of it. Rick has on his system. We've seen the two FS. The Americans are promoting now, to send man back to the moon. It's amazing. …

R: Plays the NASA video .. (2:14). (2:16).

K- … I am back on .. As you can see NASA, if you read the article about it, is by the wish of President Trump, wants the Americans back on the moon, and they have come with a double rocket, which means with a twin rocket it will get there faster.

I wrote to my friends in NASA, I said, is that a new joke, or are you moving, or are you going the new way. It's very interesting, you put the 2 T next to each other. This is supposed to be the latest T from NASA, all they could do was to extend a little bit, another fuel tank. That's all it is. Very interesting is, are we still sticking to the matter S, or would NASA move into understanding the work of the U, and work into the M field of the U.

I think it will be a beautiful scene when the EU in the next few days is delivered at Marshall space center, and we see how the American space people will interact with this unit. They have all the details of it, they are waiting for it. As I said to them, you have 2 choices, we send you the control system, or you build it yourself, or we tell you something. I said, let me tell you something. (2:18). Your control system has to fit within, 12 cm maximum within the gap between the walls. It's a puzzle, but as I said to them, we have to explore both T, and not become arrogant that one is better than the other. Because both we learn something new. Somewhere I am sure in deep space one will be used for pother, and the other will be used for the other. When the rocket is in problem, they'll use the M field shielding for the system, not to get touched by meteorites, or you go through . .When you go to space, space dust is always there, it will be battered by it. somewhere in the future in our T, when we want to land something down we might use the propulsion, rocket T that's been developed. It's not to be arrogant,

but to understand, there are different ways of doing it, and we have to be open to both of them. and many others.

Once we say we are the only answer, it's the end of the cycle. The arrogance kills the whole knowledge. You have to be open, that's why we opened the patents. We see this, we see the evolution in the science, matter S and Pl S. and Pl changes to matter and matter changes to Pl. So we have to be open to accept both, and see where is the best benefit for the development of the knowledge, expansion and extension of the knowledge. It's beautiful .. .. (2:20). …

Any other question.

Q: Salomea … the peace Talks if you have some news. And a wish for peace .. (2:22).
K- Thank you ..
Q: (she continues…)

K- Nowruz means new day, and we hope that everyday will be a new day, and we start fresh and we learn more.

Any other question

Q: … on the 5+1. Mr. Salehi, who is half Jewish is not any longer the head of the Atomic Energy Organization of Iran. (2:24). So why aren't the 5+1 and Iran reaching a final agreement? The AEOI is now headed by Mohammad Islami.

K- The heads of .. The whole situation in Iran and 5+1 is not just about Iran. The whole structure in the background of 5+1, in principle, from the beginning was taken, as to be a weapon T, but in reality is colonization, and control of the future energy resources. The club is very small, and investors in the club are heavily involved in. Part of what we looked at, 5+1 from the beginning, before 5+1, when the sanctions came in heavily on Iran regarding nuclear, was a young boy trying to break into an old club. Was not accepting another person to share a piece of cake. Now we don't have that position. Iran has moved on, and in the past 15 to 20 years to become a master. The boy has become a man.

Part of these negotiations, as has become apparent in the past 2 - 3 weeks especially, (2:26). shows what we are prepared to share, and who we are prepared to share (with), and who we put on the watch of another, as a little boy to become a man. In a way, everybody benefits by the 5+1, hugely on the nuclear T.

The Germans forced the nuclear plants in SEK, in Belgium, to enter the nuclear arena outside Germany, where inside Germany they could not do. Now they have a medical reactor, invested about 10 billion into it, and they brought themselves into the nuclear industry, which, this was not supposed to be done.

The Japanese will not be allowed by the Americans, because they have a tighter control and it's an isolated island. The Chinese got a very big piece of cake, of this process, access to Africa and African resources of nuclear material. The Russians got better deal, the same through it. The Americans got a chunk of it, that they could manufacture the .. nuclear power plants, and sell it to the other countries.

Iran became a nuclear perforation nation, selling it, now as a little boy. Gradually into the hardware, because Iran's hardware is much more effective and much faster. No nation has managed to reach 30,000 rpm in centrifuge. Iran has, and makes it easier for .. higher isotopes to be prepared. Americans are after this T, is done by the Iranians.

So this was a battle of who and where. (2:28). They have actually cut the cake in pieces. We know where everybody sits. By fluke the British got a piece of cake as well, but they are part of .. the council in UN and they got themselves in. French are heavily involved, they got part of which, part of the world they supply the nuclear power stations as a sale. Every nuclear power station is round about 30 billion plus. So it's a massive injection of funds into a nation, and labor force and income, because it's not just building a nuclear reactor for Sri Lanka, or Singapore, it's the servicing industry of it, brings a continuous income for 30 years you have to deliver fuel, .. repair the systems, .. purify the fuel and everything else. So it's a very big industry. The 5+1, or the 5+2, Iran being included, was allowing the Germans to come into, openly nuclear T, which was banned by the Second World War. The Chinese got a beautiful deal out of it .. in Africa. Russia has come to sell its nuclear power stations to Iran and the others.

Overall when it come to an end, hopefully by this weekend, we'll see the beginning of the end of a lot of .. nuclear industry growth, but in the back of .. a lot of discussion and fighting of how to be done. In the past we had a problem, when I was in university time, there was a problem, which .. country was going to dominate. Even in England we moved from the carbon graphite cooling systems, (2:30). faster systems into TWR was the American system, because the British system didn't work properly. Then we saw the French trying to muscle into the British market, and the other places. It was a big battle for the governments in the background for the nuclear industry, who is going to take, and somebody wanted to take all of it. Now with 5plus1, with Iran, everybody has settled down, the cake has been cut.

We'll a little bit the changes, in how much shares will be given to, especially Iran, both on the fuel side, and the T side. Iran will become a perforation center for .. the negotiations. The negotiations will be Iran will perforate, but cannot use the fuel for weapon T, which is correct. I agree with that, with IAEA, and the Americans, and the rest. But this should apply to the Germans now, and the same to the other countries. We all producing nuclear materials, but not to the weapon grade.

Or we go directly into what we call, 100% pure Pl nuclear, which is a nuclear perforation system, which allows the totality of the knowledge to be added to. The perforation, plasma perforation, which is the backbone of the fuel for space T, is why KF is allowed

to be, within the framework of the .. Peace Talks. Because the Pl perforation is needed at 100% purity, to be to travel in the depth of the space. (2:32).

We cannot have systems which are not pure, and can create problems in deep space. You suddenly get a drop of Ca, then your reactor ends up to be in another part of the U, as you were expecting to be. So purification in the Pl space, has been part of the KF negotiations, as a 5plus2, with Iran.

You can see, as you have seen before, this is what, with this report (on screen) which is shared with Iranians, the American government, and IAEA in past week, says, "New nuclear plasma perforation system," which allows Iran to go to 100% purification Pl level, which is needed for space T.

Within the dossier of this report, which is now in the hands of Washington, Tehran, and .. IAEA since 15th of December, a new game is to be played. This is why, once we meet we make such a big difference in our talks, and negotiations with the governments. The nuclear industry of today is obsolete, and we have spent billions on it. But with the new perforation system we bring a new D. We all purify to 100%, but for the development of the new science, the new space T and new arena.

What you see in front of you on the screen, .. within this report, the past, present and future, of the nuclear industry, in a very simple way, has been explained. How it's been abused and how it's been used, and who has fooled who, by abusing it and the rest of it.

Every time we opened this report, (2:34). to Iranian officials in the embassy, within 2 hours the Iranian leadership called the Iranian team back. Because knowledge and education is very fundamental in this report. When the Americans received it, they immediately reacted, to accepting that the Russians can play their game, and negotiations can start. What we tell you is all recorded, the time of transmission, the government meetings, everything is recorded. The messages to the White house, through the American embassy ambassadors office, all recorded and in the future will be released, once the negotiations are over. You'll see how come every time this happened we got this reaction. It wasn't there 15th December before, we run into problem. released that to IAEA, IAEA ran to Iran, saying Iran is not making nuclear, because the hand of Israel was opened up, and how Trump played it. Actually he trumped the American into 5+1 negotiations of today to go with Iran. In his stupidity he brought a very positive move, which we see today.

Now the cake is shared, now we know Iran sells fuel, now we know the Russians do their systems, .. what the French are doing and is in public, which up to now was hidden (from) in the public domain. Now all nations will purify.

The units we sent to NASA, NASA cannot fly if they don't have 100% plasma nuclear, impossible. They'll land in the oceans, instead of flying if they get 99% correct.

This is where the new T, new knowledge brings the change. When we tell you we go to the embassies, we get in touch with the WL, government officials, (2:36). organizations like IAEA, we make that difference, because what sits in these documents we deliver, is a game changer. Because it is all facts. This report will one day, I am sure will be released by KF, or Iranians or the officials in the UN, maybe by IAEA. But once we opened this document at 10 o'clock last Friday in the Iranian embassy, within hours the Iranian team ?? left Vienna. Everybody wrote, negotiations came to a stop. You can see the reason of it, it is sitting in front of you.

We saw the same night, the nest of what was destroying Iranian nuclear physicists and scientists, in ?? Arbell was taken out. This gives us a chance for peace. As I said to our negotiating team and to KF management.

I think the best thing to do, once we seen the first units to NASA, Tehran, and others. The very first units have to be flown to Tell Aviv. In a way, we don't give you a tool of war, we give you a tool of peace. Let them to be ashamed of what they did. How they lied, and how their lies put so many lives in danger. So many people in .. pain, and for what reason. I think Netanyahu has to be put in a solitary prison for the rest of his life, for the lie and cheat he did, to force the American Jewish Lobby.

When this one becomes public, the Jewish Lobby in the US will loose a lot of its power, (2:38). because they're known as cheaters, as liars, as enforcers of death. Because Jewish Lobby in New York and in Washington pressurized the governments with their lies, now their hand is opened. We don't kill a bird, we de-feather it one by one that it cannot fly, that it can't do anymore damage. The bird of death. Under the government of Israel, not under the nation of Israel. This is important for all of us to know.

I was in Istanbul, and I met with Iranian officials on Thursday, even during the teaching of last week. I fly to countries for a purpose, in the background. We knew the position of the British when I was in London 2 - 3 weeks ago. We knew the position of the Russians in another D, .. of the Iranian leadership in a very clear position in Istanbul. I told you in teaching of Thursday .. by the deliver of know-how. Because we saw the problems, were not getting through.

There was a big problem the Americans would not let the Russians to stay where they are, we had to solve it, so we did, and 2 hours later the Iranian team left Vienna. We saw step by step, everything. The Americans got the document, they knew how they had been fooled by the Israelis, and how Russians supporting Iran was correct, the letter was given, we are back in.

I always stood outside, (2:40). and the Iranians will not accept KF to be in front, outside, because of what it is. But within Iran we are doing beautiful jobs, the factories are getting setup. We thank the offices … to allow the T to grow very rapidly in Iran, Our factory is more or less going into production, they received the first export order in the last 48 hours, which is a massive order for them and it allows them to start exporting Iran Pl T outside the borders of Iran, with the full knowledge of the Americans and the Russians,

and the rest. We start playing the game. Iran team can tell you, we have received the first massive invoice for export out of Tehran, at the back of it will come the space T.

We play the game of peace. The game of peace has to be, that we stay fair and correct with everyone at the same time. What is in front of you has been a game changer with IAEA, accepting, and flying back to Tehran, to say they don't accept the lies of Israel anymore.

The Iranians didn't know why IAEA changed position, and when they received this report they jumped immediately, because Mr. Barbery was sitting and waiting for this report, it was imminent Iran would show reaction. … we were not expecting such a reaction from Iran to suddenly leave the negotiations. They went and they cleaned out the Israelis, and they went and sorted out the negotiations with the Russians and on the back of KF, put pressure, knowledge pressure, (2:42). on the White House, on the embassy in Vienna, with delivering direct materials and explanation, and it took less than a few hours for Washington to change position. Because they knew, now is a public knowledge and we've given them the writings to the Americans, that we'll never release this report unless they decide to. I have asked the same thing from the Iranian government. We play a direct game, the time and the hours we give you is there ?? … we were convinced that Iranians were not aware.

Our intermediary in Tehran betrayed us. In a way, maybe they thought not to give it, it will be better, but we broke a lot of pain. But now we delivered directly into the hand of the Iranian leadership … It was instantly in Tehran, and they knew what they have been treated for, and they gave the answer. And we've seen it.

These talks will complete in the next few hours, few days. It's just a little bit more of who takes more of the cake and we are done. I thank the whole of the Iranian team, … … Soon we'll become the center of knowledge for north America. We are prepared to invest in it. In a way, it thank you to the whole of KS around the world. We start showing our work, (2:44). and once we receive the 2 different systems, NASA starts working with us, the Russian space Agency, the Chinese. We'll rapidly embracing of the new knowledge and T. This is all thanks to you as KS, in developing, the sharing, and keeping the peace, and the ethos of the KF.

Any other question.

Q: R: I was wondering how the Pl T could tie into the current conflict in the Ukraine. We see the presidents of Ukraine just gave a speech to both the Canadian parliament and US Congress, and he got standing ovations on both accounts, and promises of more weapons to be sent to their country, for their so called defense. The conflict could escalate more … how can the Pl T and is there any connection with the 5+1 with that?

K- No, this Ukraine situation is a very isolated case, as we explained before. Not much we can do, because in the back of it, there are a lot of things, settling of scores, at the moment. We've seen there are no movements for attacks, or war. It's a lot of rhetoric. The

Pl T has to come through the essence we always work. (2:46). It's the job of the U Council, especially member for Russia and others to elevate the soul of the leaders.

There is a very big problem, there is a very big problem. In the west we get bombarded with the Western news, the way they want us to see it. In the other side, on the diplomatic side, there is more to it, then what you see. I sometimes try to explain this to understand.

First of all the Ukrainian situation is between the Vatican and the Church of Russia, it started with that. By West bringing new sanctions on Russia, it became a bit personal. When they froze and .. locked down the private yacht of Putin, that was the last shot to Putin, so they went for him. He took no mercy.

But in the process we have come to the point now we know for a fact, the Americans were doing exactly what they were doing in Japan. Americans in the Ukrainian nuclear reactors are developing nuclear weapons, in the hand of Ukrainians, for the Americans to be a position on their (the Russians) doorstep. Now from the nuclear side of T, we know Americans have been very busy, naughty children, doing whatever they were doing in Fukoshima, it lead to explosion of the Fukoshima reactor, because it was carrying plutonium, then uranium. That was one of the main reasons Fukoshima blew up, it couldn't hold, because it had too much enriched material in it, which wasn't supposed to be there.

The Americans fooled the IAEA, or the IAEA said, you do what you like. (2;48). we don't look. The same position now we find in Ukraine. There is a nuclear weapon T development in Ukraine, which is controlled by the Americans, using the old Russian reactors, that the Russians built, and nobody could believe such a thing could take shape. So now we understand another step which has taken shape.

Now we understand there is accusation by chemical centers, by chemical centers, again to be used, because the Ukrainian leaders have been paid to do it, in the doorsteps of the Russia. That if anything goes wrong it's the Russians did it, not us.

A lot of biological weapons technology is tested in North Korea, and now we know Ukraine has become another part of it. The accusation lies by the Russians against Americans. Because the Ukrainian leader is literally servant to White House. He'll come to your Senate and lick the, god knows whatever, to save his life now his ?? time is close.

He has committed international crimes by allowing the Americans to develop nuclear weapons on his doorstep. And I told you this before, we knew some of this about 4 or 5 years ago. Russians will not let this guy go by the look of it. Because he has betrayed the motherland. We look at it from the Russian point of view, which you don't see in the West. Developing, allowing the testing, or even starting the tests of nuclear weapons, has brought 20 years sanctions on Iran. How come Ukraine is allowed to do it, hidden from behind. How come Japan was allowed to do it from behind the closed doors. (2:50).

Only the Americans knew what they are doing. This is a part, which again brought pressure on the Americans, and they know there is a lot of things behind it.

We test it, it's on their ground, if it goes wrong, it's theirs, not us. Israelis do a lot of human trails, paying the North Korean leader for biochemical tests, chemical warfare. Life has no value. We see now Ukraine, if the accusations are correct, by the Russians, they have been doing the same in ex-eastern block. How much Romania is involved in these things, how much do we have these centers of testing, in Bulgaria and other places. Where the leaders are hungry for finances to help themselves and their nation, and they'll accept any ?? cruelty. Don't look what is pushed in the West. Look what is looked from the East too, and somewhere in-between you see the truth.

You still need to elevate the soul of the world leaders, they are the children of the U Council. Not for just this occasion, for the rest of the existence of both, you need to. These children's of man are very weak, and they need the strength of the U Council's soul to strengthen their soul. It's not just the Iranians 5+1, it's not just the Ukrainians, there'll come a lot of other conditions. Inherently the man relies on the STP and it's weak. Inherently the STM and the soul of the UC of humanity is much bigger, and this planet to change, to bring that change. (2:52).

Don’t look if a guy comes and they clap for him and give him a standing ovation, he has already a bank account, checks in his bank for nuclear weapons T years ago. Now he is exposed, he is running for him not to be, or at least give me a home when I escape. When I sold my nation to weapons T.

There is a lot of things which you don't hear in the West, but KF has .. a lot of connections, in a lot of places and we see a lot of the facts. The accusation of weapons T is in public. You got to realize Fukoshima and Chernobyl are beautiful test grounds for what will happen to human beings, and animals and plants, and usually the nations and the military don't go to see the benefit side and what can be done (to improve conditions). They look what can be worse and how they can us it to their benefit (better weapons). This is part of it, now you see the guy coming and crying and going to Senate, and Canadian Parliament. But that guy has a nightmare, that he has been discovered by the Russians. He sold the nation next door to them, part of the motherland, to weapons T development, against the motherland.

Ukraine was not going to use on the Americans or Germans. So you go naughty, you pay for your naughtiness. This is a cry of the wolf, the way it is looked at in the East. We'll see more, we'll understand more, and we'll see the skirmishes. (2:54). Now it has become a settlement of the national security, the Church of Russia, and a lot of personal pride, a lot of personal pride.

Any other question.

Q: .. here in Brazil we have some popular sayings the older people speak to the younger ones, such as the head is not only to create hair? … What is the true function of hair, and why do we have a swirl of hair in the center of our head … ?
K- You, we have a beautiful saying in Farsi, say, when you look at that girl on the top of the head, you'll see how many of them do you have. As a joke they say, if you have one, you'll marry once, if you have 2 or 3 of them you'll marry 2 or 3 times. So your soul already knows what you are up to. You'll need additional souls, which will be added to. It depends which culture, we look at the head. But there is a beautiful picture … it shows a bunch of Iranian men sitting having a cup of tea, with all the bald heads. (2:56). It says, there ?? isn't any shampoo in Iran, because it makes all the men bald. You look to China you hardly see bald Chinese, they all have a full head of hair.

It's partially receives the fields of the U, it's a Nano material. It partially allows .. the interaction of the fields, which are not absorbed by the body of the man, and those which not needed on the body. The hair on the body creates a lot of, doesn't matter hair on your chest, back, or on your head, it creates different reception of the fields. There are a lot of researches done on this, if you go on the Internet … effect of emotion of, whatever, the color of the hair, the length of the hair, and these kind of things, a lot of studies been done, as a joke or whatever.

But essentially it's another Nano material. It's essentially the way we dispose of some of the energies, or gain some of our energies. There is a very clear line between the races, which have lost their hair, and those who have stay with the hair. There is a research that explains a lot of these things, and studies have been done. We receive fields according to. What has happened to the curly hair and the one with the straight hair. The field interactions are different, creates different. Why the red heads have a specific behavior, and the blonds have a specific behavior. (2:58). It's the way, it's not just something which grows out of us. It's something which, what level of interaction will have with it. We can touch it, we can change it, we can use different Gans's interacts, and change the color, and with the change of the color you receive different fields, and different emotions.

Go back into KF, 2008 - 09, something in that time, there was a KS in Holland who had problems and we developed T for one thing and it effected the hair, and the wife was ?? saying, my husband now has a full head of hair, and they all turned black, and he feels different. She was so happy she had her man back.

We receive different fields according to our AA, which is embedded in the Gans of the hair. It has an effect and .. purpose. It's one of the ways we receive what we call, energies, or we give up energies. It's something which, once scientifically understood as a Pl, then we can trace it, we can see it There are studies by the Russians about open hair, spread hair years ago, and it gives you what auras they create, the same hair, in spreading different way. (3:00). It has an effect on the emotion of the man, it has an effect on the structure and thinking of the man.

Any other question.

Q: Mehranez .. happy Nowruz which is the ?? spring when the whole thing comes out of the earth, and in your life is coming out, so everybody changes the old things, cleans up the house, ready to receive and makes peace with everybody around, with kisses and sweets. I wish the same for .. because under the cover we all love each other …
(3:02). light .. Tomorrow in Iran …
they want the coming of Methi.

My question is when we try to be good, and then become like a sun, honestly it doesn't attract me, because I don't, I protect myself from the hot sun, and so what, because on earth we have at least some little minorities which are so emotional, from these young people who do this praying tonight. That is just bringing tears to my eyes, they have generosity .. ..

K- I don't understand what you are trying to explain ..
Q: I am saying that on the earth (3:04). we have emotional people, or relations that can give us the ?? that this earth is beautiful. But if I become a sun, is there a guarantee over there I can find people to relate to my emotions, to feel
K- What do you mean? When your soul becomes a center of a sun.
Q: Yeah, but my soul doesn't feel the same love and emotions in here, which is ..
K- But the fact is, are you connected to your soul?
Q: Yes.
K- You think so (yes). So if you live in that level you understand, as you consider yourself as a giver, as a sun. You don't need to feel to feel it. Once you are in it, you don't see it. If that is the way you think, that you do, then it is your responsibility to understand the work of your soul the same way.

You don't need to speak, to do. If you think you live that level, you don't feel a sun, but you feel you, understand your soul, and the way you always speak, that you are there to give, and everything, and whatever the other people. You have to understand how much you think, what strong, what strength of the sun you have created.

This is what I say, for the UC members, that they'll be recognized, (3:06). by the strength of the light, the strength of the giving, the devotion to serve and change humanity. You don't need to see it, .. you feel it by the soul. If you feel you don't feel the sun, because it's you, how you interpret the sun.

You don't need to write your words. There is no need to write down, to give an account. When you count the wealth, you are not wealthy. I always said, when you count, "I did such a good thing, I got taught," you haven't done, because you counted, I do to get. Everybody, when I was in business, asked me how much are you worth, I said, I don't know because when I count, I am not worth it. I never sat down and counted money to see what I worth. I knew what my salary was, to be able to do more, but never count how much I am worth, and what is the wealth. Because when you count it, you are not worth it. It doesn't matter how many zeros you put in front of it.

If you count, I am going to do a good thing, and I write it as I did a good thing. You haven't done a good thing. You just done something, to get something. You haven't done, you haven't added to somebody else's, or elevation of the soul to be able to see. You do your job without counting, but you hope the results are there to create a position and D, a new D.

I hear this is very traditional, oh, I am going to do this, I am going to walk to Fatima, and they go the whole length of Spain, from one side to the other. What for? (3:08). Or they go to the mountains of Katmandu, or the other places. What for? What good do you do? Or is it for you to think. When you count it, you don't have it, you already lost it. This is something, which you do not need to measure what sun am I going to be, your job is to serve, then the light will show itself.

Q: Okay, I change my direction ..
K- Have you understand, do you understand before you change?
Q: I understood, it's another looking at the things, you taught .. us another aspect of things, which is, I go it. … It's just that we have very little point of things, comparing to you.
K- I know a little, and I share that little.
Q: Thousands of years, okay.

You said, I read something about judgment, no judgment. I read a paper in Brazilian, it was a paper , about not to judge.

K- You don't judge. You do your best and then you see. Because once you judge, it's something. When we judge, (3:10). we have to make a decision. When you make a decision, that's what you'll react to. That reaction brings elevation of the soul, or taking something from somewhere, or doing something ?? . I don't judge.

Even in the recent past. I don't judge. I live, I put things in the order, and very interesting we've seen it within the past 2 - 3 weeks everybody was accused of .. lying, and everybody would lie. When it came to the time the truth broke the lie. I didn't need to judge. I just put a fact to be, and I didn't try to improve it or taint it, because I could change a position or judgment. Everybody was accused of lying to change a judgment.

When it came to the judgment, the Day of Judgment (DJ), the truth was more powerful, than the lie, which was created to create lies. Because we spoke, it's true. There is nothing anybody can say about the truth. So I didn't need to judge, I put what was the fact, and the judgment comes by itself. And the person had to judge himself. Nobody else.

So don't make a judgment. I make a lot of decisions, like all of us, we do a decision. We might call it a judgment. (3:12). We make a decision according to what is in our hand, and we decide what to do. Do you call it a judgment, or do you call it a condition of the position and the decision making. We can judge about our own behavior, .. our own conduct, and then judge why we did it, what was the outcome, and was it to serve the

good of better. Or was it to serve me. Or was it for me to be able to elevate the others. We can judge about ourselves and nobody else.

This process of .. judgment happens between the fields of the Pl. I want to be here, does everybody accept me, and when you accept, where is my position, because I am here to give to everyone.

Q: Sometimes the intention is to serve, but it ends up the wrong way.
K- The wrong way. Yeah, but if the intention is to serve, and you turn up the wrong way. Sit back, and see when it comes up. If the intention, and if the decision was to serve for the better, you will see it coming out the way you planned it, or what was best way for everyone. Short term might look, but long term might be very different. We are humans we always look at the immediate, that it confirms our work.

A farmer sows the seed of a grain into the land. (3:14). He never knows if he'll be alive to sow the seed, (to harvest). But he does it out of the willingness to live, to be able to serve his soul by living, and the others. We have to be that farmer. When the farmer sows the seed in Spring he doesn't know he is going to be alive in Autumn to collect it, but he still does, because it will benefit his family and the others with that seed.

It's how the man's life should be. You are that farmer, never expect, just be there, that in the future, it might brings him benefit, but in general, in principle it's for the other souls to live off it, Because I don't eat all of it, even though it means ?? ?? elevating the others. We are the farmers of the soul, to serve. That's all the human race should be, as it is for the others in the U.

Q: .. some people, they say in the Koran it says you encourage people to do good things, so then it's bad when they are doing things, and that causes people to interfere to what ..
K- We'll leave that part out, because that part of Koran had a meaning totally different. They took it the wrong way.
Q: I think it is like that, because it causes problem, interfering ..

Any other question I have been here thousands of years, it's nothing, (3:16). we got a lot to go yet.

Q: … how to treat like and dislike, love and hate, equally without discrimination?
K- I think we gave that answer in a different context.

Q: .. is the essence of the body of the man, in reverse absorbed by the plants and animals, as the orange is absorbed in the Cup? Is this the meaning everything is connected, because the fields are interacting all the time, in all life?
K- Yes in a way yes, of course. The blanket, pillow, cat, dog, grass, takes what we don't want, because it's very simple, we call it, aura. Aura has to be a field that interacts, (3:18). if somebody goes somewhere. So of course, We have classified it, but we don't connect it. Now we know what it is, we receive the same. Receive from the emotion, the feeling, the environment, the trees, plants, and the dog.

Q: .. If everything is put in front of us why don't we see and understand?
K- Because we are ignorant. We ignore what we don't like, I call it ignorance, it's part of it. In English language. We ignore what doesn't suit us. We see what we want. That's all, we don't want to accept certain things, and we want to accept what suits us. We are all under the same banner, being a human, animal, prophet, being a creator, whatever we create, what we do is to the same condition, we are not exception. Once we understand we are not exception, then we move into the other level of understanding. As I said before, .. why do you break your leg, you can do this, whatever , why have you done that to yourself. We have in the D of P part of the same. There is no exception, we go through the same, (3:20). learn the same, and from it, we learn what needs to be done.

Q; When the peace treaty is signed, is it signed individually or through a soul, is it valid for a whole nation? (K- Yes). What happens when you don't keep that peace treaty?
K- You see what happened to Trump, exactly. He created even, no peace in his own nation, and it is not there. The peace treaty has to be with the STM and the totality, not with individuality and their ?? purpose. The present peace talks doesn't matter (if it's) about Ukraine, 5+1, or other points and positions. It's very simple, it has, and will effect the whole of a nation, and many others.

We were driving yesterday in Vienna, we saw a dirty, dusted car with Ukrainian license plates. Deep inside me I hope that this will be short term suffering, and this car goes back, because it was obviously driven all the way, nonstop to be somewhere, to escape form what is happening. In the border of Austria, Romania, we see this emotion, of people worried about this, what is happening. It's to understand it, I know the feeling because I have been through it. (3:22). I know what it is to have everything, and next day not to have. When we went through the Iranian revolution, I was a student in university. I know if we don't open the door back open, these people will be suffering and changes for a lifetime. Because I have been there. It's not that hear 1 or 2 million ?? some have no home to go back to, because it's destroyed. Some of these people will never go back because they don't feel that security. Learning a new language .. 6 months down the line nobody remembers the Ukraine. They become another bunch of refugees, and a life process of pain, change.

That's why we come, and we experience, and we understand how it has to be done. There shall be no more refugees, because the man looks after each other beautifully from the new T from now on. I know it because I went through it. Why do we need to go through it? Because then you understand the emotion of the man, what he has done, needs to be done to change that emotion.

As I said, it's the same in the .. summer of 1979 Iranians, if somebody had an Iranian friend, it was gold, everybody wanted to be your friend. In … march of 1980 .. then after revolution we all became terrorists, (3:24). and the rest. We went through that cycle of revolution and victimization and everything else, and it changes the life. It is part of it, .. you have to understand. What's going to happen to you lot when all of you become refugees in space, till homeland called earth is not there to support you anymore.

So you need to go through the emotion to understand it, and to be able to translate it, and there is no exception.

Shall we call it a day.

Q: … is there a soul more like a particle or a wave?
K- Soul is a M field, you decide when it will behave like a particle, and when it will be a wave.

Q: Does the wave generate the particle, or the particle the wave?
K- Did the egg or the chicken come first The rays of the suns come, emanated from the soul of the Creator. If you ask if the particle or ray came first, you have to ask the existence of and confirmation of the Creator. Is He an entity, or is He an unconditional field? I think most of us know the answer. (3:26).

Thank you for today ..

425th Knowledge Seekers Workshop; March 24, 2022

(First half transcribed, mostly transcribed ;; need to proof, Key Phrases, Words, quick index)

Spoke 3 times about Brazil and Rafael - gifted Brazil EU for Rafael's birthday

Topics Index

Islamic 1401 year of Methi; All religions except this is the year; "I am here"; Methi is inside you; EU spread around the world to elevate STM; Your soul will become a shinning star; Methi is the collective soul on this planet; Be a bulb in a floodlight; Who would like to be the first bulb to light up humanity; Messengers are those who give their soul to elevate the others; Separation of electron from proton; STM is being prepared to be like electron, ejected from neutron, the mother, to create new U; Mankind will become a new cycle of creation; K has done this many times - this is how they create new universes; Candle maker story - lighting candles on the earth to start the process, we'll all elevate in an instant - but someone has to start it. The flight EU are for elevation

of the STM; Mitra fell in love with Earth - it's a gift to create a U from mankind; NASA will be gifted a FEU;
Brazil has done a heavy work to spread knowledge across planet so they will be gifted a FEU for Rafael's birthday; Brazil has been a point of contact with the outside (UC) for thousands of years; Responsibility of KS to inform their governments to ask for a free EU for peaceful application; 10 years ago KS reached 75% of planet with USB Key; To the religious leaders - Methi is upon you;
Rafael has devoted his life to the KF;
Rings of Saturn - interaction of different fields creating materials that superimpose over each other; Part of Defense T - used in Iraq; Why Mozhan could not open windows during training - not answered ask Mozhans they know; 5plus1 is complete but Europeans trying to get more before signing; Watch Iranians British released 400 million they could setup another Libya in Iran;
Assassination attempt on Mr. Keshe in Istanbul by MOSSAD; Iran destroyed Mossad base in Erbil Iraq; Israel warned against killing anymore Iranian nuclear physicists - respond accordingly; Will share T with people of Israel not government; Trump withdrew from 5plus1 treaty because he sold America to Jewish Lobby - part of agreement , and his daughter etc .. ; Robot soldiers of China on Indian border ; Gans T for high altitude life; FEU have to go to nuclear centers - they use nuclear; Why UFO light in KF Store changes direction of rotation - environmental field pressures ;
Electric current changes amperage, loss or gain - according to field interaction of environment - 2 KW generated could come to 2.4 KW at substation;
In west spiritual communities always say forget the mind go to the heart - why so much strength in heart - STM and STP come together in heart - strong - a whole teaching on it … ; Next time feel the emotion of the soul ; Emotion has a strength - converts fields into P - based on Inertia - sadness into tears .. : In 2015 Brazilian leader said Iran was a peaceful nation - western countries punished this leader (because he went against agenda against Iran); KF revealed how North Korea got nuclear T through Belgium controlled European Space Agency - then they stopped them; Brazilian space T is very advanced - we give T for rapid development; You touch the T the wrong way you wipe yourself out; Warning again to Israel to stop killing Iranian nuclear physicists;
Radiation in MRI and x-ray machines is generally absorbed by the body; Only dangerous if they dislocate a cell - MRI checked every 14 days; Could elevate STM with MRI if you understood how; Body of man is a plasma - not matter; Your RNA contains all the experiences your ancestors had - if we put you in EU then we can find out the history; If your ancestors met Tesla we can experience his gentle nature;
Rafael speaks - just 2 people started intention group; reads Power of Intention - Brazilian Telegram restored; Mr. Keshe third time wishes Rafael happy birthday; Translators have understood the essence of the soul of the T and then they become the center of the KF work; They translate the essence of the emotion; Brazil daily intention group elevates soul of 5plus1; English speakers don't gather around KF in the US and UK; Old guard in Brazil objected to Rafael - but we went with the soul and it proved correct; UC in skies of Brasilia welcomed K to Brazil; We wished to bring Brazil out from UC member of Portugal who was suppressing growth - now we see it growing; With gift of FEU Brazil may collaborate with AZ and NASA and Iran; Extend Intention from 5+1 to whole of humanity - the group has enough power to do;

K preparing to return to Iran;
Through purity of accepting and allowing - STM can radiate voluntarily over the field of the body - not to make P subordinate - but through the plasmatic heartbeat - the true heartbeat.

425 KSW

ENGLISH TRANSCRIPTION 425KSW

(:22). .. if you listen to this intro video, every time you learn something new .. Somehow the intro chosen by Rick matches what the teaching is going to be. It's very interesting … every time. We've seen, .. understood .. the Soul of the Man (STM), is the creator of the new cycle of life. As we know in each cycle there is a need for parents to guide. In the life of the man we need prophets to guide the STM, or for its physical condition, and then we have messengers in the name of scientists.

This year today, is the cycle of 1401. The 15th century in the Islamic Shia ??. But the interesting part about this in the Islamic world, by the order of the religious leaders of Iran, Ayatollah K and the rest has been recognized to be the year where the Messiah will declare himself. will show himself and clear the path for the evolution of the man to the new cycle of understanding. In the Islamic Republic of Iran, the structure of the universities, and others, military forces, have been establish to protect and guide, (:24). once the manifestation of Methi has been announced, to protect and to guide him. In a way, from harm.

We see the same thing is within the calendars of the Jewish calendars. The Jewish Rabbis expecting the manifestation of the Promised One this year. Down goes the line of the others. We'll see what will show this year, of what is, officially if you receive any messages from Iran, most of the nationals, they tell you the year of manifestation of Methi. But in fact, who is the Methi? What is the position of the Methi? Isn't it the man himself? Isn't it the understanding of the process of the creation to know that what is needed to be done to elevate the STM. How do we understand this? What do we understand from this process of 1401. The cycle. The year which the Islamic world waits for the manifestation of Methi. They are sure it will happen this year.

What is the process for all of us? What is the understanding of? Where do we mature to? What do we mature to? To understand, to recognize the Methi, the presence of the hidden one, the presence of the what was promised, shall bring the end of all the hardships and the war. As is usual, man looks outside, nationalistic war. Wars of aggression of religions. But in fact, the war is, and the war of the man with himself. The war to live the conflict of two lives, the physical life, (:26). and the life of the STM. That's the war which the Promised One is to complete. and the completion war of man to understand, he is the man, is the STM, that has to come to an end, within the wars of the walls, within the structure of the physicality (P) of the man.

The teaching of the past few years has brought you to that point. Brings you to that condition, brings you to understand the position of the P, and separation of the P from the STM. But in fact, the messengers, the Methi, is you, within your soul. No one can teach you, unless you find it yourself. I can take you to the water, like the horse, if you are not prepared to drink, nothing can be done. The thirst has to come from within, the thirst of understanding the truth has to come for within.

The teaching of the KF as we are the messengers of U within the P of the body of the man is very simple. You up to now understood, you do good, you give whatever you call, to the Church, you do good deeds to elevate your soul, that you will receive something, that then you'll live a better life. But in fact, the teaching of the KF is totally different. You are happy with the good doings on this planet. the teachings of the KF is to extend the soul to do the good things outside the P of the body of the man. The D of the fields of the creation.

In the D of the fields of the U. You were happy, (:28). to give some money to a beggar, .. to build a church of the religion, .. to give a pair of shoes to a man who doesn't have. You were so proud you did so good. But now we have allowed you to extend this beyond the P of the man. If you are happy that you received elevation by giving a pair of shoes or some money in the bucket, when you went to the church or the mosque, that you receive elevation, and what you want. Now with the new understanding the U is your oyster. What would you like to give to U, to U Community, and then you understand what shall be received by your soul, that your soul. You were happy to be a shopkeeper. Now you are a king of your own soul. Now you become the warehouse man, because now you have access to give more to the U Community, if this is the way you think.

In a way, you were happy with the crumbs of the elevation of your soul in the D of P. With these teachings we show you the way to be generous and to be the giver in the D of the U. ..STM in the D of P once learns the teaching of to understand the process of the creation. Now connects to the other souls of the U and Unicose, and from a flick of a finger you become from a small soul within the center of the brain of the man, to a star, to another U. So simple.

You were looking for crumbs, I do good that something good my happen to me. Now with the extension of the STM beyond the boundary of the P, (:30). which is part of the teaching. Now you can extend this giving, if it is truly within you to become a start within an instant. You shine, you connect, and with it you lead to the creation of the new cycle. Isn't this what we said, in the enhancement units (EU), that some of you once you go in you see only the light, which means the boundary of the P is past, and now you become that shining star. You become that giver, to give, when you are a star when you shine you are a giver. Even though the same time you receive. So we understand with the new teaching and the understanding of totality, one man can become a star, once he understands there is no limitation in the fields of the U. In a way, bypasses or super passes the D of the Soul of the Physicality (STP). You become like that car with .. a flashlight in the front. You become the source, then you become the driver of that

flashlight. You become the source of what to shine, and then your job is to find a flashlight which shines 360 degrees unconditionally in all directions.

The elevation of the STM was not the whole purpose of you being able to go beyond your P, get in touch with the uncle, .. or cousin, or go somewhere. The whole purpose of the teaching in elevation of the STM has been to make that shinning star from within the STM, .. P .., to become instantaneously a star. To shine upon all the ?? (:32).

This is what we said in a hidden way about the soul of the UC members, that once they get to that point they shine, they don't need to show their P. Now you understand how the truth unravels itself. Then you understand the teachings of past 424 KSW have been to bring you to the teaching of today, that every soul can become a star. It's not jut t extend beyond the D of P, you can still hold onto that P because that P is where the center of the sun has been kept to gather, it's the seed. It's D of existence, .. of creation of that soul.

So we come to one point, where do you see your soul. Do you want to be in the D of putting a coin in the bucket of a beggar and you think you are good, and you receive elevation because you gave. Do you want to be the guy who gives his shoes and things, oh I have an extra pair, at least he can walk, and I receive more because I gave. Or are you those who build churches, for building places for the worship of the fallacy of the brain of the man, and think I have built a church, I have guaranteed myself a place in heaven. The heaven exists within the understanding of the man himself, and the hell is the man who is ignorant to the truth. The purpose of the teaching has been to bring you to that point, to show you, if you were happy to live in the village, now we give you the U. (:34). but in D of U, you have to have the capability to live with it. You have to understand the process of it, you have to be there not to go through university, but to understand the truth.

In so many ways, what I said very recently, if the promise of Ayatollah Khamenei of Iran, and the Islamic world, and the other religions, is that this year, will be the year of manifestation of Methi, is how many of you are going to be that Methi? For your own soul, that you start the new generation of the cycle of life in the correct way. Methi by name, Methi by living, Methi by conducting the correct way to understand. Not to be crying that I lost something, where what I lost has become the step for the progress of the others. Be proud in your loss, has become the gain of the others. Mankind's' soul will cry to understand more. But in a way we have paved the path for you to understand. We brought you to the point to understand, that what is promised to be, is not a Methi as a person, but is a Methi as a totality of the soul of the mankind and the planet earth and its citizens to understand the truth about the creation, and about what we call the precious value of your soul.

Then you understand why the teaching has taken so long, we are preparing you to take the soul of Methi, (:36). as a collective soul of the creation and created on this planet. Soul of the new life, new generation, new position in the U of the new Unicose. Where P has no D. Where the understanding of the process of the creation of what we call, interaction of the fields to lead to a perfect life becomes the essence of the creation.

We are Messengers, and we know how to deliver the message, and we know how to guide people to understand the message. It's no use when I deliver a message to you and you only read German and it's in English, it has no meaning, unless I can translate that to the German that you understand. Then even when I translate, to be able to carry the essence of the emotion of that letter, that you get the full feeling of it, not just reading like a computer, with no emotion.

Mankind has to understand the emotion of the what is going to happen, what is going to be the essence of the creation in the next cycle, not only of his own. It's like the STM from now on is like that little bulb you see in the football stadium in a flood light, on its own, still shines, but collectively will flood the field. The soul of the humanity, .. of the created things on this planet has to become that flood light, (:38). become that star, that process of the creation where the man moves from individuality to the collective awareness of the creation as one. The soul of Methi is the soul of the created on this planet. When the mankind, when the created things understand to go through the process, needs to the understanding of the totality.

Which one of you would like to be the first bulb in that floodlight? Which one of you has managed to understand the truth about the process of the creation. Then we understand the year of Methi is upon us, because we have received the teaching, we've been guided to understand the essence of the Soul of the Creator (STC) within us, amongst us, and to understand collectively we've become that Methi. It cannot be one anymore we put and the cross and be crucified. It cannot be one that can be put on the wall and fired down to be destroyed and to be killed, that he might stop the message of the Creator.

The Messengers of the Creator are those who give their souls for the others to elevate, not their P. In mankind has become that torch, that only for himself, becomes that what we call, floodlight, that he enlightens the rest of the soul of the created things on this planet and collectively mankind elevates to position of creation of the new U. Now maybe you understand what is the purpose of our work, what is the purpose of creating such a position.

Every U in the Unicose has been created the same way. Out of the collective soul, (:40). of the created ?/ which they reach the point of maturity at the same time, and the same position, the day of promise. The promised day is when the whole of the soul of the created reach the understanding of totality and needs one to shine for the others to come on. You become that first candle that starts the fire, you become that single candle which lights the rest of the candles in the church and in a mosque, and in a way to light up the whole stadium, This time the stadium is the Unicose and STM is that point, that bulb, that matches with the others to become the same, when you look at a floodlight, you can't see one light from the other, they all shine collectively. This is the beauty of the teachings of today.

That man understands, that the promise of the Methi is upon us, but not again, the way the world of religion has seen it in the D of P. The totality of the maturity of the STM on

this planet is the Promised Day. That in a way we as one, we become, we as all. In so many ways, maybe now you can understand, how far can I go. How much can I understand about the creation of my own P and my own soul, that I stay, not looking, better light, in that floodlight, but be equal and as shinning as the others. It's not a competition, it's understanding the elevation of the STM that all entities shine the same, when they are in the same light. (:42). When the shinning of your soul manifests itself, all it can shine against the light, against the D of the STC and nothing else. Earth on its own is a dark planet, unless its fields interact with the fields of the sun, then that creates the light.

So when we speak about the collective STM, to be the Methi, only shines with the brightness, with the unisons , when collectively stands in front of the light of the Creator and gets enlightened by it. By the interaction of it, it so big that the light we create on this planet for the daily time we see, is nothing compared with the light that sits and emanates from the sun. The sun is the creator, the essence, is the creator of the life, and the collective STM, at the time of the manifestation of Methi we become that planet that the interaction of its fields with the interaction of the fields of the Creator will shine, as another U, as another D, another understanding of the totality.

Mankind is ready for that process. For that purpose we are pushing with the D in the understanding. In that process we are pushing for all the nationalities you call yourselves, and all the universities you call yourselves, to understand, not to conquer the U, but through the EU we provide to conquer to understand the power of your soul.

You get into an EU thinking I can go to the Mars and the Moon, but in fact, once you get into the EU, you understand the travel of the STM, (:44). which is much faster, it's more instantaneous. In that process, once we can grow enough light across this planet, as we distributing so many EU across this , then collectively this planet will shine, independent more or less, irrespective of color, race, and religion, and path of belief.

Maybe now you understand Ayatollah K of Iran, and Iranian government understood the process. They made 1401 the year of the manifestation and appearance of Methi. I am here. But I am here as a soul of totality, as that I includes all citizens of the soul of this planet. Maybe it's time for man to understand,.. for humanity to take that step, that the totality of the knowledge for man to become aware of his soul has been given. It's man who has to open that door. It's man who has to close the doors of ignorance, racism, and so many ways of prejudices, to himself, to the others, and the totality of the understanding, if we going to shine, we shine together. The famous word in sing, "you never walk alone." Which means in collective awareness in totality of existence of the souls, when we walk together side by side in the D of the STM, the walking is done, we'll shine by reflection, (:46). by interaction of the fields of the totality of the soul of the created in presence of the fields of the Creator. There is no light on earth if there was no sun. This is what has to be understood, and this is the whole purpose of the teachings to extend the Soul of the Man beyond the Soul of the Physicality that it shines as a star in totality.

When you shine as you were created from the same amino acid, you cannot be any brighter than the other. You all become the same and you understand, that the Soul of Physicality will become, what we call, the essence of holding the whole structure of life together, as the Soul of the Physicality of the man is based on the amino acid of the creation on this planet, so all the souls from this planet will have a common denominator connection to be, to shine, and to elevate the rest.

What would be the future of the human race in the space? If you choose the flight system you'll be still, that aliens who travels from poles to poles, from planet to planet. (:48). If you choose the flight system of the Soul of the Man, the totality of the man will become that shining star. Now it's for the humanity to decide, am I going to be that UFO passenger dragging around from centuries and thousands of years of this universe, or collectively we agree, that on the time, the time has come for the Soul of the Man, the collective soul of the creation, to become that star, and with it, in one instance become the center of a New Universe to shine, because once that position achieved.

You will find that, there is no space fields within the solar system, and within this galaxy and universe, that accommodates, can accommodate such a powerful source, unless it finds itself a new structure. We know this knowledge very well, we call it the division of neutron. We call it the separation of the electron from the proton. This when the humanity reaches the point of unified fields, to understand the totality, and becomes one, then we become that electron, that will be rejected from, or ejected from the what we call the mother seed, and we become that new cycle, the New Universe.

This is why in the intro it always says, if you understand word by word of it, what will become. You'll become a new cycle of life. You were expecting to become a sun, but collectively you'll become a universe. It's for mankind to decide that point, it's for mankind to understand the message of the Methi, and understand the progress, in understanding the totality is more important than one individuality, (:50). to be the king, the leader, the president, or whatever shame name you put on them. Now you understand the process of the creation.

I am the Methi and my job has been to create, that new separation of what I call, neutron for the creation of the electron to be ejected from it to become a New Universe. We have watered this plant well, and it's time for it to flourish, and it's time for the bird to take the first flight to leave the nest. The totality of understanding of the process of creation now forces mankind to work as one, to make one soul, to understand the Soul of the Creation, that it goes back, and it's exactly in line with the writing of the first book, the creation of an electron from the principle plasma, the neutron.

This universe has been the neutron, for the electron of the life of this planet, to be created, that when it reaches the maturity, when he gathers enough fields not only from this planet, but from the universe, what we call Unicose, it comes the time of new birth. The generation of the new cycle as an electron, that in turn this, as what we call, a new dimension, becomes what we call, the new entity, the new totality in the Unicose.

Maybe from today you understand, how even the whole creation of the Unicose started. We are the same within, and within when we gather enough, we become another, (:52). and then with that process, again within, we become another.

It does not mean that one universe, or one part of the Unicose is bigger or stronger than the other, but in the process of the creation, all the neutrons are the same, shine the same, the same strength, but in different position of attraction and rejection of the fields of different strength.

Now we understand where the mankind is going to go. Now we understand the process of the creation now we understand that the earth through the interaction of the fields unified fields of his souls is getting ready, he is preparing for that, what we call separation and creation of a new life in totality, amongst the positions in the Unicose.

You were happy for me to give you a UFO. You were happy to sit in the Enhancement Unit and fly from New York to Tehran. Now I gave you the seed, the structure to understand how you as a human race have to work collectively, to bring the energies together, that allows the electron, what you call, it the division, what they call the decay process to start, that this village of man, become the center of another universe.

This is what we came here for, and this is what we do regularly, it's not one-off. The earth is not the first place, where what we call, the electron has been created from. I've done this many times, in different shapes and colors. I'm a master in what I do, because in that creation, (:54). we'll see a new light to shine, but the reflection and interaction with the fields of the Creator.

In a way I create candles. I take time to make it, and as a Candle Maker when I light it, I only can be seen, its light, when it interacts with the light with the fields of the Creator. In the way, the purpose is to show one by one, lighting candles in the Unicose, to show the beauty of the Creator, to be in love, and to be devoted to serve. You are happy to light a candle in the church on the table, with the lover, the lover is a creator, and we create a candle to light it, to show the beauty of the lover.

This is why we always told you the manifestation and what we call, the presence of Mitra is the lover, and the candle is the light to show the extent of love, in reflection and interaction of the fields of the lover which is the Creator.

Now you understand why we brought you step by step, even in the production of Enhancement Unit. If you look the shape of the universe, and you look at the shape of the Enhancement Unit, there is no difference. You looked for a dome to go in, we gave you dimension of the creation of the Unicose, within the structure of the Soul of the Creator, and with it you create a dimension of the what we call, a universe. Look at the dimensions and the proportions in the fields, (:56). and the shapes of your Enhancement Unit and then you understand, how we walked you into understanding, living, and in a way, elevating the Soul of the Mankind, to become that electron in totality, to lead to the creation of the New Universe.

What's the purpose of gathering so many beautiful flowers, making them to grow, and do nothing with them. It has to show its beauty the Soul of the Creation, the Soul of the Creator the soul of interaction of the two, has to shine, that, that light shares the essence of the Creation within the Unicose. One day Mankind understands the messenger (message) of Methi. One day mankind understand what this message entails, and how the Humanity as a whole, and the Soul of the citizens of this planet, through the Love of Mitra has jumped the gun, and from what I call, little tiny planet, now are ready to become the center of the New Universe.

Once an electron is ejected from neutron, then it has its own cycle of life, independent and it can dictate its own position, dimension, and size. Now maybe as Humanity we understand why this year has been promised to be the year of manifestation of Methi. It's the maturity of the man to understand the process of his own creation and a collective interaction, (:58). to lead to the creation of the New Dimension in the STM, in the Dimension of and in a Position of a New Universe.

We cannot gift more than this to the planet, where Mitra fell in love with. In a way, Humanity has received the energies of the universe through the love of Mitra, and the manifestation of the Children of Mitra will bring a new dimension, a new essence in the world of creation, where the shining of the light of the soul of its created, will become the same as the Creator. In totality, we are ready for that process. In totality, this year we set the scene for that process of unification of the souls.

In a way in a hidden way, we gave you a lot of hints, of what's to come. We give one Enhancement Unit to every nation. We give one Enhancement Unit to every university, that can evolve and elevate the soul of the understanding of the knowledge, which leads to the freedom of the man. In a way freedom to become part of that light, to shine by the soul and not the physicality. As I said we have set out and we play your game, because you're so physical. We give you a new Enhancement Unit. Now the Enhancement Units has gone into mass production and we hope by the end of this year, we give something like, maybe five to seven hundred units across this planet to universities, to the governments, to space agencies, and even to the churches, (1:00). and to the mosques, that they understand what was the purpose of all that work.

We are not here to look, we are charitable. We are here to clean, to create the condition of equality, that all the souls shine the same, in the process of the manifestation of Methi. In a way, as a human race we are ready for that step, and it takes one at a time to build up.

As I said in the past weeks the Keshe Foundation has started the process of the manufacturing of the new units. We had to wait there was a process, which needed to be completed. In so many ways in its completion, we have seen the totality of what we call, the essence of the creation. What we need to understand is that, Mankind has entered the process of conversion, the process of understanding, that now we are on the race to become the center of the New Universe. We are on the race to become, to understand the totality of what we call, the structures of the Creation.

As I said this picture shows our work clearly. The mass production in delivering units across this planet in the coming weeks, and days has started. You shall see as part of the whole structure, that we have started that process unknowingly by man, (1:02). but knowingly by us, that you all understand this is not a game.

This is not to give an Enhancement Unit to one, or the other to be better. This is to give a unit that Mankind will line up to create the condition for the evolution of the what we call, the Soul of the Man through the knowledge of physicality. This factory will be full of these systems waiting for universities and governments to ask for, and to deliver. From next month, we push for about a hundred unit a month to be ready. Keshe Foundation will support this. First time we showed you one and two, and we learned to be taught, now it's become a race. This factory is what we call the ?? breeding point for man to start to understand the totality, and with it to start the process of what we call interaction of the Souls of the Man.

Maybe in the coming time Man as a race, will become educated to understand what has been given to him as a gift. It's for you to understand the process, it's for you to create that condition. The first units will be flown to Arizona, and at the same time the two units arriving at Arizona, one goes to NASA to invite the scientists to join the race of elevation of the Soul of the Man, even though they are interested to get to Mars and Moon. NASA Corporation has been aware, (1:04). and has been informed of the delivery within the next few days. One will go to the city of Tehran. One will go to another city in Tehran. Austria receives the first two in the coming days, and then in the progressive development, we shall deliver one to Tel Aviv, and one to Mecca. At the same time we'll give units to the Chinese, and to the Japanese and to the rest.

It's your responsibility the way we gave the keys to the nations, to share the knowledge. Some 10 years later, now we give system to use the knowledge and the key, to develop the flight system, not to fly the physicality, but to be able to release the Soul of the Man to take the flight of the universe.

These units will be spread rapidly across this planet, and I'm sure nations scientists will do the same. We have the units we'll manufacture units, and from this week on is your responsibility to get your nations to ask for a unit to be delivered to, that its scientists can evolve and develop and to bring the totality of understanding of the physicality and elevation of the Soul of the Man. In 2012, exactly 10 years ago, I announced about the same time, about the release of the key to nations. The key it was a USB stick with the knowledge in it.

Ten years later now we give the system to it, as they were too lazy to develop the technology. Now it's the same. Go to your governments go to your scientists and universities and tell them, there's a space unit free as a gift. (1:06). Can we bring it in and deliver it.

We asked the Universal Council to do something and there's still, as usual in the dimension of physicality, battling with what to do. Last time the Italians broke the rank in Europe, and through the parliament in Italy, and the rest, they received the key and they broke rank. This time we broke the rank ourselves with the Americans, that NASA becomes the leading scientific organization to work with Keshe Foundation Arizona to bring the change.

Get your universities to apply, to convince us that they are ready to go through that process, not just for the flight, but totality of the elevation of the science of the man, and we give you the units free. Does not matter if you are in Africa, you live in New York or you're in the jungles of the Amazon. If you're in the jungles of Amazon, we'll deliver it to you one way or another.

Brazil

Talking about the jungles of Amazon we have seen a lot of work in Brazil. A lot of heavy work done by Rafael and the team of the Brazil, to bring the knowledge across this planet. This week is the birthday of Rafael. I think Brazilians have done enough to receive the first unit as a gift for his birthday. (1:08).

A lot of work has been done in Brazil. As Brazil has been another point of contact for Humanity with the outside, for thousands of years. Now we give you the system to complete it within the universities of Brazil. We gave the unit to Iran, as it is the birthplace of Mitra. We gave a unit to Austria. This is the last point where mankind realized wars can become, the whole of the world involved in, through the existence of Hitler. Now we show the same country can become the essence of peace and knowledge. The rest is for you to convince your governments and your universities, to ask the Keshe Foundation for a unit, and what they are going to do with it, and within the next two months to achieve flight of the Soul of the Man, and not in the dimension of the physicality of the man.

It's a responsibility of Knowledge Seekers the way the Italian Knowledge Seekers did in 2012, by going to the parliament, forced their government to ask, and we delivered the key to their Embassy. (1:10). This time it's for you as Knowledge Seekers to get your governments to ask for the Enhancement Unit, and guarantees, that will be used for peaceful application, and sign their nation's to World Peace Treaty.

We'll bring the change we bring the change in a correct way, but we have to understand these units are there for elevation of the Soul of the Man, and not for man to fly to Mars, to Moon, and the others. Then if the scientists decide to test it, on the 6th of June they can try to go to Moon, or to Mars, or anywhere else they decide. John in Arizona is waiting for his delivery next week or two.

The same will go with NASA. NASA at the moment is baffled how they are receiving their system as a gift. In a way, they were, and they are still doing a lot of work. They are the first organizations became aware of this new technology and development, since

1985. So it's time for them to at least see what they have done, and what they could get, where they can go with it. It is not our job to deliver, cook, and chew it for you. It's our job to show you the way.

Now it's time for you as Knowledge Seekers to join your university, join your government, and start the first steps in production of the systems. In a way, we show you the first step, (1:12). and hopefully and I'm sure the rest of your universities will develop the next steps. This time I decided to give one to NASA first to stop the embarrassment of the last time, that the Americans had to come and ask for it, on the year or the day of the election of president Obama.

This time we work with all the scientific organizations and agencies to see that the elevation of the Soul of the Man understood, and is achieved. And this year become the year of manifestation of Methi, which means the collective awareness, understanding and knowledge of the elevation of the Soul of the Man and Mankind, to start the new cycle, as to start the creation of the electron, that it becomes in due course, ejected from the mother, from the neutron to create, to become part of, but independent of. This universe has been promised to be a shining universe, as is the birth, the mother point of the creation of manifestation of Children of Mitra. The Lover, to stand opposite the Creator, and shine beautiful enough, to keep the Love of the Creator and the direction and dimension of attraction of it.

In so many ways, the beauty of the creation of this New Universe as a reason. In a way, (1:14). the creation of earth as a New Universe, in the outer edges of the lines and the strength presence existence, of the fields of the Creator, will create a dimension of the womb within the two. Which leads to creation and Light of the Creator to shine, in a beautiful way, amongst all created universes and the Unicose.

Understanding of this has become very simple, and has been important for us to be able to do this. In a way, what we look at, is the creation of the new cycle of generation. In a way, that as the Creator sits within the center of the creation, Mankind will come to understand the totality of the understanding of what we call, his own existence. Mankind will come to understand, that he has become the center of the Love of the Creator for what He has created to show His Lover.

It's not that only Mitra shows his love to his lover. The lover shows the same love back to Mitra, and the citizens of this planet are that, what are called flowers, which receive the totality the beauty of the Creator to shine on. This is why we chose the Earth and we made it that Shining Star to become the Shining Universe. We could not tell you this from the beginning, but now we see that the human race is ready for that transition. (1:16).

Maybe, maybe today's teaching will be understood in the time to come, and then become the seed of what we call the play of the Universal Community, to become the travelers, to see this beautiful Universe, which has become the center of attraction and attention of the Creator. We have planted well, we watered it well, we had to clean some of the thorns

and dead leaves from it for it to be ready to shine when the Mitra takes his time and place, and position, to make it the womb of the created, and to come to be equal and the same.

I thank you for today's teaching, as without you we cannot teach, even though we can teach through the Soul of the Man. I hope you understood the new position and the purpose of the teachings into some extent today.

Maybe, now you understand what is the responsibility of Knowledge Seekers. Your responsibility is to sow the seed of the Knowledge of the Creation and the elevation of the Soul of the Man, and we give you the seeds. The Seed is not the Gans anymore, or something else, it's the seed of the Knowledge, understanding, and we give you the tools, the plant pots to grow these seeds in the form of the Enhancement Units.

It's for you as Knowledge Seekers to take the banner, contact your governments and universities, and Keshe Foundation will deliver unit by unit. Let's see, (1:18). last time as collective Knowledge Seekers 10 years ago we managed to reach 75% of the governments of this planet. See how much you get your governments to accept the units, your universities, and with it commit themselves to peace. In a way we have given you the roles of peace. Is for you to turn the guns of the Soul of the Man to what I call, "the beauty birds of the freedom of Man in the space of the universe." That little white dove that we symbolize as the sign of peace, has to become the sign of the Soul of this planet, that collectively we bring the process for the peace, and the elevation of the Soul of the Man to become that New Universe on its own.

I've done my job. I still carry on teaching, but slowly, slowly we open your eyes to the New Knowledge of understanding totality. When you become universe you need to know a lot, to be able to create the condition of life, that it stays perfect, and reflects the true essence of the Creator.

Thank you very much for today and I have one thing to say to His Eminence Ayatollah Khamenei of Iran and to Vatican and to Jerusalem. The year of Methi is upon you, it's for you to decide how to unify to show the beauty of the Creator, which is the Soul of the Totality of the Created on this planet. We provide the tools it's for you to water it to show his beauty with the knowledge correct conduct and what we call, the elevation of the Soul of the Man, and not to slave the man through his soul. Thank you very much Rick we go through a break and we come back and we try to answer human questions.
(1:20).

(1:25)

K- By the way I don't know if you have gathered or not, this week is the birthday of Rafael. Happy birthday Rafael. I think I can say, he has devoted his time and life to the KF and the humanity, and I think it is the best gift we could give to the nation of Brazil. (1:26). It's for him to decide where it goes, it's his birthday gift. And it's thanks to all the Brazilians who work so hard to extend the knowledge from Amazon to the bigger cities of this country. It's a beautiful nation, we've been there a couple of times, and we always say we go back. We know the nation has the capability and the knowledge of the space, but let's see how their devotion to their faith will bring man and the science of this nation to be parallel with the others in a very rapid way. By mid-April it's for Raphael to decide where he wants it to be delivered to with the agreement of his government, and deliver it to that point and university, or that governmental space organization.

We have met with the officials in the scientific world of the government of Brazil while we were there a couple of years ago, before Corona. It's amazing how this nation will bring the space T and the knowledge of the, what we call, man, to a new D. Thank you very much for all your work the Brazilian team, in what you have done, and what you are doing. I think it was the best way to give a gift, at the right time to a nation and a person who has worked so hard in the past couple of years to share the knowledge freely across Brazilian nation. We wait and see, and hopefully we see more to come.

It's your job to go to your governments and universities, and ask them to request from the KF standard office at KF kfm.global , (1:28). which is the usual office contact for the KF. Then we respond. It has to be I want it for my country, not work. It has to come from official university, embassy or the government to the KF in Austria. We'll respond as we done before by giving the Keys. This time we give the system. It's no use telling us I want it for my nation, it has to come from your nation, your university, and we shall deliver. It's no use coming there and just sitting. You have to prepare your nation to receive it, to .. use it, to elevate and bring the knowledge across. To share it directly with the scientists and it's, open it to the D of the knowledge of the citizens.

Any questions.

Q: … We have 2 human questions from the German speaking community. One would be, what about the rings of Saturn, was it a planet before, or how does that look. Can you say something about it?

K- There is a paper written called, "Rings of Saturn." This paper is not released, but in it, (1:30). we explain how the rings are created from within the center of the planet. It's characteristics with all the planetary systems with a plasmatic center. The rings are primarily created by the interaction of different fields, superimposed on the other, as the

planet is still at infancy. Saturn is one of the youngest planetary system in the solar system (SS). As it will age, and the fields within interact we'll see less and less rings. We have these rings around the earth. We see these rings even around the sun. But as you have different materials gathered over the travel of the Saturn from the edge of the SS to inner part, to where it is now, it has collected different materials overlaying each other, and each ring is manifestation of that overlaying material, overlaying each other.

In a paper called the ring of Saturn I have explained this very clearly. .. whiteboard . (1:32). But I can explain it. In some of the teachings in the past we have explained this. Where the rings of Saturn comes out of the creation of overlaying of different density materials. … You have a center of the Saturn, you have the Sun in the center. This sun, by radiating different fields in different directions, ?? leads through its dynamic structure that its materials revolve, and revolve around this point. The Saturn was created somewhere here (outer edge of SS), as a collection of some atoms and some plasmas. As it evolved and rotated (around the SS), it becomes bigger, and bigger, and bigger. As it goes in (towards the Sun), it evolves different layers. Now you have the Saturn center, with another layer on top of it (red), (1:34). then this process carries on, and then it comes to another point, where at this point it's (has accumulated) different materials, in this area. So now you have the blue, red, and then the green. As it goes to towards the center (of SS). Earth started the same way. Earth at the moment is somewhere here (midway to the sun), but it started in the same area (as Saturn at the outer edge of SS). So as the .. Saturn closes in it will come to this point (where earth is now), over billions of years.

What this effect has, we have the center, now the interaction of different layers on top of each other, creates the ring of the fields of it. So now you see the rings of Saturn, the red and then the green one. (audio got muted by mistake ..) (1:36). You see this layer by layer. The green one stays as a center, the red one has created this red ring, the green one created this green ring. Then it goes on, it carries on with the next step. If you went through a different strength, another layer on top, this will create another ring. These layers are not necessarily material, .. could be different strength H plasmas, as they are on the boundary of the SS.

When we see the rings it shows the composition of the inside materials, what composition they are. We see this with the brain of the man. If you look .. you have the soul and you have different density .. brain tissues. There is no difference, that's interaction with its environment. Gradually as the Saturn makes its way, to let's say this position (where earth is now) in the SS, it most probably losses the green and the black (rings), we'll see one (? ring). We see this with the sun the same. Sun has its own rings, the same as … Saturn, but usually it's one or two. Then because of these different strength of the fields, we see different .. materials, according to the strength of the fields in each layer. (1:38). There is nothing unusual we understand the process.

We use this knowledge in defense T of the spaceships. In the spaceship programs when we build the systems, we create opposite interaction of the fields knowing this knowledge within our reactors. We don't go and build it. Within the reactor we create the condition that one of the fields is opposite to the others inside, so the field outside. This is used for defense T. This is actually how part of the Iranian defense T used in Iraq, in the last January, two years, because it creates a direct, total black condition , you cannot see.

The purpose of this in space T is very simple, is that, let's say a meteorite comes in, and you are a single track, what we see like meteorite will come in (passes through a single track), but when you have a double layer, if you penetrates this (first layer), not this one (second layer) reflects it back out. It's a very advanced knowledge, (1:40). and I have built this one in the space reactors we use today. We don't create 2 motors rotating on top of each other, we create the fields which their interaction creates the condition. There are no motors, there is no containment in the U, it's just the field forces. Go back to part of the teaching where I explained that, in the reactors, especially the first blue reactor we made in Belgium, and then in the first Iranian flight system (FS), we saw the reactor going anticlockwise, stops, and then it goes clockwise. When you change the pressures and the field forces within the reactor.

You don't need containment. In the future man will not have a house built of bricks and mortar. We create our walls the same as the earth, through the fields, the forces within the reactor, we put in the center of our property or in the U. then understanding this we create, very much the way you create clouds, not to be seen we create partitions. Then by changing the fields you decide you want to see the light.

The world of the knowledge of the physical D in the next few months and years, will change. This is all in the teachings, it's not something new. Go through the patents you see it. Now you understand what it means. The structure of the space T, (1:42). .. in the STM has one principle. It's man who has broken it up into bits, and now he doesn't know which bit fits to what.

(1:44).

Any other question

Q: … Why did the Mozhans weren't allowed to open the window during their training?
K- Ask them.
Q: I asked them but they don't know exactly, we speculated.
K- Ask them they will tell you. First of all when we were in the .. You have to know what happened with the Mozhans. .. started in Ghana .. we traveled to .. South China Sea, (1:46). into the Human island, which is parallel to Hawaii ..

Some were enlightened, some understood some of it, but in time they'll go back to it, and they'll understand what is taught, and what is the reason behind what was there to do. It's a process, it's what all of us will come to understand.

While you are there, the German community, we thank you for all your support .. travels to the Linz EC …

(1:48).

Any other question.

Q: … How can we help speed up the process of peace between Iran and the 5plus1, as we are now 5 days into the Persian New Year, and no sign of an agreement?
K- The agreement has been done. The agreement is total and complete. (1:50). There are a couple of points, which is actually irrelevant, needs to be done. There are .. The main problem, it's not a problem, the hiccup which you were not in public aware of, is that the Germans, English, and the French are trying to get as much as possible before the end, before the Americans sign the paper. Iran is using these points to gain back what was done wrong for years. The Iranian leadership is playing it very skillfully. You saw it just 2 or 3 days before the Iranian NY, the British released 400 million Euros of money, which was kept from Iran for past decades, and that was used to release to people, who was support to be there, to be released. I advised the Iranian government to keep an eye on these 2 people who been released, because it is the pattern of the British, that they use these later on, to create mayhem, and become the leaders, of whatever they are trying to push. We saw that in Libya, .. Iraq. My advice to the Iranian government was to keep a very close eye on these 2 guys, and the people whom (the money) has been released. Because they become the next seed for the problems, a lot of problems, which is set, to setup (in Iran). They send them in to do things, then when they get captured or they're found out, then they pay for them to be released. We saw that, same thing, with the president of Libya, how the British paid for him to come out, and then they put him back in as a leader.

So there is a diplomacy going on, (1:52). the French want
(1:54).
(1:56).

The delay is made by the 3 EU members trying to collect as much as they can. The Russians have got more or less free nuclear supply from Iran … We see in the upcoming nuclear reactors .

.. with Iran providing, what do you call, producing a nuclear weapon has gone to the bin, with the documents we provided to the IAEA, and the American government. And we saw how the Iranians reacted. The process is ongoing.

Assassination attempt on Mr. Keshe by Israeli MOSSAD

We were aware the Israelis lying and cheating and they tried to prevent this process from going ahead. (1:58). There was an attempt on my life in Istanbul 2 weeks ago, which we

kept it out of line, again by MOSSAD, planned by them. It's all pictured, and .. videoed. This was because Israelis know that we opened their hands, and they didn't want it to go any further. That was 2 weeks ago, on my return from Istanbul to Vienna, and immediately meeting with Iranian officials, we saw the reaction of Iran, in Vienna, and we saw immediately what was done by the Iranians, to the headquarters of the MOSSAD in Erbil in Iraq. You cannot attempt on the life of anymore Iranian nuclear physicists. We respond accordingly. You tried to take my life, we responded again to your bases, which were centers for creating ? ??? that's what You ?? has in Erbil couple weeks ago. Now you understand the whole process behind, in the background. If anymore attempts made by the Israelis to another Iranian nuclear physicist, we respond accordingly, in a very strong way.

The understanding of the T and the peace is part of each other. This is why earlier on I announced that we will share the space T of Iran with the invitation of our UC member for Israel, with the nation of Israel, not with the state of Israel. It's his job to arrange it through the proper universities, and the presence of Iranian scientists. Sharing a knowledge is part of our work irrespective of race religion .. (2:00). But I have to have the clear indication from the Iranian leadership that this unit can go to Israel, and we get a collaboration on the scientific level, the same as what we are doing with NASA.

Any other question.

Q: .. We all know that the US withdrew from the agreement in 2015 .. How can we be sure they wont' do this again playing with Iran?
K- This wasn't a play. You have to understand the sate of mind of the last American president. He is money orientated, he got his daughter by paper, married to second richest family in Israel. He got the support of the .. Jewish Lobby, he gave the White House in their hand, for them to become, to be able to do whatever he wanted to do. Part of that bargain selling the US to the Jewish Lobby was ending of the contract .. the peace negotiation. This was understood fully in the world of politics and diplomacy. It had nothing to do, he just sold, the guy will sell his shirt for anything.

(2:02).

Next question (2:04).

Q: Salomea … I am worried about this robot soldiers of China at the border of India. Can we do something to stop of the repeating situation in Ukraine in Asia. .. Can we do something as UC?
K- We already have, we already started. I think you missed the point in today's teaching. By giving these units to every nation, and them developing it, we'll come to the point in the physical D that the borders don't have no value. The Chinese can be in India in seconds, and if the Indian government asks for the space reactor to be delivered to them, Indians can do the same. Don't forget the teachings will be simultaneous to all of them. It's not a matter of who will, they all will
(2:06).

We teach you everything. Collectively you need two units to work. So NASA has one half of the equation, and John has the other. How NASA collaborates

(2:08).

I am traveling to London to meet with officials in UK to transfer the T, especially to ?? (2:10). It will be gifted to Queen Mary College in London. We'll see the next steps. ..

These units have to go to nuclear centers, because they have nuclear facilities. You cannot fly with Gans's. It goes back to the origin of space flight in Tehran in Sharif University.

(2:12).

As you've seen the units have gone into mass production.

Q: They line in another century ..
K- We all live in the same century it's just changing the man's habit …

Any other question. (2:14).

Q: Is the Cup of the U 6th or 7th level of the matter state?
K- No .. You have a matter state in every level, even in the 5th Cup you can create a matter.

(2:16).
Q: … the Keshe sales UFO, the hovering UFO found in the KF Store. Sometimes rotates left then right, would you be so kind as to explain this phenomena?
K- I think we just explained that in this picture. It depends on the field forces of the day. As I said … go back to maybe 5 or 6 years ago when we should the units we saw the change of fields between day and night. .. in some parts of this planet on some days, if you weigh yourself on a scale, say before 7AM and weigh after 10 o'clock you say I lost weight 1 kg, or I gained 1 kg. My diet works, but in fact, it's the field G of the earth which changes. You haven't lost (weight), it's not .. atmospheric pressure, whatever. (2:18). These are field forces G field forces. It's the same fields interact with these M field, of these flying objects on your systems. Depends what fields and what environ dominating that day. It goes back again into the teaching .. . outside forces dictates the forces on the magnet. Even in your electricity lines, you have this variation. It's not from the power source, it's from the fields of the U which changes it. We understood this in power transmission years ago. Sometimes you produce 2 KW but when you come to substation it's 1.6 KW, because the cable line on its path is giving energy to its environment, at some point has paralleled with it. And sometimes we produce 2 KW, but we get 2.4 KW. Depends what G field of the earth at the substation creates in respect to what we call, ?? inserted to create that .. voltage difference. It's a M field flow, it creates a current, so it changes your power levels. It's the same with your .. UFO systems on the

move. It very seldom happens, it depends on where you are, in what position and how you position. If you lift it up 2 meters higher, (2:20). it will go the opposite way, when you bring it down, it will go to the opposite direction. It depends on the … daily fields.

You've seen this in some places when they say it's visual perception, by, when you think you are on the hill, and the car down the hill, goes up the hill. This is the same kind of ?? things, it's not a visual game, it's field interaction of the environment on the system. Even your current flow can create that. Even if you switch your wires, back to, unplug it and plug back different ways sometimes you get it. It all depends on the field interaction at the point of the .. two system , because they are independent form each other. One of them changes, so forces the other one to react to it. This is what Einstein called the "funny thing" you have to find out where is the funny, and change it, that it changes direction of the rotation of your UFO.

Any other question

There is something interesting with these UFOs try to change channel

Q: Nikolai, … (2:22). .. it's a wonderful gift you have given for the birthday of Rafael, that's quite fitting. .. with the intellect and the heart. In what I would call, so called, spiritual communities, otherwise people who have, let's say spiritual community. they say come from the heart because that is the strongest field. In attempting to teach some of these teachings that come from the KF, and your knowledge of the greater collective knowledge about the location of the soul within the brain. These people who have learned a slightly different understanding have great difficulties with the idea that the intellect, the soul in the brain could be more powerful, or .. perhaps, that the soul could be within the structure of the brain. that is very difficult for them. And they say, "no, no, come from the heart and forget what is in the brain.' Can you speak to this and perhaps expand some knowledge in this area?
K- In what form?
Q: Perhaps I want to know in which regard, how are fields of the heart perceived to be so strong. Is it the manifestation of 2 other fields, that the fields within the brain and the fields within the body, the STM and the STP, (2:24), create those ..?
K- Exactly, that's exactly it is. One is tuning to the other and visa versa. This is what your ?? self says, my heart says, don't do, because you receive the message from the soul. It's a translator, interpreter of the message. Understanding of the totality is the part we say my heart says, don't do , and where did the heart get the message from? Partially its own interaction of the fields on the matter state (S), and partially from the soul. The STM never sleeps, the sun never stops shinning. It's the man who is on the facing of the sun, side of the earth, or on the back of it (earth).

It's then we receive the light of it with different strengths, it's the same with the STP. Very strange, maybe in the future mankind will understand. .. The STM shines in all D and directions. What happened when this sun, (2:26). shines on the left of your heart, or the right of your heart. Would the position of the heart in respect to soul, create different field interactions, of different strengths, that is creates different emotion within the man.

Which part of the heart will receive air from the lungs first of the highest order, and takes back from the other.
The field interaction with the soul and the conversion of the fields of the heart, that's why we feel the emotions, we feel my heart , because the sun sits above in the center of the brain. And now you have this rocking chair of the heartbeat of the man, in different positions continuously. Then you understand why man has a mixed emotion, ?? and emotion.
The sun, the soul does not stop shinning. It's the position of the heart which receives it, and then how you react. (2:28). The blood flow is sporadic in the body .. in the circulation, it condenses in this area (of the heart). So it has more possibilities of interactions (with the soul), as it gives (to soul), it receives. It's not a one-way traffic that we only receive. When our emotion goes there, it feeds the soul, and the soul communicates with other souls. That's how your balance, of your doing comes. We see how things turn out.

We see how we feel the fields, due to what we call, .. you got to understand something very simple. This goes back again to .. science of P. You have the heart of the man, .. blood circulation which we cal the dark blood, deoxygenated, and we have a blood which is oxygenated. Now we understand the blood of the man is a Gans. (2:30). Brings not only the blood but with brings the emotion of what the P has done. Every blood when it comes into the heart .., like the way we have the liver which we store from the blood, surplus. The STM has the same liver, memory bank of what ever has been brought from the physical emotion. Then you have the source of life on the environment, and this comes with a different strength. We look at the physical condition in how much blood it goes. In the new knowledge we look at how much fields it brings in (oxygenated blood side), and how much fields this one (deoxygenated side). The interaction of the fields between the two creates a new D, what we call the STP. And this in turn interacts in a mixture of fields with the STM. The same as it gives it takes. Exchange of information in the central bank, or most of it, because the rest of it through the same blood flow will go around the brain, the skull and comes back. It's very much what we never understood. Where does the G starts, and where does M fields finishes. (2:32). If you understand this, then you can do a lot in the future T of understanding the knowledge of creation (KOC) to decide on the condition of the P of the man. These two (STM & STP) have to work in unisons to keep the soul and P in all D as a field. Where the P is manifestation and interaction with the fields of environment.

Then now you tell me, why do I feel that emotion in my heart. It's where the sun shines, interacts with the totality of the fields, where here (in the head) it collects in the circulation around the brain, information only about physical interaction. Where the essence of the physical soul of the man in the heart. Now you understand. Then if you understood this, earth, moon, Jupiter, planet Zeus, another galaxy, is how we allow this field (STP) interact with the field of the soul to lead to the, if decided, to creation of the dynamic P of the ?? zinc. (2:34). It's as simple as that. You convert this into the knowledge, where the sun is the soul of the creator of the man, and then you have the STM, it's the same. Then you understand, what I call , the STP, then you see, how the STM, STP connects through to the STC. It's so simple.

Next time when you feel it in the heart, see if you can feel the emotion of the soul, and then that emotion of the soul, if you can feel it, then you decide is it, with interaction of STC. Then you become aware of the knowledge of the Unicose, the creation.

As Messengers we understand the totality, that's why we can teach so normal and so on the level that everybody can understand.

Any other question. (2:36).

Q: Ed, … Is there a connection between Inertia and emotion, if so could you elaborate on this?
K- Emotion has a strength which changes to P. When you feel sad, you create cries and tears, or whatever. You convert the fields into matter S reaction in the body of the man. So it is Inertia based, yes. You change the emotion into laughter, so you convert the emotion to reaction of P. It's what I call the Inertia of the man. As I said a few minutes ago, every level has Inertia, it's how you interpret it, and how you manifest it, and how you show it.

Q: Brazil comment. .. we here in Brazil thank you ..
Q: In Brazil there are ten thousand in Telegram group, if each of these reach a thousand we are tens of thousands. (2:38). When you started taking in Brazil April 15th, 2010 went in the UN Security Council, our former president on a trip to his country defended before the world, the peaceful program of Iran. Our president was rejected by the geopolitical forces at that time, criticizing him, as if he was innocent of the true intention of Mohammad DeJan. With the group of KS perhaps it is
Could this meeting of the presidents ..
K- I don't understand.
R- Could it be this meeting of presidents .. this connection with Iran but got rejected by the forces of the world.
K- The situation is typical, Iran is not the only one. You got to remember something. Maybe the first time we disclose. If you remember North Korea, (2:40). was close, under a lot of pressure, making bla, bla, and everything else. Nobody could understand the rapid development of the nuclear T of north Korea.

KF released internally to the Chinese government and certain government officials within EU how N Korea is gaining knowledge, nuclear and rocket T and the rest.

.. the T is coming from the European Space agency sold by the Belgium director into North Korea. Belgium's were sending weapons T developed by Europe through the director to N Korea through their government, the officials. That door was closed very rapidly. We see N Korea does not show much. they are trying to, but they cannot get. Because Europeans were having access to the Americans latest technologies, as part of being the same, working, collaborating and this T was getting sold by the Belgium's within the EU space T, in a back door to the n Koreans.

(2:42). the same man, same group. Now we see changes.

Brazil Space T

It's the same with Brazil. Brazilian space T is very mature, that's why we always picked to work with it. Now with the gift of the EU it's the scientists who already have the knowledge in a very deep way can develop it more rapidly. Our objective is to give to the nations who are very rapidly developed , and put them in, not competition, but collaboration to achieve the flight collectively. Where you can fly zero-time, more or less, than we see the present aircraft industry becomes obsolete, borders become obsolete. It's the pattern which we always worked.

Go back to last week, I explained the situation very clearly what happened in Erbil, what happened after we left the Iranian embassy 2 weeks ago, now you know the reason. You touch us, we wipe you out. You touch the T the wrong way, you wipe yourself out of the arena. You touch another Iranian nuclear physicist there will be nobody there to touch us anymore, because we make sure, that you touch, you wipe yourself out, not us.

It's the same in Brazil, the Brazilian leaders understood the importance of the development of the nuclear T. The club could not stay a club.

I can show the evidence of the attempt on my life, on the screen now, 2 weeks ago, by Israelis MOSSAD in Istanbul. (2:44). It was just a pure luck, that it wasn't set, the way they set it. We give the knowledge, we do the knowledge freely, we .. accept the knowledge freely, be it political, be it scientific, Israel, Brazilian, leadership understood, because it's the progress, we cannot go into space if we don't fully understand the knowledge of creation (KOC) which is nuclear plasma. Otherwise, you are still burning fuels, gases what we are doing now. The Brazilian scientists and government understood. It's the same , it will be the same. We don't get crucified by not knowing, we get crucified by knowing and there is something wrong.

Any other question.

Q: .. Brazil… (2:46). you said in a teaching , our body disappears when we have 72 Tesla's. .. when we do tests like MRI's it has 1.5 or between 3.0 Tesla's, do our fields change permanently or come back to the normal after exams?
K- You mean when you go through the field radiation? Most of it in MRIs and x-rays, the body will disperse the energy. We do that in nuclear testing's. When you go to the doctor and they inject the nuclear materials into your blood and they take the radiation with the systems to see where the faults are, or the damages in the body. These kind of radiations are temporary and they are usually cleared out by the body within 24 hours. X-rays if they hit the center of the nucleus they create dislocation, but essentially they just pass through, and the energy is absorbed by the body, and dissipates as part of it. It depends, we see sometimes faults with the x-ray machines and MRI, is when they have been dis-concentrated and that creates a dislocation of the .. fields or increase the fields of the Gans and moves to a new position, and that position becomes permanent and can lead to

damages and other things. Now we don't look at the MRIs, (2:48). and x-ray machines and nuclear materials for medical application as a matter state, as an energy state (S) and what that energy does and what new position creates for it. So essentially

(2:50).

When I saw the first MRIs coming out in early 70's … Can we get this to Iran, how fast, do you know what these can do ..

If you literally could create the field strength within the MRI of the STM, you can elevate the STM in the MRI machine. (2:52). But we don't have that knowledge, because we are matter S position. We never understood the difference between the matter and the Pl which the body of the man is. It's not matter, it's a Pl, that's why it is soft, it takes different shape of it, it allows it. If you touch your skin, and you push it, it goes up and down.

(2:54). Because now the knowledge becomes available in a what you call, a restricted level according to what we want to know about today. Would we see the soul or a person who has sitting and working with Tesla. Would we find people who worked with Tesla and find their descendents ..

Rafael speaks

Q; Rafeal . I think he is ready to say something. Perhaps ..
Hello .. first of all thank you for the Happy Birthday, and thank you for this gift, I was not expecting that. .. the whole Brazilian community is very happy with this. I would like to share something, (2:56). that we shared at the One Nation about the work here. As we said, believe it or not we started with just the sincere wish of two people here in our country, this work. We said, that is all you need to start, and then the rest grows out of it. this is what we are feeling is happening here in Brazil .. as we have now more than 11,000 members, but the main thing is how .. (Reads "Power of Intention - Brazilian Telegram restored" .. (2:58). ..
Thank you for all your love and care, Mr. Keshe.
K- You're welcome. Thank you for your work. I was talking .. interesting is that, how the translators of the KF into the native language creates, or has created those, who actually through their translation initially, understanding the essence of the soul of the T and the science, and they become, what do you call it, totally geared up with work of the Foundation. We saw it with Fabio. We see it in Rafael. We see it in Mario in KF Linz. We see it with most of the translators, we see it with Wang Lynn before. I think in the translation, it's not just the word which gets translated, they are translate the essence of the emotion. it's beautiful to see how they become the center of the knowledge and then the center of the KF.

In so many ways, when you wish it, you receive it. We went to Brazil with the wish to bring that elevation of the knowledge and T beyond the restriction, (3:00). which was put by the UC of Portugal on Brazil. We see a lot of changes. When people wish. The Brazilians have every night a session for the elevation of the soul of 5plus1, that is keeps on a path of peace, and how they work on it. It's the wish that creates, it's the sun that shines. It's just .. how many bulbs do you put next to each other to create that number, that light and how it will shine.

We see the same thing with the UC member of Italy, how Italians are working in the background. We see the same thing in Iran with .. how the situation is changing. Gradually it adds up.

One of the most discordant part of the KF is where we speak the language, like in US, and in England. The center has not been created, except for those who just work within the structure of the .. British don't come together. The Americans , because everything is in English, why should we do that. It doesn't need translation, and they don't make it thousands of , hundreds of thousands of, but they have not managed to ?? it.

But when it comes to language they do, and through that translation they learn more and they connect more. We've seen that in Brazil. It brings a reflection of when we were in Brazil about 2.5 years ago for the first time, and Rafael was the translator, I could feel the essence of the sincerity, the simplicity of understanding, (3:02). the truth about the STM, and the knowledge was something secondary. It just developed.

There was a huge objection by the, to, especially from the old guard. We saw one of them getting disqualified from Facebook very recently from rhetoric came again back ed by Belgium's. .. objecting why we put Rafael to head the KF. We had a number Brazilians who thought they are entitled to be running the KF. .. because they did so much P, we look in the line of the STM. It's proven to be correct, that our judgment by soul was more important than position acquiring place, in the Brazilian community. If we would have allowed any of the old guard stayed there, because they were 5 years before, KF Brazil would not be where it is today. We've seen it, it was the right decision.

We see the same thing when we appointed the two heads of KF, the 2 ladies. There was a lot of rhetoric, that this and that. We see KF growing

What we see in the soul counts not the D of P. Brazil will go a long, long way, I am sure we met with the governmental people with Rafael when I was in Brasilia, at the advisors. (3:04) and we've seen now, with this gift they will get involved. They'll become part of it and they will extend this to knowledge sharing between most probably Brazil, Arizona, and NASA and Iran. We'll build in the next few weeks what call, the space group of the KF, where the scientists around the world will be made members of this group on Telegram, that all can share knowledge. It doesn't matter where they come from, NASA or the rest. Or some of them sit on the sideline just to learn and see what they can do to show better. Any of the groups which tries to hide things and trying to sow that they have done better, or come up with something, you'll find out they create there

own demise. It's there when they block, from receiving knowledge. We'll see step by step the process growing. I am sure Brazil will be a shinning star in the process of .. space development.

We knew it when we landed. Go back to the picture release at the time when we landed (UFO around the sun greeted Mr. Keshe when he arrived in Brasilia), in the skies of Brazil. It's beautiful, you have a beautiful nation and beautiful KS, and those who were there for their own personal gain, have already become silent, and disappeared, and they'll disappear.

Thank you .. Rafael and your team, and a very happy birthday to you. I received a message from members of UC and the others, that it was your birthday on 26th, would I give a message for the teaching of tomorrow in the Brazilian Chat. I thought it is better for the whole world to know, not just the Brazilians, what a gift, (3:06). you have brought to the state of Brazil KS, and the nation. And it will be well used. You know exactly where you have to go, which scientists you have to speak, because when these things land you cannot put it in your pocket, it's a big thing and they have to react, to get people to understand the knowledge. Thank you … and many beautiful Happy Birthday.

Any other question.

R: Just a reminder the Brazilian group has a Zoom meeting 11PM CET.
K- They have a public meeting every night if I am correct, about Iran the peace negotiations on Telegram, there are quite a few of them in there. I attended one of them very recently and it's very nice, very beautiful the way they do the work. Maybe it's good to extend from 5plus1 to the whole humanity, the world leaders, and the group has enough power they can do that.
Any other question

Q: .. When are you going to return to Iran
K- You can ask for clearance when you enter Iran, and the government guarantees you can leave Iran when you enter. (3:08). The Iranian KF has already submitted the application to the government. We have to wait, between 30 to 90 days ..

(3:10).

Any other question.

Q: .. How can the field of the STM radiate voluntarily over the field of the body of the human. Is it about purity of thought?
K- It's purity of accepting, allowing, that's all. It's understanding I can do that, I can allow physicality to be .. in parallel, (3:12). and not subordinate. If you make the P subordinate to the soul, then we make the same mistake as before, where we superimpose the P over the soul. It's a balance, and how much you can change, you can do it with a heartbeat, ..

understanding of the HB the true HB of the Pl, not the HB of the man, you've seen the physical ?/ damage.

Let's see what happens, what we shall do in the coming days. In the first week of April hopefully movement of the first EU into AZ …
It's not there for you to go and see. It has to go through the process of those who are considered needing the .. enhancement in body, emotion .. EU will benefit by it. (3:14).
.. start with American veterans ..

(3:16).

425 KSW March 24, 2022

End

426th Knowledge Seekers Workshop; March 31, 2022

(Quick index (mostly complete 5 p) Transcription whole is done, Proofed part 1; need to proof part2 , Key Phrases words) (MaGrav part 10 Excerpt)

Topic list:
Process to receive FEU; Changing Gans back to matter state; You become the sun to feed don't need Gans; 5 Cups to see if you want to be cat next lifetime; Elevate STM to image of Creator; Electricity from fields of solid magnet or MaGrav from dynamic Plasma; Power station in front of you; MaGrav - Cup of U - Cup of Man; Physicality has to accept the elevation of the soul; The MaGrav is inside body do you want electricity or path to the Creator?; Mankind is still a newborn needs more maturity - but decision is man's he can elevate right now; Silkworm story - we cocooned man he has to open to his freedom; Romania instruction on Gans's if nuclear or biochemical contamination - 3 Gans' with lots of AA ; Walnuts soaked mixed with CO2 Gans best source of iodine; War of Churches in Ukraine were it started then Americans involved in nuclear biochemical weapons; Warrant for Soros by Russia and China starting wars; specific way to produce pure blood fits all types for humans, animals even plants; %plus1 discussed new sanctions by US is political - try to stop BRICS; Specific way to make Tritium Deuterium Gans; Crude oil is AA ; Never count what you do; All AA are not the same; Race near Earth knows how to replicate Gans same like Heinz Ketchup;

MaGrav teaching : (2:28:17)
You need a nuclear power station to transfer one it can be done, 1 cell across totally with all its characteristics and memories. It takes a small MaGrav unit with no power supply to transfer the whole STM and STP of the man. You have to understand the knowledge.

ENGLISH TRANSCRIPTION

start proofing (part 1 done)

(:12).
K- … from somewhere on this planet and somewhere point in the U. We welcome you back … Before the part of the teaching Rick asked me a question to clarify in respect to many of your questions about the spaceship units (FEU). The FEU and the documents for it for some of you who want to submit it to your governments, or your institutes and universities to make the request to receive it, will be put together in the next couple of weeks, completely with the headquarters, and everything else to go with it that the officials can take step. When you do such a thing, the majority of the time, it's not just that you approach the government. Government goes through Foreign Office, FO goes through the embassy and they usually have someone in the embassy who is scientific attaché, or something to do with the science part. Then they appoint them to check, to come to see, and then get the documents, they report back to their OF, and FO goes to the government, or to the university. This is the normal procedure, it will take about 1 or 2 months, depends on how much you push. So we are setting that structure up, that we have the .. personnel support to handle the embassies and scientific organizations. ..

It's not just you walk in and they yes, you get the gift. It will take a month, (:14). or two for them, and everything goes through a diplomatic, it's not just you walk in and they accept your word, and they do it. You submit the documents we give you, and then we give you a letter of a gift of a unit to the country, and you ask it to be brought, most probably for a university, who can take charge of it, because governments don't do these things themselves, and you have to find a university ?? and this university is prepared to do it, or this institute is prepared to do it, and then they accept responsibility, and it gets done.

We expect a lot of paperwork, and we have to get our end sorted out completely, to give you the units. But the units, which we control, we don't need to satisfy the governments. It will be done by us, Arizona (AZ), Tehran, Austria, Beijing. Most probably we'll land one into Nigeria to Alekz, with the support, we already have a company there. Now it gives us, this allows, we can go to Australia directly, because we already have companies there. Philippines is another point, we are there. We can shortcut to our end, and invite to do. So the first units which are getting to go, will go in these positions, where we have a .. a reference when you go, it's already been done.

We are ready to ship the first units in the next few days, and with it, once we have everything we want cleared in the shipping, AZ, and Tehran and Austria will receive their units as it comes up. Then we have others to go to, and we build it up that way. But those of you who have no point of reference, they have no company, (:16). KF that we can work through, then we'll go through. You have to go through the diplomatic, and universities to find the right match. We already have a setup in UK, so we can go directly into the structure.

The same is with Brazil, it is easy for us, because we already have an established company there. This will be done in that process, and that needs time. We have to prepare our side, there is a lot of movement in the background with the KF. We don't announce it anymore, because we used to do it, we get a lot of problems with a bunch of hooligans on the Internet. So we do it, we give you a point of reference, and when it comes in there, it will be handled by people who are appointed to do it. …

I hope that answers a lot of your questions, .. we are in the process of a lot of changes, a lot of movement, we are waiting for one thing to clarify in the KF, in the background then we can proceed with the rest of it.

Teachings

In regards to the teachings of what I call, understanding the process of the interaction of the fields. A lot of you .. or a lot of people have a problem, that, how do I recognize I want to land on the house number 6, on ?? this street, and not on number 4? (:18). I don't land in the wrong place. How accurate is the system? How do we land in the position? How can I know I want to land on the North of the Moon, not on the South Pole of the Moon? How can I pinpoint accuracy to where I want to go. This goes back to the total understanding of the interaction of the fields in the U. Is part of what we call, the communication line, of what we have, and what we choose to have.

This is me with my soul, and I want to land here first, at #4 in the city of Tehran, on the streets of whatever. This is the position I want to be. Then after that, I want to go to NY on the 5th Avenue to see Azar in her surgery. How do we do it? How do we know we land in the place, and how do we know, that when we arrive here, Azar is in the surgery and not have traveled to Tehran for the New Year. Where you just came from.

Go back to the teachings … (:20). to the understanding that every magnet has a connection with every M fields, every element ever produced in the U, through the system, through the structure of the soul. When you enter the FEU and you enter .. the control unit, you are sitting here, what I call, with a hair dryer on top of your head, and with your soul centered, beautifully dressed, waiting to fly. You have, you have Azar in Tehran, you have the position 1, and then the soul of Azar, 2, pinpoint accuracy, because one of these links (M fields) is connected to the position and place of the wish, and one to Azar.

In a way, the soul of Azar brings you to where she is. Because there is more communication in the line. You don't go there and find out, oh, sorry she is not there, I am in Rome. But before you take the flight, the soul of, the way you communicate, the way you understand, is I don't have time to see you, come tomorrow. (:22). You don't take a flight, because the soul has already agreed on a time, position, and a place.

You want to travel to the north Pole of the Moon, you still have a M field connection, one of these lines is already connected. The transportation and transmutation (T&T) of the future, is understanding the flow of the M fields. If you go back to the teachings of the

past, I have mentioned quite a few times, the human scientists, the knowledgeable scientists of this planet up to now, have not managed to measure the field strength, individual field strength of a magnet. Which is static, when it comes to the plasma (Pl) of the soul, when it comes to the Pl to the soul of two people, or in the ?? verse dimension (D) of the U. These things (M field lines) are not this shape, these things are emotion, and some are connected. At the same time your soul is not a solid magnet, sitting there, it's a dynamic Pl. So you are in the same dilemma too. (:24).

Understanding this new process will be taught in the coming time to what we call, the pilots of the flying system. To understanding through the knowledge of the soul, not in the craftsman. These new flight systems (FS), which is now part of what we call, the structure of the systems which are built in .. research labs, and now it's getting exported to the places where these units come, you'll receive the .. unit as a FS, but then you have to be able to, put the match to it, that it works, It's set to work with the FS.

It's works to be able to translate the language of the soul, the understanding of the communication in a dynamic state. When you look at this picture (Vision EU helmet), you see it already sits in the structure. When we don't supply this unit (VEU) with the FS, you have a health unit, you have a (materials) production unit, by adding this system into the structure of the FS or EU, (:26). we convert the EU from a Health unit, a wellness unit into a FS.

This is one of the two apparatuses that need to be added to the FS. Otherwise you still have the old system of the EU, which is for the flight, for the health, .. wellness centers, for production of what we call, system, which we run. At birth (shows factory), as you can see these units are all the same. What we build inside, it changes the system. It becomes a wellness unit, if you have a cancer. If the system is built for to be for producing food for people to go in the galley, it becomes a food station.

If we decide to become a FS, you've seen the control system, and the FS added. If you want to be just for psychosomatic to enhance the soul, that the P doesn't suffer, all sorts of problems, it can be done something. So you'll see this feature currently in most of the places where you deal with the process of the KF.

Where in these systems we decide, what line is connected to where. What we allow to enter, (:28). within the cabin. What fields we keep away from the cabin. The FS control and protection is totally different than, what we use the same system for wellness, or for material production. We can tune the system to a specific M field, which you see in the MaGrav solid magnet, that only connects to a strength field of a specific Pl, of a specific material, you might call it an isotope, or we can mix it in a way, then you can make alloys in the condition of the Gans's.

Converting Gans back to Matter - Unknown

Up to now what we have seen you made the Gans's, you dried the Gans's, you have it as a solid matter. But how many of you have managed to convert that dried CuO to Cu? There

is a piece of information, which is not taught. You can't stack powder of what we call, Cu Gans once you produce it, into Cu wires and building structure, or whatever you might need it, at time, place, or position. How do you convert this, some places flexible structures, which is unknown to man. (:30).

At the moment you put your buildings in some springs, .. rollers, .. and magnets, that if it comes the earthquake, it can shake and vibrate to absorb the energy. What about building structures, which is like the body of the man on earth. You have .. the beam structure like the bone, and then the flexibility of the movement. Where the movement interacts with the life of the individuals in each cabin. Gives the preference of the pleasure of living.

You have not managed to convert the Gans's into Gans's of life. Up to now your knowledge has been, to bring the T, changing the matter for the first time to energy. Where now we need to teach you how to convert these energies, these Gans's into the matter state (S), otherwise you have bunch of pumps, or bunch of Gans's, or bunch of energies.

The conversion process is important, what we learned up to now, in producing that conversion from matter S to energy. Now we need to learn the energy to the matter S. I can transport you in the manner of the energy of the soul to another position, but how can I create a condition, by the interaction of the environment, that you manifest yourself on earth as you, (:32). again as you, in another position and dimension (D). It's no good going to Tehran to see Azar, where she cannot see you, but you are there as an energy. And even as energy, she cannot recognize your physicality (P), because I don't know who you are. Or my soul knows, but P has not confirmed.

This is what we actually do in the matter S, the material production unit, which up to now we have not covered much. You just know there is a materials unit, producing whatever you need. But don't forget you have Gans's, and Gans's and nothing else.

There is a technique, there is a knowledge to change energy to matter S. Up to now, none of you Knowledge Seekers (KS) have even thought about this. I have Gans's, how am I going to change it to matter S. What do I need to create that conversion?

The material I produced is slightly not the color I want. I want it slightly darker, slightly lighter. You don't have a dye in space to change it. You have to change it with the strength of the fields and emotions of your soul. Or the soul of the material satisfies your soul's needs. When you have the production units for the materials, and you keep on producing energies, (:34). but you cannot convert it.

Where are you going to go. It becomes the position, what I explained to you, the dilemma which is sitting with us in Linz. We have a system active going nowhere, because it has no preset destination, and all it does, it absorbs interaction fields and what it's doing is what I call it, happening itself.

It's a story field D. It is created in a way, the condition of, what we see in our systems, when you look at a composition like this, you want to see a factory. You walk into a factory condition. You want to have the D of a wood, .. of the floor, you want to have the D of liking. You want everything, which is complete. You need composite systems, which can give you all D.

We have this problem now in the P D. It's no good building a structure on the moon where you have to import the materials from the earth, and you cannot keep the composition of wood as wood, because on moon this composition of the wood will become plastic. (:36).

I choose these pictures deliberately, because you need to look. This is your kitchen, what food do you want to make in it. What color you would like the kitchen to be all the time. You like the kitchen to be blue, but your partner would like it to be black, and your child would like it to be green. You all want to enjoy being in this place to share, most probably, even if you manage to create food on earth, but the pleasure of being together to share energy, what we call, the condition.

In another point you come from a factory, you have a composition of materials. You come from work, the work is on the other side of the moon, and you want to keep your wood. In transportation of what you make with this wood from factory to home, you don't want it to change composition. When man starts to emigrating in a large scale, everything has to be precise. We have to develop systems, that can choose colors. I like the car to be yellow, you like to see the same car in white. (:38). Do we deal with each one car, or do we satisfy the emotion of the soul. We can take this car, white from the office to the home on moon, and still your wife like a pink car. She would see it as pink.

You come back to what we call, "integrated plasma systems." In the KF we are developing this T. It's no good for you to go to the moon and everything will be grey, and just a building. It's important once we get you there, you have the facility to create the condition of what is satisfactory to the Soul of the Man (STM), if you want to create the condition of, point of reference. These are the T, which will emerge out of the KF in coming weeks and months.

We gave you the condition to fly. You'll have the spaceships, but what happens if on the way from the … work to the home, suddenly part of the soul, (:40). wants to be somewhere else? Would you end up on the Mars, or you find out, I came to Mars, I actually want to be home with my wife.

How do we build this new composite structure of the conversion? How do we come to understand? How do we transfer, and at the same time collectively hold on to the structure? You don't want to have a house with 3 floors and suddenly becomes 2 floors. Creation and conversion of the energies is part of the new teachings, which will come up.

In a way, it's for you to decide, as we always said, to be in a field position, to be in a condition of creating materials, or you want to limit. But we don't have the separate

compartments on there. We live, we create materials, materials are produced for us, and we meet and we help ourselves with the ?? webmaster, or in the same thing, we go to a herb, you pick up a herb, this is good for a headache, (:42). You go to the plant, this is good for food, energy, but I miss it. We have no apple trees, and we have no leaves, herbs, and we have no .. Cu sources, or spinach to give iron to your blood.

But in the structure of the construction of these new flight systems everything has been built, even the emotion. This is part of what we have already built in the FEU. This is the knowledge, which scientists in your universities and your government, have to still unravel for them, for themselves.

It's not that we give you the EU the flight system, and a material system, and leave you to do it. You have to become knowledgeable to the knowledge of creation. Your scientists have to come to understand this point.

The difference between the EU, which now comes as a flight unit, has an additional factor to it. The factor is your system here, is for your physical body on earth, for its operation and its existence. In the EU you have been, (:44). the system set, to become the passengers of the U.

There is a big gap of knowledge. Our people in the factories are producing things, but they don't understand what sits behind it, and how things have been set, to become not only food of the apple, or the meat on earth, it becomes the food supplier from the depth of the U, that you can survive in that place and position in the U.

It adjusts your brain when you arrive through your soul, to be able to live in that position. You don't jump in a furnace, and you don't jump in a frozen pool. This is the beauty with understanding the totally of the knowledge. Integrated systems, collective integrated systems, for example as I explained to some of our manufacturing and developing research team, if you have a farm, a farmer who grows wheat, grows maize, and the pigs, and you want to grow those to feed the pig, at the same time keep the pig healthy, keep the plant away from diseases, (:46). and you cannot, with your present knowledge, you keep on spraying and watering and whatever, with Gans's.

The new change in T is, that we become that sun. We can feed the plant, we feed the pig, we can look after the pests, and at the same time we allow the cycle of life to be neutral, and natural in the position, time, and space.

It's time for KS to move on, to understand more. The only way I can bring you, and we have set the scene for it, is the 5 Cups, and the Cup of U. The 5 Cups is for the man, now you have to put the 5 Cups, in the Cup of U, for it to be able to survive in the depth of U that being, and included earth.

Now you understand why we taught you separately and in a very time distance gap, between the two. How do you feed, .. look after the man, in the 5 Cups, and his soul, and

then, you bring it into the D of the Cup of U, that this man can survive in any position, predestined by the STM, in that point in the space, and the soul of the U.

Now you understand, (:48). how much we have prepared you to become the travelers of the U. In simple steps you made the 5 Cups, .. the Cup of life (CL) .. cup of the gravity, .. the soul, .. of this and that. This is good for you when you are here (on earth). Now you have to go back into the Cup of U (CU). How do you feed man in a given time, place and position in the U?

Do you remember the teachings of the past, if you've been through it. What did I refer to, we set like schools, premises, systems on earth that you go into and see, if I go to planet Zeus, how will I live, how would I look? That's only can be done with a CU. You create that condition, that position of the U, and you put the man in it, test run, sand box. Now you see how the two merges together.

You were told to destroy the 5 Cups, because they want you to be the prisoner of abuse on this planet. (:50). We gave you the CU to bring you with the CL, Cup of Man (CM) to become the passengers of the U. The time of the slavery is over. Those of you who you destroyed your 5 Cups, you made yourself a slave to the ?? Belgium's.

You need that to be able to see your position, your time, and the space, and the place where you'll land, where you'll be. If you understood this, .. the composition of the two. You are allergic to something, you put the CM, which is you, in the D of you, made by you, in the Cup of Earth, in the CU, and you satisfy the emotion of the soul. Would you have those psychosomatics? No.

Now you see the emergence of the knowledge and the T. We showed you the CL, then .. the 5 Cups, and you fully understood that. We showed you in a very brief time to open the discussion for you to understand the CU. Did you ever ask yourself, why is this guy teaching us about the CU? Because at that time you couldn't see the CM, the CL, in the CU, and then you see the behavior of the man, you see the manifestation of the man, (:52). you see the understanding of the time and the position, in which part of the U you want to be, and these can be produced in these EU, pre-run.

How many you in your lifetime said, oh when next time when I am born, I would like to be a cat? Now you have the CU and the Cup of You, create the condition of the emotion of a cat in your CU, and then you see if you would like to be a cat.

The implication and application of this T is so deep, that some of you will never come to fully be educated to understand the totality of it. The process of the teaching, .. understanding is now to bring the same position. You bring the CL, .. the CM, and then we create the condition of the balanced fields of the soul of the U, and you walk into the system, you become elevated to the balanced fields of the U. You'll never be superior, you'll never be inferior.

This is what I said, when we take man to space, man will be the same as the others. you thought you gathered the whole knowledge. You've been given everything. No, you are again physical. We gave you the condition of the soul.

The STM, (:54). when it becomes a passenger of the U, will be equal to the knowledge to the strength of the soul of the rest. Then he decide what condition of P he takes a position and time, but there is one thing to it. "I made man in the Image of Myself." So when we go into this D of the elevation of the STM, to be equal to the rest, not the P, then won't you become the image of the Creator? This is the T, this is the universal knowledge, not for you to make Gans's and patches. But as I said before, we had to take you through the education of the nursery and the first class, and how to write and how to read.

Many of you have not gather the knowledge to read the hidden words within my teachings. In so many ways, you can create the conditions of desert in middle of North Pole, if you understood the interaction of the fields. Then you show the desert sands to the man in North Pole, and you'll see the laughter on the face of an Eskimo, that he could never imagine such a thing exists, because the only thing he knows under his feet is mainly ice. (:56).

This is what the T has brought us to. Then how do you understand this. It goes back to all the time, and I keep on emphasizing till some of you gradually, if you understand. Don't look at the structure of the Cup of Man, look at the field interaction of the Cup of Man (CM).

Last night I was at dinner with one of our KS. It was explained the same setup was set, but different colors of materials is shown, but the sets are set one below the other. I said, you haven't understood. Everything is the same, in the boxes, but the fields are not. You're dealing with Pl , .. energy flow. One box is blue, .. white, and one box is red. but everything is exactly the same in each box. Move away from physical ?? and start understanding the interaction of the fields. Then you'll start understanding the interaction of the fields in the boxes. You will go to the top you'll become blue, and you go to the bottom you become white, .. middle you'll become red, but in essence it's all the same. (:58).

It's you who changes its manifestation in the time and presence of the field strength. Because these Cups, these systems were not set for the matter S it was set for the soul S. So the soul has respect to each other in the field energy transfer.

Many of you will not understand this, whatsoever, but those of you who have moved to the more advanced levels of the T know exactly what I am talking about. We create a condition of U, we create a condition of understanding the knowledge of creation. As long as you are entangled in the field strength of the matter S, you'll have the same dilemma.

As I said before, you cannot live, .. connect, you cannot keep the life of the CM, if you do not understand the field radiation, that the fields interacts and connects, divides, (1:00). enhances. Once you manage to grasp this idea and understand it, you will see a very simple way, which will be a shock to many of you, something strange, very strange. But as I said, in time you'll come to understand.

When you have your CM setup, and now you have made Gans's, and then you learn to create the condition of the fields, radiation fields, which is the mono-energetic fields of the U, in these system, as you made the Cup, you will see the shimmers of your own image.

If you get one field radiation wrong, sorry, you will not see the center part, but still exists. If you understand this, then you understand what I have been telling you, that when you come to Linz EC, we put a machine here, and a machine there, and we transfer you across. (1:02).

In the knowledge of the man, the T is complete. It's for you to understand, and interpret and develop. Then when you put this man in the environment of the Cup of U (CU) in the position of planet Zeus, what shall you see. How you will shape on planet Zeus. But as we kept the soul the same, within the structure, is the STM, the same emotion, the same information and everything else that is carried on planet ?? earth. Now you understand the teachings of the CL, .. CM, .. CU. It's you by creating the field strength of an appropriate place, you can see how your soul will react, and how it will manifest itself in that position, time and place.

I used to play a game with my boy when he was very young. I used to tell him I play magic, I used to tell him, I can't see you. (1:04). He used to jump up and down in the house in the rooms, he'd say, "papa I am here, I am here." I used to say, I can hear you but I can't see you. He used jump everywhere, "I am here, I am here," and he believed that I could not see him, but he could hear me. He did all monkey games to confirm that he exists. But he is there.

This will be you landing in Tehran, Azar there but she cannot see you, because you didn't get the right field strength to manifest yourself as a man who moved from London to Tehran, for her to recognize. It's understanding the knowledge, .. the truth, .. the position and time.

This is what we are moving into, as part of what I said in last teachings, as part of the communications, T&T. You create, you elevate the soul, how do you transmute it, and then how you manifest it after transmutation, in the D of the point of observation. It's no good becoming a man, and appearing in Tehran in the kidney of Azar, instead of in front of Azar, because Azar "oops you got the address wrong, slightly." She might feel your soul, but there is no way you can manifest yourself as a man in a kidney, in the size of the man. Mankind will make many mistakes, not only mankind, but citizens of the U, now they know the knowledge. (1:06). Till they get it right. You have to go back, .. to understand totality of the knowledge.

MaGrav (1:06:20 to 1:11:30)

When I gave you this, I gave you something before. Go back, for nearly 7 years now we taught you the MaGrav system. We told you, if you look at it, there is no difference between the MaGrav System and a solid magnet. The solid magnet is created by the earth put together by man, or cut a piece and you have it. In a MaGrav S you have the ability to decide the strength. If you put 2 magnets opposite to each other, by rotation of the few, and you create electric energy. All of you lot have been playing the wrong games, haven't you? The power station has been sitting in front of you, what Megawatts you want to get out of it. I gave you the same magnet. Your magnet is solid state, this magnet is plasmatic state. Now you see your generator. (1:08).

You looked for the crumbs, and I gave you the full cake. But this is in a solid state. It creates you energy and electricity in the solid ?? state. You put them in D and direction. Now my dear friends, KS, let me open your eyes, what you have had in your hand for a long time. We gave you the MaGrav S to test, and you looked for the little thing which comes out here (electricity), but the purpose was this (fields coming out top).

We gave you the CU, and we gave you the CM. In the kitchen you put the pot on the fire, and within it you cook what you like. (1:10). I gave you the Cup of energy, I gave you the pot. What would you like this man to be, in the pot?

Now you understand, we told you clearly for a long time, that you are missing, you are not connecting the knowledge. Don't go tomorrow, you get a MaGrav and put a pot on it, you put something else on it. Then you are back in the same position as you are today. After 7 years we gave you the MaGrav S. Understand the field flow, understand the interaction of the fields, then you will see you have one of the most powerful generators in the U.

You understand how we have brought you in the knowledge, to become equal in the knowledge to the soul of the U, the same. You're heating the water, and the meat, I am extending the strength of the soul of MaGrav. (1:11:30)

Those who were what we call, the agents of Devil told you to destroy this, and many of you thought it was correct. Now you can see how much you deprived yourself from the KOU. (1:12). What we see is for freeing man in D of the soul, not slaving man in the D of the P, that he can be abused physically and the rest. Those who told you to destroy your CL, and CM are pedophiles with a long history, and by keeping their children, or bringing them to that point of abuse. The children of the man. Those who follow them are of the same school.

We gave you the freedom of the man, through the STM, and the knowledge is step by step, on solid ground. You have time to test, if it wasn't from this week to next week, and the other one. We taught you about the CO2 Cup the first thing we introduced 15 years ago. We took time, we showed you the Cup of Life (CL), we showed you. Nothing was

gifted to the man, then what you call the Corona virus pandemic. We start introducing fields, interaction of the fields. Then you start learning about the interaction, creation of the CL Then the CU, (1:14). then still there is other levels of the teaching, which is still to come.

Understanding of the totality is part of the game man has to become used to. The game of understanding of the interaction of the fields, not the matters. If you understand how to play with the fields, then you can make any matter. As I always say to these teachings, brings you to a new D of understanding, and this is the purpose of this.

Because many of you have to become the passengers of these new crafts. You have to know what you are walking into. You have to understand the knowledge, then in the space by understanding it, you can live a beautiful life, not to be slaved. Instead of the suit of the monkey, as we see with NASA, into the environment of one EU. We just change the prison size, from clothing to a box.

This is the beauty of teaching this way. To bring a new change, but by more and more people to understand, more souls to understand, more educated, not just the man, but the soul of the citizens of the U.

MaGrav (1:15:46 to 1:28:56)
Now you fully comprehend, those of you who are at that level, what is set, what is planned for the coming teachings. (1:16). How do we convert these fields to a universal field, to the fields of the P of the man, or the field of the STM.

I gave you the most beautiful S in the MaGrav System, if you understand it, you already have the system to fly. Go back to the recordings of the teachings when we had John in Arizona (AZ) walking between the fields, not walking over the fields. Sometimes if you remember when he walked amongst the MaGrav units, he said, "I can feel." Yes, you could feel, but my dearest friend, you should have done this walk (draws).

The way the systems were set, were perfect, but the knowledge wasn't there what to do. Stop looking into the MaGrav, start looking in the fields of MaGravs. The beauty of it is, you cannot make 2 systems exactly the same. So when you have a collection, (1:18). you have a collection of the fields of the U, the same as before, interacting at the time, place, and position.

I always say, if you understand it. When you play Lotto, you have 49 numbers, and you have to choose 7. To get out of this 49 to be able to match the 7 which is announced, round about 18 million combinations. If you buy 18 million Lottery tickets, covering all the number combinations, you'll definitely win the jackpot. Some system gives it 14 million, but 18 million ?? core combination, gives you roughly this, because you cover some which are not in the background. You'll win the jackpot.

Understanding this, and understanding now this, plus all the fields of the U to get the jackpot to land on the same place with every cell in the position, you choose the number

of zeros here. But, because you have the soul connection with Azar, the number is fixed. (1:20). You already hit the jackpot.

Try to understand the knowledge, try to understand the beauty of the knowledge. You are happy with 40% energy saving on your house living in D of P. But if you know how to tap to this (universal energy), I give you enough energy to supply the whole city from your house.

And with it you receive energy in the field strength of the STM, that you can elevate your soul to any D in the U. But the beauty of it is, if one day the mankind learns how to make the right MaGrav, that elevates the STM, then the man will reach the position of the strength of the Creator. Humanity has a long way to go to create this, because he is still trying to get the 5 Megawatts, and 10 KW. (1:22).

When you look inside the shape of your MaGravs, if you haven't noticed up to now, I have given you the interaction of the D of the soul of the Creator. It's you who has to find it, it's you who has to understand not to make the rings (coils) in the D of P, but make the rings in the D of the soul of the U. And I taught you how to make the CU.

I have shown you the path to the Creator. It's you who has to unravel it, to understand it, to be able to get that path. I have shown you the way to the Creator, I gave you the biggest gift, which was the MaGrav System, and I cried many nights, "when will mankind understand?"

You were looking to elevate your soul, I gave you a system understanding of the T, which gave you, to cover you, to become man of U and Unicose to become closer to the Creator, to become directly part of the Creator. But unfortunately mankind is still after 30% reduction in the electricity bill, and no place, and no where to land in the U. (1:24).

One day those who listen to these teachings of today will understand, and that day is the day of Methi, which is today, that many of your souls have been elevated to it, to understand. It's your P which has to accept it, the knowledge and to live within it.

Try to comprehend. Do not try to copy. If you look in the brain of the man, structure of the brain .. the same generator exists. If you understand how to work it, you can create the fields, that it reaches the D of the Soul of the Creator. You don't need the MaGrav, because the MaGrav system it is based on the structure of your physical life, in your P.

This (bottom coils) is your reproduction unit, this (middle coil) is your intestine and heart, and this (top coil) is D of STP in the position of the STM. Your 3 stacker is already set. (1:26). It's you who has to understand, would you like to put your finger in the socket, and feed the energy to the house, that you have the light, or you feed the soul and you receive the light of the Creator. Man has denied himself that beauty, by choice.

As I said .. many times to KS, we come here to live, to taste the pleasures and the pains of the man, it understand what has kept man away to understand his own creation, and his

own creator within him. We had to taste it, and to enjoy the beauty of it, to understand how we can attract man to the beauty.

Now you understand part of the teaching, now you understand where you missed the knowledge. I bet you tomorrow, and the months to come, we'll still see people trying to make MaGrav systems, to reduce electric bill by 30%, because now the energy bill has double. The energy of the U and the Creator is free, and in terabytes of energy, not in 1 KW.

I hope you understood the teaching of today. I hope Jalal's team of hidden MaGrav units have taken heed. (1:28). Or you can still work with MaGrav S to reduce electricity. Thank you . for today's teaching and I hope I opened the door in a broader way for you to understand the teaching of the past. In a way, bringing parts together, partially for you to understand more why you have been taught all this time, where we are going, .. heading and what knowledge you need to carry to become the passengers of the U. You become passenger to your soul, not to a craft. That's your choice, choose the donkey or the jet, and mankind at the moment is still walking on the legs, from what we've seen. He has not managed the donkey, let alone the jet.
Thank you .. (1:29).

>> PROOFED TO HERE >> continues

>**> BREAK** >> 426 KSW March 31, 2022 (1:34).

K- There is something I would like to show you before we go, you just seen it. It literally passed you in the past few minutes, which confirms the teaching of this morning. I referred to it in another teaching, but now maybe it has different meaning. This is just what you saw .. Vertical EU, and you see, where is the MaGrav unit in it (bottom)? You see it because it's set to do that job. There it is. (1:36). The teaching is in line with mass production. Because the teaching has always covered commercialization for people, more people to use it, to become aware of it, and to be able to understand it.

In a way, we kept everything in line, the pot you were looking for, it sits at the bottom, even when we look at .. the Horizontal Units, there is no difference. When you see the HEU, the same process has been set, there is no difference. you see the MaGrav units are there, there is one here, and one here, in different shape or form. So we are not teaching you something that just jumped out of the box. These systems were manufactured over a year ago. It's just been your knowledge to understand it, to the point of understanding it, that some of you, one of you might have seen it.

MaGrav (1:37:56 to 1:50:41)

No more powerful Pl T, (1:38). has been taught than the MaGrav systems. As I said when I was walking in the teaching hall in .. (Italy) , and when I saw that Spanish couple, the guy was pushing with eyes to get the team moving, and with the MaGrav unit (oh it's just a MaGrav unit). I said the human race is not ready. We were too fast, too early.

The knowledge of understanding, as I said, it's exactly like a toy shop, when you go to buy a toy. You see on the side of the box big numbers, 3, 8, 6,12,16. Which means if you buy the one which is with a 3, and you have a child of 1, or even 2, or even 2.5 cannot play with the toy, because the knowledge, the motor coordination has not reached to be able to put a 3 year old toy together. A lot of parents love to give a helicopter, flying and everything, written on the side, 14, for the birthday of the second year, or 3rd to their son, that "oh, I've bought such a good thing," but the child has to wait 10 years, (1:40). to gather the knowledge to be able to fly.

But the question is did the father buy the toy for himself? But, trying to be happy that the child has got it in his name. The knowledge is the same, at an understanding level. When you reach to the point of understanding, you can play with the toy.

The brain, the soul, the knowledge, does not fit the STP, that he can play with the Soul of the U. But has no age gap. It's the maturity of understanding the KOC. It's you who decides that point, that knowledge to be absorbed, the knowledge to be understood, and which way understood, the way you are taught, or the way it suits me. We taught the MaGrav for universal system, become traveler of the U, and you choose a MaGrav to be plugged in and give you 30 volts. We even built a factory for the toys, for infants in Iran.

But the problem is the child is a new born, (1:42). has not even become an infant, to be able to use what is there. Now we understand and you can see. If you look the systems are standing next to each other. If you look the mother sits in the back. As I said, when you look at it, I was joyfully enjoying the commercial. I thought what can I say. If you look at it, in reality, I gave you the source, and in ?? , and I gave you the pot. You have the source, and you have the pot. Bring me the STM, the rest is easy. Would you like to go to any questions

I would like to go back to something. I conferred this to what I call, world leaders (WL), (1:44). some of those who make decisions for many of our lives. When you look at this EU, it's no different then what you see in the life. There is no better way I can explain it, then this. When you look at this VEU, I can parallel it with (a story), what you as humans understand.

This time of the year in northern hemisphere we buy, or I used to buy when I was a young boy, very small black seeds. We didn't know if it was real or not, or they sold us what we call black seed, which you get vegetation from. We used to get this black seed, it's a tradition in the Iranian culture, and the whole of Silk road. We get the leaf of the white berry (Mulberry) and we put this black seed (silk worm) on the leaf. We watch it

everyday, when we came back from the school. "Mama is it still black, (1:46). mama, it's not changed?" Mama says, "see I told you, the guy gave you black seed."

Then after a few days, because we created the MaGrav field interaction of that leaf, with the seed, we created a new D of fields. This seed used to start moving, and it became a tiny little worm, and then it started eating the leaf, and then it grew, we were waiting, when it start growing, anxious time, keeping it in a shoe box, starts, everyday you open the box. Mama it's still a worm. Leave it there don't touch it, change the leaf. Keep the environment the same, and then after a few days, this gorgeous worm wiggling starts putting a silk line out, making a cocoon, but from inside. It uses, to my understanding as a child, his tail as a point of reference and starts silking around it. Then suddenly, the worm, gradually you see the shadow of it, and then you see the cocoon, and we wait anxiously, what it's going to be, when it's going to be the time when we see the freedom, and the butterfly flies. Then because it's in the box we catch the butterfly. For a few second it is ours, and then the butterfly flies. (1:48). It goes free.

This machine is that machine. We already made you the cocoon. You bring the P of the man inside, we nourish it to the KOC, and we get the freedom of the soul, the butterfly. There is no difference. In the point of mutation and conversion. It's understanding the knowledge of the freedom of the STM.

Many times when I look at this system, I say, I wonder which butterflies, and what colored butterflies will come out of this system, when they go in as a moth, as a man, as a D of P, to take the flight of fancy, to become the new, to see a new black seed, and next year I'll have another one. Sometimes we used to keep these butterflies until they laid the eggs and then they used to die. But the STM does not reach that point of death, he becomes part of the other.

We have given you the cocoon you have to make that butterfly to fly. This is the beauty of the knowledge if you understand it. This is where we lacking the knowledge, most of you KS, this part. It's a time for change. We have laid the leaf, we have put the seed in, (1:50). we have seen the worm, cycle of life of man for thousands of years, and now we have made you the cocoon, it's you to understand it.

In the future man will make that silk cocoon from the soul of itself, to allow its STP to become embedded within the STM, and to take the flight of fancy. But the beauty of this is, if you understand it, you can take any flight of fancy, anytime that you wish. Then you can lay your eggs anywhere in the U, as a new cycle of life. (1:50:41)

Any question.

Proofed to here>>

Q; Salomea … shield of protection .. in the future if you like to go back and refresh our memory, (1:52). .. Romanian community asked me to ask you?

K- I know why the Romanians are asking this question. You have a threat sitting on your northern borders is with Ukraine, You have a fear of nuclear explosion, or chemical attack within the boundaries of Ukraine, or which might extend over, or you become the victims of it. The shield of protection is again, man's way of ?? labeling it. Try to raise the soul of the world leaders, that we do not reach that point. Because if we get to that elevation, then for centuries our children will not suffer with contamination. If we just create a shield for ourselves it's a selfishness that we protect. But I understand both reasons for conditions. We blame the Russians a lot for what they are doing. In principle we understand it, and a lot of it is wrong. But on the other hand we understand their position to protect the integrity of their culture and their religion. Up to now, we were not, we were kept, we were always considered the Western as a saint. But now we know with the documents released within the past few days, is coming out of what we see, from the IAEA papers in the background, some other organizations, the American government and some scientists, (1:54). have been building, noticing within Ukraine. Finding these kind of things. It goes back, some of it to the leaders of the West. We have to enlighten them not to be, not to make these things in the future, that it leads to these kind of things conditions. We are not pro-Americans, pro-Russians, or pro anything. But when you house gets attacked, when the house is on fire, you do something about it. Now we have enough knowledge and information to know in a very small way, but could be crucial and fundamental, and it came very much into front in negotiations in Istanbul in past few days. When the two cannot trust let's make a no-man's land, a free zone. This is part of the condition, that nobody can create nuclear and biochemical factories in Ukraine. It becomes a neutral position. in essence there is a possibility of both nuclear and biochemical. But if we see biochemical, I have a very good idea, if we see nuclear, I have a very good idea who will do it. ?? for sure it is not Russians. Hundred percent sure it will not be Russians. Because we saw the same thing by the Western world in Iraq. We saw the same game in Libya. So there is a bad reference there. There is a cause, (1:56). for concern from world leaders (WL) to stop playing these games and … The documents which are opening up, and hearing, it's not a good indication, especially to US in what I call, games in these areas.

In that position, to that effect, try to raise the soul of the WL, that they come to an understanding and these things can be resolved, both in Vatican, in Moscow Churches and now that it has gotten out of hand, in the White House and in the Kremlin. We know families that live 2 km from the Ukrainian border. We are in touch with .. we know the ?/ We are closely in touch with ?/ the Romanian community, to watch for any activity on a daily basis …

We see if coming from West side of the border. Always have a combination of the 3 Gans's in principle with you. Try to keep the CH3 out of the position. Make your Gans's in a deep condition of the Gans and not the water. (1:58). Try to use it outside and inside the building. Hold the radiation and hold any chemical effect, into the wall outside, than inside. You can spray the buildings. Try to create and use as much amino acid (AA) into the water you use, that anything which is in balance with the human level is absorbed and kept outside. If it comes to it, that it is used, try to not to touch these areas for 3 to 6 months or maybe up to a year. Because they absorb the energies and usually summer time

heat will disperse some of it, but the winter ice will change the composition of the release. What you absorb as a massive energy, it will be released in next 6 to 12 months.

Try to, in a way, you are used to in most of the places, to whitewash. Do not use these things on your clothing, under no circumstance. If you are in a vehicle, you travel, try to wash your car with it, but try to avoid the outside of the car, if you receive contamination. When I was a student in Queen Marry College my focus from the beginning, had a big objection the way I used to share knowledge about this, about nuclear contamination. I always said, (2:00). When you see the light of nuclear explosion, walk into it, don't walk away from. If you see it, you already in it, it will be a lifetime of misery. This is what I know from the nuclear industry. If you see the light of the explosion, walk to it. If it is too far from you, you hear, or you get, you can control the way I (just) explained. Because when you see the light the field radiation has already passed through your body, and the mutation of fields has already started. But if you are near a chemical or biological effect, it's a biology, biological warfare. Biology means AA, and there is a limitation of how much is in the air. If it's in your direction, if it's not absorbed it will come through the building, .. house. You hold it outside the house, .. the car. E are not all sitting in the house waiting for it, we are traveling, .. shopping, .. going from place to place. You need the 3 (Gans) combination, of the Cu, Zn, and CO2, with a huge amount of AA. If you have Cup of Life 1 mix AA into it, if you have CL 2 mix into it, and make sure you have plenty of AA. (2:02). This should attract, your body is another biological body walking. but others absorb it, less will come to you.

If you inhale or you breathy it, you already contaminated, follow the same procedure. But 0.9% salt, that it matches the salt of the body of the man, and it can take it out of the body. Just be patient, do not expect, "I drank it, it should change." It will change gradually, take it out of the body gradually.

Never, there's a difference between the biological and virus. Virus is an energy, biological is part of your body, biology of your body. You handle it totally different way. In a way, you put so many traps in front of it, that it does not get to you by the time. Or you strength of which is earth interacting with the cell of the body .. With the nuclear accident it's the same, you have to cover yourself with the same process. Use a lot of Gans CO2 with a lot of AA because you have to … (audio broke ..

(2:04).
(Mr. Keshe had to leave (2:12).)
K- Can I come in I had to leave .. .
As you were trying to say, if we stop the wars. If we create a condition of ?? the borders by delivery of the EU, that anyone can travel to anywhere any time. These stupid what I call, race of domination between the nations, and making enemy of the others will stop. We've seen it, it's on Ukraine, you just explained it, neutral position. We saw it in the past week. When I was a child Tehran was the only airport in the whole of Middle east in an Arab nation where, and are Israeli airlines used to land. (2:14). If you came from Russia, you came to Tehran and then you get a flight to emigrate to Israel. We lost that point because of what I call, dogmas, and everything which came.

But the strangest thing is the Arab states gathered in state of Israel, in a way, part of the old Egypt in a meeting few days ago. This was unheard of (in past). Because they made another enemy, which is the state of Iran, to bring them, for us to be able to sell them more Why couldn't Iran be part of the same table? What has changed. This separation, creation of division. These things are fed by Rothschild's family.

We've seen Soros now is on the international warrants list for starting the Ukrainian, promoting the Ukrainian war. It's not just Russia who has issued a warrant for arrest of Soros, Chinese have done the same. Because they've seen him, he interfered first in China, now they found the source. He works through Illuminati's and the Vatican. Soros cannot move anywhere anymore, it's a warrant, and if they capture him, even on flight, he'll spend years in Siberia, and in the prisons in China.

We create the new T to create the condition of no borders, sharing of the T and being able to, (2:16). work together. This will stop this position what you've seen in Ukraine. It's literally the job of KS, support of the soul of the WL by the U Council and the rest of the KS, and the knowledgeable KS to bring the T forward, to be able to share by everyone that we don't create borders.

The borders have to be the atmosphere of the U, where it's not a border, it's part of another part, a part of another life. Negotiating to make Ukraine neutral, .. to get some people on our side that you can do more, has to finish. This is what I said to John … you want me to send you the EU, and then send it to NASA and then they work with you. Or do you want me to send them directly to NASA. Because we are about to ship. It brings a connection. We give a box to NASA, their box is empty. We give the unit to AZ, that box is full, the reactors are getting made. The beauty of it is, I tell to the people in our factory, build units that we can give to NASA too. But let them feel the change in the knowledge. If it is given to them it becomes another point of ?? another point of race. But let them see it. "What can we do, we have an empty box? " (2:18).

As I said … go back to 1950s when the Americans sent an empty matchbox to Russians, and they waited for it. The Russians sent the matchbox back. The American scientists told the Russians, you didn't see .. Nano wires, very thin wires, was in the matchbox. The Russians .. my friends look through the wire, we have made a hole in it. It become a pipe. The race should be among the scientists, not borders. .. something big maybe 50 years ago, making Nano wires, now is a common knowledge, because we shared it. We didn't make borders for it.

Trying to get Ukraine neutralized, and other satellite countries is, will not work. When will be the next nation, .. next territory, .. next planet, man wants to share ?? ??? ? ?. The U Community will not allow it. SO look at it 2 ways. Try to teach. It's the responsibility of U Council, to become that soul, that shines upon all, that brings all our world leaders to one point, to bring all our systems to one point. We will see where whole structure moving ?? up.. (2:20). And we don't need to worry about if there is going to be a nuclear war, .. chemical war.

The biggest war we have sitting between the Churches of Vatican .. and the Russian Orthodox Church. If the Russian Orthodox C asks Putin to pull out today, they will be out today. That decision has not been made. These are soldiers, what we call mercenaries of the religion, under the banner of nationalism.

Pray for the soul of the leaders that we don't need to negotiate what's going to happen to other satellite countries next to all the Baltic nations, which are still part of the Russian, .. USSR and they were hoping if one child jumps the and see what happens to it, and the rest of us will go to NATO. It will not happen, Ukraine had the military power to battle with, got a lot of support form Americans and the others, ?? they'll wipe them out, they'll become part of the Russian territory within 24 hours. It's a bigger game. But primarily if you are on that border we are keeping a very close touch with Romanian, northern we are keeping a very close touch. We haven't left you alone and we'll support you. But ?? try to make as much Gans's as you can in the case,

(2:22).

Any other question

R: .. what about the use of the Potassium Iodine pills? Is that useful?
K- No, it has never worked. It's just a psychological game played. We came to this conclusion years ago in the nuclear industry. If you live around SEK in Belgium nuclear power plants, we have been given these tablets for years. It's not known in public, because I used to collaborate with SEK … all the people living within a certain radius of SEK have been given the iodine tablets, they have to use it. (2:24).

It doesn't really work. You get more if you look at it, from the walnut. Buy a dry walnut and soak it in cold water. Leave it for a day, it becomes brownish color. This carries more natural iodine than you get in these tablets. Then you use it, mix it with CO2, and AA of CO2.. It's digestible, and if there is anything it washes out of your body. It's the best source of iodine. Actually … You just buy .. dry walnuts or now if you can find the fresh ones, and just soak them for 24 hours. Add the CO2 and AA of CO2, if you want, if there is neural damage add a little Zn to it, you can just drink it, the digestive system to wash any nuclear problems. That's the best way .. and most effective way. You can wash your body with it. We see it .. I know this from time in Queen Mary College, (2:26). when we used to get contaminated with chemicals, wash with literally zero effect. If you have particle in your body ?? radiation, you can take it. The best is walnut. Just soak it for 24 hours, you can keep it, you can freeze it. Don't add Gans's to it until the time of use. You can use it after contamination from radiation ?? …
We've been in that area very recently ..
Any other question.

K- It's there if there is a need for it …

Q: … What technique or method should I use to achieve teleportation in the P?

K- Teleportation if it is impossible, that you can replace and position every cell back into itself, that you leg, (2:28). doesn't appear on your arms, and your arms on your back. The only way to do is to carry the transmutation of the STM, and STP of the man, and that order will be kept when you transmute and transfer position.

(MaGrav)
You need a nuclear power station to transfer one it can be done, 1 cell across totally with all its characteristics and memories. It takes a small MaGrav unit with no power supply to transfer the whole STM and STP of the man. You have to understand the knowledge.

Q: .. Can we beta plus and beta minus decay in a lead acid battery to generate electricity. How do we convert it to a current flow and how to amplify the current to a level that can run a home?
K- Ask the people who know the physical side of I never did electronics …

Q: What happens if 2 people walk into the EU instead of one, do you get different results now that 2 souls are present instead of 1?
K- What happens if the mother is pregnant with triplets? Do we leave the children behind and just carry the mother, or carry just one of the babies? It's the soul of connection. You don't need to huddle and cuddle each other. (2:30). Usually you go into a box with somebody you know. You have connection with. Sometimes you have to accept the condition you are put, you agree with it, it's temporary, we travel the way we are in the soul, you go your way and I go my way. I don't know if anything happens like this, unless you've been forced to stay with somebody you have no connection with, no understanding, you don't ?? but you have to stay in the same room. or sleep in the same room. It's a weird feeling. It has happened to me once, and I don't want it to happen again. We were on a flight from ..

Each soul decides on its destiny.

Any other question

Q: .. can this heal the body
K- What"
R: FEU can this heal the body?
K- We are not in a healing process. We are in process of enhancing. Healing is job of doctors, we don't interfere, .. enter it. When they couldn't understand that we are in the process of enhancing the soul of the cell of the man, they accuse us of interfering with the medical system. (2:32). We have nothing to do with medical. You enhance the condition, and if it accepts it, it reaches its point of elevation.

Q: … about why coated wire connection is better as an interface than a coated continuous wire, and what does this interface do with a wire connection, how is the field flow through a wire connection? With connections of 2 coated wires or with a bare wire and a coated wire. ?

K- I understand this question has been asked many times. When you have a wire you connect between one plate and another, Nano coated. You have the matter S still inside it, so you are connecting partially on a superconducting, on a N layer, and partially on a Cu wire, on .. vibration of the atoms. When we ask you to cut and ?? reconnect, now the matter S is taken out. the interface is only on the superconductor level, on a N layer, and only those that can jump that gap, they do it. (2:34). I used to do this as demonstrations if … I used to carry a carry a small Christmas tree with me, that lights up and flashes. I used to connect it by two wires to a battery.

.. matter S connection established again. So when you cut a N wire and ?? connect it, then, full length of wire, you literally go into superconductor energy absorption and everything else which goes with N materials. I always cut the N wires in connection to another, because then I take the electric current out of it. .. that's why some of you have a failure in your MaGrav systems. You don't N coat properly. You think you N coat, (1:36). but somewhere in one of the twists, it's not N coated. You are running on an energy flow, and then you say my MaGrav S doesn't work properly. One of the best ways when you make your MaGrav coils is to N coat your wires before production of the coils, and then N coat when you finished the whole lot. Don't steam coat it. Go through N coating. Then you see, you'll have a different performance MaGrav ?? Because then you work on the energy transfer in the superconductor level, not through the electron vibration. But when you do the N coating of the wires, before you ?? make sure you don't play much with your wires, just do the coiling, and when you have finished the whole set. You've connected everything, N coat it once more. That you cover any earth connection, or what we call matter S connection.

Any other question. .. thank you form the German group. … a lot of German come in groups to EC …

I had 3 powerful people around Europe with me yesterday in the EC. When we went through the presentation .. they were shocked, that how this T has changed, (2:38). and when I finished they said, we set to change the course, now we understand the change. These people are decision makers, these are people who bring changes in the back ground to many things we do in our normal lives, and they were shocked to see. By the time we finished ..
They could not understand, this knowledge is so well spread in Germany and Europe, the KS, and some of these people are totally not aware of it. His words were I am shocked in what I have seen, and we'll see the report from their offices. This morning you have changed something in the 3 men. They want to see the knowledge right across ?? Europe as soon as possible.

Thank you for your support …

in EC above is the life on earth, below is the man in the space. It's gorgeous ??

Any other question (2:40).

Q: .. glass that has oxides by temperature we have N materials. Is glass a material state, Nano, or Gans?
K- It's matter. It still matter. The process of Gans making is not just by heating. It's allowing to balance its energies with its environment. This is the understanding of when you create N materials. We are not in the molecular S just because we melted it, we heated it, we created N material.

Q: .. is the water on this planet in a N state, material S, which is hydroxide of H, or H Nano, or a Gans?
K- It's a holder of Gans's, but its in the condition of plasmatic field. But it's a matter S condition of the matter. The liquid, like the waters of the oceans carry so much matter S matter in them, that they partially, (2:42). through some of the operation of the earth, have become Nano. So you throw N material into the water in the matter S, so now the oceans are matter S, Gans condition, M field, and allowing through the strength fields, of like universal Cup, to lead to creation of the specific Gans's , which leads to life.

(**China natural Fe Nano washed to China Sea - start of life**)

We talked about this maybe 4 or 5 years ago, about in northern China, there is an area which iron oxide is prevalent on the beaches. During the summer time with the heat of the summer, and the material itself Nano sizes itself. In the spring and winter time with the storms and the rain, these N materials are washed away, into the rivers, into the north China sea. Because of the presence of the N Fe, and other materials we see the establishment of the first cycle of life in this ocean.

.. the way you put your N Fe in the box and you create that blood, now these N particles create N Gans's, (2:44). which in combination with the protein, which comes from the surface of the water, in the revolving of the oceans with ?? bays, leads to creation of the first life. Then these lives grow so much, that's why we see a vast fishing areas in northern China seas, because the life starts on the beaches where the Fe, which N coats, and then in coming in, the water of the northern sea becomes a Gans pot because they create their own M field environment, and with other N, with other particles of Fe, which are not N coated and they washed in, they create the first cycle of the .. blood, the ?? first cycle of life.

Make purest blood that fits every type life on planet

We know this very clearly. I have done a lot of work on this, and the outcome of understanding this T, is how we produce a lot of different kind of blood, and the way you create different kind of blood. You can create mono-blood system that it fits every animal on this planet. We discussed this with the head of, in Ghana with authorities there, because they said, this fits everyone. When we took the blood to FDA in Ghana, .. their world leading scientists, as consultants for different ex-pats, they immediately see, tested it. That this fits any (blood type). The way you produce it, we can inject it to a man of any kind of blood, .. to an animal, still works the same. There is a specific way, (2:46).

to produce human blood, hemoglobin, and if you fit it, it fits everyone, it doesn't matter in deviation.

You cannot inject blood of a donkey into a rabbit or a man. But the hemoglobin blood, the way we produce it fits all of them. FDA scientists tested it and he was shocked. He said, this changes the whole game of the medicine. It's so pure, it carries no infection. The purity of not carrying any infection comes from the Cu N layer. It brings that. in the body .. you use sulphur and phosphor for this job. But in the condition of the muscle tissue, why your muscles don't rot is not so much with the phosphorus, it's with the Cu itself, which sterilizes the cell system, and I have managed to, it's a specific way to do it, it cannot be done normal, and then you produce blood which fits every creation, every created thing on this planet which is life. You can inject it into a plant, more or less.

Any other question

Q; .. would ?/ hot breathing or an alternative technique of breathing help to make the blood of everyone also absorb radioactive fields?
K- What ??/
R: are there breathing techniques that activate the blood, help absorb or process radioactive particles of fields?
K- Theoretically yes, practically, (2:48). very difficult.
R: So if you are Tibetan yogi you might have a better chance
K- or from the womb of the mother. It just depends where and how it fits.

Q: .. 5+1 question. Why is US putting new sanctions on Iran if K believes that Iran and 5+1 have already reached an agreement behind the scenes. While US and the West are pushing China, Russia, and Iran into a corner?
K- This is a policy game, it's a politic. It's a pure politic. Once this is signed, this time America is committed to it. The way the negotiated .. If again the president changes

(2:50).

The European banks have to go across with eh sacks of Rubles to the Russians for the heating. This is part of the pressure they are putting on Iran to increase the production of the gas in the south Iranian fields. It's all political games played. That the Iranians reduced the production to support the Russians to bring into international currency. The Chinese are supporting it as well the same way. Because they are trying to bring the BRICS into operation very cleverly. Most probably BRICS becoming an official currency worldwide. Because they will not buy Rubles, but they'll accept the BRICS. It's a gamesmanship by China played in the background. Iran is a world victim of it for a long .. for next few days till something is achieved. But in principle everything is done. Iran is used as a .. scapegoat for a lot of them to get what they want and bringing a lot of it.

(2:52).
It's going to be a mayhem in the West if the Russians close the tap. You're talking about 9 million barrels of oil a day, missing from the production, which is about ?? 50% of the

worlds production and cannot be so easily replaced, and Russians cannot put a close on it because the pipelines will chuck a block, close. It's a gamesmanship and not much to it. The biggest problem now is how China is playing Russia against the West, by supporting and backing .. Russia, Soros issued a warrant for his arrest. China immediately backed it. We know why, we know the reason because he financed for Vatican the uprising in Hong Kong.

Any other question.

Q: What happens if I put rotary reactors with lead Gans, several reactor with different speeds or heavy materials …
K- No never touch a lead Gans .. never, ever touch a lead Gans. Change the subject, just forget about it, go somewhere else. Please. … (2:54). especially making it dynamic. Go and read why fuels were withdrawn and changed from the gasoline. Anything with lead or aluminum, keep away unless you know exactly what you are doing and work under protected environment of it.
R: .. test on lead in gas .. how much it decreased the IQ of the population during that time.
K- How much is increased the Alzheimer's.

Q: … Walnut shell.
K- It's not walnut shell, it's the walnut itself.
R: The walnut meat then you mean. After removing the shell, then do you dry it.
K- You don't have to dry it, you can still use it wet. You get that substance.
R: How would people use it, would they put it into a CO2 Kit or other ..
K- Yes, you use it in a CO2 Kit with AA, because if you look usually on top of this water there is some oil which comes form the walnut. You can use a hot water and get, it out. You can boil the .. walnut and get the oil out, (2:56). but you get other things out of it when you boil it. You mix it with CO2 and Zn, it's effective for nuclear fallout, if you breath it.

Q: .. if I extract from the Cu Gans the O, the same principle for Tritium and Deuterium, what is left Cu material or Gans of Cu, or the Cu field ?
K- Could you repeat ..
Q: repeats ..

K- Have you ever done it?
Q: I didn't understand that why I asked
K- You always Cu composite when you try to extract the O. It always finds another link to itself. There is a specific way to produce H3 from CH3, .. O from , (2:58). extract o from Cu. Immediately it absorbs another O molecule, immediately. You find out your O turns up to be very fast increasing level of water in the container, because that O is separated will come mix with the H in the environment, but in a specific way you can keep the O. There are a lot people who think they make H, or H3 but in fact if you put a magnet next to it, you see it is not. You actually have a composition of Fe, it's not O or H2.

Q: .. people who have angioplasty or stint can drink the water from Cup 1 or 2?
K- I don't understand it, we don't answer the question . (3:00).

Q: Nikolai .. If the 5 Cup Stacker we made has evaporated all of its water, is it best to simply refill it, or to rebuild it again from the beginning, or do we just continue to go through using the fields?
K- repeat again …
Refill it, we do that all the time.

Q: Is oil a Gans, a plasma, or is it really fossil?
K- repeat ..
Q:
K- oil is an AA, in suspension of the atmospheric field interaction. It's like water, (3:02). If you can change the environmental M fields of oil, you can change it to a vapor or a solid without heating. So it's environmental dependent.

Any other question

Q: Jalal …
K- . I was talking about you .. good things not bad things, I don't know any bad things about you.
Q: I always talk about you every second . .. I am like you, a small magician, I do not show everything I have in my pocket. This is something .. It's not really a question .. Do I must see what is the output, (3:04). of whatever I do, not the input?
K- No, look at what comes to you, the output will decide itself. When you look at what you put outside, you become judge of yourself. A man should never judge himself in that way, what I put out, because then sometimes the arrogance takes over, "I am doing a lot." From what you receive the others will come to it, if you are not ??
Q: But isn't that in your teaching, what you are giving out is important. Because what you are giving out you receive in a similar Pl.
K- Not necessarily. sometimes .. you empty a gap which anything can fit in. And what you receive. Sometimes that gap allows you to receive a higher order. because of the combination of the fields inside. Never measure .. when you start measuring it's the time you have not … you haven't got, you haven't done enough.
Q: with your
K- I juggle It's the process of understanding for what you are doing, and what the reason is, (3:06). and the way you do it. What you put out and the reason you put out. As I always said, you give from your soul more to your enemies, because they need. In a way, you need it to understand your enemies. That you might be the cause of that animosity, not that you might change them. It's self-awareness you call it of what you receive that, you put no condition on what you give. It's a very fine line, very touchy line. But you have to be there to be it. I was talking to .. a very powerful woman in world of finance. Mehran there is a problem …

I said … what we were trying to do and it didn't happen, because we were not ready for it. You see it as something went wrong. It wasn't the time for it.
SO let it be, .. don't have to loose sleep.
She said, .. I learned a lot and you were correct. I was expecting for something to happen that time, and now it is time for it. (3:08). Because now I see how far we were from what we were expecting 6 months ago. .. you have to give on the condition there is somebody, ??? It's no use you giving money to a beggar, who goes and spends it on drugs and alcohol and getting himself in more problems in health, damaging himself and his family. You think you were generous, but in fact, you created more problem, and you say, oh, I gave and when am I going to get back too. In fact you ? gave 1 Euro you can demise the life of a man, you might loose too, because you were part, partially playing it. SO never count, it's just there, for what has to be done.

Any other question.

Q: .. When you say that H is the release of balance that allows it to exist in different compositions of AA, what do you mean?
K- Exactly what it said. (3:10). All the AA are not the same (Rick not hearing ..)
As we always say, every man with a mustache is not your uncle. Just because we create an AA, not all AA are the same. Every H, with slight deviation in the strength creates a different AA. The same with the Pl, .. O, or N in the AA. So when you produce different type of Gans's, even while you are producing ?? Gans's, depending on if the cat walked by the side of it, if the baby cried, (3:12). if the music was different, if your wife shouted in teh corridor, it changes different composition of AA created in the mixture. Because each one of them introduces them, or takes fields from that box, ?? on a amplify. But according to the emotion and the ?? talk, and whatever is there. It changes the H composition in different strength. It's the same when you produce different Gans's made in the same box, you will see this.

If you go back to … in the archives to show this, .. I used to use 24 box junction Gans production system. Where there were 24 boxes, each about 2 cm x 2 cm or something like this. It was a box, 24 (compartments) of them. Why they were the same they were slightly different salinity or sometimes the same salinity in certain rows. We could see production of different colored Gans's. We didn't change anything. You could see different thicknesses of AA, different shades of colors. If you look at the AA on the surface of 2 different batches, you'll see the light reflects on them differently because the energy of H, or whatever is a different strength on it. In some of them you don't see any, different shades in them, doesn't matter what you do with it. (3:14). Which means the energy of AA is different than the others, it does not absorb, or it only absorbs, certain field strength.

At the moment the knowledge is not there to be able to replicate, like when you go and buy a tomato ketchup today, and tomorrow, and next week, and next years time, from Heinz always the smell and tastes the same. The knowledge of the Gans's is not that far yet to be able to replicate exact strength. It needs time for scientists to develop these T.

There is a race which is standing outside of this planet, they have mastered this game. They are beautiful people, especially their feature. One day when man becomes peaceful they might teach us in a beautiful way how they do it. They have mastered the game of changing the fields in the lowest level, in the single ?/ atomic structure , as field. They're artists in ?? this .

Any other question.

R; I'll just show a picture that you talked about in the Fukoshima video.
K- Yes that's the one. If you look this box is empty , but can you see the different shades and colors in each box. It's the same composition, .. material, but if you look .. .they have different colored Gans's in it. Different colors produced. These boxes were original, (3:16). first batteries, Gans Pl batteries. That brings back some memories. I used to spend days making these for 1 test, half an hour. … These 2 boxes are the original boxes where the energy production of the Pl was confirmed. the wires were connected to LED, left on the table and for months and months was creating light. We were specifically developing this one . (3:18). It's using Nano wire like a ?? this unit produced electricity for a long time. You could light … Everyday I used to send a message to BHS to Derek F , that ?? enlightened, that was everyday. We wanted to see for how long, and it went for months and months , finally he gave up and said stop sending me the messages. This thing is going to go for years. It doesn't stop. It produces about a few volts and substance low current. You can amplify and use it, but it gets clogged up with Gans's. If there eis a shortcut between the plates, then you get the shortcut and they jump. One day one Gans was one color and the next day it changes to another color, goes from red to blue, and then jumps back into black. It's very interesting understanding of the plasmatic work. There are two of them …

This was one of the very first power generating units using the Pl T. to understand it, compartments to see how it goes. I think one … one wire comes out of here, (3:20). and one wire goes out of there. I think it is here …. I could change the salinity in each box and see the voltage output. Brought back a lot of memories

Thank you for today I hope we learned a little and shared a little.

(:12)
K- .. (:14). … One of the most important parts of understanding of the creation is, how does everything create, how everything was created? We know from the understanding of the new T that, in a way, human race is not the only race. But to understand it completely, that allows us to bring us to the next step, that allows next step of .. comprehension of totality.

In the world of creation, in the science up to now, we walked, we talked about the Adam and Eve, we talked about the man being created or the essence of the creation of the man from central East Africa and then we spread and the rest of it. But where did this come, to lead to the creation of man? Is life of man an accident of time and position in the space? Or for us to put aside our prejudices, man becomes to understand the total knowledge of how it is. In a way, man always thought up to now, that from Creator, comes the man, in one position, in central Africa and the rest of it. In the teachings in the past, we have explained a lot in these processes. (:16).

In a way, we are not a direct line connection. We are a connection of, of a connection, of a connection, and these connections have been going on for trillions of years of man's cycle. Each one being another galaxy, another U, another dimension (D) in different shapes or forms, releasing energies, that the end product of the energies, in combination of what we have become, the center of the earth. Even a cycle has created what we call, life of the man in one position.

But again, when we study and start understanding of it, even in the historical data, we understand, that man was not created in one position alone. There is a possibility that simultaneously a number of races of man, number of races of beings were created at the same time across this planet. Because we know, we have understood, and we have gathered enough information to understand, that the cat, the dog, the dinosaurs and the rest, all plus the man, plus the trees, all started from the amino acid (AA), and a deviation and diversion from one to the other, with the presence of different materials, lead to the creation of a varieties of lives on this planet.

Then the question arises for all of us is, (:18). what happens in this cycle (from Source to Earth), or what happened in many cycles that emanated from the Source. would some of these in the long run became in meeting this (line from Source to earth), lead to the creation of (a creation on the earth line). Or did some of this (another line from the Source) came back and it met in a point, that it lead to creation of (Joins to earth line).

In a sense, once we found a combination of the energy source, communication source, holding energy pattern and line of gravity, you can replace this (elements in AA) with any element, depending on the time place and position (on earth line or any other line from the Source). So in fact, life is not exclusivity of this planet. Never been, and in a

way, shall never be, because ongoing process is still, is carrying on, with other cycles (from earth outwards) from the same Source. Where could be that these sources (creations) which lead on, could be collective, the soul of the planet, and the man, which is created out of it, as a seed.

But we understand now the totality, and if understand the totality, we understand the reality and the fact, that we are totally, utterly creation of coincidences, and if these coincidences lead to creation of life on earth, so life has existed, and exists in all D across the U. (:20).

The only thing, which now is happening with the human race and hopefully, once the human race understands it, will come to all the rest of the creatures on this planet, and the rest, which will come from them, is that now we understand we are member of the a very big family (Universal Community), which all creates from the D of the creation. This family is not exclusivity, and it's not going to end, because this cycle (STM) has already started into the next generation. The cycle of the Soul of the Man (STM), that it leads to creation of next cycles.

So what is important to us, if we are going to make this trip backwards and meet with our other fellow, and other people, which we are created out of, then very much as I said, in your AA, in your RNA, and in your DNA, this information exists (of the whole creation). The way, in your DNA, the information about the man and how to be a blue eyed, .. to behave exists, because this (Man's RNA) is collective of this (whole creation). But as we have not understood the rest of the structure of the energy fields of DNA and RNA in totality, we do not see, that we are connected to this, and to this, and the rest of it.

In a way, we have to understand in the development of the new spaceships, (:22). and space development, how would this soul from this planet. How would this system what we call, enhancement unit (EU) will perform in this (on another planet) would it survive?

Would it become the whole understanding of us, how to tune our systems, flight systems (FS), that we do not go to D, that we are so weak, that in essence we are not heard, .we are not seen, we are not existing in the D of the physicality (P) of the time, place, and position.

Does the STM, does the P of the man needs elevation of the strength in his own circle, as we know the plasma (Pl) goes this way, does it need elevation in cycle of inner strength, to be able to manifest itself in a higher order. Just because you cannot be seen, does not mean you don't exist.

But once you understand the strength of the emotion, and understanding, would this lead to a new generation of more intellectual, intellect-ed being, as we start traveling back and forth in different D. Does the STM, has reached the point of understanding, that it does not need crafts, but it needs to understand how to go within its soul's inner sanctums, and be able to revert back. So man, (:24). can be manifested at any position and any time. It's him who decides, not the machines.

The machines will help is, maybe within the Solar system, maybe within our galaxy, but if you are to go in a deeper essence of understanding. We understand more. The reality is, what we see as a human race, in one corner of this U, what is matter state (S) to the human strength vision point of view, which is something like less than 2% of what it is. So we have to gather strength to see the different strengths, that we can understand, and we can manifest ourselves in these different strengths, because the green cannot see the black, and the black cannot see the red.

This is why our spaces are empty form the vision of the man point of view. Where in fact the universe is a multitude, a solid dense, what we call, interaction and existence of the fields, which one is centralized, but at the same time this universe itself, is on the what we call, another spiral of energies, which will lead in one way or another, to what we call, the Source.

The first energies, the first origin started, (:26). where in this point, we'll come across different, what we call, galaxies, and universes and depending how far we can go, in the terms of the energy, but in essence, we all carry the essence of the Creation, the Source, the level of where the life will start.

The question for Man will be, that in a circle of his essence of Creation, in manifestation, which it gives to be seen, would that, within the inner strength exist, a strength, which is at the strength of the Creator, that finds the line of communication, finds a common source, finds the seed of.

If you understand this, and what we explained, then within the center of the Soul of the Man, within the seed of the Soul of the Man, sits Seed of the Creator. I made Man in the Image of Myself, because I am Myself within the Image.

And this brings a lot of complication for a lot of people, in the coming time. As we develop this space technology, not into the dimension of physicality, but in the dimension of what we call, field strength of understanding of the Creation.

If you are sitting here with the Soul of the Man, then you want to connect with the soul of the others, which you see through the dimension of physicality. When man opens his eyes and sees the totality of the vision of the universe, (:28). at a higher order, will see nothing but, transparency of the fields, emotions.

Which means you will not see the galaxies anymore, you will not see the stars anymore, but you see fields in the dimension of total motion. And in fact, this is the beginning of what we call, the teaching of the Keshe Foundation.

Because we started as matter state existence, we started what we saw as elements, we became atomic, we became nuclear, now we become plasma. In the world of the plasma, once we start looking, that we have opened with a knowledge of Keshe Foundation, we see the essence, replication of what it saw in the universe, and then what it'll be, in the

Creator, and us in understanding of totality, sitting somewhere in a weaker position here (outer ring of plasma spiral), most probably but, in the process will carry on.

In a way, we are just an energy transformation. And if we can add enough strength to our soul, in the next cycle of the creation, we might jump here (closer to the center). But if we can gather enough to understand the totality of, to be able to lock into the energy fields of the cosmos of the higher order. One day man can be here (center of Pl), without needing to travel the whole length and capuddle of the creation. (:30).

So what it comes to, is the fact, that Mankind is not alone. Mankind is not there to carry on with abuses, what is done on this planet. Once he goes into space, we cannot start in a way, as I've said many times, eating whatever comes across us. Destroying whatever comes across us, unless we understand that we are part of the process. And in that process, the survival, the integration and the keeping everything together of the Soul of the Man at the point of establishment, is the ultimate goal.

Which means the habit of the man, to destroy, to absorb the energies of the field of the what we call, Earth to elevate extension of the strength of the Soul, can not be repeated in the universe, unless you learn to live within, absorbing with the structure of the soul of the universe, and the Soul of the Creator, which is in essence lower version, absorption of the fields that we, according to the strength of our soul, can absorb. We cannot give a banana to a one day, born (old) child, because it's not ready, it cannot digest cannot - the body the understanding of the life within it, is not there, at that strength. It needs time to mature, (:32). that one day down the line, he can be given the first non, what we call, liquid, the solid to enter the next phase of the life, that he can live on the process of the other entities in his life.

What happens when now, that man gains the knowledge, feeds the child from the day of the birth, gradually from the essence of the soul, the matters of the planet. It is the responsibility of the parents to learn the process, and gradually phase out the killing, phase out the destruction, phase out the absorption of the others collectively. Where it's available, you take, at what strength you take.

The knowledge given to Knowledge Seekers, is there in a way, that the child of the man, the essence of the Soul of the Man gets fed from the essence of the energies of the universe, not from matter states of the universe. Where the energies are, and can be converted through , to sooth the energy fields of the need of the man, at the point of need.

If you understand this process, then you understand why, especially in the Enhancement Units which are developed, you don't see any restaurants, or cafes, or toilets. Rick, can you go through the promotion video with your of the Flight Enhancement Unit (FEU), where you see the three units next to each other and put it on the screen please.

This means, that when you look at the new Enhancement Units, which are flight units, according to the man, when you are on a flight you need to have everything for the man. When you get on a plane to fly, you see the seats, you see the toilets, you see the kitchen,

that they can serve you. If you look at the structure of these flight system, there's no kitchen, there's no toilet, there's no control room, there's no control panel.

Now you understand with the simple animations, we have introduced the next cycle of the space travel in a very soft way. In a way that, you see this is a craft built for the space, that can travel any depth of the universe, as it will not consume another being. In the present situation, If it's four of you, and you get stuck, you look at, which of the other three passengers am I going to eat.

(Talking to Rick Crammond): Can you go back to the four - three crafts please.
Can you stop it there please.

In so many ways, if you understood this, you will understand that we have already introduced to you, (:36). what was in the past few minutes explained to you. We have made, we are making Man ready for that final flight, where man dictates, travels with his Soul. Understands, even the system, understands the communication of the Soul, that he can fit to satisfy.

In the Flight Enhancement Units, which you will see coming up, only one seat has control system built in it, that in the Soul of the Man, with the Soul of the Man, it communicates with the System Control, and within the structure, communicates with the Soul of the system. Where this as intermediary, understands, and it's by proximity, what it needs to be done by the total craft. What energy level to adjust to, that in the process, you come closer or further a field?

Do I give more, because I came from Earth and I'm traveling that way, away from the energy source. Do I give more, to move away, in the strength point of view, not in a matter state of view, or I gain from the environment, that I can come closer to the seat, to the essence of the origin of the Creation. (:38).

This is where the new development, the new teaching, the new structure is taking us. It's where we will go through, with understanding the totality. Where we come to be part of the essence of the creation. We have been part of the essence of creation, and we shall be part of essence of the creation in a different dimensions and strength, from the beginning of the time. The reality for us, is to understand the process.

In the present system of what we are used to we call it a Solar System. We always look at one point. We have the Sun, and we have the Earth, and we are its citizens. We free ourselves from its energies, and elevate our souls to become passenger, depending on what we have done in our cycle of life, to be closer to the higher strength to move forward, or due to the crimes we've done, to go backwards.

In a way, not backwards, but be part of the next generation of the developments of the next cycle. Maybe our soul in the coming time, (:40). in a process will interact with another soul, and that soul will interact with another soul, which leads to the next

generation of souls, from interaction of the fields, which came originally from the Earth, through the soul of the man, or through the Soul of the animal.

But what we have not considered, and we always look at it so, what I call dismissively, is that, day and night this planet Earth is getting fed by the Mother (Sun). It's not just the daylight, is a continuous feeding to be able to control the D. As we said before, the Sun itself is getting fed, by the resources, not only in galaxy, but in the universe, and the Unicose, depending on the field strength of where they come in. As we are fed the same way. We are not just fed by what we eat from the ground, but from what rays of the universe has come through, that has ended up with us, as a body, as absorbing and converting it to what we need.

These teachings, even though simple, are essential for the humanity to know what is to come, or where it wants to be. How, it wants to be. (:42). The way it wants to be. And clearly explains, from what we said this morning, and many times, we are not designed to be human. We are not designed to be a cat. We are nothing but the presence of interaction of the fields, which has given time and space, has led to collection of the fields, which on the gravitational (G) field strength of the Earth, creates motion, emotion, and with it, existence.

If this planet would have had slightly different composition of the field strength from the center of its core, your amino acid (AA) would have not been what we see today (CONH). A slight deviation, as I've said many times before, would have put you here with a different element (for example COPH), and then, how would you look? What happened if this process of the elements of this, what we call, structure, was slightly different than what you thought it will be (COKH)?

You would have been green for sure, and you could have been a slightly, combination of the two possibility, would have become maybe, a dark green color. (:44). As long as, we can make a line of connection with the environment, and as long as we can hold on to the energy gravitational field, and as long as we can release field energy, the storage decides the manifestation of life.

And then at the present life, we look at nitrogen. We make all our fertilizers connected to the nitrogen. And if the science of the knowledge of today, could be understood in a deeper way, by the color of the leaf of a plant, we can decide the strength of the nitrogen we need, to keep this composition. Then, mankind does not need the plant, but it needs to understand the calling of the field of strength.

Those of you who work to the dimension of energizing the Soul of the Man, you should have guessed the whole thing, what and how you need to target, to work, to increase the field energies, that you elevate the soul in the dimension of the amino acid interaction.

It's the collection of the egg and the sperm, which led to the creation of the Soul of the Man. The combination of the field strength, the two share in the what we call, dimension of the creation of life, dictates, in so many ways, and the point of the collection and

completion as one, the color of the eye, the shape of the face. (:46). So what would be, if you change the environment of the Earth with the man, to another dimension, or to another position in the universe. But in fact, the essence of the soul stays the same. The essence of the source does not change. It's the interaction of the fields of the source, which creates the shape, the color, the position, where the soul can interact and survive.

If you understood this, then you understand, how we as a human race come to understand, we are the makers of the decisions, and we are the decision makers of the presence of our soul in any dimension. Now we have to learn how to tap into these energy sources. What do we need to change, that we change accordingly.

Gray Hair - change in strength of STM

We know this process through our own existence, but we have dismissed it. We have not looked at it in depth. We looked at it everywhere, but except the dimension of the field interaction of the soul. When the Soul of the Man is ready, and is grown enough in the strength, within the physicality of the man, then it takes energies from the dimension of the physicality of the man, and in the dimension of physicality, you will find yourself with a gray hair, with shriveled skin and the rest of it. (:48). Where in fact, the energy is strength of the soul has changed, and the interaction of the change of the field, has changed the manifestation of the presentation.

When you look at a gray hair, when you got the white hair, it tells you that the soul has elevated, the soul has gathered enough strength, and it lays out why. Why do we get the gray hair, or a white hair, because you went through an experience, you've added to the energy of the soul. Soul now has a different strength. He used to be here in the center, now is become in fact here, in understanding of the totality.

Do you will need to get old, that create the atmospheric condition, or interaction of field condition, that it affects your physicality. Or you learn how to interact to expand the totality of the fields, that physicality never changes. The "Fountain of Youth." The Fountain of Youth is understanding the strength of the field of the Soul of the Man, and not understanding the way the physicality can extend its existence on this planet, or beyond. When you create this barrier, the dimension of physicality doesn't interact and is fed within, so you stay constantly the same.

Then if you understood that, you decide yourself on your own, in which dimension of physicality, with a new dimension of the field strength, you manifest yourself. (:50). Or if you carry on with committing the what I call, crimes with taking lives. Then which direction does mankind want to go?

You have nothing to give to create the dimension. Go back to one of the intros (videos), "you care about your children, you care about how physically you look, how smart you are, what suit goes with the other," but you have never thought what you're going to do with this one, which is your soul and its interaction, will create your dimension of physicality.

If you understood these part of the teachings then, you understand, simply man is the creator of his own destiny in the strength of the soul. Then you decide you'll stay for one year, one decade, one century, and one life of the universe. It's all within us. It's all within the structure of us. It's just trying to understand the next step. We don't need guns and bullets to show our power. (:52). We need generosity, love and giving to be able to release the same energy. I made Man in the Image of Myself by giving, not by killing.

Then it comes to understanding of the totality. In so many ways, it comes to understand, to what extent we can help this process to be. When the child does not understand, you explain it, you send him to school to comprehend the next step of knowledge, to gather more. In this process, the teaching, the school of the Soul of the Man, at this moment of time, till the man learns and become graduate, it has been chosen to be, the Enhancement Units (EU). The sandbox of your soul. The sandbox or understanding the use of the fields of the universe, not the use of the fields of the life, created in the universe. There's is a big difference in killing, and in the what we call, giving.

If we are given, it's the essence of life. If we take it by killing it, we have diminished the life. The child does not kill the mother, to take the energies to grow. The child takes from the mother, what the mother prepares, and she makes it really as a milk for him to suckle on. (:54) Man has to be that child, to take the fields for what the universe has prepared for it, and not to kill to take, that there is no feed, to create another life with it, to support another life with it. This is where this planet has stuck with, is what we call, evolution of the completion of its totality.

Man will learn that milk of life comes from the essence of the fields of the universe, and not by destroying the life in the universe to get what he wants. How do you taste, if I eat you? Should be, what do you have for me to feel the love of you for me, that allows me to elevate myself, my understanding of my Soul.

The University of the Universe is understanding, which fields in which way to use, without destroying. That the University of the man, he gives you the best chemicals to give, to give the maximum survival time, that when you kill the animals, you get what you want.

The Enhancement Unit is not there for you to walk away from the cancer. It's not there for you to walk away from what we call Alzheimer's, or whatever. It's there for you to learn the next step in the development of the STM, that the man becomes child of U, and not the child of this planet. In a way, he does not kill the mother to get, it gives love and laughter in a smile to the mother, that the mother can give.

A man should be that baby in the U. Become the source of elevation, joy, of being part of the Universal Community. (:56). That going out to killing and more destruction. This is why the man has been contained and confined to this planet, till he solves this thing out, to understand. We allow the STM of good conduct to leave the planet. But the physicality

(P) is the soul, which is encaged in the P of the man, will remain till he learns, "I have the P, but I have learned not to kill," not to destroy, not to enforce by the forces.

The process of the creation in understanding the new Enhancement Centers, is to start the new line of communication between the man and the energy fields of the U, that one of these might lead, by understanding it, to the essence of the Source, which is the Creator.

It's not that all the fields from the Source have to go through divisions and breaking, to become the STM the soul, the generosity of the Creator's field of creation, still exists, it's you who has to understand how, and the way to the strength, that you can tap in your soul to it, and with it, with that understanding, create a line of communication between the man and the Creator.

If you understood this, then you come to understand the work, (:58). of what we call, the EU. The EU are built in the shape of the U, and nothing else, when you look at it, as I said before. The energy field in the center of the system, is set to match, to be able to match the STM, and the soul of the creation, both, in both D of the field strength.

How we turn up to be, how we allow this process to be followed, to be part of, to be in conjunction, and in process of understanding This is the purpose of the EU, This is why we built the EU, for replication of the man. When you get into it, and you understand the feature of it. Which part of the U you want to be in? The position and the destination is decided by the STM within the system, and as you approach this understanding, it's where in the Unicose you will land.

The whole process of the understanding for the man has been the block, for man's understanding has been, the motion of the M fields. (1:00). Creation of M fields, collective interaction of the M fields. Then maybe in a simple way, man can see something in his existence and within the EU. In fact the central line is the same as the magnet you created as a solid. What we setup in the structure of the fields of the system, which will feed, interaction of the STM, understanding of the emotion, decides which one will be more interactive, and where you will land. Or you decide that I want to be elevated in a way, that I become in this process, part of the fields of the U. Then with what you interacted, and with what you give as a part of the totality, will land you in that position in the U. This the same, could be the soul of wanting to see the mother, or wanting to see the child. There is no difference. It's you who decides if it is the mother position on the U, or in direction of the Soul of the Creator.

Then life becomes without time, place and position. It's you who receives and .. gives. (1:02). The Flight EU by the inherited design are both ways, they are givers and takers. Where the .. EU for performance, body EU are mainly in that direction. With the Material EU we haven't done much difference, but we have learned is how to change the energies of higher order to lower order to the matter state (S), but in fact we still work within D of internal fields of the system. Then what fields we create within this, decides what fields we give or take from the system into the environment to the satisfaction of the STM. You

want a kilo of gold, we shall create you a kilo of gold. If you are thirsty, that gold becomes water. You are hungry, that energy becomes bread.

It's you, through the D of the soul, which satisfies. But this satisfaction of the soul has to be agreed to be balanced with the other fields, that you do not change the position in space of the others unless they want to. The mother gives you milk for you to smile, to kiss, to cuddle, you return back the energy. A lamb, which comes to you to be fed, you slaughter. There is no difference between the lamb and the mother, (1:04). it's you who has decided, the hand, which caresses the mother, becomes the hand to kill the animal.

This is where the STM has turned into its D of the work, and understanding of the new teachings. It's you who has to understand this, and that hand has to become the source of returning the love and care, not the hand to destroy another life. This process cannot change till the man matures to that point of understanding. I would like to see how you taste, but I have to bring you close enough to catch, to get. In the D of U, the soul of existence of what is, is aware of the emotion.

Now we understand the process of the whole understanding of what the teachings are getting into. We try now to create the D of the communication and the position with the other places and points in the U, on this planet, or more essentially, fundamentally, within the brain of the man, within its own emotions, because it is these emotions which .. allows the release of the fields, that the body of the man decides its position. (1:06). As the STM is within the brain of the man, and is in a way, the replication of the field source, then the decision on how the STM will take its time, place, and position.

We are not teaching anything new, but we are opening the book of the knowledge of the creation, that man can go the next step, that we can establish the thing. Establish one point, one piece, one way to change. This is how the establishment of the U Council has become, the establishment of the U Council has one fundamental work to do, is be there as an essence to feed, that the soul of the totality, understands the totality of the creation.

There are these units on the walls of the space reactor. These are the souls within the space reactor of this planet, to receive, to give, to elevate the soul of the totality of the created, that, in that process, man reaches the ultimate knowledge, which has been, and shall be, and will never change, till man becomes mature to the understanding of totality.

In a way, .. we have replaced the reactors within the EU, with the soul of the members of the U Council. They are those sources to bring, to allow, to elevate the soul of the totality, that one day, mankind does not need the EU, but survives in the structure of the U, as on its own field of existence. Because the reactors we built, (1:08). are physical D and strength, and in a certain point in the U, that strength cannot manifest and show itself. But the soul of the universal members of the group of man (UC), is a dynamic, and in essence can fit any soul. We fit in the EU through the combination of different fields, to work with the majority of the souls strength, created on this planet.

As I said recently to one of the KS, and this will happen to many of you, this is not something that will be very, what you call, abnormal in the coming time. You have 4 seats in the EU, and 3 of you are from the race of the man, but those who are here from other dimensions of the fields of the U, they are after the elevation of the soul to the new D. They enter in the body of the man, but what happens when the system runs, and through different strength of the soul they have, and the expectation of this, they might create a seed, (1:10). a condition through understanding of the RNA and the energies of the U, will return home where they came from. Where the man is happy to go to New York or London.

It's not that suddenly one of the passengers disappears, he actually goes where he came from. You all went to the same restaurant, but for different foods, for different satisfactions, for different elevation of sense of the creation within you. One has a Chinese, the other one has what we call, a curry, and the one with Fish & Chips. Not this chap, knowing, understanding through the essence of T, and being manifested as one of us, wants to go home.

Many of you in the coming time, in the EU, will understand this very rapidly. There is a reason we chose 4 seats. You remember the Star Formation (SF)? We still follow the same principle, we still follow the same understanding, and no difference. In essence, in understanding the totality, mankind will become very wise to the whole structure of the creation. (1:12)

In still a way, we become part of the U Community , we become to see the U with a different eye, through the eye, through understanding of the STM, then through the taste, the vision and the touch of the man. How would be the smell of such a galaxy or such a planet? When you become a soul, you smell it, you feel the smell of the planet. So shall be in the D of U.

Now we understand more, why we teach in parallel, both in the D of P, which is now the EU, the work of the EU, and what to come in the D of the STM in conjunction with what man creates in the physical man, in the physical D, in totality of understanding the essence of the creation.

We are here just as teachers and not Messengers. The message can be misread, teaching has to be direct and clear. In so many ways, a teacher has to be knowledgeable enough to see the totality, that he can teach in the steps to each student as they come, they are, and according to their comprehension and understanding. When you go to a village, there is one class, and one teacher. (1:14). The infants have a chair, the child who is 7 years old has a chair, the 12 years old has a chair, and the one who is 18 and going to university has a chair, and the same teacher, in that village teaches the infant to the teenager, to the one who is going to university.

According to the understanding, and she speaks to the infant with the love and care, as an infant, and to the teenager, and what I call, the one to go to university, as a man, that he understands, the understanding of the work of the what we call, outside world. And the

teaching has been in the same way. We teach with love and care to the infant of the man. The village, is the village of Earth, and the classroom is here.

It depends where you see yourself, not in the dimension of the physicality, and the knowledge, but in the strength of the field of the Soul of the Man. Then how we can nourish this, from infant to maturity. But we speak the same language, and at the same time, the infant of the man, the village of Earth, is within the Universal Community, when we teach those who are teenagers of the what we call, the universe, and those who have matured to go to university, all sit in the same class, but they take different understanding from the same words and to the maturity of their own Soul.

The time of Messengers, and whatever, is over because message can be misread, but the teaching can be explained and become direct - teacher takes his time till the child, (1:16). the infant understand, what is the bottle, and which color is which. Where the one in the adult, who knows which color to mix, to get what new emotion from it, and directions of understanding.

We taught well. It's Mankind who has to understand, and decipher, and decide by himself where he sits in this school of knowledge. I said from the beginning, you take from my teaching according to your intellect, according to your understanding, not intellect by reading books, but intellect in understanding the work of your Soul. The understanding of the inner creation, the understanding of totality.

We still keep busy with opening factories, and getting Cups made, and trying to get the Flight System (FS) to satisfy different position and condition, to bring all to the same point. As I explained to the head of the Keshe Foundation in China very recently, when they sent us a cup of, which is getting produced in China. I explained to the Knowledge Seekers, same, about the same cup. We make thousands of cups, and they don't come out perfect. This is the problem in China. The cups have a boil here, or something else, but in essence, they all have received the Gans's, or what it is.

But the strangest point is, you still look at the physicality of the cup. But we look at different. The cup which is fit with certain Gans's. in certain positions, will find itself, when we sell it, from China to Katmandu, or to Brazil. The Cup which fits the man's needs in Brazil will arrive to him, because the soul of the cup, (1:18). is made for that, come home, this is where you're needed.

It's not anymore what I put there, it'll go, and it has to go, and it's for you. The essence of the understanding is, that the cups are made, as a Cup of the Universe, as a Cup of Life. Then you decide what you take from it, according to the strength of the cup. One finds love drinking from a cup, and one finds eradication of the diabetic, and one finds new understanding, because you take from that cup according to what you asked, what was delivered, what you need for the elevation of your soul. When you elevate that position, when you reach that position, you'll find out, "oh, I don't have diabetic anymore." You look at the physicality, we look at what, how we elevated to satisfy.

Why do you get diabetic. What does it mean the sugar level? What is you're giving unexpectedly, or you're not receiving what you want - you call it a diabetic? Isn't your body responding to, has the diabetic, has become a point of the new problem for the mankind, due to the energy transfers, that we have created for ourselves in the dimension of the Soul, and physicality, and it manifests itself in different way? This is what the new technologies are. As you don't understand, we feed you in a way that unknowingly, gradually you come to understand the totality.

Be it by water, be it by Cup of Life, be it by the teaching, be it by understanding the Totality of the Message. (1:20). But it's you who decides where and how, we come to that point, where and how we come to understand. That, what we understand from the creation.

Do we need any more prophets? Do we need any more Christianity, Judaism, Muslims and the rest of it? Or we see it all as one, the path to understanding the Totality of the Creation, not in the world of physicality, but in the world of understanding for elevation of the Soul of the Man. In understanding the Essence of the Message, not the book of the message, because it can be made in any color, shape, and size, and writing.

This time we teach you how to read and understand the message by yourself, that you don't need intermediaries of the prophets, the mullahs, ayatollahs and the priests. You are your own priest, you are your own decipherer of the knowledge, and where you want to be. And meanwhile, we keep ourselves busy building the Enhancement Units and other bits, that you understand, that there is somewhere called, the Keshe Foundation, that I can get the knowledge on my own without intermediary, and I can translate it to what I understand, and what will help me to create that position and change.

I hope now you understand when we say new ways of communication is set up, this is part of the teaching. Is for you how to communicate, how to build systems, that you can communicate with yourself, with your soul, with the Universal Community, and beyond.

Even if you elevate enough to go within deeper inner strength of the man's Soul, maybe you'll find, the final communication to your Creator. (1:22). And then if you found that point, you become Him, become part of Him, and become part of the Totality. Because now the strength of the fields of the Creator, in a way as it was before, between you in a distance, now you become part of Totality, as you become part of it. I made Man in the Image of Myself, but the man is Me within the Image.

This is what the teachings is about. Meanwhile we keep ourselves busy, to bring you, to bring the children of the man from that infancy to what I call maturity, in the same classroom of the Earth.

Thank you very much for today. We go through a break and come back to answer any of your questions. (1:23).

Proofed to here >> continue on

>> **BREAK** << 427 KSW April 7, 2022 (1:28).

K- In the next few weeks we'll have a presentation by one of the Knowledge Seekers (KS), they are putting a video of teaching, sharing knowledge what they have done ..

(1:30). The hooligans of what we call, other people attacking them. We bring it back slowly, at the same time we .. enhance the knowledge. .. Linz EC is reaching new number of people coming to see ..

look at what it does in elevation of my soul, my understanding of the creation, that's what the soul is. The true creation, not by feeding and eating vitamins and the rest.
Are there any questions. (1:32).

Q: ... Could you expand on the Plasma Mirrors developed by the Austrian team and if they can be shared with loved ones?
K- We put these mirrors out, very limited numbers, they are very hard to make. … There was a reason when it was done, we allowed it to go out. It has a reason we never explained, and there are reason we put it out for people, the way it was explained originally by … Klaus. You go to understand there are different levels of knowledge within all structures of the KF teachings, equipments, and the systems. These mirrors, now that we have more knowledge have a different use, or can be used in different way by the KS. We keep a lot of this away from public. It's a fire we don't want you to burn yourself , if you don't know how to handle the fire. The mirrors have a specific use … we stopped selling them, because they are too hard to make … is Dr. Klaus on the line. .. … (1:34). This unit due to their inherent blackness have inherent characteristic of absorbing fields, and then how these field reflect back … creation of black holes. They are like black holes. but it has a very interesting characteristics . … it needs to be understood. …. very thin disks, and they have a Nano layer on them. . you receive energy from both directions. when it crosses the Cu, what happens collectively within this structure. What is the properties of those lights which are not absorbed. Due to the curvature it creates on its own, more or less, you absorb the lights form this side, is not the same as this side. look at the disks the tow of them, because they are made of the same , reflects from one to the other, it's you who are in the middle. Goes back to a lot of teaching … are there applications in the work of the KF. (1:36). What fields are reflected at this point, and what fields are absorbed at this point and refelcted back . or the same in this position.

As we know black holes are not what Stephen Hawkins said, they absorb everything. Now we know they are sources of energy, but what sources, they release, this is the key to the operation and understanding of this ??

Any other question.

R: reminds me of the original lasers that had two mirrors …

So could 2 of these plates be put in parallel and a reactor of some sort in-between as focusing point for the plates?
K- You can do a lot of things with it. … but this is just a .. small understanding of it. People will try ..
R: 40 layers to make ..
K- we stopped producing them .. (1:38).

R: looks like a flying saucer in your diagram there.
K- Ask yourself why the flying saucers look silver-ish grey to the eye of the man. When at the point of death you look in the eye of man, it's got silver-ish bluish color, for an instant or for some time.

(1:40).
Q: .. mistake

Q: Thomas .. I have .. come across over the last few days our beloved Caesarean Mafia let us know that their goal was actually as they stated, already years ago, is that reduction of the world population. Now since they didn't have their success they wanted with their virus, they are now joining or trying to apply another thing which is, to create hunger and people dying form hunger. The last days sort of decided in this direction, for instance in America, the railway which has two separate transportation, one for high value goods, and one for lower value goods, they sort of told the railways not to deliver low value goods which are for instance, the feeding for cattle, (1:42). which means if the cattle doesn't get the food within a certain number of days they have to be slaughtered, which will create hunger. ..

BIG GAP >>>

(1:50).

(2:00).

(2:04).

we saw Trump family going into that way. Biden family is deeply involved biochemical laboratories around the world, they make money out of it. How can a father say, I don't know what my son is doing. Didn't the same father cry for the son he lost, why is he allowing the son's of others to be taken life of? This is what we have to teach our world leaders (WL) not become the peacemakers and bring the new world order for peace by talk, but by action too. We have to change the mentality of the mankind from this war position. Then we don't need EU.

In the future, . agricultural part of the KF we will show how we go back changing the essence of creation. What was short in the visible D of the STM, not only feeling it through the systems, but ingrain it through the genes of the man. We'll introduce, (2:06). .. it has been done, but you are not aware of it, to enhance the STM by the food man eats. We have already started this in the production in the KF agricultural systems with Wang L you feed the grain to enhance your P, but the structure of the system is set to enhance your soul. To make you a peaceful man, give to the soul, that the soul does not allow you to take more grain. It's, the reactors on the bench getting ready to be built. This year we might be able to get into the market but next year, probably we will.

Changing it is important, at the source, and where the man gets his food. With the new agricultural T we develop, is gradually feeding the man is not only body enrichment, but the soul enrichment as well. You have the systems, we taught you how to make the systems, but you're so physical you don't see the ?? Then your systems, allows life to coexist, to destroy one to get the other one to be better for us. It's the end of herbicides, .. pesticides .

We destroy everything, this causes a lot of problems. (2:08). A lot of agriculture people with the KF, ?? because you got pesticides of .. herbs that they can damage the growth. because we always looked at take the energy from the earth. Now the new T takes the energy from the space. You see when your products ?/ with the more herbs, and sometimes the pests are actually the supporter of the cycle, if you get the cycle right. if it doesn't suit the cycle, then it moves somewhere else.

We have to, not by producing EU, but by producing, creating conditions and materials and food and it enhances the STM and it takes time. We saw it in a very simple way, as you see on the video by the agriculture crops in Australia with Jim and Lisa. They said … people come asking for the product , because it's not just the .. deliciousness of it, but it elevates the soul, it brings peace to them. to get that peace. This is what many KS never understood. Why you harvest is not doubled. Oh, we used it, and it doesn't work, and the other one used. What have you missed, have we just eating there, or to physically

increase , or we went there to satisfy the need of the plant, that it can give you more. and allow with it to create new ?? It takes time.

We need from now on, with what we have with the presence of Mitra, (2:10). and condition of existence of the life through it, to create new children of man. That in the next generation, they shall not kill, .. not even think of war. We have created animals and we have allowed them to become our leaders. That you can see where we as a race, have gone wrong, that's how we bring the changes.

Any other question.

Q: .. is there a Gans application that enhances Thyroid gland and bring balance and restore function?
K- Yes, we have successfully seen the effect of it. It's a specific way you got to be done, and it actually changes the emotion and the strength of the body as well. Yes, there is. We developed this one 2007 or 06. You don't need chemicals, (2:12). if you understand the work of it, what it does, it's position, where its position.
R: That's normally a treatment. I had a friend who had her pituitary gland removed because it had a tumor. So she has to use synthetic hormones as replacement. Is there a therapy that would be similar to the Thyroid gland, for that incidence as well?

K- Yes, there is, there is a solution to it. There is a way, we've seen it, it has been tested. Thyroid gland, where are they positioned . put it on the screen Wiki .. Then you have parathyroid which is as small as a dot. … (2:14).

Forget about all the literature which is written about this. Just look at the position. Now that you have an understanding of the energies and fields in the body .. It's sitting around the voice box. Voice is part of the emotion of the man. Sits between more or less equal distance, the position of this gland in the position of the soul, .. of the heart, even dictates the behavior of the person. When it's a gland, it's a central energy, so it has a field strength of control. How does the communication of the field of the STM, and the body .. controlled in interacting with the STP and the P of the man. It sits right under what we call the highway. It controls your sleep. In some cases when they remove Thyroid gland, you have to take tablets to awake. It controls, what is a sleep. It controls the emotion, (2:16). it controls the freedom of the soul.

This gland is not just a gland, it's a control system between STP and STM , in D of the both. If you look at it … you have to see where the STM sits, the heart sits, look at the two main arteries which pass both sides. Look at where the energy comes to go through. Where you take two types of energy, one to the other. It sits in a position in the background of it, .. the neural system, which is a control of the system in the back. Then when you want to deal with it, you have to deal with this chap (STM) first. It's this what decides which energies of the blood which come into the brain.

The energies of the food which are passed on to the body, taken and control. Then you have to understand how deviation of the field flow, (2:18). of the within the arteries on

the side of the body .. controls it. It's more or less, the most important gland between the STM or the brain .. and the physical part of the body .. It's not just what goes, .. in it, it is so powerful, we have to, we have no choice, but to look at what fields it creates, in this region. We need to understand this. Because we only look at the physical side, we don't look at the energy, position of this (between heart and STM). Don't forget … glands are part of the brain which are put in position to do the job, because there is too much information in coming and going. they do the local job. It's too much goes in breathing, eating, emotions, everything which goes from physical life into the D of the STM and emotion.

We've seen this more or less, 100% ?? operate and are not allowed to speak, if they put a hand on there mouth, the attack has been in the position of .. violence, that they could not speak. Majority of them end up with a cancer in this gland. (2:20). 99%, if you see a Thyroid gland especially, when he can not speak a word, when he get the emotion of cannot speak, cannot be explained to the D of P, where the soul is aware of it. you have sometimes due to physical damages , but essentially Thyroid gland is a condition of the speech, .. the communication word of the man to hear himself. When you get an interruption of it, you get cancers of it, and other deviations and problems.

If you can sort it out, they grow back. We had a case of girl of .. 23 who was raped on the campus, overnight, walking and within 2 years she ended up with a Thyroid cancer and remove one of it, and the rest of it. It took only a few weeks, to understanding this, to elevate and bring back, and live a normal life. You have to understand why the glands are. Why do you take glands and you have to take them out. Glands should not be taken out, it should be understood the work of, and then allowed to.

Any other question. (2:22).

Q; .. The MaGrav in Vertical EU has been placed on the floor. Why was it placed on the floor, is there any specific relationship to the energy fields of the feet of the people ?

K- No, that MaGrav has a lot of functions, it's not just there for one thing. Has a lot of multiple applications and functions. It's part of understanding, it's not on its own. It's part of a system. This is the problem with the KS, they just see something, it's not, it's part of an integrated system. it has many functions.
Any other question

Q: .. Will we experience living longer than normal in this same physical body, how to keep the cage from rotting?
K- Find out how you can feed the soul, then you don't need a cage to feed itself.

Get another question from outside, I think 2 is enough, I have seen this coming up, otherwise it goes. (2:24).

Q: .. my doctor says that I have heart disease, cardiomyopathy because of psychological stress, and after many medical controls he says, that my heart is on a size limit, yet my

pain and fear are about the last 20 years world situation , what kind of plasma water could help …
K- We don't go into that Rick. we don't go into medical under no circumstance. Should we call it a day, as you have no more questions, our KS are becoming better and better.

R: questions .about Pl mirror and Gans

Changing Space Gap in Nano layers by Na or K Hydroxides

Q: .. Can you add Gans particles themselves to a NaOH, and KOH Nano coating, does it have to be only the Gans water? (2:26). What happens when you add Gans particles themselves to NaOH and KOH, N coating?
K- Try it, it gives a new D, it doesn't change much. But what it does, it allows a spectrum of N layers to be made. You change the field energy inside. Why you change N to K, because it's a different field effect. So when you add the Cu into it, you create a different isotope energy of the Cu. When you change the Gans of Zn to it, or CO2 to it, you create, new, Gans new .. N materials, space gap energy.

I think KS have a good understanding of this by now, but just to recap. When you N coat and you create the layers, this layer space gap, is partially dictated by the amount, the energy you created with NaOH. If you change the composition of the energy of the NaOH by adding another Gans, or composition of Gans's, now the what we call, the space gap changes to a new space gap. It's the same element, (2:28). but you brought different energy into game, into play. It's the same, but different D of energy of the Nano material will manifest itself.

When you go to make a Gans's, the space gap of the energy in flow is different than the space gap energy of the original one. If you understand this, this is one of the reasons we tell you, you cannot make lead or aluminum Gans's effective on the body of the man.

Any other question .

Q; .. is there any possibility of KF T with involvement in Ukraine to bring peace.
K- We have already offered the T if biochemical, or nuclear material are used in .. Ukraine to IAEA. In the .. communication to IAEA .. about a month ago, (2:30). we offered it to Mr. Glossi, IAEA, they are aware of it. the materials have been moved to Austria to support the initial strike if it happens. Email dated 4th of March at 11:48 to IAEA very clear, if the situation in Ukraine, nuclear power station goes to critical or leakage we are ready to assist IAEA, to hold and absorb radiation within the parameters of the site. We have given them the report for it. We have factory in Austria and can back up immediately with the materials needed. ?/ materials to control the ?/ leakage, and this goes on the same with submitting documents, with other bits with TEPCO, and cleaning up materials with a couple of governments which is confidential reports they have with, and plus other materials.

The situation with Ukraine is very clear. We hope it will not go to that position but we have enough materials to control and then support. We communicate directly to these offices, and WL and they know what is available when it comes to it and is there to be done. We are in position … (2:32). We are trying to do something with the Ukrainian leadership, but the more we go into it ?? we find out the guy is much more deeply involved in corruption, then all these nasty things done, than what it looks on the surface. It's become a cry of wolf, more or less, what we see. But we are there if anything goes wrong.

We announced yesterday on the Russian channel that we might be ?? people to be in Ukraine, or to trying to travel to get into Ukraine, to create that condition. We are still working on it. That KF T is part of the peace process, but we'll see. The people who have been in touch with us, we work through, if the position is very clear with the next 48 hours.
Any other question.

Q: .. if I travel to planet Zeus where will my physical body be, while my soul travels?
K- Inside your soul. Where does your body goes when you soup is in the restaurant. The soup doesn't go on its own, the body is inside it. Have you ever ?? sent your body for a .. food to a restaurant. or you send you food without a body. It's the same. (2:34).

Q: So do the units carry souls physicality's, that is manifestations of the STP?
K- Depending on their setting ?? for. In a Vertical or teleportation system we carry the soul, ?? not the P it's too difficult. In the deep space it's easier to go for the soul.

Any question.

Near Death Experience (NDE) (time : 2:35:15 to 2:53:22)

Q: Mehranez, … I have a question about the life for the phenomena of (NDE) for people who go to the other world and come back (Near Death Experience), ?? medically. They … talk about the wonderful colors, that there is no such thing on earth, they can never make it, and wonderful scenery, and they go around, (2:36). and they meet people all in telepathic communication. The question is, is it creation of their consciousness, these colors and the things ..
K- .. can you repeat.
Q: Is it the creation of their own consciousness, that creates these colors, ?? movement and going around, or is that by the D they are in, when they are taken in, has another kind of plasmatic creation, or composition, than our earth?
K- I am looking for something to share with you, you have to bear with me, then I explain this. I have to get to it if I can find it, take a screen shot and come back to you. We know the interaction of fields create what we call, new D, and new positions, and in the strength, we .. produce these interactions. When the, they call it near death experience (NDE), or some people who, due to other conditions of the blood, (2:38). they what we call, have changed the strength of their field. It's like when you go to the dreams, or when you go to sleep, their field strength changes. That change of field

strength, allows the STM to go beyond the boundary of the body of the man. In that process we dream, we connect to other things.

But in general speaking about interaction, and seeing other colors, we know if you are in the position of consciousness, or blood flow reduction, or at the point of no blood flow reduction, but still M fields of the brain are working. You can go through what we call, a condition where .. when the heart stops, the M field of the brain doesn't stop immediately, because it's still, even there, it still holds what we call, field strength. So you could be called, "physically dead," but in fact, the soul is still contained by the fields of the body. (2:40). This containment holds on.

So now you are in a state of .. half dream and half asleep, soul still has confinement with the strength of the fields of the blood, which is within the skull of the man. So in a way, if I revive you in that position, you are not asleep, your blood circulation comes back and holds strength, but your emotion, and the part of the brain, which keeps the emotion is still working, is still registering, till the point where the STM departs the P, man records everything, fields interactions, every other interactions, memories, images.

Now you don't have the restriction you had before when you were awake, or you were asleep, and this allows you to what we call, we dream of something, or we had a dream. You are still alive. Till the point when the strength field of the blood, drops below the strength field of containment of the energies of the soul, you are still active, you still dreaming, you are still there, but now a different field strength, you are still communicating connected to the outside world.

So in that process of the transition, you see different strength of the soul interacting, still with the body of the man's fields (2:42). within the brain. So the vision is still part of it, so you have a different field strength, interacting with the same brain, but now in a different strength of the soul, and different M fields of the blood.

So you see new colors, because now it is purely M fields. There is no motion of the blood. You observe new colors, you come to see new interactions of the plasmatic colors, not matter state colors.

It's very much we've seen this one in China when we produced the first cup for sterilizing, they saw new colors we never knew before, in paintings, in what you can bring out. Because now it's both the matter S and the Gans S interacting with each other in the M field level so you create new colors, new D. But as the brain is active, and it's, what you call the soul, is still active, and the only M field of the blood are holding on to the containment. Then you see 2 plasmatic fields interacting, and you see new colors, which we haven't seen, but in the space T you've seen this. The Gans's have colors you don't usually see in the normal life condition.

When we produced .. the sterilizing Cups, which we've shown before, we created this in China and they could see new colors. (2:44). The Cup has a pinkish color that we never seen before. What we call, this, opens a lot of things, and the book where we show the

Gans's for the first time, we explain this, that you see colors, which are not matter state colors.

So yes, they see new colors they never seen before, because now it is the plasma of the soul interacting with the pure Pl of the blood, in a way, and the brain, which is what is left. They see new colors, without a shadow of a doubt.

But if I jump in, and pump your blood, circulation, if it is not solidified in your .. blood vessels, then I get going, create a new M field containment, you come back to life, but your memory, your interactions, is real because you went through it. You went from the physical containment, to the plasmatic containment alone, without the circulation of the blood to carry the information and emotion.

So you are frozen picture, in a way, if you look at it, in a position where the fields of the blood, interacts with the fields of the .. brain, or the soul, and the memories of the brain are still working and holds onto the memories and understanding.

Maybe you see a mother, or an uncle, you were waiting to see for 100 years, or 50 years, and she is there, because now the field strength is different. This we understand fully.

If you look at the some of the cups we sell, you see odd colors in these Cups. They are not normal colors, when you look at it deep, it's the same way. You have a Pl of a Gans, (2:46). which is within the pot, within the clay and interacts with the matter S of the clay, so it creates new colors. Just look at the, just go on the KF website on the Sales, and into the Cups and see the colors you see there. It's very normal, now we understand the principle, the reason behind it, and how it takes shape.

So people who say they have been dead, you haven't been, because if your soul has left the body it's very, very, especially if the physicality has created to keep, what we call, the roof, the what we call, the spirit, has collapsed, then the soul is released, and you see people spend 10 - 20- minutes, reviving somebody and they come back, because with that push of the heart, pushing and pumping, you create that cage, you create that M field, which can literally stop the soul to be loose, to leak out, to what I call, take the flight of fancy, because there is nothing to hold it. You cannot hold it anymore, because the M field is not there.

Q: Thanks … most of them have a consciousness, that at the same time can see what the neighbor on the second floor does, what his father in the village does, they can think of something and they see that.

K- Because you don't have that boundary anymore as such, you understand, your soul travels deeper, further, (2:48). because the limitation which was put by the blood. **Our prison of our soul is our blood flow**. If once mankind understands this, you can do a lot.

This is part of the what I call, the EU. Not to interfere with the blood flow, but work within the structure of the STM, and the energies, are over the strength of the what we

call, the blood. If you can do that, you can create all sorts of conditions, all sorts. I can take you to a dream land that you can see your grandfather and grandmother, and have a food with them, and come back and say, I have been there, they are they. In fact, it's not a dream. We change the D of the strength of the soul, but in the strength of the grandmother or grandfather, and you connect to it, and you enhance it.

These are become reality, as we understand more and more. Because we will create machines for it, people will endeavor to do it, and we have all these magicians, who say, you know, I can connect you to your father and to the mother, and oh, they are talking to me. But in realty if you understand the knowledge, if you give it the destination, it will land in that destination.

Q: Last question, most of them, I think this is partly physical condition, but most of them see their whole life like a video, (2:50). going through them, and there are active of that video, from years (of age) 1, 2, 3 and at the same time, they are able to see the results to what they have done to somebody in later hours, like they have kicked somebody, and they feel what they have done to that person hours later, when he is in pain.

K- That's the connection of the fields, nothing you can do about it, it's the same process. It's a process, nothing you can do, because now you see the whole thing. It goes back to the point if you remember, I said, if we find people who have been in Jerusalem, at the time of Christ. If you put them in a position you talk about, they'll tell us exactly how Christ carried the Cross, and how he behaved on the cross, because they were there.

And I am sure in the future, not very far, many of the technologies developed, will bring that. We'll go into, you know now, you need the spies to tell you what happened, whose computers was stolen, what information was on it, we are going to release. You will go into the D of the STM, the RNA of the soul, and we'll hear what presidents plan, and to create what war, and how, and what was the outcome of it. It will be very, and I said, now we understand more about the T, you understand how realistic it is to create that position. We come to the point when we put the world leaders who claim, (2:52). like we had nothing to do with, we never created the biological labs, into the machine, and see the truth, their souls cannot lie, through the RNA of the soul. Then you understand a lot of things will change with this T. A lot of things will change.

Q: Most of them when they come back, they change their lives, they go the serving of people. They watched their actions, their thoughts very carefully, and they change to the ethics you are telling us, ethos of be careful not to harm, and do the serving of unconditional love, and they brought that result to change their life, after death.

K- Sometimes we learn from it. Sometimes we carry on with it. It's the condition of life we carry. (2:53:22)
Q: Thank you.

K-Trying to find a picture for you to show you new colors, when it comes, but if you, Rick goes on the KF Shop website with the Cup of .. Pressure, or the Sweet Cup, you the

colors, you see are not normal colors in the Cups. They are interaction of the fields of the Cup with the Gans matter state. But in the state of the body .. , (2:54). in that position is not a matter state, it's the fields of the Gans of the plasma of the blood. So colors are different, interactions are different. Read the book, it's already been explained, this, that the colors we see.

You see these Cups, the colors are not normal colors, and each one is different. We cannot replicate Cup colors, impossible. That's what I said to our Chinese team. The Cups you have dossiers, they want to create homogenous Cups. I said, it's impossible, because you cannot do this, because the fields interact and they change. There is no way we can give you matching 6 Cups in the KF. Everyone has slightly different colors, different shades and how the material have been .. used and .. positioned in it. You can try, but it is impossible. .. I will show you this picture.

This picture is taken of a Cup which is specially made, for a specific purpose to be used. (2:56). … This Cup is made in China, with a specific Gans combination. We've shown this before … If you see it's the same composition … but these colors you cannot find naturally, because it's an interaction of fields. These Cups have been made for specific .. sterilization. As we explained this before, is that .. you can go to a river fill it up, wait a few minutes or seconds, let the water settle, the half a cup, the top water you can drink it. It's more pure than any purification system we know. These Cups will be released .. in the future. It's tested …

The doctors can use this next to it, on the operating room, used the tools next to it, instead of being taken away, and sterilized and brought back. Drop it in, in 10 seconds you pick it up. This changes the whole health organizations in Africa, in 3rd world nations. The death rate because of infection, will ?? die. The doctor can take a cup and wash the wound, (2:58). with it, when he has done his operation. Then you don't get infections and death after it and all the complications.

This was done in one of the masters in potteries office ..
This is what the future is.

Near Death Experience - extra (2:58:48 to 3:00:50)

Now when you are in near death you see these colors, colors you've never seen. But comes from interaction of the fields of the blood, which is not circulating, but is still M, but the soul is still active, and the brain is still in-between and still recording. If I can bring you back by circulating your blood, you'll remember, because the blood was there, and the brain was there, and it's done.

One of the easiest way, which I always said, which is never done, when you have somebody, and you know you get the ambulance drivers coming and pumping. Just connect the blood pump to the circulation of the blood, and pump it. You'll bring him

back, faster then pumping, and all this electric shocks, and the rest of it. If you can create that circulation, you'll contain the soul.

Any other question.

Q: .. (3:00). Some people who did not have a good action, but nobody knew about it, they go there, they see these scenes ,which is not like that, the beautiful things. Instead they see things like what we know about hell, like the misery, very cold there, hot, people are crying, like that..?
K- That's the emotion of. That's the interaction of the fields, which with what they are connected to. This is what is with them. How they connect, and why is the soul connecting to that position in time and space. What they had to do with it. Or why the soul has taken that position to see such a condition. (3:00:50)

Can we have another question.

Q: … I bought the CO2 Gans kit … if I placed the plates horizontally. would it create something different ..?
K- It can do, yes. different isotopes.
R: ..

Producing Gans in used Cup adds those fields to it

Q: . .If I try to produce Gans in a previously used box to produce other Gans's, (3:02). will that give the new production a new field strength, which could exhibit different characteristics?
K- Yes.
R: ..
K- Because you have created a new D. There is something which KS been there a long time doing things, you see, when you use the Gans Boxes. You use the same box for a new production. you want to clean, it never cleans. The Gans's embed themselves in the structure, it's like a Nano layer, especially you see it in CH3 and CuO. You cannot clean the Box. So if you cannot clean it, means the residue of the fields are still there. Sometimes you don't see it, but because it was there. Mainly what is interesting .. . This is the wall of the container. This is the Gans's which physically we see attach themselves to it. But what happens when you wash these cups, or when you sterilize it clean it. .. you can see it very clearly, AA entrapped in-between. The AA creates the contact, (3:04). between the C-H bonds, and the C-H bonds of the AA. You get that oily texture feeling on this surface. But it is not anymore Gans of Cu, you have AA Gans of Cu. So now if I produce again, let's say, CH3 in this box. My CH3 carries the AA of the muscle tissue because it was ?? CuO in its strength. It's still CH3, but of a different strength. If I make it in a plain, virgin Box with nothing in it I have ?? but now this is what our purpose, the energy is of a different strength, even though is it still CH3. A different spectrum of the field strength is used.

Any other question.

Q: about making the Plasma mirrors, do you add Gans particles to the Nano coating. (3:06). and repeat up to 30 times?
K- no I cannot ..
R: trade secret …

Q: After an accident at work I kept my eyes bandaged for a few days. Then my eyesight and colors were different than normal, why?
K- There are different reasons for it … The position of the eyelid or corona can change, and that can allow you to see different colors. and D. This is why we see different colors as we get older.
vision angle changes so we see different lights.
Any other question. (3:08).

Q: … about nuclear reactors, man's body creates pressures, spitting of fields in the Ca to K to B12 which can follow would it be H …
K- repeat
Q: repeats ..
K- I am not sure what not so good Google translation of it.
K- Shall we call it as day
R: I would like to show a video ..
(3:10). Shows video of Iranian nuclear reactors…
R: .. for the IAEA people to have a good look at these reactors that they also threatened about.

(3:14).

K- I see Armand there
(3:16).
K- This reactor wasn't shown in public worldwide, But initially this reactor was shown for the first time on the 3rd of December 2011 in a public meeting in Ghents Belgium. This is where we announced to show the flying (car) machine, which they confiscated the nuclear material. We showed this … that was the time we asked everybody to put their cameras away, that nobody photograph it. It was not seen in public domain, but was shown in that closed conference. This is where .. (3:18). we said we'll show the power of this T very soon for what they did with us, the Saturday before, with not trying to show the flying . With in less than 24 hours of showing this the American Drone was captured on the 4th of December. to show the power of the T.

We speak with the power of peace, .. and commitment to peace. this T is there for it to be done. It's an amazing system. When we talk about nuclear reactor based, it's never been done before …
I have an ability through the structure of my body, I never used these remote control, fixing things (robots used to handle nuclear materials). Every nuclear materials in both reactors, that's about 400 sources are hand delivered. I don't get contaminated.

Contamination with radiation in my body is nonexistence. This has ability to .. share and deliver what it's set to do … (3:20).
radioactive ignition material. This has a dome … Armand has worked with this .. this carries 250 radiation sources. By controlling the radiation sources we can control which direction we want to go.

(3:22).

We can enforce which way to go, and if we design it .. in a specific way, arrangement .. to fly in this position ..
This knowledge now is used in the EU for flight, ..
This reactor is what Netanyahu used to sell that Iran has a nuclear weapon T, a nuclear space T. and now we don't even need nuclear sources, we can create cosmic radiation through at will. Again it is never taught outside. In a way, if you go to it, it doesn't exist. But if you go to initiate it at the time of operation, it is created. .. being born to a father near x-ray machines .. all that knowledge has been added up, how we can direct, .. strengthen, (3:24). different kind of x-ray machines to produce pass the tissues and the bones. That knowledge is embedded in, we don't think about it, we use it, knowingly and that field is created you use it to go from bone to tissue, I use it to create direction and motion the way I want.

(3:26). in a Pl T. It brought back a lot of memories. you see Yoko from Japan, Fukoshima, she went to do the first trials .. She flew back to Japan and tested in government labs proved the T …

(3:28). tests started and we went to 129 Tesla combination. These reactors were used to create a field flow in plasmatic condition ..

(3:30).

When you create Pl and the Pl is so much, that the fields are still there the charge is still there, or you see the .. light show ..

R: is there any sense to return back to that process … is it obsolete.
K- For us it is not obsolete, We learned ,,, huge from

(3:32).

(3:34).
at some point it disengages from physical rotation ..

R; scintillating He.
(3:36).

(3:40).

(3:42).
(3:44).
Shall we call it a day.

(3:48).

(:20).

K-
Good morning. As usual, wherever, and whenever you listen to this series of Knowledge Seekers, series of Keshe Foundation from KFSSI. We welcome, you back. And we try to, as usual share knowledge, understand why and to try to develop more understanding of the science of the universe, than the science that the man has. We have perfected more or less than knowledge of the matter of state, and now we have entered a nursery of understanding the knowledge of the creation and the universe.

Before we start teaching, there's a number of things has to be said. As of today, if you're especially, Portuguese, you have a direct translation on the Telegram in the background, and from next week, we'll have the other languages, (:22). if you are appointed by your organizations or by groups, the language to be there. You have to get in touch with the Keshe Foundation, and this becomes more automatic. Rick can explain that in more detail.

This gives us a new facilities that you get simultaneous translation, directly on the teaching, and gets recorded, and then you can add it, to it, or they can transcribe to it. We try to expand this, as the organization like telegram make these facilities available for us, to be able to use, to be able to reach more people in an easier way, and simultaneously.

On the other hand, today is the 14th of April, the day of Mozhan. And coincidentally happens to be on a Thursday. We celebrate this day, as the day of Mozhan, and it's part of the important part of the Keshe Foundation program in this space technology.

We have extended the knowledge and understanding in a vast way over years. If you listen to this intro this morning, and just look at the first title, the first images, it says Knowledge Seekers, number 270, multiplied by two, that's 400 and whatever, 540. So we're in 440 and something. It goes back 200, more than four years ago. We started teaching, bringing the knowledge of the soul, the existence of the soul, and how we are, how we can work with it. And we have developed it step by step over years.

This is part of the separation, (:24). between the past and the future for mankind, stay the citizens of this planet, or become members of Universal Community, by UFOs, or by understanding, the what they call, the hidden energies, the hidden source, within the man to achieve this.

Many people go back into understanding more and more, through the process of interaction. It's like becoming a marathon runner. You're not born a marathon runner, you understand what can bring you, and what you want to achieve? Then you train for it. One kilometer for a few weeks, for a few months, then two, then three. Then one day the training in the process of development, of developing the right muscles, the right breathing technique, the right whatever, with the right coach to train you how to consume energy, and release energy in different part of the race. You do your first marathon, and then you get that, what I call immense joy, that you achieve did, what was to be the man, to you important.

It could be anything, not just a marathon. Achieving, you want, you have worked for to achieve, be it the head of a company, you worked with 20 to 30 years to get to that point. Being, owning your own business, you develop the position, that you know everything, that when you achieve that point, you know how to manage.

Mr. Keshe able to leave body age 12 travel U (25:57 to 30:00)

The understanding of the work of the Soul of the Man (STM) is the same. (:26). It doesn't come just by teaching, you have to understand how to, the way it needs to be done, the way you have the understanding of doing it. Then be able to be humble enough, when you understood, is the achievement you made. Then you teach others and you perfect the process yourself.

How I can go out of my dimension (D) of the physicality, where I still can see the physicality. I'm aware of it, but I am free. I could do this at the age of 10, 11, 12 years old. By age of 12 or 13, I perfected the art, I can leave. I could see the physicality on the bed, I could see my physicality sitting on the chair. But it was there, I'm going for a trip, I'm going to come back. Exploring the depth of the Universe (U), trying to understand the position of the galaxies, trying to understand the movement of the fields, trying to see the hidden part which is not visual. This became an occupation, this became part of the life to understand the process.

What I teach you is not theoretical, is what I have been through. And I know a number of Knowledge Seekers (KS) who have achieved it, but they cannot take it further. When you are detached, when you sit above and you see your physicality. And you can do it day in day out. You can do it daytime, and you can do at nighttime. Just to see, to perfect, whatever happened this time. "Oh, one day, I nearly fell down through the, back into the physicality," where I didn't want to go, (:28). because I wanted to go somewhere else.

This is not theoretical teaching. This is understanding there's another tool. I used to wake up in the morning, and my father says, you got to go to school. How can I tell my father that, I already know, why am I going to school for. I got into the car and I went to the school. He dropped me off. I learned the knowledge of the man. Through the dimension of the souls, and what to be, I knew at the age of 12 or 13, I need to do, to be, what I was brought to me, for the knowledge of energy fields, nuclear. And if you meet anybody who knew me at that age, I always said, I want to become a nuclear physicist, because I knew, that's the way to break through.

They used to laugh, at the young boy, now it's finished, and I made it, I became, because my soul set me up that way, and when I look at the progress. The decision was made by the souls, I just followed, I just read the script.

We all have that capability. It's just understanding the detachment. Understanding, I, detachment is not, that I'm going to live like a hermit to be detached. No, detachment, the way it's done before, you go into exile, living on a stone for weeks, and going through hunger is over. That was the way people could understand. You can live the most luxurious life, you can be the most educated man, you can be the professor's, you can be the doorman. Understanding the work of the soul does not carry human paper certificate, and job description. It's you who has to educate. (:30).

And I always said, I never lived a poverty life. I don't live a poverty life. I live according to what it suits for me to be in the society, where we can influence. You cannot go to be the head of Keshe Foundation, where the old banger (beat up old car), with the jeans and

torn trousers, and try to tell the professor's, they just laugh, they become a lunatic in that. When you go dress as they are, more educated than they are, this is when they listen to you. This is the fear of what I call, educated, especially in the scientific world, because now they understand have no education compared to what you carry as a knowledge, in Gans's, in evolution of the science of the fields.

And how we can extend it, and how we can bring this to what we call, to the front. You let the others do what they want to, but if you're part, if your core, what I call, ambition and target is, to achieve that point, then you can travel with the dimension of the aircraft's, to get you the dimension of spaceship, or the soul, it's you who makes that decision. That decision made by you, will frame you to the life of physicality, in that position, until you are, till you become, till you are aware of the work of the fields of the universe.

I am told many times Mr. Keshe, you do this, and you do that. But I don't do. Whatever I have taught, (:32). I have done. Whatever has happened, is the way it was set to learn. As I said many times, we come to earth to learn the ways of the life of physicality, that we do not fall when we go to another dimension with the soul, in the dimension of physicality. We know what the fire does, we know how to transfer materials. So you cannot live in the dimension of soul, and say that's it. You have to understand what's the other end of the equation. If the soul energy goes in the dimension of the physicality, and then you become the holder of the life of the soul.

It's the same as the book number one, book number two, and the book number three, man has read the book number two. Now we are teaching book number three, and how you transmute between it. You cannot go from one to the other, if you don't have the knowledge. Man has gained enough knowledge from dimension physicality, from what we call, the spirit, the soul of the physicality (STP).

Now we have taught and we teach the dimension of the soul. This way, between your soul and STP, which is that ?? (line for) transportation, there is no messengers. There is no one to fool you. There is no one to take a message and translate it, and change it the way they want. With the new understanding, with the new dimension of understanding the operation of the Soul of Man (STM) and Soul of Physicality, which you live every day by it, which you don't realize, (:34). you have never realized, how close your Soul of Physicality, and the soul of your body works together in everyday existence.

Then there can't be any Mullahs, there can't be any Rabbis, there can't be any priest or any intermediary, because the only intermediary is you within yourself. This is where the Day of Promise has come, promise of the freedom of the man from the shackles of abuse in the dimension of physicality, poverty, hardship, or abuse in the name of religion, because now you can live in both dimensions. You are in charge you are responsible for it, and you cannot blame no one.

But you have to go through that training, to become a marathon runner. Once you get addicted to become a marathon runner, it's very hard to stop. Some people lose their lives

in the training, because they don't get it right, they push it too far. They somehow cut the lines, formation, and reality, and the fact of, ?? The beauty of it is we watch the marathon runners, New York, London, wherever. And we watch for two and a half hours, maybe three hours, seeing them struggling, seeing them joining, rejoicing to be the first to get to the end of the line, or the second or whatever. Well, at least I managed to finish the London Marathon or New York Marathon or whatever.

But what we don't see, is the day before, the week before, the month before, the year before, what that marathon runner went through, (:36). to get to this point. The training, the self confidence, the things which are put in front of him, the injuries, that he has to overcome, the failures that he has to, the things he has to sacrifice himself. Instead of going for a dinner party, tomorrow I have to run a marathon. Forget about a dinner party, that every family and everybody else is.

Easter - Crucifixion Christ (36:26 to 50:26)

This weekend, we remember the crucifixion of Christ and Easter in the Catholic Church, and the following week in Orthodox Church. What is the meaning of this process, that you just look at it, buy an egg, pull a tree, and some chickens and chicks under the tree, and put some eggs in the garden for children to find, or in Orthodox Christianity, boil some eggs and meet each other, and see which one cracks another head, on another egg to win.

But what is the real truth, which is lost in this process of Christianity, the story of the crucifixion of man. The conversion of the physical to the dimension of the Soul, and return of the soul back to physicality. Christ as a man went on the cross. He separated in that D on the cross, to the dimension of the Soul. He went from Book One to Book Three, using the transformation of the life of the man. And then he transformed back to a man, coming off the cross and walked away.

Man has taken it literally by word, but in fact, it's a teaching, what you have in book one, two and three, which way do you want to go? He completed the cycle in one day, (:38). and then he wasn't there. Then he saw through. Why wasn't he there? Because the Soul of Man took the dimension of P and became a man, and traveled across to North Africa into northern France and Spain. Sorry Northern Spain and France.

So, up to now, you learned it through mysticism. Now you learn it through the science and understanding and technology, that you can become that Christ. You can become the man, who can move to the state of the soul, to go from dimension of state of P, and from D of the soul, come to physicality.

This is what we say, the man with the knowledge we have given, has reached the status of the prophets of the past, because you can do scientifically, what was done as a magician, and became a magic, and now we celebrate it, and we do everything else. Tomorrow is Good Friday, and what happens by Monday, or by Sunday?

Or where have our priests, Pope's have lied to us, because they never understood. They never understood the point of transmutation. The crucifixion of Christ, the resurrection is exactly what you have in book one, two and three. Now you have the capability to do it scientific. You will have the Enhancement Units (EU) is being built. You have the teaching of the use of the MaGrav energy plasma direction. Everything has been given to the man. (:40).

So, in a way, if any of you Knowledge Seekers (KS) understood that teaching from 270, Knowledge Seekers program till now, which is 447 - 48, you could have done what Christ did. He understood how to go within the inner self, that the energy of the inner, which is the Soul of the Man is more powerful. The ?? (STM) can take the physicality of the man within it, and then become the light, and then return it back into it, and then become another man.

The man, the way you go from Earth, from now to moon, in a monkey suit, and then you still have to be in the monkey suit. Or you learn to go from Earth to the Moon, and walk the way, in the real physical life will be on moon, with the dimension of restriction of it, and live a life as a man of the moon, as a person who lives in the dimension of it. This is exactly what Christ did.

In a way, Keshe Foundation teachings is the teaching of what you like, as Christian to call, resurrection. In the world of Islam, you call it the return of Methi, which is a return of the soul of Mohammad. We had this teaching in physicality, we had the soul. And now, the Promised One is a collection of the return the Soul of Mohammad, BHN.

Not something else will come. The teaching of him will be, for you as man to understand the transmutation. (:42). In the teachings says, that man will have a complete understanding of everything, when you understand the transmutation of elements, as we said many times, but in new understanding and completion of knowledge of the man. Is when the man understands the transmutation of fields, magnetic fields, that in their motion, they become energy, and from energy they can become anything. We get a copper, we create Zn and gold from it. In a way, we do what happened to Christ, we take nothing, we give the Soul of the Creator (STC), and we make a gold out of it, which is the soul of the Christ. The same with Mohammad, and the same with the soul of Moses, but not the man as Moses

Then we come to understand, that the totality of the teaching comes to one point. We all come from the same sun, we reflects like a mirror, the beauty of that sun, but we do not become the sun, because we are made up of it, we are part of it, but we never become of it, become totality of it.

The teaching of today as it's Easter, what we call, weekend, is to understand the truth about the resurrection. And to finish with the dogma of lighting a candle in the church at a certain time, in Jerusalem, (:44). or somewhere, or as something else, or whatever.

We are not looking to be magicians. We are looking to understand the process of the creation. That we become citizens of the U. You transmute your physicality into the strength of the Soul of the Man, travel across the U, and on planet Zeus, on Mars, or wherever, you return back to D of physicality, at the point and place. You resurrect yourself.

In a way, we are familiar with this, but we have denied it, because we couldn't understand it. You call it a dream. In dream you are in presence of your Mother, presence of your friend, presence of somebody else who never met, you see accidents, you see gatherings, but how come? You allow the soul, which is in the dimension of the Soul of the Man to travel, and then get into parties, or get into accidents, or see what's happening. Then you manifest yourself there in a dimension of physicality.

How come you call it a dream, when it's a reality of life. We do the transmutation, we understand the process, but we never accepted it, that we have the capability of it. We need to be the marathon runner to be. What can I do? I want to see my brother in Washington, where I am in Tehran. (:46).

I want that, what I call, transmutation. I make that trip, because I want to, the desire to see my brother is so strong. I made that connection. I open the cage. I go to my brother, I sit down and have a coffee with him. Have a chat with him. Call him the next day. Did you have a feeling I was with you? Because, we interacted in the D of the soul. He says yes, I felt something, or no. Then you know the first yes, you have learned something. You desire to be rich, you work at it. You desire to understand the work of your soul, you work at it, but don't lie to each other, or to your soul.

It's not making a map. It's understanding the elevation of the soul, how to bring the energies, the fields of the universe to become connected to the STM. This is what we do in flight Enhancement Units (FEU). In some cases, many of you will go into the Enhancement Unit, your travel where you want to be, but the Enhancement Unit never moves from the ground, but you do the trip, because we allow, that elevation, that what I call, transmutation, reduction in the fields, of the what we call, the spirit, or Soul of Physicality (STP), that the STM is free to take this dimension. (:48).

In a way, if you look at the, what I call, the teachings of a few weeks ago, when I explained to you in the Linz Exhibition Center (EC), we'll send one of you, one person from this side, an object from this side of the bridge, to the other side. We're not ?? magicians, but what we are teaching. It's the evolution of the time for us, as some of us would like to be, but we cannot understand it.

But we become the tool for the others to achieve, what we have not managed to understand, that one day, from one time, from their experience, we receive the elevation to understand. We're here to serve, not to be served.

In a way, this weekend, or next weekend, if you understood, you have reached the station of understanding of the knowledge of the Creator, in the name of Christ, resurrection, the

evolution, the transmutation. You call it in the name of theology - resurrection. We call it in the name of science - transmutation. No difference. Man has chosen many names for the same process, and this is another one of them.

If you can reach in the dimension of understanding, The way you transmute and you reach the process of seeing your mother, seeing your father, (:50). who passed years ago. You can target the strength, the devotion of the Christ, bless his name, and meet with him. Because now, the cage of physicality is not buried somewhere. The freedom of the soul, is free to be in touch with, and to be part of, as part of the universal life.

Preparing to release T worldwide - funds

I do a lot, I hackle a lot in the past few months. Those have been very close to me, they know how we've been hackling to get everything sorted, that we create the condition, that we raise enough capital, that every man in every part of the world, has that opportunity to be free. I'm here to serve, does not matter what name people put on it. For freedom of the man, I'll beg and borrow, because man is physical and needs to be done.

Otherwise, we just put the transmutation system on, and we just chuck out tons of gold. We don't need you. It's the test of the understanding of the process. That's what I said many times, how much Knowledge Seekers, many of you in the background know, have offered properties, buildings, land, God knows what to the Foundation and I have refused. But when a need comes, I go to the Knowledge Seekers, and say, this is the need for what it is today. We haven't taken a property, that we sell today to be able to do something tomorrow, because it's a test for the soul. It's a test for the man, or for me to understand. I have to go through the physical condition to understand what the operation is, of the totality.

Many of you will come to the point, (:52). that it's it, "oh, this is what he meant." Now we understand, but at that time it wasn't clear, because you understand the need, the necessity for that to be done. Goes of the writing of prophet, we'll test the fire with gold (gold with fire). How much is the heat of the fire, that can melt the gold, We test the man with that gold. How much that gold was attachment, that will melt the STM to be detached from it, to become part of the understanding, and become the wealth of the, what we call, the universe and the man as a creature.

This weekend, if you are in the western world, and most of the … dimension of Islamic world might hear a little bit of it. On the Jewish, you cannot escape from it, in Jerusalem and the rest of it. The resurrection. In the later teachings it becomes by Muhammad, and the others - transmutation. The same word, the same understanding, but both for the freedom of the STM.

But now we understand what's the energy and the strength field of the STP, what we call the spirit. What we know, what is the STM. Then we can transmute between one to the other. Manifest here, and manifest there. We don't need to get in the car, we get in the D and manifest in energy and soul. (:54).

In a way, I understand this, because that's a nuclear physicist, I have to understand how we can change energy to matter state. The secret was, the hidden fields within the atom, within the electron. Because you can become anything, you can become any number, as long as you stay in the state of plasma (Pl). Then you decide to be gold, to be a cell of the man, to be a wood.

Then you understand the process of what we call, the emotion of the man. Then you go into the process of understanding that the emotion of physicality has a direct connection to the emotion of the soul. Then you have to be able, how to transmute between the two. And how to benefit from one to another. And how to be part of the totality, where you're there to serve.

The Keshe Foundation in past six months has gone through a huge burden, has taken a huge step, and we tested those who are loyal to the name of their soul, to the limit, that we can get this achieved for the whole of the human race, that we can, step by step bring the totality of the man to ?? to understand, to elevate, to change. Because when we change one, the others need to change. (:56). But we have to have the resources, that it can be done, and is strong enough to do, to bring that change.

I carry the Soul of the Creator (STC), and it's strong enough to do. But you have to be there to tap into my soul, to receive it, to elevate, to understand, and become the passengers of the U, the way we are.

Then we all reach the state, that we can understand the strength of the love of the Creator and no more. Which the love is the condition of giving. We don't ask you to go and burn candles, and do this, and the rest of it. Go and understand the knowledge of the creation, as much as we can teach, and you can understand, as we develop new T in the coming times.

We are the Messengers. We are those who bring the message of science and ethics together. And in that process as universal Messengers. We understand the totality from A to Z, as we are part of the Soul of the Creator, we understand our position, as we are part of the Soul of Physicality of the man, we understand that position too.

But we can transmute, we can bring knowledge in pieces, that man, and the other citizens of the U, when they come to the point of creation of existence, can go to it directly, and do not need to go through all the rigmarole the man has been through for billions of years.

In a way, we have brought a unification to the science of the creation and the Creator. What was the knowledge of the Creator, now has become the knowledge of Universal Community. Even though each village, each satellite, each planet, (:58). has created, developed their own knowledge of existence and live by it. Some jumped further, some jumped less, some understood, used part of it and still got stuck with it, but they never

went to the next step. They got stuck in the UFOs, they got stuck in the ships, cars or, whatever.

Then we come to one point. How much in the past teachings of the dimension of physicality, in the dimension of the energy fields of the U, you have educated yourself. How much you have understood, that can go to that point of transmutation? How much you can sacrifice, how much you can give, that allows the others to reach elevation? How much you have to let go, that it comes to the point, that the totality, what we call, the freedom of the man's soul, that it becomes more important than individuality.

And that goes back to Abraham, and the sheep, and the sacrifice. The son for the ?? theme of understanding the beauty of the Creator. I sacrificed a son, (1:00). and don't expect much. But I know the freedom of the man to be able to be released from the shackles of what we call, those who have shackled man to this planet in the name of religion, had to be broken, had to be opened up. Sacrificing a son was worth more than it. Because I know he will be with me one day. But that day is the day when it is right, when it is time for it to be, not when I choose.

As I told you, we come here to understand the pitfalls of the man. The pain, the crucifixion, with the martyrdom, with whatever. Then we understand what the solution to it should be. It's the same for every level, till we don't understand it, till we don't feel the emotion of it, we cannot find a solution for man to be freedom, to be freed from the shackles of abuse. Then you understand, what is there for you to achieve, what is there for you to find elevation, not for us.

As I said many times, (1:02). you shall not find what I call, temples, and churches of the KF. You'll find Institute's of the KF to teach, to elevate. You find the technologies of the Keshe Foundation, that you can use to understand more and more. One day you pick a cup, you drink from it, which is made by the Keshe Foundation technology, and that triggers you to understand the process of creation. That's why we do everything else, while we are developing, elevating the STM, by putting back what this planet did not provide at a point of inception.

Through its M and G fields, through its Inertia, there is a misconduct of the work of the fields, and has made the man to kill, has made man to destroy. We cannot come tomorrow and tell you, that this is what you have to do, you have to learn it yourself. You have to believe in it, and you do anything to get to it. Because that elevation, when you see the change, when you see what it brings, then you bring the others into it, and then without knowing, by drinking the waters, you elevate the STP, and the STM, and then somewhere down the line, out of nowhere, you come to the point of understanding the enrichment, and understanding the Creator and creation, and transmutation. It can be in the deserts of Africa, or in the most luxurious buildings in New York. You need to ?? start.

I remember when we opened the Keshe Foundation in Ghana, in nuclear center in Ghana Atomic, and when you start producing the waters, (1:04). plasmatic, whatever, whatever,

whatever, and people start by word of the mouth to understand, that these waters can help with diabetic, can help with this, and can help with that. They tested and they worked, and they came to buy it. And the soldiers in the nuclear center, they became aware of it, because they used it. Most of them have diabetes, and they saw everything (all symptoms) goes. What happened, nowhere in the world, you can walk next to the nuclear reactor, in a security zone of any nation. The soldiers of Ghana Atomic opened the doors, and we could see a man, and a woman walking like an ants line, to the center, to buy a bottle, to buy a Gans of whatever, to go back, and then there was more coming.

We had to do that in Ghana. We do that now, in the exhibition center in Linz. We have opened the doors for the knowledge and we have knowledgeable people. Maria is there, Herbert is joining in to do. To transfer the knowledge to you, to understand the totality, not bits of everywhere. When you go to one or two hours of the, what I call, the exhibition understanding, you'll understand the totality of the meaning of the knowledge of the Keshe Foundation. Does not matter who you are. Then you understand the time for change has come. And then you understand the next step is to come.

The coming of the Methi, as is believed by the, what I call the learned Iranian clergy, (1:06). will be the maturity of the man to understand the process of the transmutation, not the manifestation of the man or an object. When the Ayatollah K of Iran., when the clergy of Iran, to understand this comes, that will be the day of the judgment for their souls, and nothing else. Then they'll put their turbines down, and bow to the knowledge of the Creator, not to the Keshe Foundation, not to Keshe, and not to any other, but to their own soul.

The maturity of the understanding brings the peace, brings the next process. And we do everything, for you to do that. You Knowledge Seekers every Sunday, spray, paint, whatever you do at 12 o'clock, lunchtime and Six o'clock dinner time, that you bring that synchronicity, that you bring all the elevation of all the souls. And this is part of the same process.

We make the enhancement centers (EC), we make everything else. We have to do, we can't sit down to die, one day you're going be dying. There is no time limit when you cannot work. Age of 60 - 65 retirement is a joke. This is where the most of the maturity of the knowledge has come, and you put men on the bed of death. There should be no limit when the man stops contributing to extension of the physical life, or the soul.

It's the same with Vatican. Vatican retires the priests at age of 65. Don't pay them anything, and the pension starts at 70. Where do these poor priests, Vatican, going to find life for the five years, till they get pittance from Vatican. (1:08). Abuse their soul, to abuse the others, than abuse their physicality. Then if these priests understand the process, what we call, most of the clergy in Vatican, are in the same dilemma. By age of 65, or when they are exempted, they are put on the street, because they did not abuse enough souls.

We know members of the what we call, Vatican, who are in that position. They come to the Keshe Foundation begging for financial support. Because they have decided to put them on the street. What do you do with a man who has served for five years, while is from the 65 to 70. The abuse is not just by the physicality, they abuse their own soul, within the what I call, the frame of Vatican.

This is the whole process to understand. Maybe today, this weekend, give from your soul, for the clergy, for the religious people of the world, to become aware of their own, dimension of their own existence, that they do not need to wait for somebody to call themselves Methi, or Messiah, or whatever. But they become to understand, the strength of the Soul of themselves that they become the Messiah of their own soul.

The beauty of it is, (1:10). we are just messengers. We spend time, we give our message, we make sure the guidelines are observed. And then man wants to see, that the cycle of physical life finishes. So we die, in your eye, but the soul, the same soul carries from Moses, to Christ, to Mohammad, to the others, and to you. And to wherever it goes to the next step.

So, we understand one thing, on this weekend, we had this discussion before, for Easter. Maybe now you understand more, use the science and technology, as they said, in the intro, we have published a paper, that the station of the scientist and the prophets, it's the same, as one. It's explaining the connection between the fields of the universe and the man you call it the soul, the ethics. One which does on the matter of state, but increase your energy, and creates you water, and makes you the food you eat. But in essence, now the two are the same. The feeder of the soul, and the feeder of the man is the same knowledge, is the same science, it's the same message.

It's you're who has to understand it, and bring that change in. We'll bring that change into process this year. We are without a shadow of a doubt. Then it's how much we can change the situation. How much it is.

Keshe Foundation has directly approached the Israeli authorities to start peace negotiation with Iran with a full knowledge of the Israeli government, (1:12). and Israeli .. organization and with the knowledge of the Iranian authorities. Because we are taking the knowledge of the Spaceship into Tehran. Iran .. Iranian forces can land in the center of the Tell Aviv without them knowing.

We are, they say against the regime, but we support Judaism. But where do you find those who make the framework of the Government of Israel, unless we give the knowledge to both sides, that they can bring a point of understanding. There is no need we have the same knowledge, the same technology, the same understanding of transmutation. So what do we do?

This position has become easy for us, due to 5plus1 talks, that we have managed to break through. But our job is to be peacemakers by understanding of the technology, not by giving technology to somebody better than the other. When the Americans, the Iranians,

the Russians, they all know. They all can be across anywhere else. You can transmute all your what we call, dust to gold. What are we fighting for? Do we need a situation of Ukraine? Do we need the situation, what we have in Palestine? Do we need to have the hungry people of Africa? Or do we change the tools of war by understanding the transmutation of the elements, what Christ went through as, what I call his sacrifice. (1:14).

In a way, its theology behind it. So crucifixion, and a manifestation, to feed the soul, to feed the physicality of the man, in the hunger driven society in Africa, or South America, or on the streets of New York, when they clean the bottom of the rubbish bins to find scraps that they can eat.

With the knowledge man has today, with what we see created, and developed, and encouraged, by those who abuse the man of physicality. There should not be such a position. The Keshe Foundation shall endeavor to bring that situation to an end. We do everything in the background, even with our enemies not knowing, we elevate their souls, that they become those who work to develop, to bring, knowledge to the others.

Within my power and knowledge, I can wipe out the state of Belgium in one pen, but do we need to, have we done? Because they have to be elevated understand. They are another part of the human race, be it the king, be it his servants, be it those police officers who do all the wrong things, be the agent who lived in the same bed with us. We just elevate their souls. Otherwise we can demolish, what we have from them. It' the love and the care we have for them. (1:16). It does not matter what they do. What do you do when you have a child, when you take her out in the shop, cries and kicks, and destroys things in the shop, like a bull in a China shop. You take her out, and talk to her, and then see what damage you've (she has) done, what it needs to be done, how much I have to do to repair the damage, you've done.

We do that out of the love, because I can bash your head in, as a father did, we see it in most of the Italian places. The children are not that, what I call, punching bag, that the Italians do to the children. And the rest of the world do with them. Our teaching is about love and care, to bring man to the point, he understands not what to do. Doesn't matter how much the child kicks, and shouts, and breaks, gradually, it comes to understand he is damaging himself and nobody else.

I hope many of you managed to reach the point of resurrection. Maybe in theology it has been put on the December (April) Sunday, and the strangest (thing), it always falls on a Sunday. And then we understand, if man managed to control everything ?? we believe, on a Sunday, that it happens, then can manage to move, that day, to be the Sunday for his soul.

I hope, I hope today, I could bring you to understand, a part of what is your responsibility to do. Not ours. Because we've done everything. (1:18). We taught as much as we can. We carry on teaching in different ways, till we get through, and you find the freedom.

I don't live like a hermit. But I'm hermit, that gives love and knowledge to humanity, to take, to elevate itself to the position of the understanding of the creation and the Creator. I have been that hermit for thousands of years on this planet, my mission is over. Because now we have managed to bring men to see. You might see some today, and some next year, and some next week, and some in thousand years.

But we have started the process, and in time the knowledgeable man on earth through the knowledge of the Soul of Physicality, we'll finish the job for human race, and become messengers of the universe for the others.

Thank you very much for today. And I hope those of you who are believers in resurrection of Christ, understand you have the same capability, that soul of Christ did. You can resurrect and move in both dimensions. It's you who brings, you to that point and not a MaGrav, and not a donation, and not burning a candle, and not waiting for somebody to appear in whatever name, that they can for you for the next job.

I hope those of you who are believers in the path of Christ, a very peaceful, and wonderful Easter holidays, and maybe it comes the time for you to contemplate, to create that change for yourself. (1:20).
Thank you very much. If you would like to go to a break and we come back, we carry

Proofed to here >>> continues on

>> BREAK >>>>> 428 KSW April 14, 2022 (1:27).

This is the second half where we have a q&a questions for Mr. Keshe.

(1:28).

K- Yep. Yep, we can bring it down, though. I lower my hand. My Soul asked the question and got the answer. Anyway, let's see where we come and what we do?

Q; .. In the 425th KSW, a Knowledge Seeker ask question about the emotions of the Soul of Man, and the Soul of Physicality (STP), and how the heart translates the emotions of the Soul of the Man. But we have both souls and they need to decide together. So my question is, how can we discern if this emotion is pure from the Soul of Man, like a communication affirming the truth, or from the Soul of Physicality, where it may still have errors and confusion, because of existence on this planet? How to perceive this difference?

K- Experience. By experience. Man up to now has always listened 99% of the time to emotion of physicality. Because he can respond to it, he can live with it, he can understand it. Every now and then the emotional, of what we call, the soul come in, and done something, and then we call it, "by accident." Something happened, because that we cannot explain, (1:30). because it wasn't part of the emotion of the P.

Wherever you say, "Oh, this happened coincidentally," or you, just by fluke. Go back to it, and see if you asked that question from your soul. Then you'll start opening up to understanding, which one, is which. Would all become the same?

This is the only way you can do it. Every time you say, "oh this something happened by accident," go back and analyze it. Where, how, and then you see the connection to it, then this must be the soul's job. Then you become more and more reliant, and the more and more you develop it.

There is no accidents, you're put in a position and in a way, by your soul, by the conduct of the fields of your life. Then you have to live with it, or you have to understand it, to go to the next step, to be able to understand more the process of creation.

Many times, one of the processes, that we talked about this very recently, why do you sneeze? Where does the energy directly go from the nose, passes where, and what faster reaction you can get. Some ?? theologist's understood this, but you go to the doctors and they try to explain to you, and everything, how the nerves work.

How come suddenly you stop and say, no? Something stops you from doing something. How come out of nowhere, you start doing something, (1:32). which is opposite to what you've done your life, or what you do? Because the soul has taken over the decision, that's for you to see.

You have to understand it, and then develop it. And then you understand, which one is from the emotion of the physicality, and which ones from the emotion of the Soul. Gradually, you leave everything to the dimension of the soul. Everything to D of the soul, and you go by testing and testing.

We go through the same process. Then you understand how souls work, how things come. We had an occasion this week. Within one hour, one of the members of Universal Council (UC) was aware of the action of the Keshe Foundation, what we did in the background. We said, this is amazing, in less than an hour ago, we did such a thing, and you come out of nowhere. Because the soul is aware of the function of the Universal Council, as a soul, has taken its dimension to accept responsibility for its language, and for its nation.

Then you live that way. You go by it, and things, just building a trust. What Keshe Foundation has gone through in past six months, eight months, if I would have been the way, that I used to run, in the business time, 20 - 30 years ago, we has a ?? harsh track at

that time. But no, I learned through the structure, that's what the soul, when the time comes at the right moment, it will complete.

The people who get tested along this way. It's been a harsh time, but a beautiful time for the Keshe Foundation. (1:34). But only one or two people who are close know. We done everything to bring that change. It's all by trusting in the soul, trusting in what we do is for betterment of humanity, not for us.

You rely on it, you understanding it. This is, "I'm here, I have a physical life, " but my job is what I have to do. To support, to be the instigator, to be the initiator, to be the developer of that condition, to bring in, at this moment in time. The Israelis, are on the throat of the Iranians. You mention Iran to the Israelis authorities, that's the end of the world. You speak to any of the Iranian clergy, whoever, about Israel, this is the end, you give our biggest enemy.

But when you elevate their soul, they will eat on the same table very soon, because they came from the same table, power and money, and what we can do, has separated man. Soon they'll become wise to it, and they walk away from it.

But those who are, and they see, in the middle, it's their responsibility to make that initial step, to bring that change, even though it may look so harsh. It's one way of working and trusting in what you do.

When it happens, so it's not time for it. So there's no restless life, it's not for me to put another something in the bank, or get something else. It's not time for mankind, he is not ready for it. (1:36). But we know he's getting ready for it, he's just coming to the last leg of it.

And a lot of Knowledge Seekers are standing fast, they are aware it, they are suffering with it. But ?? this time, because they know it's just about to come. Be it in China, be it in US, be it in Mexico, be it in Brazil, be it in Austria, or Iran, we all who run and work for it, are standing fast. Because we know when it comes, it brings that change.

There's so many opportunities has been created by the war in Ukraine. You're not aware of it, because you just see and listen to what propaganda comes from the western world. But if you watch the way we do, there is so much, so many opportunities in different directions, has risen by Ukraine position. I look at it as a positive step. I know of some people are suffering, some people are getting whatever.

But in a way, it's the end of the battles of the religions, within one religion. And again, has brought what we see, hidden ways of doing whatever it is, blaming the others to do whatever. And it's not going to stop. The change in administration in the Kingdom, United Kingdom is necessary for world peace. Because the ?? privy Council, and the British government as a kingdom of Britain, is instigator of many wars. But it has to be done from inside. And it has to be done. The way they step back on. And it's in the process, has started, as we know a long time ago.

We have to understand what this position brings us, end of kingship, (1:38). the end of anybody being higher than other. You be Putin, you do wrong, you are committed to, what is to be right by the places ?? ?? the instigators in the White House, that underneath you burn the ?? fire. All has to come up. It's the time of cleaning up. And then we'll see the positive things, which will come out of the Ukraine situation. Amazing things, especially the way we work, and we've seen it. But I always say, we trust it to the soul, that always is there, because it cannot make a mistake.

To a lot of us the situation is, don't. And it's there, something of what these guys, if they (?? don't) clean up, where it's getting cleaned up in Ukraine. We'll have more and more of this in a few years time. Battles of who is more, who is less.

I pray for the soul of the what I call, the leaders of Vatican, that they come to their senses. And the same with the Church in Moscow. But that praying, does elevating their soul, has to bring them to announce, what I call, the end of Christianity. We'll see it. End of Ukraine situation will bring Christian wall to that point. You will understand very soon why.

The same as ?? ??? Methi it all has happened, had to happen within the frame of time, that they all come to the same position. That's the time of the maturity of the man.

We don't want, by process of trusting the Soul of the Man, to overnight, to declare, and just change their name to another, (1:40). and carry on with the abuse. We want them to close to church doors, that nobody goes in to be abused, and leave the mess they created over centuries behind those doors.

The way we saw when the Church of England start selling the churches. The physical abuse of the man, which came forward was unbelievable. I was in it, we were the first people in frontline with it. Buying a church, and they don't let you to do, to demolish it, till their own people demolish it, that the number of children's bodies buried within the church, cannot be shown, that how much abuse was done.

We were in the front line, we saw how Church of England had to change position, not knowing, that this is what's going to happen to them. As they didn't care anymore, because Church of England was returned back to Vatican, that was the shame of what we call, the Protestants, not the Catholics. They managed to somehow, keep it off the record, but it's still there. And the same will come with the other things, and how it is.

We cannot go on abusing the Soul of the Man in one way, and the STP in the other. It has come to a point of change and there'll be ?? no more from this side. The only way become, when mankind understands, which soul to listen to, and why, the reasons.

When you're hear you have to do something, then you judge it, and you understand why. We are all part of the same process. But learn one thing, if you listen to Soul of Man or the Soul of Physicality, always ask, because you have to ?? develop the consent of the

others. (1:42). If the consent is given, you have done no wrong. Even though it might not be to the benefit of the others, because they are the ones through their own process might see themselves as the losers, but the same part of the process of the development.

Even you want to ask, ?? you ask, then you understand you always work in the right way, the right ?? .

Resurrection Continued how Christ did it (1:42:37 to 1:46:54)

You have to learn, it's the process we all learn slowly, slowly and become to understand it, and you trust the soul. Sometimes the STP, because it knows physical D and sometimes the STM ?? and the position of the totality of the physicality, ?? structure of the bigger structure.

This is what we have not understood. The Soul of Physicality is to protect you in the physical dimension. The Soul of Man is to protect you in a dimension of the universe. The sooner we understand this, the sooner mankind, will be free and understand how to position one in respective to the other, in what position, and what condition, and when, then we will become mature, in the process of what we call, transmutation, or what you call, resurrection.

Christ could have walked away from the cross, but he knew he had the power, so let them do what they like, because I know what I am going to do. I went up the cross with the Christ, I know exactly what happened. I know how the transmutation took place, and how and where, how the things ?? touched. (:1:44). The body never went missing. Christ went through the D of the STP and the STM. Because he knew, he was taught.

He became of that knowledge just prior, what you call, the last supper. The knowledge was not given to him, till the last minute, more or less, because he was a very joyful chap, and he always thought he would get away with it. But when it came to the point of what we call, the resurrection, or the call it a transition. The knowledge was given to him and was told he can use it ?? balls.

The last time, the last Supper, if you understand it, is the last time he ate as a prophet. That's what the Last Supper is, not the last time he ate with his people. You always put it to a definition of something else, because then it has a meaning. Because it was a time when he left the body of the man, the last meal as a man, as a prophet. And when he came down, he became a man, and he took his ?? path.

Now maybe for the first time you understand what the Last Supper means in the D of Christianity. Nothing more, nothing less. The rest of it is, what you like to talk about? It was the last time he ate as a prophet of God, and that was it, it was the last supper he had, and he walked into it, and he was fully aware. He bargained for it, because he loved two women. (1:46). It was given for the love he had.

Maybe now you understand all these hullabaloo about the last Supper. He accepted it, because he knew the dimension of what he'd done, was beyond the dimension of acceptance, by his soul. He didn't go through the path, which Moses went, and start all sorts of wars and killing. He decided he'd done enough, he brought the change he wanted, and it's time to live, and transmute from one to the other. He listened to his soul, and the Soul of Physicality, and he took that transmutation. What do you call, whatever in any language. (1:46:54)

Any other question.

Q: … My question today refers to the "born again" Christians, who I assume have an experience of their own souls, but many attribute it to another soul, such as the Christ, or Krishna, and others. What are your thoughts on these experiences?
K- I never understood what the reborn Christians are. Who came up with this terminology? Then we have a reborn Jews, (1:48). we have reborn Muslims. If you can be reborn in one religion, you can be born in any one. And as we know, they do what they want to say. But what does that mean? What is actually, not the physical process, the soul process of it is? The soul doesn't get reborn, it's the same soul.

Somebody because of an experience with, realizes in an accident, that he can die, and he hasn't said, or loved his wife, or his child, and he comes home, because of the accident, he becomes the best father, the best husband in the world. Isn't that a reborn husband, or a reborn father. Or he needed that experience to realize what he'd done wrong? And what name do you put out?

How many of you have been through that process? I am going to go home and enjoy my family, and say whatever, whatever, because tomorrow might not be there. What name do you , in the name of the religion, become a reborn Christian, or in name of your wife, you become a new reborn lover, or in the name of your child, a new reborn father.

It's us who have chosen, whatever you like to do it. It has no meaning to me, it never had. It's just that you go for the second time to be baptized. Why does that happen only to Christians? Or is it a very good way to get some more money to the church, because now you go and you pay again. It's a business world, (1:50). when it comes to these things, but it has no meaning. I don't understand it, I never understood it how you can be reborn. You already just, because he experienced something, you become a reborn husband. Because he didn't know, you become a reborn father, because you jumped an accident. Are you going to be a good father, that might not be there tomorrow, fear of fear.

Any other questions?

Q: …. When I was a teenager, I used to get together with two or three cousins to make objects move, and answer questions through those movements. For this, we used a table, a glass, letters and numbers arranged in a circle on this table. Before we started, everyone would hold hands with each other, and do a minute of meditation. Then we started the experiment. It was as if we were talking to a soul, and that soul responded by moving the

glass. Based on this experience and considering that every human being is a MaGrav, and what we were doing was connecting these MaGravs in a stellar configuration.

My question is, one, if we make three MaGravs and connect these MaGravs in series, the M terminal of the first connected to the G terminal of the second, the M terminal the second connected to the G terminal of the third, and the remaining terminals G of the first and the M on the third, hold each one with one hand, thus forming a stellar configuration. (1:52). Will I be able to create these forces, or will I be able to integrate my soul with the soul's of the MaGrav, and travel through the universe through the soul, or through physicality with this system?
R: It's pretty long question, I don't know if you got it ..
K- Oh, it's a very simple question. He hasn't understood the purpose of MaGravs. Very simple. That's why it's half energy and half matter, and because of not understanding, looking for an answer from us.

Do you need a wire to connect MaGravs? Do you need wire to connect magnets on a table. What happens if you put three magnets on the table, and one magnet in your hand? Move the magnets outside, and see what happens the magnet in your hand. Or move the magnet in your hand and see what happens to the magnets outside. Do you need the wire connection? Do you understand the true purpose of the MaGrav system, then I think you'll get your answer.

R: I've got a perfect little video, that I found the other day, that I made, that I forgot about. Let me share it here that might illustrate what you're talking about with magnets, actually. (1:54).
K- You used to do a lot of these magnet things.
R: This one is with, as you can see here, it's a series of flat magnets, and 4 of them in a group to form sort of MaGrav shape with the three o the outside, and one in the middle. And there's four groups of these, and one of them is in the center. So I'll just play the video and we'll see how it goes here.
(Shows the video ..)

So that's it basically it, there's a couple of different things going on. As you can see the first configuration with the magnets in the center, is like the MaGrav configuration in many ways. And it's like the free plasma in the center, you could say, or looking at it as four different points of the tetrahedron, depending on how you look at it. But in any case, you can see the positive positioning of the of the way the configuration holds that center in place there. And but then, if there's enough agitation that goes in, it releases that configuration into a lower energy configuration, with the four units all on the same spacing, (1:56). and they maintain that position, and that gets agitated even more, then ends up going back to a an even more lower energy example as the tube, or the lowest form of its energy, you could say.

K- Yeah, it depends how you, you see this is still matter state connection. MaGravs are not matters state connection, they are field state connection. There is no matter state condition to them. And this is the beauty of it. And this is what is important for us to

understand. There's a difference between matter state fields, and a plasma state field. We have converted with the MaGravs, the matter state field into the plasma state field. We have seen that, none of the Knowledge Seekers understand this. It doesn't matter how much we push it.

And this is the problem, part of the problem of the understanding of the T. Once you have a matter state, matter, when you have a Nano coated, you have moved into the cosmic direction fields, and a matter together. When you go into the Gans state, you're in totally plasmatic condition, in universal condition, but on the influence of the Inertia of the fields of the planetary system. (1:58). Knowledge Seekers have not understood this, especially creation of the Gans's.

I am sure in the coming time, scientific world and KS who come from the world of universities, and the others, in a very short time, will open this in a massive way. Because when they publish a scientific paper about it, then because it's written by a doctor, or a professor, and somebody who has got a PhD out of it. We can accept it. But they don't trust their own intelligence, and understanding.

Something I have to say here, to our KS. Our KS in Finland and Germany and other number of places around the world, have contacted the Keshe Foundation in respect to what we do, and what we are. What we can do with your groups of Knowledge Seekers scientists. Keshe Foundation has looked into these structures, we are still looking into these structures. And soon we'll announce what we're going to do with this kind of bunch of scientists, who are sitting grouped together, and they are developing different, or they want to do different type of developments in different aspects of technology.

You have a big group in Romania, you have other groups in US, and Mexico, and Brazil. We'll bring you together in a very specific way. We are discussing it recently with some of the key members of the Keshe Foundation, that how we can, or how we see to bring you Knowledge Seekers together, (2:00). to work, but still be independent of their own nation or language. We have a position now we, because we are analyzing step by step, or whatever can happen, or what can happen. We can send you MaGrav, or EU, or flight EU to your country, and then you have to find universities, or whatever, and bring in the scientists in to do, and then what will happen to this system, sitting somewhere till somebody makes a decision.

We are looking at the possibilities of opening our Institute's, part of it to the nation, by national language, by nation, to be part of, to do the research collectively, in one place. Scientists from Denmark, scientists from Germany, scientists from Brazil, will be given opportunity, will be given a unit each, and then, it's for them to collaborate development with others outside. They can come and go, like CERN, You can come and spend a weekend, or two days, three days you are there, to complete in what as a group, you decide to do and share it with others.

This way, you will still have the independence of knowledge, you can go to your scientists, I'm going to Austria, or I'm going to Brazil, I'm going to Arizona, there's a unit

there belongs to us, and then we can share, we can take or what we see. And then we make it a place, that every unit gets used, .. integrated together. And even on the background of it, if you have a Knowledge Seekers, who are that good at it, we can some sort of help you to do, that .. transporting, coming ?? alive, and going ?? forth or whatever, till we see ?? (what you are doing).

This way, the Knowledge Seekers in one place, will share the knowledge, even though they work in independent direction, (2:02). We have a collection of 10 or 20 Enhancement Unit in one place, where the knowledge can be shared freely. Till when your government, or ?? officials of your universities come to accept it, then we can take the unit back to your countries, and the rest of it.

But this way, we allow the process of the development be by the Knowledge Seekers, and other scientists from universities to come into to share. We are considering this position, and this is one of the fastest ways of sending a unit, that somebody will accept it, the investment. We'll still carry on with the government. But your units, yeah, they can come and see, they can analyze it, and whatever it is. They want some more units, or one unit, it will be done.

But this way, Knowledge Seekers and the scientists work together to achieve, what you call it, ?? this plasma. We are now developing, we are in the final phase of developing the reactors for the spaceflight for the EU. This process most probably will complete within the next few weeks. And then there'll be placed in the what we call, flight systems, in April, May to be ready for the first flights in June. Part of this work is to bring the Knowledge Seekers from world institute's, and the KF KS to work in this manner.

I hope our teams will put the last touches to the flight system in the next few weeks, then it will be what you call, placed and shipped. Then we will do the next phase of the flight testing for the 6th of June as we promised. And this process we will carry on, will be developed, and we'll see to what extent, (2:04). we can manage to what we call, push the KS to work with the universities, and institutes inside the Keshe Foundation Institutes. This way, we'll see a rapid development and extension to it.

We have offered the same process with what we call, state of Israel. We have offered the same thing to China, and to Iran. In so many ways, neutralization of the science and technology in the hand of .. all the Knowledge Seekers, concentrated in one place. We think it will be a ring a bigger, faster results, than what we see, a lot of you Knowledge Seekers are scattering, you're trying to find somebody, somewhere in a university, or government to accept it.

As we are working as One Nation, we establish these centers. We put your reactor from your nation, your Enhancement Unit, fight system in that position. Come in, you can work weekends on it, or three weeks holidays you take from work to complete the process, and whatever else. Is the freedom of you KS as a group. We don't allow one person, "I want to come and do this." It has to be collectively. We know there are a number of groups around the world who like to do this. But this way, KS share the

totality of the knowledge, and then it becomes as One Nation, and not sitting somewhere dusting. These things cost a huge amount of money to sit somewhere for somebody to decide.

This way the Knowledge Seekers will start by nation, or whatever, by district, and the governments will join in, and scientists from the other places, as you publish your papers and show how things work.

Just give us a few more days, and we'll make an announcement. (2:06). This means Foundation has to find huge premises, that these things can be carried out. It's not just that, tomorrow we can do, and finding places in population centers to the sizes of these testing is not very easy. Then you have to find the rest of it, to put it together. But this we see as a rapid evolution of scientists to come and go, and develop, and extend the knowledge together.

Please there is something we've seen a lot. A lot of KS just walk into the exhibition center (EC), they travel from different countries, or whatever to be in Exhibition Center, when it's not allocated time. Please contact the Keshe Foundation when you can do the booking, before your time. Because it's not somebody, can come and just look and go. We have people there, who take two or three hours to explain, to show the connection, the science, and everything, that brings everything together for you.

We cannot handle more than 10 to 15 people at a time. As you go through the process, and Keshe Foundation now is moving to, we are considering, we'll know more in the next day or two, this next week, that we already have two sessions a day, for three days. We're extending it to five sessions, five days a week, two sessions a day. And then we are expanding, because a lot of Knowledge Seekers cannot come in during the week, they're working. One or two weekends a month, we open on Saturday, for KS who come from around the world to see to be part of the exhibition.

This way allows a lot of you to be, (2:08). and to come to see. We ask you to please make a reservation, get in touch with the exhibition center, and .. get to know what is happening, and when you can come in. Because then you, it's not a Zoo to come and see and go. It has to be understood, and people who are there to explain to you what it is. And we're getting a lot of Germans and Austrians, and the others coming in. But please make sure you book your time coming in. Then we'll see how much we can extend, and it cannot be more than one group at a time, maybe if they push it to 2 groups at a time, but they seem to interfering between the two.

This is a knowledge scientific, what we call, tour, not something to just come and see and go. Get in touch with the exhibition center the people who organize it and book your time. And just don't jump in, "I'm going to the Linz EC " We had this occasion, a couple of times. We still respect it, they are asked to come back for the afternoon session, or the morning session the next day. But try to help us, to be able to translate the knowledge, or transfer the knowledge completely, from us to you.

Any other question.

Q; … My question Mr. Keshe is, what if you take a Cu wire and wind it around a quartz crystal, to turn it into an Argonne quartz crystal, and stick it in a 50 millimeter tube of Gans CO2 and ZnO and COHN (2:10). What will this do?

K- I think a lot of people did that. Do you remember when we started talking about the crystals?
R: Yeah, it does sound quite familiar, actually. You were showing crystals, Geez, that was few years ago, five years, five years ago or four years ago, something like that.
K- These things have been done, I think you have go into the archives and see what was left as information, by the people who did it.
R: Yes, that would be good. .. I would suggest, he seems the person seems to have a pretty good understanding about what they want to do. Well, he should simply do it. See what happens.
K- Yeah, but tell us back what happened?
R: Yes, exactly.
K- We see some responses in Golden Age of Gans, still appearing, some people doing things, in some places, but you have the testimonials, bring it to the testimonials, and explain it all, disclose it?
R: Yes, they can bring it into the Keshe Plasma Reactor Group as well, we can discuss it there, it's a good place for that kind of thing. And the testimonials workshop, which is every second Monday of every month.

Q: … (2:12). what is the update on this spaceship launch.
K- We are still going to test on the 6th of June, but the systems are built, and we are developing the last phases of the space reactors. Even I was in the lab yesterday. It's something totally different, than what you're seeing in public. We have changed the reactors altogether, as space reactors, and all sorts,

You will see it most probably, it will disclosed in June, and then we'll go for ??. It's the prototypes, is getting set up, and done. Testing, getting done, we're still waiting for some of the chairs to be concluded, we have placed order, if they can do, tell us they can do that, for us. It comes from Iran, and hopefully they can deliver on time, in next two or three weeks, or whatever, that we can place them. It is beautifully done by the Iranian people, who showed us, we have given the order for 400 seats, for the first 100 units flight systems. They have to adjust something, a couple of pieces need to be removed. If they can achieve that, and the backbone to ?? are built, and hopefully, if they deliver to us, what is supposed to be. It will be beautifully done, I hope that what we call, the Iranian team can deliver to us on time, because we have to look for something without any metals to it. (2:14). But at the same time to be in line with what the Foundation is looking for.

This is the picture of the seats, flight seats. The controllers are slightly different. And we hope Joseph can get this sorted everything is what we call, technically, by the team in Iran is ready to go. These are the chairs, you will see. It is in line with what we want. And

in a way, you can see the mass production on them, is there to be done. And this there is no metal use in these chairs. We have a couple of technical pieces to do and you will see it

Any other questions?

Q: … When the flight system is shown, will it be visible? From my understanding is, it cannot be detected, and therefore, can it be proven to those who need to see it, or to follow its movement with our instruments of today?
K - Wait and see it, but.
R; Wait and see, if we see, if we can see it, or not?
K- if you can see it. It is very interesting, we just designed into it, (2:16). what do you call it, … an addition to it. You got to understand, our manufacturing side is progressive development, and you cannot put all the information in one go, on the table.

So, step by step, as understood more, the what do you call it, we add to it, that they understand the next step. Now the space reactors has reached more or less, its final position. Then a couple of things needs to be done, and then we'll see results, in effect.

The factory is set up beautifully I was there yesterday, and you'll have a production and you have assembly line and they are doing the two. There is no Knowledge Seekers on any of the production lines. It just common man, and they are producing the systems, and the what we call, the first head units has been prepared, to leave for AZ in the coming days. You will see it in the .. mass production in the coming days. We will come to see, you will see the .. Vision units, which carry the Keshe Foundation what we call, knowledge behind them, and in a very, very sophisticated, but beautiful way.

R: - .. Just to clarify for people, (2:28). because there's still a question from say Saseed who's thanking you Professor Keshe for bringing freedom and hope to the world. My question, what are we waiting for on June 6th?
K- June 6, we try to test the first flight system. And it's a very abnormal system, it has no control. We finalized the control system between the soul, and the system, and the craft. Yesterday it was explained how it works, to our team to be able to put it together, and to be assembled. It's a very unusual control system. And we hopefully should be able to see it working, before June, and then in June, we'll try to create the first FS.

We might succeed, we might not succeed, but the whole thing is getting up to that position. And it's a matter of getting the units for Arizona, and getting the units for NASA in America, and the one in Iran, all coming together at the same time. And there's a lot happening in the background. There's a lot happening in the background.

Checking and Financing from Central Bank Europe

We have various experiences. … The problem we have is not, it's, there's a lot of problems that's been created by the, what we call, the people who we kicked out of the Keshe Foundation. And it's taken us nearly six months to sort that problem. And it's

taking so much energy and effort for us to be able to do this. Those will be kicked up very recently in the last couple of years I'll talk to Keshe Foundation have created mayhem, with lying, cheating and everything. And it's taken us to prove to the governments, and to the banking system, how much lies have been put in. (2:20).

And in a way, it's good, because now they turned towards us. That effort took a lot of energy in respect to development and expansion. But it's over now, hopefully we have come to an end of it. But this what is. You hear us trying to fly but you cannot imagine how much has been created outside deliberately. To create mayhem, to create.

In a way, they said, they'll take control of the Keshe Foundation. The whole aim was that I (the lady) become the owner and boss or to Keshe Foundation. Keshe Foundation is owned by you, as public. I am just a servant. I just provide the services, that it becomes an industry. But the amount of damage has been created by them, especially the Belgians, the ones will be kicked out, is enormous.

But we have managed, we've proven to the government, to the banks that, and the beauty of it is, now they want to know more. It allowed them to open their eyes, that what we (they) missed. And as one guy told me, Mr. Keshe, nobody served you better you're your enemies. Now you understand what we have to do, and what is about to come. Then we can plan for it, bank wise, financially, in the European Central Bank and the rest.

It's amazing how, how much energy we spent in past six months, a year, to innovate, not to prove, but to show, and to explain. That energy took a lot out of us, especially time we have to do. And now it is over, we are reaching the point, (2:22). that we can go to the next step. And the developments and spread of knowledge and technology will take a new course.

They had to sit and read hundreds of pages, which was submitted and understand it. To do these documents is not easy, to sit and explain. You receive instructions from World Bank, from European Central Bank, you don't oblige, you don't comply completely, word by word of it, they lock you down. Same with the government's they lock your companies down. We had to go through it. I had to spend time, and god knows so much energy with the Keshe Foundation team in the background, without them knowing or knowingly have done a lot to do this.

But the beauty with it, is now that we have the banks behind us, we have governments behind us and now, you will see the changes. These changes should have come maybe six months, a year ago, but we will not ready for it. Now we are ready for it and now we have the support. And this takes time we should have the scientists from different agencies on the table weeks, and months ago.

Now it should be. We are not defending, we are explaining, because we did nothing wrong. We brought a new technology, it's for them to understand, and they are understanding it very well. Thanks to a number of top management's of the Keshe Foundation in different countries we held everything together, to go through this time.

And it's over. You will see the benefit of it in the coming months and years, how it was done. And it created. (2:24). it forced the central European banks, a number of the governments in Europe to look at the Keshe Foundation with a new eye, and to understand what is to come.

Especially, especially with a situation in Ukraine, what we have put on the front with, and what we see will become is damaging. We were looking at it with our Chinese team this morning. Six months ago, even three months ago, we're changing around about 7.8 to 8.2 RMB to one euro. Today 6.9. European economy has collapsed 15% in a few weeks. The strength of exchange shows what is happening to us in the West. Keshe Foundation has a lot of solutions, and the government start looking at it, because it's an option to bring employment bring back a lot of conditions. We still get problems, we still have to prove the technology in different ways.

But it is you as Knowledge Seekers who keep everything in the front, and you're doing it. We see a lot of work done in different European countries by Knowledge Seekers. Now you get the support of the Keshe Foundation, you're in that position, hopefully, to move on and bring that credibility, which you look at it as an institute, as a structure, as a scientific organization, which can back it. This is part of our, what is a part of Keshe Foundation ?? space unit are there. Everything else to produce the backing of it is there. But we have, we have overcome a lot of problems. (2:26).

And if it would have been, like two years ago, with people with us (Belgians in KF), everything would have been ?? released. They called the heads of Keshe Foundation, and them, "we're going to take over and be the new owners." KF has no owners ?? except you KS. They wanted to be the owners of the Keshe Foundation. They thought they had the biggest spy, mole, or whatever you call it, inside the house, and they get it.

We can give the writings of what has been said, but it belongs to you. And the knowledge has been done, we've done our work. We still carry on doing. And we see a lot, a lot of benefits, a lot of positive things can come out of Ukraine for the Keshe Foundation, for humanity, in a way of bringing things out, and changing things.

It all depends on how from the next week or two, we push these things through, and we bring it out. We took a lot of pressure. And what I call ?? the full trust of the top people in Keshe Foundation, brought us through that change.

We believe, we are committed to work. This was why Keshe Foundation was going from post to pole, for years, because inside they were preempting our moves. Now there is nobody to preempt. It's done by Knowledge Seekers solid, pipe, and it's going forward very much. We were betrayed for years from inside, and now it's not there. And you saw the mayhem for two years on this ??. It brought a lot of benefit to us, (2:28). and it took a lot of energy. But now you're back on track, and hopefully ?? on the sixth of June, we test. Before sixth of July we test our flight systems (FS).

Pilots for 6th June - people through their soul

We are not looking for pilots. We are looking for those who have a clear soul understanding to become the pilots. We are not advertising, it's the same as Universal Council members. We are not asking anyone to become a UC members, it's your soul who has to make the call, to serve the man, and the pilots we'll do the same. We'll see, we'll take it step by step.

I thank especially the Austrian team, and the team in Arizona (AZ), and Chinese team, the team in Iran and Brazil, and Nigeria, and Australia who stood firm behind, and pushed things through, and carried on, and hopefully we are out of it, altogether. But we'll see ?? ??.

Sixth of June is our target to make the first flight. But we still try before. Everything is in hand, .. getting done. It's an amazing control system, amazing flight system. We show you the way, if it fails, then it's for you as Knowledge Seekers to perfect the job. We have no hesitation to test, because it's there to be tested, it's been developed to be tested. And if it fails, we have to find out where, and how, and what has to be added.

The 6th of June is our time. Because we can do it the next year, and the next year. But at least 6th of June, we'll see our weaknesses. We see if it does, and how it does, what conditions it creates. (2:30). What can we interfere with, or can we interfere at all? Can we create that lift and motion? We have evolved the technology beyond what you see in the exhibition center, is not even what the technology is about anymore. Scientifically, it's a 100 years ahead.

But it's not in public, there's nothing in public. That's one of the reasons we decided we keep the station centralized, then we don't allow others to break into, and trying to see to. They steal from us. The unit was shipped from Greece to Keshe Foundation headquarters, which had the small, actually very basic technology in it, and they stole, we received an empty envelop. The Austrian post they tell us, this is how we received it. It's the same as they did with our what we call, servers, shipping from Holland to Italy, they destroyed it, and they gave us a destroyed box, if you remember.

The enemies of the Foundation are very big because we touch everything. They steal our post, they empty our post, to see what's in the post.

Any other question?

Q: .. Alexandra Brazil. Mr. Keshe, I have no words to express how my heart feels at this moment. The only way I can express myself is in tears, eternal gratitude. Your love is infinite. (2:32). Thank you for not giving up on us.
K- Thank you very much.

K- I want to tell you something very interesting from Brazil. You who are from Brazil, you know exactly what I'm talking about. They published an article on the Facebook, that the ?? gentleman, we have copies of it, that it says, "Mr. Keshe is a Reptilian. And I know it, because I speak to his wife, and she told me he's a reptilian. His ex-wife, and we are

getting all the information that, Mr. Keshe changes, and his eyes changes, and he becomes reptilian." It's very interesting, that in Brazil, because the Keshe Foundation has grown so rapidly, how they have made a reptilian out of me. The guy who published the Facebook page on it, says I speak to his ex-wife, and I know, because she told me.

It's very interesting. And then you understand how, they still carry on, in what we call, damaging, or trying to spread, open up the solid background, of what is the truth in teaching in what you call, Brazil. Because it's growing so rapidly, with the work of Knowledge Seekers. So we thank you, the group of Knowledge Seekers of Brazil and the hard work you're doing, but I promise you, that if I am a Reptilian, I would have shown myself by now. (2:34).

Q: (Raphael) .. So he would like to know about the past civilizations, if the technology of the Sumerians, was so advanced as this technology, which you're trying to bring to us today?

K- What is interesting is, the knowledge, the understanding, partially understanding the work of the fields of the universe, even though they didn't have magnets, was understood by different tribes, or those who could see, understand the work of the plasma. Some, (2:36). in contact with the patterns of the universe, learned something, but they didn't have the intelligence, so they copied part of it.

It's not that the race of the man never touched, understanding of the field motions, of what we call, plasma. But they went on a material side, and those tribes, or groups who understood it could not take it further. Or for a limited time, they used it. And then when it became opposite to the interests of the rulers, they was silenced, or were taken off, and they were taken out of the equation.

We see part of these technologies in a sporadic way across a different part of the planet. Some learned by the man himself, some was given to man, but man never understood it, but they copied it. So it's not that one race did something whatever. You got to realize one point.

The knowledge we give in the Keshe Foundation covers the totality of the knowledge of the creation, in ways as you call it, medicine, food, energy, transmutation, transportation, structures of the materials, how to transmute. It's the totality of the package. And you'll understand every part of it, what to do.

When you look at the EU, FEU, in it, you have a flight system, like a ?? Earth moves. In it, you have a feeding station, which gives you the food. In it has a system, which takes what you don't need, it's there. In it, there is a system, if you need to produce material, you can switch into it. So in it, we have the energy system, that we absorb energy from the U. We have made a mini cosmic structure. (2:38).

In the other times, you might see, "oh, this tribe could do this." So they had, maybe a group came to understand, but they cover a very small part of the knowledge, but we see

it. It's not that man has been ignorant to the knowledge. Those who understood it, the part they understood, maybe a small piece of agriculture, a small piece of something, they've given it or left behind, or they could not ?? go further, because the knowledge and intellect was not there to carry it down.

But now it is. As much as we say, the knowledge is not exclusivity of Universal Community and man was kept out. It's the same with the human race. Different races have achieved a certain amount of knowledge gain, but in a very small field, or maybe a couple of fields. And this is the problem. We see it. We cannot say man has been ignorant to everything of it. You look into part of the .. South American knowledge, how they used to live. And where you got the knowledge from. How in part of Australia we see part of the universal knowledge.

Because when the man sits alone, he thinks, he becomes wise. If he tries to understand the work of the cosmos. You don't need to be Galileo or somebody else.

This is part of the problem, it's not exclusivity of one, somebody yes, they might have found a solution to understanding the work of, maybe in a different way, of how, (2:40). something works, but we don't see totality, to cover everything, where the man can become independent, man can become peaceful.

This is what you'll receive in the packages of the knowledge we give, because then you decide, which one you have. You want to use the energy side of it, you want to use the food side of it, you want to use the transportation of it. All the knowledge is given for one man to do everything. You don't need to go somewhere, because you can educate yourself, you can test yourself.

This is, we see it, in partially, yes. We see a lot of development in the Egypt. Egyptians part of it, then they became very, very religious, very insight into it, to understand the work of their body, they understood the work of the Universe. And we see some of the work in their structures. In their writings.

We see a lot of it, a huge amount of it, in the Iranian culture, in the scientific world of the past times, understanding, Sufis and the rest. We see the same in China, because when you're concentrate, and try to understand, and unravel, you understand more, and you can tap into. But then you have to see how you can connect it to everything else.

You have because, (you're) Knowledge Seekers access to all that gift. Even some of the knowledge you received about ?? was not available to Christ, or Moses, or Mohammad. You've been given that much more. The knowledge you're given at the moment, is equal to the knowledge of the U, it's you have to decipher, what you put in there. (2:42).

I said, 270, the first time we brought that structure. Now you know, 200 ?? odd, something, and 70 something, teachings, down, you learned a little bit more of what was said in 270 Knowledge Seekers program. It's not an exclusivity. Do we repeat part of it,

as it is totality, yes, as you receive some of the work of, maybe a tribe here, and a tribe there, but they were all individuality.

If you look at in South America. Why they understood and they changed their lands with, what was totally nothing in it, to a fertile agricultural land, by burning the wood, creating Nano materials, then with it, with the presence of the salt, the ash they made, they created Gans's, and they could cultivate in a black land, the best beautiful vegetation, because it wasn't Nano material, it was the salt and ash which created the Nano material.

Now you understand with the composite materials in the wood, the Cu, and Zn, or whatever, created Gans's, energy fields, that the plants could grow, where they couldn't grow before. I did that in Italy, in the house (yard). We had a part (of land) that nothing grew. I kept on putting the ashes in the right way. And we start seeing vegetation growing, where nothing could grow (before). I just wanted to prove, that I understood how the people in South America created life. But they could see, but they couldn't understand the knowledge. But now we can integrate. Did they have a knowledge of nanotechnology and Gans production? Or by observation, they understood, it does something, and they followed it.

The only thing they couldn't follow in a way, is the creation of water, that's why they will moved out, (2:44). of their positions, because they could not. They mastered a lot of things, but they couldn't master how to feed themselves, or how to create water. When the water finished we see empty cities.

Now if you look at the new programs which are coming up, how they're mapping out the Amazons, and finding the campsites, and how they went back to bushes, all came down to that process of lack of water, at certain time, they could not reach. Maybe just for a decade and then moved out. We don't find the skeletons. We find empty cities, which means the knowledge was there, but they couldn't carry on.

Any other question.

Q; Farsi translator .. (2:46).
K- I'll try translate
Q: …. (2:48).

Let me translate you, this is what I said. In the past, the gentleman has been with his wife to the Linz, EC, yesterday out of nowhere, the day before. They expected to see me, to tell them what to do, and how the problem will be. They were expecting to come to Linz, to see me, that they can get a medical advice.

Keshe Foundation and I, do not give medical advice in Austria, or anywhere else. We have doctors, which are appointed by Keshe Foundation and we work through them, that we advise doctors they understand it, and then they translate to a medical system. And I

advised the gentleman there is no way I can help him or advise him. This goes back to our doctor in Iran, Dr. ?? who they have to go through, to get advice what to do.

Keshe Foundation in Linz or anywhere else, which we work out of the factories or whatever, we do not get involved in medical practices. We made that very sure. We learned, that how they can use it against us, from the what I call, villains, and hooligans of Belgium, from the king down.

So, do not come to Linz and hope, that you will see maybe me, or somebody else, and you maybe can use the system. The systems in Linz are not set to be used by anyone. And secondly, there is no training for it, unless we run trials, which is done by the supervision of the doctors. This gentleman, I told you, they just walk in, (2:50). and they expect something to be done. We do not do, the team, especially in the exhibition center, are not equipped or trained to use, or do something. And even if we are in, we never get involved in what you call, medical practice. We have doctors in West, we have doctors in Iran and other places that we consult, and they advise.

Thus, what I explained to you earlier on, people just walk in. This cannot be, because we're still making, we start making these temple jobs, and people come in to see whatever. And coincidentally, I just left the building when this gentleman turned up. I received a telephone call, there are people here, we do not get involved in these kinds of things anymore. We tried to help and we saw what they did. We learned, that they have gone through the scientific world with the doctors and we train them.

Thank you very much. What's next?

Q: Salomea … I have a question related to European Union, because we are a part of European Union. And exactly what do you think about problems of European Union in the future? And how we can solve it, after this conflict, or during this conflict? What exactly are these problems? Energetic crisis, economic crisis? Sanitary, I don't know. What do you mean, exactly. Thank you very much. (2:52).

K- We learn a lot, actually. We got to learn from European Community without the influence of the British and Americans in it. European community as a community of some 29 - 30 nation, works beautifully. It's the ideal structure of independence for collective work. You Romanians have been benefited by it, immensely.

You've been given a 1 billion budget for part of the central computer ?? the IT section of the EU very recently, in the past your or two. Or to share I think, the Czech Republic, or one of the other nations. European Union works perfectly, has worked perfectly. Till it's used as a tool, by the British, or by the Americans.

This is one of the reasons the rebel has been put out, the British were kicked out of it. Because now we see it. You got to live in Europe to understand the beauty of the European Community. We drive from Portugal all the way, to let's say Ukraine, and two borders with Russian, with some of the ex-Eastern Bloc. We have no borders, mainly use

one currency. We don't see armies. We don't see all sorts of other things, we see when you go in Africa, from one nation to another.

Before Corona there was more freedom, (2:54). now they stop people, for Corona, to check if you have a Corona certificate, or whatever. Nowhere in the world we can do this. There's a lot to learn from the European Union, thanks to the French, and the Germans, and the Italians, who instigated it in the beginning.

But when you have these kinds of conditions, centralization has brought some pitfalls. And it's very hard to keep such a big family in what they call it, in order, in every direction. We see the present, there's a huge problem, huge problems with the Ukrainian, has arisen for Europe, and Europe will learn from it.

We are going to be short of food, because Russia and Ukraine were one of the biggest producers of what was needed for food production, unknownly, one of the major producers. We're going to be short of gases. We're going to be short of specific gases, which is needed for certain parts of the industry. So we're going to see huge problems in the what we call, in the West.

As I said to some of our top management in the KF in the past 24 hours, this has given an opportunity for Keshe Foundation to arise. What is become a shortage, is what is in our hand to show, and receive massive investments to be able to, replace, to bring in, and we are working on.

The biggest peace nation, as one nation, is the European state. If we can achieve this in Asia, if we can achieve one that's been achieved in Europe, as one continent, One Nation. (2:56). Call it the European Community. The same in Africa, or in South America. We have this, as a United State, we have 50 nations speak one language with different accents, or different combinations of nationalities.

The process is not bad. It has worked, because methodologically, step by step, has been brought in. When a new member has been brought in, they just didn't bring in new members, when it. Because I was involved with this. The members of the European Committee for Greece, for a while, as part of the Keshe Foundation, in the European Parliament and understanding it, we became very wise how, how it's done the German way, I call it.

They just don't bring a nation to be a member of the EU. They analyze the weaknesses in the structure of the country, economically, politically, financially, infrastructure, and a committee and committees will work on this. Romanian wants to come into EU, the roads, the health system, the other bits, and how it needs to be financed, and how much finance you can bring other countries to be able, who's participating, and what will this will bring to the community. They saw a strength in the communication computers, IT is part of the EU, we saw with Romania. So they boosted it. Romania is now one of the leading IT countries in EU. They cannot do the car manufacturing, because the German is covering that. So they don't create a competition for themselves.

But they allow a specialty in each group, that is become integrated part of everything. It's a beautiful situation. (2:58). But what we learned from Ukraine side, is a lot of things, weaknesses in the structure of development. We saw the shortage of what do you call, Micro Chips. German car manufacturers without Corona being in it, went into part time production, because they cannot take, they cannot get enough Chips from outside. Now they're looking at to produce chips themselves. That will take 15 years before system come together.

We saw Clinton invested 6 billion in Blu-ray to bring it forward. And they invested in the Chip manufacturing, and Europeans who fell into this security, that we always get it, and now they don't get it. German economy is suffering heavily, because for a time, even now Mercedes, BMW, ?? Volkswagen, and Audi and them lot are suffering heavily, they're affecting the economy of the EU because they don't have microchips. Each machine uses 20 - 30 microchips and then you have to get it, and there is no, and it's controlled by the Chinese and the Russians. So they're controlling the West. West has to.

But this gives a new opportunity for the new technology to come in. If you understand it, when I tell you, it's time to, for us if you understand, if you understand the way, now we develop the system control, and the flight system. We don't have, we don't need, we can get by with, if a Chip. So we can give a replacement. The same on the agricultural side, but as I said, (3:00). the time wasn't right for it. But now the time is right, things are getting set, it will be done.

But overall, we will suffer for maybe 10 years. And if the Ukrainian situation, as the Americans said, they are waiting to see a war there for years to come, then there'll be years of shortages in Europe. On the food, we saw in Germany, was it last weekend, the weekend before they announced, on Sunday, that from next Monday, the prices will go up between 20 and 50% in supermarkets. How much of it will be carried out, how much will be filtered through next, buying food, and grocery in Europe, is becoming for some people unaffordable. These pressures we'll see.

But maybe it is the time to introduce the other part of the technology into this system. We have good connections within the governments in Europe in different ways. And we start exploring it, now that we have hope. We sorted out the problems, which was created unknowingly. You will see it. The changes are there, with a Corona, with the shutdowns, everything else.

It showed the weaknesses within the structure, and Germans and the French are excellent. Especially Germans, in when they see a weakness, not to jump in, sit down and analyze, and see how they can do it. How they can prevent part of the energy control, which was done by a Russian. They took control of their Russian investments in gas ?? price, and the rest. The talk of nationalizing it, will be done, or it's getting done, that they protect their nation. The Germans are very good at it. (3:02).

Americans jump in, and then they think. Germans think, and then they jump in. Europeans, and Europe is pretty safe and just the Germans and the French, in a few months they find a lot of solutions to a lot of these. There'll be some hardship in Europe, without a shadow of a doubt. We'll see shortage of food shortages, .. of some raw material, but it's expected. As long as we don't get massive diseases spread in Europe in the next 12 months, two years, ?? it should be ?? fine.

But Europe is a perfect application of what the Keshe Foundation should achieve ?? worldwide. Creating, because 1990s , 1980s when I used to travel from Holland to France, going to Belgium, or going to Italy, all these border checks, armies and the rest, it's all gone. Because then with it, how many soldiers have gone, much reduction in police, or the military forces have come down. It's gone so low that Europe cannot put together an effective military force, because it has no borders to protect for themselves. Skirmishes are for soldiers around the Europe in different borders. We don't have anymore full time armies as the numbers we used to see 20 years ago. That has created a condition of finding a solution peacefully. The generals are ?? planners for future, and working at it received in the background. (3:04).

Any other question?

Q: … Jefferson ... I want to clarify one doubt, that I was talking to a friend is not related to the you're a wonderful teaching today. But when we are talking about the field strength from the matter state to the plasma, or to the Nano state … You use it for instance, for Cu from 63 to 59, it's around 8% reduction for plasma. The Fe it's around 25%, (3:06). As I understood so far. We were wondering if there is a relation with the number of neutrons, that are free from the difference of the atomic number, that the locks fuel, the same amount of neutrons, and there are some materials, that we have the many more available. Is there any correlation with this availability of neutrons, free neutrons or any kind of proportion? For instance, if you go to silver, that we have 107. What would be the reduction when we Nano coated it, to create two different fields, so we can create another field from the element that we wish. If you can try to clarify this proportion of reduction? If I made myself clear in this question.

K - … It's a beautiful question. There is no reduction. No, there is no reduction. There are two points to understand, and it goes back to the fundamental understanding of the creation of the original plasma. The plasma, or the amount of the energy in the plasma, in the plasmatic condition, which is on earth, is created in the upper atmosphere. (3:08). When it comes in touch with the Inertia field strength, will dictate how much of the plasma of one element stays active, and some stays inactive. When we talk about inactive in means linking up, that they do not participate in the total energy plasma.

Or that's in the matter of state, but in Gans state we look at the, how the fields are shared with the others, that the minimum amount of energy, as is needed, as like an isotope of an element is needed. But, if you look at the Gans production and conversion, energy field effect from the matter state, to a Gans you'll find 30%, sometimes reduction in the field strength, but the same material.

This comes to understanding of field interaction. When you have neutrons in matter state as an isotope, because you have the electrons, or you have increasing number of the neutrons in the seed. It shows that, there is something absorbing energy from the environment, or something releasing energy to the environment. And that release does not allow, (3:10). the holding on to the field energy of neutrons to create the nucleus.

Neutrons are what we call, in a state of balanced fields, in the present knowledge. But neutrons are connectors of the fields. When you don't have an extra neutron, means the protons are strong enough to hold on to, so you don't need the neutron to be the balancer. We see some isotopes because of this process, become what we call, decay faster, because the ultimate goal is to, to bring the stability.

In the nuclear industry in the matter of state, we talk about neutrons. In the new plasma nuclear technology, we speak about the energies, and those energies don't convert into isotopes without the presence of Inertia. In a way, a reference point. When you get a composite material, like in a bar, you have a 56 - 54 - 58 Fe, whatever 60, is because the Inertia at a point where, I was created, had the composite plasma, in its presence, and we converted it into matter state. It's not that there was a shortage of energy.

In a way manifestation, which is M, is all the same, but the G is a slightly different. (3:12). So we get the presence of Fe as matter isotopes, but different G field, within the side, has kept the what we call, plasma at bay, and then transformation into matter state as isotopes.

We look at the isotopes, totally different in the plasma technology, field strength combination. One is field, and one is the interaction of two fields, when the matter state is completed.

You don't need to have always the same neutron, because Inertia itself is a composite of different fields. So it changes some of it. It's like you cannot for example, let's say find Fe 40. But in other places in the U you can find Fe 40, because the Inertia at that point is M field strength allows to create a matter, which has the behavior of Fe, but carries not enough, even protons and electrons in it to make the 50. It's a field manifestation, because it's deeper inside than outside. You're much stronger, you're much closer to center of the plasma, then you're outside, depending on the D of the ?? M fields.

This is part of understanding, of creating composites, first as a plasma, and then changing them to matter state. We have achieved that, (3:14). and we spoke about it 4 weeks ago, about agriculture, where the fields in a field can grow corn, wheat, and rice, and each one receives its own field strength. In a way we create a composite, and a C-H bond, and the amino acids (AA) connection bond with the C-H, to allow ?? any configuration for the protein of the ?? sleep.

You got to understand the totality. And I can talk about this, and teach you for years to come, creation of composites and isotopes, without even having a single neutron in the

nucleus. The example of it is hydrogen itself, you have no neutron, ?? ? ?? You're not in a Tritium, you're not in Deuterium, H2O. How come, where is the neutron ?? , because the environment of Earth allows the behavior of water, but doesn't allow the behavior, and manifestation of another water, unless the condition is right for hydrogen to link up with the oxygen.

You look at the plasma first, and then you look at the Inertia interaction, creation of matter state ??. You can create plasma strength of the gold without a single neutron when you convert it into matter state, (3:16). other things. If you manage to increase the strength of the protons to hold, to that the structure of the gold, it has different dimension, and that's the only way we see ?? ?? we know this knowledge, in the H, Deuterium, and Tritium. You don't need nitrogen, ?? or neutron to create matter entity condition. You should have seen that in production of CO2 in Gans boxes, we create the condition of the Gans, without any Gans's by interaction of the fields. You don't create the material, you create the condition of it, in the strength that it absorbs, then it changes.

It's literally, if you understand it, it's like a moisturizer, .. absorbing moisture from the room, when you buy the machine. You don't feel any moisture in the room, but you see water gathering in the pot. Dehumidifiers. it's the same process, you create that condition for the for the moisture, as a vapor, or as a gas in the room to convert into the matter state, you create that condition of it, in the system. You just blow it through, and the cold convert it, or the right temperature of it. You can do the same thing in the world of the Plasma.

We are the presence of Mitra.

Any other question (3:18).

Q: … it's a question about the MaGrav unit or sorry the Universal Body Enhancement Unit being available in Australia. They're wondering if there might be some date, or place that we accept in Australia.

K- We have one doctor who tried to do it outside Australia, he's still struggling with it. As far as we know. Or he is trying to get it in, some sort of, sorting it out. Nothing at the moment, with the present government in Australia. We tried to keep as much as possible away till, the situation is much sorted out. We have a plan, yes. We'd like to put MaGrav systems in the boundary nations around Australia, but not in Australia. This is the discussion and the plan by the Australian KS, and the people, that are there, they know exactly what I'm talking about. These discussions are going for 2 years.

Q: … How can we start to use your, calls it, a depuration system of water, that I think you have just proposed to the Italian state. Does that ring a bell, so maybe a water decontamination systems.

K- Yes. (3:20). This is a technology we have offered, and tested. In this time, Italians have to find a solution around it. The report has been given, and we are working in the

background, we might get something in the next few weeks, month. But you got to understand, that it's not just Italy. The problem is worldwide, the contamination. Till if you understand the Gans production, some of the process of the Gans production can create decontamination, actually desalination more than anything else. But you have to understand what you're doing, and then decontamination, and absorption, and extraction of all sorts of things from the water.
Shall we call it a day.

.. Today, and hopefully, we meet again, in another time and place, and hopefully we'll find a solution for a lot of things. We've got to Keshe Foundation knowledge and see you hopefully medicine

429th Knowledge Seekers Workshop; April 21, 2022

(Proofed and Transcription done, , need to, Key Phrases, Words, Quick index)
(Elias auto transcription uses bold)

Need 150,000 Euros by end of day to start Institutes.
Don't litter U with physicality of the man.

Hidden teachings

We have to respect both the STP, and the physicality. The physicality is an amalgamation of the souls, which by their interactions and collective work, they create the STP in interaction with the environment. This interaction gives it physicality. At the same time, (the totality of all) the collective soul interactions create the STM. (1:09)

(2:28) . salinity We are created by the dimension of the creation of our own strength, by our own understanding and no more.

(:18).
K- … Today for the first time through the KF work, we've been here for over, live teaching 10 years, and KF over 17 years in establishment. KF has never gone out to ask for donations, or to ask for people to support the KF for a project. People who are close to the KF know we have endeavored to bring a massive change to the work of the KF internationally. This work required huge financing in the background by the KF. We have worked on this 5 or 6 months, the funds have been raised more or less to the absolute limit, a number of Knowledge Seekers (KS) in the background know, they have been solid with us trying to, and we have brought all the finances to the KF to see this project to be completed. This project will bring some hundreds of new locations, (:20). for use of enhancement units (EU), for water treatments cleaning treatments and processing, for space ?? launches, space centers and the rest.

To raise this kind of capital by the KF is impossible, we (would have) had to go to so many different people and wait for years and years. We have reached a point, that we have raised these funds, and now we are in the last leg. We have raised, we literally used all the resources we could do, to raise another 150,000 Euros to complete the process. With the discussion with the team of the KF, we have come to you. There are hundreds of thousands of you listening online, if you donate 10 Euro, or 100, or 1,000 Euro, or put funds as lending to the KF, to be returned to you.

We need to raise this money today. Millions of dollars have been raised and paid for this process to be completed by tomorrow. But we are in a shortfall. If you have access, or you would like to support the KF, we are short just under 150,000 dollars to complete. We would not come to you in this way if we didn't need, and we didn't have to.

Add in Auto transcripts… here to 34 minutes >>>

You make the donations or you can send 1000, 2000, 10,000, or $10 as a loan, put it as a donation or a loan to the foundation. And then in the process, we return back the loans, or we take foundation donation to go ahead. We need to raise this money today.

We have done everything around the foundation, those are on the panel in the background. People listen in different channels, know a number of Keshe Foundation top management team, (:22). people have originally formed divestment positions have done a lot of work. To make sure this happens. This was supposed to happen last Monday completed. But due to the lack of a large sum, which suddenly disappeared by somebody who was committed to us, we had to raise it in a short time we raise most of it. It's about 100,000. And we would like to ask you as Knowledge Seekers go on a donation panel, if you can send it directly to the Keshe Foundation Account in Holland, help to bring the check, we have told you what is to come. This is all part of the work of the Keshe Foundation. I put it in in different ways and different meanings. Keeping the technology out of the hands of the governments or the institute's or the people who control it takes a lot of courage takes a lot of work we've done in past years. Now we are in the same position.

MT Keshe 23:06
The funds we have raised will bring those changes without attachment. We signed agreements to this effect. And we need to keep that correct. We need to keep the foundation as one nation be attached to any organization, any government. We need you to be there today. Not tomorrow to help the foundation to be that change. Every month we spend 10s of 1000s All these things you see even keeping this internet going a month cost about 30,000 euro per advantage. When paid year in year out month in month out. We need you to help to donate or to learn to the foundation today. We can bring that change very soon. Waiting that chunk of time will be affected by the others and other conditions. We are there to do a lot of work and that bring a lot of changes. And the capital we have raised we had to pay for it to be done. And it is part of that experience. We pay for it to be done the platform to be set up to be able to do this. I know many of you have access to an open so many analysis to a lot of moments. But you've been here for 10 years listening or some years we've been listening. You haven't seen our work. If you don't like to pay for something which you don't get by a cup. You will consider what Cup of Life worth and donate to it. Pay if it says 50 Euro 100 Euro pay 10 Euro, it doesn't make any difference, but we had to bring that change and we left it to the last minute. One of our senior people in this part is already moved into Vienna. We are way waiting for the other things to complete and has to be completed today. Because we would have never come to you, as I said, it's one of our people in the background would not have defaulted in what was put here. And is so short that we could not wait without coming to the shortfall was much, much bigger, we have covered with the support of the Knowledge Seekers, and the Keshe Foundation was whatever it was there. Now we need to raise the surface. If you want to pay for one enhance, when you will get to 100, which is for 1 million, we still accept as you get the product, but we need to raise it today. Paint which foundation bank account, as is a NGO is a foundation account and support us put it in the law awarded back, we will return it back to many of you who have supported us this way before, when we need we got to select the people who we need in the Keshe Foundation to support us in the Chromebase. And now, this is the foundation which needs this money to be able to interchange. Knowledge has been free and sharing the knowledge has been free. Now we have to keep the application of the knowledge and technology free as well. And this is what you don't see any obligation a nation works companies, any outside X and Knowledge Seekers as partners or people who run. We want to keep it that way. And we want to bring the knowledge out everything is depending on what we're doing and what we have to do. Huge sum has been made and you will see its operation coming through. Once this is completed. I asked you as Knowledge Seekers support today, we tell you how much we collected in the day. And that will decide if you're going through, we can complete the agreement by tonight. Or we have to step back. We have already committed all the resources of the Keshe Foundation, millions of dollars to get this done. And set up is just hoping that for such a small amount, which wasn't supposed to be, except by the fact one of the medical people who put the funds in for a purpose, and he changed his mind. We raised most of it, we showed 150,000 Euro. And I'll come to all of your knowledge specifically for 10,000 20,000. As a loan, we are not asking for donation, you haven't bought the setup. And if you feel you want to donate to me, if you feel it to be long, the hit alone, and we can complete today.

MT Keshe 27:58
I don't think the foundation will ever come to us for donation or support in this way publicly. With what we set up, foundation will become one of the most powerful structures on its own. Without depending on governments we become this we set it up is to become the bankers of our own finances through technology, and not to establish a government but to establish one nation. We need these funds to be based today.

28:32
And

MT Keshe 28:34
we need to be completed today can make a donation on PayPal, but we prepare you to make a direct transfer because we the PayPal, we have to wait another two days to get it transferred to our accounts and then transfer it again. So if you make a payment directly to the Holland account as an NGO or your partnership, nonprofit organization, and we can accept you can just put out there alone your $100 alone your 1000 I donate to $1 all works. We need to read this today. There's 1000s of you online and we have shared knowledge we have shared everything with you. And we need to complete this as is part of the structure of the setting of information. And more or less you are aware of what is to come we announce more as in the hidden ways, the things to be set up to come and sitting there to come. And we have another day or two weeks with it. And today's our final day we have to meet today to complete. I don't preach and I don't go we need we have to bring the change, to search for color. So solid base for generations to come, but it gives you ambition. Please look what you can do and how Oh, you can do it. But do it today, if you can do it even during the teacher mini under 50,000 rows if it's 1000 people turn up if the dollar is 10,000 20,000 People live on the lights at the moment. Do we need to pay $1 What 10 pound $1.50 You just make. I've done everything in my power and the financial part of Keshe Foundation. To bring this position about, we stopped a lot of programs of the Keshe Foundation in China, in Arizona, anybody else to finance this because this is more important. This platform for us is a game changer for the punish the employment backwards to cleaning up the atmosphere, the energy, the space, technology, everything has put a hole in past five months to get this completed, and our bankers new and behind the huge problems our banking system, blocking and stopping investigating how an organization like Keshe Foundation has managed to do such a job. Our bankers are closed everything for us to monitor how No well known organization or shell Foundation has managed to raise a nation's capital as an independent organization, when you do have to be done, when you have to be completed. Thank you very much for it. And I hope, I hope you can help and you can relate and you can blend the Punisher in money for the next few hours that we can get this process completed. Those of you who are in the background, know exactly what you've done and how you helpless and also at the front end back from China know how you have suffered with what they had to do with the stock not the banks and everything else publishes at the moment, he will schedule a central European bank to see how overnight showing Keshe Foundation has made such I thank you for your support. And I take your call and allowing to bring about the church we are not asking you to donate us we ask them to learn this stuff by this we determined to win a competition. Thank you very much. And I hope we get a response by

those of you who have the funds to be able to do it. Just understand there is a need and there's a type of need and the need for the permission to bring the changes today. Come back once again, we keep an eye on the monitoring of the fun receive and we'll see what you have taken from the rounds brought you back to us to be commended much you have to make the donations on the screen or you go to the Keshe Foundation donation bottle cash management account in Holland as a NGO is there the power is there we prepare you to send direct things that paper will take us time but it creates a lot of delays which we don't have Thank you very much going back

Rick Crammond 33:28
product I was just wanted to mention that if people do have trouble with some people do have trouble with the direct bank transfers and there is a donate button in the upper left corner of that web page and when you click on that then it takes you to to the ability to use PayPal and or with a credit card so just that the option is there but you have to actually click on that small donate button in order to access all thank you and as I see there's people already have sent their donation Danielle in the chat here mentions donation sent so you're getting action already at least mr. cash.

MT Keshe 34:20
Thank you very much. We need to raise 150,000 euro to pay 10 cents for the teaching of 10 years per session that only might have water. Thank you very much. As I said we never do never come back. But this is so vital. For change of direction of course in Keshe Foundation be the way it's your foundations for urine, your caretakers Going back to the teacher.

Teaching starts here .>>

This is so vital for change of course and direction of the KF. Either way it's your Foundation, it's what you run, we are caretakers.

Teachings start

What happens to Physicality of Man after point of Death

Coming back to the teaching. .. done by KF Australia. Most of the videos .. bring back the connection between what we call, the Soul of the Man (STM) and the physicality (P) of the man. What happens to the body of the man in the dimension (D) of P? What do we get, why and how do we amalgamate the fields, the processes, the understandings of life after death in the physical condition.

We bury it, we burn it, (:36). we do all sorts of things with it, and a lot of things happens to it. We put it in a coffin. We do the same, we kill animals, we consume the cells of the body, each one has a soul. We interact with the D, that central control is not there, but the part of the P, the Soul of the Physicality (STP) is there, because the amalgamation of the work of it together, created the STP.

We send an animal into a slaughter house in Australia, it gets cut up in different pieces, and it's frozen, one part goes to the US, .. Europe, .. Africa, and the P of the one body spreads across this planet.

But as we said, in the D of the magnets, once you establish a M field, then every magnet has connection with all the other magnets, because when you put a magnet in the center, everything moves.

These parts, these sections still in a direct way, have a connection to the soul, which lead to their creation, and lead to their containment of that soul, till the whole thing was imparted ?? and ?? alive.

We as beings, (:38). of consuming packages of energy, one of us will get one part in Australia, another one of us gets the same animal's part in South Africa, and another one of us in New York, and somebody else in Moscow. What happened to it?

We have shared the P of one, but we have connected to the soul of one, too. If this something you cannot imagine. Go back to the grain of rice, go back to a grain of wheat, we cultivate this grain. We harvest 50 to 60 grains from it, and in the process of the industrialization, each one of these grains ends up in one part of the world. It's no difference, if it is the animal, or grain or the seed.

Then it comes to one point. What happens to the souls that we consume? The soul of the grain, soul of the cells of the body of the animal, that we consumed. Soul of the totality of the human race, which consumes it. Then what happens with the P of the body of the man, when we burn it, (:40). when we bury it, or whatever else we do with it. What happens with the worm, which feeds on the body of the man. What happens to the energy of the fields, when you burn that body in a fire. You change the D of the P when you burn, but do you , what happens to the souls which made that body?

Then you come to one point to understand. We have been eating from each others souls, and adding to each others souls, in all D of the P, in every D, we are all inside and outside each other. We are all connected, we fed and we feed through it, and with it in the coming time.

We need to understand the need for one point, that do we need to consume, do we need to kill to consume. Doesn't matter if you call yourselves vegan, or vegetarian, I am a meat eater, I only breath air. We still end a life to take something from it, to extend another life, for a small period of time in the process of the creation. .. Where does man go with this? Where do we bring ourselves to be, and to understand? (:42). (Rick .. … WL should always be on the panelists, she is head of KF. ..)

In the process of understanding, in the process of evolving the science, the knowledge, then it comes to understand what is the problem with us? What is the problem with us, that in the coming time, in the process of .. understanding, we have not understood what

we have done, what we do, what is the process? What is sitting in there, and how we can change this? Where do we go, where have we set?

Where do we sit with this problem, with the whole structure of field transfer, energy transfer, with understanding of the totality. (:44). With being there to bring that change, that we don't need to consume. Because we think we consume, and that's it. But don't forget, at the time of death, we become to be consumed. Goes back into part of the teaching. "We care where we go, but how we feed our children, what children we create in the D of P and D of soul."

But we have to care for our body after the point of death. It's not just something we bury in the ground. It's not just something that it burns, and it becomes part of another D of energy. When you die, do you want your body to be transmuted, and transformed into energy, by everybody else can take from it. Or to become a rotted things, and maybe they ?? scare man (like a ghost).

With the new understanding in the D of the work of the STM, man can decide in what way his P will take, to be given, to be spread, to be part of his knowledge, part of his strength, into strength field of the U, that it comes useful to enhance, to be the reason for operating, elevating another soul.

The condition of the teaching of today, is not just what your soul does. What we said we can bring a condition, that super passes D of P, (:46). and P becomes within the soul. As now the soul is within the P in the brain of the man. Then you decide what energies are not needed, that can as energy to dissipate, in the D of U, that it becomes useful, becomes applicable for the others to live with and be part of.

We share knowledge which is more or less information in D of M field. It has no tangibility. So what is given, and we use it. The body .. at the point of death has to become like a knowledge. Not to be consumed, but to be taken for what, who needs it at the time.

You are responsible for Physicality after death

The teaching of KF is not about what happens to your soul, and when the soul can take over the body and be free it. You become responsible for preservation of the P within the soul when you take over. When the body comes to the point of transmutation, you become responsible for it. You are responsible for it.

Now you understand where the teaching has come, and how it sits. Now you are responsible for what is released by that P, that it becomes a useful, for elevating the soul of another, to love, to give it love. Then you don't need to die, you don't need to leave the P behind to rot, to be burned.

Then you understand the point of what we call, death, cannot exist. (:48). man will live forever, not for a meager 50 or 60, 100 or 10 years on this planet. This is what we are

responsible for. This is what we become responsible for, making sure the P at the point of departure of one D, leaves ?? in that citizens, be it the animal, be it the planet, be it another D, become useful for it to elevate its soul.

Where still the D of P can be created when the soul allows the P to manifest itself in D of environmental field strength. You care about your children. Now with the knowledge you have from today, you have to care what P fields you leave behind. You cannot go into the park, have fun and then throw litter and rubbish all over the park, and go, just because you've been there. This is what you do with your body today. Bye, bye soul is gone, litter the body on the planet.

This is where the understanding of the process of transmutation and elevation of the fields does not matter in the dimension of the plasma, you call it STP, (:50). or STM comes into it. Where one is electron, and one is proton, and one is, as you know, we say in the world of nuclear physics, that one has 2,000 times more whatever, compared to weight, or mass, or size of. And then you can reverse, when you change the mass to the size, and you get a bigger mass, and then they can collectively, field force balance each other.

When I understood the process of the creation of the STP and STM, to me was fantastic as a nuclear physicist. One was proton and one was electron. Transmutation, inter-fusion of one into the other, to take over, became very simple.

We are as human race nothing but an atom. A glorified atom of hydrogen with one proton inside, and one electron outside. Or one electron inside, cocooned inside the proton. Or an electron, which is ready to be released by what we call, principal division, fundamental elements, to what we call, the electron to be released, and then it becomes an atom.

We are the hidden atom, where our electron, which is our soul is within, then being outside. In a way we are that fundamental element, till we allow, to recreate the condition to release, that electron, (:52). to go through that what we call, nuclear decay. Then, we leave the physicality behind, and the electron becomes free to fly, and create new orbits in itself, and a new cycle.

We cared about our body how it's dressed, how it's performed, how it's looked outside, immaculate hair cut, shoes totally clean. But we do not care what happened to it, when that electron flies out, and division comes, and you're left with a pile of mess, you call it the human remains.

We don't care what happened to it, because déjà vu, does not exist in that D. So bye, bye, I made, I used your physicality to elevate myself, now I go, because you had no respect for me when I was inside you as a soul. You care about your children. Now with what knowledge you have, you have to care about your physicality, you cannot litter the universe (U) and the planet with that remains, for somebody else to clean up the park.

It's not the process of what we collect in the park, we put it in a dumpster, and we just take it to a (disposal) plant, we burn it, or make a fertilizer out of it. Or it goes in the coffin, and it becomes something else, somebody else.

We are still connected to P after death

We have to understand and to respect the condition of that physicality, not in its D of the soul, but in its D of itself upon departure, or separation, or by understanding that there can never be a separation. Does not matter, (:54). which part of it we send, which part of the world you send it, which part of the U, you're still connected, and you respect it, and you keep it to be there. It cannot be food one day and a manure the other. This is not expect, and respect for the physicality, which you took so long to train it, to elevate it, to bring its soul to perfection.

Death can never come if you understand Transmutation

Then it matters for man not to have, to come to the position of, after death, because death can never happen. If you understand the transmutation and elevation of the STP or the STM. Then you live the life of the Creator, then you live the life cycle of the U.

Next time, when you look at your body in a physical condition, you look at its beauty as a young man, or woman in the bathtub, or you enjoy its dimension in the ocean swimming, and showing his beauty, or as an old man walking with a stick in the dimension of the streets, or in a wheelchair. You have to understand what is going to be the future of this physicality.

How can I preserve it to become a lover, to serve and not to be served? How can I be there forever to give. Not for a while, and then become a litter or a dust. (:56).

When you look at the physicality of the man up to now, you had no respect for. If you're Jewish and ?? and it's within your power, you don't spend money on the dead. If you're a Muslim, you do all the hullabaloo and celebration of, and mourning of. If you're a Christian, you go to the church. And either way, you dump it on the ground, it's gone there is nothing to do. And we are so good at, that we say we put it out of sight, we bury it.

Because we could never understand what we do with it. We did not respect it. We did not allow it to learn the process of the interaction with its soul, that it will never get to that position. Most of the reasons we bury our bodies is, we are ashamed of what has come, to become, a president one minute, eaten by the rats, or the fox, or the worms in the coffins, the next day.

We have to bring to understand, that the physicality of the Man is a collection of the souls. You cared about your soul, you cared about the Soul of Physicality, you have to care about every cell, that has made, that has a soul, the collective STM. Then it comes to

one point, if you understand this, would we become one piece in America, one piece in Africa, one piece in Australia, one piece in China?

Or we become the radiant lamps, (:58). of the lights that, what we have in the way, deciphered through the cycle of life, become energy to the others to take what they need from. Man's D of P should never finish. Man's D of P should never end. It's man who has not understood it, and he has littered this planet for thousands of years.

Also elevate soul of animals

We have to teach this to the animal kingdom by elevation of the soul and understanding. You don't take animals to school and university and give them a degree, professor cat, or doctor dog. We elevate the Soul of the animal, that reaches the understanding level soul, in how to look after the physicality, because that soul is as intelligent as our soul.

We said before, when we look from distance on this planet, we don't see the soul of the King, the president, a farmer, a dog or cat. You see lights, knowledgeable lights, because they have create conditions of knowledge of existence, and the condition of this planet, in a condition of the universe, in a condition of the galaxy.

Next time when you see a Hearst going down the road with the body, next time you pass a cemetery, just think, "what's going to happen to that body? Do I want mine to be in that position?" Steal, rob and go when the time comes, (1:00). or give it to what I need, I gathered what I need from it, I escape with it as a soul, and I leave the P in the hand of whatever needs to be done.

We come to understand, the cycle of life has to preserve, to be correct in all dimensions, and in all physical conditions. It has to be in the process of understanding the totality, and not the individuality. It has to be understood, that we need to bring the condition, that we have, we should, and we care about our physical life. You take it to the park for a run to look good, to be perfect, to be everything that you want it to be, when you're looked by another admirer, six packs, hair done perfect, dressed to the polished nails and everything else.

What about when you leave that physicality? You are responsible for it. It's part of you, you created it, and it created you. Now, you cared about your souls. Now you understand the creation of the soul, you're responsible for the physicality, after what you call, "if you cannot control the departure," (1:02). separation, understanding of the totality.

Then, as we said, as man elevates his soul, and understands, we will have no prisons, we will have no courts. And if man understands this, will have no cemeteries, no crematoriums, and nothing else, because we have nowhere to bury this. Because it respects, I think it does what it needs, and gives what it needs. You can direct it to be the knowledge to one, to be the knowledge another, to be a lover to one, and to be essence of creation to the other, but the same soul, the same physicality.

You are responsible for it, you are born to create the soul from it. But when you made it, you have a new, and must have responsibility for, what is made. When you create a juice from using a machine. Do you throw the machine away because you've got your juice? This is the abuse.

This is then we look for "Fountain of Youth," everlasting life. If you understood, and in teachings in the past, I explained many times, you are responsible for it. Now you're responsible to understand the litter you leave behind, it should not be there. When you go to the park, you're well trained, you're mannered, you collect your rubbish you take it with you, you don't leave it in there. How come you leave your body on this planet and pull out.

You train yourself what to do, how to spend, how to develop it, to be useful in the next cycle. (1:04). And you decide about it. When you pack up your food pack, you decide where the plastic cup goes, in which bin, and where the paper goes, in which bin, and which bin will take the leftover of the food. But you don't respect, and consider what you're doing with your physical life. Once you said, bye, bye in the physical dimension, where it should not be there, because you said bye, bye.

Because we never knew we can use the soul to preserve it, to be with us.

The STP and STM from the moment of interaction, establishment of the first motion (emotion ??), should be inseparable from the time of the creation, not to 10, 20, 50 years on this planet. You are responsible for it. You have to understand how to do it, how to manage it, how to interchange between one and other, that both become the preserver of the other. We have an electron and a proton, the existence of the electron is to keep the proton in position, and anything that leaks out as energy is captured by it, that it can feed it back, that both can exist.

But we have not learned this about the life of the man. We leave it behind as a litter, that it should not be. Where it's been taken so much to build it, to put it in such a beautiful order, that it has to become the process of life, the process of change, the process of elevation of the other souls, through its fields and interactions of its fields.

Life has to be life for eternity.

Now, (1:06). it comes to the point of understanding, comes to the point of the teaching, that we have to, we must to, and we have the obligation to understand this. Would you allow, when your soul expands to bring in the D of physicality, or physicality to die within it? Would you shoot yourself in the foot, and want to run a marathon. This is the marathon of the life of the universe.

Then we understand, then we come to understanding the position of elevation of the Soul of Man, is not just for you to be free. You become responsible for preservation of the Soul of Physicality, and the physicality, which you have accepted to exist within.

Then, would ever man die of any diseases, or any disorder? It's very much, sometimes we drink the water, sometimes we swim in the water. Sometimes we are within the soul, and sometimes the soul is within us. It's us who has to decide, which one is the pleasure, or time, for what purpose. It becomes essential for all of us to understand this process. It becomes essential for all of us to be part of this process, (1:08). to understand the totality, to be part of that totality, which brings the change to all of us. I have made the man in the image of Myself. I have managed to bring that change, to become that process of change, to be in understanding the totality of the change.

STM - STP - Physicality

We have to have respect both for the soul, the Soul of Physicality, and physicality, because the physicality is an amalgamation of the souls, which their interaction, and collection of the work, creates the dimension of the Soul of Physicality in interaction with the D of environment, gives it P. Then at the same time, the collective soul interaction, creates the Soul of the Man. Where does man go? Where does man sits with this knowledge? (1:10).

What we need to do to bring this change - elevate the P

Where do we understand what we need to do, to get to this point? We need to be able to elevate, not the STM, not the STP of the Man, but the P of the man in the D of the time, position and place of its manifestation. But in all D it becomes that beautiful being. Does not matter where, on Planet Zeus, on the earth, or anywhere else.

Where we see the beauty of it. Where in the dimension of Universal Community, we don't become, "oh, these are from Planet Earth," when they finished with the physicality, they dump it, litter it around the universe, and they go somewhere else, to see what they can create somewhere else. They have no respect for their physicality, how do you expect (them) to have respect with their own soul?

Now you understand, you are part of the Universal Community, and maybe in your village you could spit, you throw the litter on the corner, on the dusty street, and that was it, the wind will take it, and dust will cover the mess. Now you have moved to a city, to a place where you cannot spit on the street, and you cannot throw your litter on the street and walk away. You are responsible for what you do with the dimension physicality of the man.

Responsible for STM - STP - Physicality

We need to understand this, we have no choice. (1:12). We've been, we've been brought to the level of understanding of the totality in all dimensions, and not only in one. Both the Soul, the STP, and the physicality of the man. You are responsible for three entities, not just for one. Feed it, and enjoy it, and dump it, litter it when I'm gone. It's the totality of the knowledge, understanding, and it's the totality of what we call, comprehension of the total need for understanding of the totality.

We have to bring that change to man. We have to bring the change for ourselves. We are not doing it for somebody else. It's our body, we created it. What do you do when you see your arm, cut off, it's on the floor? You walk away, "oh, I used it, it's there, I'll make another one. Or do you pick it up, you're try to stick it together, you try to get it to work. You try to get it to function in all dimensions.

It's us who has to understand the work of the physicality, the work of the STP, and the work of the STM. (1:14). When you go to a new dimension and you want to put the STP out, would you create a physical body, which is an acid, and it burns and is in pain, and is suffering? Or would you change the strength of the soul, that it changes the strength of the STP, that you create the body in that atmosphere, and in that condition that it's perfection and beauty.

But we don't take from the environment what we need, and dump the rest. We share, you share from the soul, STP with the environment, that allows you to create that beautiful physicality to enjoy the environment. You are responsible for it.

You are more than responsible for it. You have an obligation to it. You have to understand where we are, and how we live this physical life. We become that process, we become that understanding, we become that respect in all three dimensions. And then we understand how much, to what level, which way we are sitting, (1:16). and being able to create that D in all three.

Now, we had hit hard (with this truth about P), and you have to understand it, and you have to be able to be part of it.

We need to be able to bring that change to ourselves, we need to bring that to ourselves, to be able to transfer the knowledge from all dimensions, does not matter if you're in South Africa, in Moscow, in London, New York or anywhere else.

Where the pieces of the animal, for you, which is spread across the planet, carries information to division of the soul to serve, not in the dimension of physicality, but as energy fields up elevation of other souls.

From today I am not going to end up in coffin

It is what you have become aware of. As I always said, you are responsible for it from today. Because, you know from today I am not going to end up in that coffin. I'm never going to be there, I'm never going to want that pile of wood to be burned, to become dust and ashes. Because I decide, I have respect for what I've created, and what has created me. (1:18). And it'll never be in that pile of wood. And it'll never be in that box to be a coffin, because I look after it. Do you dump your mother or your father, once you're created and managed to become successful, and dump them, I've got nothing to do with them, even they've been my creator. How can you do that with your body?

Now you are responsible for all levels of it. Now that you know, you cannot litter the universe with the physicality of the Man, once the man goes. It's in the writing of Bahulla clearly, you cannot transfer a body more than 1 hour, from the point of death to the burial. Because he never understood, that body should never exist, to be one hour. At the same time, if you die in planet Zeus, should not earth become the cemetery of all the human race across the universe, that they bring the body home to bury.

Today's 21st of April, it's what we call the first ?? , the beginning of the Bahai New Year. But have they understood at all, what they are talking about? Or this is another, what I call, amalgamation of nothingness. Nothingness changed with what they call, the new Messenger, because the same problems carried out. It became ideology, not a religion. You have to understand, you cannot become ideology. You have to understand the process of creation. (1:20).

That you don't become the litter, that wherever man dies in physical dimension in the universe, send them back home, burial ground is earth. We won't have enough space on this planet to bury our dead. Because now they come from all over the universe. It's not just if you die in Tehran, and you're American, we send the body back to New York. How much body, do you want to bring from across the universe back to earth, to make it a burial ground? Worse burial ground, then man ever known. It should not be a burial ground, Earth should be the beauty as it is, where everyone comes to enjoy, not to dump the litter of the physicality of the man across the U.

The teaching of today is for you for the first time to consider what next, with my physical dimension. Where if you understood it, there is no, never, next, because it's always there and it's part of. There shall be no death, there cannot be death if you know how to transfer.

I stayed on this planet thousands of years - never died

I stayed on this planet for thousands of years, never died. I just transmuted, from an old man to a young child, to a new born, another cycle, and then another cycle. The soul is the same, change of the P. From the Moses, to Jesus, to Mohammad, to the rest, to the first man, to another man. (1:22). A nomad, a man in the mountains of Himalaya. All is the same soul.

That's why when the father says, wait till tomorrow night, I'll tell you another story, because he said the story tonight, he knows what's inside (for) the next night. He uses the same inclination, and the knowledge of the last night, to tell you the new story of what's going to be the next night. What Mohammed promised, what Moses promised, what Jesus promised, is the same soul. He never dumped the P. The same as you never found the body of Christ, because there wasn't a P.

Last week was a Christian Catholic Easter, and this Sunday is the Orthodox, what happened to the soul of the Christ, in these two Sundays? Seven days in the land of "no-mans." Or was it again a creation of man, for his own ego, for different needs.

Ask where your soul has been, what process has it gone through. We saw this in ?? How come it elevates? Today you had a chicken in the morning for breakfast, or chicken nugget's, at lunch time you had the lamb roast for lunch, and dinner you had the steak with rice, and you had bread with your lunch. You had whatever potatoes in the morning, in different shapes. How many different souls have you consumed, (1:24). during the day in the D of physicality?

Then you understand man does not need to consume. Man needs to be a giver and not a taker. The logo of the Keshe Foundation is very clear. We are here to serve, and not to be served. It's not a waitress job. It's the service for the elevation of the souls. We are not a religious group. We are not, god knows, whatever. We are a scientific organization. We try to understand the science of creation. The science of knowing.

As a guy told me, you talk very good, but you can't show anything in physicality. Show me you can do it in the EU. It means you haven't even understood the process of the creation, let alone you need a machine to be seen, to be shown. Put an energy system in the market, then the Keshe Foundation will be believed. Magic of Christ was his elevation and transmutation.

Too well educated for magic - need to understand

There is no magic, because you are so well educated, that no one can create your magic, you have to understand, what is the real process, that it looks like magic. The reason of creating all these processes, even when we ask for a donation, and sending setting up the team, it's through the process of cleaning up the process. Elevating the soul of the water, creation of other things, we can bring that processes.

It's not just the man who gets an enhancement machine, it's the animal and the tree gets the same elevation through the process, that the man creates for the elevation their soul, then they reach the same elevation as the man. The process of setting up the CO2 absorption processes (CO2 Buildings), the process of setting the Enhancement Units for farming, (1:26). is not for you to have the better harvest, because you always look at your own pocket. It's that to start the process of creation of elevating, what we are responsible for on this planet, in a dimension of their physicality.

That, as I said, when the Messiah comes, it's heaven for every creature and creation. Messiah has come, and it's for the elevation of every existence. But we hide it in the container of the water, we hide it in elevation of absorption of CO2, you put a water in the rivers and we see, that the fish get elevated in the D of the soul. So now you can understand, I've done a very good job.

The elevation of the soul of this planet will bring that change. It's no use when the man knows what to do with his physicality, but the lion still kills, and the plant opens its mouth to capture a fly. The process of the teaching of Keshe Foundation is to bring the fundamental change in all D.

Then you understand how, as I said, I've taken you for a walk, not only changing your life by producing Gans's, but developing the new enhancement center for capture of CO2, and then using it as a fertilizer to enhance the level of the plant, not for your harvest, but in a way, that you don't need to eat me, I am here, you can radiate my fields to yourself and absorb it without ever consuming me. (1:28).

I become that orange and you're the water, the saltwater and the Gans's, which you have contained within the skin of the man. Now you understand how simple, somebody who knows the knowledge of creation, can walk you through to do, what is needed to be done by, for the whole creatures of this planet, and not just for man.

This process has been going on for billions, it won't change overnight. We build the places to absorb the CO2, we come with the technologies to change the fields into matters into the small stars we call it, the Gans's, to change the totality.

The biggest question for mankind will be, what would in the future this planet, would look like? When the plants are there through their souls. The trees are there to understand, if I'm here, then that tree there, needs more space. So I shortened myself a little bit, let him grow, I can always exist. How I can cut myself, that it shows its beauty, and not my existence. Don't the trees do that, don't the shrubs do that nowadays.

Now we bring that essence, that you don't need to take from, but they become the giver, by taking what is given to them, in the D of the need. Then you understand what it means, I made my image of myself. ?? image of the Soul and the Physicality, but the image of correct understanding, and sharing, and giving, (1:30). and taking what it needs from the environment of our existence, without messing up and littering about. It's mine or the others which are consumed.

Life should not be starting on a table of luxury, and what I call, a flush of a toilet. That table of luxury of food should not exist, nor the system, that you have to flush. In so many ways, what man has not understood, is that the initial process of life, when you see the mother drinks the water, converts it to milk, feeds the child with a love of mother, in that milk. That milk becomes food for the nourishment of P of that child to grow.

The process of the creation of Mitra and the daughter, is the process, that how the life of the man has to be. How the process of the creation for man across the universe has to be. As we always said, the Creator is the creator of all, the man is converters. That conversion comes by the level of understanding and no more.

In the coming time, mankind have come to understand, life means life, from now to eternity. (1:32). From now to the point of understanding the whole understanding. We need to understand this process, we have to understand this process. We have to become aware of the totality, not part of it.

Up to now, till the beginning of the teaching of the Keshe Foundation, you were locked with the STP, you call it the, whatever and whatever. Now you became aware of the ?? soul, the STM and STP. Now, you're responsible for what makes the Soul of Physicality, and the Soul of Man to exist. We cannot use it and then dump it.

The only cemetery left for the body of the man, should be in the memory of those who became in touch with that man, and nothing more, and nothing less. There should be no cemeteries, there should be no crematories, there should be no where, that we have people we imprison that physicality, and there should be nowhere where we judge it, as he has to be judged by itself. He has to find his own place, and he has to be there for eternity.

Not to dump P in the EU

Now you thought you traveled, (1:34) to dimension of the Soul of Man in an Enhancement Unit? Somebody will be outside knocking on the door, "excuse me sir, what are you going to do with the physical part you've left in enhancement (unit)." What are you going to do with the next guy wants to get in. There is not a dumping ground. We haven't opened in new cemetery inside the EU, for you to elevate your soul, and leave the physicality behind. Oh, just dig it, dump it somewhere else, as it suits you.

I brought the knowledge of existence, right to your understanding, right to your emotion of understanding you're responsible for that finger, you're responsible for the hair, and that eye.

(Sorry about the interruption, I just been informed that in past half an hour we have received over 15,000 Euros, as donation, towards the 150,000, through the bank and a PayPal operation. We need more to be able to achieve.)

In understanding the totality, now we become responsible for, not only our soul, (1:36). not only the Soul of Physicality, but for the physicality itself, which led to the creation of it. Did Christ leave a litter behind? So, why should we. Going through the transmutation was complete, transmutation of the soul and no litter left behind.

We have to understand the whole process, the full process of the creation, and not just the part that it suits us, and is to our benefit, and is in our advantage to be. What do we do in the next step? What do we achieve in the next level of understanding? What are we responsible for? As in all your prayers you say, "the kingdom will come," but the king is you, and kingdom is serving of the soul, STP, and physicality of the man. You have no other kingdom. You have no other responsibility, except for what has created you, and what has brought you to this level of understanding. (1:38).

There shall be no kingship, except king of the man in all three D, as your STP as a king, as the STM is the same king, and the physicality of the Man has to be the same king, that it's one which has ?? the totality, there is no difference in that D with the life of the physical man and the Creator in that D.

Don't forget, there must be a soul, and there must be a Soul of Physicality, that its physicality has become the dimension of the universe we see, and we are part of it. So in a way, the soul of the Creator, the soul of the physicality of the Creator to be the universe, and the manifestation of its physicality to be the man. They all mean the same thing. I made Man in the image of Myself, as I am the same in all images. Doesn't matter the soul, the STP, or the physicality of the manifestation.

We need to understand more, where we come from, and where we are destined for, and how do we create that condition of what we call, manifestation. (1:40). To be manifested in the D of the soul. To be manifested in the dimension of the physicality, or be manifested in the dimension of STP. Which level, which strength do you want to operate. But at all time, we have to be fair and correct with all three dimensions.

Now the process of what I call, totality, understanding of the totality, starts from today. Your responsibility is not anymore, your child, your husband or your wife. Your responsibility is the embodiment of your creation, what is going to happen to it, when I'm gone? Or am I leaving it behind, as I'm responsible for it. And if we come responsible for it, I am responsible for its elevation, and I'm responsible for elevation of the others who get elevated by it.

STP is just observer

How do you want to be remembered? In the books of the man, who weather and get destroyed, in the dimension of the Soul of Physicality of the Man, (1:42). or in the D of the STM? Whereby the soul, you will be remembered by all created beings in the U. But in the Soul of Physicality, you are just observer, and participator in the STM, and the P. Or just in D of physicality, a king and a crown one minute, and in a dumpster the second, as you're dumped in a deeper six foot, what I call, grave, that he cannot be seen to remember, "I did not even respect it, it's away and it's gone."

As I said, once, to one of the world leaders, how many kings and how many queens, and how many, many, many souls in D of physicality have lived, embedded, and we don't even know where they're burial ground is. Does man need a burial ground, does not matter on Earth, in space, or in D of your own existence.

I hope I opened your eyes to a new dimension. I hope I opened your eyes to understand, that I don't need to give you an EU to show the proof of the technology. I don't need to make something to show at least the thing works. The thing has to work within you, within the structure of your soul, and your P, and your life. The rest is there to elevate those who have not managed to understand that part. (1:44).

Thank you for today, I hope we opened a new chapter in understanding, and I hope it becomes easier for you to understand your own existence. We go through a break and the come back to answer any questions. Meanwhile please support the Foundation that we

can reach that hundred and fifty thousand, that we can bring that change for the D of P for those who cannot bring a change for themselves.

In time, we will be adding to the knowledge of the man, but man needs to add to his own knowledge by himself through the dimension of his soul, ?? STP, and P of the man, and connects with the other souls of the U, and becomes as part of Universal Community. We will not have international gathering of people from all nations. So in the Universal Community, we have a connection of all the souls together, that they make that UC. We celebrate all the time, and not in the specific times.

Thank you very much, Rick, and take us through a break and then we come back. (1:46).

Proofed to here >> continue on

>>> BREAK >>> 429 KSW April 21, 2022 (1:52).

K- … We hope we can share more knowledge, in a way understanding the Totality. We have just been informed donations are continuously coming in, and we .. have just passed about 10% of what need. They're looking for large donations, or money to be granted the permission to return, on a completion, and completion of this work.

We ask not to be generous, we ask to bring that change. Help us to bring that change. And that change comes through staying independent, as we've done for 20 years. We have bowed to no government, and to no structure. We have kept the whole thing the same way for the new expansion and changes in the KF. (1:54).
Any questions that we can expand on?

Q: .. Is my train of thought correct, if I relate the soul of the Gans of plasma, the STP, to the Nano coated plate and wire, and physicality to the zinc plate?
K- What do you mean?
Q: .. The STP would be the Nano coated plate and the physicality would be the zinc plate, is that a way to relate them?
K- Depends how you look at it. You see, if you look at it, when we look at a Nano coated material, the soul of the element is outside. The Nano coating is that STP, (1:56). and the physicality is the Cu inside. .. Because that soul of the thing, which keeps the whole structure together, in the Nano (N) layer, in outside controlling the inside, but is at one piece, with that piece of Cu. It has a length, it has a dimension.

R; Exactly. He goes on to say, if so does that mean in order to manifest the soul, a wide gap is needed between the two plates? Because it has a higher strength order, and so more spaces are needed.
R: But I think maybe the gap is in the N coating? is where the where that was ..
K- More or less, yes. If you look at it that way. Yes. If you look at it that way, yes.

R; We were talking even yesterday in the Plasma Group about the N coating and the way you talked about making N coating for example, the inside of a reactor, where it might take a month of steady N coating to provide the numbers of layers, to give the field strength to be able to do the job, basically.
K- Yeah
R: So in that case, a wider gap or more space is needed for that job, you might say?
K- It's one of the options. It's one of the possibilities, yes. It's one way of looking at it

Any other question

Q: Stephanie … the Italian group asked me, to ask you how to make, to ask you to make a clear announcement, about how to make the donations, which is the direct way for the foundation to have money directly to explain again, the fast way to donate.

K- Send it through a bank to the Keshe Foundation in Holland. The account is on the screen. You just because, you're in Italy, you just need to put the amount, Keshe Foundation, and the IBN number, which is an L, that's all you need to do. It's a three step process for European banking. Because we are working on a ?? and straightforward name, account number and the amount. It says, just put if you are lending, or you're donating to a foundation.

We need to raise this funds today to be able to take to the next step, independent foundation for our work, that we stay independent.
So we'll be able to bring that change, both for environment, for space technology and everything else.

Any other question?

Q: .. (2:00). Can we use a Gans based, beta decay process, to create a beta voltaic battery with no hazardous side effects of radioactivity? How to produce Gans of K40 and deposit it on a N coated wire?
K- If you can do it, yes. One of the first papers I wrote, I became like Alchemist of the past. I thought, if I let this knowledge go, in the total understanding, and then it can create a problem, that some people will grasp it, and use it to abuse the others.

I start writing the abbreviations with the sequence, that I knew what it is. Like instead of putting potassium, K, I put Ca, but I knew this is for the next one. So you cannot decipher. If you read some of the very, very first papers I've written. It needs deciphering, because I use what they call, a coding system, because I didn't want nobody to abuse no

one, if they understand this and understood it, if they were clever enough they will not do this.

And a chemist picked it up, he said Mr. Keshe, do you know chemistry? I said, yes. He said you in this paper you have put Ca. He said, it means you don't understand anything about chemistry. And I looked at him, he was a Belgium. He was the first guy, when you look at that blue reactor, (2;02). which is in the exhibition somewhere we've shown it before. He was the guy who gave us the facility to build that first reactor.

He said you're a nuclear physicist, but you don't understand chemistry, you put here calcium. I looked at him and I said, do you think I'm that simple to give you the full lot, that then you can abuse it, because his target was to build the energy system. He said, I cannot work with somebody who doesn't understand chemistry, and calcium does not have these properties. But look at the calcium, potassium and the others. How you look, if you put, you could decipher a lot of my writings, early writings, needs deciphering, understanding the code. Yes, you say you want to use potassium 40. I understood how to create that K40. Do you need with the knowledge you have, to create potassium 40, or the Gans of it.

We can create the heartbeat of the STM

With the new knowledge, I was looking at the video from the research center last night, we have managed to create the heartbeat of the STM. (2:04). In that process, goes back to knowledge extended knowledge of the totality, how to create that heartbeat? You create the heartbeat of the man with electronics. We have created the heartbeat of the Soul of Man with plasma technology. Did we use any K40? Did we need to create such a condition? Did we need to go that far, now that the knowledge has come so forward?

When you sit in Enhancement Unit, I'm not interested in your leg being short, I'm not interested if your eye twitches, I'm not interested if you came here with a cancer. What I'm interested, I deal with the boss, where the boss decides what is needed to be done with the soldiers. Does the Soul of the Man, has decided I'll have that leg shorter, that I get enough attention, that I can absorb the soul. Now I'm elevated? Does my leg increases by two inches and I'm not short anymore. Or I have replaced the interaction, interaction from the beginning to the end, by elevation of the soul.

On the other hand, do I need a Enhancement Unit to reach that, if I can tap into Universal energy and do it. We don't see people from the U, the Universal Community walking around with EU in the back of their pocket, or the back of their, towing along do we? (2:06).

Videos - people have accident - disappear and suddenly reappear - UC

Than if you understand this, watch some of the videos you'll see. You'll see one second a person, then one second you don't see. How can you elevate your soul rapidly to cover

your physicality, when it's in a time of danger, and then bring it in the P, and then walk away.

Now we have the technology we can see the recording of theses things. Some people say what happens. No, it shows directly, he's not one of us, us as a human race. Go on the internet, there are many videos like this. Now we have the capability to do, to record. Then you understand exactly what I've been teaching. Scan the internet for, there are a few pictures from the traffic cameras. You see a car, an accident, there is no guy, and (suddenly) there is a guy gets up and walks away, as nothing happened.

Then you understand, when I tell you, a third of our population are travelers of the universe. Now you can check it, you can see it. But how do they manage to do it instantly, their soul is aware of the physical damage, coverts into covering the physicality, and then back again with P. Exactly what the Christ did, resurrection.

How can they do it? How can we just say it's a magic on the videos. How many times can it be a magic. If there's so many magic's, can be recorded in so many different situations, then by god, now you understand, we've been amongst you longer than you think, we've become you, that you don't really recognize us (2:08).

Just go on the internet. And then does this guy carry a quarter of potassium 40, does he need it, or his soul coming from another position in the universe, and in interaction with STP has taken the shape of the physical life on this planet, which is the body of the man. If he decided to be in the shape of the man. Maybe some of them are in the shape of a tree, and some of them are happy to be a lion or a cat.

So, the dimension it's understanding it, not just trying to create, that's as important. Understand the knowledge, the application and implication of the knowledge, and then we see how fast we can move to the next level.

Any other questions?

Q: .. Regarding this fundraising effort, what did the possible to redirect the funds from Keshe Coin to this for this purpose?
K- Yes, you can use, but there is no problem. (2:10). But we go through the process of the present situation. We can add those to it, there is no problem. You can donate your coin, or say my coin to be used, then can be returned back, it's no problem. You have to keep a record of all the coins you have donated for, and tell us which one you want to lend, because there are many people who bought numbers of these coins

Q: So in order to redirect, let's say the funds from the cash coins, or what is the, is there a procedure?

K- No you just write to the KF, I want my coins to be a donation, or to be used for this purpose and returned, and you date it, which coin which date.

Thank you very much. The process of raising we're reaching nearly 20,000 at the moment. We need to go further to complete the process. If you have you can do, but you think I don't want to give it away as donation, or they just lend it and the foundation will return it to you back.

Any other question

Q: … about the donation or lending is there an option by way the purchase of the Keshe Coins, (2:12). for an immediate transfer, or as a temporary deposit?
K- It's is the same, you decide. You can buy the coin, but say use the funds for it, as a donation.

We have raised millions to get this facility sorted, it's not pennies. It's the process, which we told you during the past few months, what is to come, what is to come, because we work on that basis?
Any other question.

Q: Nikolai ..
K- I hope we didn't shock you that you're responsible for your own detail.
Q: Only a little bit. My question today is, what is the STM? Is it a principal star?
K- It's both, it depends on what position. If it there to be the receiver, it becomes in transition of what we call, the end product. If it is there to become the giver, yes.

But don't forget in all D, the Soul of Physicality, the Soul of Man, and the physicality of the man, we play both, while we are giving, we take. Once you love a partner, you love back, and the more you love, the more you love back. (2:14). It depends on position, time, place and emotion. It's the emotion, which is the most important factor in connection between all three.

Go back to the very original health teachings. We continuously referred to the emotion. It's the connection, it's the field, which has no dimension, but has connection between them. The emotion of love, when you love your child, when he is right with you, then it shows us with a cuddle, with a kiss, with the physical interaction. So the emotion has brought that physical dimension into it.

It's the same with the Soul of Man and Soul of Physicality of the man. The emotion, which is transfers the dimension of the knowledge, or information from one to the other. Nobody hands a book, this is the, this is a, I don't have the receipt. This is the receipt for me, I gave you 10 Love and I gave you 15 loveless. It's that what we call, the emotion, is that carbon in the structure of the connection of the field of the man, in amino acid (AA).

This is why if you go to all the teachings, I said, the emotion of the Soul, the emotion of physicality. Soul has emotion, because that's the only way through that field of strength, we call it emotion, that connects itself to the physicality, that the P to be the same emotion, connects itself to the physical dimension of the man.

There is nothing more important in the cycle of the creation, then the emotion. What we call emotion, (2:16). is the transfer of the feeling, transfer of need, transfer of giving. We created a word, emotion for it. But in the fact, it's connection between one dimension, to another, one strength to another strength.

If you put 240 volt supply with 120 volt supply, together it explodes. But if you put a transformer inside, you play with it, you can feed both into the system. That system is emotion, both can coexist, both can come and go. You put a plug at 240 volts, you put a transformer, and then you get 110 volts out. The color transformer in the cycle of the life, or what you call it, emotion, because it fits to the two, it communicates within the two. You put a booster, you change to 110 to 220, it's the same. That again, you call it, emotion. Man has chosen too many words, for the same thing, but in principle, in different levels, that we understand it, which side goes, then we call it, a transformer to do with electric, when it's got emotion, it comes to D of physicality, but it's the same thing. It's the same dimension.

Q: When we go one level further, the Soul of the Creator, is it the same, the same way?
K- We came from it, how can it be any different. There is another emotion between the Soul of Man and the Soul of the Creator. It comes from it, the STM comes from the STP, comes ?? from the man ?? ?? no ?? attachment to the physical body, (2:18). We are again, our soul is that part of one cell of the physical body, which then again interacts, and connects and the rest of it.

Q: So, when we feel the emotion ..
K- Emotion is a connection, how we feel in 2 dimensions. When you have emotion something is what you love, in the D of the emotion of the STM, it has to have a connection. What do you love. So physicality must have recognized it, and made a connection with it. Otherwise your Soul of Physicality cannot just walk around with the lover all the time, ?? with the one you love.

How do you love, fall in love in the level of the Soul, and not in the level of physicality, what happens then? Soul mate, soul lovers, understanding connection with.

Do we reach to the level, that we create a fields, which we are capable to do, in the level of falling in love with the Creator? Yes, we can. Many have done. All the, what we call, universal Messengers come from that source. We are translators of the of the emotion of the Creator, but we're created from the source. Which is we are a part of ?? its submission (or emission ??), understanding of the creation. (2:20). We are another as I call it, you call, it transformer in the work. You are used to 220 volts to 110, we are which is from 1000 volts to 220.
Q: Oh many, many, many Thank you. You've opened the doors again for me. Thank you.

Any other question.

Q: **..** if Mr. Keshe would like to update us on the condition of the Core Team member.

K- Still the same, it takes time. We have another Core member in problem at the moment. We hope, it's 2 of them now. We hope they both come through it. It comes, we're all aging, we're all aging in D of physicality. He is one of the youngest core members. It will take process and the thing is, he has to accept that change. We understand the reason he's got there, but he himself has to understand the elevation of the soul to accept that position. We have now another Knowledge Seekers with the same problems in past few weeks.

Any other questions? (2:22).

Q: … Please help me to understand what Mr. Keshe says about amino acids. In a video 103 One Nation One Planet from February 4, 2020. Mr. Keshe says, in the vessel you don't see amino acids, because the soul of the Creator is going up, you feed on the energy of amino acids to lift up the soul. So the question is, did I understand correctly, that if we don't see the amino acid on the surface, then that amino acid is being used by the soul of the creator of this reactor?
K- If .. yes, in a way yes. It's the way the plants work. You hardly see the fat on the leaves. You hardly see .. there are some plants, that if you stand back, you see the amino acid floating on the surface of the leaf, but they're not on the leaf. They transfer energies. They are one or two, what do you call, plants, especially in Africa, you can see sometimes.

It's very much like you see the mirage, you see it on the surface of some of the leaves. Which means, the AA does not need, does not have the strength to attach, but it has the strength to be within the vicinity. It's like another Nano (N) layer, not sitting on top of each other, (2:24). but being distance, but connected in feeding the field. And then once you create that AA you don't need to create the next one. That AA there becomes converter of the energy from the environment to the leaf, and stays there in that position.

Most of the plants when you look, the amino acid layer is very close, you think it's the leaf. You touch it, you feel the oiliness. But in some plants is so strong, that it stays off it. You see by the shimmer on the leaf. So you do not need to be attached to it, you become the receiver of energies.

Any other question.

More about Salts

Q: .. another question about the use of salts from the electrodes in the reactor. At a conference Mr. Keshe said, that salt is used to contain snake venom, are there other uses for the salts?
K- Salts are the essence of the connection of conversion, yes. Yes they have, and it has many, many, many, many applications. (2;26). It has many, many. It has numerous applications.

Salts are intermediaries, and the salinity, and the strength of that salinity, the mixture of that salinity, dictates the manifestation of the matter state. If you have, let's say, salt of magnesium, salt of potassium (K), salt of calcium (Ca), and salts of Sodium (Na). One is one, one is three, one is two .. 1, 2 , 3 ,and 4 let's call it. This combination will give you the cell of the inner part of the heart in a wall. Now, the first one becomes 1.1, but the rest of them stay (the same). Now, this combination fits to be the inner cell of the kidney.

Even the lymph distributes the same energy, equal to your everyone. Your lymph system is a mixture of fields. When it comes to the salinity, converts to the element, which it's going to be. So it's a gravitational (G) field.

And then the biggest question comes in the world of the creation, what controls, what creates the salt itself? What creates that salt? What becomes the initiator of the creation of that salt? (2:28).

Then it comes to the point of, in which part of the body, in which strength, which emotion, which direction dictates the salinity, and change of salinity, that one becomes the middle, and outer layer, and inner layer of any structure?

We are created by the dimension of the creation of our own strength, by our own understanding and no more.

So, when you speak about the salt, try to understand the totality of the concept, and how it's made, and how it's controlled, and how it's decided.

I always said, if you go into the game of lottery, they give you 49 numbers and you choose 7. You need about 14 to 18 million combinations, (2:30). to get it right. What happens now if you change it to eight numbers to get right. What happens now, if you have to get 10 of 49 right to win the jackpot, and you got to get it right every time. The cell of your skin changes in the same position every 28 days, the same color, the same thing. If you had a scratch on it, which was damaged when you were a child, it's still there, "look I had this scar when I was a baby, I'm 50 and it's still there."

So it has to have the memory of the salinity for that cell, in that position to manifest in the dimension of its P, and the change. If the body makes it over, so many times, it becomes part of its structure. Your child will have the same spot on the same place. Your child might miss it, but your grandchild, "Oh look, he's got the same spot in the same place as a dad or grandpa." Yes, because it remembers the salinity, it's become part of the memory of the gene of the soul RNA.

Then, we understand more and more, about the process of the creation. Then we have the understanding of the totality of the creation. (2:32). Then we need that understanding to become in principle, to understand how even, interaction of M fields leads to creation of a gravitational condition, which we call it, a salt.

If the body of the man through the interaction of fields can create, M fields of the salt, it doesn't create the salt, it creates M field of the salt, that creates that cell. With the present knowledge, that the Knowledge Seekers have, you should be able to do it too.

Translating Emotion of Language

If you noticed we changed the name of all the "Corona Teams" to Knowledge of a nation. "Keshe Brazil Knowledge Team," which means you possess that knowledge now. It's yours, It's within your culture, it's within your language, because you shared it. British cannot read the Portuguese, but they have a translator. But would they get the essence of the translation, when they translate it? Or is it just some words to read?

Where the Brazilians when they read the same, they understand the emotion of what that word means? We speak the language, we don't understand the language. 99% of the people that I come across, they tell me, you are Englishmen, because in a very small way, living in England for such a long time. I understand the culture of the language, not like a German, (2:34). I don't read the words in the book of the language.

In one occasion, the word "bastard" was used, and the mother, because speaking English, thinking she understood everything says, "my child is not a bastard. Why do you call my child a bastard?" Then excuse me Madame, this means, is not correct in language, doesn't mean he has no father, or is illegitimate. But this is what it says in the dictionary.

We have to understand the essence, it's the same you have to understand the essence of what it means to have that salt, what it means to create the strength. You don't need to have the salt, but you have the strength of the salt.

Homeopathy Salts G field not physical

In homeopathic there are six salts, which they say they cannot find. It's there, but is defined by the developer of the technology of homeopathy, he talks about 12 Salts of the body, 6 or 7 of them, we know the others are explained in a very ?? near. But in fact, he understood the transmutation of the energies, which behave like a salt, but you cannot actually physically make them. It's an atmospheric condition of this planet. But they did it, they are there, but they cannot be converted into physical matter, that we see, potassium salt, or magnesium salt. This is what creates a lot of problem with homeopathy. It creates a G field, which allows that to become into.

If you look at the combination of the amino acids and the salt, and the level of the salinity in them, as a field strength. (2:36). The body of the man with all the cells it has, compared to what is availability, is nothing. We can make the most complicated, this body of the man, with all these cells in it, with combination of the skin, the heart, the brain, everything, is a speck of dust, to what is possible to make as a creation in the universe, in another dimension of field strength. What you cannot create, you cannot have. But in another D we can create different strength salts and varieties of it, with ?? ?? you get a different kind of features, more sophisticated, more elaborate.

But you need to create the fields of it. This is what Knowledge Seekers have to understand. This is what the Knowledge Seekers need to become aware, that we, as what we call, the process of the understanding, come to understand more in the whole process of creation.

This is what I keep on saying, move away from the matter state, move into the fields, because the fields, then you understand. You create as a first thing in this (CO_2) Box, the field of the carbon, not the carbon. Where that field interacts with the carbon plasma in the air, with the presence of the salinity of the salt creates, with the water oxygen, the Gans of CO_2. You don't create the CO_2. Between the plates with the Nano layers, and the Zinc plate, (2:38). you create the condition of the field.

This was very clear, you take the same box, the same plates, put them different, and change your salinity slightly and see how your production changes. See the color of the Gans's are not the same. So, you produce the CO_2, but on a different level.

This is exactly what happens in your brain. Your brain is made of CO_2, and what we call zinc combination of field energy, becomes the structure of the body ?? . Why does (Carbon) monoxide gas is dangerous to life of the man? If you get caught in a state of monoxide you die, why? What does that field strength, creates in the brain cells of the man. It creates a new salinity, which connects all the things together, everything gets mashed up, communication gets everywhere, body cannot function, it shuts down, and you die. Now we understand the process.

You get CO_2, or you get carbon monoxide, and then we are in big problem, why? Because the amino acid of the brain has ?? both, but in the right combination, that C monoxide fits into the connection, and the gravity of the brain of the Man, and wallah. All gets synced into one, no communication and you die. Because it creates a different salt level by changing, inside the brain, and the structure of the connection. (2:40).

Any other question?

Q: .. They're asking how the sodium chloride are produced in the sea? Is that because of the sunshine on the water?
K- Explain what you're asking?
Q: We just don't want to know how the sodium chloride is produced in the sea?
K- What is the sodium chloride? Rick, would you like to bring it up on Wiki?
Q: The food salt .
K- I know, I know, I know. You see, if you look at your Gans boxes

What is it, what do we symbolize it by. When you look at this material, in the sea, we do not have combination of the elements. We have a combination of fields of the element, (2:42). that the interaction of the fields with the environment, creates a condition of the creation of the matter state of the elements, Sodium or chloride.

If you look at it, we all know, we all been there. And if we look at something very fundamental, where we have in the what we call, work of the systems, where we have direct interaction of the fields of the Earth, or the environment. I'm going to go somewhere with this. It's a beautiful question, actually beautiful, because this might answer a lot of things to you.

You ask how is it produced? When you have the oceans, and with the microscopic Nano materials, which are in the ocean, the gold, the silver, the copper, the whatever could be, creates the fields in the water, with the interaction of the fields above, creates what we call, the salt, the field strength of the salt, that with the presence of the Inertia, (2:44). of the water, and the environment, gives you that taste of salt. That's why the oceans are salty. Because these are mixtures of the elements in the ocean, have created that condition, to create the salt mix. You can go from one ocean to another, taste is still different, even (though it is) salty. But now we come to something else.

We have earth, and we have a running river inside. Mono environment from where it comes. We dig a well and tap into it, and it's sweet (water). There's not much salt in it. So what it means, and this repeats everywhere around the world, that's why we go to the springs. Wherever you go, you'll find sweet water, you drink from the springs. Very few springs are salty, if they come from the source in themselves based on them.

What does this mean? It means the amino acids, which created the water, which itself is amino acid base controlled by it. Does not attract the field strength of what is the sodium and chloride, as the Earth layers have become a filter to it.

WL do you remember when we went to Inner Mongolia, and the Chinese government wants to get the salty land changed, instead of all calc and salt on the land. Are you there?
Q: yes, yes. (2:46).
K- Do you remember that what they said 30 - 40 centimeters below the surface, the water is sweet, but the land is salty. It's the same process, the land absorbs that salt, which in the sea becomes part of the water. You need to change the environment above the land, that this layer of land does not absorb salt, and allows the salt to go. As the water does not carry that salt, it goes to a lower level. That's why we created that process, that we said, with the with the Chinese authorities in Inner Mongolia when we were there.

This filter of land, this layer of land, in that 30 centimeter, does the separation of the salt, which comes from the atmosphere. So it's the combination of the metals in the land, which dictates the absorption and creation of the salt, which salt. It's a M field strength absorption. Then through to Inertia, that converts it to a grain of salt. If you dry it. That's why you have a sea salt, because you have converted the Gans into a matter state, through the Inertia of the water, and the environment. You have been there, we've seen this in Inner Mongolia.

So it's the filtering. It's the way the color of skin creates different salts inside. We have a different skin color, we have different behavior, because we have different muscle

tissues. You're Chinese, (2:48). one is the European, because your salt salinity is connected by bodies, absorbed from environment and converted in the AA.

The sea does not add salt into it. The sea creates its own salt according to the interaction of the materials, which are available in it, and that creates a G field of the salt, in interaction with what is, on the ?? surface of the ocean, and what is within the ocean, that creates the salinity of ?? what. In some parts of the oceans, we get the magnesium salt more than the others. We get different fish, we get different understanding, and creation.

You can do the same in your Enhancement Unit. You can do the same in your CO2 Boxes. You create a field of the salt, and you can produce a salt of the K, Na, Ca anything you like. If you create the condition of the M field of the Chloride you get the same. Then you create salt.

You do this, if many of you looked at the wires, sometimes above your Gans production you see these salts. They stick to your wire. We collect it in the lab, in the factory. The fields in the box is not matching, for the atmospheric condition around the wires, creates that absorption of the salt, extraction of the salt from the environment. You put 10 grams of salt in your box, (2:50). but you find half a kilo of salt on your wires. Because you created a M field environment. Now your salt in the box is not in the matter state anymore.

The salt you added into the box, due to the Nano (N) material you put in, now is in a different environment. It's a Gans, it's a M field of the salt. This M field, the way you absorbed the CO2 and amino acid, now absorbs the salt in the environment. But the situation and condition of the AA on the surface doesn't allow it. So it's hanging above somewhere, and your "black hole," what I call, N materials is a good place for it to gather, and you collect salt there, instead of bringing it into the water. Because you created the field, but the field become effective Inertia, at the point of your wires hanging. Just have a look at your systems, when you're producing Gans's, after a while you see a lot of salt everywhere. You say , I put 10 grams of salt in there, I'm collecting half a kilo, so where did it come from?

Any other question.

Q: .. Another question is related to this. If the sunshine shines on the water without any salt, can that also create the salt M field?
K- What do you mean?
Q: I mean, if the water doesn't have and salt inside it, if the sunshine (just shines on it), like we have the sunshine also. (2:52). But can that also create the salt M and G field?
K- Yes, because sunshine is another dimension of Field Transfer, and if some of the rays of the sun, are the same as the rays you have, of course it does. It's added, but it's at the strength of the salt. It's very simple. You can do, you can bring that change in.

(If I can break through here? We just received the 10,000 donation from one of the Knowledge Seekers. Thank you very much, this helps us great, and hopefully, we reach

that 150,000 by the end of teaching, if the Knowledge Seekers be generous enough to support what we are trying to do.)

Any other question?

We have past 35,000 Euro collection at the moment.
… (2:54).
Q: .. my name is Jefferson .. from Brazil.
Knowing that in order to be part of the Universal Community, we cannot take the life of any being, and also knowing that most human activities directly, or indirectly take the life of some being. That is if we manufacture furniture for example, it takes a life of trees. If we work with agriculture and livestock to provide food, and we take the life of vegetables and animals. If we work with mining, we destroy the land and mountains. What are the activities that we should carry out from now on, so that we are acting in accordance with the ethos of the Universal Community, and being useful to the whole community?

K- It is. I don't know if it's the right time to bring this subject up, or have you reached the point of maturity to understand this part. The children of Mitra will learn to live in both dimensions, both physicality, and the soul. We have to learn the way not only to breastfeed the child, (2:56). that it takes the D of P, but bring the dimension to the child, that the soul receives the energies of the universe, that he learns to live in the D of the physical life of the man, but not depending on the life of the man.

The children of the man, through the child of Mitra, the birth of life will be different, and over generations will change. Where the soul is trained from the outset of the birth, to receive energies of the universe, through the soul. Where the soul becomes that water, and the universe becomes the orange.

There is a technique and technology to do this, where gradually man will become independent of feeding physical life, that he gets feed through his soul. In a way, we transfer energy to the center, and from the center we feed the physicality, and the STP. They find peace. The physicality, and STP become one, and man becomes a peaceful creature.

This process has already started. As I said back in a few teachings before, the next generations of the children of the man will not even be recognized by the man himself. He does not have that mouth to suckle on the physicality of the energy of the mother, and with it there is no digestion, but still there is a love, (2:58). that binds to the soul of the mother and child.

There are glorious times ahead of human race. You do not even understand what I have given you. You cannot comprehend what gift has been given to mankind. The children of Mitra will never kill ??. Part of the teaching of today was that, if you understood.

If you have ever seen fragments and pieces of the physicality of the creation and the Creator, then that will be the same for the children of Mitra. We have already started this

process, and partially you Knowledge Seekers have already started it, without you even knowing. This will take time. A part of the development of this technology for what we are doing now, with collecting and raising the funds, is to create and bring that condition. (3:00).

The process of creating the children of Mitra to reach that point, that they can live in both dimensions, but have to accommodate gradually to become in a position of Universal Community not to kill, and not to consume, will take over the whole of the operation of the mankind's life on this planet. And with it, will bring many changes.

We will not harvest wheat to eat, we harvest wheat to enjoy the color of the flowers when it's time for it. The children of the man will not be what we've seen today, and what we see today. We enjoy the beauty of them, and not the, what we call, by taking life.

Years ago, I used to make sure in April, May I fly as many times as I could, over the beautiful country of Holland. Around this time is when all the tulips come up. And the what we call, Dutch farmers make a beautiful scenery of these variety, a sea of colors of tulips, and you can walk in it. You don't take it. They grow it for its onion, or ?? sage, and the rest of it. (3:02). But the beauty creates, what will be the next generation for mankind. And we will enjoy the beauty without consuming, without destroying. We remember the beauty of the walking through the fields of the tulips of Holland, in our memory, without actually creating to destroy, to have that.

We don't need to taste the lamb, to kill the lamb. I used to do this a lot, and it was a pleasure. It's one of the most beautiful things, which happens. It touches your soul, it touches your emotion, especially when you fly low level, and you enjoy the variety of the color, the beauty of the creation.

This is the process, which many of us will come to understand, will come to. We have no choice, but to come to live with, and in that process, we will come to understand a lot of things. A lot of what I call, understanding of beauties of the creation, without destroying the beauties.

Maybe we can add to the elevation, to the beauty of the what I call, the flowers. Maybe with addition of our soul to it, we will create a new color, without actually genetically modifying, with the energy of love, care, adoring, and the beauty you want to give. This is part of the new cycle for man. (3:04). This is a part of the cycle, or totality of conversion of energies to what I call, acceptance of the what we call, totality. We need to understand fields transformation, not matter state interactions.

Any other question?

Q: … since I started studying plasma science and trying to take this knowledge to my family members, they started to see me as crazy. They started pulling away from me and leaving me isolated. My kids these days get annoyed when I talk about plasma and Gans, and one of them hasn't talked to me since last year, because I tried to convince him not to

inoculate himself, but he wouldn't listen. I'm afraid these substances have affected their brains. What can I do to make their souls understand, that I try to pass this knowledge on to them, because I love them so much, and I just want to protect them. …

K- The processes your children, are in that process, your family are in that process, because is not on television. Because it's not on the Internet the way it should be. Part of this process that we are doing today, in raising funds, (3:06). is to bring a massive international awareness about the technology.

In a short time, they'll come to you, to worship you, adore you for what you understood, and they didn't, because it's in the news. The process we started is not just for factories, it's not just for building things. A huge part of what we do, will be international awareness of the technology, and that process. Because you have to understand, they go Keshe Foundation, and somewhere down the line, they come across a pedophile report of the nation of Belgium. "Oh, we can't be there." What is in the news, what it changes, when it brings what it's supposed to. It's there.

I was talking to Armand last night over dinner. And he said, Mehran, we have to change the perception, we have to put something out to bring the change. Then people will believe us, then we'll see the changes. And you don't put something substantial out to do this. You have to do this, because then people understand. Part of this will go that way. Because we need to create international awareness about the technology.

Then in that time, you become a student, they know more than you, because they studied more, they find more. Then they say, you won't be outsider, you won't be an outcast. Because Belgium's made sure we don't go into Fox. If you can get yourself into Fox, you're foxed in. (3:08). Belgium's paid huge amount of money. King of Belgium has spent millions, tens of millions to block, paid bribery to the management of this organization, that Keshe Foundation never comes into light, since 2012. Since the meeting with the Peter ?? Parker. We suffered for it, but they allowed us to become stronger.

In a few months time you will see that, Papa, Uncle, you are worshipped, you understood before us. Because it's in the news and you're fashion. You were earlier in fashion than they were, and then they can see, and do things with it.

In a couple of years, you don't know You don't know anything, because the new modern plasma technology is something else. Don't worry about it. I've been there, even with my own children. Just be there, just doing what is right, and everything in the correct way. They'll come. It's part of what we are doing today - is this. International awareness with the Keshe Foundation Space Technology. Don't worry about it. You know it in your soul. You know what you do is right, what you have is right, you'll become the fashion of the day, very soon.

Any other question.

R: I think you'll find convincing a total stranger is easier, than trying to convince your own friends.
K- Never try to convince, let them convince themselves. If you try to convince, you waste your time, they buy it. You see, the processes we all die. (3:10). We all live in a physical dimension. We all get sicknesses. And doesn't mean just because you know Gans technology you can survive everything, and you will be forever. If you understood the Gans T at the level of the soul, yes. But you're not there yet. So we have that problem, till you become, till you're aware, till it is done, yes. Then we are.

Any other question

Q; .. How to use the salt that the cup produces.? And another question .. what do we do with the salts created by the Cup of Man the cups are almost closed off on the top because of the salt?
K- Have you created salt of the soul? That's the question. And those salts have to be immaculate, very perfectly handled, you never touch these kinds of salts with your bare hand. Use gloves, hold them in an airtight condition, and keep them in environment, that can bring the condition of … no interaction with matter state.

In the future we'll teach you how to use them. When you make the Gans, if you keep these Gans's, these salts, (3:12). when you make your next Cup of Man, or Cup of Life you use these salts, not the salt you take from the shops.

Q: Hassan . … since you told us after a shower to say, "thank you for feeding me," food has become easy to bypass. I tried three days with three olives, just to chew and it works perfect. I am even feeling a weight gain, with very less food intake, and I feel I can stop totally my food consumption. What I want to know is how to bypass the breathing, and stop the killing of the amino acid too ?

K- It goes back to the same position, as what we did before, as what we done before. Then it goes to understanding the process, then it goes to understand the whole caboodle about transformation. (3:14). Then if you understand this, what we said about the soul of the children of Mitra, they take fields, do they need the breathing system. Our breathing system is only applicable on earth. We're becoming the man of U, and Man of universe there is no oxygen, there is no air to breathe outside.

So, as we grow into that, we, what we call, find out, that we don't need to breath. It's the time, it's the next generation, next time, that it is bringing that position. We just got to wait. We watch our children, or our great grandchildren, or our grandchildren who come from the process through the birth of Mitra, structure of life, that they come that, then they don't consume. It's not just the food, we become the feeders of the universe, as much as we are fed by the U.

Any other questions?

Q: … (3:16). He says, I've come to spirituality through someone that who explains it by way of quantum physics, and upgraded with your knowledge, since I'm here Mr. Keshe. I believe I understand exactly what you're saying. Yet, so far through history, it took humans the better part of their lives to reach, identification and joining with the soul of the Creator. And then these eastern practices also did not seem to understand the totality of it, so far. Is there some sort of practical instruction you could give us for our meditations, that would help us elevate more effectively? I have learned control over the emotions of my physicality, for instance, should I now literally, just try to dilute and join the field strengths of all my souls merging electron and proton?
K- What does that mean, I don't understand?
Q: … You were explaining in the beginning, that the relationship of the souls to each other, is kind of like the electron to the proton. And if you say we could, well take the physicality with us, by taking the Soul of Physicality with us, then we need to join with it somehow. (3:18). And if we think about it with the electron and the proton and the dilution of the fields to join them together again, then this the question basically, would the process be the same end?
K- What do you mean by that? Explain, please,
Q: Well as it is laid out in the books, for example, you can bring the fields strengths to a level again, where they could rejoin. Is this what you're going at, in a practical sense, when you're talking about the souls as well, like in the beginning of the presentation, now?
K- Bringing of the souls is through the emotion and connecting them to be able to understand it, it's a priority for us about our own creation. We have to test and trial.

Stop eating by Changing posture - create water in body

Go back to, it's in one of the teachings, we showed a picture. I think a few times we referred to it, about the guru from India, who came to the Keshe Foundation Center in Insanno in 2014. His station, his respect by his followers was, that he fasted for several times for 20 days or something like that in his life, (3:20). and he would not eat anything. We have people monitored, or some people in India or China do the same.

If you go to the exhibition center, on the first floor, as you enter, you see a meeting room with a white table. This table has come originally from the teaching table of the Insanno. This table is a table where we put the ball, and it went black when they planned my assassination, the Belgium's. He sat on one side of the table, and I sat on the other, and the translator, he didn't want. Before that meeting, everything had to be talked through to his translator. He was too holy to speak to me directly.

When it came to the meeting on this table on the top floor, he could speak English better than me. I told him, you have to teach your followers the truth, not to abuse your followers. And I explained to him how he was absorbing energy from the environment. He was cheating his followers. He was taking energy as food in a specific way, which is not hidden to us as Messengers, and I explained to him how he does it. He said, you understood my trick. I said, no, I understand your cheat.

It's very simple, you can do it too. (3:22). Sit upright. And move your lung and your stomach in different positions. But try to hold that position for a long time. Wish you want to have water, you're thirsty. Move the breathing rate, move the position of your lung, move slightly your stomach and posture in a very refined way, that you lose the thirst.

Now, you found the gimmick to extract energy from the environment, at the level of the water, because you satisfy the thirst. It's not very hard. These people are paid for days at a time to be under, "I have to be meditating." Rubbish, I'll find you a cheat.

How this time to have the taste of steak. And I have a steak without the steak here. Because I move my intestine a little bit, I change the position. Don't forget the energies of the air in the body of the animal changes to be ?? that steak. Now you are that animal. But now you learn the trick.

If you go a step further, stop breathing. Move the motion of your body in a position, that compensates for the energy, which the blood needs without the lung. You can live without breathing. Physicality of the man, if you understand it, is beautiful. (3:24).

When you get old, you shrivel, you shrink a little bit. Your lungs compresses. What do you get more than anybody else? Pneumonia? Why do old people die of pneumonia? Because they lost their posture. If you get the old people to stand upright, that their lungs doesn't collapse, the energy field within the lung does not create water, then it creates its own infection. Nobody will die of pneumonia.

So, meditating, in what way? Understanding the principle of creation is a different. And you know what happened? People who were present they tell you. The same thing happened when I was invited to the Vatican to meet the Cardinal. The skies opened up, storm beyond your imagination, because I broke, I broke the shackles of slaving man. He could not handle it, He came down and he tried to get me ?? there. But we gave back to what he was trying take.

None of us need to eat. None of us need air to breathe. We cannot do that, there is no air in the universe, there's no cows to eat, and there no grass to eat in the universe. By positioning, creating fields, we can satisfy.

We do that. Many of you do that, if you're intellect-ed enough in your sexual life. Why do you get Parkinson in men, always on the right hand. We create the imagination of the beautiful body of the young woman, (3:26). who was our wife when she was younger, because now she's in pre-menopause, she is not active, and we connect that to the cycle of our physical life, and we get Parkinson's. If we can create energy of the imagination, the taste, the texture, the emotion of the young girl we married 40 years ago, we can do anything in life, steak, kidney pie, strawberry, anything you like. And you will be walking, it was a nice steak.

This is what we have to learn, and this is the process, we don't need to breath. And then the next step comes, when you get to that level, then you find out, where is this energy that's been absorbed, and it's feeding me. It's trained to be absorbed by the STM. The sun shines within. When the sun shines on earth, the interaction of the fields creates calcium, sodium, and the rest of it. Now the sun is within you, it's your soul. And with the interaction of the physicality it creates everything. You can have even orange to the taste, and the color, and the smell you want.

Where is our best friend, one of our closest friends here, he can tell you what he did. We always listen to him. I've seen his name, he's been here. He is amongst us today, with the greatest of pleasure. Is he there, Alex from Nigeria, (3:28). have you seen him, Rick.

Alex was the first one who did this. You don't need. You have to understand process by process to go backwards. Sit up, satisfy your thirst. Satisfy by different breathing, by different rates, by different ratios. And the beauty of this thing is, that people, that these people can still urinate after 21 days, because they already created the water in their structure.

Now we understand the science behind it. And the beauty of it is, now Keshe Foundation has 500 million followers around the world. Nobody can cheat you lot. No Rabbi's, no Ayatollahs, no priests.

Don't forget, if the guy sits upright with little bit twisted to the left, and he's getting the energy of a banana, and tastes something, doesn't mean that works for you. You might have to turn slightly, double right, to get the same taste, because your mixture is different. So you cannot copy.

You walk the fields of oranges, you don't pick an orange. You smell it and without that smell, and you absorb the taste of it, you become that Cup. Anywhere in the universe you can create that orange, and you don't need to get Parkinson's. Because now you recorded it on the STM, (3:30). and not on the RNA or DNA, and this will bring man huge changes. Huge changes will come from understanding of this process.

Any other questions? Learn the knowledge and don't get stuck in hypocrisy.

(I will tell you one thing, if you don't mind, we have reached donation of 45,000 Euro. Still short by another 100,000, and thank you very much for your donations. We have reached our target of 45,000 Euros donation and support from the foundation. We need, we achieved 1/3 in past two hours. We need more to be able to complete today. Please pay directly to the Foundation, it is much easier for us, because otherwise, we have delay in Paypal. Thank you very much).

Go ahead.

Q: .. Can you say that the emotion is like a telephone number, it's attached to specific field strength? So if I want to connect to the Creator, I use the unconditional love connection like a line?
K- In a way, yes, but you have to know the telephone number. (3:32). You carry a phone in your hand, there are billions of numbers out there, you want to call your boyfriend, you have to have his right number. Maybe that boyfriend is the Creator, but you have to know the strength of and to be at his level, to be able to contact.

If you're carrying what do you call it a home phone (land line), you cannot wirelessly connect yourself to the mobile phone. Unless there is a connection, somebody else become an intermediary to put it on, the what you call, transmission. A man is the home phone stuck to the ground. You need that transition of transmission to get the right strength and ride number to get to the other side? "ET" call home if you remember, or "ET" go home either way.

R: **S**o it's not the unconditional love, the actual connection to the source, or Creator? If we follow that unconditional love, would we not be getting closer to that connection?
K- In a way, yes, in a way we do it. In a way it is part of us, which is already achieved that.

R: So most of what we call unconditional love is probably has aspects of conditionality to it. So we think it may be unconditional love, but it's still not the totality, and perhaps that, if we were really to touch on that totality, it would be the direct connection, but it might be very rare for that to occur perhaps? (3:34).
K- Yes. It's not rare. We have to learn and remember the number, as you call it. We have the same as we remember, how we create the. You know the actors, or actresses out of nowhere they can create tears in a scene, because they've been trained how, and most probably they remember the most love they had, the most painful thing and it makes them to tear up, or they spray them to tear up. We have to learn, do we want to tear with a spray, or we want it through the emotion of what we love, or when you love somebody it brings the tears from the strength of it. Then you can, when you play the act, you remember the strength, that's all you got to do. It's very simple, It's extremely, extremely simple.

Any other question

K- Let's see what the German community has. I have to explain to you what the German community are supporting heavily by presentation in the exhibition center (EC) (3:36). The EC now has moved to four days, possibly five days full time. Try to come from around the world to see it. Now all the restrictions of the corner has been removed from more or less all of Austria acts of Vienna. Come in and see and see the future of mankind and see what is set out what is there and what but at your knowledge and you're taking changes between industry and bring job creating new dimension in your environment.

If you walk it you don't understand it but the way Mario explains .. is on the way we have Herbert joining us back in trying hopefully to do the presentations. You fall in love with

the knowledge and that's all the exhibition is for. And then you understand it like me always is summertime bring your children let them see the future and maybe they make the future by understanding it. I was touched at the age of eight to make the change. You can imagine if your children age of eight and 10 touched by the new knowledge what they can bring for the next generation. Make it a place where you become the house of knowledge and then the knowledge or comments on

Q: R: The translation is a number 1-1-9-8-1 Gregory Grabavoir, the telephone number to the Creator was from Steff and something (3:38). about Gregory grab telephone number to the Creator 11981. Then she asked, if you know anything about that?

K- (laughs) Now we found the secret of His mobile number. I thought His lover was the only one who had the number. Now we got to tell Eve what happened to the Adam, and tell the Mitra, what the God's number has been put in public.
…

R; I just wanted to mention that we have the translation function here. And I should have mentioned it at the beginning perhaps. But right now we have the Portuguese and German audio translation going on a simultaneous translation in this zoom webinar. And people go I think it's to the more dot, dot, dot thing and you can select her in the preferences. You can select interpretation and select the language that you're most familiar with. If it's Portuguese or German, we'll have others as well coming on. And then you go to a separate room and you'll hear the translator during the interpretation of today's teaching. You have a choice of just the interpretation, or with Mr Kesh his voice at the same time. (3:40). So just to let people know this a new feature we're just trying out. And there's also a what's called a live transcript function, which I did not activate today, maybe we'll try that next time. And people can get a live or get a recording of the transcript and actually look at the live transcription going on at the same time. It's not a perfect and perfect English transcription, but it's might be useful for some people.

That's good to know.

Q: **…** I'd like to know, in a health teaching, you said, that the STM leaves the body, at the exact moment that he must. But you said, that is beyond our imagination. I'd like to know about more about this. Because I was a little bit confused.
K- Can you repeat,
Q:. repeats … (3:42).

K- Go back to the matter state, maybe you understand better. In the matter state, the strength of the fields of a magnet dictates its position. When you put two magnets next to each other, they create a distance gap, what we call, MaGrav - magnetic gravitational field positioning.

If you put a winding around one of the magnets, can do it, if you understand how to do it, and increase the flow of the fields in one of the magnets. You will see maybe the other magnet come slightly closer, or move further. You can reach that position by creating

these kinds of magnetic fields, which is done for some ?? purposes, some industrial purposes, that the other magnet literally shoots up, without doing anything to it. It becomes a trajectory.

We see it in the slaughter houses in a different shape, like a bullet, but it's releasing and attracting. Now, (3:44). your STP becomes that winding, and your Soul becomes the other magnet. But in this case, the STP has given his energy to the soul. So, now the soul is energized, and when the point comes, that the STM energy super passes the blood flow cage, it takes off. In taking off, what happens, the physicality stays behind, but the soul has gone, point of death.

Why most of us die at the old age? If you can keep the circulation of the blood, and the energy levels of your body, at the strength that does not come lower, than controlling the cage of the fields of the soul, you do not die. You can extend your life.

The minute the STM receives more energy as part of the information, emotion, or whatever else, and the cage becomes rusty and weak, the Soul has nothing to hold it, it becomes the point of death. So, our aging is by circulating less blood, feeding the soul more from the STP, and dimension of emotion, and whatever energy. It becomes more powerful, and it jumps, it creates that, it becomes that bullet to new position. (3:46). Breaks through the weak cage, which is rusty, which is the old age of man, the blood cannot hold, the circulation is not that strong, then you die.

Because the soul is gone, physicality stays behind. Is it escapism for the STM? We escape from it, we become good in doing it, and in that process, we interact, we increase, we add to it by expansion of strength. And that's how the death comes. Physical separation of the STM from STP.

But you got to understand, the minute this process starts, which the Soul of Physicality becomes slowly aware, that it's losing control to the STM, it transfers most of the energies, which are within it, within the STM, within the STP of the man, and the physical energy of the body of the man, to the STM. So, it suddenly receives a rapid field energy, because it's aware the blood flow is weak, and then the soul departs. It becomes that bullet.

But that bullet, through it's interaction with a field strength is already destined for a position, for it to find its balance. Then in that position, it becomes, because it has no physical structure, STP with it partially, it becomes a star. (3:48). That star starts a new life, in a galaxy, in the universe, as a dust in the world of the creation.

In a way, you created a "soul" shooting star, and you have to see, if it has enough at the point of arrival, that it becomes the source, it becomes the beginning of a new cycle for the soul.

The whole purpose of creation, is to create new essence of creation, which is another star, which is the STM, but not within the physicality of the man, but in another D. It doesn't

matter how long you keep this together, you can always play one against the other, or one within the other, that you live everlasting life of the Creator - I made man the image of Myself. Because I become the man, that within it I be in connection with Me, I keep a total integrity, and totality of integral fields of what I started with. So I don't lose anything.

This is the secret of creation, it's the secret of life, in the dimension of the existence. As the Arab says, ?? This is it, this is the final, as we understand the beauty of the Creator. All the beauties are ?? there and there is no more. It's you have to understand how beautiful it is. As all the beauties, .. which is the kindness, the love of Creator is already given. It's us who have to understand.

Thank you very much for today, please keep the donations, and what you want to give to the foundation on, we have reached around 45,000. (3:50). We need another 100,000 to be fully covered. We need it today, not tomorrow, in any shape or form. Make a loan to the Foundation, we'll return it.

We do not open another church, another castle. We want to make homes for where people will not be a slave. But we elevate the souls of everything in One Nation, which is what a man wants now.
Thank you very much for today. And I hope, I hope we'll have much beautiful news for you in the coming days, as this progress hopefully can be completed today. ..
We still need to reach our target.

R: I'll put the direct donation site here are address on the on your screen, so you should be able to see it. And that's all the information you should need to go to your bank to make a direct wire transfer or Swift payment through the banking system. And that's the preferred way of making a donation where it goes through immediately. If you're really stuck and can't do it that way, once again, there is a donation button here in the upper just above the Hello part of Hello, we are the Keshe Foundation, it's a bit of a small button, so don't miss that if you can't do the direct banking transaction.

ENGLISH TRANSCRIPTION:

(:21)
K- Yes. Good morning, Good day to you. As usual, wherever, wherever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute. Worldwide, we welcome you back to the teaching is nice to see the transcripts being done English some things. But it's nice to see the transcripts, (:22). but we make some mistakes and changes everything to what he likes. Maybe we don't need instantaneous transcription to these transcripts I've corrected, because now it stays on the screen. If you'd like to switch off the transcript, if it's allowed, and then other people that you will transcribers won't do that in a background recoup as possible. Because there's a lot of mistakes in spelling mistakes on the screen pocket.

K- Thank you very much. That's why the teamwork transcribers in Philippine do for us to go through this and correct their mistakes. And then they added on. Thank you very much. If you want to write out the last piece. Okay, that's good. First of all, I would like to go back to what we started early last time, we have achieved our target. Thank you in which to so many of you. We had another hiccup in past 48 hours. With the help of one of the Knowledge Seekers thanks to him. We are sorting that out, and the process will be completed. Hopefully by next week. It takes us time to get these things done. I think many, many of you are small donations to small loans to large loans. We manage to reach the target, but we had a small hiccup or a big hiccup which we could not resolve. Then I asked one of the Knowledge Seekers who's been solid behind us to help the situation to elevate it and he immediately responded without more or less a second optic. I thank him personally, and many others who have been there to see this process through. We've been

told we should achieve our goal where we started, where the Keshe Foundation was put all his support financial resources in past six to eight months to achieve this is important for us to get to this is the basis of international One Nation, One respond planet. We've been let down by one of the Knowledge Seekers very bad name, but that is was to come to test to understand. But on the other hand, we're not always got tested, we achieve what we set out for. And as I said, once the funds are returned to us to start our program, or the Knowledge Seekers will send us the donations as a loan will be mirrored back. We will announce the list of to donate as long as you don't want to be known. And what was put on what was given in return. We have a solid back was behind the foundation in a background but so much in the front has been without solid and he's made sure every things we ever needed was there to be done it When putting everything he had on the line, I thank him personally. And it's for him to one day and knows who he is, we have solid backers, those who understood the knowledge and understand what the knowledge will break. In this process, hopefully, next few days or a week or two or whatever, when we solve the new problem, which hopefully is hold the best part this morning, will allow us to plan things out again, Keshe Foundation does not disclose his plans for it to be stuck. But we you will see us emerging, emerging in a very big way. So, think of his own international structure takes time, we have other set consulted many groups, many expertise. And we have made a decision in how the Keshe Foundation wants assets as a joint venture received and that buying new we plan how to do it. My idea is very simple. We have experienced, we went to the Knowledge Seekers, we trusted Knowledge Seekers, that they can do everything and we found out in Niger, or they call it in Ghana. And then in Italy, we have Knowledge Seekers are devoted and also not anonymously. So coming down, rob the foundation, and also pretend to be the Knowledge Seekers. They're coming and rub the foundation of millions and millions and those who have been inside helping them telling them exactly how to rub their illnesses. Keshe Foundation has been a very clear decision. We build the institute's and we bring the Knowledge Seekers, an expert team in the institute will advise the physicality of how to build the factories physicality of how to structure the new research and development. But running of the factories running of the research centers running of the management and commercialization will go to international organizations and companies without knowledge or less analysis because we're expert and the groups and the companies we have brought in accept them to be in that position to be employed in that capacity. So, we have separated the knowledge on the management altogether.

The new management has no clue what the Keshe Foundation and GANS technology space technology is they know how to manage it to efficiency has to be a Knowledge Seekers know where the knowledge has to be and not they make decisions or correct where all the time, but that makes investment decisions and somewhere between the two the factories really set up. Hospitals will be set up the institute's will be set up in conjunction with a management, international management and the Keshe Foundation Knowledge Seekers. We think this is the best way for us. And we have started this process. So, when we start this process, to be very clear, transparent, one of the leading what we call human resources, companies in the world has been engaged to see this through, you will not be employed through the Keshe Foundation anybody comes in to employ to me as one of the largest human resources agencies, who knows the

headhunters they know what they're doing, in setting up everything from the cleaner on the floor, to the heads directors and CEOs. This allows the Keshe Foundation to concentrate on what is good at research development, bringing new concepts and new technologies and running of the factories and the rest will stay with a international team of management or subsidiary Marguerite will be supported extensively by the Keshe Foundation, as we are the shareholders in arranging with the new CEO and the directors of the law. We see our work solid will support the Chinese operation rapidly as to bring disposition of the record work. We had to put everything on hold, we could we could not support 234 Or five projects at the same time. But see this merger of the what we call growth to be done. Now. Now we have hopefully achieved that. Now we are back with grappling with in Chinese. We are committed to the Chinese government. We are committed without doubt expanding our work in Beijing in Xinjiang.

We are committed to the work of president Xi, he has a vision, which is our vision, he has a global vision to bring peace and prosperity, (:30). but with a solid strength of knowledge. We have reached out to the government of Israel to create a condition of peace,

And we hope, the new prime minister of Israel will respond favorably as we have seen, in attempt to do, or contact, we could not negotiate the best, because we knew now why, as he used the reactor of Keshe Foundation to say saving a nuclear bomb. That's why he was ashamed to be found out. Now, he's found that there is no for his allegations, we see a massive peace opportunity in Ukraine. The investments of the Keshe Foundation will go mainly to do what is mainly has been brought out of the situation, Ukraine. You look at Ukraine as a massive disaster, I look at crane, as a massive opportunity for humanity change, of course, in many, many directions, let me explain to you why. Then you understand in much deeper how we think how we are. And what we see with our new process, once it goes through will bring changes. Ukraine and Russia, especially Ukraine, is one of the main manufacturers of the base fertilizer material for the whole of western Europe, or most of the month. With the situation which is coming in Ukraine, we see huge increase in agricultural product because the fertilizer has become very expensive. And at the moment, very hard even to attain. The way I look at it, the way we are investing and the way we'll go, the new CO2 capture systems centers, in cities like that are is like Los Angeles, in places like New York, or London, or as we open more and more of these become the center that each nation produces is optimized and natural byproduct. Now we can see how we look at it.

MT Keshe 32:17
Using the opportunity, we will concentrate will discuss with you what is our target in the next few weeks that it will not come. Ukraine will not be able to come back into operational for at least two years. We have two years gap to show the new technology, new way to create products without all the side effects. There is a huge gap in our market and we see it it needs more 2 billion investments in Keshe Foundation has managed to secure works that we can allow us to bring these kinds of things out. There are more opportunities that we agree. We're standing there, you look at it as a war. I look at it as a point when the two conflict, what is the benefit for humanity. We seen that Vatican is

pushing very hard in Ukraine. And we see Washington is not relented. It's sad to see the loss of wives said many years ago, many months ago, we will see local skirmishes. Ukraine is contained in Ukraine. But even though it's creating mayhem, and the mess in the country, is cleaning the path when the future of mankind to be we have seen many of you are worried about what Ukraine will not go much far. It will stay in a position which is this was a test for the.

MT Keshe 33:49
Loan will become an international accepted market. This was part of the plan of the Ukraine to bring bricks into operation. And bricks now functioning as the Western Europe cannot pay with dollars and the rest. They have to buy Global's they have to buy in, they have to buy the brick currencies and brick as one structure has enforces well as a international organization in the past few days, past few weeks. So we can see the advantages when it comes. The backing of the dollar has fallen. The backing off the Euro has fallen. We've seen Dollar and Euro reaching more or less parity, which hasn't had what over 2030 years. This is crippling you what's called the European nations. But we have to be there as a new technology to show the new ways the new understanding. This has brought a smell of change. And this is where a Keshe Foundation concentrates to be there to create new conditions to change up the course. What I called To the plasma revolution, for the brigade coalition, we have received enough support from you to be able to do it over the years. And now we have the stage further in making the international stretch. In respect to this, thank you all, for your Rapid Response last week, we still need help is not finished. Once we receive what we paid and came to agreement with, then we inform you, but it doesn't mean just now we raised out of the help of you for a week, everything stops. I have supported out of private accounts private financing, for past 20 years Keshe Foundation, and never came to public to ask for it is there if you want to. Just because we do a small part doesn't mean the support has to stop. The foundation needs a continuous support to be able to stand to be independent. All our companies, all our factories will be 100% owned by the Foundation does no matter how big your support in the background, which means nobody can dictate our operation, nobody can dictate how well the way we develop this technology. We're still on target or June flight system. Hopefully the reactors the final best will be completed in the next few days. And we can refuel to start testing. We are ready to keep to will be set. I think especially John that he's been there to see everything done. That is all it can be parallel to Austria will bring the systems on I think our team, especially in what we call Austrian backing with Klaus and others in the background, solid nice standing to making sure that everything goes on. We have make anyone else want to all of you to know Keshe Foundation with the limits of the management team. In Austria, we are opening the Keshe Foundation division center on Saturdays for workshops. This should start from the first week of June, these workshops on how to make pottery with GANS in it, that it can create everything you want from it. paintings were the application of the GANS, it's a sculpturing, with applicational guests, making perfect GANS systems, making perfect Magrav systems making and using the technology in agriculture.

MT Keshe 37:38

We expect these to start from somewhere around about fourth of June. And this will go on as much as possible every Saturday, maybe sometimes on Sunday, we have ordinario, who's been backing up to Keshe Foundation in German translation for years to run, the exhibition center is there and we are taking booking in new, what we call email has been created for you to book to come in, to be there to see and to learn and to expand, go to the place which should be on different channels of the Keshe Foundation, to be able to book yourself to go to the exhibition, or book yourself to be part of these workshops. So these workshops will be space level technology development, we announce it, they have put the price of 300 or 350 Euro, or the what we call for the workshops, and you can book in advance maximum capacity is about 15 to talk to people. And in a way, when you come you'll see the exhibition, and after that or during that but there's something happening you're cooking the pot or you put something in the oven, lunchtime or in the afternoon or somebody would take you around as you came in for not the what we call the workshop, you get the tour of the exhibition as the understood, we see this as essential to be able to spread the knowledge and in the future plans this will be done in a very extensive way. So have you been through the exhibition if I'm there always trying to come and say hello. And if we are in a capability to expand this to other positions or conditions we will do. This is important for us now that these workshops run primarily by the Keshe Foundation and kept and looked after by KFSSI. Our management team in the background has been standing behind our solid onemain in China to lean in China, Bella Stanley and the rest the whole team of the Keshe Foundation worldwide. In Arizona we've seen relentless work on John we've seen Raphael be seen our team in Mexico. We've seen this look call Lisa and gym in Australia, we've seen the Philippine team standing solid behind we've seen Alex in Nigeria standing and solid trying to carry on with the work he started some three four years ago, the work does not stop we see Alex in Canada and the commit American team continuously expanded in work, we see new certain Tara with a backing up the what we call the twins are that has the keeping the back end of the reading teaching online plus the factories which have become a center of production and export of the Keshe Foundation materials. Very soon, all depends on the maglevs you will see as you order will be manufactured in the battery into ha we do not need to produce much better to be in competition is much practical to make it the way user has done. They have moved into a new premises offices has changed, expanded, and factories on the same way. And this is what Keshe Foundation is. It's you. And it's us as you. And this is very important. Last week, we had to come to you because it was crucial. And you stood by us as you've done for years. And hopefully now we go through the new phase, we are not looking at what happened in the past, we are looking what the future can make. I see a lot of positive moves in Ukraine, I see a lot of positive moves. What's happened, it's in Saudi Arabia and Iran, we see a lot more in Palestine. A beautiful decision has been made by the State of Israel to communicate an open and break the previous open that everybody can do with Islamic world is taking time to textile. And this will bring a lot of food. The first meeting in Israel, but other nations Arab nations in the parliamentary level brings a lot of good time. We invite Iran to join us. Iran has to join us, while serving in leadership, find a way to bridge the gap between Tel Aviv that we need to bring peace but peace comes out of the work of the Keshe Foundation and in nations when we can deliver the technologies that can bring the change. I thank you a lot. You want to talk to us in past few days, past few weeks, and you're they're solid. And

MT Keshe 42:39
I said to other Knowledge Seekers in past few days, I wish I would have been to the foundation long before then just doing it on my own backing it for years, step by step. But the last step counts and that's last few 100 10s of 1000s which we needed to breach because we use our resources may change. We tell you as it happens, I will tell you, we will open up books that the others can plan to sabotage we tell you what is happening as it happens, that you can support us to achieve what we are going to achieve. By thank you for last week support. Still support is not finished is 7 billion children to look after. They're all law teachers, and they have their own questions. That you pretty much said what you've done to not stop support. We are not here to charge to make a bill you will not see any Keshe Foundation churches and mosques and whatever and temples are temples without institutes where we deliver knowledge That's were is should be, the temple of God should be, the knowledge of the creation, and not the muse of the ?? created (creator) . Thank you very much. (:44).

(proof teaching ..)
Teaching starts:

C14 Line of Communication (44:00 to 1:28:52)

We go ahead with teaching, and we start another process of the teaching. You heard in the intro, Rick said to me, can I play this intro, I said yes, because somehow it's connected to what is going to be taught today. And as usual, I don't know how he gets it, but he gets it right most of the time, to produce the right intro for the right teaching.

In that process, we go back to part of the intro. We spoke about the soul. We spoke about the Soul of Physicality (STP). We speak about the magnetic (M) field connections. We've done this partially in the past, maybe we put a new light. Many of you who are making MaGravs, many of you who are trying to make systems, make a sense of it. Or maybe you're looking at it, with a what I call, a new eye, a new direction.

In all our teachings, we speak about a connection between the Soul of Man (STM) and the Soul of Physicality of the man, and the physicality (P) of the man. One question to ask you is, how do they communicate? How does the soul of the earth communicates, and stays in touch, in a M field strength, with the other stars, with other galaxies, with its own mother planet? Or with its own mother, what we call, Sun, the creator?

How do galaxies aware and carried the information? Where to be. How to be. (:46). In which direction, that I can move? How do we get the clashes of the stars and galaxies together? In a way, how does the universe (U) communicate?

What is the bandwidth? It is not there, as you're sitting in the car, and another car comes and you go beep, beep, on the horn, Don't come, I am coming. And if he doesn't hear, you

clash, A Galaxy cannot beep, beep, and horn to the other galaxy, I'm coming. Can you keep away? Because we are mayhem, you started somewhere else, with too much speed, you might crash? But how does? And how do universal systems interact with each other?

How do you in the plasmatic condition, but in the matter state, for you to better understand, when you put a magnet on the table, informs the other magnets, that I'm here. Who wants to join me, you jump in, or who wants to move away, move away, that I want to keep this new position.

In the body of the Man, we always speak about amino acid (AA). In the AA of the body of the Man, we always spoke in all our teachings in a very simple way, that the body of the man has a combination, a simple combination of CONH, or a lot of you like to call him "Mr. COHN." (:48). This character, this structure is applicable everywhere. You need the line of communication. You need something to hold to. You need something to create, to release energies, and you need something to store the energies.

Why do you use nitrogen fertilizer, because nitrogen stores .. the energy (is the storer of the energy). And when it comes in touch with the amino acid, it delivers. And you get a plant to grow. What happened in the other processes, of what we call, amino acid.

This one is the gravitational (G) field holder, to keep everything together in the structure in conjunction with other cells. In the what we call, galaxy work we call it a black hole. In the universe, we call it the Central Universe line. Nothing has changed it's the same structure. In the universal language, the universal work, we see the same. We have a source of energies, which these energies allows the particles, as they release themselves, energies as what they don't need to create motion, and field of existence for the rest of the galaxy.

But the most important part for today's discussion, is this little chap (carbon - C). In the body of the man, the amino acids, the carbons are line of connection between the amino acid, and other AA. They carry a strength, that in the spectrum, can connect to any combination. We use it as a sugar, we use it as any other combination of materials we need. Without a C, (:50). without a condition of the C, we do not have, what are call, connections, we have no line of communication.

So when, and as we become knowledgeable of the universe, to be added to us, we have to understand, what this little child (C), does. How does it behave? And how come in one strength works in your soul, in one strength works in Soul of Physicality, and in one strength works in what I call, matter state, or manifestation state, the body of the Man, in a Gans state. And in another state becomes the matter state, as in the bone of the man, line of communication.

The carbons don't just pile, sorry, the calcium's just don't pile on top of each other, to make a bone, your bone and everything else, and be in the center of every cell you have. They're organized, they have a strength of the C even ??? So how do the universe

where you have the soul in the other direction, in which carbon level of the U we work? And is there a carbon connection level with the Creator? Is there a common ?? .

Is there a need to understand, which frequencies to listen to. You want to listen just locally, listen to the long wave (matter state). (:52). You want to listen to around in a better distance in the medium waves (STM & STP). Or you want to go and get as much as you can go far, you go on the short wave (Creator). Then you have the others, FM and the others, and the others.

We have to understand this, to be able to work. If you don't understand this structure. As I see, none of you up to now, have understood. You're in a big mess in your work. Go back to something very simple. You make, all of you is funny looking things, lot of springs, twisted wire called, MaGravs. None of you succeed, and I keep on telling you, guys something you're missing. None of you understand. What are you missing?

Energy doesn't come to if you don't show it where to go to. You cannot have a water on the plant, when the hose is lying on the floor, and water tap is 20 meters away. Water doesn't jump from the tap into the pipe, to the plant. You have to connect the pipe to the .. the tap, and you have to direct the other end, to the plant, to receive the water.

You have the plant as MaGrav, you have the tap as a universe. You don't see, we've given you the pipe, but you don't know how to connect it, to get it. That's why you're all in a mess with MaGravs. (:54). We have an elite secret organization, which is run by Jalal, to make a new MaGravs. How can you get rid of thirst, when you have no water, but you can see the glass of water. You have to reach your hand out, to get it to satisfy the thirst.

Where is your connection to the universal field forces, that you can tap into? You haven't got it. You make a twisted MaGravs, you take some wires, you Nano coat, you use this and that. Where is your C14? This (STM) works around carbon 14, and other levels of C. This (STP) works around between carbon 14 and 13. This (Physicality body) works between carbon 13 and carbon round about 12 and a half. And in a matter of state, you have C12.

When it comes to this guy, the Creator, you need a special understanding of what we call, crystalline C14, that is a different knowledge of the creation. So, Mr. Jalal and your team, which I have seen in the background, trying to get this secret society of MaGrav making. Have you sorted out, or tap into the universal energy. Because here (MaGrav coils), you're sitting on C12, you have to find a jump, then your MaGrav will deliver you megawatts of energy. (:56).

Then your system sticks out, and knows where the energies are, to give, and to take. Then you understand, when I explained to you, we've given you one of the most powerful generators. But I give a Rolls Royce to toddler in the cot, but I gave him the key. Can that toddler in a cot drive the Rolls Royce, just because he's got the key, because he thinks, "oh this is something nice to put in the mouth." The toddler is your team, Jalal, and the Rolls Royce you built, but you don't have the key.

You will not succeed, unless in Totality you understand this process (of connecting to different frequencies of C). None of you in past 10 years - 15 .. ever understood this. I went to you in teachings as far back as Deuterium, the building block of C. The building block of in teaching, talking about the Deuterium and C14. In essence it's the same.

What is the essence of connection with C12? How does C13 works, and how does carbon, which is sitting on the line of communication of the matter state of 12? (:58).

Till you do not solve this, you go nowhere. Nowhere in your space T, Nowhere in your transportation. Nowhere in your MaGravs. Nowhere in growing up to cell of the body of the Man. Nothing, because you don't know how to communicate. There's no use me teaching on a short wave, and you're waiting on the long way. You switch and you play the peddle or the knob and you get where I am.

You have to understand this teaching. Then you can connect to any line. You have to understand the process of connection, because if you do not connect, your Mr. COHN doesn't matter in what dimension, can communicate with others and function.

"I made man image of myself," even in the construction of the communication, in a structure of, the building energy transfer, and everything else. It's not just a face. It's not just the emotion. It's the process of interaction and creation and connection ?? it's the same.

So gentlemen, (1:00). you've been making MaGravs for years, and I'm been telling you, you're looking for the peanuts, you're looking for the crumbs, the cake is sitting there, to get to the cake, you have to understand this process, how to connect to universal energy system, that your MaGrav system become the transformer, translator, and deliverer of any energy level, as you like.

These MaGravs creator energy, we never put so many kilowatts, so many as we say, as you need percentage of. One kilowatt -30% ; 100 kilowatt - 30%. Four kilowatts whatever. Have you noticed? The same machine used 30%, if you use one kilowatt at home. The same machine gives 30% of 100 kilowatts. So this machine can create 30 kilowatt, but you're using a 300 watt light.

Have you noticed how much you have not understood? You tell me, give me a five kilowatt system. I give you the same MaGrav. If you use in the house one kilowatt, you get it, but if you use 15 kw, I give you a five. You have a five kilowatt (unit), because I gave 30% of it. How many the Knowledge Seekers missed something in the technology and understanding?

Haven't our KS who are building these systems, misunderstood the whole concept of, the line of communication, between them and the universe. The interesting point for me has been for me weeks and months. We talk about the STM, (1:02). We talk about you going out and getting in touch with whatever you want to go. Then we talk about the Soul of

Physicality of the Man, then these two communicate somehow, and then somehow this communicates with the Soul of Physicality, with the physicality of the Man. Somehow this communicate too.

But what happened? Where did you miss the line of information? How come you get psychosomatic when this one (STM) connects to this one (P), and uses what we call emotion, and then comes physical emotion. Then how and where does this (STM) connect to other souls and U? Isn't this in reality what you all missed?

Somewhere in your body, when you die, you have another dimension to this, which is very simple, your physicality, where in fact, it brings you to C12. Long wave - medium wave - short wave; and FM. (1:04). But because of the structure of the system, sometimes in this process, because you have a common denominator, you still get C14, line of communication.

Change this one in a very simple way to instead of this being the physicality of the Man. And this one being the STP, and this one to be the STM, and this one to be the man in matter state, you ?? both. Play game, and make this the earth (Man), make this what we call, the mater of state of the earth, the Inertia. Make this one (P) the M field of the earth. Make this one (STP), the sun. Make this one (STM), the galaxy, and then so forth. Nothing has changed. We're still in that band width, of Mr. COHN.

You have to understand the knowledge, not become the monkey, monkey sees, monkey does, because monkey never looks over his shoulder to see what other monkeys are doing, that they're better than them, that they have understood, and you call them "aliens." You call them men from the deeper space. They looked over their shoulder, they understood this connection, they understood the line of communication. You cannot go to a party, when you put a tape on your mouth and you cannot speak. (1:06). And the tie your hands behind your back, then cannot even sign. You just walk like a lunatic in a wedding.

It's the way mankind of most of the work of the science has been. Because they don't want to see the truth. They don't want to see the light. They don't want to understand the work of the Universe. We understood how the gravity is. We understand how the gravity works. But how does this gravity fields connects to another star, to understand its position? It cannot be anything but the line of connection of Deuterium or C14, because universe works on these frequencies.

Now you understand when I explained to you, I have given you the most powerful energy system. You all laugh, Mr. Keshe the system doesn't work. But hold on guys. The same MaGrav system you connect to the house, you have 12 kilowatt usage, you get 4 kilowatts The same MaGrav system you take to your mama's house, but she uses 3 kilowatts, you get 1 kilowatt. You take it to the son who is young and uses a lot of electronics he uses 30 kilowatts of energy, and he has 10 KW. And you say, Mr. Keshe, can you give us a 5 kilowatt power supply.

Hello, have you understood? This one (30 KW), because hit needs more, has tapped into Universal Energy. This one needs less, (1:08). has tapped into the house energy level. This one is working from, what it comes from other electronics and your body. Haven't I given you the 5 kilowatts you wanted. You have a 10 KW. But you have to understand this process (you get only 30% of total usage).

When you need, I give. Good morning, gentlemen. Good morning the whole hidden team of MaGrav system. I watch all your communications. Sometimes I literally roll on the ground. Guys, move on. Haven't you understand? Haven't you understood the process. Now you understand you had a 5 to 10 megawatt, kilowatt energy source with you from the day one, we made the first one, in Tranny, or in Barlleta Italy.

But you're still looking at, what I call, AC/DC, human energy. You can tap into terabytes, Terra, Terra, Terra, megawatts of energy in the Universal Current. I'm sure John is pulling his hair out, in Arizona. (1:10).

Why, why the center of every planetary system, every beam, every structure in the universe has a Deuterium? In its amalgamation and division creates hydrogen and Tritium.
Hello, I have to know what is available in the universe, that I can create this position, that I can create what I need. How I position myself as a Deuterium, and sometimes I create the Tritium, that I can absorb energy from the whole universe. What is the function? What is the position of, in a matter of state, extra neutron? Giving energy? Isn't that what Tritium is? But once it gives, it needs the line of connection.

Actually, many of you Knowledge Seekers if you wanted a good MaGrav systems for the home, you should have made a Gans of fertilizer, than making all these Gans's you made. I said, that many times, but you don't listen. Because it's got so much nitrogen in it. Now, tomorrow, (1:12). you'll all be making Gans of fertilizer. But be careful, some of them have a lot of rubbish in it, and you don't need, and it can cause you more problems.

But that's not the answer. Understanding the science of interaction of the fields, is what we are looking for. It doesn't matter if it's called, calcium in English language, "dee da da" in another language, "Barba roo" in another galaxy, and "dee da ram" in another U. Understanding the work, the effect, the need for what energy levels, what it is. Which one holds in, which one gives, which one takes, the rest of it. And which one stays in communication with all three, what to give, and when to give, and where to give.

This is the knowledge, that you have to understand, and I keep on telling you for a long time, move away from matter state, understand the interaction of the fields, you'll find a key to the work of the Universe. You stick to what you're doing, maybe your great grandchild, maybe your great, great, great grandchild, when they deviate from your way of thinking, because you did all the bending, they didn't do any bending, because they realized a beautiful thing. Then you see the understanding is all the same.

It's all how, what level, which energy level, which M field strength you need, (1:14). that you can apply to it. You don't get the donkey to fly, and you don't put a load on top of a jumbo jet to take from one village to another. As we say in English, horses for courses, a flat liner cannot do jumping.

Now you understand the Totality of the science of communication of the universe. Without it you're crippled, without you can go nowhere, without it you are were you stood in the village of the man for millions of years.

But sometimes when you go to sleep, that extension in the back, knows everything is. Knows how to connect and goes for a ride and says, I had a dream. The reality, the process of the creation for the man is as simple as ABC. It's for man to decipher it. It's for man to understand it, for man to extend it. I promise you, if our hidden scientific group understood this, they could apply this, they would announce they have a 5 kilowatt MaGrav power generator of universal energy.

Then you understand your MaGrav System is the backbone of your flight system, because then it knows where to attract, what energies, where to be, and creates your condition of the position. It brings you to the right frequency, to the right channel, you want to listen to FM, radio four, (1:16). you want to listen to FM in a long wave. You can if you understand how to match it. If it is FM, with a mixture of long wave, of it's FM on its own and you just want to listen medium, or you just want to listen tot eh long. You can if you understand, have an FM in a long, medium and every other frequency you like.

It's just that you don't have the knowledge, you cannot do. It's like ?? what I said, I was asked to do a conference, talk in Germany, by the Snyder family. And this guy came as a doctor and showed us a battery, and a machine. He says, I get more out, than I put in, shows a battery, and says this is what it says, 12 watt, but I'm going 30 watts. And I asked a question, "excuse me, sir, why don't you tell the people about the AC side of it, you just show the DC." That was the end of teaching for him, and he became one of our best Knowledge Seekers for years and years.

What is the process of understanding? What do we understand from this knowledge? And how do we go to apply it, to when we need it? Do we need the energy to absorb. We use the oxygen and gravity. Do we need energy to give to stop overheating? We use the hydrogen. We need to find a source that we can rely on. (1:18). We look for nitrogen. But we communicate between all of them through the same source.

And if you look at it, it's a Star Formation (SF) all the time. There's no better SF than the AA of the body. If you have hydrogen on top, you have a nitrogen, you have a carbon, and you have what you call, oxygen. Each one sitting on their own.

Now you understand, I gave you universal MaGrav system from day one. Some of you with a small trick, that you don't understand, and I see you Nano (N) making, you create that connection to the universal energy, and if by accident happens. You say my MaGrav system gets 80% or 100%. Polish people, unknowingly they touched it. I think it's

important. And when they went to the ice cream factory, they said that couldn't repeat it. They cannot repeat it, because in production. They made a small, unknowing move, of construction, which tapped into Universal energy.

I've seen two or three people being able to do this, they say, my MaGrav I have at home, I don't need electricity. "Oh, it never happens, it's a lie." But unknowingly, the guy made a condition to tap into Universal Energy. (1:20). When I look at their design on the paper, it's the same as the others. But when I asked him, can I have a picture of the system. I said, unknowingly they tapped into Universal Energy.

You know, we have a beautiful saying in Farsi. We say, the secret is in blowing it. It's the foot of it, foot means blow. A guy working for a master potter for years, putting, making the pots, putting in the what we call, the oven, bringing it back, and always been black, because they always use charcoal. After 30 years the master wants to retire. And he says you've been with me a long time, and you've seen everything, you know what to do. He says, but there's one secret I don't know. It's every night I leave all the pots are black. When I come in the morning, they're all white. If I find out how to change the black to white, then I found everything. And the master says, when I wake up, I just blow the dust off. It becomes white. But he's never there to see that the blow, the blowing of the dust.

But the master knows, 30 years he hasn't understood this knowledge yet. It's exactly like our Knowledge Seekers. Any if accidentally, he would have would have seen the white sits under the black.

You are the same. (1:22). You are the same you make the MaGrav systems, but you haven't understood, and some of you by coincidence, and some of you in a way of twisting your wires, make sure you receive no energy from the U, and you think you're doing so good. If you cannot tap into Universal Energy, you can do as much as you like. And sometimes when you force it, you'll get something out.

But the whole process is to really understand, the process of the creation. One is in reality, if you understood it, your ?? orange (O??). One is your hydrogen. One is your what you call nitrogen. One is your C. One gives (H), one takes (O), one supplies (N), and one keeps everything connected (C). This is the secret of the creation in the U, be it in the cell of the man, be it creation of galaxies, be it the structure of the life of the Creator and His ?? I made man in the image of Myself, because man works exactly the same as I do. I give, I take back what they don't want. I supply continuous energy from me, and the connection between me and them, it comes back what I need to take, what I need to give, and then it comes on ?? (1:24).

But don't forget in a very simple way, have you ever noticed this? I get 30% reduction on my house, which I used to use 30 kilowatt. I get 1 kilowatt it's not good, you still get 30%. I get 4 kilowatt, it's not as good as yours, but you get 10. Hello .. what you need, I give 30% of. You have a 10 kilowatt power generator.

Your other problem has been, how do I change the speed of the energy, from AC universal, to man need AC,. Sorry, a DC universal to AC man needs in the matter state. None of you will succeed, in no shape or form, in no D, if you don't understand this, and don't understand how to create it, and don't understand how to use it. I want to go to Mars from Earth, I need to know what's happening in Mars. And the only way I have is through the line of communication of the C14 or Deuterium. Or am I still working on 13.75? This is the beauty of understanding the knowledge. (1:26).

This could be Mars, this could be another galaxy. This could be any where else in the U. This is how the M fields of the universe connect, and keep separate. That's why, when you put a magnet on a table, what do you see? A line. One is 13.75, one is 13.76, one is 13.4. But what is in it, structure of the M field inside? What is the secret of creation? Why some of it come this way, and some of it goes that way? How is it decided? How does it behave? This is the story of the M field, the line of the connection to the Creator. I teach you one day, you're not ready for it.

So, I hope you learned a lot today. I hoped, that with the teaching of today, especially the KS group will go one step further, in understanding the process of the creation and the totality. You do not know, if there is somebody behind the door. You do not know if there is somebody behind the mountain. You do not know if there's somebody in another galaxy. If you don't shout at the frequency and the strength, that they understand, and they can shout back, You can ?? shout as much as you like in this room. (1:28).

Remember the story of the dog and the whistle? You whistle a lot, but nobody hears except the dog, because it's in the right strength field, ?? for his ear. As I always said, nobody hears the departure of the STM except the owl, which the noise of the departure is so harsh, that it makes it to cry, and he sings. Do you want to be the dog, that you hear the matter state whistle, or you want to be the owl to hear the voice of the Soul.

You have to find that strength, you have to find that knowledge, you have to understand it, not to find it, because I always say to my children, when you understand you don't need to remember. (1:28:52)

Thank you very much for today, we go to a break, and we come back, and see where the knowledge takes us. Thank you very much Rick, if you want to go for a commercial.

Before we go for a commercial break, if you are artistic, you have an art, which you can use, .. to teach the others, glassmaking, which can use for the .. Gans's or anything else, which connects to our technology. Send a message to the Keshe Foundation, you're given classes in the Keshe Foundation center in Linz. If you can cover your costs, plus that you have an earning for a day. Join us to teach the others the science.

Some of your teachings will be recorded. That it's not only 20 people will learn, will be millions of people who will learn, as the television station is getting extended to go for full broadcast, live broadcast and ?? broadcast in the next months. (1:30).

As I said, the structure we set up, is not just for Keshe Foundation development, the ?? , teachings, television stations and the rest. And what I call public understanding of the technology.

If you're an artist, and doesn't matter, even if you're a professor in chemistry, and you see a structure, you make concrete, you make anything. You say, I want to teach, book your time with the Keshe Foundation (info at keshe.foundation), say, this is what I have, I would like to know if I can teach. Maybe once a year, maybe once a month, or whatever. Come to Linz, or in the future go to our Institute's, and we put classes for others to come and learn from you. We teach you freely, and it's your responsibility to share the knowledge freely to the others. You fall back, then the knowledge gets cut off, and you become a cabbage, just you grow without any sense of direction. Man grows when the man shares. It doesn't matter if it's a state of wealth, a state of knowledge, or a state of understanding the creation.

(Proofed just the teaching part)

(1:31:30)

>>> BREAK >> 430 KSW April 28 , 2022 (1:38).

Q: Azar .. there were yogis in the past, and there are still some in the Himalaya, that they trained the body. That has to do because the breath is the soul itself, because if the soul leaves the breath stops, which is the God Himself. So what they did. They oxygenate the body … if you have a body it can only handle 4 watt light bulb. If you want to bring the soul in place the amount of energy that can go through the body is trillions of watts, and it can burn the body. (1:40).
K- Who said that?
Q: Can I continue?
K- No when you start on the wrong no use carrying on with it, okay carry on.
Q: .. if I die now and you come in the next day .. body starts smell. These people, after they die, they don't smell because they oxygenated the body so well.
K- That's a different scientific field. You don't allow the creation of odor, which is a .. crystal structure. If you delay it, you don't smell it. This is what happens in your nose. The smell is there, but at a different level when you put the O in it.

Most of you if you had Corona, if you went through a severe Corona lost your smell. But you are getting it back very slowly, because the neural cells are gradually adjusting, to the .. lower level, natural level of the rest of the body to be able to communicate. But it doesn't mean that you lost it. If you would have introduced a new dimension (D) of fields of crystal structure, you would have had smells of the new D maybe the smell of Mars, .. Jupiter. We don't loose it, the strength changes, just because we don't smell it at our level

strength, we think we lost it.. They do the same, (1:42). when you add O to the body you change the threshold to another level.
Q: .. when we look at the spine, take it up
K- They are different .. totally different processes,
Q: . if these people could do everything you talk about, they could transmute elements, .. themselves. … this is not a story.
K- Why should it be a story … The teaching we do is for most of the mankind to reach to that level. These people have already understood. So it's that, something strength. But maybe they understood part of it. Maybe they understood more than what we teach today.
Q: .. They play with the breath only.
K- of course, breath is a natural way of taking food. .. you don't need a digestion system.
Q: Because if you can control it, you see, this is interesting for me. …

.. a lot of people go to the astrologer, (1:44)., to read their palm, they tell them about their future. But in fact, the future they say is related to the physical body, which is the truth. But if we go to the different level, which is the soul level you can manipulate the future, you don't have to have any faith, what the astrologer is going to say your future is going to be. We act in the physical , but if we go to the soul ..
K- No, no, no I am going to stop you there. Go back to the teaching of last week. When you can go to that level. You don't manipulate. .. when I explained to you, it's the same soul, he knows the story, the father tells the night before. Because it's the same father, he knows where to stop the story, and start the story the next day, .. night for the child, that it fits the story of last night. You don't extend the story. ..
You know in Farsi. How do we start telling the story ..
My son, because we connect it to what it was, and we bring it back to when you can connect to your soul, you don't know. Because you plan, you are aware of what's gong to happen tomorrow, or next year, in the thousand years. because you see the whole structure. It's like you, you know what food you're going to have for breakfast, lunch .. , because you plan it. (1:46). The food doesn't need breakfast and dinner.

But in totality I would like to be there. When I go to Jerusalem I become Christ, and then I go to Mecca and become Mohammad, then I go somewhere else and become somebody else. Because I plan it, I decide, when you are in the frock of a man, it is very easy to change once you're understand the soul. It's the easiest thing, you can even stand in front of me and change your image, that I see Azar as a man, .. woman, .. as a child. Because this is what I want to see. In the world of the man we take photographs, in this D of the soul we create that reality of the existence. You can do it with breath, .. understanding of the emotion of the soul. You can take from what you need.

I can show you a video of the new which are manufactured for .. release. We have managed to create the emotion of the soul within these systems. we watch it we see it, people don't understand, but we know what we have created. But it is you who has to match into it. You go and do, frequency, music, .. with the right stereophonic in your head, find the position of your brain, and there, find the position of the soul in the same position. I put you in a machine .. you wanted to commit suicide, now you are a loving, you don't want ever to finish. (1:48).

When you go to the D of the soul, even the breath taking is, they haven't matured, these people by taking a breath. There is no O in the space. How they going to do it in the space. We teach you how to it in any position in the world of creation. If I take this guy, as you say, by taking breath he does these things. I take him to moon, there is no O he dies. He cannot do the same. But the knowledge you have, the knowledge we teach you the structure of your own creation, you can survive in any position in the U.

You know that song every breath you take, every step you take, I am watching you. Do I need to take a step or do I need to take that breath. Because my soul can take ?? any energy. As I said, the KF T covers all aspects. These people can do 1, maybe 2, maybe part of 1 and 2. But to understand the totality .

I was explaining this .. in 2009 I was invited by UN office in Brussels, UN .. because as you know on my passing, UN takes management, not the ownership, (1:50). of the KF of 50%. This very soon will be transferred to Earth Council and the other 50% to the UC. A guy said to me .. in UN what we understand we have a problem with you Mr. Keshe, even though you are giving the management the running of the KF to us. It's in your constitution and we understand it. He said, at the moment, … we have about 10,000 to 50,000 people around the world in different cultures. In people who understand the whole of physics, we have maybe a 1,500

Someone who understands the physics
the last one we know was De Vinci, they come every 500 to 700 years. He said, today you are the one, and we do not know how to handle you. Because you go across the whole knowledge of mankind and the U. Derek (Red Circle) with me in that meeting. He said, this was the problem because they couldn't see us, they asked us, go for a lunch, and come back in the afternoon, (1:52). Because it's important what we want it to be. They said, this is the problem you teach, you talk, you know in physics, chemistry, and biology, everything else and you can connect it and explain it and it can be understood. He said, we get one of you every few hundred years, and you are in front of me, I don't know what to do with you. We do not know in the UN what you are giving us, which part are ?? that it doesn't become a cause in another place for war and something else. He said, this is what we have a problem to accept the KF to manage it, because the knowledge is totality.

When you go to someone in Tibet, and you see they might do something. How can they take us across the U. What are the scientists in Brazil have, that we can put to become another part of the knowledge. Here we teach you everything.

Now, you know, as much as I know, in every aspect of the science. Your knowledge is as level as me, and as much as I can transfer to you. And I don't teach you how to change the breath, these people can do. Now, you all can do, if you understand it. But through your experiences on the what we call, preferential understanding, you choose which part suits you. You want to do the MaGrav, you want to the soul extension, you want to do the agriculture, and the knowledge is there. But how far can, the knowledge is not any more

to the level of what I can achieve in agriculture. It's now what I can achieve in my soul, I can eat nothing.

That game today is what all of us can do, (1:54). without depending on the other, and another, to not only be satisfied on this planet, on this physicality, but in the others and other places and positions. We're teaching you the knowledge of the universe, not individuality of what could be. When you have it, you use it when you need it. And you don't need to do all of it. Because it's there.

You buy a sub-tool, you buy a shop, a big knife is in the kitchen. You don't use it when you want to cut an apple. You use it when you have a big bone, or a big piece of meat you want to cut. It's you who has to decide what type of knowledge you want to cut, in what portion of it to use.

But in general, if you got to the understanding of the teaching out to Keshe Foundation for past years, you have chemistry, some time you call it agriculture, sometimes called, medicine, sometimes, energy, now in the soul, now in transportation and everything else. Nowhere you get such a diversity of knowledge, because you all had something, in some teaching, you connect it, you use it

Q; .. if you listen to somebody whose ?? birth, can you tell a lot about that person? You can?
K- Why do I need, I see the soul, why should I look at the birth
Q: but how do you see this

K- Come and sit next to me so we. We feel the soul. and we test the soul with the physicality. One of Knowledge Seekers very recently failed drastically.
Q: What do you mean failed?
K- It's not there. It's not there.
Q; You mean the soul is not there?
K- No, (1:56). We know the physicality ?? ?? We know, and we say always, we test how hot the fire is, if it can melt the gold. We test the fire with gold. Because gold was the first metal man ever managed to melt, and manipulate, and that's why it's so precious to us, it's the first, like a first child. And then we see how much gold we can melt the man, and we test the man through that gold. The greed of the man, is the failure of the man, be it in knowledge, be it in money, be it in the status and the rest of it. When the test comes, it's important, otherwise always looks good.

I cried for that soul this morning.

Q: Thank you Mr. Keshe.
K- You're welcome. Thank you very much Azar for you and your family, for supporting us so radically, and so beautifully last week and now.
Q: No problem … anytime.

Any other question?

Q: Alexandra., (1:58). .. Whenever we are in contact with nature, in the countryside, or at a waterfall, in those places, with many trees, we feel a peace and a greater contact with the Creator. Here in Brazil, we have the Amazon forest, and we know its value and importance for the planet. So the question is, why do we feel so much peace when we are in these places? Is there any function and importance of the vertical beings, beyond what we already know? And could you tell us a little more about them, their importance and role here on the planet?
K- I think, first of all, you have to be in Brazil. To understand the beauty of the ?? tillage. To understand different strength of the fields of the plants, and the nature in there. You don't get the same feeling when you're in jungles of Africa, even it's green and trees and everything else. You don't get that feeling when you're in Central Park in New York, or you go to Hyde Park in London, still it's the same, still it' green and everything else. I lived, and I've been in both dimensions. When you go to Brazil, the green, the color of it, the texture of it, the emotion of it. is very different. It's an amazing. It's an amazing experience when you walk the jungles of Brazil. You you're in a different dimension. (2:00);. You're in a different what I call, understanding of the nature, and you receive different fields of it.

When you walk in Africa in the jungles, you feel the pain, you feel the suffering, you feel a lot of things in. The jungle bleeds. The jungle is not what you call, is there, but you have a different sense of, to it. It's

Here >>

When you go to North of Iran which is green by the Caspian Sea, you get a different feeling. But when we moved and we returned back to Brazil, I wanted to, to feel that this feeling was a wrong it was something not just just because of what we had the first time when you go into the greenery into the jungle in Brazil, you feel a dimension of giving we where the plants get fried, because they receive everything so beautiful, the position of the jungle the position of the place is amazing. And we are we are in reception of these jungle we are in in a very different strength in the jungles in these places. When you walk in the environment of the president greener greenery or what I call it's an amazing place is green is not the same cleanser green we know environment is not the colors are not and it seems that they supplied a full spectrum of what our soul needs to expand also needs to reach to understand and our soul needs to be part of and it's amazing what you feel when you walk these what are called jungles of Mexico or Saudi Brazil. The understanding of it emotion have it is different because I feel these are new, these are as I said a spectrum of fields which we lack and we need and we want to receive when you walk in Brazil, as you can see the picture is the photographs taken by us in our two visits to Brazil where we hope that in the future near future will be the center of the Keshe Foundation in Brazil with the help of our team when you when you see it has its different energy levels gives you when you receive the give it your condition and they take from you unconditioned the this

MT Keshe 2:04:08
this Bactrim of energy is amazing

MT Keshe 2:04:24
it's that combination

Rick Crammond 2:04:29
so Mr. Kesh, you're losing your connection there we

MT Keshe 2:04:49
know No. New

Rick Crammond 2:04:59
Hello, Mr. Kay Share is getting hard to hear bandwidth problem there I think huge

MT Keshe 2:05:34
Can you hear me now

Rick Crammond 2:05:39
barely it's kind of going keep talking now there's some kind of interference there with a bandwidth

MT Keshe 2:05:53
the Amina

Rick Crammond 2:05:55
so better now yeah I think the sharing might have interfered

MT Keshe 2:06:00
No it's somehow our main center was

MT Keshe 2:06:24
okay can you hear me now?

Rick Crammond 2:06:30
Yes better

MT Keshe 2:06:33
sorry we're trying to share with you the world recall per se in Brazil the color of the shape the color of the plants the shape of the plants are totally different than Africa. Africa looks like taking Brazil gives and you feel that giving somebody is microphone is open Rick, I can get all clicks. And this this process of understanding of the fields of the universe, it's important to us is the same. What would you do when to when you go in sub seeing physicality of a tree? The universe and going into a jungle and getting a mixture of physical What do you call it field strength? What would you do? How would you enjoy

them without actually seeing a tree? How do they affect your emotion? How would they affect your soul? How would you affect your physicality would some of these conditions in the space like the jungles of Amazon or jungles of Brazil brings you to manifest yourself in the dimension of physicality because the joy so much they're like your child you know you just jump out you want to be in this area because you enjoy it you become playful in the in the playground of the new dimension. In the future mankind will see and feel these emotions these feel the strength WC when I go travel around the world, you you look at the beauties I look at what fields I can give and I can receive in that environment. I do it natural is something which I built I don't listen to the trees as they say what they say I look at the emotion of the environment what the tree has created what does it mean? What does it contribute to the rest of its environment? What does it won't condition doesn't create the other plants would like to manifest themselves in when you go into jungle when you go into an environment okay the other plants not just a tree you see and see what this tree what is planned has accommodated environment created for the others to be created. In a next to that together they show the beauty or they can complement each other. When you walk in the fields where is nettles that it can rub and create your hurt and pain with which you might need it as a pain something you use you look for another leaf nearby, which you can rub it and take the pain away. These two always go next to each other. The Nature gives you knowing the manual software has already created the company just pick the leaf and you walk off Oh use this need that being old, but you have to understand what the plant has gone through to feel the pain of the mat when he touches it, and it takes his energy for me. Nettle is one of the things that we need more than anything else he had so many cures in it. Queen Mary College in London for years about a huge network of departments in research and what things they can it's so important in university allocated a huge department to the understanding of the work after that. But the nature doesn't open a university receta it feels the emotion of the man when he touches me, he cries he creates an environment that another plant nearby is there. I give you to take your pain away when I give you the nourishment you need. This is the way I look at the nature not that I go in I feel good in nature. And it's the same in Brazil. You feel what the political environment gives you and how it does

MT Keshe 2:11:17
this is what is why we feel good. We can go to a park st we stuck with that go just walk to a park. We can go to the Arctic be born plant one tree which is slightly different in this park. It feels so good to vote. Because that creates that environment that will receive the energies fields that we need. Even when we walk in the park when we walk in the jungle, get an antenna

MT Keshe 2:11:51
we are in China, we just do it and they take from us what we don't need so we feel good because it's like just been fed, but in a different level in a different district. As I said many times, then Brazil is another beauty of creation. Every nation every part of this planet has its own beauty. But Brazil and some NGOs are amazing.
(2:12).

Q: Salomea .. I had a dream, wish you and Queen Mary foundation from Romania who was a person which is a medical doctor Creator disease. And for this reason, I sent one in May, to the foundation and to him. And I'm interested if my dream became reality, and I hope that we will be able to cooperate in the field of health with this foundation because this foundation is dealing with hospitals and EHRs. And

K-
I have no knowledge of such complicated scores in the background, Keshe Foundation. Yes. Yes, I don't say this.

2:13:35
Yeah, I will. Maybe I will call this person and I will ask directly. And now I am in directly in line with the president of cash Association from Romania. And

MT Keshe 2:13:53
what is the cache Association?

2:13:58
Bracklesham Burano is the president of cache Association from Romania is a Association who organize your conference in Bucharest

MT Keshe 2:14:09
Oh, yes, yes, yes.

2:14:11
Yes. And Drago shoe Murano is very knowledgeable person and climbs. Buddy and teaching

MT Keshe 2:14:25
Yeah, these things have to be discussed at your level and the team each other. The Keshe Foundation in Romania is controlled or it's headed by Mario's and anything you have or anything in that position communities in many years and we are aware of what is very beautiful what they are doing. But if you want to get anything done between the Keshe Foundation and other ports in universities, you will have to go through Marius which is about direct access to the management Keshe Foundation decision making, yes, he

2:15:03
touch with Dragon.

MT Keshe 2:15:07
Yeah, but it's, I don't I go the longer the more but if there are such things, Keshe Foundation more or less, as in key countries ahead, somebody will looks after the affairs of the Keshe Foundation. And so get in touch with them, put them to do it. And if it is something big enough or something that we got to get involved, we get involved. And usually I don't see this insistence, by Head of Keshe Foundation, and VanVeen handle these kind of things, is the responsibility on the team in the background. Thank you

2:15:41
very much. He already knows about this. We used to talk before I inform him one year ago. Doesn't matter.

MT Keshe 2:15:49
Leave it to them. Because we don't get involved. Thank you very much.

2:15:55
Okay. Thank you.

MT Keshe 2:15:58
Yes. What's the next? Hello, Rick? Yes,

Rick Crammond 2:16:06
yes. Yes. Yeah, he's muted. Now. We have an image that I'd like to show you first. And that question is from our chat here. Let me just get it up again. Back in the chat. Let me see here.

Rick Crammond 2:16:34
Oh, I know it was in already in the q&a. It was from Daniel. He's asking me if I can show this photo. And so photo view actually Mr. Kesh. And he sent it in our last reactor workshop. We talked a little bit about it, I think you'll recognize the picture.

MT Keshe 2:16:59
No, I know. It's somewhere very young. That was

Rick Crammond 2:17:04
fun. Oh, this was I think it was the convention or or interview or whatever that you did in the Netherlands in Eindhoven. Perhaps you had a display there you were showing the everlasting flashlight and you briefly showed the generator system for the Magrav basically, or the reactor. This was like the coil system are something that and you had mentioned you consulted with electrical engineer or something to come up with this system to to get the energy from from your reactor system. That's the way I understood it at least. So he's asking Daniel's asking if you can say something about this?

MT Keshe 2:18:06
I cannot remember this picture. I happen to see the video section of it.

Rick Crammond 2:18:12
Yeah, I don't have that handy. This part came up. You showed it for just a split second. I remember seeing the video years ago. I think it was iron joven. It was like,

MT Keshe 2:18:25
I know. You did. Yeah, in Idaho. And we showed a number of things which are more or less still the backbone of the technology, but people couldn't understand at that time. And

I in hallway was in a way, that presentation became the backbone of showing the Iranian government's National Defense, power and Space Technology The following week. In this, you know, most of you know by now, in this exhibition, we were supposed to show the first flying machine on 26th of November. And Belgium's came to the house six, seven offices, and wanted to see on the 25th on the Friday. They wanted to see my system I took them out, show them the car. The guy said Do you have a flying license says the car stays here. I said why they dilapidated on the nation. Show us how he finds that we can use it. You don't have a license. And then they took all my nuclear materials. They put it as I had a safe as a nuclear physicist, I know how to protect the nuclear material. And they said it's illegal. You have to come up with the q cube you put all your questions, we see it instead of confiscating it. This will show us was deliberate damage. And then when we came to it when we couldn't show so very rapidly, we put a lot of things together, because the tickets were sold, when we came to the exhibition to the tutorial was half empty. And I said to the organizers, why is empty American Embassy has bought all the tickets to embarrass you that nobody came. And some of you who were there, you remember it. And then the following Saturday, on the third of December 2011, we show to show them that you have no knowledge, you better call illiterate elaborated information, that you cannot stop the technology show its power. And on the third of December, in the city of Ghent, in exhibition, for the first time we show the Iranian nuclear based power reactors, and are set for what they did to us last week, trying to embarrass us that there is nothing will show the power of this technology very soon to the west. On the fourth of December, less than two hours later, we captured the biggest American drone ever more sophisticated on the what they call Iranian territory, and landed it and it went public. There was no more embarrassment, there were 100 200 300 Tickets are brought up such a shape that was not what was said can we have our toys back from that they Iran has been superior power in plasma Technology, nuclear and in between. And this is this this exhibition. And when the Belgian Ted brought us to show the power of the technology, and even today, they are scared of what is in this level, Iran in development and processing and technology. A lot of hidden Technologies was shown our so determined to show you cannot stop the knowledge. We showed the beauty box of universe. We showed our heart of things that those of our top level of science could understand there is a change, there's something and then the following week, because we knew what they were doing on Saturday third of December. I didn't see anything. There was a conference organised by Peter, who then because he was the same as me very radical scientist opening he was showing how the injections are creating, what do you call autism in children. The Belgian government took him to the parliament and tried to tell him he's insane and put him in the mental institute. In his auditorium, we showed for the first time the power of the visual the first time they're hearing a nuclear reactors now is in the center of the exhibition in bins you see 3d.

MT Keshe 2:22:49
And I remember, I never told anybody, I just got 200 backpacks. We didn't want it to go public how this reactor shows what it is. And what okay with at the beginning, I said to Peter, Peter, anybody comes in has to carry a black bag. And when they came in many of you, I know about 150 of the world's total auditorium, there were people standing in the background everywhere. They had a black man who didn't muster any telephone, any

camera, anything electronic causing the blackpack in front of you. And the only person who feels to have to do it was there because he was reporting to his master, which we checked out two years ago out of this Malaysia and with his government, and they couldn't say what he was going to be sure. And then we went I opened suitcases and we shot Iranian plasma nuclear base reactors for space technology. And within 24 hours, we brought shame to the biggest nation in technology that had the loss of spy and they wanted it back as a this picture springs a lot of pain, how much we have to delay a software to bring the technology to mankind to be not to be in a position of was not to be in a position but maybe man was embedded into our minds is good. We made sure

MT Keshe 2:24:21
this shape to be but sometimes the solar market is not ready for this to come. But it's very it's an understanding many, many hidden technology, the space Deep Space Technology was forming on heart. It's a beautiful place. It looks like a UFO. And it was booked by a magazine for this to be shown and then the Americans went on and then they tried everything not to be shown not to be there. And a lot of other things which I have explained before. They came to embarrass us within seven days. So you'll notice the whole nation state and government backwards you have no knowledge we show you the bucket with us all the other stuff we show them practice on the airwaves and it is interesting anyway interest we found that a lot in the recent past that how actually the master the one who was dictating everything to Turk was with no house the boss all the texts we saw the same thing right across past two years say same boss, the reporter to the headquarters and it's very interesting when you have as they say in English a spy in the gap Thank you very much this units have auto application that he is and these data reported out to be seen to be done there's a lot of knowledge in front of you even today you don't see it in a lot of demonstrations inside. When you go to Linz there's a lot of things in there which I know what it is and even the presenters don't understand what is sitting there, but in the future you will understand

MT Keshe 2:26:34
you got to remember something really interesting is that you have to understand where and what and how to tap into the universal knowledge

MT Keshe 2:26:54
just because you made it doesn't mean you know what to do with it and the whole knowledge a whole science Oh space technology in a way the whole of creation was given to you in two or three simple structures Magrav the see toolbox, the guests the enhancement

MT Keshe 2:27:37
or are the backbone of the whole of the universal understanding of the movement attraction supply division of the fields

MT Keshe 2:27:54
when you look at this picture lens is Manchester is amazing. But you look at these things here. I look at something which I just talked about you

MT Keshe 2:28:06
here. This is where your space plasma nuclear reactor sits. That's the Battle of seed is there. If you go to the left, you will see the call the uranium space reactors, these are made. material comes from South Korea took about six months to find a way to build it. In city of Ghent in Belgium. This is a reputation of this basically actors, a mother and a child. The one on the right creates dynamic, rephrasing and reconditioning and repositioning magnetic field, the one on the left, because it's half a sphere does not allow the change of the fields, but it can allow the change of direction of the motion. In a way gravitational become magnetic. But in in the right one, you get clarity change and climate change and spaceflight is dangerous. So, the one on the left is harvest has no possibility of change of polarity, but it has perceived complexity of understanding technology. Then the field pulls up the plasma create different direction, positive auto clockwise or anti clockwise, descending and ascending and then you create that conditions. If you got the picture of the two white ones next to it. Those are the union nucleus plasma react. Which is useful explosive. It's just next to it. It's on the same bridge.

MT Keshe 2:30:01
When you look at these reactors and can do it the other two years of my life took about a year and a half, two years to build this was in control this very complex is extremely, I've explained many times before complicated structure, you see go outside that complex to bid comes in this place. Here, if you look at these rings, these rings are in different ports have to have the same, if you look at it, it took us nearly three months to be able to make these rates, the pick up information from these things to know what's the condition of plasma, in different layers inside the reactor. This system here, we could connect to different gases and different combination of gases, that we could choose the combination of the gas, in any level, we like, we could change the gas here to create more, what we call ionization. Here, we could change and we we could create, fill the finalization here to pressurize the fields here. Using one of these, which we could increase the power ease and changing the decimal side is the same together we could change the ratio of this layer of gas and the same district of gas and see the swamp like you change the condition of what we call centralization when you use guests and this system a lot these units are just flying system communication system and you have a picture of the other two reactors on the same bridge.

Rick Crammond 2:32:00
I can't I don't have a picture of that right here trying to come up with one of the earlier pictures

MT Keshe 2:32:08
if I have one show you

MT Keshe 2:32:19
is reactors have a specific field radiation the metal reactors do not perform well we call the plastic reactors because the absorbed energies they create a different condition of the flight. And in so many ways understanding the flight condition is understanding the

mixture of not gases, but the fields we create you look what ionization or gases are look for what I call interaction of the fields. And these are the other two space reactors from plasma reactors for space technology. These are sitting next to the other two. You can see them just on the left. I told you it took us about a year and a half two years to build the first two this reactor here was built in Iran Sherita home university in seven days. And a twin was made at the same time. Really the government made every effort possible to reach a test ground understand that the technology and but it took me a year and a half. It took them seven days and seven days on Tuesday afternoon when we achieved the first flight condition. The original reactor I blew the bottom of it literally slide the blow off the bottom up with the confidence I need a new reactor I've done I've blown the top in flight is loaded was Monday afternoon. Tuesday morning I was told the specialist for me to the opposite the research or the presidential office and you discuss and we'll see what we can do so and then later tested that it worked to do this. And I remember what a scientist being advised advisor with me and said you came here to build this spin Do you want to testify to the planetary system and you built it because our target was this one But you built this one to show you can do interact with each other. And it was more or less on the same table as you see here in the lab in Charlottetown. Us We changed the gases in this one and we find we watched, how this one flew we tried, we changed the direction of the what we call the materials, nuclear reactor systems here and we could decide with that which direction useful

MT Keshe 2:35:34
These are what we see as backbone, the present size in the space technology. And if you really look at this picture, if you understand what the structure entails nothing has changed and it's all just elongated to Enhancement Unit shorter innovates now, we extended the dome and this is your enhancement nothing else principle is the same as love putting nuclear radiation and the government's can stop us now we developed a space level fields that nobody can even understand

MT Keshe 2:36:29
and you had to rush

HERE V
(2:36).

Instead of putting nuclear radiation in, the governments can stop us , no w we developed the space level fields that nobody can even understand it.

Any other question.

Chemotherapy with KF Pl T - 100% no recurrence of cancer (2:37:00 to 2:44:55)

Q: Claudia .. if we did an imaging scan of our cancerous bone Nano layers at the time of birth. .. if we could replicate that in our lifetime, then we could live for thousands of years. Question is does, this T already exist, would it be for all bones, and how could we replicate this as adults?

K- We have passed this knowledge by what I call, hugely, with teaching of the T, (2:38). in the D of the STP and STM, we don't need to do this. You don't need to be ever worried about it, if you can overcome it, and how you can do it. You learn from it. You don't need to create these things. You have to understand, now you have a much more deeper understanding of this science of creation. So you should be able to get it. Or use temporarily the Gans's till you create that condition and the flow of it.

About mid early 2009 - 10 -11, I set you to show the beauty of, or the advantage of chemotherapy. Many of you have a lot of problem with chemotherapy, many of you have a lot of side effects. I set out to understand the material, the function of chemotherapy, and the rest of it, that it can work , does what it does, and then you don't have the side effects, we don't have the problems of it.

To understand this, I bought many animal bones, cow, chicken, lamb, (2:40). and went to understanding of it. The structure of it, the understanding of the totality of it. Very much like how you say, De Vinci used to do a lot of things like that.

It was very clear, that how we can use chemotherapy to take the energy from the cancer, but at the same time create a condition, that the vast amount of energy, which chemo provides, does not do the harm. I developed a patch, what you call, a patch, like a cover for the upper leg, that we could position the bone, the bone marrow, the muscle tissue, the layer over the .. skin over the bone. We put this into test and it was amazing.

We measured the blood cells, white cells, red cells, and before and after the use of this system. We could see what a big change in it. We understood the problem of chemotherapy, we solved it before it becomes a problem, so the body had a natural process of what you call, producing, without the problem of chemotherapy.

We tested it with the doctors and they continuously took data. It was definitely 100%. If you've heard me many times, I support, I am one of the advocates of chemotherapy, if it's used the way we see it, (2:42). and if it's used in conjunction with the technology of the plasma, the way we understand it.

It works 100%, not even 99%, because the immune system of the body takes over, instead of the chemistry doing it, there is no chances of the secondary cancer, and there is no chances, that the cancer will come back, because the body makes the immune system to match the cancer, and then if it becomes like vaccination.

People with this process walk a very, very beautiful life. They don't die of cancer, they might die of other things, they die of other things, because we've seen them happening. They die of car accident, they die of whatever, whatever. But they don't die of cancer, in fact it doesn't exist.

Understanding, and it all goes on that layer, the skin of the bone, that's where the situation has to be handled, and the Nano, it's a very Nano layer, it's very, very much, it's an amazing, that the skin of the bone is, in a way. When you tear it, in breaking (a bone)

it ?? allows ?? the calcium come to it. The what do you call it, when it cracks, it's so sensitive. When you fracture your bone, skin gets triggered. But in fact, has other purposes. It has a massive space. It's like a coffee filter. That skin is a Nano layer, coffee filter, which allows certain type of energies, as lymph to cross the bone, and anything which is not needed, stays behind it.

If you understand this, (2:44). we can play anything with more or less, any disease. We built, we tested this with doctors in Holland, we tested this with doctors in France, doctors in Germany went for it. Single doctors, they just tested it. It's a very simple thing. You just wear, you have these kneecaps, that you wear for need protection, they call it, knee support. It is very much like that. And actually makes the work of the chemotherapy, and ?? still working over six weeks, within two weeks you get it. There are a lot of technologies in that sense, has been built on the back of these experiments with doctors around Europe.
(Chemotherapy teaching proofed)
Any other question (2:44:55).

here >>.

Rick Crammond 2:45:02
Thank you. Mr. Kesh. See here, back to our q&a So second question from Brazil this time from a miracle Hello Mr. Keshe Frick and seekers that subject is what we call in ancient science, the incorporation of spirits into physicality. Here in Brazil, in all cities, towns, and even in the Amazon jungle, there are people who incorporate spirits and use this knowledge for good or evil. The question is, how and when does this permission for souls to interact happen? Thank you for allowing us access to the plasma knowledge.

MT Keshe 2:45:57
Spirit is what we call the Soul of Physicality if you understand the fields, which created if you understand your microphone is open if you understand the energy transfers like the liens we're talking about the jungles of Brazil, then you can interact with it because then you can add to it you can take out and in a way, if you do you get punished to take on it by your own dimension of your office character. This is what I always say. If the people you vote to tell you the fortune and how to do things, why always the poorest the most they live in the most horrible condition they interfere with other people's life they take away because if and if you're so good, why don't you see a fortune today where the jackpot is what number is for next you can become a millionaire you don't need to earn $1 You get $2 Seems what other was saying that people in Tibet can do some people become habit energy that they become aware of it that it can interfere with the sort of zeal, but all the physical energy has come to to interact and to balance the body. And so, it depends you want to use it the right way or the wrong way, frozen is a good good place for it as you have access to select more fields due to your environment. And could be can be that and somebody call it the use the Voodoo Buddy whatever the pins or whatever, these are all those who ever by accident came across it and use it the right way they

benefit those who use it the wrong way they punish themselves is punished and they create the solutions. Now we know this what the call spread or Soul of Physicality which is what in your physical body holds together and operates is like a frequency. If you know the frequency you can tap into it you can always just do that. Something broadcast on it. So when your job is not to interfere, make it available it is over to elevate us and more and more of you Knowledge Seekers do add to the knowledge you become one of those in generals of Amazon because now you understand it the same as many of you now understand the process of creation you can do a price it incipient power the knowledge is that we can understand it we can scientifically explain it. And some time your spectrum fits in two to four lives the rest you cannot do so but if you've got two or three right the rest of your life and you become a magician or magic I always put myself in the these things to understand how these people I don't want to listen to them but a few times occasionally my life I could let go but see how they connect how they understand what they do also dissolve they can live and some people are very, very good at walking the streets of Rome sometimes well 20 years ago 1979 So I didn't need to make a note in the guy says I want to read your I want to tell you because I have to tell you what I need to Only bunch of things when he gave me a couple of things he said use the security protection and things going to change and he told me a lot because I never met the guy he put a store on a sidewalk was called American. He said nice, nothing just talk. He knew everything I was puzzled about my past I never met a guy and one of future problems and a lot of things he told was more or less accurate and what he predicted was bonus because it's amazing how we get to it, I had the same

MT Keshe 2:50:40
encounter in Toronto in summer those of you living in Toronto this bears or whatever we walked through the street it was hundreds of cars sitting telling our cars or what the fortunes or whatever and my sister so festive I mean have a good laugh and that was another amazing experience with this boy who was setting never met knew a lot explained a lot and she was pretty pretty accurate

MT Keshe 2:51:17
and none of it was all you become a fortune it was very precise to the name to the place to the thing, which no one really you can have if you have a bigger dimension you can interact with more comes from the teacher to the understanding you can interact with every single soul across the universe not just understand how the universe comes. As we'll call it, if you want to call the horse whisperer, they understand the language of the horse understand that feeding. So, you had a soul whisperer you can understand it, but if you understand all of it is important and we teach you to understand how the Cornerstone is to touch because

Rick Crammond 2:52:25
I did find the video with you and the reactors and also I was sent a link to the facility in Eindhoven which is you mentioned that sort of a saucer shaped place

MT Keshe 2:52:50

but it is a beautiful place as looks like a UFO and I know this place from childhood more or less being connected to Philips on Idaho it is a home of Philips International.

MT Keshe 2:53:21
Interesting if you keep on that picture of the einhorn Phillips, supported football team, many of us know this football club. And Phillips plays a lot with the lights. They are mass are playing with lights, they create all the new light system they can light up even during the football game, the what they call it, where the ball literally follows into the goal they can do that they have that kind of technology available to them, they can light up different environments of the football ground they own more or less and they tested and interesting is they test the lighting system on the emotion they create the supporters and a football ground and there is a big controversy in the background how Philips creates a light to create condition for the football players or put opposition and all of it comes from the success and win in this area. eye to me as always a Philips as part of my blood. And I follow a lot of work being negotiated with Philips into technology development, many aspects of content arrangement and years and years ago. And it is interesting to see what will come and if us as a human being would like to travel with this as a UFO. Or you can travel with the direction of the Soul of the Man in any narration universe, you don't need to wait 1000s of years to get something which might give you some ideas in the back on to the knowledge of the future. What happened if you transfer or manage to communicate and rely on the use of a certain position or a structure in the universe within the inspite unit understanding that you can copied make it give you an Sonic that you can travel this point of universe instantaneously. And this is why why? I explained many times that what man sees on the star on a Galaxy somewhere in the universe is what's actually happening instantaneously. If you look into dimension, or the different field strength, or you look at it, as with cameras and dimensional matters, you say the label takes so many light years to come. But you're already seeing light at a time, which happens if you have understanding in a region to see a district. And I explained this many times before, when you have a nuclear bomb, you hear the sound before, during and after. Depends how we're, you're the same as what you see with the light. One told us that the sun is a store, you see the light, like a thunder and the noise comes. Mankind if he learns to travel on the speed of the light of the universe, we'll get to the place, even though the position of the destination never changed. A couple of days as some of you told me to wait the sun because you're really seeing the light. And most of us don't understand this, we went in a matter of sick. See, the same sort of magnetic fields depends which one of it you choose to confirm the existence. When you see the light of a nuclear bomb, on your way to the way of becoming the physical location of the sound.

MT Keshe 2:57:48
This is what our scientists have to understand. The position of the bone graft hasn't changed as far as scope determines by what we accept as a car permission to travel.

MT Keshe 2:58:04
Going to go to Idaho in this beautiful citizens of Europe has been more beautiful, beautifully done by the Philips international TV. Beautiful service.

MT Keshe 2:58:21
When you have the money to read this, you can do anything you'd like.

Rick Crammond 2:58:33
We have some a few GANS questions here. First one from Dan in the q&a. If I put a CO2 GANS into a CO2 reactor, in the same way as the CH three reduction to get the tridium GANS? Would it remain weathering remainder be an oxygen GANS?

MT Keshe 2:59:00
I don't know how you mix it one of the ways you know you created the oxygen look for drops of water around your system. Look at the level of the water what you this is a problem with our Knowledge Seekers here so passive. You know, when you fill up your GANS CO2 box to make mark to water? See if that the water level always stands on the same level or does it rises or does it go lower? Traditionally has to go lower, if you will, against system on a table and a water level doesn't change and put another box of empty water and you see that changes reduces so it must happen to this one. So if it doesn't happen, it means you're producing water you're producing condition that the water can hold See if you're what's in your box video producing the gas and whatnot in the box which you're just putting in a row stays the same and some of you you see reduction because it means you haven't read the condition of the arm was we have a beautiful Knowledge Seekers in Ireland of sunny in South China Sea and I've done a lot of work with joy love working with

MT Keshe 3:00:45
you see is when I showed him a construction I said now do this and you'll see and he It took him about a few days to make that construction in the garden in a portfolio on the pathway and he was there for months this and he said why don't you teach this to everyone as much that teach they have to understand to do it we you can produce we even measured marked how the level of water in one box moving higher than we put in and the lower says the cash we're making water that we're not supposed to talk to subs

MT Keshe 3:01:41
I love living in South China Sea incendio most beautiful places on this planet is gorgeous. And

MT Keshe 3:01:54
in that process, we've done a lot of work in this part of the world with him and is very dear to Knowledge Seekers he understands the knowledge or to creation far beyond anyone I know that is more or less synthetics

MT Keshe 3:02:21
and you have to understand the fields strict you have to understand the condition of the accessibility of the fields when you want to create it create Oxygen. Oxygen cannot be on its own in that also condition always leads to creation of what see how what is squeezed? Doesn't what a uses. How is your solidity? How does that synergy works? These are all part of what we call understanding of the Totality. T What else?

Rick Crammond 3:03:14
Okay. Well, further parts of Dan's question was how can I use an oxygen GANS? And I think you've answered that someone in terms of creating water? For the question, if I have a GANS? How can I identify the emotion, the Magrav position and the strength of the field?

MT Keshe 3:03:40
I don't know you have to find a way that is so true.

Rick Crammond 3:03:47
Then that might be

MT Keshe 3:03:50
one of the way one of the easiest ways to make such a thing. Put. I saw another GANS near it, and see how that gas changes and cupula gossip GANS somewhere else. We'll see if that changes the same to or not, then you understand it, get angry with your system and see what the color Ghaziabad what it takes all the gears. You just roll with it. See what it takes. These are experiences you have to make yourself

Rick Crammond 3:04:28
so that's probably an answer to the next question from Dan How does my soul use the fields of plasma through emotions?

MT Keshe 3:04:37
Speak to it. I can tell you

Rick Crammond 3:04:44
it's not for you to tell Dan about that is for Dan to find out.

MT Keshe 3:04:50
As always say the color red I see another color reducing

Rick Crammond 3:05:01
So Dan goes on with another question. If I if I use alcohol in the CO2 Reactor instead of water

MT Keshe 3:05:11
you get the gas.

Rick Crammond 3:05:14
Then what if I use citric acid?

MT Keshe 3:05:18
I don't know you make an alcoholic one. But you have to test and see what you get

Rick Crammond 3:05:31
so it was like an alcoholic lemonade perhaps.

MT Keshe 3:05:35
It looks like it

Rick Crammond 3:05:39
okay from his sannan San has got a question about his hands. Mr. Kesh. My question may sound crazy, but I'll give it a try. I play a lot with my hands. I find myself caught in many flows like spiraling, symmetrical repositioning of the hand, the body or the head, I find invisible interaction points where my fingers and toes reacts together, I find myself pinpointing my fingers and precise positions on my body, my head, and often my nose, which makes me breathe like I've never done before. I find myself making strange noises with my mouth and nose just looks like a blender noise with different speed levels depending on the air intake and rate of breathing. What is the explanation of these interactions? Thank you,

MT Keshe 3:06:35
your body and your field that's as simple as that each position creates different fields expansion or interaction. A simple your body is active plasma, you have more energy in your nucleus. Actually, according to us, it's a body of the man carries a team Hiroshima bomb, which is only magnetic field. So if you push it in one, you put a magnet on a table and move it to another place and bring a weaker magnet stronger magnet, you get different actions. Now you know your body is a plasma. So there should be no such a question. Although the plasmas which are feeding fields interact with on the test sometimes. And it's an amazing test. To to understand your system, if you work with someone I used to put the system right against the heart. They felt nothing. It meant the system is not true. But if they tell you the field someday. But if this is taking the breath away, you know you got it finely tuned perfectly to many of the people we did test with we used to do this because the reactions in the past was made totally different way than that. Systematically, you're know somebody calls you and says Mr. Kesh. This, this, this happened to me. And this, this happened to me. Can you explain and say, did you do this in that using the reactors? So yeah, so that's a consequence of it. Were the first reactors we created for trials? Many, many, many women would gone there menopause 1020 years down the line. They got it back. And they wish Mr. occasion is on my side. So you wanted to be young you wanted to recover from whether it is this is what it does. We enhance the body. And I always used to say there has been a careful, Grandpa doesn't become a diet. Change the emotions. Now we see it we see the cycle in many many or people that they regenerate because of the intake of foods and other things were starting to open. And he happens to a few but if you understand there's a system behind it, you can do it what do you want to stay that active? Do you want to sue creating children age of 8090 100? Why not? If the body is there and the physicality to support Why not Do you have to find levels on what if it's any other?

Rick Crammond 3:10:18
Oh, yes, let me see here

Rick Crammond 3:10:33
we have a question from Andrew in the YouTube who's got a nanocoat ID coil, that he put a GANS coating on two or three years ago. And now the whole system is dry, and he wants to know whether to renew nanocoat The coils, or

MT Keshe 3:11:00
I don't understand why people read nanocoat

Rick Crammond 3:11:04
Well, he was concerned, because you mentioned one time that to nanocoat, two times to cover any parts that were exposed are still in the matter state, especially with the twisted wire connections of the Magrav coils.

MT Keshe 3:11:22
So they saw the beginning when you do something, not just on the line.

Rick Crammond 3:11:27
Right? And you would do that before the GANS? And yeah. So what if, what if you already coated them with GANS, and so on, can you read nanocoat The whole thing very quick at all,

MT Keshe 3:11:45
you can try you'll see bits coming out samples up, it's like because a new skin, nano layers grow up the top I crack and fall and so yes. But the field now will be compensated won't be the same fields. Right. You might only last time you only got the green GANS is now when we get the transits, but I used to use this because the increase in different fields

Rick Crammond 3:12:21
those fields will be embedded right into the matter level of the material, basically, and just put, again in caustic might get pull off all the outer layers, but it's still have some of that embedded in it,

MT Keshe 3:12:35
where a Korean company uses our technology for production of the new nanocoat. And they literally do this literally.

MT Keshe 3:12:57
You see you understand the science of creation. Then you can make any material for that time and place in the space. And you can always repeat it. I've said this before, when the first I went to to SEK Belgium nucleus center. And they wanted to see the liquids I make. That's all they were interested. So I made them three different liquids. And I gave them a Coca Cola. They waste all of this, can you give us some more I wanted to see if I can replicate. One or two was the replication of the blood of the mass. One was the replication of something else, also replication of something else. And they they measured it, they felt it's about you produce nuclear radiation in a simple bottle. I said because I

understand it. And then SDK for now today. Also nucleus center. Before you couldn't if you had any nuclear material from building to building, you have to report now any material with new technology room to room you have to record and report because now they realize you can make nuclear plasma based technology from human water. But they couldn't understand it. How is that thing? That's so backwards? They haven't started yet. But they bring a scientist of this knowledge to understand up to them

MT Keshe 3:14:45
so we call it top 20.

Rick Crammond 3:14:48
Sure, yep.

MT Keshe 3:14:50
Yep. Thank you very much. Thanks very much for today. Thank you very much for all your support. In the past week. We still need your support. We haven't finished it And if we hit on the problem, I don't want to come back. I prefer to be saved and worried and go back and say happened past 48 hours. And I think the knowledge was here at law, or the rapid response, and unconditional. And this is something we live in the same units. See you next week. And hopefully we'll have another cycle of understanding the knowledge of the creation. Thank you very much. See you next time.

(3:16).

430 KSW April 28, 2022

END

431st Knowledge Seekers Workshop; May 5, 2022

(Quick Index done; Part 1- proofed, Part2 - transcript mostly done, need to Proof; Key Words, Phrases Quick Index) (Elias Auto Transcription) 2 excerpts from this KSW

Part 1 proofed

(:06). Video from Spanish group, How does plasma science work.
K- … This recording he has done a lot of work in the background … he has made many programs .. is appropriate for the teaching of today. In a way, elevating his soul. He brought so much to the Spanish group so much dedication to the work perfection to the work … (:08). Starts video ..

(:10) .

(:11).

Put AA in vacuum and get Cell of the Man (:11:40 to :43:28)

K- Yes. Thank you very much for playing that intro. And I'm sure a lot of us have seen a lot of these pictures many times, we read the books, we read the papers, we made the Gans's, but how far do we know? What do we know? And how much have we thought about this, (:12). or it's just what appears on the screen, or page. When you look at the one of these pictures, it comes down, that even an amino acid (AA) is a plasma (Pl). So all of us in the Keshe Foundation (KF), the way we look at our amino acid is something oily, flat on top of the Gans's, we make.

But hat happens if we turn this plasma, into a vacuum condition? How would the amino acid, then look as a plasma, is it truly 3 dimensional. Then when you look at it, then, if you can turn again the amino acid of the CuO, ZnO, CO2, CH3, or other materials which you make, put them in a vacuum condition. Appropriate for it to take its optimum shape, and what we call, emotion, what would we get? For sure, we get the shape of a cell of a man. For sure for the first time we will see that structure.

When who work in a correct vacuum condition as the body of the man, you see things in a different way, things behave different way. And then we can see how, we can replication of the man by the fields, by the plasma of it. Then by the essence of the center of it what we call, (:14). the operation center of the amino acid, or what we call, the soul of it.

But there is one thing more fundamental than all this, when we put it in 3 dimension. In a way, that cell as an interactive entity, is a fundamental plasma, is a neutron, is the beginning of a cycle for another cycle.

In the books, and in all the teaching, we continuously speak about fundamental plasma, which is by its nature, the initial, the beginning, the what we call, the what we see in the outset of the work, of what we call, movement, motion, of what we see as M fields, in different direction, in different strength, in different sizes. But in totality, as they have one common denominator in the center, they behave, they are connected to, and they interact with each other.

You only can bring plasma together, when you have common denominator base function, in respect to the environment, which they exist. One Plasma might not exist on Earth, but that fundamental Pl exists on the moon, which we are not aware of, we don't have awareness of it, we don't have education of it, we haven't been there.

A fundamental Pl on another planetary system, another solar system, another galaxy is different, but an essential understanding, they behave in the same manner. What has happened with this fundamental Pl? We talk about division of it, (:16). when the fundamental plasma goes through a cycle of division, and creates and releases, what we call, nuclear decay. How does this nuclear decay takes place? How does this nuclear decay starts, that it reaches this point?

This nuclear decay is caused by the interaction of these fields inside, and become gradually stronger, that its internal central field force, in respect to the internal field force of the original plasma has to show a reaction, MaGrav positioning. And what it does, when the field strength in this plasma reaches in force, equal, or in line of interaction, similar to the original, then it takes its position. In taking position, it shows as the plasma has divided, what we call, nucleus decay.

So, in a way, electron, you call it, the Soul of Man you call it, or the start of the creation of any entity, as a plasma starts this way. You call this fundamental plasma, where by strength interaction of the fields within it, has, goes through a nuclear decay. But what is the other understanding of this technology, this plasma? You call this one nuclear decay. (:17:50)

Fundamental Plasma - the Creator

You have another fundamental plasma, we call it, the Creator. Where through the attraction of its fields, (:18). through interaction of the fields of itself. Going through a decay has created the Creator and Mitra, or the soul of the Creator, and the rest of the creation. (:18:12).

But still, within this structure carries the same. We have chosen different names for the same process, fundamental plasma, the original, the Creator, is the same. The original, where through decays, and decays, of frequent developments, and interactions of other fields, has led to creation of many galaxies, universes and the rest. Where in this process, you become another elements as we know in the cycle of the knowledge of man.

So, when we talk about the fundamental plasma, and we talk about the Creator, there can be no difference. But the fundamental question to ask, in fundamental plasma of neutron, we guess, we know what fields could be there, and how they came, because they came from another process.

What about the fields, which led to the creation of the Creator which led to creation of the plasma of the Creator, that in its division (audio dropped) .. this forces, lead to this. (R: Sorry, Mr. Keshe, we missed about the last sentence. K- I can't ?? remember)

K- We know that the fundamental plasma comes through what we call, the evolution, division, interaction of the fields of the Creator. (:20). So we see step down process. We see interaction of the fundamental plasmas, in with each other, or together, or amalgamating together leads to creation of new cycles of life. We call it, a cell of the

man, we call it the body of the man, we call it a tree. So, what happened to the division of the fields of the Creator, which instead of the man or the tree, became galaxies, became universes, and the rest.

Now, we understand, now we can go a step further, to be able to comprehend the process of creation. To understand what, and how, and where we came, what we were created out of. And in a way to find, comprehend, to walk the path, the reverse way to the Creator. Or, in a way, become part of the fundamental plasma, which led to the creation of totality.

But there is a huge question. Where did the fields of the Creator come from? What led to the creation of this Unicose, this universe? How was it created? Or is it the physicality of the man, the physicality of the universe, a mirage? Because if we cannot find the essence, the origin of the fields, we have no reality to the functionality of the Creator, and the created. (:22). Where did the fields of the universe come from? Where did the fields of the Creator came from, that led to the creation of the Unicose, the universe, the man and the rest?

The question is very deep, but understanding of it brings man to one point. The powerlessness to understand the totality of the creation, at this moment of time. No medication and no meditation will bring man to understand the process, the structure of the creation.

But fundamentally, the fields of the Gans's, of the amino acids, of us. The other animals, once upon a time, was part of the fields of the Creator. Once upon a time, was part of the process of what we call, Fundamental Plasma. But how much plasma, how much fields was within that original creation and the Creators plasma, that now we still see the expansion of it, we still see the division of it, we still see the nuclear decay in a larger scale, than an atom, what we call, nuclear decay of the universe, nuclear decay of the plasma.

In cosmology, we have seen this, if you look at, and in some of the papers and book, I referred to this, (:24). that, in some parts of the universe, cosmology sees fields, collection of galaxies, which are rotating in the opposite direction to the environment. And most of these are created by the interaction of the fields of the other universes, but some of these are those electrons, which are ready to depart.

So, even we live in this universe, and what are scientists observe, what our scientists tell us, we see these patches. Which one of them indicates the interaction with another universe, and which one of them will indicate, this is the new electron, the new universe to be propelled out of this universe, to start a new cycle.

But when this U reaches its destiny, or destination, or what I call MaGrav positioning, in respect to the other universes, would it stay the same size, or when take fields, what is free within the environment of the Unicose and expand itself to bigger U, that it can be

equal, and it can be tolerated, and could be balanced M and G, in respect to the other universes.

In reality, man has just put a toe into the ocean of the knowledge of the creation. We still got to feel the warmth of it, and then we have to trust it, and then jump in it, and that jump in takes a lot of knowledge. How to survive in this ocean of the knowledge, and the reality of the creation and the Creator. (:26).

To what extent our scientists have ever understood this process? We just look at galaxies, we look at stars, they are there, they hit each other, they are in that position, we see the same star in the same position for thousands of years. But where did this all came from? Where did this came to be part of? When the fields, which the interaction, and what I call, amalgamation led to the creation of the plasma of the Creator.

And if this is correct, which it has to be, because we see it in the image of the nuclear decay. When it comes, where did the fields of the Creator, came from? Is there another dimension above? Or forever we go to God, to God, to God, to God, and the gods, which is the father of the God, the father of the God, of the father. Then we are back in the same cycle.

But essentially, when did the first M fields, which led to the creation of the present universes and Unicose, came from? (:28). As I have always said, if we cannot understand it, and we cannot explain it, and we cannot physically, tangibly, lead our knowledge to understand it, then everything we have around us is nothing but a mirage and a façade.

And then it comes to the point, was it the fields of the strength of the emotion, which led to the creation of the Creator, or did the Creator have as field interaction created his own emotion? In the Koran, blessed Mohammad says, He has 100 attributes, and that's only in the matter state, not in the plasma state. The attributes of the Creator is incalculable, we cannot even talk about it. We just talk about what we understand emotionally, in the dimension of the fields of the matter state of this planet.

Then it comes, that if with our knowledge, that if with our understanding, we could find the fields of emotion of the Creator, would we be able to interact with it, that emotion transfers our connection? Even the field emotions of the Creator has a strength, otherwise it cannot interact. It's an effect of its, (:30). existence, and to be there, to interact, it has to have a dimension (D). Then can we in the new processes come to understand this? Can we in these processes, go through the condition of understanding the totality of the motion in the universe?

Many of you will be shocked when you will see the flight enhancement units (FEU) process of flight and interaction with the Soul of the Man (STM). (It's) never been seen at all. It's a technology, which has been hidden from man. It's understanding the process of the creation through the soul of the system, system be it the aircraft, be it the flight system, be it the Creator, be it another person.

The new flight system, which you will see, will be unveiled in a very short time, you will see something is never been seen before, never been comprehended, that man can reach this level of understanding, that he does not even need to move his physical body, where he can transmute his soul, and manifest himself, himself even within the soul of the Creator. If the man understands the strength of the transmutation and transportation of the fields of universe (U).

In the new Enhancement Unit for flight, you will be baffled when you walk in. You'll walk in within the fields of the universe, you will walk in with the understanding of the creation of the condition of the universe, then, if your soul finds its strength within the strength of the system, (:32). it'll find its position in the fields of the universe.

They'll be one of the most amazing flight systems men has ever seen. And its simplicity will baffle the scientists for centuries to come. You got to understand, to be able to travel, within the oceans of this planet, you need, it took man years to create submarines, to be able to hide, and be inside the cocoon, we call it the submarine, to be able to move like a fish.

Now we have brought the knowledge of the "submarine" floating within the fields of the universe. Having the ability to reach the strength of the fields of the emotion of the Creator, if man decides to be as pure as the Creator, detached. Where physicality and the wealth of this planet has no meaning. Where the wealth of the knowledge of the universe, where the wealth of understanding the process of the creation, is sacrosanct.

Then, you become that circle, then you become that fields within embodiment of the field of the Creator. And one day when your strength reaches the strength in power of time, you'll become another U, another attribute embedded with the fields of the Creator.

Then the question comes, is the Creator within me? Or am I within the Creator? (:34). The motion of the fields of the cell of the man, the amino acid (AA) of the body of the man, is another connection in line of the Totality of the existence of the complete ??. And we're still in that process of being created as a cell, to further on, to create a new dimension. And then for that, again to become part of the new D.

Then as I've said many times, if this process exists, that we go from the soul of the Creator, to creation of the Unicose, then there must be an environment, that this Unicose is born into. Then the question is, what is this? Where we as a creator, meeting, and we pray to, and be seen as the omnipotent, itself, is part of another structure.

You cannot blow a balloon in a room, if the balloon has no room to grow. The universe as we see, cannot expand with 1 million kilometers an hour, if the room for it to expand doesn't exist, but where is that room? What is that room? What is the limitation of the understanding of the man, in respect to the present knowledge of humanity.

Would Man lose himself, when he reaches to that level of understanding, or would man become satisfied and matured, once (he) understands this understanding. All the wealth

on this planet worth nothing, compared to the fraction of the knowledge of the Creator and creation, from man's understanding. (:36).

AA Gans put in vacuum :36:05 to :38:20
Then you need to understand more about what you do in these Gans Boxes. You just made a Gans, you're still in the dimension of the what we call, field strength of this planet. What about when you put this Gans in a vacuum. In the near future, many of you in the Institutes of Keshe Foundation will do this, because it's the only way you will see the reality of the interaction of the fields. Where we can take one Gans, and change the environment of it, and see it the size of a football, then see the interactions with it.

If any of you have worked as much as I've done, and many of you in the laboratories, where we work at minus 11, minus 12 in a vacuum condition, you see the beauty of the creation. You see how things take shape. You see creation within the vacuum chambers. We see the energy they release after we shut down, after when they ?? release. When we did these tests in Bruges, in Belgium, in the Ukrainian made, special space vacuum systems. When we shut down our reactors, when we shut down everything, then the fields used to play. Then we several times, could not control these fields, and they went through the channels of the fields of the man, and they burned the system (out) after we left. What I call fields transportation, transmutation, where they cannot find a space and they travel, because there is no limitation with a matter of state of the man (matter cannot block the fields). (:38).

Then, can we become part of that field? Then, can we become part of that, what we call, non-tangible fields, and travel the embodiment of the body of the Man, or within the environment. (:38:20)

In the production of the new systems for flight, again, in the lab, in production, our people saw the same thing, after they switched the system off, time later, the merger of the plasma fields, with no electric connection, has melted the boards, because the fields are still in existence.

The body goes to sleep, but the soul, and the fields are still active. The same as when you go to sleep, but everything still goes on, and you call it a dream. How can we use these positions? Or do we learn from them, that in the future? We switch off the physicality, and we let the fields of the Soul of Man, the body of the man, the cell of the man to take, what I call the freefall. Take the path, that is allowed by the strength it's gathered, to find its position.

Isn't this what happened to us when we die? But now, through understanding of the system, we do not need to die. But we can be day to enjoy the fields of emotion of these fields within the system. Be it interaction with the mother, the dog, or feeling how the furniture feels when I jump on it. Everything has an emotion, everything has a feeling, because it's made of the dynamic fields. (:40).

Now, the science of creation goes back to the Fundamental Plasma, be it a neutron in a atom, be it a proton in atom, be it an electron within an atom.

Nuclear Decay - really a conversion Proton Electron Decay

In the present nuclear technology, which I always objected to the nuclear scientists, we always speak about nuclear decay. But in fact, we have proton decay, we have electron decay, which means when the fields inside builds another dimension within them, and then not holding, they go through the process. Our nuclear physicists always have made this limitation, that a neutron decays. God forbid. A proton came from the neutron, has the same attributes, has the same properties, has the same expansion and extension on the fields and interaction.

When our scientists come to understand the process of the proton decay, electron decay, then we will move more in understanding the dimension of the creation. Then, we understand, that when we go through a division of an atom, it's not only, that the one neutron changed, or neutrons repositioned themselves, we have to see which electrons have changed as well, which protons have changed again, ?? gained ?? Just because we see the numbers, does not mean it's the same proton, doesn't mean it's the same electron, it doesn't mean same neutron. (:42).

Then if we understand this process, we go back to the fundamental process of the decay, fundamental decay, and the fundamental elements of the universe, which goes back to the process of the division of the fields of the Creator.

As a nuclear physicist, this misunderstanding, this words of only neutron decay, has bothered me for decades, but you cannot speak about it, because they don't understand it. Even our own nuclear physicists, cannot, never been taught, could never comprehend, what is good for a goose, is good for a gander too. If it is good for the goose, it's the same thing as for the gander. If it can eat the same grass, it does the same thing in the body as the other.

This is the part of the knowledge that you as Knowledge Seekers (KS) now have to react, interact, understand to be able to go to the next step of the fundamental process of the creation of the elements, movement of the fields, energy transmutation, and transportation and transmutation in energy, or matter state, and the field states, which is part of the universal process of creation.

(Creation excerpt : 43:28)

The reason I brought this topic up is, that when you see the new FEU, you will wonder what does it do, till you get in it. But when you are in it, what can I do? The process is for Knowledge Seekers to understand interaction of the fields of the plasma (Pl). (:44). Many times, many times I have said this, stop looking at the matter State, look at the fields, interaction of the fields, and the behavior of the fields.

With the new flight system, you have no choice. You bound to, you have to be able to understand it. There is no control panel. There is no nothing when you walk in. You walk into an empty room. It goes back to the box we showed in Einhooven, the "empty box of the energies of the universe." You walk into that box, your soul becomes part of that box. You're another stick hanging on the wall, of the cap of that box.

But It goes back. What do we take from the fields of the universe, and what we give to the fields of the U, to keep our emotion, and our soul in respect to the emotion we have, intact. That, at the end of the process, we put in a chicken, we get out the chicken, we don't put in a chicken and get a turkey on the other side.

Beyond KS - Advanced Space Scientists - take T further

It's fundamental for those of you who are playing with this knowledge to understand. Many of you might think, we talk to you as a Knowledge Seekers, you worked at Keshe Foundation. KF teaching are listened to by many scientists in the advance research laboratories around the world. Many of them work, once they understand, to develop a new dimension in technology. (:46). These type of teaching is for them, especially in the space level and beyond.

Our Knowledge Seekers, what we call, those who understand and look after the depth of the knowledge, does not finish with you who are online today. The scientists from leading universities, private Institute's, and religious organizations, which listen to every word of the teachings, to see what they can grasp in their field of expertise. And how they can expand the knowledge.

The understanding of the expansion of the energies of the Soul of Man covers both those universities and the structures, which are theologists, and the scientific together. We have this in Vatican, as much as we have it in the Islamic Republic of Iran in universities, with trained clergies, and teach them to be a doctor, teach them to be a physicist, and teach them to be the others. Where they try to understand on the ethos of theology, the understanding of the true essence of the creation. And these scientists will expand the knowledge of man in a much deeper way, than our Knowledge Seekers, who just make Gans's.

It's the time to understand the process of interaction of the theology and science together, that all of you become an expert in understanding and the responsibility of the emotion of Soul of Man in respect to the physicality of the man. The new Enhancement Unit flight system will force us to that position. (:48).

We throwing man in the deep oceans of the knowledge of the universe, by releasing the new flight Enhancement Unit. We hope none of you will get drown in that knowledge. But you understand it, you process it, and with it, you create the new dimensions of existence for mankind. The 4 flight systems, which are now getting ready to be tested in June, will bring a new dimension to the flight of the Man, what I call, the flight of fancy. In a way, what you want, you will achieve. And when you come back, "I've been there,

since we haven't seen you, you haven't been there." I've seen the mother, and the mother says we have to do this, but the mother died 14 years ago.

But with an understanding of the new structure, you have not ?? grabbed, you have created the fields, that already had a connection with the mother, to enhance, to see the mother in the dimension of the Soul, but to the image of understanding of the fields of the eye, is the mother.

Is what we see a mirage (:49:08 to :51:04).

Then it brings one fundamental question to all of us. Is what we see a mirage, that through the conversion of the information in our eyes, become a mother. If we can make that in the dimension of the sleep, how come we have not made it in the D of what we call, awake-ness?

Then is the reality to the dimension, of the physicality of existence? Or is it always a mirage? Or with the new technology, with the new understanding, we create a condition to be able to travel between the two. (:50). The space scientists, the scientists of cosmology, and the scientists of what I call, theology, would release of the new enhancement flight system, will have a big dilemma, how to work it.

Many of you walk in and you say, it doesn't work. And many of you walk in and you tell a lot. And then who do we understand, and who do we comprehend in about the talk, and who, which one of you is not ready, has not understood, so cannot reach that point of interaction. The new enhancement units for flight is one of the simplest, but more comprehensive ways to teach man the first step about the motion, about interaction, about transmutation within the fields of the U. (:51:04).

This week, I was in the lab, and when I saw the structures next to each other, it brought me to teach more, for you to understand, in the near future, even these structures will be non-tangible, than the physical way you see, in the present EU.

We tap into the energies of the universe, and we give to the Soul of the Man, what it needs from it, to elevate itself, and than transmute itself through the same process, to reach the dimension of the Soul of the others, to create a dimension of the reality of the existence, in the dimension of the Soul of the Man, not in the dimension, physicality of the man. (:52).

Soul is working in background

Where the man now walks the street, but the soul is working with the other souls in the background, living a schizophrenic life of the physicality, and the fields of the universe. With the new EU we bring that position, that man continuously is aware of the both, which one is enjoyable, and which one he wants to work with, and how to coexist, that the use of the matter state of the man by killing to consume will come to an end.

Try to understand the teaching of today, try to understand exactly what is talked about. Try to work in the D of the fields, understanding the strength field division, and then try to understand how these are interconnected with the Soul of Man, Soul of Physicality of the man, the physicality of the man, and the physicality of the environment, and the soul of the environment, that brings you to that point

Stones of Vatican back to Coliseum

Then, is man ready to see the Christ with his own eyes in the EU. I promised you this years and years ago. Would the Pope have any position when he stands in front of what he preached to be his master? But he lied in his name, and he betrayed in his name, and he killed in his name. I promise you if you go back years ago, I will return the stones of Vatican back to Coliseum, (:54). where it came from.

Because the man has to understand the process of the theology, the creation, and the state of the matter state, that one cannot abuse the other. When man dismantles the Vatican by his own hand, he will not even return it to Coliseum, where the man abused the physicality of the Man, but in Vatican, they abused the STM in the name of the Creator.

Then men becomes knowledgeable to see, man will put the frock of the religion, and what I call, abuse of the Soul of the Man on the doors of the churches, the mosques, and the rest. We all walk the same. Where there shall be no king, as we all understand the kingdom comes from the understanding and knowledge of the Creator, and not with the frock of the man, and abusive behavior of the others physicality of the man.

We reach, we are in that process, to launch the flight system, and then to expand it, for more people to be able to see, to be able to reach, to be able to understand. Most of the time you're not aware of it, even when you walk in the exhibition in Linz. When you pass one of the units, just be aware, the unit is alive, it's still getting fat, it's still putting weight on, and its the same as you, but it's there not to eat you, but to consume the energy fields of its environment ?? for its existence. (:56).

The new flight system, which will be released in the coming time, will teach the man to fly in the dimension of the Soul of the Man, and not the physicality, and then man decides where, in what shape or form to manifest is the dimension of physicality. As we say, in English, "I would like to be the fly on the wall to see what happens in that room." Now, you have an opportunity, that you go in as the STM, and you become fly on that wall to see what the man says about the man. Because now you are in charge of it, you understand the process of it, and with it you gather the knowledge of the creation, and not the wealth of the man.

Try to understand the work of the Fundamental Plasma, the creation of it, the process of its existence, without these hullabaloo of the Quarks, and Anti-quarks, and everything else. Look at it as a dimension of a planetary system. Look at it as the interaction of the fields of the cell of the man. Look at it as the interaction of galaxies in a bigger dimension as orbits. Then you will see, and you'll understand the process.

Universes eat and reject

As I taught some times ago to one of the KS, you think, that you are the only being, that you can eat and reject. (:58). The same thing happens in the universal, in the galaxy state, when the field energies absorbed are not needed, are gathered in one place, and in balance of the fields, rejected. As what we call, maybe an electron. It's the same process. It doesn't mean that every field entered, or in entry, and then conversion is needed by a cell, by a galaxy, by a universe. They are gathered in one place. And then in time when they gather strength, they are rejected.

We see these in the oceans of the man, with the plastic ocean, what they call, islands. (Huge accumulations of plastic pollution in the oceans). They come from all over the planet, they gather in the heaps in the oceans. And they create a D. Then what happens to them? How do you reject them, it's the same as an electron. How it's going to be rejected?

Clouds reject excess energies out to space

We see these in the clouds above the skies. Not all the clouds are just what you see as the wind blows, but they are amalgamation of the field energies, which the planet cannot hold on to. It gathers together, breaks it up, and creates a new dimension of the fields, which some of it, a fraction of it, comes towards Earth. The rest moves outside the planetary system. When you see and hear the thunder, it's not that what happens under, where you are, the fields which the planet cannot hold on to, which are gathered in the upper atmosphere are rejected out of this planet. Otherwise this planet would be heaped, with dumps of the fields of the solar system.

Part of the process of the clouds, (1:00). and interaction of the fields, in the planetary system like Earth, is rejection of the fields, which cannot be absorbed. And at the same time, rejection of the fields for the creatures, which are above the clouds. As we've seen in videos and confirmation by NASA, and the space scientists. We think we get everything, but they need the energy systems of this planetary system, because they are part of it.

Then you open your eyes in a new dimension. What does the Soul of me needs and holds onto, and what does the soul of me, gives out, that it can give opportunity to the other souls to live ?? physicality's to live.

Go back to one of the talks after a long time, where I explained about why the grandparents love and enjoy their grandchildren. They use the energy, which they carry, it gives them strength, new dimension, what they don't need, but it's what is needed by the old man. We do that in a young age, but we forget about the process, because the hugging and the emotion is much more, than the truth in what actually the emotion is, and what it does.

Launch FEU - others will also release T

This is the process of understanding the fields interaction of the U, and mankind has no choice, no alternative, but understand it in a very short time, as new technologies in space are released, not only by Keshe Foundation. In a very short time, once we launch these systems, others will develop parallel, (1:02). equal, better systems than us, because they understand part of the knowledge, that we were not interested in.

The race to space truly starts now, that the mankind as a whole with the free teaching of Keshe Foundation, has allowed the totality of the Knowledge Seekers of this planet, to start racing to be able to expand, to use, and everything else. The interest will not be in how much harvest will increase, it will be how much happier we can make the harvest to be, that while it's there, it enjoys existence, because we don't need to eat it. It's not there for us to kill.

The process of the technology is finished. All those Knowledge Seekers, who were leading as Knowledge Seekers with just making Gans's and Nano plates, and whatever, is over. We respect and value the knowledge they brought, but it's time for the whole of Keshe Foundation Knowledge Seekers to move up to higher level, to understand more, to understand the interaction of the fields, as the matter the state of the condition of the use, is over. Even though we keep you busy, because the new KS ?? have with it.

Those of you who were the original Knowledge Seekers and you've got stuck, that "I'm a leading Nano plate maker and the science of plasma Gans making," you got stuck in last century's game. Move up, move to the new understanding and create the new levels of education for our Knowledge Seekers to come. We still teach people how to Nano coat, how to make Gans's, because through that, they feel the fields of the Gans. (1:04). They understand there is something more, and then they develop to the next step.

But those of you who understand in a higher level of education, universities and scientists who work around the work of Keshe Foundation, step up. As the English say, "if you don't want to be a tomato, you'd better catch up." It's time to move on. It's time to understand the process of the interaction of the fields of the condition.

Fundamental Plasma, as you all talk about it, and it's decay, change the Fundamental Plasma, to Creator, and then understand, how much you still need to understand about the whole process. As I've always said, when you read the books, the three books, depending on the understanding, depending on the comprehension, you will see it fits into another dimension. It's very generic. It's written in the language of a nursery, in the language of the professor. It depends on what level your understanding is. If you are still gaga and going, in the nursery, or you speak about the creation and totality of understanding in universities.

Fields that led to Creator - still dividing after billions years (1:05:42 to 1:07:01)

Interpretation comes by knowledge, but the book is the same, and the understanding is the same, and the process is the same in all levels of the creation. But there's one point of mystery, which man cannot understand at this moment, (1:06). and he's not mature

enough to understand. As I said, where did the fields came, that it led to the creation of the Creator, and it's so powerful that it can split, after billions of years, still create man and still carry on creating new dimensions. How strength, and compact are the fields of the Creator, that in what I call, division and separation across the universe, still have a long way to go, to fill the full space given to them by the Unicose, to grow into the dimension of its existence. Then who made that limitation of the room of our Unicose? Then that comes to another point of understanding of it. (1:07:01)

Thank you very much for today. I hope I opened your eyes in the old teaching, but with a new eye, and new understanding of totality of what's to come.

Med Beds made up by Hollywood

Q: … Recently, I found information about a new technology, that is about to expand on Earth. They call it well, .. but I think she means "med beds," which are quantum beds made of plasma. There are experiences of people who go to dimensions eight and 12, in the in the etheric. Have you heard of this type of technology? (1:16).

K- Yeah, Med Beds is a term came in sci-fi TV programs, as we've said before. The people who use or have come up with this technology is partially from our Knowledge Seekers in the background. Who have tried to implement, they use quantum, they use the word quantum from it. It is partially the work of the Keshe Foundation, we know one of our KS who was very close to us, broke off with the Russians trying to promote this, but stays in the background not to be known. That is what the call is scientific, but not a scientific term, but it's a film, what a call, came from Hollywood words, of what we call, a space, or what we call, programs, or movies.

The technology, the Med Beds, what you call, it is totally different. And it's money in quantum physics. We know a couple of our Knowledge Seekers are working in the background with a group of scientists to come with this, what we call, a Med Bed theory, and the work of the others. But you will see the Keshe Foundation Enhancement Unit and

what we call, flight system (FS) has never been seen before. It's not a knowledge that is in public, and it doesn't bear any similarities to, what you call, these systems.

It's a space level, highly plasma space level. (1:18). and it's totally different, different game.

here >>>

We do not work on the understanding of personal understanding of what we see with these technologies. When you create a dynamic system, even recently, the Italians and some Germans made these kinds of things. And so with Dr. In Germany, and we saw Dr. Roderick was made some systems with cancers and rotating balls and many of you have made those coils double coils and angular Wonderwall. When you enter the fields created by man, and this systems, you always get the reaction and depends how if he's in tune with your body or not. And I started this very closely in trials in China, where we did with some systems without people knowing thinking what they thought they were doing, but in fact, I was working in another dimension in the US or the system. They were interested in one way and we were interested in how the soul will decide enough on the physicality size to change. And we see it meant but it is a fancy name from the television, sidebar movies. But if you create dynamic fields, you will have interaction with the body automatic because it's against this magnetic field dynamic itself. How you feel onward is different but how you targeted Is there

Any other question?

Q: Salomea .. Could the ninth of May be the date of peace negotiation, (in Ukraine) and not a new stage of the conflict? Let's send this wish in the souls of all decision makers. What do you think? Do you think the 9th of May could the start or date of start a peace negotiations?
K- What does that mean?
R; Do you think 9th of May .. start of peace negotiations. About the Ukrainian and Russian situation.

K- Ukrainian Russian situation it's very clear what's happening. It's, I think, I tried to keep out of this situation, because we know more than you do, and we understand what's happening in the background. You will see the new movement, new actions, new interactions, it's.. You have to understand how this thing is developing. And how the West is propaganda, the way the Americans wants you to see. And the propaganda from the Russians, what they want you to see, and somewhere in between, you see it with a neutral position.

You have to understand whenever we gave the work to actors, and comedians, and footballers, we always run into relation, (1:22). with bankruptcy and problems. We saw Reagan, and now we see Ukrainian president, which is a comedian. He is actually a

comedian. He thinks the life of people in Ukraine is a comedy. He wants to make you laugh out of it. He never understood the power of politic, what it is, means and he just plays the game of what I call, cartoons with his nation.

A comedian should never become a politician. Especially leading a nation. We saw the same thing happen in Liberia. A footballer became the head of a nation, and the nation is going bankrupt. He doesn't know which end of the table is the head of the table, or the bottom of the table. We've seen the same thing with a cricketer Imran Khan in Pakistan. He had to be kicked out of the office, because he married a rich English aristocratic family and he managed to buy himself presidential, the Prime Minister ship. Brought the nation to his knees.

HERE >>

Ukraine came out of what I call, comedian become very deadly. And they play with him and he played his niche. It's all there was on stage. Making jokes or at least seems Dota two jokes with the Russians. good about that is a portrait blocks, deep Jewish background. This is the question which is posing now. And leadership around the world. How such a deep Christian nation has a Jewish state. Not that there's something wrong with it. But how was he put in opposition? A lot of question marks about what is happening in Ukraine. Now we see in the background with our latest things coming up. Multiple has accepted the defeat in Ukraine we might see the next step which is a submission you go to see the defeat of course to see the the word boy very curious, which was from the sea on a different disguises Pope in Moscow very soon. Remember, he went to the embassy. And now even though a lot of angles to this, to this situation, Ukraine is not just one and we're seeing deliberate destruction 50% by the Russians of 50%, by Ukrainian themselves because they're not Ukrainian, you have to understand where we see the intensive fighting. They are the mercenaries, which reporting estimated 10 to 15,000. mercenaries are in Ukraine that getting paid to short and are getting paid in advance if they kill. So they don't care who they should. This MARPOL situation is about 1600 of them trapped in there. from Albania from so called Far East, dark from North Africa. It's a business game, but they don't tell us on that. There is another nine to 11,000 of them on the west side waiting ready to get engaged with the Russians. This module situation you will see going step by step is trained missionaries, mercenaries that come to earn money doesn't matter what happened to the nation and are blowing everything up. And just been given ammunition towards you like

MT Keshe 1:26:31
this Ukrainian situation is is not what they made us to see. In the West, it's much more deeper. It's got everything now involved in that testing the latest systems. The Americans are benefiting more than anybody else by it with the testing that they haven't had time for a few years, testing the new things and failing we had we had a bunch of the new what you call rolls backfire to themselves and killed more Ukrainian than anybody else. And then they blame the Russians for it. Because Ukrainian got all the faulty systems which they wanted to get rid of all these gets paid by Vatican so that as the

MT Keshe 1:27:22
peace in Ukraine, it's a long way from our What do you call it, call it a piece. This will come and pour sides with the feet of Vatican indisposition as a financier every bullet every mercenary rageous is underwritten by that

Rick Crammond 1:27:49
you're so surprised one time to see that the Vatican blesses the weapons that they send out and just seem like such a contradiction.

MT Keshe 1:28:03
See, we've seen this religious fanatic Wars is worse than to religious ones, you know, with Israelis and Arabs, you know what they're talking about the depth right to the same ball. But the Christians fighting Christians, not what it can come in between. There's something that happens.

Rick Crammond 1:28:27
I see that there is a news item in the last two days that the Pope is wanting to visit Putin. What do you think about

MT Keshe 1:28:39
I've seen this headline but our sources in Vatican tell us has already been arranged. They have to talk to be able to do it. You got to understand new have cornered the West things have cornered Russia. But we in the West will pay heavily for this job with our lifestyles. We've seen gases has gone up by seven times in this scenario. The Americans are trying to find the new gas resources coming to agreement in the background with Iran with a gas resource in the Persian Gulf, the putting pressure on Amana, the tar to export more of the material. They want to ban the Europeans Russian oil but the factor is this is a blessing for the other part of the world which they cannot buy oils. Which of the what do you call it? The Russian base material they have to change the filters and is in general. The winner in this war is what I call the Americans and the Russians, both are benefiting by it. And the rest in the middle they're paying for the shortage of food shortage will be up in next two years, we will see. We will be headed by a colossal price increases in food due to Ukraine, Russia. And the Russians have gone for the ports. This is something which a lot of you have no understanding of, because you don't look at the dimensions we do. These ports are the signers are the bread baskets up many middle eastern and southern to Western Europe. Resources and Russians went for it. The price here is not the land is the product of the land. And 1000s and 1000s of tons of grain has changed hand under Russian occupation. And it's become a Russian asset. Russia has already been paid for the patient. And that's why they went for these ports. All the grades are moved to the post to be shipped out. And they went and they took. And that's why they're fighting in what he called the port areas. Because they were they can handle everything else. But railways are on the hit and to stop them guns and bullets moving the ports are there because all the grains have been moved to sitting in in Ukraine is a breadbasket of oil and rain for many, many nations. And they got their hands on. And doesn't mean it's going to be shortage. It's just that there's another boss in the office but the same grain is sold in the accounts. And they'll never come back. It's become national assets at a rush. And as we hear now,

even the farmers are encouraged to farm in the field. battlefields in the big cities we see they want to show their life in other parts cases normal and Peter works on whatever it is the machinery normal days to harvest the land. We don't see all of it we just see a few pictures they chose us to see in the rest

MT Keshe 1:32:47
and this port, this port which has been used as a long history into second war as all of us it has many Underground's comes up kilometres out of thin steel industry. All this mercenaries come and go through these tunnels and Russians owning these properties for years they know all the articles. This this is still packed we was used for resistance against Nazis. The Ukrainians when they were fighting Nazis, and is well known this has got as somebody said this but more hidden underground stuff in the tunnels in London, where the battle is not just hitting a steel worker is a rat ball of mercenaries which came in to come up to it but they got trapped into it. And some went in there to save other lives and they got trapped into it.

Any other question

Fields of Creator don't go through decay - converts to new levels

Q: … (1:34). regarding today's teaching. Is the field of the Creator also going through a decaying process? If yes, then what to
K- It doesn't decay, does not decay. Even in nuclear technology we call it decay, it's the wrong word. It converts to new levels. Decay we have the mindset, that it gets destroyed and rots, and blah, blah, no. It just gets divided into different strength.

They still have the principal in the center, you still have the transition, and what we see outside, ingoing and outgoing, what we call, MaGrav fields. Decay is the wrong way, because it doesn't actually decay, it doesn't reduce in its strength. It's the collection of the newer strengths, which can interact with the environment. Some of the fields, which are not useful to both new entities, when it converts, becomes the fields, which they ?? decays. That's why when we speak to you ?? about nuclear conversion, we say when the neutron splits into electron atom, a proton. it's not just. We always show some fields radiated (out), that in the terminology we use, to heat up the water, or whatever. These are the energies, which are of no use to both parties of a division. But they become absorbed, they become a food. This is what we're trying to encourage Knowledge Seekers to understand this process, that you don't eat the proton, you don't need the electron. (1:36). You use the fields, which are released by them, which are no use to them.

If man understands that position, you'll create a condition, and it's in the structure of the Enhancement Unit, the FEU, this is what we do. We keep on telling you, we don't feed you, but we create a condition of the fields in transmutation, that your body can accept as food, as energy, that it can survive. The design of the new space units, is we are we tap

into the universal energy every second. We develop the technology to tap into Universal energy every second, and feedback what we don't need, that's why you don't have a toilet.

This is to understand the process. Nothing decays or rots, or disappears, it just becomes amalgamation of new field packages, and what is not needed as a field ?? ?? once you're in the new technology, we rely on these fields, which are not needed by an electron and a proton, in what we call, nuclear reaction. We absorb it in the water, we boil the water. But now with knowledge we have, we don't need to absorb it in the water, to boil water. We are absorbing the water, which is in the body of the man, and then it's used in the lymph's by ??

But the question comes in, when you go to space would our body carry lymph? Would our body carry water? Or would the composition of the elements of the body of the man, (1:38). get rid of what we call, matter states, or what we call, the liquid states of the replication, as we call, lymph.

We don't have water in the space, so it has to change to a new dimensions, and new ways of adapting into the environment. Many changes will come over time as the man stays longer and longer in the space.

AA and the Vacuum Condition

R: Mr. Keshe, you mentioned earlier in their workshop today, about the amino acid and what would happen in a vacuum condition, and you mentioned the vacuum of the body and so on. But it reminded me of the early days let's say, of the Keshe Plasma Reactor Group, which was originally based on the vacuum condition reactors, that you were working on at that time. One of the first things that you taught us in working with such technology, and when you mentioned the minus 10 minus, 11 vacuum condition, and so on that, that you wore gloves, like surgical type gloves, when handling the equipment, that would be in that vacuum condition, and it had to be squeaky clean basically, (1:40). because the oils on our skin would evaporate in that vacuum condition and contaminate the experiment, basically, or could have could, you know, introduce side issues and so on.

I wonder if you could talk about that a bit, it kind of struck me when you said that was the amino acids like are, they're normally flat in our, CO2, or especially the Fe kits, that we put together, but the CO2 kits, other kits that form the amino acids. They're like you say, a two dimensional layer, but in a vacuum condition, they'll open up. And it opens up to the imagination, what could happen there. It seems to, like you're saying also about in the vacuum condition, lots of interesting things happen, especially the more vacuum cleaners, but yet there still has to be something there for the fields to kind of work with as well. Could you talk about that a little more, and about that idea of that amino acid opening up in the vacuum condition?

(1:41:18 to 1:53:00)

K- In a way, what we see as the amino acid on the top layer of the water, is the M field pressure difference between the Gans water below, and the atmospheric condition above. If you happen, maybe some of you noticed, maybe some of you always blamed it on something else. Some days, you create a lot of amino acids, and some days, you don't. Some days, you see the water murky, but some days the water is clear. But some equipments you make, (1:42). make a lot of Gans's, and some don't make a lot of Gans's. But one thing which you have not noticed, look at the pressure gauge. Look at the condition of M fields in that day, in that equipment. How strong is the field of the Gans, that maybe you get the amino acid above the surface, or the reverse, you connected the other way around, and your amino acids actually, you're making it, but it's in the water.

When you work with the vacuum systems, not the normal vacuum systems, what I call, chamber vacuum systems, where you see the Totality. You see what can be done, then you understand the dimension of the plasma. Sometimes we worked on the high, what do you call it, condensed fields.

The process is very simple. You have a chamber maybe about 20 liters, and you run the chamber for sometimes, until you extract most of the matter state materials out of the chamber. So you have a what I call, (1:44). as much as possible, matter free but field, field flow tank. When we used to run the .. flight system, we don't run the chamber while we're trying to vacuum the system, because the ratio of the chamber to the system is where, it's a huge difference, it's a 100 times more. So what we do, we go reach to the level we want, and then we switch the system off. We hold the chamber, then through the lines which are connected, we connect our chamber, to the big chamber, and it sucks all the material out.

If it's the first time you run, okay you have some gases you filled in to get, but sometimes when you are going for a second, or third test, or whatever, there is a plasma created inside the chamber. So, when you vacuum, and ?? hopefully you have a chamber, not only of a vacuum of the material, but you have a chamber of fields, there is nowhere in the universe, which is field free. So, if your system in the process of testing, created the fields, which matches the chamber, which happens most of the time, you move that plasma into the big chamber as well. And then you see, because these chambers are glass front. We see, like three dimensional, what do you call it. It's a fields, it's an entity, it's a plasma, I call it. (1:46).

One of the reasons we chose the word "plasma" and we developed it this way, is because you see it. If you can hold it, if you don't turn on your chamber to vacuum again, these fields as a plasma you created in a small chamber, now in a bigger chamber, in some cases, they gather together. And you see, it's like illusion. It exists. And if we don't allow to empty the chamber, and we run the chamber to vacuum while this is in, we always damage our systems. Because the energy of this plasma, this three dimensional entity, now has found a path through to what we call, the system.

This is how we know when we talk about these things, that because we see it. And sometime when energy we created, because you have to understand in tests, we used a

combination of gases. It's in some of the teachings, what gases we use. And we used some of these gases for a specific job, we create radiation through gases in 2 or 3 layers, not in one layer. And secondly, in our chambers, we have nuclear base materials already embedded. (1:48). So we create a very strong dynamic plasma nuclear fields. And because of the material we used to create these fields, we have a combination of the elements, and fields energy, as what is on the chips, on the microchips of the vacuum system.

So when we release it, or we try to pump it out, while the fields are still in the bigger chamber, they go through the electric channels to the chipboard, Mother chip boards, and they damage them ?? . They are there, we don't see any burning, but they get plasmatically, Nano coated. When we take them out, we see them, they're perfect, the chip is perfect. We X-ray them, we don't see anything. But when we start cutting into some of the chips, you see the what we call, plasmatic Nano what he call, layering. The system is perfect, but now it's Nano coated, they become resistor to the condition of electric current.

I've spoken about this many times before, even when you use your MaGrav system, I speak about the Plasmatic Nano coating the wires in the houses, you use the MaGrav system more or more. This is how it comes about, because the system creates fields, and it's because it's Cu, it matches with your wires, and it goes through it.

This is part of understanding how we can put amino acid, (1:50). and then if it's transferred into the chamber, you'll see it. Now he has a freedom to take shape.

This is exactly what happens in our body. The AA due to the salinity and the vacuum body of the man, has the ability to take shape, to become the cell of the skin, middle layer, or top layer, or bottom, or become cell of the bone or whatever.

Our amino acids are not stacked like a sandwich on top of each other. They are in a vacuum, they are like a ball, they stack like when we go to the children's playgrounds, they have these huge cages with a lot of balls in it, and children jump on it, that's how your body is. It's a bunch of these balls on top of each other, but organized. This is why when you will make Nano coating, I tell you put, just for one second, put a wire to a power supply, or battery, or whatever, that you reorganize (the plasmas), our body reorganizes through electric currents within the body of the man, and a heartbeat. What sits on the stack on the other.

The body of the man is that just by, happened to be amino acids, and stacked like what I call, you know you go to the Kebab shops, they put flat layers of meat on top of each other. We are not created that way. We are not flat meats put on top to make ?? , but we are M G exposed environment in a vacuum of the body of the man, and we are like balls, depends how much current it passes, how much fields comes from the immune system, how much fields comes from the blood, and how much goes out, that it gives a dimension, a cycle of the fields. (1:52).

Look at your body and look at the size of the veins, and spread of the veins in your physical body. The upper body bigger veins, takes more information, as it comes to your extremities, fingers, or everything it reduces, because you don't need to make those big cells, you don't need to confirm, that kind of the things.

It's not just that Gans's, everything has to match to create that condition, that it becomes a cell in a specific position. When you transfer AA in the vacuum condition, which is in the body of the man, it takes its shape, it's a ball shape, it's 3 dimensional, not flat. If you understand this, there's a lot of applications for this, huge applications. (1:53:00)

Q: … Brazil. In our blood, are all our records, emotions, magnetic fields and behaviors. So the question is, why are so many people needing a blood donation? And what happens to the person who donated the blood, and to the person who received the blood? How can these records interfere in the life of the donor, and the person who received the blood?

K- Surely when you receive blood, what you received carries emotions and effects. But our body has an adaptor, it adjusts that blood to what it needs, the way it needs. And if it fits, it keeps it, that's why you have different blood .. types, (1:54). and one doesn't fit the other. Because the body cannot decipher, cannot transfer energies ?? up to.

When you see blood, the body immediately, through its ?/ immune process, .. adapts or adjusts the blood into your consumption, in what you can use. And if it cannot do that, it becomes a foreign body, and it can kill you. That's why you can't inject animal blood into your blood sometimes, because it doesn't fit, doesn't transmute the information, and the body cannot adjust it.

If you understand this, you can (make) a lot of .. transplants without any problem, because you change the position of the interface, ?? with a new interface, the understanding of the new soul, the new body, and then you see how much it changes. The body of the man is a very complicated, but very simple system, if you understand the way it works.

Brain tumors emotion

Q: Can you explain in a simple way? Why do brain tumors occur?
K- Same as everything else, you have to find out what has been, what has created that gravity. Where? If you look at some of the brain tumors, you can connect it to emotion.

Doctors using Gans's on their own cancer

When you go to a doctor nowadays, they say, "Oh, you got a brain tumor." But go and study how, and what that position of the brain, where the original tumor is, or was, or was created. (1:56). To what emotion is connected. And then, if you go back to the patient and talk about them, about that emotion, you will see the cause of the cancer. Unless you get it by being hit accidentally, which is 10 20% of the cancers.

Then because they can analyze it, they can understand it. You find out, "oh the tumor has disappeared," or reduced, but it's still there, they can't solve it.

At the moment, we are working with a couple of doctors who they are, are .. medical doctors, and they have cancer, and they are monitoring their cancer, and we advise them what to do. And watching them how they change, and how things are changing, how the tumor growing, or how the tumors are reducing, what effects they make, and they're monitoring their own cancer. And we are learning a lot, especially from one of them, he is a doctor in cancer.

He talked to me a few weeks ago, doctors are puzzled that I'm still alive. And they don't want to accept that the Gans technology works. With his cancer, he should have been dead, a year, or two years ago. But with using the Gans's. But he's monitoring himself, he's doing everything, and he is an amazing doctor. He says, according to the present medical books, I should have been dead a long time ago.

But we still see, suddenly the cancer grows, and suddenly it stops. And then we look at another angle of what we missed in the process of what should have been done. It's amazing how we are learning from doctors about ?? (1:58). and their behavior of cancer. They literally made themselves volunteer to test these things on themselves and they have access to everything. They do their own blood test every week, they do their own X rays, and whatever they need to do. We see, oh it might have grown by one millimeter, but if we ?? were not, they would have grown by 30 millimeters.

KF Technology for Cancers

So we're still controlling what it is, what it is. Brain cancer as primarily, if it's not due to what we call, evolution, or to an accident, that you've been hit and it compresses a point, that becomes the seed for the cancer. If it is emotionally based, you have to find out what that emotion, wherever that emotion, that brain tumor is. Understand it and then understand the interaction of the STP and the STM, and then they'll find a solution. They find a solution for it.

If you understand the prostate cancer, you can resolve, you can delay, you can stop, you can live with it. Knowing that understanding the technology of the what we have, and how cancer works. You can do a lot. But unfortunately, we cannot teach these anymore, due to the situation we have with the, what I call, demented nation of Belgium. We stopped all these processes, and many of you are suffering because of it. And we are watching it, because we cannot get involved. I can help many of you to talk away from many diseases.

I was diagnosed with a cancer of the pancreas. (2:00). And many of you if you remember, ?? ??? larger image due to that. But over the past 10 - 12 years it's fully managed, I don't even think about it is there. It has been through the process of, and it went till recently, I could not eat certain things, because of my pancreas would collapse, and you see this when there is a pancreas liver condition. You know it straight away with

your excrement, your critical, whatever, the color of it tells you. So I even passed those points over time, using the right process of the Gans's, for myself. I walk away with it.

But the medical application of the Gans technology is so huge, and we can help many people. But unfortunately, we have this, what we call, criminal nation, and ?/ the way these leaders work. But they stopped it, they stopped the world to benefit by the technology, which is many, many people benefited by it.

You can literally, instantaneously, now we have the knowledge to interact with the tumors, anywhere in the body.

You have to understand even the tumors have a soul. That's how they gathered, if you can interact with it, you can ?? move it. But while it's there, "I am not changing, till the guy changes his habit." He changes the state of his son, I am not moving from .. prostate. .It has to be understood, it's not a ?? ??

The medical application, and the health application of technology, (2:02). would have been world renown with the things we've done. We rebuilt the brain, we brought the blind girl back to sight, and anything else you've seen. But its the criminality in the eye of pedophile king, and his entourage. The father, the same as the son.

We should have been able to help many of you, with the technology we ?/ know. Many of you write to me, my son, my daughter, my child, my husband, my wife. I can guide you, the way I guided Giovanni to build a system for his daughter, to build a brain, which has never been done in history of man. You can all do it at home. But as long as we are free, we can teach, and God knows how these people will die, and their agents ??

There is no reason, if you understand the fundamental cause of the cancer, that you can interact with it through the technology. Even through technology to your emotions. Even the knowledge is deep enough, that you can change the what we call, "evolution cancers." Evolution cancers can be interacted, you delay their motion, or you speed up their motion, to pass that pain, that the body can ?? cooperate. Both ways can work, but it's always better to go forwards, (2:04). then going backwards.

While we are on this subject about the technology, as we said last week, and the week before, Keshe Foundation has started a teaching for those of you who are beginners, who want to make the perfect Gans's, or how to make Gans's, and how to use the plasma Technology. We have a started workshops in Keshe Foundation Linz, and it will be once a month, at the moment till we add other parts to it. The first workshop starts on the 11th of June, maximum capacity is about 20 people. One of the well known KS in the production of Gans's, he's there, and he will leave the workshop.

HERE >>

and if you want The Keshe Foundation website is already there, you can book yourself while the workshop is a Saturday from 10 to six on the 11th of June. We're hoping the

following week after that, we'll announce it next week. It'll be for those who do the pottery, and a week after maybe for the painting and sculpture, and one of our long term Knowledge Seekers will recall around us will teach these things with you. And we can make their own pots and everything else will, pressure or, or, or the call sugar, or the restaurant or other things you want to test. And Rick, ensure link on the private chat, you can put that up. That's the link you need to go to book your race. If you go on the private chat to communicate with your apostle link, we can go to the Keshe Foundation shop. And from the link of the workshops and register. And if it has the number will be put to the next month watch. Have you seen it?

Rick Crammond 2:06:20
Yeah, I'll put that up now.

MT Keshe 2:06:24
There is a what we call a fee of 350 euro for the day. And we supply you with the material which you need in the workshop to do and the reason with a pottery, they're almost certain the place and everything else will be provided. And if you need to buy any additional material that you know that whatever we've done, we're hoping to have one of our Knowledge Seekers future how to do the body lucky crochet knitting, making dolls and things that are embedded with dancers for different feelings and emotions. You will see this on sale on the Keshe Foundation shop in the next few weeks. That is a new product line and person who makes them on a workshop everyone at workshops for those of you who want to learn how to do it, you can register for it. And we try to bring more technical features on this site. I have to explain again, the Keshe Foundation in the coming time will release the name of one of the leading agencies hopefully, for employment, to work with Keshe Foundation around the success we're setting up that were you this agency the hopefully once we complete our work with them, will be the sole way to be employed in the Keshe Foundation is around. Doesn't matter which country you're in, to be employed. If you're a Knowledge Seekers or not, or whatever, you have to go to this agency and they do all the checking and everything needs to be done before you're employed by the Keshe Foundation. So, if you want to start learning and going to the workshop, Keshe Foundation lens this is the face and nobody else anywhere on says we teach one is in vain so other just ignore it is not done. It's done by our Knowledge Seekers. So we did not have it Yes, but this is the way we control mystery should be done the way we do it. We're trying to expand the application of technology that hopefully once you learn it, teach it don't come to these classes that you just come to be in one workshop try to share the technology and knowledge without question.

Rick Crammond 2:09:04
And that's good, too good to hear Mr. Kesh. And it's interesting the pottery painting and sculpture classes. These are traditionally sort of the in the arts and category more than science, and so no, as well as bringing science to the soul or to spiritual science to spirituality or science to religion. You bring his science to the arts community as well.

MT Keshe 2:09:41

Sorry, carry on.

Rick Crammond 2:09:43
Now, go ahead and feel something. Sorry. I was thinking I'd like to see an extension of that into the building materials industry. For example, concrete is one of the materials that uses very large percent of the world's energy and pollution. From the whole process, there's a new process, what they call bio ceramic, concrete or bio ceramic materials to be used for building. And it seems like that ties into the pottery, which is a ceramic type material, you have these connections with the pottery, people in China and so on. And it seems like a perfect match to branch out into building materials which are stronger than concrete last longer don't have mold and other issues. And you can embed the GANS technology right into the building materials into the building itself. And it seems like a perfect structure. With that combination of the bioceramic, which is a different basis than the normal concrete.

MT Keshe 2:11:05
We are in the background, so Knowledge Seekers with us now they know who they are and what they're talking about. Keshe Foundation is getting involved and is involved in this field. And we have people who have developed new technologies, which actually come into the Marine Corps, lens Exhibition Center in a very, very near future, where we actually get involved in applying the technology in this field of construction. And I'm sure, very soon, we cannot hide it, and months left before he comes out. We don't mention where and how but some of the knowledge sits in the background know what's happening, and we ask for please to keep quiet it goes public, where it is what it is, Keshe Foundation have been appointed as a honorary member of the board of the committee, which will building four new cities in one of the leading Western Europe nations. We've been asked, we've been appointed as honorary members to advise in the newest based on what technology in hopefully every aspects of the construction of the music. I'll be attending the one day conference and operation of the beginning of this work as the representative of the Keshe Foundation, and our technology is considered to be acceptable by the people who had this to be in every part of the building, construction of the formula cities, which is a brainchild of a man then is to see the support of the government. And in some ways Cashman, he can support the part of the development of this technology, we are getting involved in that kind of things, very slowly, we are now going to people, people are seeing the advantage what it can do, they're coming to us to do it, and the tiles and ceramics and concrete and everything else. This part of the work has been around a long time allocation of vision. And we know the facts, you have the strength, the brings the changes in the environment as that ocean of the CO2 in the house, how it changes the emotion, and how we can use it for heating facilities. You're all getting involved in a very silent way. But part of what you supported us in the past two weeks and we are still asking for proper support. We are not finished on actual listening support for some more. And the process is that way, we are getting involved by the by word up now. As I was told very recently, somebody from NASA leading scientists from NASA, has recommended by the scientist to look and work with the Keshe Foundation, they want to join the Keshe Foundation. These are leading scientists from American Space Agency, that are recommended by NASA scientists to study the Keshe Foundation

because that this is a next step in the space technology. And obviously, when I heard about the email, and how they want to come to collaborate with Kf, it's interesting, but they're holding back we have to be very prudent and be very careful how we do these things. And we still we went out to you two to two weeks ago, for financial support, Keshe Foundation prototyping to become poor out of and get this program completed. And we still need that support. We have not finished and as I said many of you support us with small Some big loans. And that allowed us to be able to take us to the next step to complete. And hopefully once it's done, you will see new dimension, Keshe Foundation of tactile Knowledge Seekers have been around and supporting the student. Some of you gave us the wrong feeling you just wanted back when the foundation completed this process, and some of you gave us 1000 And we wanted three or 4000 back for it. And some of you will give us 1000 said, Give me a 2000 back, we all because it's part of us your take on the foundation would be you have Knowledge Seekers give us 1000 ISO 4000 back, Hungary so compact, because it has to be that for all of us we achieve that kind of ethos, we keep our ways and then you have your donated 5000 10,000 US alone to be returned. Oh condition. We're expecting this needs to be done if you buy into the next Oh.

Any other question?

When life or the Soul starts

Q: Mehranez … Yes, thank you, Rick. Thank you. Good morning. Everybody. Thank you for yet another disclosure of another aspect of obvious years of knowledge should give to all us humans and everybody else. Thank you. And if I what you were talking today, we were talking injuries. Interesting program yesterday, about this universal force in the universe intention force, that when we create something, we can use that a college universal law, I think you call it universal order. And everything is just so organized by this give and take. I had a question today, because when you were teaching, I was walking, maybe you said it, I didn't get it, at that just talk about I see. I see the affinity law in everything like the original fields, two original fields, they come together one is ready to give and other ready to get. And they create the whole thing and plasma.

(2:18). I feel like kind of, can we say if there is any instinct for survival wish for creation in this ?? smaller unity and, or fields? The second question is, does emotion exist without the souls? Or it absolutely has to go where there's a soul?
K- What do you mean by that?
Q: I feel like a duality, and this duality looks like the harmony, instinct of harmony? Or is it just by chance by accident? And second question ..
K- I don't understand your first question. What do you mean by that?
Q: Like everything has the same pattern, from very small to very big. So these are so much like a man who looks for a woman, and woman looks for a man. So they feel there's a giver and taker, and they adapt to each other, and they become other things. And for me, it's just one law, one order, just the whole thing is working its part in this whole

scene of universe. And then there's a question. Is there a feeling? Is there an instinct, if there is no soul yet, because I think that the fields .. (2:20).

K- This is a debate, maybe I can put your question in a different way, if I understood it correctly. There is debate in the theology, and the debate in the world of medicine, when a fetus is a fetus and when it's complete as a life. It's that position, when it's a fields, and when it's actually a cycle of life. And when is the soul, is created for it to become a fetus. It's just no structure to it, but all the orders are sitting inside it.

Or what's going to be a hand, what's going to be a foot, what's going to be a memory, what's going to be the inherited things, that you don't do when you're born. When the teeth are going to grow, and everything else. It's still within that structure, doesn't matter, as a fetus. But when does it become a soul? When the whole interaction starts setting up its order.

New Children of Man - of Mitra not kill

This is what we said now, the change of position, where we put the Soul, and the physicality (P) matches it. The children of Mitra will be born that way. These will be looked after, they'll be brought up gradually, in a different way, than the present race of man. They're not, as they're not man, they are the same. But through the process of the childhood, we'll change the process.

You cannot do what most of you as KS start just thinking Gans, and that I don't do. You have to adopt the soul, (2:22). to become the receiver, not the physicality. But the physicality man has been in charge for billions of years. It will not give up its chain of command, as I call it. So we look at the new cycle of creation of the children of ?? ?? Maybe to you it's far fetched, but it's the way it's going to happen. You have no choice. The choice is made and it will be done. And it has already started.

Because the old way, kept on killing, will not stop killing. Because it doesn't know any other way to feed itself, to grow itself, to sustain the existence of ?? The children of Mitra will carry the knowledge, the option, and gradually become a totality, where they shall not kill. Where they feed thorough the soul, the physicality, not through the physicality, feeding the soul.

This process, you have no choice, you have already started. But it takes time. It needs the process to be fit in. And in the coming time we'll teach you how to do it. In the coming time we'll teach you how to conceive children like this. It's not that I do this, and I give them Gans's, and I do this and that - no. You have to understand from conception to the maturity, the process of creation of the soul compressed.

Then in the process, because the physicality takes over, (2:24). it's got a mother as replication, will enforce, trying to enforce that habit of the man to do, but gradually we teach the soul to reach out. We encourage the soul to reach out, to give more that the child takes less from what we call, the physical damage.

Maybe in 2 or 3 generations, the children of the man, will be of the race, which will never kill, will be of the race, that when a fly comes to you, you don't need to kill it. It knows you have nothing to do, it passes you. These are not dreams this process has already started in the race of man.

Then you replicate, you enjoy, you learn. The child learns, it's like going to a nursery, the way a child shows another child how to play with this toy, or didn't know how to play with that toy. The new generation of the man, coming in touch with other children, through the dimension of the Soul, teaches this other child how not to.

The parents will take the children, you will hear this in immense way, to the doctors, "my child doesn't eat potatoes ?? , he doesn't need it. My child doesn't drink. Is he dying? He is still playing, so. Then gradually we'll get used to. In over 2 - 3 generations we'll get used to, and the grandparents watch getting to eat, and the grandchildren watch, they take from environment without killing.

We have to go through this transition for man to mature, and it has started, you have no choice. We brought this dimension into existence. We taught for years this is going to happen. (2:26). But it's not going to happen overnight. The child who doesn't eat anything, and becomes a cartoon ?? It has to become, it has to be taught, it has to be nurtured in the society of the man, and gradually will become part of. Then the next generation, and then the next generation, we uproot the killing within the structure of the thought of the man, because he does not need to.

You'll find a much happier society, you'll find a society which is in balance, you'll find a society which there is no greed, because we're through that process of taking what they need from environment. They learn to take what they need from the place, and when they don't need it, they go. It's like what is happening in some, or many of our cities, people leave the clothes they need on the hanger outside, if anybody needs, they get. It started in Saudi Arabia people put their freezer outside, I have too much if you need, take it, but don't take everything in the freezer. At the beginning there may be a mayhem, but this process has started.

The beauty of it is, we have Mitra with us, and she will never make a mistake. She is a mother cares, a mother who understands, and has seen the mayhem in the race of the man. She's been there long enough, and knows how to be done. When it's done through the culture and understanding, man will create the soul first, and from it will create the child in the physical dimension, and then he feeds it through the same process, and gradually it will change. It has to be ingrained within our structure. (2:28). Otherwise it's just a fashion.

Any other question

Q: .. Persian poetry through translator … I've done a translation it might be kind of rough let's say let me just I have to redo it here because it's

K- Put it on the screen as it is.

(goes on and on .. here)

R: But isn't it? Shouldn't the student be first and then the master replies? I thought he was talking about you as the master buddies saying,
I don't understand this.

Here >>

Reads Persian poetry

R: Here's the students question. What journeys have we taken to smell the scent of Nastaran Flowers? What dangers have we taken to drink the desert brines, to suffer this love story we have suffered. The Masters says, What trips have we made to ask the name of the unknown flower? What dangers have we taken to kiss the ashes? We have suffered for Iran to become a good home?

K- I don't' understand it. It's poetry .

Talks about UC members - new members coming in

K- It's interesting, it's very interesting that how things are taking shape in many directions. There are many languages, that are coming into the Keshe Foundation. (2:32). It's amazing, I look at some 30 plus languages, in Keshe Foundation Knowledge Groups. Some of them are very active, and some of them are very interactive, and some of them very inactive. But gradually, we see groups building up, Russians are building up, the Portuguese have been heading it, the Iranians are the same. And the French and the Germans, gradually building up in Knowledge Seekers, finding a home to share knowledge, and to enjoy each other's knowledge.

It's very hard, as I always say, unless you understand the emotion of the language, we just read the newspaper. It's very, very hard, especially when I look at these things. I haven't read Farsi for over 40 years. To me, I can join that alphabet, but even to read these things (poetry), you have to understand the present emotion of the nation, which we are not in it.

As I said, I went to Iran some 14 years ago. I am a foreigner in my own country. I speak the language, but the culture has changed, the emotion has changed, what we used to be is not. It's the same that as I said to Rick just started teaching, you will see a large number of new Universal Council members, and UC support members added to UC group. Those who apply to be, and that's why we even brought cultures, or what you call, languages per nation, per culture, English, American English. (2:34). You will see new German speaking Swiss, where we always had ?? Talon as a German speaking, for the German

community, because they understand German, different mentality, than the Germans and Austrians.

We see this evolution, members of Universal Council, who are English speaking Canada, or English speaking UK. Because we read, but the emotion is different. Because it's different part of the world, it has a different understanding and different .. comprehension of the language. We'll see this, you will see starting, a number of new Universal Council members coming in and those who have been inactive, will be the in a way, moved, for the new ones who are active to bring in. To do even though, we rely on the soul of, these people came for other reasons, and they said their times, and they're not there to support, and we ask them to relinquish their place, or they are not there, even to ask. So we will leave it open. We will see new members for Netherlands, from the Dutch speaking, joining the group. There are a large number of them will be added, the Universal Council will be strengthened, especially now, that we are going through this transition time. I was told this morning by Lisa, that the Universal Council members would like to meet the Earth Council members in the very near future, for what is to come and what needs to be planned. This is the first time more or less, as a way, that the two (councils) meet, to bring a new dimension to the work of the Keshe Foundation, as one as these two groups will run the Keshe Foundation in the coming time. (2:36).

Any other question.

Many world leaders have cancer

Q: Salomea .. My question is related to your ?? and our wish to have Knowledge Seekers and Universal Council to help now, Mr. Putin, because he has cancer, and maybe we can help at the soul level to recover. And the condition will be to sign the peace treaty. And not only he, but also Crimean's, and all other nations. Maybe it will be a crucial opportunity. Today, these days, as far as I understood, he will go in the hospital for some treatment of cancer. And we know that the reason for his maladies, they are emotions. And if he will change emotions and will send him good emotions. Hopefully he will recover, and we will start a new era of peace. Mitra will enlighten his soul and the soul of all dissidents. What is your opinion, feelings, Mr. Keshe.

K- It is not a feeling, you have to realize most of, (2:38). a lot of world leaders suffer from one disease or another. We have three or four world leaders who got cancer, not known publicly. We have princes and princesses who have medical condition. We have presidents, we have kings who have medical conditions, that is not curable, to the present knowledge. This does not make them any change, they still stay on the path of, the way they were. Maybe by elevating their soul, they will do.

In respect to Putin, Putin knows about the Keshe Foundation clearly, as I said in the talks very recently. Putin sent the peace treaty of Keshe Foundation to DOMA (Russian Parliament) in 2015 - 16. But it was never followed by the Keshe Foundation KS who were there to do it. To appointed to be responsible for it, and work with it.

We have the Iranian president with the cancer, Ayatollah K of Iran has had a cancer for a long time, years. The position they have, allows them to have the edge of science and the latest things is for them to be. Turkish president and his wife suffer from the deep cancer. The two or three African presidents are in the same boat. It's not unusual, they're all human in different stages.

They have to handle their own emotion in what, and how they got to where they are. It's amazing how medical conditions of the world leaders are hidden from public. But they all have a problem, it's not just Putin. German, ex-German Chancellor, we, it was known for a long time, (2:40). suffers from A very bad kind of disease of Parkinson, and when it became public, she stepped down. We have the same in the Chinese leadership. We have the same in a couple of South Asian, Central Asia countries, the presidents and leaders have cancers. They have choose how they serve, not us. They have to decide how they. We can elevate their souls, we can reach to them, it doesn't mean that it will change in the way and the path. They are in what they believe in. Some people die, because of their belief's. The world leaders are not different.

The whole humanity, and the whole world leadership needs elevation of the what you call, the soul. We have received the same thing around, half of these world leaders, you are not aware of their operations, and damages, and what they do. ?? ?? operations and we know the condition of your president. They all suffer, one way or another, or their families. But their mission is different, than the P, they don't see the connection to, one to another.

Any other questions.

Q: Thank you very much. I think that you sent is good opportunity to send our love to all leaders. (2:42) If they will get ?? they'll create a healthy environment and healthy conditions for peace outside, if they have peace inside. Let's send sent from our heart to them and our soul.
Any other questions?

Q: Will the workshops you mention in Austria be recorded and available online saying
K- No, no workshops.

June 6th Test Flight - no media

Q: On the June 6 event, will there be a media gathering, or is this to be a test only?
K- It's a test only at the moment. We test. The systems are more or less ready in two weeks time. Hopefully. The tests will be done, and we'll see how far and the way we go, and we need, we go out those who want to be volunteered to be the best testers. The first what we call pilots, and the rest of it. We just gradually work to it, and we'll come to test it, with or without.

At the moment, we try to keep everything in order to complete. You got to understand there's a huge pressure on the Keshe Foundation side, where we are forever evolving and

developing. And even in the process of building the new reactors for a space, we are still developing new technologies in it, and everything, sets back things for a few days, for a few hours, for a couple of weeks, because he will not stop. (2:44). This is the evolution of understanding the science and technology. We are getting ready for the sixth of June. Four units has been envisaged, and four reactors are, for flight system, in the process of … assembly and ?? of manufacturing.

Soul is made of mother and Father

Q: .. Why can't we remember, what and where our soul was, before coming to be created in this physicality and experience life on Earth?
K- Your soul is in two parts, part from your mother's side, and part from your father's side. So you're amalgamation of the memories of the two. You're not a soul as a soul on its own. You are the beginning of that structure. At the beginning of the making of a star, the seedling of that process.

So, when you create a soul within a womb of the mother, it needs to be. In the human race you bring the .. sperm and egg together. Now you bring the two souls, that relation, that creates the new soul, which is your soul. Then you inherit more than, RNA and DNA of the man. You will remember the process of the creation within the STM. It's a different dimensions.

You'll hear children of Mitra will speak about things, that us as parents, that our child is crazy. (2:46). But no, the way you remember inherently through your genes, this color of fruit you don't touch. She knows, he knows, what is the consequence of whatever is there, through the souls. You're walking and he just pulls your hand back, and you jump, he says, mom look, there is a snake there, you didn't see it. But he saw the soul of the snake. Your physicality was blind to it. We'll have a huge cultural problem with the children of Mitra, the new generation of the man. That many of our doctors will call them schizophrenic, or there's something wrong with them. But in fact, it's us not understanding, man has evolved. It's evolution in the STM, and the physicality is to follow. And even the process of conceiving will change.

Any other question?

Q: … Are we as a physicality or soul, are made of a collection of cells, viruses, bacteria, and their souls? How much of this body, or soul, of the formed community are we?
K- All of it, we are part of it. We made it, and it has made us. So we're all in it.
R: So, when we say, "we", we are referring to the viruses, bacteria's, and everything we carry along with us, basically. (2:48).

K- Yeap. You would not have been here, if some viruses are not in your body. You see, we have, there is something, which is in the background of the Keshe Foundation work, where soon we will release.

Many of you suffer from migraines, many of you suffer from hay fever, many of you suffer from menstrual pain, especially the women that cannot even walk. Many of you suffer from seasonal aches. Many of you suffer from depression of time. In Keshe Foundation, we have the solution for all of it.

Tomorrow we can market a product, that women with menstrual pain, within one minute will not have a pain. Do you know how many women suffer every month with this, for two or three days. We see this process of releasing technologies in the new era for the Keshe Foundation. We allow new technologies to come in, to eradicate the pains, and whatever suffering was before, with the new technology.

But one question which I always ask is, would the new generation of man, will suffer with any of these? Or all this was something we had before. It doesn't there. So what it is, (2:50). will stay in the memory of us, in the memory of our DNA, or RNA, and viruses, and infections, but is there something we had, we know, and we don't need. But it makes us, is part of us, is part of the structure of us for the future. This will carry on. This will not stop. It's us, and we are them, we don't understand. Without us they can't show, what I call, their work,

We are part of each other, pain, suffering, and this has been part of the life of the man. Now with the new technology can be changed. How come many of you suffer from hay fever? I did and I still sometimes do, but I know exactly one drop, and it's gone.

But how does it come about? Why did I react this way? Years ago, if you remember, this time of the year, I'm always sniffing and snuffling. But now with the technology, if it comes, it takes 1 minute and it's done. But it's part of me. Why I react to this situation.

What would bring in the next generation? Would the children of the Soul of Man will have it. Why do we create so much conditions with our health, without us knowing?

So it will be very interesting to see, (2:52). with the next generation of the man, that are created through the soul, need to wear winter clothes, or summer clothes, because through the Soul, with their body they can walk in, as long it's summer ?? they decide. Because now you work differently. Because you have to do ?? other positions, when the soul travels, the temperatures are beyond, what we know we can hold our Gans's in our body temperature to ?? Some of it will come in shape and forms of viruses, or energy packs, which we call, viruses. We have to open our eyes Rick, we are heading for massive changes and it's massive. We are learning, and we are teaching, and we are developing that stage, step up.

Any other question?

Q: … How to how to recognize other members of the Universal Community, if they're not looking like us, and how to start interacting with them, like at the time you talked in the Knowledge Seekers Workshop, with the hand signs to Obama, and others.

K- That was a specific, and it was for a deliberate communication, because they understand. In so many ways, once you elevate to the next level, you communicate with the STM, they manifests themselves if they want to. (2:54). You'll feel it, if you have that position, that you recognize the need of the soul, the need of the things, and how you happy will be, and how it brings you the position of understanding. You don't need to communicate.

You do that with your children. How many times you pick the phone up and says, "I feel you are unhappy." And he says, no Papa everything's okay. The they tell you what the problem is. It's much deeper and you feel it. I have this with my son, my two older sons. Most of the time I don't need for them to call. I call them and he says, Papa, what's wrong. He says, Papa how do you know when to call? Because we feel their soul, we don't wait for that telephone call, we already made at the soul level, because we have that kind of connection. This needs to be expanded to more and more, and understanding of the man.

We can block, we can open, we can allow it to extend to everything. But if you walk on the street and every man has a pain and suffering, and something. Can you imagine what you're going to face? Give a handkerchief to that one, give a water to that one, you never get to your destination. So we have created that, ?/ even through our soul. We want to, we can see the souls, but we can help the soul, or otherwise we'll never get anywhere, But gradually as we evolve, these things will be resolved. We need to create a new generation of man. (2:56). And that process has already started.

As I always said, I am servant to her beauty and her knowledge, the knowledge of the things, and beauty, is the beauty of the Creator. ?? ?? We have no choice, if we're going to leave this habit of the present time.

Spirits Guides better to work with own soul

Q: … How does working with plasma, raise your spiritual vibration and make it easier to work with your spirit guides?
K- We are not that kind of organization. We have to understand. You have to understand how the fields within the body of the man works.

R: But what are. People talk about spirit guides, or spiritual guides, angelic guides, and other guides, not in the physical realm, but as a some kind of visual image they have, or sometimes they might have a physical manifestation, or whatever. But it's generally not physical, their spirit guides are of the spirit world. What are those? How are they? (2:58). Are they simply aspects of ourselves, of our own essential self, that essentially, that the messages are from our own soul, to our STP. The STP just interprets it in a physicality way? How do you how do you read spirit guides? Is that something, that is an illusion? In fact, you've talked about everything being illusion. That's the first part of your talk anyway. But what part of the illusion, is the spirit guides I suppose, it might be a question?

K- **…** I said, when you have the understanding of the science of the creation, we don't need no prophets, we don't need no guides. We don't need to be soul guides, or we are there. We have to understand it, and interpret it, and see what it meant, what it is. Maybe we have some of us, not maybe 100%, has evolved to a position of being able to understand the feeling, the emotion, and the work of the Soul of Man.

You understand? So we don't need guides. Ask yourself, what did you ask? What was .. You see? There is a very big problem. (3:00). And many of us face it now, especially Knowledge Seekers, who are becoming more and more aware of these things.

You wish something, or you want something, and you get it. Because instead of you physically working to do it, now you have learned to get your soul engaged, if it's good for me, then I, can I have. Then we say we have a spiritual guide, or somebody to guide us, or something on the other side. No, we have to learn to trust in ourselves
In a body of the Man, even today, we have a mechanism, that if you wish, a part of your body to be separated, you can do it. You can literally, ?? track your own hand, your feet. We had to have it. In the olden days, in the time of when we were, what I call, more or less reptiles, like the animals we have today. If our if the tail gets trapped between the door, then they let the tail go, and they walk off, and they build another one. This is within us too. We have this power to do.

Man used to do, when we were mammals hiding in the holes, if we got trapped with the arm we used to chop it off, by pressure of the need, not to be dead, and not to be damaged, or eaten, or whatever. We have these capabilities with us. It's ingrained in our physical dimension. So, it's the same with the soul. It's the same with a emotion. (3:02). We have powers to, but we keep on saying somebody else done, somebody else to. I have a guide, who guides me. Your guides have become what we call, the conscious. You know what needs to be done. You have learned how to communicate with the soul, and Soul of Physicality.

These are the things, which we have gradually to. Now we know the knowledge, to understand the knowledge, and then how it is used. How or how, what it means. We should be able to decipher. There is no, what, whatever you are talking about. If you understand the science of the interaction of the Soul of the Creator of the man, or the controller, man, and the man itself.

Instead of you going and seeing what will be the condition if I go to the moon, this comes back ?? ?? since this is not, ?? because you already ?? the soul is in touch with the soul of whatever, for you to have the information. You have no GPS, or no weather forecast. It's the trust one's knowledge of the soul, and its creation.

Any other question of shall we call it a day.

R: I was just going to add, that you always used to say, you like to cut out the middleman and go directly to the source, basically.

K- Either way, or you make your middleman up yourself, for yourself. This is what these agents are.
R: Who needs a spirit guide when you go to number one, you know. (3:04).
K- Yeah but some people make up a spirit guide of their own, that they have something to do.

K- It's been dead long. Please. We will keep you fully informed of our progress in what we asked you. We still need the help. It has not finished, we passed one stage of it, and be there to support us. It's the future of the KF.

At the same time, remember the these classes, if you are getting into the process of Gans production or whatever, how to do things the correct way, and you want to add to the knowledge. These workshops are coming in. We're trying to teach you to use the technology in everyday use. In the near future, we'll do the cooking classes with the Gans's, what we call, other things with the Gans's. We put these classes that you start learning how to apply it for everyday use.

Thank you very much for today ..

431 KSW May 5, 2022

432nd Knowledge Seekers Workshop; May 12, 2022

(Quick Index 10 p proofed; Transcribed both parts mostly; Part 1 proofed need to Proof part2 ; Key Phrases, Words,) (Auto transcription . Elias)

Practicing traveling with STM in dream and waking - manifest physicality;

Short Index

Past few teachings special; Plasma spaceship won't dissolve in space; Elevate Souls defects in body corrected; He has flown across U with system; Dream travel is actually Soul travel - can manifest body in dream; Bright lights in sky are souls; Creator Unicose expanding into larger structure; Knowledge goes by Devotion and Love of Creator; Tested to limit - understand what I have missed in humanity; Cannot lie in EU - more tumors lie to self; Man is cancer in embodiment of Creator; Won't destroy this planet - transform it to stop killing; Tested EU elevation in seconds; Before sleep decide on where you will travel with Soul; Satellites around earth to satisfy all needs; Brazilians try to steal T for Med Beds - don't work; UFO lower matter state; STM will absorb higher order can manifest in any D as of that D; Children of Mitra will teach man; Don't leave body in EU - not mortuary; Can meet Christ; Why people are cruel - upbringing; Dentists attack people with drill and justifies it; Ukrainian situation war between Churches - why they didn't find peace; Single KS with deep wish can bring world peace;

Confusion in neutron decay - depends on condition; Different arrangement of COHN - creates different cells; Cells are recycled to step down or up in energy - transformed into other cells, when no use than rejected; South China most beautiful landscape in U; Consciously travel with soul and manifest physicality in Tibet, others witnessed; Belgium culture accept sexual abuse of children by parents for money; Practice traveling with Soul; Vacuum teaching - not fields but collection of plasmas; Our intention fulfilled when we want to help others or totality .. Spaceships in earth are crash landing of UC tourists, come to see plasma inside earth; malfunctioning UFOs trapped in earth ; Even Creator made mistake with Man and his destruction habit; Teachings are not random - well structured ; It's not lucid dreaming - multitasking - working in 2 dimensions Soul and P; Mr. Keshe is 90% working at same time in the Soul D; STM downloading all information to reproductive units all the time to pass on changes

ENGLISH TRANSCRIPTION

Part 1 proofed working on part 2

K- Yes, good morning, good day to you as usual. Whenever, wherever you listen to this series of Knowledge Seekers, Keshe Foundation Spaceship Institute. Series of teachings we welcome you back. Another record adventurous teaching. As usual, we do not know where we start, and we do not know where we finish by the end of the teaching. This is an open ended teaching cycle. It will not finish, as long as the man exists, there is always understanding of the knowledge of the Creator.

Past few teachings special to prepare

In past few weeks, I deliberately started teaching in a different direction, and in a different way, especially in the past three or four teachings. There was a reason for it. That to open up a new line of understanding, but deeper understanding of what was taught in last 10 to 12 years. (:20). Some of the Knowledge Seekers (KS) understood and they have managed to grasp the concept of the creation. And it is interesting to see how the next steps build up, how we'll endeavor to take flight, how do we looking to understand the next steps in the flight systems (FS).

Use reactors to create non-physical spaceship - plasma

In our laboratory, we are just about complete the first space reactors, completed within the next day or two. But what is interesting for me is not to put these reactors in the Enhancement Unit (EU), but to assemble these reactors in the space of the lab, and see if we can create the spacecraft without the craft (without matter state).

The reason for this is very simple. The material we have created as a spaceship is made of carbon (C) and hydrogen (H). It's very vulnerable to the diversity of the fields of the universe (U). What happens if we lose the containment, but we have our reactors designed and positioned in a specific way, that they will hold. Most probably the reactors themselves go through the same process, but the fields they have created, will maintain position and stability. As I said to some of the Knowledge Seekers who work with us closely with development and they are aware, we test reactors before we place them. (:22). When you look at the Enhancement Unit in Linz, we created a replication of it in the lab without the physical material of the structure.

We are endeavoring to do the same in the next few days. Which means we endeavor to create plasma fields without containment, the way earth works, the way the sun works. It'll be an adventure. If our team manages to complete, I was told yesterday, the first systems are ready to be tested in the environment laboratory without the Enhancement Units, and we measure the fields. We have equipments within our labs, which are built some 10 - 15 years ago by the Swiss scientists for us. If you remember the one we used for 129 (Tesla) measurements of the fields.

Then we enter the true space what we call, technology (T). Non-tangible physicality, but existence within the field forces of the universe. As our team are putting the last reactors and loading systems, and everything else together, in the next few days. And we start the first tests two or three weeks ahead of the Enhancement Unit testing, and we see the pitfalls, and the things we have to complete, would we achieve the ultimate goal?

The facilities we have, and we have created, allows us to create these, what we call, (:24). flight system, as you call it. In the present technology, aircraft hangars of the airports, but within the labs of the Keshe Foundation, creating the condition of the fight, without nothing, creating the condition of the pressures of the control without the boundary. What would be the ultimate outcome? When we go into testing these from next week on, to prepare to install them in the Enhancement Units coming up. Would we achieve, what we want to achieve, before even we reach the target of testing?

It's not to land on Moon - but learn new D

The process is not to land on the Moon. The process to achieve the strength of understanding of the new dimension (D). We'll test and we'll learn, but the whole idea is, we have introduced a new method of flight. We have brought forward a new concept. We have brought the concept of the flight motion, the way it's done in the U. There are no control panels. There are no landings, there are no kitchens, and no toilets, and there are no, no, no, no many things in it.

But it might not work, it might not fly, but we bring the new concepts of flight into game, that the others try to strive to achieve. The working of it is in the dimension of the Soul of the Man (STM), and not in the dimension of physicality (P) of the man. The strength of it, (:26). comes out of the understanding of the process of what we call, "interaction of the fields."

Many defects in body of man corrected

What is important for us, is to understand the teachings, is to understand the teachings of the creation, and the created, to understand the process of what we call, elevation of the STM. We see the elevation of the Soul of Physicality (STP) of the man. We'll see in these processes, where many defects within the body of the Man, will be corrected by the wishes of the Soul and the Soul of Physicality.

We become the spaceship - with our soul

The new EU flight system, as we seen in the intro (video) of today, is a breakthrough. In so many ways, we are used to be in something, to be carried to go forward. This time, we are within the fields, that we become that containment, where we want to move it to. We are used to get into a car, or an aircraft, or a rocket to go from A to B. What about when that rocket becomes us, then the aircraft becomes us, we become the carrier of our soul. We decide the destination, we decide the possession and position.

We have entered the true flight space technology as of this week. Our team tell us some 50 reactors are ready to be tested by next few days. The flight system, the control is all done, ready to go. When we go through the testing, would we feel it, when we enter the environment. We will replicate the position and setting up some of these reactors in the labs before installing it. (:28). Because there is nothing outside, there is no control system.

We don't have a countdown. We don't have, that we're going to fly this minute. It's when the soul of the pilot matches the soul of the system, and matches with the soul of the control. And then we'll see the bright light, then we'll see the flight system.

I Have flown across the U with these systems

I've been through these systems many times. I have flown across the universe with these systems. I know it works. I am a passenger of the universe. Now, we have to teach the man.

Your concrete blocks, your stainless steel aircrafts will stand no time in the fields of the universe. You fall off into the depths of the oceans of fields of the universe, when you hit a plasma (Pl) condition, that matches the structure of your material. And this pitfall goes every 100 kilometers of every meter in the space. Mankind has to learn the new method of travel without boundary, without what I call, possession of position. Where the matter state exists.

Mankind has to learn with a new space technology, which we put forward, that he travels with the dimension of the Soul of Man, and not with the physicality of the man. In next few weeks, we will see a new era in what we call, "for the man to conquer space, that space is, a space of his own soul." That within it we will find the space of the U, to travel

with it. Many, many times, (:30). many, many times, I have brought this in different ways of teaching. But now, you have to face it. It's there, technologies developed and it's on the table for many of you to develop it further, to understand more knowledge of the creation, to understand more about the space travel in the dimension of the fields, and not in the dimension of matter.

In so many ways, mankind comes, and has come to new era in space travel. We do not need governments, and we do not need administrations, we do not need military forces, and we do not need what we call, astronauts to be trained for years ahead. You lived with that soul, you have trained that soul. So, you are the captain. It's you who will decide the position and dimension of the fields.

My advice has been to our, especially testing team, which are putting these together, do not enter the zone. Do not enter to see how it feels. Do not enter to see how it will interact. But allow it to be there. A butterfly flying in that zone, can fly the system, if its soul matches the soul of the system.

You remember in the teachings, how we said, when you look from a distance, you don't tell, see the frock of a king, or a president, or a farmer, or a dog. They're all shining stars. In a way, (:32). we have entered that dimension of understanding the knowledge of the creation, that in so many ways, we have to come to understand, that man without choosing, but by the grace of the Creator, has entered into the knowledge of the creation on a fast track.

And in that process, we have taught enough, and we will see the outcome. We will see the setting up of the first Enhancement Unit for flight by literally walking into it. We are not aware of it, till we enter it, and then we come to the position to be, start testing.

What strange will be for many of you, will be that these flight systems are tested in enclosed environments. In the Exhibition Center (Linz), in Arizona Center within the center. Then you say, how is it going to fly? We have no opening on the roofs. We have no opening in the ceilings of the centers.

Ask you a question, then you understand. Did your body moved out of the bed last night, when you traveled the spaces of the souls, of the fields of the U? When you had a chat with your mother and father who died years ago. Did you need to move the body? Or you did the trip, had a chat, had a drink with mum, had a joke with dad. And maybe you attended a party with them and came back. The physicality is still on the bed. (:34).

Now you understand, the implication and application of the new space technology. Do we need to fly the system? Or will you come back and tell us, that I went there, seen that and came back? It was as I found. But now it's not a dream, it's the reality, because you can choose between the STP and the STM, where you want to be.

When you had a dream that you were in deep space, or you had a dream you were walking on the moon, did you see yourself with a space monkey suit of NASA? When

you swim in your dreams, in the depths of the oceans, do you see yourself wearing, being in what I call, the monkey suits of diving suits? Your soul travels and takes the condition of the time, place, and position

The new knowledge of space T will break through, in a big way, by many of you KS. What we show, will be the beginning of much more research and development to be done. Much, much more development to come in by the world scientists and Knowledge Seekers. Both scientists will become Knowledge Seekers, and we'll see the change and development.

As I said, some of you online listening, you know who you are, when you were recommended by the NASA scientists to listen to the teaching of the Keshe Foundation, (:36). that's where the future space technology is. Where Chinese scientists already are working, and trying to develop the knowledge and the physicality of the spaceship of the Keshe Foundation, when they asked us can you give us the fuel combination, we've done the rest.

In so many ways, the new space technology has started. And in a big way, and in a small way, in different dimensions, we have seen the totality of the change. We have entered the dimension of the rules, and the rules of the engagement of the space technology. It is for us, to understand it more. It is for us to be able to expand the knowledge of the creation.

The test which will be carried out in the Keshe Foundation laboratories in the next few days and weeks, is not looking to fly, and you see the light in the sky. But maybe that light in the sky is transportation of your soul across this planet, going from here to New York, to see your brother, and you see that light moving. How many of us will come to see what we call, bright lights in the skies, where all these are the soul of someone traveling to somewhere else. How many times we have seen these, what we call, ball of lights traveling. Now, maybe for the first time, we understand we saw a soul in transportation. We saw and we have seen it, but we didn't understand it. Now we understand. (:38).

Next cycle of transportation is even higher

Now we see that the knowledge of the man has come to the point to understand the space travel in its true meaning. And then, till the next cycle of the understanding, when the man will learn another cycle of transportation and transmutation in the dimension of higher order then what we teach you today. Man is not ready for that cycle yet.

In a way, the whole of universe is not ready for that next step up. The knowledge of creation, the knowledge of the structure of the travel in the spaces of this universe, and Unicose, is literally the first step in the knowledge of the travel across the fields of the Totality of the created, at the moment.

Unicose is expanding into a bigger structure than our Creator

I brought this subject up last week in a very soft way, that if this universe is expanding, what is it expanding into? And if this Unicose is expanding, what is expanding into. Then you understand, there is more beyond, and that knowledge to expand, to cross that knowledge of the travel in the dimension of the Unicose, to the next level, will take much longer for man and the citizens of this Unicose to understand. But there is another level beyond, that contains this Unicose within.

The creation of the Unicose as we call it, to come to be the Creator, is itself contained within a larger structure, of the light, with the dimension, that when it reduces in strength, becomes the strength field of our Creator. (:40). Where there is above the creation and the created, the process of the creation. Then it goes back to the original question, the origin of M fields, that its interaction has led to what we call God, the Creator. That itself is part of a bigger process. How can you be loved, if you don't have a lover. How can you be created, if there is no Creator for you? Who created our Creator, what we call, the Creator?

Creation is never ending

Then we understand the whole process of the creation is never ending. And now, through this process of understanding, we've learn to touch the very first field of strength beyond the dimension of the matter state and tangibility of the man. Then, as I always draw, in this spiral of knowledge, in this spiral of life, we just entered a new cycle. If this is the totality of the spiral of the creation, including what we call the Unicose. With the present knowledge we give you, you might be at this level. You still need more knowledge to be able to cross our Unicose, and then to understand more knowledge, to be able to work within the totality of the creation, with itself becomes the Creator of it.

But today, we have started. This week, we have started to enter that process. (:42). To enter, to understand the basics. To enter, to understand the depths of the lack of understanding of the totality, of the understanding the process of the creation.

The interesting point will be, when you enter, the what we call, the fields of the Enhancement Unit with your physicality and your Soul. To what extend has your soul developed, that in which point you enter the position, and the cycle of the creation, and the Unicose. You could be a peasant on the mountains of Himalaya, and with the first entry, you will reach this (close to the center), and you could be a king and you enter the system, and you not even reach the point of start.

It goes by devotion and sincerity - how much we are willing to change

It does not go by position and possession. It goes by devotion and sincerity and what I call, the "Love of Creator." Then the king will envy the peasant. Then those who reach the higher points will come back and tell us the stories, that to us will be unbelievable. But it's the truth, that we have to accept it. How much more we have to do to reach that point. How much are we devoted to confirmation and completion of this processes? (:44).

Then how much you are committed to bring that change within us. And we get tested on daily basis, and on an hourly basis of every minute.

I have been tested to my limit

I've been tested to my limit in past six, eight weeks by Knowledge Seekers, and I still stand firm, understanding that the foundation and change is more important, then some peasant thinking men, who think they are in possession and control. But we have to see them, we have to understand them. We have to see what we are made of.

There are Knowledge Seekers amongst you, who are the most abusive people to the whole of the foundation work, but you worship them. It was for me to be tested to the ultimate goal to understand how much I've understood, from the human race. It was not for them, they were tested and failed miserably. But is was for them to find the position and the time. But it was good, because we saw new face, we saw what we need to correct, to elevate, for these souls to understand more. For me to understand what I've missed, in understanding of the work of this humanity.

I always said, you can always dress a monkey in the clothes of a lady, but you will never make a lady out of the monkey. You have to understand where is the position in the strength of your soul. When you enter these systems, when you exit these systems, what do you take in, and what did you bring out? You go with a wish, " I have a cancer, I don't want to have it," (:46). but you come out with a worst cancer, because you want it. The truth cannot be hidden from physicality and your body. You want to die. You see the death as a solution to your misery.

STP cannot be overwhelmed by STM - it has to understand

The Soul of Physicality cannot be overwhelmed by the Soul of Man. The Soul of Man is a provider, it's the Soul of Physicality, who has to understand. You walk into these systems with the body filled with pain and sorrow, and all sorts of problems, and you walk out, a man with none. Because to … (interruption)

Cannot lie in the EU

We have to understand this process of change. We have to understand this process of understanding the totality. We have to understand, we cannot lie to our physical soul. It's no use going into a system with one tumor, and coming out with ten, which speeds up the end of the dimension of physicality. "I went in there to have none." But in fact that was my thoughts of what I want to explain. But in reality I want to die faster, because I want to be a passenger on the other side. I don't want to take this physical body with.

Then, understand when you go into this new flight systems, go with not lying to yourself, and wishing something else. Because when you come out, you understand your true wish, (:48). not what you wanted to show, as is your wish. I made man in an image of Myself, thy cannot lie to his physicality. How can man do?

Every physical body has a defect that can lead to cancer

I explained this to a clergy sometimes ago. Maybe now you might be able to understand. In every physical body, there is a defect, in every physical body, there is a point, that is a source of cancer, that if you let it grow, can create more problems.

Man is a cancer in process of creation

The embodiment of the Creator, which includes the man, has been a cancer in the process of the creation. Do you take the cancer out, and let it grow bigger? Or do you find a remedy for the cancer to find its space and position, that it does not become a cancer. This is what the Creator has decided about the cancer of man in the cycle of the creation, that this process of killing, this process of destruction will not expand to the rest of the Universe. And this is why the present teachings are going on, the present enlightenment going on, and not teaching. That man comes to understands, he is a cancer in the process in the embodiment of the creation and the Creator, by his ways of destruction, by his ways of ?? , by his ways of greed.

If needed the Creator can destroy this planet with a wish. (:50). But as we said, we don't destroy. We will not be gotten rid of. You have to find a solution, a permanent solution, that the cancer does not grow, and it becomes useful part of the body of the man, the way we see evolutionary cancer in the body of the man. Because the data, the information is needed, that it does not repeat in the next (cycle), and allows the evolution.

The whole purpose of these teachings is to get rid of this cancer of the body of man within the structure of the universe, by methods of killing and destruction. Containment, and now the new understanding.

You enter EU but do not move - travel with soul - like in sleep

In the coming time, in the coming weeks, when we see the Enhancement Centers (EC) setup in Arizona, in Tehran, in Austria, they're all within buildings. These are the beds you enter, and when you enter the bed, you'll fall asleep, the body stays, and within the Enhancement Centers, the souls finds the path of its freedom. You do not need to fly, you need to understand what was your wish when you entered the flight system. The true wish, and not I'm going in there to see, or I have to be in New York with my lover. You end up in New York with your lover, (:52). and they say, the guy's disappeared.

But what happened? The physicality is here, but the Soul in the D of P, is in New York. You cannot lie in these systems. You have to find in these systems are set to the minimum truth threshold, which means you cannot lie. You walk in and nothing happens. You say, "oh it doesn't happen, it's just there." Because you lied to yourself when you entered.

EU were tested and they work

When we tested one of these systems, for the very first time a few months ago, we saw the change in the evolution of the Soul and Physicality, within microseconds. Our Knowledge Seekers who went with it, are amongst you and listening. The system went to find the peace, the what we call, balance between the STM and the STP, which is controlled within the heart, and it tunes again, and it tunes again, and tunes again. If it does not find a balance, it stops. But if it tunes and finds the position of the balance where the Soul of Physicality, and the Soul of the Man, are in line of the truth with themselves, and ?? work, man will be remedied from the travels of the U. ?? enter the D of seeing what we entered to see, and it was the true wish.

I watched when the Knowledge Seekers went through this process. I stood outside and I watched the physicality and the Soul. You are the Knowledge Seekers amongst you, who've been through it. (:54). You feel the forces of the creation before you enter the environment of the system. We are not just going for a flight system, that it will be there. We have simply, in a very simple way, have tested the systems.

I hope many of you will find pleasure when you enter the dimensions of the fields of the new space travel. Where you shall never lose your spacecraft, where your spacecraft will not dissolve and evolve in different field strengths, where you are the star, where you are the soul of the travel.

It's you who decides today when I go to sleep, I want to land to see my grandpa today, and then tomorrow I want to go for a dinner with a cousin in another point and destination. In a way, you go to a travel agent and you buy a destination ticket. In a way, when you go to sleep, you have never understood, that you can destine your travel before you sleep, I am going to sleep to see grandpa to have a dinner and come back.

Enjoy the steak without killing animal - cannot die of hunger

Now we give you that opportunity, we give you that sense, that you learn, that you do not need to, in a way, I am going to a restaurant to have a nice steak. But you can have an image of the steak, but no animal shall be killed. You get the feeling of what you want, but no one will be touched. And gradually, even you don't feel the desire to have that steak. But you have, you will, and you go. (:56). This way, no man shall die hungry, no man shall sleep hungry.

Today, 15% plus of the children in United State of America go to sleep hungry, according to the statistics of the United Nations, and 3 to 5% in Africa, children go to sleep hungry? Would we teach these to the American children, that their numbers dwindles to the number of the Africans. Then they can dream to go to the most beautiful restaurant, or to have what they wish, and they receive it, they receive the energy, they receive the nourishment, they receive the elevation of the soul, but no one shall be killed. Not the grain which made the bun, and no bird, which animal had to be killed.

In reality, thanks to many Knowledge Seekers, and many Knowledge Seekers who are working in background, to bring this technology forth. We'll bring the change for you. The change is not to come, the change is here, it's for you to come to see. It's for you to come to understand, it's for you to come to extend the knowledge. As you call it, this is an "open patent", patent of the creation, patent of the Creator, patent of the knowledge of the creation to live, and to be part of the living souls of this planet and beyond.

Maybe in the next few days, maybe by next teaching, maybe by 6th of June, you will see the show. (:58). Many of you will not feel a thing, but many of you will come to see the dream you dreamt. They call it the American dream. They call it the dream of the creation. The dream which comes through instantaneously. If you are correct with your conduct, conduct of the wish of the soul, and the Soul of Physicality of the man.

If you come out with more tumors - you lied to yourself

Don't go in the system and say, I went with 1 tumor and I came out with 10. Because you lied, you want to see the end of this physicality, it's going through too much torture, "I don't want to be." And some of you of with 10 tumors and come out (with none), because your purpose was to enjoy the life, and not tumors, which accidentally came on your path. You were there to serve, to serve your Soul, to serve the soul of the others, and then you find the elevation in the Totality.

Put satellites around planet - no more killing

Then in the near future, we create the condition of the satellites, as you call it, like moons, that surround this planet and keep that continuous field, that all souls within this dimension will be satisfied to be nourished, in all dimensions that no lion shall king, and neither no man shall be king.

These are not dreams, the systems are present, produced, and sits in the beautiful city of Linz in Austria. Even if you open it, you will not understand it. We have hidden the knowledge of universe within the systems, and no man will be able to replicate it, (1:00). without the knowledge given truly by the way it has to be, and the it is. Even those who produce it will not understand.

It carries my soul - cannot be copied

As I said, once the units are released by the Keshe Foundation, they carry my soul, without it, you have no soul to fly. So, no one can copy, does not matter how well you try.

Brazilian comes to steal T - Med Beds do not work

We had an interesting meeting this week by the people who came from South America wanting to discuss about the what we call, opening Institute for Keshe Foundation in Brazil. We found out by their own talk, and what we understood, they were from the

people who are involved in "Med Beds." They came to see if they can steal technology under the cover of, "wanting to help." (They wanted) to see why their system does not work through it, and they are involved in it, what we call scientific tests, what we call industrial tests.

Our knowledge does not need to be stolen from, it's given freely. You have to understand it. So, if the Med Beds really worked, they would not be there to steal more, because they know they don't work.

Have to be correct in the conduct of use and application
We understand the knowledge belongs to you as Knowledge Seekers. But you have to understand and you have to be correct in the conduct of the use and the conduct of the application.

In the coming weeks, with more and more, we'll concentrate on the flight system, for you to understand, (1:02). but you have to understand what is about to come, what is about to reach you in the process of understanding, by entering these new systems.

Many souls travel the span of the universe and those who fail to understand the process, travel with a spaceship. Those who come from the U, who bring the spaceship. Those who come from Earth understand the dimension of travel, in the D of the Creator. Then you'll see those who sit in the spaceships, envy those who come from earth, that they understood the true meaning of travel, and not a game contained, on the back of a donkey, to a car, to a spaceship.

We have given you the freedom of your soul. We have given you the freedom of the universe.

There shall be no cows, .. chickens, on Mars, Moon, and beyond in the galaxies. How are you going to feed yourself? So now you understand, you have to go through the process which is set. for us to teach you, to understand the elevation of the STM, that it absorbs the energy from a higher order to feed the dimension of the Soul of Physicality, that when it wants to manifest itself in the matter state, or visual, visible condition, it can reduce its strength to dimension of the space, time, and position. (1:04).

Then you'll be human in the body of the man to me, a man from Mars to another being. And to be able to be seen in another dimension from a distance, to the citizens of another position and time.

Fortunately, I had the pleasure to witness this in the past few days. How a number of people look at one, and have totally, different perception of what they have seen of the same. As you say, it was a hair raising experience. But each one was taking a knowledge according to their understanding, from the soul. I understood, and it was easy to be understood, by those who were present.

In a way mankind has entered, to understand the process of life of Mitra. The cycle of the children of Mitra will go through this process, and with it they shall not kill, they shall not destroy another life. And they will pass this information, and the knowledge to the new children of the man, what we call, the children of Mitra.

Then we'll see the new cycle to begin. We'll still fight, we'll still struggle, we'll still hassle, we'll still produce for the knowledge to be shared with the governments, and with the others, because they have to change with it, not us to do magic's. But them by magic, to become and then change. We'll strip the body from the true intention, (1:06). just by true processes of the elevation of the Soul. The physicality, whose pitfalls, which I hope many of you today understand what is about to come.

I hope many of you will understand the process of what has come for you to understand what is to be. For you to be ready for the spaceflights as the what I call, primitive systems have already been developed and ?? and it's about to be tested, not to fly across this planet. But to allow you to decide where you want to fly, beyond this planet.

Many of you if you understand the process will bring new knowledge. And my advice to all of you is, when you get someone who's been through the process, and tells you what they have experienced, respect it. Because ridiculing, it shows your lack of understanding the process. Not that they don't speak the truth.

Always remember, how many times I have said, about the guy who went to Moscow and he says, they have a bird, which is made of iron and steel, and it flies. Months later it appeared in Tehran. Later it was understood, that they were not educated, not the man ?? who told them.

We have to understand what comes with the new knowledge, embrace it, record it, and then find out, research it, that it happened. Can we replicate it? What was the reason for this experience? What was and how it was created. (1:08).

When you see your mother who died 20 years ago, and she says, she has a pain in her stomach, or she has a pain in the arm. Is this the physical pain of her, or she is telling you, that you have a problem in your kidney or your arm, or somebody has. And she knows. She's the reflection in the mirror of the pain, because she has no physical dimension to suffer pain.

Then we understand to interpret it. We understand how to interpret. We understand how the interpretation has to have a meaning by ourselves, not to be explained by the others. This is not a dream, that you need a dream explainer, to explain to us what the dream means. We have to understand the process, we have to understand the elevation, that has brought us to this knowledge. What can we do with it. What is the process of this knowledge. What needs to be understood to go to another level.

My advice to you Knowledge Seekers is very simple. Understand the motion of the travel. We'll still make the MaGrav systems, we'll still go for the generators, we'll still

deliver whatever, but we have to keep busy. We have to find a way, that the life of the physical life is fulfilled. It's you have to find out how you want to fulfill the time of life, which will not be the 60 years, or 100 years, or 1000 years. It'll be the time of the life of the U and the Unicose. Which factories are going to work in? Which bread are you going to eat, in another U, (1:10). where there is no bread.

Man has to learn the new dimension of existence. In a way, in the computer world, we call it a sandbox. We give you a sandbox to test, before you start using a program. Now, we give you the sandbox of the enhancement flight unit to test your skill. And see if you are physicality, in Linz, and your uncle in Beijing is having dinner with you, and calls your mother, and says, he is with me having a dinner. But in fact, it's you who decides the point and the place of the manifestation.

We are not in a dreamland, we are not talking about what could be done. It is done. The technology, the system for delivering it, is built, is available, and with it will come the extension of the knowledge of the man.

It'll be interesting how much you Knowledge Seekers will come to comprehend the totality, and how much you as Knowledge Seekers will come to understand the physicality. I'm sure our team's ready to take you on the fight of fancy, in the dimension of the realms of the STM.

Don't leave physicality behind in the EU - elevate it

And please, wherever you go, come back, because we don't want to move a body out of the system, till you decide to come back. Come back and take this physicality with you, or come back and move it out, but bring the knowledge to elevate it, and don't leave it behind. (1:12). Our systems are not mortuaries. And our systems are not the beds for you tourists, to wake up when you want.

I hope you understood the intro (video) of today, and you understood the knowledge which followed the intro. In the intro we taught, and we showed you the way man has tried to fly for centuries. And with the teachings, we have shown you another dimension, further, much, much, much higher level, then what you've seen in the intro. That's the knowledge of the man, and this is the knowledge of the creation. You have to decide in which level you want to fly.

Become passengers of the universe, detached from physicality, or please book me a ticket on the spaceship I want to go to moon on the 6th. We're traveling the souls in the dimension of the space travel in the true laboratories on the sixth of June. Your spaceship locked, chained to the floor.

If you went to Linz in the design center, when we showed the first two Enhancement Units, and if you go to Linz and look underneath of the flight systems, or what we call, the two enhancement systems, you will see pieces of wood in the corners extended, or extension to the floor. Those who are here they can tell you, that for systems not to fly,

we had to screw and add weight underneath the systems, (1:14). that they do not take off. We had to remove them (the weights), when we move them out. Now they are so heavy that we don't even bother with it.

But understand with the new system we don't need to shackle you down. The only thing to shackle you, not to go through the space travels with the new flight system is you, and the correctness of the conduct of you to your soul. As the beautiful Arabic word says, "we have taught you everything," it's the final for you, at your level of understanding. As they say …. This is what we have given you as a gift, ?? as a better cap ?? as the giving. It's for you to understand what " ??? better cap" ?? you have received as a knowledge, or the greed of the man in the dimension of physicality.

The Totality is given, it's for man to decipher the knowledge page by page. As I said, you read the three books when he became the first Knowledge Seekers, you read the book 3 - 4 years later, and it has totally different meaning then when you read the first time, because you have more knowledge. And now, read the first, second, and third book, and you see the knowledge of the travel of the universe has been hidden within the writing, and nothing is new.

As we wrote in the word of the Creator, in the three books, in the knowledge of the science, (1:16). and not in the theology of lies. You can test it, and maybe with it, you can prove the lies in the theology of the churches, mosques, and temples ?? ?? . Because now we can see it. If you are, and understand truly, you can have the Last Supper with Christ, because the wish is there, and it's there to satisfy the wish of truth, not mine, and not yours.

Thank you very much for today's knowledge sharing and I hope you understand, that juggernaut has hit you all. How you're going to recover with it, and from it, depends on the level of your understanding of the knowledge of the creation. Thank you very much. We'll go to a break and come back and answer some matter state level of understanding.

We go for a break (1:18).

Proofed to here >>

>> BREAK <<< 432 KSW May 12, 2022 (1:24).

K- We have 7 transcribers / translators …
R; … (1:26).
K- Can you bring the head of the KF up , she is using a different ID numbers … Can you bring them in …

They want to stay in incognito. (1:28).

Q: .. When is it possible to go into an EU, and is it for free?

K- It's not for free, that's for sure. People have paid huge amount of funds to purchase these units in the centers, and people have paid 10 million to buy the flight system (FS). People pay a lot for different units of the KF, and it belongs to them. KF in collaboration with Knowledge Seekers is setting up these systems. Now that we have gone into mass production, All the Enhancement Unit, which has been sold previously, will be .. for order to be delivered in the coming time.

Now we have established a continuous production line. So it's just, that we have a what we call, unless we go for a massive expansion, there is a limit into how many units per week or per day, we can produce. At the moment we are trying to reach one a day and then increase it to about 30 a day, to meet the 1000 units, This will not happen till the end of this year, because it's a lot of work, a lot of work involved in the background in setting up these. (1:30). The physical structure, is not that hard. It's mainly trying, the controls, the understanding, the loading, and then tuning it, and the rest of it takes time.

Here >>

R: I see in the Keshe Foundation store they offered the flight enhancement experience says starting in September 2022, you will be able to enjoy the flight experience in the new flight enhancement spaceship units within and outside or sort of orbit using the new space plasma technology book your ticket now, and that is well 250,000 euros. So, you have to be prepared to pay something quite dear in order to have that first. Experiences Yes,

MT Keshe 1:30:55
there is something which has slowly eroded up into the shop. Last week, we announced that workshops in the Keshe Foundation exhibition center for the production of the what we call GANS is perfect answers by people who actually work within the Keshe Foundation, manufacturing side, these are not teachers alongside her, which is part of the Keshe Foundation has been responsible for gas production for years and definition. So, the class is done by Herbert in the 11th of June. These are deep embedded knowledge, which we'll learn and you can do it missing, some people have made a booking. Now, we have entered the pottery this week, you can join the people who actually make if you bought the Cup of Life where you pour the sugar or the pressure, you have the master teaching you on the following week. I think that's an 18th. It's already posted on the Keshe Foundation website, you can book there is a very, very limited number of people for this workshop, maximum 10. And when you made your cup, so your pots, you leave it and you'll be fired and done by the experts and then it'll be posted to you. And you'll be taught how to do that mixing up the gases is a procedure to it is not just mix and play. And then you will see there is one coming up for a sculpture to make sculptures which you can put as ornaments in the house with different dances. And what the effects will have this will know one of the masters one of the leaders I admire most in the Keshe Foundation. She's been solid back on our work in dense, she's a sculptor, she will teach

you how to make it how to do it. A lot of work you see in the Keshe Foundation appears done all you get things is this lady behind it. Take up all hard workbooks us studying about the rock behind our work in events. We literally she's the mother of the foundation in the men's she does everything to keep everybody happy. And that will be the following week after that. And then we'll have the painting. The painter who will use against us for that will be booked for the following week that but this week, we added the pottery, and I'm sure during the next week, you will see the sculpture and the painting. And then we have our own Knowledge Seekers we introduce new what we call dimension into what we call sub ornaments, right? That you can keep at home, you have a pain, you cuddle a teddy bear Teddy is made by the Keshe Foundation, the Knowledge Seekers who have made especially mixtures by the Keshe Foundation to innovate to help you feel sad, you cuddle a Teddy, you cuddle a rabbit. And within it, we have hidden knowledge. We're trying to be knowledge to be reachable and understood by as many people as possible. And we have commissioned the first 100 of these for the call soft ornaments to you will see them in the next few weeks, the sharp edge and the massive bow to teach you how to do it. And we try to expand the knowledge and for sure in the next few months. We will do a weekend of the space travel teacher or before a world leading scientist and put a fee for the mat to this training. They're working on it in the background when they reach to it once a week. And around about 10 to $20,000. For the lead scientists around the world who want to join, it is not fixed yet, but sometimes we'll announce it when they decide to go ahead with it and completed, the place will be just for about 10 to 15 scientists. And in those two days, few and a lot of other hot topics there, what we call Space Technology, newest technology. And I hope this will take place in town. And the process is very simple, that we teach you how to fill space systems. And some of you who attend that course will be requested to join the Keshe Foundation as a full time member of the production line and asbestos.

HERE >>>

Any other question .. (1:36).

Q: Azar … These few things, I don't know, because these days? .. sometimes I feel like I don't know anything. But maybe these are part of my gibberish mind is telling me something. Or sometimes I think when you see things about human behavior, you wonder. … You don't know the answer. … Maybe you don't know the answer. Maybe you can help. Maybe you think I don't know the knowledge, because a lot of times I think, I think to myself, "God, I don't know anything. I really don't know anything."

So you see when we when we look at things. When I look at how God created us, sometimes I think, was it a mistake? And then realize, maybe it wasn't a mistake. Because if I came to this world and just always was just good, I had no training, no hate, none of that, probably I would understand love. So it wasn't a mistake, that I was created. Because we had to understand, if we didn't know hate, or anger, or any of these I wouldn't appreciate love.
K- Why do we need to know that side, to know the other side? Doesn't make sense?

Q: But if it wasn't originated first, how would we understand it. If it was everything for love. ? … So was it a mistake then? (1:38).
K- Is it a mistake, or is it an experience we have to learn from? When you fall in love, do you look at what is wrong with the person you fell in love with, or the entity, or whatever? Or you just look at the positive way and you build it. When it comes that you don't receive what you expect, you change it to hate, because you create expectation.

Q: So the reason, where I'm going with this is, because I feel now with all the things. For example, I enjoy sitting by a lake, I enjoy sitting under the tree, I enjoy looking at the flower, I enjoy to be with the lover, so I learned all that. I enjoy physicality. Now I think, the way I feel, I feel now since we learned this. So it means that, this physicality at one point is has to end, and what we take from here, in any part of the universe, is what you're teaching us, I can create the lake, I can create the house, or the gold if I want to. If I can create ..
K- Can I ask you a question? How do you think you came to this point?
Q: You mean like now?
K- Yes, to understand you enjoy a lake.
Q: Because I experienced it.
K- So now you understand when I tell you we come here to experience, that we know how, what experiences ?? exist, that we can do things to stop it, or prevent it, or enhance it.

Q: So that's what I'm talking about. So my feeling is in the future this planet is going to go, because there's not going to be any physicality, but what we take from here ..
K- Who said (this planet is going to go). It cannot go, … it's part of the operation.
Q: I can go to another universe and create the same thing I have here, with what you showed us.
K- So for you it's not the ?? point. (1:40). It doesn't end, just because you learned something. It might be a new beginning for you. But this journey has to be taken by many people.
Q: Okay, so the people who learn, they leave and …
K- You don't need to leave, you experienced it. When you taste your lover, when you taste the loving process with your partner, (do) you just get up and go, "oh, I learned that's it, next one. You stay there, there is more in it.

Q: But why the teaching, ?? what you learn. Why is it we cannot transfer it, or give it to somebody else?
K- We do, we do

Why do bad things happen to good people - unexpected - unasked for

Q: … let me tell you a story. Because I feel, because I went through so much tumultuous emotion yesterday, because a patient come in, because I can't wrap my head around these things. It was an African American father, and his son was coming to me once a month. And he hasn't been to me for a while for a long time I asked his father about his well being. And he said, he's 22 years old, he wanted to take his girlfriend to her house, on his

way back, he wanted to get a haircut. So he made a shortcut, goes through the park from the underpass, 4 people, African American attacked him, beat him up so much. They didn't take his phone, they didn't take his money, they didn't take his watch. They just beat him up, that he was in hospital for two weeks. And he is at home and constantly he has seizures.

So I'm thinking to myself 4 humans, they weren't hungry, they didn't need anything to steal, but why that behavior? Why such a behavior exists? Why?

K- The thing is, the thing is. (1:42). We do not prepare ourselves for these things. We do not understand the reason. What you tell me, is just a déjà vu, because this happened to me and my family. One of my sons is a martial art, black belt. And he is very humble man. He walks the street like anybody else. A few years ago, he said Papa, do you know what happened today? I said, what happened? He said, I was going to go, to catch a train. And 4 black guys, Pakistanis and black guys came to me, and they wanted my leather jacket, and they pulled a knife out. Being a very humble boy, he said I don't know what happened. But there were 4 bodies on the floor, and knife in my hand. And I said what happened to you. He says, there's a scratch somewhere on my arm, on my leather jacket. I said, are you okay. he said, Papa, I'm trained. I don't need to show when I walk it, but I had for literally, dead bodies on the floor, within seconds.

We are not trained for it, but we have to be prepared for it. He would have been that boy, maybe dead, or maybe not ?? there were 4 knives. I had the same experience a years ago with Bill Crammond lord Bill Cramlin. His son was about 18 - 19, and he has a black belt Judo. We went out and a couple of people came to attack him, they were on the floor, and he was standing there. I said that's a good investment, I let him play Judo and the rest of it. (1:44).

We are not prepared for it. If we are prepared for it, would he, could he go into the dimension of the Soul, that his physicality wasn't there to be abused? Is it to learn something from it? Is it for you knowing, with the knowledge you have, you can something to do, that it might bring knowledge to you, and change your future by ?? it. Seizures can be reversed, we done many of it over years. It does not matter how it comes.

It's us that, it's not why it happens, It's are we prepared for it? Are we, or are we prepared to have a judo training, or martial art training to defend ourselves? Or have we trained ourselves to go to the level of the Soul that the body is ?? not there for them to attack?

Q: .. But why is it that I don't go and do these things, and jump on someone, and beat up someone?
K- We are not brought up (that way). You do something else, you go and attack them in their mouth with your drill. And you think you're doing a good job, because you're a dentist. You are still attacking them, because you're trained, you can justify it. You put them through pain, you give them the injection. Can't they use thing, can't you teach them that, they never have any tooth decay, and they can sort it out themselves?

It's, we don't do things. I was in a diplomatic meeting very recently, and I said to the (1:46). what do you call it, attaché. I said you know something, you know what I'm talking about Azar, because you're aware of what's happening in the background. I said, do you know something, my biggest enemy is the ambassador, you tell your ambassador, if he stopped becoming the enemy, we can do something positive. He said, Mr. Keshe. I said, I'm very open. You speak to your ambassador, once we sort out your ambassador. They tell me, Ambassador, I guess I don't need enemies, then we can ?? support, but we are still here to do something for you. And he had no answer to it.

We have to be, we got to be, I don't consider why I don't do it. Because we are not (in that) mindset, we are not there to destroy to get something out of it. We are (of the) mindset to help, to do. But I don't know, no one Azar, and I've been involved with you dentists for years. Over 50 years I've been involved with you, 40 years, with you dentists. You see yourselves as an angels. But I don't know no one, that can put a man through more pain than anybody, than the dentists when you attack us in our mouth. But you justify it, I'm there to help you. I know no other profession, that puts man through the pain.
Q: … The other way is to people, people, people come to me with pain I get them out of pain.
K- Yeah, but you given them more pain.
Even if there is no pain, you say there is a hole somewhere. .. drill it.
no pain, you said

Q: The girl comes crying and I stopped her crying, because I just …
K But not all your patients come in with cry they come there.

Q: .. that's not true. Llet me tell you something. (1:48). I have I have kids come to me. And every single kids that comes to me after they see me, they come every time with a smile. And they jump on the chair. Because I spent because I can tell you this one experience this is the boy is now 24. And he works. Now he went to college. He came to me when the mother brought him his key was crying sitting on my chair, this little boy, he was like six, seven years old. And then I spent one hour just talking to him without doing anything. And after that, because I had to do extraction on him because his baby tooth had cavity on it and it was too bad. I did the extraction. He he finished and he was smiling after that every time he came. Right after that he would come with the biggest smile posted on the chest is still as a 24 year old. He never missed any appointments. When he comes he's my best friend. And you'll never miss it because because he knows if he goes and do the cleaning, he doesn't need to see me. So I mean, it's actually one of the things I always tell my patient I said, one of the major thing that we missing in our education in our educational system universities is all about how you can make money is is not about teaching people how to take care of your body. So when when people come in if you just put shove your hand in the mouth, you're talking to them. So what do you do you have this scary vision of the dentist but when a kids come to you when you speak to the mutation, you don't have to do anything with them anymore didn't then they just come into the clinic. They never have any cavities. They're going to be fine.

K - Yeah, but what I am trying to. You talk about the pain, we don't, we are not trained, or we are not there to get others ?? suffering. But in general, in speaking, we are not trained to do certain things. We are not trained, and some of us react to that kind of things. (1:50). The reality is, some of us, we don't know when it happens, how we will react. We don't even remember how we reacted. It's a sequence of things, which we go through, and it's automatic reaction. The reality is how we perceive our action, is to be done, or has had the effect of. We don't go out to harm. We don't go out to destroy. We sit, we do what we need to do, to see the progressive development. But why other people go to harm? We don't know. They have their own reasons. They have their own mindset.

I always said, I don't understand, we live in Austria. Now we see a lot of Ukrainian cars coming through, some brake on the side roads. They don't know where they are, they're just driving to be away from where they are, where they were. Some of them are there to get better.

And I've asked myself this question a few times. We know the reason, we know the background behind it. But did the Putin, or the Russian leadership, and the Vatican and the Russian church. He could not work out this in a peaceful manner. And he had to get to this point. Or is there something as a human race we have to learn at the final stages of this killing process for the religion.

If you look, Vatican did the same thing in Northern Ireland, (1:52). they fought for 300 years, they wanted it, because the access to that, was the proof overtaking, the taking over the monarchy, of the British Monarchy, since then, and they, Church of England, now they have. This is not a skirmishes up a few ?? But why did they have to get to the point of a war? Why couldn't it be discussed in Vatican and the Church in … what we call it, in Moscow, or in St. Petersburg.

Where we have forgotten the language of peace. Would one of you enter the space flight system, and you're so true to your wish in the soul, that you want to elevate. It's not something that you have is fashionable. But truly within your own soul, you wish the elevation of the soul of the world leaders, and they'll all will be elevated by your soul, and you'll start seeing the change in the coming years. Or the change I wish, but was that wish, was that soul elevation truly came within, that it, what do you call it, reached the point.

You know if you were in England, and you know about the beer game, it's called Heineken. There used to be an advertising called Heineken, which is the part that no other beer can reach. Would your soul, so sincere, that can reach maybe 1, maybe 10, maybe half of the world leaders, that they walk away from the war. Because you were sincere, you brought their souls to your level. That's what we do when you go in the EU, your energy is lower, (1:54). and the system is higher, it gives for it to elevate it, that you don't have the cancer. Are ?? the souls, (like) the cancer cells, that need the, to receive, to elevate with it, and it was given with sincerity. Because it was done in such a way, that it fulfilled, it brought, next day there is no war. Next day there is something positive.

Maybe 100 of you go into the system, and 10 of you have that sincere wish. And each one of you according to the strength of you have, you can reach 1, or 2, or 10 of the world leaders. Collectively you reach a 100 of them, you reach maybe 50 of them. This is the beauty of the New World. This is the beauty of the new science.

About Neutron Decay ..

Q: .. Yesterday in Farsi teaching regarding your last week's teaching, when you look at the, we talked about the Creator, and we talked about the decay, we have a neutron and we get a proton and an electron, because I think the discussion we had, and then the different point of view, I think comes from the maybe, we look at things in a matter state, not plasma state, because they were saying okay, you have the neutron and then proton, and electron. The electron is the soul and a proton is the physicality, and then they say no, not neutron is the soul.
K- You decide which one.
Q: Then I really got confused. I said, maybe we should, I should ask you the question. So, maybe you can explain.
K- You see, one stands the representation of that. Without the electron, (1:56). proton cannot manifest itself, and without the proton, electron cannot manifest itself. It's the interaction of the two, which leads to manifestation of both. What as a nuclear physicist, the first thing we were taught is, "it's there." In reality, you cannot see the proton, in a way, in those days we had these machines, we could see a fuzzy light moving fast, and they said this is the electron.
Q: .. Dr. Baripur ?? was saying what about the hydrogen, we look at the hydrogen and it's not decaying. So what is it ?

K- H decays, who says it doesn't. Hydrogen decays more than anything else. Why is it a source of energy? If you look in the amino acid (AA), we always said energy comes released by the interaction with it, You cannot do if it wasn't. It irritates, it agitates, it forces, according to its position in respect to nitrogen to release energy, and part of it, it absorbs itself.

This is the lack of understanding the world of the nuclear scientists, or nuclear physics, or in biology, when you have a proton, electron. Oh sorry, oxygen, carbon, hydrogen and nitrogen in this position (draws the atoms arranged in specific position), you get a specific field release, which is good for the cell of the brain. If I put oxygen here and put the carbon here sorry oxygen here and put carbon hydrogen and nitrogen here, you get a different field release. (1:58). And this is good for a cell of your heart.

We haven't understood the totality, a three dimensional active plasma life. It's not that this is an isotope of oxygen, the positioning interaction, now it has to interact with three different ways. Now, the oxygen has a different position in interaction.

Cells plasmas are recycled around the body and then rejected

It's the same we are so, we think in singularity, that we cannot see three dimensional. When a body finishes for the energy of this structure, for the brain, it doesn't destroy it, because of its new orientation, and ?/ things, now, this is good for the cell of the kidney, and when it finishes releasing energies for the kidney, it's good for the cell of the leg. Once our upper body generates, creates a thing, it just doesn't get rid of it because one cycle is finished, it uses it to its maximum, and then it will reject it, if it cannot use it.

This is what the world of science, world of biology, and medicine have not understood. When you have a cell, which every 28 days, or every 500 days, or whatever, goes and gets rejected, it doesn't go as part of your, (2:00). what do you call it, excrement, as part of human ?? . It goes, it can be used for everything possible, then it's reject.

And sometimes these transportation, leads to ?? transportation of cancer cells, because they pick up the code of energy fields. We've seen this in women, when you go through your monthly menstruation, you prepare the body for new birth, the body collects all vitamins, everything else, even calcium from the hip of the mother. Because that's already made elements, totally converted (to Gans). And it brings it ready for the cycle to create a new life, new information and dimension. Because every cell has a calcium within it. The child is not born, the body just doesn't reject everything, it puts it back, store it, as the mother is going to feed the child. That calcium goes to the breast. But it stores it, it doesn't waste it.

If you understand this, a lot of illnesses can be stopped. Because we transport it. We don't understand the cycle of the step down, or a step up of the energy of the cells.

This is the progress, it's the development of the understanding of the knowledge. Then, in this process, which one is the soul of the system? Or does the soul of the system, in this amino acid it's here this time? But it is here next time.

We have to open up the level of, not understanding, (2:02). but realizing the truth. We see it, this is why in the last teaching I talked about bringing these cells into the vacuum, and see how in 3 dimension they look. The knowledge, the science and the technology, has to be understood in all its facets and dimensions. And not just because we understand one part of it, and think we understand all of it.

Q: Mr. Keshe the last thing if you permit you've been to cinema. And you go ..

K- No I don't know what it is, a cinema, never been there. I call it sleeping chair. When I go to cinema, the first five minutes I am awake, and I wake up the last 2 minutes ?? when I heard the movie is finished.

Q: Maybe Mr. Keshe you're not the only one I'm like that too. So no worries. But you've been to cinema, so when you sit in the chair you see biggest screen in front of you, and there's nothing there. And then suddenly when the projector in the back starts, you see the hero, the villain, the lover, and you see all those actions. You see a kiss, you get affection by it, you feel good, suddenly somebody is screaming and you jump.

Because the screen shows you that. But when you get up and stand, and you look into the light, and all these come from that light. It doesn't exist. So the Creator Himself is that light, that when the light of it shines on Earth, on a condition of earth, this screen is showing. But actually if I go up to the light, I don't have to see what is on the screen. I can change it. Is this right?

K- What about the projector, (2:04). and what about the film in the projector?
Q: But I become the light.
K- No you become the ?? ?? blocker of the light, because the screen will be black
Q: But, but if but they created but they create but okay, so if

K- Have you ever been to the cinema, especially when you sit in a back row, when you're young, and you try you can reach the projector light? We used to do that in Tehran. And then you move your two fingers, and then on the screen appears a like a bird flying. So you haven't changed the light, you just appeared in the light.
Q: Okay, so if you go there, so we go to the Creator. So I can go to the light of the Creator, but then you said, the Creator was created by the other fields. So the other fields are the projector?
K- Yeah. So?
Q: So now I have to go further than the light, to the projector then?
K- Yeah
Q: Then I can do?
K- Maybe, now you have to do the whole movie, before we can change anything.
Q: Not change it in a way, that I change it for everybody else. But my perception of what I see is going to change?
K- Maybe.
R; maybe you'd have to get to know that projector operator

K- I think Rick is talking about himself, you had better talk, that he can put it right. But in a way, we are, .. we cannot change the course, in so may ways, if the course is set. The movie will carry on. You think you blocked it, the movie will be played the next session, it will be the same without you interfering in it.
Q: So what you are saying is, I have to go through it, what I say and finish it.
K- .. That's why you went to the movie, to see what other people's have made, that you can watch.

Beauty of South China

There's a beautiful thing, WL can explain to you. (2:06). You've seen the movie Avatar. This thing, this valleys, and mountains on hills, actually exist. That is a beautiful place in South China. We had the pleasure to be taken there and to see it, and it's one of the most wonderful places in the world. The beauty of it, and the extent of it is breathtaking. And when you see the movie, they add characters into it. In essence does not exist in that dimension. They made it to look, and they created the perception, that in these beautiful mountains in China, such a thing exists.

It's one of the most beautiful places on this planet. And this is the reality of those things which you see in the movie? Or is it something that we accept what's in the background as reality and the rest is production made for us to believe in? And apparently our tattoo is coming up and up this year called the water and what is the extent of reality and made to believe and how much we can change that makes belief but the reality states demands a small change the trees for me they're

The most beautiful valleys in the universe are within that mountain range. It's an experience, if you get a chance to go to China, and go and see once they open up. It is beyond belief, how reality is ?? (2:08). Because I watched the movie, and going to see the environment, It's just you expect the people you've seen the movie to pop out somewhere, but they are not there. Because it's imagination we made. We fit it onto a reality which is there. We cannot change.

The Creator is the reality, our life is that imagination we built on it, and we want to fit into that it becomes one. It's us who has to understand it. If you get a chance to go to China, go and see this area, ???

The reality is, if the Creator is there, we would like to create an image on his, what we call, canvas. The ??? ??? will change.

Any other question?

HERE >>

Q: Dr. Farzam Bararpour starts speaking in Farsi …

K- Let me explain, Dr. Barapor one of the heads of the Keshe Foundation in Iran is online. He doesn't speak English so good, so I try to translate. Or Azar you'd better do it (2:10). because you're both medicals, you understand much better than I do.

Q: ou can do that over Westin.

Dr. Farzam Bararpour 2:10:09
Man ramshaw Who has Roger Dawson D sharp, so that gives you the essence of as a de que Naboo can begin decay me share your decay name jgc Moataz one atom grafting nematodes in tune of aging. So what should get Rue that banana and some other Tama rathmore The level la Coronavirus John

Q: .. Dr. Barapur was saying last night's discussion wasn't about the decay, we were talking about the soul in everything, like in everything that exists.

… we talked about the proton to be the soul, and ?? (electron to be the P, and the neutron be the soul of the Creator. Electron to be the soul of the Creator. (2:12). But in the past we were saying the neutron was the Creator, or the soul. (Confused to translate …)

Okay in the past was saying proton was the soul of the Creator, and electron was a physicality. Now are we saying the other way around

So take in one hydrogen, the hydrogen that is not doing anything in a decay, but the essence of it, the proton in it? Is it the soul or is a physicality?

K- It depends on what scale you're talking about what you're talking about, in what you call it, in position and D. When we teach, please listen to the whole discussion, (2:14). and not to one part. In a way, if you look at it, the soul of the Creator is within the proton. But without, and on the another hand, the Soul of the Man is within the electron. But at the position when the Soul of the Man itself, becomes the center, in respect to the soul of the Creator, which you call it, a proton. Because it came from it. It's the same part.

You have to understand in what space, time, and position, and what we are talking about. And not just because we said, the proton is the soul of the Creator, and electron is the STM, or the soul of the Creator is the electron and the proton is the Soul of Man.

In understanding in what context we're talking about. This is what is important. Go back to the teaching, why we said this is this. And in the next teaching in respect to the Soul of the Man, we see the Soul of Man as a proton and Soul of Physicality as a electron, and the interaction of the two creates that atom, doesn't matter hydrogen or whatever. Or is the soul of the Creator, is so intense, and so interactive, that the Soul of Man is literally, if you look at the dimension of the proton, as being not moveable, hardly moves, if you look at it, if you look at it in respect to the electron. Is that electron, is the soul of the Creator, and the man which is literally nothing compared to the action and the dimension of the … soul of the Creator. (2:16).

We have to understand in what dimension we talk about, and what we're talking about. Because when was the Soul of Man is the proton, it means is within the fields of the Creator, which is active at a much higher strength than the proton. Do you want to translate, or are you lost.

(2:18).

K- Sorry about this, I am just shortly translated, Cr Barapor says, we have to understand that, what was, we will not in a teaching yesterday, so this is an extract, (2:20). part of two different understandings of the whole teachings, and interpretation of as an electron, which one is a Soul of Man, and which one is a proton, and which one is the Soul of the Creator.

As I said, we have to understand the time, position and space, and what we're expecting to see, from what, and to where it's positioned. Are we looking for the love of the Creator, or are we looking for the detachment of the man from the creation and the Creator, that, this ?? is in there, confirms the existence.

This is what the discussion has been. Some of these teachings, which goes on in different languages gets very exciting for translators, and what we call the participants. I have been in a few, and it gets very , very, ?? hot, and when one cannot understand the other, and one tries to stick to the ?? light.

As I was discussing with one of our Italian team members a couple of nights ago, in a conversation, that we have to understand our teaching. … We have to understand our teachings, that when we teach, that not everyone is at the level of what we are. And some are ahead of us, and some just joined in. We have to be, in a way, equal that everybody takes something from the teachings, especially the translation groups, and in the workshops, which goes afterwards. A lot of workshops goes on around the Keshe Foundation around the world in different languages.

We should not look at the foundation just because of somebody who teaches something. And we see a lot of these teachers, who just been a little bit longer, they thing they have all the rights, and they are right in what they say. They cause a lot of problems for themselves, a lot of Knowledge Seekers. (2:22).

Any other question

Consciously traveling with Soul and manifesting physicality

Q: Mosveq .. We had discussion about, you know, turning bedroom into our lab. So this is I'm talking about an experiment I did in the bedroom. So this experiment is about lowering the field of the blood, so that the soul can travel, just like we do in the dream, but I was trying to do it consciously. My aim was to go to a specific location in Brazil, where I have visited my friends. I was doing it in my afternoon time. And when I could sense that I'm in that location. My senses were not as focused, but nevertheless, I could tell. When I got there, I will startled to find out it was daytime, because I assumed that it would be nighttime in Brazil, but actually, (2:24). it was early in the morning. So I felt, and I could tell the environment, it was not particularly clear, because it was my first time doing this. So and then I came back. So my question is, I could see that the soul travel can be done consciously. Of course, I need to work on it, but what I'm interested in is that, since I'm doing it in the bedroom, I can take my body with me over there. How would I design an experiment, some hints. How to enclose my body in the soul field, and do the traverse also. So it's clear that I can travel. Although I'm not good at it, but nevertheless, it work.

K- Your learning, your in the sandbox.

Q; Yes, I am in the sandbox. I want to see how I can extend it, how I can go from one part of the sandbox the other part.

K- Yeah, what happens? It goes by testing, or detachment. I've mentioned this before. I know one lady living in Bruges, in Belgium, who could do it, and she started doing it from childhood. And people like in Tibet, they could see her, she always went to the same place. Because it's the only way in her mind, where she would find peace, with what was happening to her in the dimension of physicality. In a way, she was there in physicality (P), and she manifests herself in P in Tibet.

She was physically abused by father, grandfather and brother at the same time, sexually. She was taken from pub to pub to be abused. This is tradition in Belgium, don't get shocked with it. (2:26). They open pubs and they abuse their children to earn money out of it. This is a tradition in Belgium, don't get shocked.

She came to me, and I used to go to her house to meet others. She wrote this and gave it to us as a paper, as a dossier. That, because she didn't want to face the abuse, the pain of men raping her, she managed to lock into and go in here childhood, wherever she heard that Tibet is somewhere, she can be there. She could be there, people could see her, she explained, and being aware, that the body's getting abused by men at the age of 6 - 7 - 8, whatever. And there are people who do this, because you want to do it. But she says she could do it every time, that the father, the grandfather and brother were together abusing her.

I explained, I tried, I met with her maybe 30 - 40 times, maybe more. And I tried to intrigue into this, to understand more, because how could she manifest herself in Tibet? She says, this is the where I could find peace, where my physicality in this dimension (D) had no meaning. When they finished with it, my father could pick the body up, and take into the other pub for the other man to abuse me.

So, it's not just exercising, it's that, you choose how and where. This is what I said, we can preplan it when you go to sleep. And we can accidentally go to sleep. You set, to get better to do it. Try to set it up, that you don't need to force yourself. It's like I said, we had two Spanish couples in Barlletta, they were sitting there, (2:28). the guy was trying to push, to see if the pen moves. I said, it's not done, you have to understand the soul of the pen, and you ask, if he wants to please you. Or you go to the next ?? step of learning more and more to do it.

You're not the only one, Mosqec, many, many Knowledge Seekers (KS) are taking this path. They're testing it and they're seeing what they want. And some of the Knowledge Seekers, preempt where they want to be, before they go to sleep, and in their physical dimension go through that path to where they planned.

I get a lot of Knowledge Seekers sending me messages or whatever, explanations of the dreams. And this time they could control it. You don't need to force it, if you understand it., preplan it, m not preplan it. You know, like I want to go to town today, to buy pair of

trousers. I go to bed, I want to go see the uncle Sam, or I want to go to the zoo. Then you come to it, and see if you went to the zoo, when you woke up, and how much of the zoo you remember.

These are important for us. I learned through a number of people who I met in the circle with nun, and this lady, a lot about the fact, that how many women create that condition in Belgium,. Because some of them commit suicide, because they cannot take that, and they never learned how to let the physicality go, and just be there when you come back. Children abuse by the nation, (2:30). by this culture of Belgium, is as you go to cinema. If you haven't lived in it, you don't understand it. But then you understand the people who are the victims, what they went through.

And then you see, those who had the same experience, if they find each other together, then they gather together. They tell you their experiences, how they do, and what they can leave, detached from the physicality, because at the age of six, seven, and a man of 30 - 40 abuses you, the pain is too much. But the father gets paid. To you it's revolting, but it's a fact with this nation.

One day, you remember I had brought Alex out, in secret, I bring this lady out for her to explain to you. She's very open about it. And then you'll see that people actually do. I came to this group, through the Belgium security, who were appointed a nun, or a woman who looked after this children, who were abused by the priests from a young age in the church. Many of them couldn't accept, by just 17 or 18 commit suicide. I was asked to meet with this lady who's supposed to be finding a way to stop this process of abuse of the priests, raping 6, 7, 8 year old children. She said, I can't understand many of these children commit suicide, because they can't take it. They go to church to pray, and they get abused. (2:32). And nobody believes them, because they do it themselves ?? with it.

And many of them learn this, going through the soul, and detaching from the body, they do what they like with them, then they come back when they are finished.

We do that in the sleep, we go to bed, maybe we created the sleep for this purpose. It's not for physical repair. it's for our soul to have this time , to be on its own, because the physicality is locked here in this bed. Now we are trying to learn how to become conscious of where it goes, and we want to be the what you call, the decision maker in that travel. This is what it's about no more, no less. You will decide where you go. And then you need to practice

Q: I'm sorry, but I wanted to add, that it was not in a dream what I did. It was consciously or ?? (I was doing it consciously).
K- Yes, these people do it consciously. ..
Q: Yes. But I mean that's a more traumatic experience.

Consciously plan Soul travel before sleep

K- But let me let me explain this to you. Thank you very much for bringing this up. I understand what you're saying. That was the whole purpose, it's done consciously. But consciously you can plan it before you go to sleep. Before, in a way you force yourself to go there, now you know you go there, but you can preplan it tonight. "Okay when physicality is here, I decide I want to go and see what do you call it, uncle." Or I want you go to see another universe, another dimension, or I want to see something I haven't seen. (2:34).

Some of you, which will go through the Enhancement Unit flight system will reach that point. You will your eyes will be opened to a new dimension. It's not the out of body experience, what I've seen written in one of the notes (chats). It is you deciding where the soul goes out of your body when it's in bed. When you put it there. Not in bed, when it's the sleep time, it could be on the sofa, it could be in the desert.

HERE >>

You allow that to grow. You're respecting the knowledge they bring back. You know it's like you say when I get a holiday I go and see the uncle. But time step time is a holiday time for the physicality the soul goes along with it. But you can decide more on more of your pack. St Louis and you're seeing it and gradually you're becoming to understand you can meet in mon dimension about the respect that wants to exist we don't need to bring that sufficient we take it as part of us and this is a beautiful this is the beauty of it i i In the course of the works in Belgium came across this group and are very precise and you can check it out so the combat is not just the dream or the it's something they wish because then you give yourself permission because Kevin was now the soul is dead he can do a create that dimension of the physicality how they look

MT Keshe 2:36:00
it's very very interesting a very interesting thing is with this abusive behavior indulgent that usually parents use the older daughters of the family two or three of them and you'll see the ones which are they enjoy the abuse or in a way they were part of it are very slim and the sisters who are not could not accept and cannot go to that acceptance that take pleasure from the abuse in a way because they've been in charge I've spoken about this before in other teaching now very fat Allah you see sister and a brother a sister and two sisters taken from pop to pop or people come home to abuse them and the pay the parents for it. The one who has been part of it and been there knows how can I try to do Oh no, I'm part of it. I enjoy it. Very slim. The other children are all fat. beyond some of them pandemic themselves so ugly, not to be touched by them by the men abuser more because there's more to abuse. And we've seen this you see this in Belgium quite up when you see two sisters on the street. I tend to the conference in Ronson were the people who are abused by this I gave a talk to the school. And you see wherever there are two sisters and when I pointed out to them, they know

MT Keshe 2:37:41

is us for choosers and how it's done
and how we did that so and what we accept and how we do it (2:38).
Have you managed to get stuck on your work?

Q: Stefania … what you were talking before, about the circles. I noticed last week in the public teaching you made a big circle, that divided into one smaller, and one bigger. The bigger one divided in two, but the smaller divided in one. I wondering if it was a mistake?
K- No, it's just a process of teaching. It's just a process of teaching, because we don't repeat and repeat.
Q: Because I thought the bigger one was the … I saw it like the Soul of the Man, that once we go that way with the Soul of the Man, we can then decide to make the physical soul, .. I think I'm confused because I thought today when you
K- is it confusing for all the Italians ??

Q: .. Then another things about the vacuum, because you ask us where the force fields come from. And I thought about that all week, and definitely the vacuum has something to do with it. (2:40). I was thinking, who is creating the vacuum. And I thought the vacuum, maybe it's created from intention, or recording the sensation of the feelings of the Creator. Because maybe the feelings of the Creator are so strong and so powerful, they can make this vacuum. But who make the intention of creating the vacuum?

Because, for example, in my work, every movement is connected to feelings, you cannot separate the two. So the vacuum is a movement of the fields interacting one with the other. So, it has to be a sensation connected to that. Because it cannot be separated, they are the same things. But then I'm thinking, who then created this sensation. Then I thought the sensation could be created from intention, because this is how we learn, how we learn how to, when we are babies. We create a movement, because we copy something that we see every day, and then we copy, copy, copy, and we make all these movements until every movement is a sensation. So I'm thinking who created the vacuums. So this was my questions.

Who created the vacuum?

K- What we call vacuum, is a matter state combination of plasmas not to exist in that given pressure. In the world of creation, we don't have that, we have fields. (2:42). We have rays and particles as we call it. It depends when it becomes a plasma collection. We cannot have a vacuum of field, we can have a vacuum of collection of fields, we call a plasma.

Even a 100% vacuum in the world of matter state is impossible. Because we cannot create a field extraction strength of the fullest pattern of the what you call, energy. We tested this quite a lot in the lab. Because fortunately, we have a system here in Linz as well, which is a very powerful, a small chamber vacuum, a small chamber, we can reach up to minus 12 - 13, if we push it. But in Bruges, we could reach, but we could control,

state by stage of the vacuum. We come go -2, -5, -10. And we could see the interactions of how, what we get in our systems.

When you go to -4 or -5, you get huge interactions in your reactor, because you have a vacuum everything out in all full spectrum. You still have some particles left. When you go to 10 or 8, you see change of the interactions. Because now you have less of plasma, but now you have more of fields. This is why our atomic, or what we call, nuclear sources work better. Because when you have the plasma of the elements, (2:44). as whatever. Our fields, our radiation will travel and gets absorbed by them, maybe 2 centimeters. But if we go up to, let's say -8 it will travel 6 cm. But if you go to -12 it comes 21.6 cm.

The fields are still there as a ray, nuclear atomic ray. But collection of the plasmas don't exist, because we extracted them. But then we see, what we call, a sharp pin, a pinch in it. We couldn't understand how suddenly we vacuumed the chambers, ?? and now we got a pinch. What we very quickly understood, was that because if you look at, all our systems are made of carbon, plastic combination of CH. The radiation was weakening some of these. So, some of these surface materials were released as atomic, and now became the material, that we had to vacuum.

Then, if you look, I was looking at one of these reactors, very recently, we came, if you were in the Insanno as Knowledge Seekers, you've seen it. We put copper laying into this, what do you call, into these reactors, that we Nano coated the Cu layer. That, we will not allow what you call, the fusion of the plasma. And we could keep the reactors very, very stable without the peaks in it.

So, we create vacuum in what we call, vacuum chambers, (2:46). but this is in a matter elements like hydrogen, or whatever. But we cannot create a vacuum of fields, M fields. It is not something which is impossible, it can be achieved, it is very hard to achieve.

But the only way you can do it is like opening, you know when you open a curtain two sides, and you peep your head in through between the two curtains. We can create, we have the knowledge to be able to create this, what we call, vacuum curtain, for a short time. And we have to close it, because maintaining it in a field dimension is very, very difficult.

I've done this many times, but I use it to allow cosmic rays in. It needs a very much deeper understanding of release of fields in dimensions where you can control it. This video, this same part of this principle goes back to the same with the EU. The EU have a Nano layer separation for this purpose, that we don't allow other fields to come in, and we can control the gravitational fields within our reactors, within our system.

So you can create a vacuum of the matter plasma, if you can get the full spectrum, or but it's very, very hard to create a zero fields. Even when we open a curtain, that curtain is for a specific strength, it's not for all the full spectrum of the strength, you have other fields going to that open window, (2:48). as they were going before. It is very, very hard to

achieve a full, actually it's impossible to achieve a field vacuum. Plasma vacuum is possible it's very, it's very, not difficult, but it's achievable. And we will see this in the spectrum of the works of the flight units. That we create the conditions and this is one of the reasons we will not allow, or we changed dimension to a flight without the physicality.

I'll try to explain more of it, but zero field vacuum in the fields, its full spectrum is impossibility. It does not exist anywhere in the Universe. Because there is always fields. It's like neutrinos, we don't see them, but they pass through us, because we haven't managed, we haven't grasped that yet, of the total. We can create vacuum in a given spectrum of strength, according to what we want. And that's all it is. But matter state plasma, very, very difficult, because you always through vacuum, you degenerate part of the wall of your system. And we've seen it quite especially, if we use radioactive fields and it becomes harder, because you're radioactive , becomes the cause of the separation of what do you call it, the particles from the body of the reactor.

Any other question.

R: Would the Nano coated Cu be one of the better surfaces to resist that kind of impact.
K- Partially yes, but again, (2:50). you have to understand how you Nano coat. Because when you Nano coat, you actually create more free space, more free electrons to be freed, or atoms to be freed. Because you've created the space gap. When the particle is at the surface, it's tightly packed. When you put it in a Nano coat, now you have created that separation, and it's much harder to control. But there are ways that you can do this. But you have to know what, and how you do it.

R: If you had a working plasma in that Nano layer, that would repel the other plasma in the main part of the reactor, would that be a solution?

K- Yeah, it depends what purpose you're using it. What's the purpose of the work? Somewhere it could be advantageous, and other cases, doesn't mean, it could be dangerous. You understand. This is part of what it entails, it's horses for courses.

In specific reactors, especially, you've seen that copper reactor we have, which was used for energy production, the Nano coating on this is literally powder, you can scoop it, you can scoop Nano particles from the surface. It was built for that purpose, to build up energy in the layers, that the fields cannot escape. We use properties of the Nano layer to create that … that resistance. You cannot do it with a matter state. You cannot put a mechanical system to block the fields.

But the reason you see a Nano layer black is because you create trap holes for the fields. (2:52). This is a technique, which we developed over years. And you have to understand how you do it, what thickness you're doing it, the reason you're doing it. Why are you creating this condition? What do you expect from the operation and testing. These are all ?? combinations, that's why I say you have to, not only understand, but when you make

reactors, consider all aspects, all dimensions. And not just I think, this is what I'm going to do.

But then you are ignorant to what's happening behind the curtain by the fields and the materials. You're thinking you're actually creating a vacuum, but you actually are releasing more atoms, because your plastic is so weak, that allows you to do such a thing. If you've done the Coca Cola bottle creating the first, … Gans's, and as a trap the Coca Cola bottle test, you see that in two spots in the bottle, you get holes and the cap of the Coca Cola bottle dissolves. But you never thought, but you thought it created a good condition, but you're actually releasing more and more .. atoms from the layer of the bottle into the environment. It's not a vacuum, it gets more denser material. You think you're working at -10, but you're actually plus 20, because you never considered that the … wall of your Coca Cola bottle, is releasing millions and billions of atoms into what you thought was a vacuum.

We do that in the testing of the creation of a specific fields, (2:54). we cannot contain. We need a specific field strength. Especially when we use helium ?? Helium escapes through the wall, it's one of the most nastiest things to work with. And we spend time trying to find a way to hold the helium. It was really simple. I walked into a balloon shop and the guy was rolling up the balloons with the helium gas for children. And I said, he said you cannot hold the helium, we can only spray the wall of the balloon ?? he sprayed into the balloon was a helium sealant.

I took it, I bought, I went, I tested it, and it works. I can hold helium within the containers. But then you have another problem within the structure you have to sort out. It depends what you want to do, and what tests you are doing. You're well into this Rick. You know exactly what I'm talking about.

Q: Stefania .. when you were talking just now about us traveling with the soul. So when we're traveling with the soul, all this is not a problem? We don't have a problem with ..? K- No, you never had a problem to solve, because we dream every night. So you have to find out what you haven't understood. What you're doing when, ?? you let the body loose.

Q: But for example, when we were in the Mozhans, you remember , you told us the next day you are going to fly. So we were 4 people with intention to make a spacecraft. (2:56). And then I felt this pulling. And I was wondering if that pulling was, when you said, when you balance the fields. You said just now, the pilots have to equalize the fields with the Enhancement Unit.

So, I was wondering, when I felt that force lifting, it was like coming from underneath up, and that difference of weight. If it was this building up of fields, to then have this rejection, like this (neutron) decay thing happening? I was wondering, because with humans, I suppose we are vacuum, you said last week. We are also vacuum, being (our body is in a) vacuum. So, we could do it between us easier than this. Now I understand why you said the Enhancement Unit is an (enhancement). It can enhance what we can do.

Our intention is fulfilled - when it's for the totality - for others

(proofed)
K- Yeah, but it depends how you are, and what is the reason. If the reason is correct, and it's for not you, but let's say the benefit of the others, or benefit of another person than you, you always can reach it out very quickly. I had this experience in past couple of days, the foundation needed have massive support. And I reached through my soul and the person felt there is something. When I call on the phone, the person said, I already had a feeling, because the desire is for the elevation of the soul of the foundation. It's not for me. (2;58). And that response was sincere enough to be passed through the Soul, before the physicality could feel it.

We do not abuse our knowledge. But when there is a need, we convey the knowledge. We say, "oh, I felt something." It's not, because the soul has already been reached. The need was there, and it's sincere, and it's for the betterment, elevation of the whole foundation. It's not for a person. We learn this, we start communicating at the soul level. We start to understanding it's my soul who has received it, so physicality is just a servant.

It does not matter what stage it is, what we consider it to be. If the desire is sincere, and it's for elevation of another soul, or a totality, it always works out. Physicality is just a servant. We see this on a regular basis. I reach Knowledge Seekers through the wish of the what I call, enlargement, elevation of the soul of the foundation and humanity. And it is always answered. Then we go to terms of physicality, we talk about how it's going to be done.

This is something that Knowledge Seekers gradually will understand. You don't anymore think the same, your soul works to bring the same. It's a very big difference. You say, "I was just thinking about it, or I just felt it." It's not that. It's just that the souls work on the same process, the same understanding, and for the same purpose. It doesn't matter what happens around it. (3:00).

I always said, I know the way to reach the Soul of the Man, and then it's the STM who brings in the dimension of physicality. I came in (to the world) with nothing, and I go with nothing. The whole purpose is to bring that change, to bring that elevation that in the future no man kills. No animal on this planet commits a crime, being, taking from another soul. But this is the whole entirely, understanding of the process of the teaching.

Any other question.

Q: Brazil. .. He says, an immense spacecrafts has been found in some underground in places like Ukraine, Russia, Central Brazil, Antarctica, and others submerged in the Atlantic Ocean. They called them arcs. They were left on the planet millennia ago by another race. They realized that two or three civilian humans with specific DNA, upon entering a specific room could trigger the functioning, with only their presence and mental intent. A sort of shimmering blue plasma bubble was formed, and a sort of Portal was formed, (3:02). through which instantly soldiers who were on another arc, Russia

location, were transported to that arc, the Atlantic location. Are you aware of these facts? Would this be the same technology used in the space plasma unit?

K- Are we being honest? I have no clue what you're talking about. I heard about this things. There's a lot of talk and things. But what you talk is not something out of reality? You got to understand, that when you're dealing with space technology, the way people of the universe do.

They are not just because you saw a spaceship running above Jerusalem, and disappeared. That ?? elevation, which comes from another position universe gets into problem. And what does it do? They don't land on the surfaces, their plan was to go into the center of the earth to see the beauties of the interaction of the fields of the plasma and their system malfunctioned. So, somewhere in between the two, or at the entry and the change of fields, the thing happens. And you lose everything.

This is why going back to the teaching of today I said, we set up a system, which has no dimension of tangibility. That's one of the reasons for it. When you ?? throw in space dimension, you have to accept this pitfalls. You have to understand these pitfalls.

Earth is a beautiful place. It's like you go to see Niagara Falls. (3:04). People of the universe come to see earth, the beauty of it. And sometimes the system fails, sometimes the captain gets, falls in love with a mermaid of the earth, then gets distracted, and the whole spacecraft gets stuck somewhere in the middle of the ocean, or between the rocks while is going to the center, or somewhere else.

What happens with our aircrafts when they crash? We go and find the black box to see what happened. These crafts, now understand we are not the only citizens of this planet, and this universe. Then you understand our visitors crash. The crash with them doesn't come in the form of .. the scattered pieces. It comes with a failure and depends on the structure, and magnetic field is set there.

These are part of the facts of the space travel, and then if you want to add to it, oh yes what happens to you if you got ship (wrecked) on the high seas? You abandon ship. Where do you send it to. When you abandon ship, when you have the rescue teams coming. do the people just jump in the ocean, or you take them to another ship? Would that be any different? When we have a malfunction, we can contain the structure, but you can rescue or move people from one to another. We do it in a normal way, why should it be any different in this position and direction.

It will happen to all of us. This is why we prefer you to understand the position with the dimension, or without the dimension of physicality. Even at the level of the Soul, if you get it wrong, (3:06). you can get trapped in a stone. Now we have a beautiful saying, you know you want to go somewhere, and you get stuck in the rocks. Because even this stone has a soul. Then we say in Farsi, we got a beautiful saying, ?? ?? means he brings the donkey and tries to go to that ?? way with the ?? piece. It's impossibility. You have

now to find a way to create a condition in your system, it has failed. You do not create the fields to be able to move.

So it's normal, but to you, you put elaborations on it, because it happened, it's a spaceship. If and when we find these spaceships, confirms that Earth has been tourist points for millions of years. And not all the tourists managed to get out, sometimes they crash landed, sometimes the system changes fields, or fields of the gravity of the earth creates a condition, that they lock in that position, it's that MaGrav position. Now that we understand the truth about space technology, we have to understand the Totality, and understand is a possibility.

Go back to the teachings over past the years I've been trying to explain to you. We lose many of our earthly beings, in the space travel due to accidents, malfunctioning of systems. Just because you think you've got to the plasma technology or you can fly with a UFO, you have no problem. As American say, wake up and smell the coffee. (3:08). You have to understand there is a failure in every system.

Even if you look at it, there is a failure in the Creator's system, that He setup to be the Man. We are trying to fix it. And it's abandoned ship in this in the U of the Creator.

Don't think for one second just because, because, because we found the space technology now we go with UFO. You have as much failure, as you have with the Boeing Airbus, the yacht on the water, the car on the streets, and everything else which goes with it. It's you who has to understand and accept the risks.

In the past, when we were on a donkey, the maximum could happen you fell off and broke a leg. We went to the cars that maximum could happen, is you crashed the car, you broke your leg, and then you might die. We went with flight system and we saw a couple of shuttles on entry, and whatever, they got exploded. And the same thing happened again. We'll have the same thing with what do you call UFOs to come.

It's a natural process of failures, of the interaction of the fields, then the way you expected. Don't think that space technology will be all hunky dory, that's it, now we travel. Even we give you the shields, we give you the protection, we give the high speed transmutation. This is the effect of the field plasma of the universe, which we interact. (3:10). Nothing is 100% air tight, and proof. As I always said, even the Creator made a mistake, He did not keep an eye on the ball, and led to the creation of the man did all the mayhem we see. If He can still have position to correct, it's for the man ?? and the position of the man, ?? what he is learning and trying to ??

Any other question.

Q: .. Why can't I see a structure in the teaching? Two months ago, it was about learning to go from Gans to matter state, then we jumped to the COHN, and C isotopes, it feels like reading random chapters of a book?

K- Nothing is random, because we have, as I said, a diversity of the knowledge and diversity of people as Knowledge Seekers. In this classroom, we have to teach the children. You know you go to a village with one classroom, and you have 20 children in a village. The school is one room and one teacher, the government cannot afford any more teachers to send. Because all the teachers in the past, and other villages have kicked them out. So they're in that village and they have to go with that.

We have one teacher, and 20 students from nursery, two and a half years old, and the guy who was 18, and going to university, before we ?? invest. (3:12). The teacher has to know how to talk to the nursery, and how to talk to the guy to be ready to go into university. Unfortunately, we have millions of listeners, and we have a spectrum of knowledge to teach, with all of them. But every time we teach, we cover one part, that everybody is learning, but adding to the knowledge. It's amazing how, some of you, to you when you jump to something else. Because in one part, we are making some of the scientists in the Keshe Foundation ready for ?? that space, understanding of gravity. In another part, we make you prepared to understand the structure of the physical matter state. Because those who are working that way, they need nudge up.

My soul is aware of the need at a time, and the place, and what needs to be taught. As I've said, some of you, half of you sit there as, what am I doing here today. But you hear something, and maybe in two years time, maybe in two weeks time, you say, now I understand what that teaching is about, and what it meant, and what I can do with that knowledge which was shared.

It's not sporadic, it's very, very well designed, and it fits into each other the way it is. We have to understand, some of you join us in the nursery level, and you're just ready to go to the second, or the third class. It's the same teacher, but now we're still getting those who come through nursery. And the students sitting in the second and third class, have to listen to what we teach in the nursery. but in that way they look at the new way, in what they were taught in the nursery, but it's the same subject.

We are very structured. (3:14). I don't teach by man, I teach by the direction of the soul, and most of you have understood this by now. I never carry a note. Teaching is a teaching through the soul and a dimension, which is done by the process of the creation, step by step. We are Messengers, we are not here teachers, and you have to teach and you have to follow. As I said to one of our Knowledge Seekers yesterday, or the day before is, you have to be there just to share, not dictate.

The teachings very precise and it's exactly on course. You cannot teach on one day everything, you have to bring that child from nursery to graduate. Just because today doesn't mean anything to you, it means a lot to the people who already been in that process of.

As we said, teaching when we talk with Mosvaq, and he said, he is trying. Now we understand a lot of Knowledge Seekers are there. A lot of KS, some of them, they don't succeed, because they haven't understood, they bring the dimension or physicality into it.

I never use a single note, and the teachings are at the level of the Soul. And as one of the ?? Knowledge Seekers tells you, by the voice, we know if it's a Messenger teaching, or the man. If it's the message. We are Messengers of the Creator and we have no problem. We share knowledge freely, because it's part of the structure for man to elevate itself. It doesn't matter what they try to stick to us. (3:16).

When you look, how many kings and queens, and world leaders do you remember from the time of Christ? You're still looking? Because it's the king of the souls, not dimension of physicality (P). It's the same soul, it doesn't matter which way you turn it? Which name and what time you give it?
Any other question?

Lucid dreaming is really working in the Soul and P dimensions
(3:17:05 to 3:27:23)

Q: .. .Hello. I like to ask about vivid dreams like lucid dreams?
I'm originally from the Dominican Republic. And I live in New York. I'm a pediatrician. I would like to ask about vivid dreams, or lucid dreams for the average person. Like my personal experience, when you mentioned about that, you know, our soul travels every night. It's been very real for me, because I have so many lucid dreams, that I have, ?? these dreams, since I was a child. Like I have visited so many worlds, (3:18). and so many beautiful experiences. That when you talk about that, me being at the nursery of this knowledge, as you just said. It resonated really, about this capacity to travel, and have what I have learned, are vivid or lucid dreams. If you could please elaborate further, I would appreciate that?

K- Let me explain. I have done this before, maybe we explain it in a different way. This is the body of the Man (draws a circle), and this is the STM (draws a dot in center). In different layers of the structure of the brain ... We have different things, memory of the senses of smell, memory of the position, memory of love, and different parts of the brain has different functions.

The soul, when the fields the strength of the skull with the blood circulation, which is very thin, but very effective. When you go to sleep, it changes. So this field (STM) can go up to here (edge of skull), when you're awake, and create a dynamic field flow, a strong containment. But it's still some of it goes through (beyond the skull), that you see as whatever, dream.

When you go to sleep, or ?? wake up ?? see ??? you still reduce the fields, and you travel. But it's a MaGrav system. You come to a position, and you interact with something, and this (STM) has the same back there (in the center of brain). As you give information, you show emotion to this (outside the brain) fields, it could be the mother,

the grandmother, or whatever. It response back. The body of the man has the capability, in the brain, (3:20). to remember, okay, you're with two eyes, you're driving, and you're looking at the front, in the physical dimension.

The body is transferring the information, red light - stop, or somebody got hurt - we can do, or go faster. But the other one, the soul is still working too, and is crossing these fields (Soul is interacting also within the brain), these emotion positions as well.

So, you are registering the physical information, and this (STM) is registering with the same cells, the Soul ?? information. Then you call this, (these registering), vivid (lucid) dreams. Because now, the soul of the cell of the brain, remembers the communication of the soul level. And the what we call, the dimension of physicality, remembers what you see with the eye.

So what you call your dream, now we understand. It's not a dream, man has been what we call, a schizophrenic life. D of physicality, and dimension of the Soul of Man. We call it a dream, it's not a dream. Now we have to understand it, the two dimensions.
It's very much like a woman. Multitasking, doesn't matter day or night, this entity, this Soul of Man radiates, and creates different information and different impressions on different parts of the bank of the ?? sorry .. . You've got to realize something, which is, I tried to explain before, maybe in a much clearer way. (3:22).

Every cell in your brain has a soul. And that soul, and that soul, has the strength to interact with the STM. Because then it carries the emotion of physicality, and emotion of the Soul. This is something that you have, once you understand it, then the life becomes very, very simple.

Your brain is a stereo system, one emotion D of physicality, and at the same time D of the Soul, and the source of the creation. So is it ?? illusion (lucid dream) or you're working in two dimensions. But up to now you didn't understand this. If you become very clever to it, you can do the same too, but be aware of the two multitasking. What Mosvaq said he is trying to do. He's aware he is there, but he's trying to push the opening of some of the others. Some of us we do it naturally.

As pediatrician, you see children are very good at it. They tell you, I've seen something, and they ?? drew something, says something is there. It's there, because they see it through the fields of their soul. And by (being) dependent on a matter of state, the older we get, the more, and more, and more we deceive ourselves from this ?? field. Typical Europeans say, because of their ignorance, they say, "I believe it when I see it."

So it's not ?? elucid (lucid dreaming). Now you have to understand you work with the dimension of both in the same structure. (3:24). When the time of the physical death comes, these information's are downloaded into the Soul. So, when your soul leaves, the Soul of Physicality, or soul of the cell of the brain, ?? memory downloads, passes on, and becomes part of the information of the soul, or it's ?? investage.

You do the same thing. But if you look at the structure of the physicality of the Man. You have your reproduction, at this end, it continuously transfers, you call it the RNA or DNA, the soul RNA to your next generation, that is not just that you carrier, transfer, RNA of physicality, and RNA of the soul, or what do you call, the information of the RNA, physical life. You download the soul continuously. The information the soul has gathered from all dimensions into your next ?? ??

There is a reason why the physical life on this planet always has two ends. I explained this, the Soul of the Man, and the soul of the little ones, we call your reproduction ?? . It creates that (draws Infinity Loop interaction) to feed, to register, to memorize. And to create the condition of position, you call it RNA and DNA. But the same thing exists in the D of the Soul. You have a dimension of how physicality has to be in dimension of the Soul, when it manifests itself. We have a lot to learn, and you don't lucid dream. Now you understand, you're working on two levels all the time. (3:26).

It's us to understand which, and how it is. I live in that D ?? 90% of the time. Even when you ?? write to me, I'm awake, (but) they tell me I am asleep. I said, no, I was awake. They say, you were snoring. Yes, but that's the physical side, but I'm busy doing other things. And then you have to move the physical, not to snore, or move something, but in fact, you're working in your D. 90% of the time, I physically look, or asleep, ?? and they tell you, I say, I don't know. Because you're supposed to hear us. But I don't hear it, because I'm too busy doing something else. It's a 24 hour work, it doesn't stop.

Then when you go into the D of ?? , oh, it's already arranged without the soul's ?? ?/ do this, and it's done. We do most of the work as they say, behind the curtain in the dimension of the Soul.

Thank you very much. Can we call it a day.

Thank you very much for today, (3:28). I hope we learned a little bit more and we shared a little bit more. … how we can bring about the .. after the addition of the knowledge.

I just received a note from the Keshe Foundation management team. And just to remind you, that … the first three workshops are in English. And but since the teachers speak also German, they can have the workshop in both languages. So even those who do not know English, but just speak German can participants.

I don't think language has ever been a problem. Keshe Foundation on these workshops will find a way to do it. Thank you very much. The example let me explain to you, when it comes to the soft artwork. The Artist is Romanian. So if you're Romanian you can participate, if you don't speak English. You're the your teachers is fluent both in English. And we have artists from around the world who join us in these teachings and workshops and language be bad.
Thank you very much. And we'll see you next week.

432 KSW May 12 2022.

ENGLISH TRANSCRIPTION

(Part 1 proofed)
(:10).

K- Good Morning, Good Day to you as usual wherever and whenever you listen to these series of Knowledge Seekers of Keshe Foundation, Spaceship Institute teachings and knowledge sharing. We welcome you back for 433 times in these series, and many more in other parts in sharing knowledge. And hopefully, we learn a little bit more, we shared a little bit more, and with it we establish new ground.

For today, brings a very fundamental point of discussion for us now that we are ready and we're setting up the systems for flight into space. Man has always seen the fight in the rockets, and spaceships, and UFOs, and whatever, the kites and air balloons. But man has never considered, aw we said many times, that he has never traveled the span of the universe (U) through the Soul of what we call, the dimension (D) of his existence.

When you come to Keshe Foundation Spaceship Institute exhibition center in the next weeks, you will see the new space develop, you will see travel through the Soul of the Man (STM). Rocket propulsion, UFOs belongs to the dimension physicality (P), limitation of time, space, speed and the rest of it. (:12). Where the new technology brings a new dimension. Transmutation of the energy fields of the universe is the topic, the subject, the all understanding of the new technology.

You still want to travel with your physical body to confirm you have, but you deny the travel of your soul. "That was a dream, something happened, something I felt." We have become so materialistic, that even we lie to ourselves in what we do internally. We call it

a dream. In a way, we have forgotten about the captain of the ship, and we sit with what we call, the pilots, the physicality of the man.

The new space technology, that many of you have no choice, but to interact with in the coming weeks in the centers of the Keshe Foundation, is the new dimension in travel. The new dimension in existence of man in space. These systems are getting set up. These systems are not dreams. These systems are not a theory. These systems are not what you thought one day (will happen), that day has arrived. You are part of it. You have become part of it. You have joined a revolution in science in the education of man, and the U.

The new systems which you will endeavor to walk in, will bring you that new dimension. Now, you can put the body in a car to get to it. And when you get there, you take the soul, and take the body with it when you want. (:14). In a way, you go to the airport to give your physicality to another man, to take you where is predestined for you. Now, you take yourself to the enhancement centers, and then you become the captain. Nobody can tell you where you can go, where you cannot go. The banking system controls you that way, in what you can use, and when you cannot use, and when you can. As one of our Knowledge Seekers (KS) was pointing out to me a few days ago. Now, you have no banking system, you have no limitation of which airports you can land. Do you have a visa? Do you have a passport? You're an immigrant. You're a refugee, and the rest of it.

In next few days, next few weeks, as we develop these technologies and we assemble the reactors for the space development in the level of the fields of the universe. Mankind has no choice but to face the fact, the new era in a cycle of the knowledge of the man has arrived. We have taught you for years, in the fields of making Gans's and the rest of it. Now we go back to what I emphasized over and over in past years.

Be happy with your MaGrav systems where he can physically touch them. But be happy with the fields, which of MaGrav system makes, that allows you to travel the span of the universe. We gave you the universal generator, and you've got stuck with a few voltage and amps. Now we have put these into operation, we have brought the knowledge of the teachings in past decades into operation, that man has the capability to fly through the D of the strength of the Soul of the Man, or what we call, the plasma of the existence of it. (:16).

When you have the sun, the sun does not shine anywhere in the solar system. Unless it comes and interacts with another fields, that the interaction of the two manifests the existence of the Earth, the moon, and the rest of the planetary system. So is the STM. The STM shines, and when it comes with the interaction of the Soul of Physicality (STP) in the D of the Inertia, and the magnetic gravitational (MG) fields of this planet, manifest itself as the embodiment of the man.

When we take the sun away, that has no fields to interact, there'll be no existence of the Earth, the Man, the Moon, because it cannot interact with. Because it never came from the source, that it was supposed to build it. Now, you become that sun. In the new

dimension, you decide in where, which position in the universe, or the dimension of the interaction of the fields with the others, you manifest yourself as Mr. and Mrs. Smith.

Then it comes to us to understand, would my field interaction in this environment manifest as me, as a man, and in the other position in the same solar system, I behave like a plant, and a tree, because the field strength is different. And in another dimension, I become the field of the plasma without dimension of physicality, or maybe single singularity and become an ?? homit.

The teaching has brought us to this point. (:18). And the reality is that, the technology, the knowledge, the science of it exists today. If it's used the correct way, will bring a new dimension. If it goes the way we see, that the Iranian government through Sepah, and the Revolutionary Guards, are developing what they call, nuclear magnetic plasma weapons. Man, will see the end of his life cycle, the demise.

I explained this to the American ambassador's office yesterday, and we make it very open. The new space technology, the new understanding of the plasma technology, is and will be enforced by the Keshe Foundation across the world. Because if we allow the Iranian government with the new what we call, plan to develop with plasma, enhanced, using the Keshe Foundation technology, will bring the demise of nations.

I warned the Iranian government to withdraw from such a research and development. The whole purpose of the evolution of the Soul of the Man is to make man peaceful. We have to understand, we have to be aware, that we brought the knowledge for a peaceful application, and not the conversion into weapons.

I have a signed agreement the Iranian government signed and sealed by the parliament of Iran, that technology of the Keshe Foundation will not be used for weapon technology. And the soul of the knowledge will not allow that. (:20).

We have to understand, when the man is tied up to a corner, and the other one has a tool, they compromise. And we see that in the past few weeks, and the knowledge and the what we call, the development of the Soul of the Man through the Keshe Foundation has to be kept entirely and in totality for a peaceful application.

I warned the American ambassador's office yesterday, directly to the ambassador, American Ambassador to Vienna. We warned of new structures, which will use the Keshe Foundation technology, which should not, and should not be used. But the desperation of the time, of the Russian Government, and the push to achieve the annihilation of the State of Israel, with the pressures on Iran, will bring the two devils together. This will become extremely dangerous for all of us.

We have to understand, we have to allow in new few days, that the new space technology developed by the Keshe Foundation, to be, to come into operation as a flight system, has to be, and need to be, and it must be completed. As the Keshe Foundation team is doing,

as speedily as possible. That we change the course in a very, what we call, neutral way that all nations have the benefit of it.

As I said, we do not need landing space, we do not need flight, what we call, landing position. (:22). We can be in the center of a stone, and take flight. We can be under three blankets, and two beds, and ten floors under the water, or in a deep mine. We'll still go to sleep, we'll still dream, and we allow the Soul of the Man to travel the span of the U.

This is what the new space technology, which is in the hands of the Keshe Foundation Scientists, and it's becoming to its assembly point, is. Does not matter where we put the Enhancement Unit (EU), in the center of a star, in the center of a stone, in the center of the brain of the man. Man will be able to travel the span of the universe the way he has done in the dimension of his soul.

This is part of the totality of understanding of what we call, new Era, in the D of what we call, present existence. Today, I brought this subject up, because we've seen, we understand, that the interaction of the fields of the plasma, creates a dimension of existence. It brings what we call, a new structure in understanding of the knowledge of the universe.

We have to be able to understand. It's not the old time, that we bring someone to interpret our dreams, what does it mean? We have to understand, we create that dream, (:24). we are in charge of it. We are responsible for it, we see it, and we implement it.

My dream is peace on this planet and beyond, and I'll achieve it. Your dream is to have a warm food sitting next to your mother. You have to be able to achieve it, now that you know you're the creator of it. You call the mama, and say, mama I am coming home, cook me something, I want to eat with you. Now, you used to do it, and you do it on a mobile phone. But this mobile phone does not work, mama changed the dimension of physicality years ago.

Now you have to communicate in the D of the STM. Now you understand even why we brought the communication, the way you call it, "mobile phones, internet," for you to gain trust in the knowledge, that you can communicate without standing next to each other, and from different positions in the planet, because now you use physical materials. Now you have to learn, you have to accept the new D, that the transportation and communication in the D of the soul has no mobile phones and no internet. It has no servers, and it has nothing else, because all of it sits within the dimension of the fields of the universe.

Mankind has reached that point, mankind has no choice, but to start using what I call, "the soul mobile." And at the same time, the problem with the new dimensions of your mobile phone is, (:26). you can carry the voice, maybe sometimes the emotion in reality, but it cannot carry the physicality to be there to enjoy. Now with what I call, the transportation and transmutation of the soul, you can do that. You have the capability to

send the voice and the physicality together, to enjoy the time, the space, and what we call, the joy of existence in the dimension of the creation.

The new Enhancement Unit, which are coming into operation, are set in pairs in two's, that we can even transmute one soul, from one to another, to confirm the transportation and transmutation of the fields of the universe. You have noticed in Linz exhibition, we have two sitting next to each other. One in a dimension of the Soul of the Man, and one in the D of physicality of transportation and transmutation (T&T) of the transfer of the fields into matter state.

In the coming time, we'll fly from the depth of the, what we call earth, not on landing strips of the airports. In the past few, two years, as I traveled around, I've seen airports empty. We were the only plane taking off and landing. This will be the situation with all the airports man has made in a very short time, because nobody will use them. We don't need aircrafts to land. We don't need immigration. (:28). We don't need passport control. Because in the dimension of existence of the Soul of the Man, there is no borders, there is unity. In so many, One Planet, One Nation, One Race extends itself to one universe - one race of the Creator. This is where we're taking the man. If you stay in the dimension of physicality, you go with One Planet, One Race, One Nation. If you go to the D of the soul, you become one creator. And that's all, as there are no nations.

Now, you understand how fast in the coming weeks, the Keshe Foundation will take you to that D. We will see opposition from the governments to the work of the Keshe Foundation. We'll take the challenge of every nation, as we carry the citizens, and the government's are nothing, but elected by the citizens of this nation. The opposition to Keshe Foundation in a very short time will become immense by the governments, who now see the loss of control of the central banking, borders, wars, and the rest. As you can go and see the uncle in New York, and together we travel to Paris to have dinner with the aunt. No one can control, no borders, and we carry one currency in our pocket.

The totality and understanding of the new breakthrough in science will be amongst you, and is amongst you today. (:30). The reactors for the space travel and technology is partially and in totality for the control, been manufactured and is ready to be tested. We are not talking that it will come one day. We told you for two or three years, for 10 years, the teaching. While we were teaching in the front, we researched and developed in the back. And now it's time to bring you to see it. We might not even reach the 6th of June. We might reach the 6th of June, might go beyond the 6th of June. But the systems for the space travel are already set to go. But is the mankind, are the Knowledge Seekers ready for this change, that they can bring this change to their nation, to their, what we call languages, and to humanity.

In the next few days, when the first tests are carried away, we will see the change in the dimension of many world leaders, as we will enforce the peace through the new Enhancement Units, which works through the Soul of the Man.

We will bring a new understanding to the operation of the what we call, one system. We will set these up, and in turn we'll hand over this to Universal Council and the Earth Council, that the soul of the two councils will bring the balance to man, (:32). in connection with the rest of Universal Community.

In so many ways, on my passing, the Soul of the Man will become the soul of the joint of what we call, Universal Council and Earth Council, where the Universal Council is the soul and Earth Council is the STP in the dimension of existence of the man. We make man to be one, in the a dimension of connection of the unifying soul of the Universal Council.

Now you see all the teachings, all the structure put together, now it's coming together to operate, to be ready to go. You thought we set up the Universal Council for this and that. You thought we teach this and the Soul. Now in the operation of the coming time, they operate together, they unify together, and with it, they bring the elevation of the "soul of the Lives on this planet," be it the man, the beasts, the tree, and the fish.

Now, you understand how cleverly we have brought the whole structure of the teaching, the knowledge, and the science, and theology together. In a next few days, Keshe Foundation will take control in the soul of the operation of the Universal Council and the Earth Council, to start the process of transmutation, and enlargement of the what we call, "the dimension of the understanding of the man," about his responsibility in totality, for this planet and beyond. It's not any more global warming, (:34). this is a global souls interaction to warm up, to understand the changes, which has been brought for man.

As I said, no being will sleep hungry, be it the child in United States, be it the child in China, or Africa, be it the child of a lion, or a tiger, or a fish. Because the elevation of the soul is in totality. The knowledge of understanding to receive the essence of the fields of the universe, through the new understanding of the work of universe, by the STM will compensate for the shortfalls, which this planet created for millions of years, that pushed the man to kill to absorb, to what we call, replenish life. All the beasts.

The new Enhancement Unit for flight (FEU), which is put into operation initially works with no physical D. The new enhancement flight unit for souls will be tested without Enhancement Unit physicality. Now, that we tested, it is getting tested, it's getting set up to create that first. People who are in the Foundation, who are responsible for this operation, they are working on it, they are putting it together. When it comes to operation, we shall see Enhancement Unit with no physicality.

We test in the D of the Soul first, (:36). before we bring it into dimension of physicality, that the man is happy to see it, in something. One day, the Keshe Foundation will release the picture of these systems, flight system without physical boundaries, flight system which has no box. These are not theory, these are getting built and put together today by different research teams of the KF. And you will see them in the coming time.

Man cannot have physical dimension, if the soul does not allow it. And would we see the point, that the system will create its own physical manifestation.

We do not teach this technology outside the Keshe Foundation research centers, because the man is not ready for it. But we will show the effect of it, the work of it, in coming days. As I said, You were looking to get into a spaceship. We were looking to get into dimension of the work of the Soul. And now the systems for it are all set to go. This could be a shock to a lot of you, but this is what I came here for. To move Man from the dimension of physicality, into the dimension of the fields of the universe.

But even with our Knowledge Seekers and research team, I take them step by step, as they think they're doing it, and encourage them, and we show them, and we push them to where we want you to be. Where we want to gain access to that position, that man does not depend in the dimension of his physicality. (:38).

It'll be fantastic when you walk into a space, and not into a machine, and you can travel the dimension of the Soul across the U. These systems are already set and a mass production on these is in progress. This is the first step for the Man. Many of you as a scientist and Knowledge Seekers, will develop this technology according to the understanding of the time and space of the man, whose ultimate position for the Universal Community and not just for man. As you become more aware of the knowledge of the universe, the knowledge of physicality, which is open to the man.

We have called for the end of the religions, that no man can be abused. We shall see the end of all religions, because now man does not need a Messenger, when he has access to Totality through his own Soul. We call upon Ayatollah K f Iran to resign. We call upon the Pope and the structure of Vatican to fold. We call on the Jewish leadership, to close shop. Bring all the theology to one, to understand, the new understanding of the Space Technology. That now, you all have access to the knowledge of the universe, and we do not need Messengers, as the Messengers are also in the dimension of understanding the fields and operation of the U.

When we wish it, we get it. (:40). Now I wished it, and I will get it. As we all say it, "my wish is my command." It's time for man to evolve in the knowledge. It's time for man to enter the dimension of the knowledge of the universe. It's time for Man not to be shackled, with what I call, with the financial and living structure of today.

As I said, we still create the Enhancement Units, we still keep man busy with other things, and we keep man working, because what do you do, if you don't have a job. But man should not suffer in that position and that space and time. We bring the changes in small steps, and those small steps as a giant leap in knowledge of the man has started. Do not be surprised if you start seeing pictures, or videos of the new what I call, flight systems with no physical dimension.

In the coming weeks, Keshe Foundation will release these pictures. In the coming weeks, we'll show you how we had to use the enhancement systems to hide it, for you and for the world leaders not to have the time to interfere and damage.

The new Enhancement Units, which are about to be tested, without physical boundary, (:42). in a way, without what you see the shell, will start not only for the KF, but for the soul of humanity. The preparation for bringing that soul to the D of physicality, making the things for it to be done, was done two years ago in the Keshe Foundation. But step by step we have brought it forward, that it fits the knowledge and people can understand the steps of it. We have created Gans's that brings that dimension of the plasma, without the physicality of life. And now we apply it.

We do not need astronaut to test. We do not need pilots to test. We have made structures, materials, sitting in the labs of the Keshe Foundation for two years, ready for the start. And yesterday I made instruction and the structure for that test to start. Where we will connect to the D of the Totality of the man as an independent soul, and it depends connection, with the physicality of the man, through his blood. Do not forget all the beings on this planet are 99% the same, because they all came from the production of Gans's of Physicality, and the amino acid (AA) of what call, the atmosphere of this planet. (:44).

We see the time for all of you to start speeding up and understanding, if you want to be the passengers of the U. In the dimension … which is going to hit the man, as I said last week, like a Juggernaut. And I'll tell you one thing, this time that Juggernaut is the size of the spaceship, and this time when it hits there will be no spaceship, but the understanding of the Soul of the Man, and the passengers of the spaceship can still fly.

It is the responsibility of Knowledge Seekers to speed up their own understanding of the operation of the Soul, operation of the fields of the energies of the creation. As I said and many times referred to it, even with what we call, the ?? man who could not understand when you turn one magnet, or one electron, the other electron or other atom rotates.

So you have to understand, when we turn the Soul of the Man to the new dimension, the Soul of the Physicality of the Man will turn too, and will be elevated. The new strength, to keep the same position and D, and to be able to manifest itself. And now as you understood before, as we said, (:46). when the new strength in the ?? evolution of the Soul of the Man comes and the turn in that direction takes place, the Soul of the Physicality of the Man has to change position and direction. Now, you understand why I said, that the physicality of the Man in the coming time will change, through the new understanding of what it is, the new teaching.

As the soul evolves and strengthen in the D of position and change, the STP will change with it, and with it will change the physical structure of the man on this planet. We will have no mouth to eat. We will have no arms to kill. And we have no sight to see. But we will feel the images and the fields of this planet. The way we stretch the cells of the body of the man, to make the transparent, and make the eye of the man. Now we go back that

man can see without the eye, can feel and create the dimension of understanding, in the D of the STM. I wonder how many of you have seen the eye of your Soul, that in seeing your mom and dad, sitting and having food with you, after 20 years of ???

Hopefully, by the 6th of June, we'll break that breakthrough. You were waiting for man to fly to moon, 6th of June, I give you the systems that flies you across the U. By 6th of June we'll bring that change. It's the time to move from one to another to bring the knowledge to man. (:48).

The systems for elevation of the STM. The systems for testing for the elevation of the understanding of the soul of humanity, and the passengers of this spaceship of the Earth, in its own village, will start from the 6th of June, and before.

Collective soul of this planet will run this planet, in the D of the systems, that will be divided amongst you, that the balance of understanding of the knowledge, stays amongst the Totality, not in the hands of a few, that in the future, they becomes in new priests and the religions, and the rest of it. We close the door of abuse. The only way you can be abused is by yourself and your own conduct.

Amalgamation and what we call emergence of the two sides of the Keshe Foundation, the science and theology, which stays the ?? elevation of the STM through Universal Council has started, and will take shape in a beautiful way. It's for you as KS and citizens of this planet, to decide in which way, as a totality of the soul of the planet, would like to take humanity, and the passengers of this planet with.

Many of you thought the UC was a joke, and just something to be. Those who betrayed it, and those who are there for their own what we call, clandestine activities, all have left. (:50). Those who come to abuse it, will abuse themselves. Because now it's not one anymore, but it's a totality, and that will keep the whole of this community of the man intact and in check.

In the next few days, when we test the enhancement knowledge without boundary, you will come to understand the changes, which we'll bring. We can take these systems to the depths of the ocean, to the deepest part of the mines of this planet and still fly, still allow the Soul of the Man to take whatever its wants. The way you can dream, it's the ?? deep in the submarine in the depth of the ocean, or on the jet planes in the highest level the man can go in the Space Lab. There is no place for the STM, not to operate. Now we have created a system, which creates that condition of the Soul. Then you understand why we brought the creation of Mitra in the dimension of the Soul, and not in the D of P and then became the shape and D of P.

Be ready for the change, in the next few weeks, we make you're more ready for that change to come. But we still carry on with everything else we do. Otherwise we have nothing to do. Man has to be busy to make something, or to do something. When you're in this dimension of physicality. Move to dimension of the Soul, and the universe is your

oyster, and you're the pearl in that oyster. (:52). How would you like to shine as a pearl, in this beautiful giant oyster of creation.

The teachings are taking a new direction. The teachings will take the dimension that you can see. We showed you with the Gans's We showed you what we call, MaGrav Units. We showed you the what we call, dynamic systems. Now in the coming days, and weeks, you will see that flight Enhancement Unit with and without dimension. We'll see how the two interact between each other. The Keshe Foundation Centers will be equipped with two of each, without D of physicality, and with D of physicality Enhancement Unit, and see what mayhem we shall create in the dimension of the, what we call enhancement of the soul of ??

How many of you will walk in as a man, and walk out as a what we call, Universal Community member. Now, you understand why and how we are pushing for this development to conclude as rapidly as possible, that the progress and the development can be to the benefit of mankind

I welcome you to the new era in the world of science and technology, in the D of the fields of the universe, rather than the matter state of the U. I hope you enjoy this trip. We are not going to build systems for you. (:54). In front of you, without your knowing, we have built the systems for you. Extremely advanced, extremely capable to do everything, but it's you who has to tap into that knowledge, it's you who has to tap into that energy and see the elevation of the man.

The Soul. The beauty of it is, with the new EU with no dimension, you can take 2 members of Universal Council to be together, and 10 in the other, and in between the two, change the D of what we call, the soul of the Creation. There are no chairs in the new non-dimension Enhancement flight Units.

Now guess how many souls will be able to carry each? Today I brought you a breakthrough understanding, and what is to come to you next few days, and the next few weeks.

Many of you brought changes, seen the changes in past few weeks. In past few years, and past few decades while the Keshe Foundation has brought in, and what has become gradually part of the normal of the science. But now we're bringing technology that does not exist in all ?? the sciences, (:56). and because of it and through it we'll take the leadership in bringing peace and prosperity.

We call on the nations to come to peace. Now we force nations to peace, but the whole of mankind has to be there, for it to become peaceful, plus the citizens of this planet, including the animals, the trees, and fish, and the rest which ??

I hope you're ready for what is going to hit you in the next few days and weeks, and I hope you understand the gravity of what is being brought forward. One day I'll explain the significance of the reasons behind the choice for 6th of June. Then you'll understand

why, and how the whole thing has taken shape in that direction and D. Thank you .. be ready, and prepare yourselves for what is to come.

(:58). **Proofed to here** >>> continue

Go for a break. (1:00).

<< BREAK >>. 433 KSW (1:04).

Research on viruses - Herpes (because not allowed to do on Corona)

K- .. Before we start this part of the teaching. … KF is involved with different universities in different part of the work. One of the researches we started with Corona with one of the leading scientists in the world to do the research, was that as Corona virus was not available to more or less to no one, we had to test and ask the universities and scientists to test different viruses in the full university research development structure with the permission and license to do the research, using the KF T and materials.

Here ..

A number of these researchers following expansion of science foundation with viruses has come to conclusion and after a year, scientific papers for them are ready to be published in international journals. One of the things which we looked and was founded finance to test that it was parallel and very similar to what we call Crona was a research and development in herpes. As you remember, some three four years ago, one of the journals of the Keshe Foundation plasma time, I released papers about the work of the herpes in the body of the scientific data. The research paper is 100% unconvincing and completed and confirms that specific new mixtures of cancers has reduced the strength of the wireless by 1000 times. If you have 10,000 viruses, now, it drops by three zeros to 10. The scientific paper will be published in one of the leading journals around the world in the coming weeks as the final part of it is ready for submission. We have already seen this work in other dimensions. For this reason, Keshe Foundation has launched and will launch in your work in this dimension. And what we call the Keshe Foundation on the commercial side will provide systems that most all of you can purchase through the Keshe Foundation as part of the international Test Track And we collect the data for scientific confirmation of the paper. In a coming short time, Keshe Foundation we launch on the same business of same technology confirming the safety of the gases we produce which has already been done for the skin radiation in China and new are we launch this

new products for what we call the tip the lip and the hill we try to see the influences of the plasma, on tip would you call me grain if you the lip, as we see her piece, usually on the lips

Mr. Keshe 1:10:55
and the hip is for the cycle of the pain, most of the women go through menstruation these are not digestive system, these are to be used on the skin only and nothing else in is by agreement is by donation and is for you to accept to be part of this, what we call trials or testing that we can gather in what we call and your own time, we are all the time, we are all responsibility to test and report back. We have brought in people in the Keshe Foundation which will immediately connect and respond to these what the trials we do not enter in any shape or form in any other direction. (1:10).

Here >>

. This is literally for you to donate for the research to be further evaluated, and is not for you to drink it. It's a non drinkable product. It has to be used only on the skin, and then you send your report back. What do you see, how fast it was effective. If especially you've seen the herpes back after two or three times of use.

You have to understand the herpes as a virus goes as we explained, on the middle (layer of) the skin, and as the skin is part of the pain, we have seen as part of the scientific research in the past. A large number of people have herpes ?? around lymph's, and the it goes with Alzheimer's, because it then effects that layer of the skin we call, next to that.

So, in the coming time when you go to the Keshe Foundation, what we call, website, fill in the form you make the donation, and the Foundation apparatus, which is set up will send you as a free gift, for you to test the what we call, neural ?? ?? but you have to fill in the form, and you have to keep to it, because this data is important.

It's a limited number of this are available, and we expand it, if the Research Data comes as it's expected and we publish it. Do not forget that the Keshe Foundation, as an Institute and Keshe Foundation as the scientific journal, we publish our own work, and we do our own structure of work. As an international organization, there is no boundaries for our work. (1:12). And there is no limitation for you to test the new dimensions in the gain of the knowledge.

The scientific report comes from one of the leading universities and one of the leading scientist in that university, has done the research with a collective number of other scientists in this university. The papers that will be published, will be published will likely be published with Keshe Foundation Plasma Times.

This is another small step towards the handling of the next tests, of officially done by universities, international institutes for handling the viruses in the space. You got to understand we cannot take waters to the space to overcome by this. We do these tests to understand the fields created, to be able to make systems that through the interaction of

the fields in the universe we can overcome, and build these in our systems to overcome viruses.

In a future space units, viruses will be introduced as part of the structure. Viruses as fields, not as a virus. Which means that in the future space technology, any viruses in space will be absorbed by the system, that it never reaches the man, or if the man absorbs it outside the flight system, can pass it on to the system to absorb it.

This is part of the further development of KF research in deep space travel. If you decide to travel with a spaceship, or you try to travel with the soul. Either way, even the souls can be interacted, and they become in interaction, as they themselves are made of plasma fields, with what we call, ?? loose fields packages of U, we call them the viruses in a universal language. (1:14).

So we enter this new era, with the scientific papers, which are done, the research was completed, that with your help and your cooperation, if you suffer from especially herpes, and you know other people with all these things on their lips, and seen very often, and they ?? when they just need to kiss a child, and they pass it on, and damages that child for the rest of its life. These now can be tested and then will come as a product in the next few months and years, of the Keshe Foundation for this purpose. And but now we're going through the what we call testing and trials. You are the, you volunteer yourself, and you test it yourself. And we at Keshe Foundation, let us know, as it's done now by the universities. The same is with tip lip, and hip, package, and let's see how much knowledge, how fast you can respond back to us.

We need to collect this data with a limited number of items will be available, to see what will be, what is the indication. We'll keep you posted. As we say this, this test now directly will be monitored on hourly basis, by the Keshe Foundation, which we put the person in charge, to see how the volunteers will react and what they report back to us. And this will bring (an end) to three, of what I call, menaces on this planet. We see many people suffering, but ?? ? ? understanding. Then we pass this into the world of pharmaceutical, let them to come out with the international distribution, and commercialization.

Any other question. (1:16).

R: … I was just showing briefly the website from the KF Wikipedia. It's actually an article from KF Plasma Times of January 2019, with your article about the viruses, energy packages of the universe. It's quite involved there, people can be posted the link people can check that out. As a prelude to your current research that's ongoing in this topic.

All plasma devices create M fields that interact with environment

Q: … Salomeea, (1:18). … I have a question regarding Cup of Life and about the influence of this MG fields on our electrical installation, or if there an interference or something? What is the impact on this? If there is one? Or if it is not?

K- All the Cups create M fields of different strengths. And if the strength step up, or step down, matches the electric currents, or plasmatic currents of the system, within it, they'll interact? Because electric current itself is a magnetic field. So, if they find matching point yes, they do. If they don't find a matching point in the strength, they don't.

So, it's expected. This is one of the reasons we always put the systems in the middle of the ??? I have seen many Knowledge Seekers put their (5) Stacker Unit against the wall, and your light, or plug, or whatever, you create still everything. But you have interaction and ?? what I call, ?? what is passing .

Impact of Plasma according to what you need - Nothing is negative

Q: I was asking about the impact, if it is positive or be negative?
K- The impact is according to what you need, or what you have done. Nothing is negative? (1:20). Nothing is negative. Nothing in the structure of the plasma is negative, always there's a balance.

Iran to develop plasma weapons - soul of system knows how to use

I was talking to one of the leading Knowledge Seekers about the situation that has arisen with the American ambassador, yesterday in Vienna. And a situation that we see. And the scientists are heading for using the new plasma technology (T). And the question raised was, they are using plasma, they're using, creating a technology out of plasma. So, the soul of this new system should know what is correct and protect.

Now, the use of the technology, as you create a plasma, which has a central control and in a way, has emotional interaction, would it lead to destruction and annihilation? Or would it bring a new cycle? Would they Iranian soldiers and the Russians when they use it for first time in zones in Ukraine? .. Would we see a new dimension, where the system used to annihilate, creates new life. Changes things. A new dimension. The wish of the technology, this technology in exchange for peace, we have set our course

Would the interaction of the fields of the environment, will bring that change? The understanding of the technology in Totality is paramount. (1:22). then just picking up the part, which suits and fits you. Because when the reality hits, it might not suit for you ?? ???

We have seen this collaboration between Iran and Russia. When a drone was captured, technology was shared with Russia, and machines captured the what we call, the most advanced ship. I openly came with this, because ??? the American ambassadors office, in the American government is listening onto the line. Do not make the mistake to

overlook, and oversight the situation. The same goes with the state of Israel. The same goes with Iran.

New weapon technologies using the plasma the way we have introduced on this, will ?? not create damages. Because it works different way. It's setup a different way. The Iranian scientists will shock them, ?? with what they heard, or what they might have achieved application of it.

Americans warned to collaborate with KF as fast as possible

I warned the American administration, collaborate as fast as possible with the Keshe Foundation to bring this to an end in a very fast way. And I warned the Iranians in the same way. Do not take this path, because you open something, (1:24). which is to the benefit of the Foundation and the work of humanity. But you do not know how to control it. The interaction of the fields, as just been said, with the what we call, ?? ?? transmission ?? systems across the countries, can bring a shocking news to many nations at the same time.

This is what Prime Minister, Netanyahu did not understand, when explained that using the technology, he was showing the Keshe Foundation apparatus, in an Iran weapon technology. This is a massive energy source. My biggest fear is, if it is used, that would there be any transformers, would there be any power stations operating, after that. Because we've seen the effect of it in Sanya, in South China Sea some years ago.

You stay connected with your Cup - when giving it to others

Q; If we offer this Cup to somebody, I mean not the content, but this instrument with, which made the MaGrav, we will still have in the house this magnetic field. Will it remain there forever or we will .. ?
K- It's connect, it is connected. Once you establish, a magnetic field is connected. It cannot be broken. When you make a Cup for someone and give it to them, that cup is connected to them, and to you at the same time. (1:26). Even if somebody gives you one of the Cups of Life, and then you have it at home, use it a few times or whatever, and then you give it to somebody else. Now it's connected with both places. It's a field connection.

This is how in electrical circuits we see the lines to be Nano coat We don't Nano coat the wires. Plasmatically fields move and in that process, move atomic structure to separation, and what we call Nano layers. And then the outer boundaries of these layers, in conjunction with interaction, let's say with a salt in the plaster, or a mixture with salt from somewhere else, or the salt within the plastics, which is produced, will lead to a generation of Gans's, and you create a local energy system. We've seen this in many, many systems.

The more, if you put for example a MaGrav unit, or Enhancement Unit, or Cup of Life unit in the house, cut a piece of wire before you started, and hold it outside the house.

And then when you put a MaGrav in. And then cut the same piece of wire, which is part of the house six months later. The color is not the same. It looks Cu, but it's not, the shine is different. Because the first layers of the Nano materials, where plasmatic conditions have been created.

Any other questions?

Q: .. (1:28). There is a lot of hypnosis investigations, recorded, and shared by way of the internet regarding different creatures from the universe. I would like to know from your knowledge about the "E-Lokhem" or maybe those who pretend to be "E-Lokhem." And what is "E-Lokhem?"
K- What are you talking about, I never heard of it.
R: .. it's basically god's or it's related to the Hebrew word, meaning gods or entities. Maybe it's pronounced differently than I say it. Elohim I'm not sure.

K- Yeah, in Farsi, we have a word very near to it. It comes from "connected to God", "Elaheem" which means, "from the Creator." But I do not know what he's talking about. So I cannot answer you.

R: Well, as is a Hebrew word meaning gods and but usually, in the Hebrew Bible refers to a single deity, not gods in plural. So it's like you say, coming from God. In any case, these apparently like (1:30).

K- It's the same word in Arabic, which become Allah, which means God. It's the same derivation. We have it in Farsi. it's the same thing, but again, it means, the Creator. But put it this way, what ever you dream, even in the D of the Soul, created from interact of M field, that M field has come from source of Creator, in some different strength and D. So you can always claim it. We don't have out of nowhere, a M field created. We don't have different races of God, if you put it that way. When you say, which God has it come from. One comes from one source by interaction, or by whatever.

Electronics wind coils transfer energies

In the electronics we create coils and we wind them over each other, and we transfer energies. It's the same process in the world of Creation. Different field strengths in interaction create new dimension, and sometimes current. So, we are always connected to something, somewhere. And as we all come from one field source, oh yes, you can claim, yes.

Many of you will become angelic when enter EU

R; Some of the definitions are for powerful angelic beings who have been contributing to the process of Creation ever since the beginning, (1:32). or created spiritual beings with moral judgment and high intelligence but without physical manifestation.

K- Many of you will get to that point when you go to non tangible EU system. You'll all become angelic. That will be very interesting to see.

Any other questions?

Q: … You talked about the bonbon that you put in the mouth to change the emotion. Is it available sometime or not?
K- It will be in that process in the coming time. Even that is there an intermediary step. Any other question?

Q: … Are the trials for people with herpes, is this program ready to go? My partner and I would like to be part of this research.
K - Go to the Keshe Foundation website, .. ??? they should be launched in next few days we are waiting for some clarification from the authorities and then yes anybody

Here >>

Do not drink these waters. These are just to touch, (1:34) .and research scientific does prevent the patient from a Chinese researcher we paid for it that our materials are safe for the skin so please do not accept anything anybody else kills you or whatever because we don't know what is involved we know our products we know what we're doing we know the mixture of the things we produce many of our workout gases are not in public domain. So you you will not see what was expected and it's not just somebody here that didn't they tried whatever

Mr. Keshe 1:36:42
trying to but you have to go through the what they call the process so we're not selling products is for you to donate to and test it yourself and report back in what do you see is an active how effective and how it does but this is collecting data to go back into the what we call the next stage for the call Cup of.

Q; .. When is Mr. Keshe going back to Iran. He mentioned a year ago he would go back after Iranian election in 2021. And even the resident was allocated to him, residency or something?
K- I am an Iranian citizen, I do not need residency. We are in talk with Iranian government for my return to Tehran. Our office in Tehran, till last week, (1:36). They went through a process with the Iranian authorities, the way it is. The office of and office of Iranian Sepah have to guarantee my freedom to return from Iran.

We do not have this in writing as of today. I met with Iranian officials and past seven days, at the Iranian embassy for clarification on this point. And my return out of Iran has to be guaranteed by obstacle it's a colony of Iraq. And we we need that clearance from the government and the structure put in we've been verbally told there is no problem but we needed a right to because in 2008 When I went to Iraq, the opposite are commonly objectives for my departure from that on at the airport. We don't want to get to that position. And that time negotiated with the office to allow you to leave after three days

four days. And we need that clarification today. We are ready to go our ops into home just moved to a beautiful new obsessing the past few days. And we don't have choices when we really go from a set departure. We still on

Mr. Keshe 1:39:27
the things which needs to be done. insurance has to be given that winning or in suddenly new things don't come up

Any other questions?

K- You got to realize Iran Iranian government has a problem, (1:38). in many ways with my presence in Iran. As we know, the Belgium's since we kicked them out to Keshe Foundation that delivered two terabytes of bytes, and she's leaving the government saying our agent knows, right. And the beauty of it is they put their fingerprint on it, we see it and it's been delivered. And then there is a situation with what they read, officials have to deal with what we call the proclamation of being met, as a soul. And this is a very hard thing to swallow. And the derivation of the acceptance of the changes goes right to a fundamental changing in the whole of the human structure. In the new science and technology delivery, you got to understand, Iran has always had a problem with Keshe Foundation. Personally, me, because I come from two sides of Jewish Muslim, my mother's side goes to call him and my father's side goes to say it. And they cannot tell the reunion nation, that somebody with half Jewish blood is so loyal to his nation doesn't go doesn't fit if you're trying to demolish the State of Israel. And this doesn't fit into the structure of the school of thought they've developed. And this is something which they use my technology, Keshe Foundation, supporting everywhere, as a coal miner, Islamic side, but personally to be there, being Jewish blood is hard to swallow when you're promoting a state of Israel as for the rails to be demolished. They've never been disrespected by their officials in a new level in any of them. This is all during my time in Iran. But bringing out to a nation we stuck into so much animosity about another nation is very hard to to become objective about it and change. They enjoy the pleasures of the knowledge and technology. But how can you tell your nation the same position on the attack by the those who are against and those with inside?

Mr. Keshe 1:42:44
This has this this cannot be sorted. Now it's so public without clarification of the maps of Iran and the government. We stay loyal to the nation of Iran as we stood off to the rest of the nations, but police up birth does not bring privilege up rights. Not nowadays.

Any other questions?

Q: Thomas … . I just would like to go back to this question about the Elohim. There is a very interesting man in Italy, who is the official translator for all scripture in the Vatican. (1:42). And he of course, not, of course, he has a very other view on the translations, which were made since all times, because he goes back to the Hebrew and Aramaic texts.

And I think he is sort of very on another way than, for instance, the translations in English, or internment by Luther.

So the word Elohim, as such, is a plural, and he is very firm, that when he looks at the whole checks of the Old Testament, that there were in the beginning, not just one God, which is referred to by the Old Testament, but different gods. Of course, he is also of the opinion, like all of us, that there is a Source, but this Source is very difficult to be named. Because we have in the Old Testament, actually, three times sort of ?? names for God, which in the translation were differentiated. So there was the Elohim, as a plural, then comes the unspeakable god of, name of God, which the German text and the English text translated into Jehovah, which is a word which in Hebrew cannot be expressed. (1:44). But then there is a very important third name, in which God calls himself, or the Source as a matter of fact. When Abraham sees the burning bush, which doesn't consume itself, he says, who are you? And the translation into German and English, was "I am who I am," I mean, this is absolutely ridiculous. Because if you will look at the Hebrew letters, it is "?? Ahay " , then Asher, and then " ?/ Ahay," so, this is a word, "I am." But "Asher", one goes, this is the word for happiness. So actually, this word should be much more understood as, "I am happiness."

But, of course, from the church's point of view, this is absolutely unsupportable. Because if people think they are sort of like, together with the Source, that's why they are happy, then you have no command over all these souls.

So actually, that's the only thing I wanted to comment is, yes, we are all, when we are happy, we are in contact with our soul, our love for the Source. (1:46). That makes us as man, independent. And that's what was refused by all the churches, or all the religions in the past, except maybe the Buddhists, which accepted, that some people could reach enlightenment, and therefore would be at the same level as Buddha.

K- .. Let me explain something to what we call, line of religions in Middle East, which most of us European speaking languages believe in, with Judaism, Christianity, and being Muslim. These are all interconnected religions. One has taken something from the other one, and extended it to suit. We see this in Islam clearly. Where in Christianity we don't see, for example, because Christians, because Christ never went into this.

In Judaism we have kosher meat, we have to be a sorted in a specific way. And then we see the same thing, carried out by Mohammed, bless his name. Because he traveled to Palestine, he saw the Jews. He saw how slaughtering the animal the way they do it or the backhoe allows me to last longer without getting infected. So he changed it into halal, but in fact is the same. Many, many things in this kind of in this line of religion. Middle East is one extension of how Moses received the message, (1:48). or how Mohammad received the message too.

Similarity . All was done for the betterment of man. The abuse came after the Prophet, with Moses came with the Prophet. So, how we interpret the language, and if you call it the Silk Road, but this road existed in the south of Persian Gulf with Iran to the Arabs,

the minions are all the Chinese, the Palestinians, the Europeans, all took the line to vote Palestine on trade because it was the center of everything and then they added religion to it. So we have the same common language, words use up words because this religion so interact with all the people in the practice of it if the simple example, if China was invented in China through the Silk Road and trading through what now President Xi calls it the see Silk Road routes, if we manage to change plates, and glaze it and call it a pottery, China we all call it China. You can imagine how the words and theology when when a bad China man exchange rate with another man to get paid and they had dinner at the same time. This this use of word and then changing it to part of different beliefs to Tibet or to God knows wherever is part of the exchange of the culture. And somebody who has taken somebody's idea or understanding for the betterment of his race, (1:50).

has come up with different names for it call it a Buddha Khalid Mohammed Khalid price whatever the latest version of it is the behinds by this demise this has come to an end of his progress nothing is added into to the knowledge of the Soul of the Man there is no extension there is no scientific way to be able to explain what the soul is for the first time you know what it is you've been taught to understand it now there is nobody to come between you and your soul and wherever that knowledge comes from. Now you have access to if you know how to do it to universal knowledge do you need to have a knowledge about electricity if you still live in a physical dimension Yes. But are there any generators in the universe where the dimension of the universe yes they are but in a different shape of more places where the fields of the universe which are loose and don't go anywhere they come into and then the gateway to that energy of course you some of them are very similar to neutron subs

Here >>

But mankind has used the same story from the same Silk Road talks, from the pottery to religion, and change up name in different directions. Jews had the same plates many of them died because of the plates, (1:52). because they have no glazing. Chinese came with the glazing, and they brought it, and the Jews ?? came.

But if you look 5,000, 6,000 years down the line, when you go to a Jewish home there are two sets of plates. All of us know, one plate for milk, and one plate for meat, and he hasn't changed. Because now he knows the fat of the meat cannot go into the glaze of the plate and destroy it. But the other bits., it stayed.

If you look at what we call, all the religious beliefs, space gaps , and it' done by a man whose seen by the other side, ??? he brought it here. It's just like, you know if you go to America and you see a new device, you take the agency and you go to your country, and you become an agent. Now a new device is coming because it was in America.

There was a new device called, Judaism with this kind of beliefs, which itself came out of Mithraism, and then Christ. Just why do you have an Old Testament and a New

Testament, what's the difference between the two, if you look at it. Cut the Jewish parts out, you make a new shape and they call it the New Testament. Muhammad did the same, because he saw it brings a better condition for its people. But the words are the same they cannot used .. They diversified, or what it meant in that language. Who put it there?

But now for the first time, you understand it yourself, there will be nobody to be the prophets, nobody to be somebody that you have to go. (1:54). When you're selling yourself, then you teach yourself. We expand the knowledge itself. So you try to explain in this, the Old Testament somebody translates. Somebody of these highly, blah, blah in it, and it doesn't make any difference.

It's all the same, it's the same China ?? box. If you learned to make it in Switzerland, so now you have a Chinese, Swiss made. But the knowledge comes from China.

Any other questions?

Q: .. I have a photo of a spacecraft, which is in transition from etheric to a physical vehicle. So the photo shows a craft, which is not quite solid. My question is, is the non physical flight system? Can this alternate between invisible and visible? Or are these two separate systems? My thoughts are that, that our space brothers are not physical, but are able to perhaps lower their vibration when they wish to be visible to us?

K- .. First of all, we don't see this picture, because he just sent me one on the internet. I can see what he's talking about. First of all, this goes back to what I just said a few minutes ago in the teaching regarding the Iranians developing and trying to develop our what I call, plasma nuclear magnetic field generators. (1:56).

When you create a system with what you call, like UFOs, which you go to the phase of understanding and developing the way can be done with a soul, then he has the same properties as you. It decides where, when, and how he wants to manifest himself.

These pictures we cannot ?? ?? because it's now ?? ?? this photography it's ?? very much super imposing one or the other. But the knowledge is the same. Many of you will be shocked when you see the new flight systems without .. physical structure. When you go into space, you don't go in a system block with walls. It's understanding the knowledge, the science in its Totality, and when you're seeing something new, being able to explain it, why and how. Sometime in 2010, if I'm correct, in roundabout 20 - 22nd of June, BBC has shown a movie "Taken in Brighton," on the beaches of Brighton. Where the actor walks down the steps to come to the beach. (1:58). And as the cameraman is taking pictures with the scenery in the background, everything there with the clouds, the sky, and everything else.

And it's a clear, clear indication, a clear visual, you cannot do anything with it. You see like three or four clouds in the sky, in the background. And then you see UFOs going from one cloud to another. It's not a production, it actually happened. You see it, and they never realized it in the production, because the report is focusing on the acting. But in the

background of the sky, you see UFOs jumping from one cloud to another, back to the cloud, and going forward. I recorded this and I don't know where I left it. If you go into the archive of the KF. BBC should be able to find it.

So UFOs exist. What you call it. It's not .. exclusivity of one race or the other. But each one race have created their own what we call, versions. Not all the UFOs are the same way, ?? not all the flying objects in universe are the same. It's like it was you have a truck, you have a Rolls Royce, you have a Mini. And the Chinese created their own version of the cars, and the South Americans have their own version of it.

It's the same in the UC, it doesn't come from one race. All the races will reach certain level of knowledge, achieve flights, achieve motion. And certain of them, which they don't want to do it in a matter state, understand the structure of the soul, they travel with the soul. (2:00).

Man has the advantage and the privilege of being able to do both. In a physical D, if you eat and sit with your father. In the soul dimension the father is in New York, you speak to him and you know what he ?? Now one has to understand, you can live in both D.

HERE >>>

(Spaceships size of cities)

That's all, no exclusivity and each one has his own flavor. You know you buy car and you customize it. Citizens of the Universal customize ??? they do it physically.

Not all of them have reached the maturity, that now we put the man through to understand the work of the soul, like you. They start with the digging in the ground and build something. You got to realize something very, very strange and I explained this some time ago to some scientists. If you look at that size of some of these UFOs, which was seen, or claim to be seen, or whatever. It needs, it's the size of the city. Can you imagine it was built, wherever it's built, it must be in a very small part of the position. And the size of these ships, is the size of a city, how big that planet is. And then how did they achieve to get resources, (2:02). of whatever they have titanium, special metals, to build it. It needs 10 Earth sized planets, to mine it. To not even mine it, to change the material into the door of the craft, the light and everything else. How big is Shanghai city on this planet? That it can bring from the Chinese nation, all the resources to build a craft that big. And I'm sure this is not the only one they built. Just put the scale, and the order knowledge, and you'll understand what I mean.

Each man has made according to his availability and extent of knowledge, of materials and knowledge. When you look at these things, and you look at 10 to 20 spaceship together, they must have come some ways. It's not a camel ride running from Jeddah or Medina to Tel Aviv. These size of ships you see, they have to fit into something, if they're traveling across the universe. These are like an aircraft carrier, with the little ones inside, helicopters, or whatever else you call it. These ?? ?? least aircraft carriers, then

origin see ?? ??? carry more bits. Then you can understand what the knowledge has been, and how much it took for them to gain this knowledge.

Human race is on the same track, but with the new knowledge we brought, mankind has jumped the scale of ?? ladders. (2:04). Not just mankind it's for everyone. As I said before we respect and honor those who came to this planet and they didn't bring the mayhem with them, with the knowledge that the man couldn't handle. Even the amount of knowledge which was brought in, that nowadays you can see the mobile phones and the television, and everything else, which has changed the world of the man, is nothing compared to what is to come. We just cracked opened the door. We haven't opened the door to get into the knowledge of the U.

Any other question.

Q; … Could you talk about the phenomenon that happens with the Aurora Borealis?
K- It's a natural phenomena, it's a natural field interactions. It's the nature of the fields from the U, whatever. We see it everywhere is not exclusivity. We see them much more clearly. Or we see this to feel interaction and the charge of materials which are in that space. (2:06).
Any other question?

Q: Ed… So, these triangle UFOs they utilize the star formation system. And if you travel through the Soul, do you travel on the rays of light, because you stated, that such ships house beings bodies, while they detach and float around as their soul?
K- Once you learn how to walk, you can jump, dance, and do whatever you like. So, once the race learn something, then they try to extend it, and see the extension of it. How they can, and what they can achieve. It's not like,. It's like us, all of us the same. We learn something and then we add to it.

You go and buy a wallpaper, and we'll see how you change it. You paint it blue, the other piece of the paper, you paint it yellow, and so on. Or you cut it in different shapes, and patterns on it. It's the same with the knowledge. It's what is gained by the changes, and what we manage to get from these changes, that it suits us. (2:08).

Any other questions?

More on 5Plus1 talks - everything has changed

Q: … What happened to the return of the US to the JCPOA (5plus1 talks in Vienna), that was supposed to be announced in March before the Iranian New Year? And the (Iranian currency) Rial, would appreciate more than 50%. They are moving apart, it seems.

R: He's asking you about the return of the United States to the joint agreement with the, I think he's calls it the JCPOA It was supposed to happen.
K- Iran moved the goal post. And the Americans built a ?? bigger goal post. And the situation at the moment.

The negotiations are still going on, it hasn't stopped. But you have to realize now, the negotiations have gotten much tougher. Everything should have gone very straight forward the way it was. It was a combination of the situations, and the Ukrainian war, has brought polarity. And what we see now, Iran sees, especially what we see from them. They're hoping or they are wishing to get a benefit out of this, or advantage point, the same the Russians are doing with Americans.

Crisis in Iran - food up 10 times higher

And it's a very, very interesting thing, that ?? the way. In past 60 days, things have changed. (2:10). The Iranian government has more or less lost control in Iran, in the past few weeks. Coming out of the Ukrainian situation with Ukraine, being a major exporter of food into Middle East, and has recent has unexpectedly the past few days has created a massive mayhem across Iran, with the rise up the bread and oil and other things by 10 fold, released by the government to go that way. So there's partially a lot of things has changed because of this situation, and Iran is not, or what is looked at from the outside, like Americans, and others. Instability in Iran is taking shape in a very rapid way.

And they are looking into, and would they be able to… That's what I said, when I explained, why Iran is rapidly going through this change with the technology with the new plasma magnetic fields, is to be able to gain a position, that they can stabilize part of the instability.

If you were paying $1 for a loaf of bread, two weeks ago, in Tehran, now you pay 10. Because they cannot, there's a huge shortage, and the stopped the export of beat. Ukraine has become unstable. Russians have taken over the ports, export of grain, into what they call it, and oil. Ukraine is a very influential breadbasket for majority part of the world, especially in Middle East, and fertilizers. If you're American, I have been told, that a dozen eggs was $1.99, now it's $4.99, let's say. (2:12). This Ukrainian situation is causing instability, and Iran is not separated from it.

If it goes any worse, that we might see compromises very rapidly to be able to get grains and food from America. Gas in exchange for food, and Europe is suffering with the gas and the fuel problems. It's become a very big mesh of mess. Everything which was planned to go, everything which was negotiated to go, it just, with one move, and then a couple of months later, with another move has changed the situation drastically. Not just for Iran. There's a shortage of oil and wheat, and other commodities right across Iraq, Iran, most of Middle East where Ukraine was supplying. And the Russians have taken all the southern ports, which means there's no exports, unless they decide. The political map has changed drastically in past 60 days, and it's to the benefit of the American farmers who have a stockpiled up, wheat and the rest.

We might see the same problem now in China. China inputs 40% of grain. And part of this what you call, Corona control is food shortages. Nowhere except in China we see such heavy control on Corona. (2:14).

In Europe and ?? everything is free. All the restrictions have been taken off right across. China now struggling huge. We've seen in recent fuel prices, and gas prices seven fold, in past year in Europe. Nations like Iran and gas exporters are seeing massive income increase. The West is paying it. They are bypassing the boycotts. Sanctions don't mean anything at the moment ?? , because they have found a loophole to negotiations, to get their things out, that they don't run into problem with it.

The peace negotiation with Iran is very one sided at the moment, towards the Americans. Nobody understood the strength of what we call, bank control system through ?? Switzerland. This has brought a lot of pressure on many nations, which they don't want them to, allow them to ?? bring them, what do you call, financially to their knees, or bring them into problem. Iran now has taken side with China and Russia. they say that they might win it. But this, nobody protects you, if there's not something in it (for them). As I said with American ambassador yesterday, Iran technological advancement in plasma technology can become exchange for action in Ukraine.

Everything will set up to the last minute everything perfect (in 5plus1 negotiations) till suddenly uncertainties changed, (2:16). deliberately to create more mayhem, but now mayhem has returned back to themselves. The ?? ??? ? ? so but the bread has gone on the table 10 times more, 10 times more since last week. We will see some new incomes, if they want to call it, conditions, if these things last another few weeks.

Any other question

HERE >>

Q: … Will there be a Enhancement Unit that will teach us to teleport to teach us to balance us, to not eat food?
K- This system already exists in the Keshe Foundation exhibition Center. We just need to pick his sweet twin system and put it across the bridge. But now we are pushing through with the body for different enhanced system and data will be included as part of the same system.

Q: .. . Will you be at the workshop in lengths on 11th of June?
K- No By never attended workshops

Q: .. Will the virus herpes rub, help with shingles it is herpes very painful also

K- Test it and tell us shingles can be remedied through this process, yes other person and I developed it myself because I I faced with this to two years ago after a stroke if you bet in conferences my right side cheek was to stress most of the time for years I had a stroke on the border of a plane and I developed the sickness benefit of

2:21:12
being the guinea pig of it

Mr. Keshe 2:21:22
if you test it or anything, let us know you have to fill in the form for the call

Mr. Keshe 2:21:38
talking about the workshop in supply 10 or whatever if you bring if you let Kazmir Keshe Foundation sales and promotions come online he will tell you about the workshops that you see him alone

Krashmere talks about workshops ..

Rick Crammond 2:22:08
yes just a minute give her his hand up and jumped up to the top of the line there we are. Go ahead Grasmere

Krasimir 2:22:24
and don't get me here me. Yes. Perfect. Hello to everyone. Hello Mr. Keshe. Hello from the FN Sales Team. Today I want to present to you bring your attention towards the workshops that are going to happen in the exhibition center in Linz, Rick, if you can please help me to show it on on the store website.

Krasimir 2:22:59
Or, you know, who the basically workshops that are going to happen in the future in the Linz Exhibition Center. A first one happening on the 11th of June, it is two weeks from now.

Jefferson 2:23:25
Okay, I can post the link that in the chat.

Krasimir 2:23:32
Overall, this is the basic GANS workshop. Like we understand that a lot of people are currently into thinking about spaceships, thinking about deep space travel, thinking about the soul and understanding the technology from this perspective from this point of view. But we always have to go back to the basics, we'll always have to go back to, to the fundamental level of understanding of things in order for us to have a gradual and to have better development in our understanding of the technology. That is why amongst all Knowledge Seekers, we are welcoming all new Knowledge Seekers, like a new wave of Knowledge Seekers, to counter lens on the 11th of June and understand the basics, the foundation of this technology, namely, the GANS workshop, how to create GANS says, we are going to give a basic understanding about the technology not only from a theoretical point of view, but also from a very practical point of view. As we are going to show the production of nanocoat Id plates, you know that this is a very important process, and you need to be able to do it right. Because if you have if you don't The width right, you will have difference in, in the results, and it is not very much advisable that is why

we want all of the Knowledge Seekers to have a really good foundation of how to properly make the nanocoat plates, how to properly create the different types of dances. And that is why overall program is focused towards those tasks, we are going to go through the theoretical understanding of plasma, so, that we have the theory behind it, and then we move towards the practical applications. It is preparation of materials like the box for the GANS making, hanging of the plates, cutting of the plates nanocoating, the plates, the copper and zinc plates in particular, going through the process of the production of the four basic GaNSes, which we know are the CO2, CH three, Copper Oxide and Zinc Oxide with the various specific applications. Also, we are going to learn how to wash the salt away from the gases, we still see people that are not washing their gases and trying to use it, they were they shouldn't be using the clean gases. So we need to clear that also we are going to learn how to transfer the gases out from the container, and the different ways of storing GANS and GANS water. In theory, everything sounds really simple and very easy to understand which it is. But in practice, there are really small steps that we need to make sure I've done correctly and precisely, in order for us to get good results. Because in the process of GANS Creation, the interactions that we create, the conditions that we create, are very much going to define what kind of guns we're going to have, what kind of strength we're going to have, and how we can apply it later. So in this, if this basic fundamental process is done in a different direction, than the direction that we intended, the results are also going to be different. So this is absolutely amazing opportunity, both for the old Knowledge Seekers to refresh their memories to go back to basics, and also for the new wave of Knowledge Seekers that are starting to understand and are starting to engage with the technology to be able to create different applications of the technology. So once again, is going to be Saturday, the 11th of June 2022, from 10 o'clock until six o'clock, in the lens Exhibition Center. I'm sure that there are going to be a lot of surprises, there will be a lunch break, with lunch not included. And the cost for that is 350 euro, which includes all the materials that you're going to need during the workshop. Again, we cannot go far enough. If we don't have a strong base, a strong base has been part of even

Krasimir 2:28:36
even we see it in sacred scripts, and texts, that you cannot build anything strong on a weak foundation. So with this workshop, we want to make sure that we have a strong foundation for the terms to come. So that we create the conditions that we want the conditions that we need for bringing peace on the planet. So I'm very happy to welcome you to this workshop. And don't forget that we have limited amounts of seats. So the sooner you book your seat, the sooner you're going to be sure that you're going to be among the few lucky people that are going to take part in this workshop. If we move further down on this store page, we're going to see that we are going to have a sculpture GANS workshop. The elect the 18th of June 2022. The same conditions from 10 to 6pm. With a lunch break, with no lunch included. Now we eat from the fields, so to speak again in Linz exhibition center costs because of the materials and program is yet to be announced. The next workshop that we have is the pottery GANS workshop. And it is also towards the practical applications of the technology to be able to create your own pottery to have the knowledge and the skill to create your own pottery that is using the GANS technology, which can then be applied in very different fields. It is going to

happen on the 25th of June 25 of June, again am till 6pm in the exhibition center in Linz we will basically show you how to mix the GaNSes into the clay. But also you will work you will learn about working with clay in general, not only clay with GaNSes, but working with clay in general. And you'll be able to create your very own GANS clay cup on the pottery wheel that is going to be present there. Because of all the materials that are going to be included there, the cost is going to be 450 Euro, we are going to go through the theoretical introduction into pottery. Also, we're going to see a practical demonstration of preparing clay with GaNSes in several steps, practical demonstration of throwing a cup on the portrait will preparing the clay. Working with the wheel, we will have a time to practice we'll be able to trim the bottom side of the cup and complete the cup with different possible surface textures. Also, we're going to see the glazing process and find the finishing of the cup. This is this workshop is also to show us that there are very different applications there are so many people and so many applications of the technology. So we need with this to bring the inspiration back to you to understand that the GANS technology, the cap space, technology can be applied in very different very specific aspects of our lives. It does not need to be only Space Technology, or health or agriculture or energy that most of the people are interested in. But it also will be practical applications in our everyday lives, practical applications for wellbeing, for beauty, for culture, for art, it is going to be part of our lives. So the sooner we get on board the better. And with people that are open minded, open hearted and want to learn a new skill at the same time combine it with the knowledge of

Krasimir 2:33:10
GANS technology, this is absolutely perfect combination to combine the Space Technology and the application in a pottery GANS workshop. So once again, the first workshop that we're going to have is the basic GANS workshops 11th of June, then on the 18th of June is going to be sculpture GANS workshop, and fifth of June is going to be the portrait workshop. You are very welcome to the lens Exhibition Center, you're not only going to get in touch with the technology from the workshops point of view, but also you'll be able to see all the current developments and all developments of of the Keshe Foundation, all the products, you'll be able to meet with really nice people and get to know the foundation from the inside. So it's not only about the workshop, it's also about creating this community and getting to know each other, and how to move forward with spreading the technology and spreading the knowledge that is aimed to bring peace on our planet. Thank you very much, Rick for the help. Thank you Mr. Kesh. And thank you for all the Knowledge Seekers.
(2:32).

Mr. Keshe 2:34:32
Thank you very much.

K- For the workshops which are taking place in the Keshe Foundation Linz are subject to be moved. If need be turn other position in Linz, or within what we call the lung Center due to other what we call tests and trials, which will be carried on in the center. But essentially, we bet it's very, very limited number of people, especially in the pottery, and sculpture, we're looking at about maximum 10 people to be able to do and it's very

limited. These are the, what are called the Masters in their work. These are not just Knowledge Seekers, poetries scientists, this is what he does in the university. And this is not just somebody who knows poetry, the same as with artists and others.

(2:34). Somebody has sent the question back, can we purchase anything with the tip and lip, they're already on the store in the Keshe Foundation that have been since yesterday. And you can go and visit and multiple part that take part in this trial test on a voluntary basis.

Any other question?

Book : "The Universal origin of magnetic fields"

Q: Jefferson …
So we can interact directly with you in the in the physicality as well as at soul level, (2:36). that you have been radiating to everyone in our levels, and transmit your knowledge and your kindness. Thank you very much for this, and for many things. I would like just to bring, I was reading again, the book number two, "the structure of the light." I was thinking that it has something to do with the teaching of today that earlier on and I was reading the chapter about unified field theory.

And in one point, you brought the topic about permanent magnets, and you will stated there, "sometime in the future, I will release a book, for which the initial basic work has already been set. " The book you give title, "The Universal origin of magnetic fields." And in this book you explain how magnetic fields are generated, and how plasmatic in specifically matters magnetic fields exist in different dimensions. Is this book available for us one day to have it? Will we be mature enough to have this knowledge. Because further on you explained how plasmatic magnetic fields in the universe does not need to carry the same mass, or the Plasmatic mass, that we are having here.

And the difference of this plasmatic interactions, (2:38). through the magnetic fields in your other. Probably will be the same as the plasma EU that you're going to have in Linz, as well. Because, as I understood it, we'll have no longer, of those motion devices, or machinery. We will have no mass for us to see, but it carries the whole field strength, the plasma field strength of the universe. So, that's how I'd like to say. If you have the opportunity to (write) read this book one day, that's going to be another best seller, in my view.

K- Thank you very much. The book number eight, "Origin of Magnetic Fields," is one of the last to be released. Because it takes man to the origin of Creation. We talked about teaching part of this last week. It goes beyond what we call, the Creator. Where that came from. That's what we're talking, the origin of the origin. Not halfway that, that it needs to be explained by somebody else, or ?? ??

In so many ways in the teaching, in small parts, I have already filled in part of this book - ready to go. This is like the soul teaching. (2:40). A number of Knowledge Seekers

worked on the soul to gather extracts from all teachings to be added, as part of the totality of the soul teaching. This will be part of what we call, "the work," which over time, next years, will be released.

I don't have at the moment time to write. Not only time, writing books like this, is like the Torah. Writing books like this is like writing the holy books. These are knowledge, which is transferred. It's not something that is made up.

As I was explaining before in respect to the first three or four books, most of these books are written in the mountains in east of Belgium in Flanders. This is where I used to go and write every day, consecutively days till the books were completed. Then sit down and go through it, and expand it.

It's as I was saying earlier on, we had going to the mountains, coming up with tablets and the reason, what suits. Going to the mountains, writing what it is. It is written, nothing is hidden.

The book number four, basically number five, and six, all have been written, and it's there. Book number four is more or less complete, there is illustration. Book number eight, which is "The Origin of Magnetic Fields," (2:42). will be one of the last books written before my departure. Then man has time to study for centuries to come?

Q: .. How's it going to be managed, the entry or the border to access a ticket for a spaceship? Is there going to be a background check, to take the bad persons away, like presidents, killers, or persons who attack the Foundation, or Knowledge Seekers, and the Knowledge Seekers are going to have the opportunity to be first on the ticket sales?

K- There is no preferences. We will allow the criminal kings, and leaders to go in first, then they'll be sorted by themselves. We have no plan at the moment for ticket sales, and at the moment, everything is how it's going to be on the test trials. And we'll see how things take shape.

Any other question?

R; With the workshops, will they all be in English, or can someone with a different language background attend as well? (2:44).

K- The Gans production, the poetry, the painting. sculpture will be bought in English and German. We have what we call soft toys, what we call body enhancement. Enhancement systems. And this is done in they'll be done in Romanian and English. Basically, we are English based structures. So what if is nationally to one language, it can be done. If you're a Spanish and you want to hold the teaching in the exhibition center. Right to us is not excluded an exclusive German or English speaking. But Exhibition Center is open and many of you are invited in the summertime. Common see, to the knowledge to understand the progress and progression in technology. Last Monday when I was there, there was team about 10 or 15 people, the book morning and afternoon sessions and

manuals there to explain and to show the progress and we will close the sections of the exhibition center very soon for a period for what we're going to use it for but essentially book your tie before seeing exhibition understanding you will go in as one man and you come out as different even though you think you've seen all of it and you know it all the other

Any other question (2:46). Should we call it a day.

Rick enter FEU to NASA contest again this year

R: There's one other thing I wanted to bring up, which is on the universal flight enhancement spaceship unit, I've entered it into the contest, that we ..
K- Again?
R: that we engaged in before. Perhaps against my better judgment. But for fun and for possible exposure, and so on. So let me just kind of share that
K- Where did we come last year?
R: Well, we can have a look here actually. … We should be able to browse by the votes use the final voting. Here's the final voting scoreboard in last year 2021. And we placed second in votes. Number two, the universal body enhancement spaceship unit with 386 votes. And you can see it did really well in views actually. It was the highest in views in the competition. But then when it came to actually placing according to the judges, they didn't judge us very well. We did well in the popular vote, but not in the vote from the judges.

So, that was kind of expected, I guess, (2:48). because Mr. Keshe even predicted it, myself as well. But I kind of hoped that the judges would see a little more favor in terms of our project. But maybe this year instead. So this year, instead of the body enhancement spaceship unit, I've entered …

Okay, so this is the entry now for the universal flight enhancement spaceship unit for this year. And I've got a description about it, we're allowed a 500 word description, and I put a link to the store to actually purchase it, and so on. And I've entered it instead of the medical category, which we had last year, I put it in the aerospace and defense category. I thought that might be more appropriate.

So that should raise a few eyebrows in the aerospace and defense category. If we go to that category this year, there's some sort of design for an improved rotorcraft ion jet. Here's an something interesting a magnetic energy outer space propulsion system.

And there's our universal flight enhancement spaceship unit. (2:50). And these are just in order of how they were uploaded to the site. And in the category, these are all the aerospace and defense category. And there's a number of them. A reusable space vehicle launcher, a long range multi role fuel cell electric aircraft and fuel system, and so on. Here's an interesting one a space environmental protection space shield.

So there's a number of interesting entries, I think there's probably about 30 entries or so at this point. Now, there's another month, month and a half or so till the end of June actually, the first of July is the end of this competition. So people have an opportunity in the next while to vote for the universal flight enhancement spaceship unit. And to vote you need to sign in on this or login.
(2:52).
You either while either sign up or login if you logged in last year and voted, which a number of people did then you just have to log in again and you can vote for the universal site enhancement spaceship unit. Or if you didn't vote last year, you would need to sign up. You click on the sign up form and there's a number of things you have to fill out your name and address and so on as a I'd like to check those who enter and make sure it's a legitimate entry. So don't try to cheat by putting in multiple entries from multiple email addresses and so on because they only allow one person one inch or one vote basically. So for people that have already logged in last year, you simply log in your username and password, and you're going automatically and that you can then go to the universal flight enhancement spaceship unit, or anything else you'd like to vote for. And at the end of the end of the text, I believe it is there's a place that you can vote. And instead of saying learn how to vote here, you be able to vote. I've already voted, I am the one vote that's voted for this, because it was just just put up a day ago. So you haven't had exposure yet to it. And I'll be promoting that in the next while. And hopefully, people will get engaged and excited a little bit about the contest. And maybe we'll play swell this year, as well. It's even if the judges try to ignore us. The popular vote from the people seems to say, we like it. So I think we need to say that again this year for this unit as well.

K- .. okay, we already know the results before we get there.
R: In a way?
K- When is the deadline?
R; The deadline is July 1. So we have a month and a half or so here.
K - And you can vote only once.
R: Yes.
K- Thank you very much. (2:54). Thank you very much for this teaching and your time, and hopefully, we should be able to do it again next week.

R: Well, thank you, Mr. Keshe, you've definitely made everything possible in the last couple of decades, These this technology teaching and the books and teachings from about a dozen years ago and we started these original workshops and teachings and whatnot. Thank you for being there for this whole time, and never missing a workshop, in spite of being every holiday in every possible religion of the world.

433 KSW Thursday, May 19 2022

END

434th Knowledge Seekers Workshop May 26th, 2022

(Quick Index 5 p; Proofed Part1 .. need to do transcription mostly done ; Key Words Phrases Quick Index) (Auto Transcription Elias)

ENGLISH TRANSCRIPTION

(start proofing part 1)
(:24).

K- Yes, good morning, good day to you. As usual, wherever, whenever you listen to this series of analyses of Keshe Foundation Spaceship Institute, knowledge seeking lectures and teachings and sharing knowledge. Thank you very much for past 430 odd sessions. And today's teaching is pretty simple.

If you remember a couple of sessions before, we spoke about amino acid (AA), when it takes shape of three dimension, when it's in the vacuum body of the man, not the way we see it on the surface of the CO2 Box. But the way we see it, as a cell of the man, because the three dimensional amino acid, which you see on the flat surface of the water, when you put it in a vacuum condition, it becomes your cell, it becomes then with attachment to other minerals, and combination of different other things, makes your body, makes the physicality (P) of the man.

In so many ways, the only part in the body of the man, which we do not see as such, but it still exists as the energy field, and AA is a bone structure, which is, and that is why it does not decompose, even though it has higher rate of the calcium, or other minerals, it still contains some what we call, amino acid in its structure. (:26).

But, when we travel in the depth of the space. Because the first unit of the what we call, Enhancement Unit for flight (FEU) without dimension, is, has taken shape. I was with it a couple of days ago, and it has a twin, because all the flight systems, if you remember with the Iranian flight system needs to be two of (2 units together).

The people in the lab, are putting it together, and it will be manifested in next week, as an entity, as a living thing. Because once we switch on the reactors, huge number of them, they have their own, we designed it that way, to have their own soul, their own interaction, their own heartbeat, their own everything else.

Now, collectively, they create a unified soul that, that, in interaction with the emotion of the captain, or the passenger, will decide the condition, the composition, and the strength of the field of the position. The what we call, without dimension, or physical structure, space reactors are extremely well in design.

And the way it's been designed now, is that we can adjust it, we can adjust the shape slightly to get the maximum, what we call, field strength, the maximum positioning. They are made flexible, that we can change it slightly, to find what we call, the optimum position of flight, the optimum position of interaction with the fields of the man, and so forth.

In this process, once we interact with the system, and we can match the system, (:28). then we have to understand the structure of the field transportation and transmutation (T&T). Would it be that, we as a what we call, amino acid in the 3 dimension, in creating a field within the system, that matches Mars, we'll see embodiment of the man to take shape, as it will survive the condition of Mars.

We know this very well, we know this condition, it happens to us in the womb of the mother. We take the condition of what is the womb, and we shape ourselves from the egg and sperm into the shape of a man, and we stay alive in there (womb), and we grow, and we change to fit the environment we are coming out to.

So, the new system, when is adjusted. I have been told we are a week ahead of testing. As we said by the 6th of June, we go for a test of the system. Then we have to see what is our position? What is the residual work that we need to do? What will happen to this structure of the amino acid of the man. Because in the body of the Man, this amino acid, even we feel it as a muscle, as a tissue, as a blood. Under the new condition, will take a new shape.

We travel to Mars, we travel to another position in the universe (U). We don't wear the spacesuit, because we can create the condition of the transportation and transmutation of the energy into the condition and position, when he arrives. (:30).

The new what I call, Enhancement Unit for flight without the boundary, are much more advanced than the one EU we have in the lab, you've seen it. The Body EU or the flight units. They are restricted, they all confined to where we put the reactors, permanent.

The new advanced, much more advanced system, in the new flight system, which is getting tested, does not had that limitation. We can change things inside, we can change this dimension (D) inside. The rigidity has gone out of the game.

With the (old) EU it's rigid, you see it, it's the white thing. With the new, more advanced, the next stage, maybe a couple of stages further than what we have seen. Now, we don't have those limitations. The reactors are with a condition of the what we call, dynamic fields, which in combination, can do everything possible to interact with the environment, to interact in respect to each other. The two systems are set next to each other.

In a way that we look for a dimension of interaction of the cell of the man. What does that mean? It means, let's say in a dimension you choose, as you do in your dream, you go to Mars, you go to another position in the universe, and many of you dream up to now, and you wake up and say, I've been in such a strange place.

Now you take yourself to that strange place. How does your amino acid interacts with the environment? What would happen to this interaction of the fields of the environment, (:32). we have created within the EU, and the amino acid of let's say, the brain of the man, the toe of the man, the heart of the man. Or as they all have a common denominator, they all change together, which is, this is how it will happen.

Then we can see within this embodiment, the change of the physicality of the Man, within the flight system. We can. It's a possibility, a high probability, that we'll see evolution in respect to the growth, the strength of the fields, which is introduced by the system by itself, through introduction of the different fields, which are set in the reactors.

The beauty with the new advanced system is that, we don't have this white, rigid, hard body, that absorbs fields. It becomes a filter for what can be coming in. This is the problem, that many spaceships you see, cannot go to the next step. Because when you build that body, when you build that craft, then you're limited, you're filtered by what can pass through the embodiment.

It's like the skin of the man, it rains outside, but nothing happens inside the blood flows. You created that skin. We created this what we call the Enhancement Unit, with the limitation of the what we call, the fields. It has a C-H combination, because it has, it's made of polymers. It has other materials. All these now become a filter. (:34).

Energies above it can cross. With the new non dimensional Enhancement Unit, we don't have this problem. We are part of the environment. We don't need to adjust to, we are a part of, to be adjusted with. In that process, we see evolution in science, evolution in creation of the fields, which they decide, by us pre-setting it, what condition we create.

Go back to the teachings many years ago, I said that you can go into a shop, it's in the patents, if you read it, you can go into a building and get fed. You can go into the building, and reach to the position of the elevation of the science, in whatever you want to be.

There is no limitation with the interaction of the new space reactors. At the same time, if the space reactor decides to create a condition of the flight for itself, it will take the flight. It's been set to do so. Which means if you go in you don't want any food, but the predetermined destination is set with you to land in New York, you will land in New York. But there are two conditions, in the condition of the soul, or in condition of the craft. But you will not be there in a condition that, whatever position you land in, will be any different in emotion inside you. You'll still feel the cold, if it is cold. You still have

all the dimensions of feelings, but now, you have to accept the new dimension of physicality.

When you land on Mars, you still carry a combination of amino acid structures, that it fits into that condition. To us in the present science, amino acid means protein, (:36). amino acid means a structure of physicality we see today. AA in the universal language is a building block. Here we have hydrogen and carbon, there is no carbon or hydrogen enough on Mars to create a condition, that amino acid can stay the same, but the strength fields within the carbon will find a matching strength for environment to keep the building block of the space, and time where you land.

If you understand this, we understand, that we can even land in planetary systems, in the structures, which are made of acids, because we evolved to accept condition, we evolve to be able to survive, to hold on to the building block of life, the way it was set. We've seen this, this is not any more a thing, to think it cannot be done. We've seen it in the depths of the oceans, where the small volcanic position with the high temperature, and high acidity, shrimps live, and they thrive, and it's their habitat. Where if we go we die. First of all the depth and the pressure, secondly, the acidity.

But if you understand that, we can use the condition which EU, the new EU sets the condition of the amino acid of the man. When you arrive at a point and destination, you fit the environment. Because the field strength of the plasma of the block has been moved to match the environment, to match the Inertia. The new enhancement systems, which now go on the test, in the next few days, will be an evolution in the world of science. (:38).

Where we have, as I said no physicality, with no restrictions of the what we call, dimensions, as preset. We now become without filter, we become without containment, without any direction in what cannot be, or what could be restricted. Now, we can take a flight. Now we can change and see the condition of point of arrival within this new systems, because we keep within the atmosphere of this planet, but now we create a new condition to absorb the fields from the universe.

The beauty with the new reactors, the beauty with the development of the new cycle is, that the system, every reactor, is in communication, in line, it receives and gives, from all fields of the universe, in respect to what it's preset to. To preset is very simple. To preset the life of the man, we know what it depends on. We preset that condition. We know what man will take to survive. It does not mean that, on planets such a such a place in the universe, you need oxygen. You evolve that oxygen to what that element would be, in a gravitational (G) fields to hold on to the building block.

Most probably Nitrogen does not exist, but due to the plasmatic condition of the fields of the system, the condition, the field of strength from nitrogen finds the matching building block strength, to be the supplier. This is how, (:40). you will change. We will see, and amongst the knowledge to understand, we will understand, that in the human body, we have the common, which is a carbon, oxygen, hydrogen, nitrogen.

But in other dimensions, in other structure of existence, the 4 is not enough. You have six elements, where two of them interacting with each other, creates the field of the gravity, as the oxygen does in this planet. You'll find that you need maybe, 8 combinations of different fields plasma, of what we call, Gans's of energy, plasmas of energy to build that block. Because one is not first of all, maybe strong enough, or one cannot find the matching fields. So, the interaction of the 2 will bring condition of the building block.

So, we should see, and we should understand that, the structure of the amino acid and the buildings of the blocks of the man will come out of the structure of the development and understanding of the new systems. Even with the new systems, which are getting developed, we are more or less limited to six, maybe 12 maximum combination of building blocks. Which means, we create a plasmatic condition within the plasma of the what we call, amino acid to be able to control the amino acid, to become the building block for itself.

We see this in so many ways, with a structure of many animals, especially those who can retract their body, (:42). or can change color, but we never understood this, and how rapidly they can do it. Today, scientists explain to us in a chemistry way, or another way, how this animal changes color. But how fast it does it. How exact and precise it does it? How does it match to be the environment? Then we understand, there is more that we have not understood, and we thought we have achieved the level of understanding of the totality of the physical, and chemical combination of life.

In the new Enhancement Unit without dimension, as we explained last week, and now is literally built, we have to understand, what we lead, what we will create, what will be the thoughts. We can introduce plasmas into the environment, and watch a new life to grow. Watch a new combination of interaction of the fields, leads to generation of new cycle, which we never knew, and is the creation of man.

Which means we have the capability to generate, to create conditions, and at the same time building blocks of creatures, structures, which we never knew, and never existed. We are the creator of. This is what this will give us. The opportunity to create conditions, that even on this planet, by creating such a position, by creating such a technology, we can feed the man without the man ever killing, we can feed, we can create condition of a collective amino acids, (:44). which can feed every cell of the man and every race of the animal, the tree, or whatever. This will bring a new evolution in the world of science.

With this new structures, we create a condition, that we do not need in a way, to structure ourselves, limit ourselves to alloys, to metals, or to anything else. Because now we decide, we create new metals, we create new materials, that has not been seen. And with it we preset the condition for new standards, new lives. These things will take the next 10 to 20 years to become part of us.

Because once we show, we will see the others will add to it. They don't copy it, but they take part of it, they add another part of it, and then we'll see a new evolution. We've seen

it with many things, which Keshe Foundation has done over past years. We see a knowledge taken and added.

So, in so many directions, the space flight, which is going to be tested, we are a week earlier, as I said, hopefully, by Monday or Tuesday, our team will put it into test. We will see evolution in the world of science, crafts without limitation. Very much, if you see, we can bring the heart of the man out with the body of man, and it still survives, it still works. We can bring the brain of the man, out of the body of the Man, creating the condition for it, it still can interact, and it still can live.

In many ways, as we've seen, many people, some scientists brain has been kept in isolation, when they died, that maybe in the future, it can be used. Now, (:46). we can create that condition, that it can be done. We've seen that with the head of Lenin in Russia. Would we be able to create a condition, as the amino acid, when the cells are still there, to create life structure out of it, and see how the new life will develop.

Now, the limitation is how we decide to expand the knowledge. There should be no restriction on how ethical committees brings the limitation into understanding, because it's according to those who set the ethics, but not where the knowledge is. Ethics has to come from us, in what is logical, and what can be done.

In this process, with the new Enhancement Units, which you will most probably, as the habit of the Keshe Foundation, will see, you will not see any reactor structure, you ever seen before. These are kept away from public. And even the structure of the new space reactors are kept away from public, because public is not ready to understand the gravity and the potential of the new technology.

You see, you've seen the dynamic reactors, how many of you copied, but have you achieved anything with it? Did you manage to go to the next step? Now, with the next steps, what we call in a way, non-dimensional Enhancement Unit, we take the technology to a new era, take the technology to the next step and see how the world of science and how the Knowledge Seekers will add to it.

How can you set a condition, (:48). where you have no dynamic structure as you are used to, in the reactors, or in the solar systems. But we have that within us. The cell of the body of the man works in that environment. This allows the body to work from interaction of the fields of the plasma, which themselves are dynamic. You do not need the limitation of a dynamic of a ball.

The new science, which we open up from next week, is another stage, another breakthrough in the world of science. But how long would it take you as Knowledge Seekers, and the world of science to understand, it's a different dimension. As we've seen, we introduced the MaGravs years ago, you're still playing with it.

The new enhancement flight system is there to feed you, is there to take the energy from you what you don't need, and in a way, to add to what you need, and create a new

condition of life. Mankind has entered an evolution and a revolution in the science of Creation. We don't see any what I call, caging of the sun. We don't see any caging on the galaxies, which in a way are a bigger Sun, collectively, with particles inside, which you call, solar systems and planetary system within it.

Now, we have reached the next step to this very soon, it will be advanced more, that even you don't need what we have built. You will create the star, three star positions, which they themselves, will create the condition of what we call, evolution of the soul. When you see a UFO, when you see a flying object, it means the knowledge is restricted to the knowledge of the matter state, (:50). because you have to have a matter to contain it.

When you see the new generation of what we call, space reactors, there is no matter limitation. You are open to the Totality field of the universe, the way you will react to it, the way we react, we change the color of the eye, we change the color of the skin, we change our height, according to where we live, and how we have evolved to survive the environment. It will not be any different.

If according to the present knowledge, man, all what I call, descended from the Africa, in Central Africa and becoming a Black, maybe short, becoming all sorts of shapes and forms, traveling to new conditions, has become blue, has become blonde, has become Chinese, has become yellow, has become shorter, has become tall. In a way, the environment and the emotion of existing in that environment has created a new body for us. Even though we all come from the same source. This is how we will be in a new systems.

Now, we all come from the same source, but we will change, we will evolve in a way, to fit the plasmatic condition of the universe, at the point of what we call, arrival, manifestation. The new flight enhancement system, which are about to be launched, are totally a different ballgame. They are totally separate game, from what Keshe Foundation has taught up to now. It's an extension to understanding a combination of the works of the what we call, all the teachings from the beginning. Everything which we have taught, all of us have worked on, (:52). now has been brought in to create these, what we call, marvels of the science. This what we call, changes in the game, of what we call, travel, transmutation, even education.

If we understand this process, it will be no problem for us to learn the language with all its emotions, not just what is in the dictionary, what it means. When we speak French in this transmutation, we understand the essence, the emotion of the word, not just what it means in the dictionary. As I said many times, many people speak English, but they don't understand the essence of it, because it's what's in the dictionary, what is translated to. But when a Englishman speaks in English, it has emotion in connection to the word. It has different meaning, it has different dimensions for it, which to the others does not, because he has evolved, he has matured the language in his embodiment.

Mankind soon will reach the position of what we call, the ultimate goal, to be able to travel the spans of the U. There is no limitation in where, and how we could, is that, what

we call, if you remember many times I called, about the fish tank. Now, the fish is the Soul of the Man (STM) and the tank is the field. What do you want to create in it? You wish to be seen in the environment as a black, or a white. You wish to be seen as intelligent, (:54). and speak as many languages? All is a possibility.

Now the door of the knowledge and the science to do it, is there. We understand it. We have to understand, and the next steps of what we call, space reactors will carry emotion. Which means we just don't create the condition of the plasma. But we create the condition that, that plasma has created as the emotion field interaction. We can create the emotion of happiness, not with electronics, or with trying to tickle, but creating the field strength, that to me is happiness.

We will expand these technologies, new systems, new technologies in the coming time. But we have to understand step by step, where the new science will take us. Perhaps with no limitation in the energy fields transformation, transmutation, and in being able to create new building blocks, that never age. Building blocks, that guarantees life in a dimension of existence of the fields of the plasma of the ?? of man, for decades and centuries. Where man does not need to eat. Where man survives through interaction of the completion of the fields, which are embedded within the water, or within the body, or within the salt of the body of the man.

We've seen this, now we have to develop the next step. We saw in the past, Knowledge Seekers making GANS waters to drink, as the food. (:56). We've seen that in China, especially in South China. Many Knowledge Seekers have gone to that limit. We've seen many of the people who are supposed to be doing miracles, can go without food. Now, we can create that condition, we can create that position. We can create an environment, that all fields, all the energies, like the lymph of the man is available to everyone, to every cell of the body of a man, and it depends on the cell in what energy it wants to take from the lymph, to be able to survive. We create that condition, ?? through transmutation of the fields and ?? plasmas.

Mankind has reached an evolution in the science. For the first time you will see it, in a very primitive way. Because the next step for us is to create what we call, condition of plasmas, which does not need confinement. The reactors will be the plasmas themselves. A life for themselves, but in collection and .. combination with other reactors, creates the condition of life, for the time the position, and the strength, which is needed for the building block to exist, to survive, to interact, to have emotion, and to be able to expand further.

The world of science has come to a major conjunction, where we move away, totally away from physicality, but into the dimension of the fields, into the dimension of understanding the interaction of the fields. How we will interact, we shall see? When the new reactors, the new EU are locked into position to work, we watch. (:58). We see first of all, how do the two interact with each other. Because it says, "you need two to tango." You have 2 of the same to be able to see what interaction you create.

We've seen that when we created 129 (Tesla), M field strength. You've seen that in other tests done by the Keshe Foundation. The flight system is always in two's. Now, we have brought these two, into the flight system, and Soul of the Man in the same combination, in the same environment, that the 2 decide the condition and the position, and the other what we call, structures decide in matter state, or what we call, "the eventual confirmation." Which means, the Inertia state of the new systems in conjunction with the emotion, which is created by man, and the flight system. Now we'll create the new man. We will create the new dimension. We will create the new understanding.

KF has built a specific, has made a specific Gans's to see this condition, without involving the mankind, or any other animal in testing. Which means we work outside the frame of the present knowledge. We understood this years ago. If you go back to, our work was in Barletta, we started building the first structures, copying, making the copy of the brain of the man. One of the Knowledge Seekers was given this job, starting from simple interaction, and then gradually building the structure of the brain in a box. In an IKEA box. (1:00).

In a simple way, we can now understand this structure. Now, we don't need to build a structure, but we build the fields of the structure, which allows us to work with the dimension of physicality and STM. The understanding of the new space technology is not anymore, building dynamic reactors, it's not anymore, being there, and whatever else we make. We need to understand, that the process of the what we call, interaction of the fields comes from the within the structure, not the from the outside.

In a way, it's the Soul of the Man, which controls the physicality. Now, the same has been built as the new flight system, where the what we call, structure of the man will dictate by itself, through his soul, through the environment of the field of the reactors, what and how we will look. It will change. How it will attain a new dimension.

In the coming time, many of us will come to understand the new technology in a very rapid way. But we have to be prepared for the changes, which has come, and the changes which will come. In the future teachings and sharing knowledge, we'll explain to how your cell will change. How you will see the changes in a dimension of the building blocks of the man, (1:02). when you enter new dimensions.

In so many ways, you will see the shape of the man evolving to the strength of the fields of the environment. Now we have the capability to carry out these tests. We have the capability to be able to, not just to fly to the Moon, but to fly in any position in the Universe. 6th of June man will be freed from the shackles of the physicality. Or maybe next week, when we start testing, we'll see the outcome. It's not just going to the Moon, it's how we can feed the man in the span of the universe.

The systems are so advanced, but still primitive, that will bring many of us to rethink about the science, technology and the knowledge, which we have up to now. How would we evolve? What would be the evolution in the dimension of the knowledge? Would we change? Would we see the change? And how many of us are prepared for that change?

Would we do, what we did with the man who first said, the earth is not the center of the universe? Or we understand it, (1:04). and expand the knowledge to become the truly, what we call, ?? livers of the U. We become the members of the Universal Community, which lives in the dimension of fields without a matter of state, or confirmation of the existence.

Maybe man will understand the emotion of love, in the essence of the fields, not in the dimension of the physicality, and the beauty. Maybe then we understand, the love of the Creator for the Mitra. As I said before, mankind has not understood about the totality of the emotions, which exist in the U. It's not any more laughter or cry. It's not any more joy or sadness. There are many, many emotions, which the man will feel with a new structures and the new what we call, tasting and testing field strength.

The new Enhancement Unit without formation, will bring us the first step in freeing man from the shackles of the physicality. But would it bring man to understand the totality of the Creation, the knowledge of the creation. To understand, to what level mankind will react to this, mankind will go to understand this, and to what level we can do. (1:06).

We are here to bring the next step. We are here to bring the change, we are here to bring the understanding of the Totality. We set the scene for the change, and we are here to bring the change, and to see that, the change comes in what we call, through understanding being able to go through the transition, and to be able to see how mankind will take shape in the new space, and what we call, knowledge of the creation.

I opened a lot of new ways to think in the past few weeks teaching, and we are not looking to look for a system to be built, to be able to do. We are looking for the knowledge to be understood, to be seen to do. Then we take everything to the next step, everything to the next stage, and everything to the position, that mankind can resolve the present condition of what he lives, with the limitation of physicality.

And then it comes would we be able to travel the span of the universe with a dimension of physicality with the UFOs, or in a plasma energy system. And in that process, we go to the next step. And in that process, we go to the stage to see where the expansion of the knowledge will take mankind. (1:08)

Thank you very much for today. I hope I opened your eyes into what is to come. We hope that we can bring you the structure of the new what we call, "no encagement casing," of the space reactors for flight and for elevation of the what we call, dimension of the plasmas of the physicality of the man, and maybe the STM.

Try to understand what is to come, try to understand what is to be done, and try to understand, that humanity needs the Totality to be able to go to the next step. And not just for the man, but for the totality of the soul of this planet, in every shape or form. Thank you very much, Rick. We go to break and then we'll see what comes up after the break time. (1:09).

Proofed to here >> continue >>

<< BREAK >>> 434 KSW (1:16).

Tip - Lip - Hip Cups of KF for research

K- Yes, we'll carry on as normal. There are a couple of things which I would like to remind the Knowledge Seekers. One is that don't forget that the workshop is set up for you to join in and to be part of with the use of the Gans's and other things. And secondly, what we launched, Tip, Lip, and Hip Cups, for the different conditions of what call need or what we call usage. These, we need to be taken out by as many people as possible that we can create a database or what we call research to become the next step. We looking into the herpes, we're looking to me brain opening to restoration pay, we're looking into other things that leads and brings a new condition. Now we can launch what we call the new knowledge. These are important for us in the Keshe Foundation that allows us to expand the technology allows us to understand is not just a few patches or Pen's. (1:18).

Here >>

The technology is well researched, established with it, and we'll go to the same position and the same purpose.
Any questions?

R: Could you maybe say a little more about these, what's called, the Keshe GANS handmade ceramic vials. We have the tip, lip, and hip options. And just explain that a little more.
K- We chose the words, it's like the one we used the other times. What we call, the tip is the forehead f the man. The lip is the lip of the man, and the hip, is the hip position of the man. It's for you to test as volunteers, the what you call it, .. implication and application with you as volunteers, and collecting the data. It's literally a large data collection, and see how much is achieved, what can be achieved.

You have to understand that one of the leading universities has completed a research of the interaction of GANS technology in respect to herpes, with a renowned, a sound result. We'll take that position to the next step. We take that position to bring the researchers into becoming what we call, "easily manageable, and reachable by the others."

We don't have a problem with anything, we have understanding of what things are going to be, and how things are going to be as part of it. You've seen how Keshe Foundation before, (1:20). has launched the ceramic materials with quite a lot of success, and it's just the same, as we've done with the Pain Pad, as with all the masks and everything else. The Gel pads and everything else.

HERE >>>

Herpes travels on field gaps between skin layers

This is an extension. But this is what is we think will resolve massive problem, especially seeing the scientific paper in general sometimes will be published. And herpes travels through the middle of skin to the brain and to the core, genitals of the mat. And on one end causes problems which we know for centuries. And the other is Alzheimer's, which we see in Scientific Reports confirms that a large number of people who have had herpes have lips, or go to the dimension, or what we call silence, we understand this because we know the brain and skin and point of conception are the same. In a way you feel the emotional touch with your skin, which your body your brain knows us touch. So in a way, the skin of the mat is another layer in dimension after brain up and ran to cover it. And where we see in as we explained many times before, where our lips is not part where the lips connects to the skin of the face is not the same. It's like a song material together and creates a space microscopic space between the two, which the hrdlicka would call virus can slip through as energy. This actually when you look at the structure of neutron skin, at the boundary of your lips, you it's like when you take your two pieces of different cloths and you saw them together. Even though you see that as the color changes in the skin and start is two pieces of material totally different, connected to each other, so on to each other with a magnetic field of the plasma of the cell of the body. And this will bring position, the space gap that this virus can go through depending on the magnetic field created in that position. And this is this is why we call it a virus This is why we handle it as what we call I'm trying to create what do you call it? Whiteboard I need to be allowed to be shared. Yep, if you look at it, your skin is there for your face, if you look at the lips and the Moon, where the lips start is there this is your skin

Mr. Keshe 1:23:38
and this is your lip and there is a gap there, but this gap is not as materialistic as a matter of state, but is against the size of your amino acid. And these GaNSes or these amino acids are called the cells have a specific magnetic field gap that separates them that this virus can actually find a place and then based when you find that place it travels in the middle skin to the brain or to political agenda sometimes and this is what we see. And this is what is set. And now with introduction of what we do new condition as we saw before with more recall kronor for example, we create the change and the fields here. So

the virus cannot find the fee this thing to be able to travel in the magnetic field layers of the skin. Now we understand the knowledge now we understand the technology now we understand how it can be handled is not the Magic is a lot of research, a lot of understanding. And you will see it. If you're new been around suffering from this every now and then you get frightened, it comes up, you see something wrong, it comes up, or it comes regularly, two or three times a year, you understand why it comes about, because when it comes about the say, during the summer, so the fields of the environment has changed. And so these fields react with and allow that one is to really show itself to interact with the skin. And then you see the blisters. Now we understand that. And this now, with what do you do with application of the waters, you change this environment permanently, the stops this virus and the given string to go to is not a matter of state is energy Stayton plasma technological sexual energies. And that's why we put this new knowledge in tested in the why, as I said, one of the leading universities in Iran, the reporter research is completed. And now we go for what we call testing, by knowledge and reporting back, that we can pass it on to the structure to be done, the scientific data will be published shortly in one of the world's leading magazines, and scientific magazines, and we'll see how it will take shape is the same with hip we understand is certain kinds of emotions, and it's combinational. And it's the same with me when we get married on a given condition. That change of fields. So we introduce a balanced field into the environment. And that's all it is, is a science we we don't come with a we have found the magic solution no now we understand how it's created when that fear comes to in a way or position or expansion or contraction within the structure but when it creates pain, we call it a degree but the pain itself is energy and that when you transfer that energy out that was it's more or less the same as pain pain but in a more elaborate way. And then this is how this technology is introduced to Allah if you suffer with migraine, if you suffer with herpes or you suffer with administration pain, some of you cannot walk then just is to to try and to report back. And let us gather that knowledge that we can bring it to millions of people. We don't need water to attend people we need people if you know somebody with herpes gifted to them if they're important to you. We put the price as it is because as a research development and other things which is going with it, yes. But we can even reduce the price to half, but it covered the cover the other part of the expenses, which is all involved. This has been tried and we'll see.

Any other questions?

Q: … I bought my mother some of the Keshe Gans foot pads for her feet pain. When she used it, I could see a bluish orb of light coming out of the GANS pad into her toe, that she has a pin in it. I then saw whitish wispy clouds of plasma released from her pain coming out of her toes and out of the top of the pad. It's amazing that I can see the plasma fields. My questions are can you see the plasma fields? Also, is it safe to use the GANS footpads with pins in the toes? I don't know what kind of pins they are. She said the sensation was too intense of a feeling, (1:30). and she had to take them off to integrate the fields into her body. I would like her to be able to use the GANS pads on her feet, but don't know if we can with the pins in her toes.

Here >>

K- I don't know what the pins are, and we don't put these in. These are made for a specific condition, and are all certified and they are for pain relief. Or pain, what we call, it's not a pain relief, it's a transfer of fields from the body to the patch. That's all it is.

It's not that we introduce something into the body. We are taking fields which are, what we call, energy out. And if you say you see the fields of the what do you call it, energy. We call it aura. Aura of the body of the man is the fields. So you see the changes when you put it in. Some Knowledge Seekers have done a lot of tests with this. Putting patches on taking the, what do you call it, equipment, to see how to changes the fields. It's not a recommendation, it's made for one job, but if you have a pin, you have to find out how you can remove that pin, because these patches are not made for such a job.

About Bunions (pins) - dead skin folding back on itself - correct fields

Let me let me explain something. Step right into the knowledge. When you, when you, when you have a body, and then what you call, you get a pin in it, as we commonly know, which is a ?? die skin turning back on itself, or into it. (1:32). In a way you literally. It's very interesting this knowledge. I've heard a lot of work in the background with this. I explained to you how it works. Now we understand the knowledge.

If you look at the toe, and the big toe, and all the toes, do you get the pins here, on your upper ankles or whatever. Or do you get the pins here (bottom of ankle). We get most of these pins around this (toes) area, but why?. The strange thing is we call it a pin, but in a way, it's the skin of the man turning back on itself, leaving the Ca part of that amino acid, and literally creating another nail. But why does it happen in this area (Toes)?

Primarily when we wear wrong shoes, or something else, because of, in time, we change the composition of the skin in this area (toes), to the composition or fields of the nails. So we actually stop producing nails on the position of the foot. It comes by when you wear a tight shoe, and you rub it and whatever. But you change the field structure here. (1:34).

So many of you if you can understand it, you can change this environment. You don't need chemicals and .. Simple combination of understanding of Gans's will allow you just changing the condition, and more or less it should never come back. Or if it comes back, you wear the wrong shoe. Just put it back in the Gans which fits it. You change the fields and the skin will not change, creating Ca.

If you look at your toe, in a way,(if I can draw it 3 D). Your nail grows on top of your toe. But it has again, like your lip, we just talked about, a point of change, where the material when it comes, it changes from amino acid, the blood cells, the skin cells deposit their calcium and the rest of the energies, gets used by the body. Our nails is what I called once before, mortuary of the calcium's of the cell of ?? the man.

We don't have a single cell in our body, which does not contain calcium. And for the whole body, when, body is very efficient, the body of the man. When a body of the man

works with your legs and arms, and head. When there is more activity there is more change of fields of energy, that is decided in the past to be part of the active part, (1:36). which is the arms, or fingers, and toes. And then man saw a need, or the body saw a need for grabbing, holding, or digging, or whatever.

When the body takes the calcium from the femur, making your red blood cells, or your other skin cells to be created, from their interaction. It carries a calcium. It doesn't take it all the way back to go to the what do you call it, bladder, or to the kidney to be separated to go out through your bladder. The body is efficient, it deposits the Ca within a cell, in the tip of your conversion of the amino acid to calcium, and creates nails for you.

HERE >>

If you understand this, and now we understand as you call, about the nail on the skin. It's the same position. You have created that extraction point of calcium on the side of the foot. It's more or less if you take the what we call the lid cup and try it it should give you some results then because you change it, you should not grow in the future we must probably develop GANS for this job is a very specific way to do it. And you will see it on YouTube and then once it's gone you just need to every time you did something you see an error you don't need to cut it people rub it and they cut it and hacks Aksoy the grind it you don't need to do that because this environment has learned to what the call how keep the same structure change as your top because this bill is dictating this and nothing else energy fields is there so creates an application because it's the same as I said to you with a new enhancement without damage by moving we can create different conditions and this is how it works is a very easy solution to get rid of this what we call it toenails and labels you get people's operating shoes or the wrong shoes or pressure

R: I think they call it a bunion Mr. Keshe, that might be different, than what was brought up in this question. I think she's talking about a pin like a metal pin, or titanium, or some other pin.

K- Anyway, we add to the knowledge. If it's. If we are talking about titanium pins and things, we usually advise people not to use the systems and the any what we call, foreign objects embedded in the body. That's the rule we set up years and years ago.

Q: .. When turning an addictive substance into a food GANS to feed off the plasmatic fields, to get off the matter state of the substance and end addiction, by capturing the substance into a Nano coated Cu plate with NaOH and KOH, and then put it into a CO2 capture kit, to make a food GANS. Do you then add regular CO2 GANS to the food GANS, so that you will be able to feel the emotion of the substance, or do you just add CO2 GANS water, to the food GANS water before use. (1:40).

K- I'm not going in there.
R: Okay, it's kind of a long involved question.
K- No, it's not long involved. It's about the drug trafficking and the effects of drugs, substance. We don't get involved in it. In the way, he's looking for remedy, but then it

becomes a food, and then becomes the other things with it. And we don't get involved in this.

Q: … Also if I am low on the food Gans, can I add regular CO2 GANS to it, to replicate and copy the fields and multiply the food Gans, to make more of it? Do you add regular CO2 GANS to the food GANS and let it set for a week to make more?
K- Different people have tried different ways of doing this? And everyone finds the combination of? I know the Chinese do a lot of this. ?? I talked to one of them, how he does it, and how to replicate something. Each one has different methods. You have to find out what suits you.

Q: What gauge of copper wire are the field absorption Butterflies made out of?
K- I don't know. Shall we say something it's a trade secret?
R: .. I think you said that before about them the procedure how they're made is trade secret. (1:42).
K- Yeah, but it's not what you see. A lot of people think this is a straightforward, it's not what you see.

Detachment

Q: .. What exactly is detachment? To be to be detached in your understanding? Could you elaborate more on the subject?
K- Detachment means, it does not make any difference to you. It's being or not being. It's existence, or nonexistence. It's how things are perceived to be. Are you attached to a piece of clothing. Can you live without it? Or has to be there for you, to able to create an emotion that you exist. Or the way you want to exist. Why do you wear the same color of shirt when you go to a specific places. Because you're attached to the emotion it brings you. If you have no attachment, you can wear any shirt. It's not being important. We test the fire with gold, and we use gold to test the man, how much he is attached to materialistic ?/ world. They all say I am not attached.

Any other question.

To Replace Food with Gans Water - have to have a combination - spectrum

Q: … If we stopped feeding ourselves completely, what would happen to our body and health? And what would happen to our organs, (1:44). especially our stomach and intestines? How would we have to proceed to make up the missing 20%?

HERE >>

K- It's not going to happen in a process overnight. Depends how you call by feeding. Have you managed to replace the energy absorption, and energy ?? you need?

It is what energies you want. Then if you can replace them yes. And now we'll see things changes. For the those who have gone through the water process what cold drinking just

water but at energy. They tell you the first few weeks they lose up to 20% of the rate some rules a little bit less than rules a little bit more. But in general, you're, then the body adjusts to the fields which needs and the important thing is when you go through this process of not eating and use the gases, or you use the water with GANS us to do, you have to understand that if your body absorbs this spectrum of the fields it needs. And it doesn't put pressure on thymus and thymus to create and convert materials. It's very, very, very important for all of you who take that. If you go to the dimension app using GANS water only your gas, water should be covering all dimensions of the fields. We have built this in the Enhancement Unit, I have to explain to you something, as we talk about this the new Enhancement Unit with no dimension, the we don't stop making the Enhancement Unit, as you'll see the white ones or whatever, right. The two will now run parallel with each other, you will see we will test the enhancements. But in this Enhancement Unit, there is a reading sources. There is no just add, as we said you don't take any further you don't take any other things. The specific systems are built into the Enhancement Unit that it feeds. And what he feeds it takes from the environment add to his own body call it depletion. So it's like if you choose a cup, especially if you go in this direction, just don't stick to one cup combination for months and years to co create different gases on carbs, and very much it's just you don't want to eat banana all the time whole day. Now you don't see the banana, but you have created fillable and our body needs other things. If you go into these works with a lot of people are doing, make sure you create a number of different combination cups. That you create a spectrum of food, not what it's like you become a vegetarian, but your body will suffer with Admittances or I wonder and it isn't because mono cup feeding at the moment that other people do is a problem. That means you are not replenishing everything you're eating just vegetarian and one kind of widgets you have to change the vegetable you have to have. So those of you who do this kind of testing, make sure you make combinational cups. And when you're or drink the water, make sure sometimes you mix the water of cups together you know you take your sugar and you put a cream at it. Now that's what it is one is to sugar one's a cream, but that sugar and cream creates a neutron conditioner absorption in the body. And this is important for most of Knowledge Seekers which pulled out and then you have the condition of Sun Knowledge Seekers who don't drink anymore, not even drinking. They have developed next step is not the extension of the feeding of the soul. They feed their physicality in vitro way. And we see a lot of advantages a lot of work with this one. And we see

Mr. Keshe 1:49:11
literally be has to be done. You can't start Kansas only tomorrow and that's it I don't eat this waters which you will create as the new food has to come over a span of six months. You're gradually gradually do it. And then new generation of what are called cycle up now. We'll do that internally. We train it and then matches on the horse out. That demand doesn't eat a boy just learns to the soul to absorb and feed the body and it works amazing The body structure is solid, don't see any illnesses because the body interacts. The new cyclorama has already started on. That is not just you not drinking or not eating the body, the kidneys have to adjust, the stomach has to adjust. You have a stomach, which is built there to create energies by, in a way, converting the cells of the materials to eat. Now elinks elicits energy, what's going to do with acids? What happened when you eat while

you stopped eating, we met one of the guys well actually, he was with us for a few days on our Washington session of eating just because I need to pretend to eat I haven't used it for months, I think seven months intended. So I just because I don't want to look as strange. The whole interstate operation James man in a space will not have laps or digestion system, man in the space will not have a lot of impossibility of management to be a man on space, there are no oxygens. And no sticks on Mars or another planetary system. This is a bit over the your thoughts that are still in part dependent on the physicality. But the absorption impediments to me embracing the new size topologist.

Mr. Keshe 1:52:02
And you have to be very, very, very, very, extremely careful. During the time of transition. If you just take gases and doors of your home now don't even take when you talk counts as it means the water not the gases you never need to get, then you are those of you who have even passed up. They don't need to tell you not even know what the number of Knowledge Seekers were moved in that direction. But it is it has to be done with a lot of understanding. That law lot of work so that you don't create problems, and you absorbed the right fields and a lot of other conditions. It needs, months and months of preparation. And you have to go through a stage by stage where many many Knowledge Seekers. And as I said economical situation forces me to because I can't afford it. But now I know at least I get the energy which my body needs. Moments moving in that direction and technology we developed in the Enhancement Unit carries this it's part of structure.

Any other question?

People with Fundamental Beliefs - Radical Islam - Rednecks

Q: .. I have a question about the religions and religious leaders, especially the fundamentalists, the radical ones in Islam. We face hate everywhere in the world, but the ones who are not familiar with the Islamic belief system. It's sometimes unbelievable how they are collectively are radicalized since early childhood. Have you and advice how to cope with their mentality or belief system, especially with the male ones. I love how the UC works also on those demands as a collective soul, thank you.

Mr. Keshe 1:54:50
She established Can

Rick Crammond 1:54:53
I mean that they want to buy or kill all of us. So she seems to have trouble with the fundamentalist, radical people in Islam that want to buy or kill all of us. How to Do you have any advice? How to cope with their their mentality?

Rick Crammond 1:55:20
don't quite understand the

Mr. Keshe 1:55:23

we have to understand things. Yes. Basic needs to understand the culture and becoming radical to work the see to kill.

Mr. Keshe 1:55:44
I tried to look at this in a different way, even with the news we had yesterday, the massacre and you notice I said, Why do humans do these things? Why do we create hate for somebody else, or some just the color or path of belief? Or why that our way is the only way? Because medical isn't? The only way we'll be the elevation of this. We cannot change. I've been brought up then the environment which have seen radicals. And I know exactly how they are brought up to become an see everything else as a as a what you call it a bad thing. Because they've been from childhood. From then. Don't we say they become victims? And then we see the radicalism especially now talk about Islamic religion is encouraged by those who benefit by through the power and financial needs. I was explaining this to what do you call it? Someone yesterday we hear in the news that the Chinese government is taken as BBC has reported, apparently that that are wanting Khalid take radical steps against it Islamic groups in the mists of time. And the BBC is making a very big civil rights, what they call condemnation, that darkness creating this great nation of Muslims and in certain regions of China. But how come some of these people who came from these areas are more to the Industrial Revolution to the east, we don't see things with

Mr. Keshe 1:58:25
a lot of Muslims on the west of China in these areas Northwest in the other part, which now Islamic, controlled whatever, and are accusing that the Chinese government has taken radical action against China is not doing any other reason. It's not doing what they're trying to expose, because they tell us half the story. BBC does not tell you the other half of the story. Or the Western press doesn't tell you the other half of the story. Why the Chinese government maybe in some ways is too harsh, maybe in some ways is radical. But if they don't do what they're controlling, you will see the story of Texas yesterday, all over China. PBC doesn't tell you that these people in these areas, move back into Afghanistan trained to kill, to do whatever, for some of whatever they believe in another move back in China. And they're creating a new breed of radicalism a recent change. China is controlling it very much. Didn't have this problem. doesn't have this problem with the Muslims in the west coast and the rest. In the east. They've been added twice because of the poverty All the investment was done on the west on the East Coast and the Eastern nation part of the nation. And a lot moved from the power side to the others to as an immigrant to work immigrants, and they change and they don't look at these things. But those who are in politics, I always say, This is what Chinese government does, too. But there are other things behind it. This creates a breeding environment of the radical collusion. But to me, Chinese government has to deal with it in a totally different manner. But that's what they do is the way they see it is not to do whatever they're doing now is to create and they've done a lot of this work in a new way environment, financial environment, that these things cannot be abused by those who see their position of power. radicalism comes out of when people see themselves as a source of change than they've been themselves and they throw themselves and accuse others and the rest. In some governments can control it, some governments push to control it, but

some breed it. And it's not the exclusivity of Islam. We receiving Christianity therefore, we see it in Jewish religion, people who said in the bonus, but they are not as open as we see it with the Muslim with what but you have to understand the culture of bluster is backed by killing. When the Arabs came to Europe, they said to you say one sentence or we behave and how new Ian's got beheaded. Because the culture is based on killing so that culture, not to be killed, you kill and it's been then added to the flavor of words, books and holy books to fit into.

Mr. Keshe 2:02:33
This, the religious leaders who read this, for them feeling empowered. And those are in that way to take it up. And is not exclusivity or as you call it rednecks in United States and differentiate before they call it racism in different shape, or form. And then a gold standard is the same behavior. But when we give a name of religion to it becomes radical. It's the most radical group we've seen in the same way as the rednecks in United State. And they may have, but they don't report for this, the certainty. colorists raise risks and are embedded. We had a few of them occasionally that I've been teaching whether you don't like some of you because you're in the wrong color, but they just tolerate you have just a very inefficient image over time.

Mr. Keshe 2:03:57
So, it's not exclusivity, and it's no way to raise. So, it needs stuff that thing what we call change of the fields of this plant. This is what your lot are doing gradually and new technologies, we had to change the field. Let me explain this I was explaining this recently too. So, you see, we call it global warming, we with the addition of CO2 and then we seen in evolution of the time of this planet, how by increasing the CO2 by natural process, the Creator oxygen and undertaking life has evolved and become what it is. Now with against us. We are going through that process we are changing that field or that field will bring back that energy back into the environment. That man rubble animal But one step in the future once we see this change, because it's very simple, we just look what we want to look. But what I said I look at the Totality

Mr. Keshe 2:05:20
if you look at find it by show, we've seen this so many times that we don't even think about it is because we look at the wrong side of the world recall information. I have to find, Rick, do you have a picture somewhere where we have like cucumbers or marrows, which are two different sizes, the one way to get some weed out against?

Rick Crammond 2:05:55
That's a classic picture. But it's deep in my archives, I mean, have a look.

Mr. Keshe 2:06:02
If you look at this picture, you talk about what you call, you see what the GANS does and how it changes the harvest. But there it is, I found it. So great to have them. When you look at this picture, or this page don't look at the growth look at it, as change of environment has created a new race, new condition. They look the same, but not not

really the same. The one which has grown, the capability has accepted the invite new environment

Mr. Keshe 2:07:05
which we introduced with a GANS. So it's a new creature, but looks the same because we associated with and the people who eat it, they tell you that much more delicious, manly, in Chinese, under under bondage can tell you, it tastes more delicious, it has more butter. So we change the condition inside. It's not just the sides. It's very mean in the background, because she's done some of the work with a farmers in China, which she can bring it up if she can explain to us if she's still there

Mr. Keshe 2:08:00
No, I don't see her. She was here previously. So we see it as a increase in the size. But in taste and texture has changed to when we create so much cancers, we change the same as the inside, optics share, our emotion will change. We feel bigger, we feel more healthier. And this is why we go for mass changes productions of dancers in a large scale. We use it for the enhancement of the environment, whether it's use it for culture or other purposes. And this is what we are about this year, we are changing the environment. And that environment creates a new creature. New even it looks the same from outside but different emotion different tastes inside. I remember Lisa and John were telling us some times a few years ago that the people who buy the lettuces, they come back because they they get a different whatever from it. And they specifically go for that lettuce which they used to produce in the market. Because we had fields which interacts with emotion and amino acid after about the aftermath. So would we be able to create cancers that changes elevates the man not to be racist? Not to be radicalized.

Mr. Keshe 2:10:00
To save us what happened if we have access to one of these radical mosques or churches or whatever, and we add a CO2 water with some other gases, which fits into the motion and people will change. Muslims are one of the easiest one, to use gases to change that from radical behavior. I looked at it many times. And the now we have the knowledge, we can do it without touching. Muslims pray so many times a day. So we praise and every time they have to wash their face, they have to wash their feet to have to wash their hands

Mr. Keshe 2:11:16
if the Knowledge Seekers, these gases into the tank where the water comes from, or in the process when it comes out, and they wash themselves, it changed maybe with the red next we added into the whiskies and the beer. And with the jewels we add to the red wine and what we call Shamokin. But it's not we're not it's a change of emotion. And people just change.

Rick Crammond 2:12:00
And Mr. Kesh Ruthie is here now as well.

Mr. Keshe 2:12:05

As she was the bunny, you're there? Yes. Could you tell us because you had more experiences with the Chinese farmers, where they use the GaNSes? How they talk about the change of taste and change of texture and that kind of thing?

2:12:27
Yes, last time, I think to the farm with who produced the cucumber. I was, I was there and I directly just take one taste. It is really different. And even though the taste of the origin is is different. You remember fun. I mean, we take some, obviously and this is number two, his guest those government officers. And I remember everybody was there they say they this is so different cases of from the origin or the to come from what they had before. It's I call it it's remind me the memory of the childish at that time, we sense the the land is more nourish and there's no such much fertilizer, chemical fertilizer, so the taste of the vegetable is totally different.

Mr. Keshe 2:13:41
So it creates a different emotion when you eat the pleasure.

2:13:45
Yes, actually, I had a lot of different like products, such as those soybeans, and peanuts. It's totally different, even though the fruit the kiwi, the test, totally different. It's more like vivid, more earnings and the more light you feel that life.

Mr. Keshe 2:14:22
This is part of what we call the change of emotion, which they bring when we use. Thank you very much. Thank you. Thank you. So we see the change. We can do it in our foot. Or we can do it. And maybe we have to create systems which in the places where we see radicalism, though waves are there to elevate and we don't see it. People don't even remember why they've been added funds or where they read it. because we see it, people do things out of the pattern of life. And then they walk out of it when they see something changed. You see that in the structure of the British youth, British youth from age of 12, and 12, become criminal to 2025. And at the end of 25, they don't even live the life of criminals, because that was something they had to do, they sort of spending time in prison for it. But when they reach that point, they just walk differently. So the pattern can change. Because I see no more fun in it. They don't see any interest in them. And some still do stupid things where they use over you. But we've seen that so being British, and I started this very early how, how British youth become criminals, they become violent. And after 2530 They don't even want to talk about it. (2:16). That was something I did when I was young, I was radicalized, because I had to be part of the other group. Because I wanted to be, and it was something else to ??

Any other question?

Q: … had a question from John in regards to … the larger vegetables. Is this what happens with the civilization in the "Hollow Earth" when they grow 10 to 12 feet tall, and change their way of being?
K- I haven't seen one, I can't make any comments.

Any other questions?

How to elevate the Soul - Just by Giving - reaching through the soul

Q: .. First of all, you mentioned in the previous topic, that the elevation of the soul was the answer, that to raise them up. ..
How can I elevate the Soul of another person?

K- Just by giving, that's all. By reaching it through the Soul, nothing else. (2:18).

Space Travel is not lonely - plasmas everywhere in U

Q: … Why does being a traveler of the universe sound like a lonely expedition. Help me see the beauty in it, as you say?
K- It's not, who said? You are not a lonely traveler, you can still go with the spaceship, or even if you choose a place to go to, you still have to interact. Everywhere in the Universe has a field, as a plasma, as a soul. You have to interact cannot be alone. It depends how far your tentacles of the fields reaches.

R: You mentioned that people often travel in a pack of four, for example. Or not people but beings or entities let's say.
K- Yes.

You are connected with your Gans's - people feel calm - intention

Q: Thomas … I have a question with the Gans's I have in my house. I have you know these bottles, which you can buy from the store. (2:20). I have 3 of these size bottles, one is of Cup one, which I got from Dr. Klaus, then I have another one, which is CO2 and ZnO GANS amino acids are washed. And I have a third bottle with powder, dry GANS, which is of CO2, and Zn. Now, I have them just standing in my house. If I put it too close to my water, my water would take up the fields.
K- Yes.
Q: Now, if I just have them standing in my house, are they always giving up? And how far are they giving up fields,
K- There is no limitation. Once you establish, once you have it in your hand, and you position it, you have made a contract.
Q: Because if somebody comes to my house, they always. I feel that they're always getting sort of like, very peaceful, no stress. My dog, for instance, he is 17 years old, and he is say little demented. But his health is very good. Is that from these 3 bottles I have standing in my house?
K- I don't know. But when you have any kind of Gans, and especially you made it, and you place it. By placing it you have created the connection.

Q: No, actually the GANS I have one, which I received from Dr. Klaus. (2:22).
K- Yes, but you touched it, you placed it.

Q; Yes, I have it in my hands regularly. Yeah, I take it in my hands.
K- So wherever you go in the house, you have a connection with that field.
Q: And the people who are coming in new, is that ?
K- The fields are there, you create the fields. If they interact with it, yes. If they come across it yes.
Q: Wonderful. I was just you know. I was wondering, because I have these 3 bottles and everything. People really, when they come they get sort of relaxed, very relaxed.

K- It just depends on what the strength that thing is. We've seen people who have used these bottles in the house and they said, it changes color, it changes their GANS level, all sorts of things. People we have with aggression, they change into calm people. It depends what you put it, in the way you put in, and what purpose you use it.
Q: I have no specific purpose, I've just kind of.
K- You just put it there. So these are the fields which are the strength of the, what do you call it, what man needs more. Like emotionally, the Gans's, or CO2 to connect with it. Some of these Gans's are mixtures. I have deliberately, for certain purposes.

Any other question

Same Soul different bodies - Soul has no life limit

Q: .. How can a soul manifest itself in 3 bodies at the same time, such as Moses, the prophet Elijah, and Jesus? (2:24).
K- It's the same soul. Does it change when you wear a suit, or a swimwear, or you wear a sheepskin. It's the same man inside, it's the same soul inside. Souls have no life limit, where the physicality has.
Any other question

R: … Would you like to see the latest? The latest "Create the Future" design contest?
K- Have you put it back in again I'm saying
R; Yes. I'll show you here. Here is the Create the Future design contest …
K- Have you had any hits? It doesn't matter how many hits we get. It doesn't matter how many people vote, the decisions made somewhere else.

R: Yeah, well, we'll do well in the popular votes. Again, if you look at the number of votes right now, we're in second position in the popular vote, we're a long ways away from first who somehow got 435 votes, and everyone else is under 70. And we've got 92 at this moment. But we're kind of late in the game and rapidly increasing. So we've worked our way up that top 10 list very quickly and is now in second position. (2:26). And we'll probably maintain that second position, I expect. So we pretty much have that nailed.

If you look at the number of page views, this just since it's been less than a couple of weeks at this has been in, we're in the third position in page views and about to take the second position away from the, from this unit here. So it's kind of interesting.

K- What are your numbers again, 2030,

R; .. are at 2070. Right now just went up five or six in the last few minutes. And currently, this one's at 2145. I expect our unit will surpass that one in the next couple of hours or a few hours. And the first one here, this dance wearable artificial intelligence translator has 9,664 views. So we got a long ways to go for that. But last year, we got about that many views or fact wait way more than that. So I'm sure it will surpass that quite readily. And they're not increasing very much at all right now. So we'll see.

In case we're up in the very high percentile. And because we're in the aerospace and defense category this year, instead of the medical category. That's kind of a interesting and a free look at the number of views there. Then, of course, the universal flight enhancement spaceship unit is number one. And the second position is half the number of views. So we'll maintain that position of number one in views in the aerospace and defense section of this contest. And that should at least get the attention of some of the judges, (2:28). if not their votes this year. Yeah. You know, it's, it's worth a try just for getting the name out there and letting them know there's something different going on other than their little world of engineering that they're used to.

K- Yep. That's nice. This is something else to watch for next few weeks.

R: Yeah, it's kind of fun. I think so. We'll see. So let me give the brief instruction here. So people know how to vote for it. I'll put the link into the chat. And just put that in there. And you can go to the upper right part of the page, where it says login and sign up. And if you voted last year, you can log in and quickly vote for this year's. If you sign up, you have to go to a special page and fill in the blanks here. And your name and address and so on so they don't have any fraud in the voting process. And then you can log in to vote for the unit. And all that's found on that same page as the where the unit is there in that link. Alright, so thanks, everyone who voted and will vote and it's a chance to pay back a little bit in a small way for this knowledge, that we've been given by Mr. Keshe in the Keshe Foundation.

K- Thank you very much, shall we call it a day? Sure. Thank you very much indeed. (2:30). And hopefully we'll see you next time. And we'll see where we go, and what we can learn more.
Thank you very much indeed.

434 KSW Thursday, May 26 2022.

END

435th Knowledge Seekers Workshop; June 2, 2022

(Quick Index up to :40 ; Transcription done part 1, Need to do part 2 Proofing ; Key Phrases; Key Words)
(Auto Transcription by Elias)

Ready to start testing new FEU this Monday June 6th;

ENGLISH TRANSCRIPTION

(:22).
(Need to edit auto transcription >>)
K- Yes, good morning, good day to you. As usual, wherever you listen to this is Knowledge Seekers, Keshe Foundation Spaceship Institute, from somewhere on this planet, as we finished the teaching of last Thursday, and then we went to announce on Saturday, the new cycle of technology and knowledge as we broadcasted on Saturday, the 28th of May 2022.

As we promised, we are ready to start testing on the 6th of June 2022. The structure of this simulation of the flight systems. We have opened the door for every one of you to become a passenger of space. Further, we allowed many of you to come in and go through the simulation to see for us ,to adjust the system perfectly for the ultimate flight, within, maybe some of you will find dimensions (D) in the system. And some of you will find the dimensions in the system.

In that process, what was, and what it's about has been that, you come to Linz and you fly through the simulation system in Linz, and be considered all the time, for every single one of you, for the facts you make, how it will change, and what it will bring in, and what we need to adjust in our system. We did this initially, if you remember, in the Vienna conference, we brought the system in a different way, and we allowed the Knowledge Seekers (KS) who attended the conference, each one a few minutes to sit in system, (:24). and see.

We saw how each one individually controlled the system in a way, and we saw as I said in the teaching before, one of the Austrian Knowledge Seekers managed to stop the

heartbeat of the system, managed to tune into it. So, it shows we control everything by our emotion, by our fields. So after nearly two years of launching the Enhancement Units (EU), now we are in a position to test flight. Test it in a simulation of the structure which is set within the what we call Linz headquarters of the Keshe Foundation, where any of you can come in, we don't have a pilot. You are the pilot. You will decide in how you take the flight. We do not interfere.

We create a condition that you are ready to go for a flight test, and we are prepared to take you back when you come off the test. We have built 2 systems as I explained in the teaching, and you go from one system to another. And then we'll see, in a D of the Soul or D of the physicality (P) and how you monitor.

We will stay in the first two days, three days, are already booked. We only accepted about 10 people a day. We monitor because it's not just for fun, it's for adding to the knowledge, changing systems, that we get a perfection, monitoring how you go through the system.

Many of you, who as I said, attended the American teachings on Sunday night, one of us as Knowledge Seekers, introduced himself that he's been as what I call, a test pilot, through the first test in the system. And he explained his emotions and what he felt in the system. (:26). So, we are going into the phase of the next cycle of new technology, technology which has never been seen in public. Technology which will bring a new cycle.

As I said, in the past few days, I've been to every language teaching nationality teaching, relations of UK, English, or the Americans, the Germans and the rest, to explain in more detail to answer the questions that we've taken all the ambiguity out of what we call, this new technology.

What this T is, is what we have taught you from the beginning. We taught and we collaborated with the Iranian government to make the first physical dimension of flight system. We use plasma nuclear technology, to create lift and emotion, like a planet does, The planet Earth creates this, and what it creates, then it dictates what kind of life can live within it. Earth dictates amino acid (AA), which we are used to. And then this amino acid has a strength, this amino acid even if you want to call, it gold has an amino acid. So it has a certain strength and it allows , leads to its creation. And then we have a mixture of everything else.

So we have created the generation of life, that within the lift and motion, creates a cycle of life. Then we had to allow the work of the Universe to interact within these 2 gravitational (G) magnetic (M) field flight system, and the ?? life gravitational ?? system, which is life as we have it.

So if you go back to teaching, in the past 20 years, I actually started long before that teaching, my teachers and my professors, (:28). what I thought now, it's come together.

We have brought the knowledge of teaching, and what we taught, together developed a new science from what we call, the science of life of universe.

In the universe, you can fly, you can maintain life in a different ways. And we have explained to our past years, how life is. Life has two parts, has the energy part, which controls the physical part. Energy part, we call it a Sun, we call it the soul. The physical part is the interaction of the environment with the soul, which is created, which has led to its creation. And we maintain what we call, intermediary as we call, the soul of physicality (STP), which is actually the energies of the physical dimension. It's the Inertia to create the life, in interaction with the environment, which we call it, the physicality (P) of the man.

Now, the knowledge has reached that point, that we are ready to take man to the next step. As I said, in the teaching, I gave many talks around different chat rooms. And I said, I'll bring you correct ?? with me, that if you're not there, or you haven't been to another, and you can't understand the other, you will understand altogether what has been said in past few days, as we expand it to extend the knowledge.

We have brought the knowledge of creation, in totality, in the reach of the man. In a way, man, physical development, as I said, the biggest innovation man had, in the history of man, it was the wheel. Once the man created the wheel, then he started developing, separating from the animal kingdom. In a way, because now he could carry more, (:30). he didn't have the ?? 2 legs, the 4 leg of the animals, which he was relying on. And he, with it managed to grind the flowers down, and do all sorts of things, created the cars. As we call human race in the space, the "wheel" race, because you do everything with the wheels. You fly, you have an aircraft, that has wheels, you drive, you have wheels. Life without wheels is no motion life, unless we put you on a rocket, and you don't know where you're going to land.

In this process, now, we bring the knowledge of universe, which separates, brings an end to the cycle of what we call physical knowledge. Cycle of wheels, cycle of motion, with what we call, something circular you rotate.

Now we go to the spherical shape of energy, we call it a plasma. Stars have a spherical shape, Earth has a spherical shape, because it has a plasma, within it. The Soul of the Man (STM) works in a spherical shape. And as we say, everything has to have a dimension to suit the work.

When you see the Sun, with its size, and the Solar System it creates, you see, you need that size to create what we call, the atmosphere of the , or the plasma of the Sun. You have a huge, so many, whatever thousand million kilometers plasma, in the center, radiates out, and creates our Solar System. It has parts in it. it's emotion, its Earth. its ?? sphere, its Jupiter, and the other one is Saturn. You can name any part of this brain of the Solar System, the way you feel like it.

We cannot fit the Sun, (:32). with its enormity, in the center of the brain of the man. It doesn't fit, and it's too strong. So we have created the same star to fit the size of the body of the Man on this planet, in the center of the brain of the man. So we don't need such a huge plasma of millions of kilometers. We need a plasma of a very few micro (meters), because plasmas have the same energy, it doesn't matter where they are, they work on the same principle. They have access to universal energy, for the performance, for the survival, for the existence.

So in the space of the Universe in the Solar System of us, we need to reduce the system's energy when they come out of the plasma of the Sun, for the strength, as they go further out. For the stronger fields with the interaction of what bits left in the middle, create copper, zinc and the rest, on the planetary system of the planet. When energy in a way, reduces after so many minutes when it gets to the boundary of the plasma of the Solar System, with hydrogen and helium, which what we see with Jupiter and Saturn capture.

Replication is the brain of the Man. Instead of allowing millions of kilometers of space, we have developed a structure of compressing and taking energy from this center, the soul, the sun of the man, what we call, the brain.

In a way, we could take a filter in, to reduce the speed. And then as we reduce it, we use that energy for different purposes. The inner part goes for the functionality, the outer part goes for, the middle part goes for emotion, and outer part goes for physical interaction.

Where we've seen over years, (:34). we explain that the boundary of your brain, controlling your arm and leg, and in the middle of it, is different kind of emotion, and it's whatever you learned.

So in a way, it's the same thing. But as always as I always said, a plasma can expand as far, and to the limit, that is environment allows it to. Now we said, this universe can expand and then it has a limitation to it. As much as the fields of the Unicose allows it to expand.

The plasma of the Solar System of us, can expand in a galaxy as much as the other fields allow it, it cannot just expand wherever it likes. The compression of the fields allows the size, dictates the size. So in the cycle of man, that compression field of environment to control, to hold, is the flow of the blood. The blood is the controller of the cage of the M field of the Soul of the Man.

Because, as I said in other teachings, the dynamic eye, in a specific position, creates magnets. Man has learned, magnets in interaction with the, what we call, another metal creates magnetic fields, and current, and energy. And this is what our blood does, creates a M field to contain the leftovers of whatever is not absorbed with the brain, to contain the totality of the sphere of the what we call, the Soul of the Man, or the star in the center.

If you understood this, (:36). now, we understand the rest of the creation of our physicality. If we reduce this magnetic field cage, the weakness allows more fields to

extend out. This is what happens to us in sleep. The field strength, the heartbeat, everything else reduces by a very, very small fraction, and that fraction allows more fields to radiate out of the brain, out of the body of the man, out of the star of the man into environment. And then when it travels, it interacts. If it has somewhere a connection, goes to that connection, because it already has it. It just creates a communication line with the connection it already has.

When you wake up, this system, as it goes out, it gets back, it interacts with these filters you put in, and you sometimes deposit that interaction of the fields of the star, with the others outside, with the body. Fields are low to become what you call, a dream, releasing some of the information of communication.

In a way, our brain eavesdrops on a communication between souls, and then it eavesdrops, he remembers. Then you wake up and say, I had a dream. In fact, you didn't have a dream. You were cheating. You were listening to other people's communication. In a way, communication between your soul and the soul of entity. Being a metal, you dream of gold, be it grandmother, being your brother, alive or dead because you interact with the souls. Souls don't die, always interact.

Man dies, man has a cycle of life. The sun never stops shining. So it's the same of the STM, (:38). at the center of the ?? soul. And so if you understand this, you remember part of the is drop you did you became the spy on your soul communication with other souls. And then you say, I had a dream. That Oh, you forgot, you've never been told the truth about the how it works. Now you know, there is no magic. Your dream is eavesdrop of your physicality on a communication between two souls, yours and the others and many others. Maybe you're in the party. Some of the people in the party are alive, still in the physical dimension, and some are dead. They're in the space dimension of the fields, not in the physicality.

You see the grandma who died years ago, and see your cousin were just born two weeks ago. And you're all celebrating his birthday, his birth celebration. Then it comes if you understand this, for us, now, with all the teaching we've done, we have given you the gravity machine. We have given you the most powerful generator as a MaGrav system in the dimension of the should. You went for the crumbs as I always said. And we have given you the dimension of life, which controls in a way, the understanding of the work of your soul, the Sun in the dimension of the man, which we call it amino acid (AA).

here >>

So in this dimension, your magnetic field cage you call it, the blood we can interfere with. Even though you live a normal life, you're awake. If we create a specific field around you, (:40). we can start getting your soul leak, information, get in touch with, and go through the cycle of going to the party, where everybody else is having a party, all the souls, but you're on Earth in physicality. You're left out in physical dimension. But the soul is actually dancing with the others, the aunties and the cousins and the rest, and the grandmother, who passed away.

So by creating a new technology, of the space, an evolution in the science of man, we allow that field barrier to extend. Then, in that process, we have created two systems in the launch room of the Linz. One is in the dimension of the Soul, and one in the dimension of physicality. Because we can tamper with the field, outside your body, we don't touch your body, we got nothing to do with it.

It's very much, as I explained many teachings, you're sitting in the room, perfect, everything is ?? nice. Temperature is perfect. You see the outside, and suddenly outside gets cold, and you see a moisture on the window. Control of the temperature outside, has manifested the matter state of what's inside, as a drops of water. We control the temperature outside. And then that allows us, for you, for your physicality, to show itself, or extend itself to outside its D.

The man does not need the wheels to travel anymore. The man now has the knowledge, (:42). the science, the way the creation works. You had your time, millions of years. And we gave you a hand here on there, for what we want to do with mankind. When mankind reaches this point of maturity. But man became a little bit mature, and as is usual, became arrogant. And when we gave man technology to take man to space, man used as a weapon, as a nuclear weapon technology.

So we had to make corrections. So we had to bring a dimension. Simultaneously many functions, we set up to bring man to where we want, which is today. We, at the beginning of the talk, as I said, we built a nuclear plasma flight system. This is why we gave this knowledge man, to use the energies of the universe at a very high level, to create motion for men to escape the physicality of this planet. But what did man did, greed of power and money, created nuclear weapon technology. And this is now obsolete.

As I address the Iranian leadership, Ayatollah K of Iran yesterday, in talks in the Iranian talk (Iranian KF meeting). Your Eminence Ayatollah K of Iran, stop the development of the nuclear weapons technology of Iran, and open the nuclear plasma technology for the space. Bring back the pride of the nation, not the shame you have brought on the nation. The same we've seen what the Americans did in the Second World War. They misused the knowledge and the power we gave them.

But we did not stop. Because now you see as the what I call, disgraced, Prime Minister of Israel, used the plasma technology of Iran, which developed by the Keshe Foundation for the Iranian scientists, as a nuclear weapon, (:44). and brought more pain on people. But in a way it's needed, for man to learn his own stupidity.

But nuclear technology was brought to man to understand the fields, which will come on the development of this technology, man will understand, what the beauty nuclear technology has, what opportunities will create for man, that man could never ever dream. Mankind leaving the weapon technology and concentrate on a plasma space technology. You'll see the most beautiful live, even if you understand nuclear power in a higher level, which is not open to the man, is the pathway to the Creator.

But as usual, men messes everything up. Now we still are correct it. At the same time, we had to create a communication line, that we could speak to every man, in a man's way. As they say, it's a man's world. Man made the car. But we, in the process of knowing what is to come, we allowed, we brought the technology you call, communications, mobile phones. If you thought man was so intelligent, to get that on his own, you got a long way coming.

We brought man to that stage, that man could understand communication through M fields in a different way and form, that it's prepared when we bring the totality together, to be able to locate itself. On this planet, you use what we call, the satellite system, you use whatever frequencies, (:46). or whatever you like, to communicate with each other.

We have the same structure, once the man become knowledgeable, in the universe. In a different ?? scale, without any of these satellite business you have. M fields if interacted, become communicators of each other, replicators of each other. And this is what man has not understood.

So in a way, in past 100 - 200 years, we set out to bring man to understand many things and make everything physical, that he is happy he's done it. And as we gave you a leg with a nuclear, we gave you a leg with communication, now we give you a leg with transportation, in the D of the Universal Community.

I need nothing from this planet. The wealth I carry is more than what this planet can ever offer us. We don't need the wealth of a few thousands or millions. But it's the way it man ?? thinks and we spend the man to learn to be detached. We learn, we do that for man to be able to go to the next step. Now, we have created you, the first, the very first, what I call, cart, when the man got the wheel, and stuck something wood on it, and sat on it and attached it to the horse and or a donkey and you start rolling yourself. Now I can move.

The system you're giving you is literally cart stage, but you have to understand how to make the cart, and then later on you can develop it to motorcycles, and what I call, the Rolls Royce. Is up to date, and the most fast races, are cars, and everything else.

In that process, we are there to give you a hand. The new systems in Linz are that helping a first hand, for man to go. (:48). The what we call present satellite communication, the mobile communication, in next few years will become obsolete, because man will move into the dimension of the communication of magnetic fields, which any of us who had the beautiful NASA with all these things looking into deep space, nobody has seen satellites between the galaxies or whatever. Because it works with the norms of the interaction of the field.

With the new system, which we have launched, as of Monday, for you to come in. It's for you to start learning how to allow to reduce the strength of the cage, to allow, to be able to interact with others in the dimension of the universe. And then, if you like we create a

combination of the fields, which allows you, to allow this what we call, connection to be traveling, but where you want, you can take one of the rays, and give itself physicality.

In a way the Soul of the Man become the reservoir, and the river, because the line of magnetic fields and if you like you have a cup, collecting the what comes from the reservoir, and is manifested as what is in the cup, that water can go into the kettle , that water can go into the pot, that water can feed and fill another fish tank.

So it hasn't changed the characteristic the what we call, reservoir, the Sun. Now you still have the reservoir, but you manifest itself in the pot. So you behave as you are the source, now that it's more of you in the pot. (:50). So mankind can be in the system, but manifest itself in another point in the universe, another place, and in a way, if you make a cycle back, you can bring the water back to the main reservoir and you come back home.

So, with the new technology, what we talk is a reality, is what mankind has to learn, that the reservoir is within the Soul of the Man. We allow you to create that, rivers to go out. If you go out in the dimension of the ending up in a pot, we'll see you as a water in there, or as a water in the fish tank, and we can always suck it back, connect it back and return the water back to the reservoir. When you come home, and you say, I was a fish tank. I was a water in a cup. But what do you say, I went to see mom. I went to the party. I saw the grandmother. Because now that knowledge is available to man.

And then, sorry, the grandma was alive, but the mother was dead. You see all of them sitting and kissing and cuddling. The grandma gets you a glass of wine, and then I knock on the door. You have to wake up, or you say, I have to go, I have something to do in my physical dimension. You come back (to the physical D) with a glass of wine in your hand. You got it from your grandmother who was alive. If you know what to do with it, you manifest back in the system with a glass of wine in your hand.

The mother gives you a bar of chocolate, the chocolate you always loved, because she bought it for you from childhood. You come back with a bar of chocolate, it was not given to you in the dimension of physicality. No, no, no chocolate bar (because it did not come form D of physicality).

In a way, for the conversion of the fields of the matter existence, (:52). we gave you the Matter Enhancement Unit, the material Enhancement Unit, was in a way to get you used to, in a way, you can create matter. We did this with the help of Knowledge Seekers in the lab of Austria years ago, and we showed it. Our team in Austria sent these materials to be tested, what it is, what was captured, what was converted from energies.

In China with the work we did, we created water, and we could see it, because now it was another dimension. We knew what we were working with. In others we created emotion. In others we removed cancers. In others, we did all sorts of things over 20 - 30 years of research.

Now, what we're asking you is, come to Linz as many as you can, because we have to complete this cycle for man scientists to understand, to be able to complete a safe physical structure for man to travel the span of U. But don't forget, when you travel in the dimension of the Soul, you have no physicality, but you carry your physicality, because you manifest yourself in other points, because the field overpasses your physical body. Everything in the body gets fixed, because otherwise the star, the Soul of the Man cannot function. Is got mishaps in the middle. Be it the cancer cells, be it Alzheimer's, be it a piece of shrapnel. All has to be with the new strength to be adjusted. In a way to amalgamate the energies back into the star, where they actually came from. Interaction of the field of your soul with physicality dimension magnetic field of inertia has created the tumor, (:54). has created the depression. One ends up in interaction of the matter state you seen as a tumor, and one ends up in the matter of states of depression, emotion, tumor.

There is no difference. One has a physicality and one has the field. And in this process, when you land on the other end, the new space travel system, you are a perfect man. We are not offering you Med Beds or Bed Meds, or whatever. We are offering man, a new method of transportation, a new method of being able to travel the span of the universe. And in that process, we are teaching you to start learning step by step.

When you take your child to school, you don't ask them to write an essay about Shakespeare. You put a pen in your hand, then you allow them to draw a small straight line, small vertical line, horizontal line, how the curve is, when you give them a piece of paper to repeat, to learn. And then out of that curve and straight line, you teach them A,

and then you say this is A, and then the B, and then you teach them how to connect A to B, to make a "BA," the rest of it. And now we brought man to that process. Forget about your achievements, "oh, we have a nuclear weapon technology, satellite controlled supersonic bombs," have no value. Haven't you seen the scrap. The most advanced weapon technology of man to kill each other? Is it just a heap of a scrap in the knowledge of the man.

Any of you goes in the enhancement unit (EU), (:56). and his wish is to expand the fields of nuclear bombs, you will do that, they become obsolete. I have told that to the Americans and Iranians for years. I don't need to do anything, I just expand the fields. Your weapon technology has no work. You all have seen how easy it is.

You put your wires, beautifully copper working between two plays, and after a while it gets black, it gets plasma Nano coated. All I need to do is to do is to create a condition that all the microchips of nuclear weapon technology get Nano coated. No connection. But we allow this to happen, because man has to come to the point of understanding there is no power in killing, there is no power in ??

We test you extremely, extensively. Every, all those who claim more sincerity, we test harder to see, where the gold melts with the fire, and when the man melts with funds,

with money, with power. Now we see, one way or another, sooner or later, we find the limits of the , and we know we cannot go any further. The point of containment is done.

In this process, now, with all the technologies, which have been provided to man, we start the test. You are the pilots. As I said many times, there is no control room in this flight system, there is no toilet, there is no kitchen, and there is nothing, nothing else. To see it, very, what you call it. Do you remember I told you, you get the, when the man first found the wheels, he put a piece of wood on it, (:58). and suddenly it's a cart. You still see some gypsies doing it. We may do that, for you, to remind you, man has not gone far in knowledge of understanding.

But within this system, we have created the condition of the opening the fields universe, that man can travel. But at the moment, we do this within the confinement of the Linz. You are the captain, you go and say, I felt nothing. You go and say, I've been to Moon, and this is a sand, or a stone I brought back. You show it to us in your hand. We accept it.

You tell us you met the grandmother and you sorted everything out. We still have to accept it, because it's, you are the captain, you know where you landed, we are not there to tell you who's right, or who's wrong. And some of you go into System and come up without anything, "I didn't feel anything." Because you cheated your soul. You told to yourself, I'm going to see grandma. But in fact, I want to use the system to get some gold on the way back. You come back empty handed. You cheated yourself not us.
\
So when you go into systems, as I said to the Iranians yesterday, you have to go into this system, with the ethos of Mitra, with the ethos of Zoroaster, Think good about yourself and others, do good, and act good, and you'll achieve it. You'll become a pilot to go anywhere. Some of you will get touched emotionally, because it's overwhelming. As John told us on Sunday, you fall in love, but this time is not a kiss on the cheek. It's something more inside.

Then, maybe you go the second time and you find what's inside. (1:00). You find the operation of how you control that love, how you became to be a giver. When John speaks about the falling in love, it's not a physical love, it's become detached. When you fall in love to give everything. Nothing is important, and then trying to find out.

John explains that he turned the chair, because he moves from the D of the plasma into the matter state to see, and he says, about to see with the third eye. So these systems have different combinations. But slowly we teach you. Those who came, those who went, those who tested different aspects of this technology to reach the production of the system today, are all Knowledge Seekers, or people who needed the knowledge to do something with themselves, save their lives, get rid of cancer, go and see the grandma, bring the father and mother on the table. Why, what went wrong when you were alive, and we couldn't talk. Now we can and sort it out.

Knowledge Seekers all have been through these phases of it, It's not a theory. Now we allow you that chance to do, and we invite to Linz. In a way, come in, captain your own

ship, captain you ship in a way, that you will do the right things for the right reason. At the same time, we are not looking just for one, we have asked different nationalities and languages to come as a group. We want to see what happens when we put a bunch of you into one flight system, and environment of flight.

Germans are coming. I heard Italians are renting a bus and coming. I'm sure we'll see a bus from France. And the Dutch are on our way. Some Iranians are flying from other parts of the world to be here. (1:02). Americans are on their way, Mexican and Brazilians, and Africans, and people from all over the world are on their way to add, to put in the memory bank of this system. The totality of the race of the man.

When you sit in that system, whatever you have gathered over centuries through your race, will be shared with us. We don't download, we share it with us, because it's like a magnet, you come in. As a magnet, you put a magnet on a table with other magnets, it shares its fields, we take the magnet out, everything is still a magnet. But now everybody has the knowledge. This is how the universe works.

When we ask you to make your way to the Linz center, it's to gather that, to bring your balance information, for our work, what we have. I have told our team we need a fish, we need a dog, we need a cat, we need a leaf, we need a plant to go into the system. We are making the memory bank of the race of the Earth. We take a stone into the system. And we allow, it's like your memory bank from your forefathers, what plants not to touch, what to eat, the rest of it becomes Encyclopedia of the fields of the planet.

And then we allow it in a development next, for man to take the fancy of travel in any dimension. You need to be educated a little bit more. Now, since yesterday, we announced the reverse of the system. You go to learn without telling us, you use the man's rocket technology. (1:04). And you are very happy we are NASA. We dressed our people in the monkey suit. But we got to Moon as we saw, we had the fear, and we always have that fear, what happens if the thing doesn't jump up? Or the system fails? Man in that D of physicality on Earth of today, will die on the Moon.

So NASA makes a call to Keshe Foundation. Can you help us? We have the Russians who boycotted the Americans, we are not supporting you anymore to go to the space lab, after the Americans do whatever they want, if you have it, get up there and help your people. Now the Americans and the Russians come to Keshe Foundation. We have a stranded passengers. No problem. We should be able with the knowledge we have. We have invited the head of the NASA operation to come to Linz this week. They've been openly invited and they've been openly asked to watch the whole structure.

What do we do? We didn't send them out of Linz, so we have no connection with them. But Hello, they carry a headphone, which to the satellite system of NASA, connected to Earth, we connect into it. We put them on the condition of what we call, flight system that we bring them back. NASA there is no crisis. NASA we have no problem, because now we travel the dimension of the universe.

So for that effect, to perfect that side of it and our people understand it. Yesterday we launched what we call, the Mobile plasma testing. Which means any of you, which carries a mobile phone, and is anywhere in the universe. On this planet, you bought the mobile phone to take as a souvenir to Planet Zeus, to show, "Oh, look at these humans while they're working on." (1:06). What they are doing with themselves. You think you just go to other countries and other places, and displays, taking with you what we call, souvenir, to show, look, do, what they have.

People of the U have done this with mankind for centuries and Thousands of years. And now one of the best souvenirs we take, is man's mobile phone. Look what they think they're so educated, they've put a little thing together. And they've come from the four wheeler, now they're again ??

Now we use that mobile phone, we want to, we only need 200 locations to complete our structure. You are in Sydney, through the operation of the fields, we bring you to Linz, and you go back. Excuse me, we don't bring you to Linz from Australia to be on the plane for 18 hours, through airport, no Corona. We bring you out to Linz, through the operation of the system we set in the center, flight time, 10 seconds, maybe a minute, if you don't want to crash into the wall.

But we are not carrying you in the dimension of your physical body as man has been trying for centuries, or especially in past few decades to see if they can move one atom, and don't loose the bits of it, ?? behind atom never manifested ?? something on the position.

Then we send you back. In a way, we invite you for breakfast in Linz, you sit with other Knowledge Seekers, you explain to us how the Sydney was this morning. And you go back home, and you say, "I've been to Linz, this is a paper signed by Mr. Keshe thanking me for going there." And I'm coming back you have a paper to show, and you take a picture with all of us.

So we free this situation, (1:08). as of last Sunday. Come to Linz, go through the system to add the data knowledge, the Wikipedia of the man as I call it, in the dimension of the magnetic field. Then we open the channel as of yesterday. Only 200 people will go through this, what we call, transportation. We don't need more than 200. And we open the channels. Go on the channels and please sign from all over the world.

We don't want all to be Americans, we don't want to be all Chinese. You have a problem in paying from China, speak to our people the way the money has to come to Linz to the Keshe Foundation, sales offices. The way is set up, we control everything through the Keshe Foundation, Austria. We have registered companies in our process, we can do what we're doing correctly.

Then, if you're Chinese, we pick you up from China. We bring you. When you arrive in Linz. I have a very bad news for you. You only spoke Mandarin all your life. You arrive

in Linz, you speak German the way we do, or the Austrians do, and you speak English with us, the way we do.

Manifestation at the time of position in respect to, you will carry the emotion, understand when we tell you, as we had the example of, "you're a bastard," you say, no, I know the Father. Is not a bastard. It means you don't do the things right (only understand the dictionary meaning of word). You will even understand the emotion of the language. And this is how you will travel the span of the U.

Go on the site of the Keshe Foundation on the sales, in the store. We need 200, and we block off the 200. You're in Sydney, you're in Nigeria, you're In South Africa, you're in Brazil, (1:10). wherever you are, sign and seal the 200. Because we set the map of this planet. If you're listening to me, and you're on one of the ships on the oceans, please sign, we need to because, we need the location. Later on we understand. If you listen to this, and you're a submarine, naval man, and you're allowed to receive technology teaching, as many of people do, sign in, we need you under the water, too. And we want to complete this by Friday.

Priority goes to those who register first. The first days of the Keshe Foundation, in Linz are already booked. We have booking, we expect the payments and the rest of it to come in through. But as the Knowledge Seekers says, We are coming in, they can't pay, we come with the cash. Keshe Foundation has a specific registered, computerized by the Austrian banking and government, you pay us, you get your receipt it's good enough. But you have to confirm on an email, and you have to pass all the clearances, things we have that you can come in.

You can't just turn up, I am here. One of our best, good friends in Romania, he says, I'm coming in with my hammock and I sit outside till I get a place. Fill in the form, and the car park of Keshe Foundation Linz Center is not a residential place for hammocks. Understand, come with the family, come with the friends, because we need to secure emotion in these systems. It's not just, I'm coming there to do what I want. We want husbands and wives, father and mother, (1:12). daughter and father, the son and the father. We want to know that the love of the two, the perfect parents, coming with the son and father, will be locked into, that in the next generation, coming would not get a prostate cancer. When he's got a problem with his sin. He knows how to handle it through the interaction of the fields.

In a few months from now, maybe we don't put a timer on it, you know KF is very what do you call it, unreliable when it comes to promising time, because we keep on researching, we forget about what we promise, and we keep on carrying on developing.

We will introduce what we call, transit flight. Which means we don't need to come to Linz anymore. We structure systems, that you can go from New York, from Beijing to London for lunch, then back home in New York. Then this has to be sorted through international organizations. Immigration, calculation of who's going to be there. Everything else as we have created these problems for ourselves.

The birds flying across the borders of this planet from continent to continent. I've never seen any of them hanging a password on their backside. But man does, because man needs money, and the money has a lot of things to do, how the government can abuse the others, rob them, you control them. What they did with Africans, killed them in one of the largest massacres, and control a nation, and then weaponize it by the fear.

But this time it will not work. Then many of you, took the time ?? comes right? (1:14). You go from Sydney to New York. Are you carrying any American dollars with you, your money is not accepted here. You go from London to Tokyo. Do you carry any yen, otherwise "nee-yen" you get another nothing, nada? Because you don't. But as I said, we always do the right way, the things long before. We introduced you the Keshe coin. You'll arrive in Tokyo. I have an account set with the Keshe Foundation on a Keshe Coin. Welcome, we can spend what you want, it has the same value across this planet.

Now you understand what we set you up with. And we have asked one of our beautiful Knowledge Seekers, who knows this game, to start setting up this process for the Foundation, because he's an expert, he has expertise. And hopefully, peace and with his help and the knowledge he has, we will be able to bring what we call, Keshe Coin on the back of solid base of work of the Keshe Foundation, what we produce, what we have, and what other currencies allow us to be balanced with.

Many nations currency were backed by gold, but some of this gold was stolen, and some of them were stolen from the others to increase theirs. With the Keshe T we go with the work, the effort of the man's thoughts and knowledge, and we secure it that way.

So you can see we have already set you up. We see problem with a world governments to accept, how we're going to handle so many people, that can land in NY, in the White House sitting by the President, and they have no visa. (1:16). Then it comes for man in next few years to sort out this funny business with passports, and finding a solution of trust in languages and nations.

This is the responsibility of Universal Council and the Earth Council. Now you know why we set you up. It's time for you to get started and get ready for what is to come. Because once these people go into the systems, they come out of New York. officer stops them. Excuse me, where are you from, "I don't speak no English, I just came from India." Do you have a passport? "Unfortunately, I don't I just came with the KF system. It will not work.

We have to get internationally accepting the process of this technology. By gaining trust that you came from Linz, you will return back to Linz Keshe Foundation ?? will give a guarantee to the government. As I said in the next few weeks, when we start Mobiling you back to Linz. We'll ask the Austrian government to have an officer of immigration in the Keshe Foundation. We have to. "I have just come in, just to have a lunch, and say hello to the Keshe Foundation Austria and I'm going back. You're a transit, no problem. Then we build the trust.

Our team is there to produce 2, 4 or whatever we can, systems, that we increase the numbers in Linz. Then with negotiation with governments. We place them in airports. We place them in center of New York where immigration officers sits in the room, and you come in, you don't need to go to the airport, to get a taxi and come. You're in Central Square, you're in Hyde Park in one of the hotels, they setup immigration office, (1:18). and one of the systems.

You come in, "how long do you want to stay?" One day, but your soul will tell the truth, "I've come here to emigrate, but I want to see if I can enjoy for a month." But the soul says, this guy is lying to you, you is come here to emigrate. Excuse me sir, do we listen to your soul, or do we listen to your physicality.

Everything is set for the man to go to the next phase of maturity. Come to Linz and join us, or go and become one of the 200 people. We'll get you to Linz, and we let the Austrian immigration to know you arrived, who's arriving, documentation is very bad. And they sit there for you to come in.

It's not a "Beam me up Scotty," anymore. It has touched my soul, and I'll be there. When you come to Linz make sure, anybody touches any equipment by hand. Your time is over. No physical touch. You come in, you sit, you're given apparatus control. You hold those and you walk out. Don't try to look whatever it is. We stop you, you're finished, your time is over. I just wanted to look does not work. Because these systems are set to do certain functions and it cannot be malfunctions.

You come in, walk in, sit in your place. Do what you want to do. Don't touch what you're not supposed to touch. And you will see the beauty of it, and then we bring you back to the operation of the physicality. Don't wait. "I will come one day." That one day will not be here, to be, to add, to be part of.

Sponsor those who cannot come from South America. (1:20). As KS as long as ?? South Americans in Europe, which can come and add to the Wikipedia of the knowledge of the man in the systems. We ask you one question, and the only question we ask you is, when you come out of the system, write everything down, what you went through, what you saw, what you asked before you go in, and what you got when you were in. Did the two match, or was the soul going in for something else, and the STP going for something else, and the emotion was cheating both.

So we what you tell us, you saw the uncle, you saw a beautiful planet, you swam in the oceans of universe, you met Spider Man on another planet, we accept all of it. Because you were there, we were not, and you have to be true to you. Because if you line up a lie online, with yourself, you'll find out, the next trip becomes impossible.

This is why I said, I invited Ayatollah K of Iran to come into one of these systems, and we'll see if the sincerity is for the nation of Iran, or other things, which is not there. They will not walk into the system, the soul will stop them doing it.

I always said years ago, when Mandela comes, you will see what he said, what he did, and what he delivered. He'll be one of the very few world leaders, which will get into the system. Because he did not deviate from his path. (1:22). You will see, none of the world religious leaders will go in and come out the same, because the crimes they have committed is beyond, to get to that position. As we say, they sold their souls, for every criminality to be there. We don't expect any of the world leaders to go in and come out the same, if they can go in. It's like two magnets, when you put the wrong magnets in, the opposite way, it rejects it, you cannot come close to me, I am pure.

We see the change of the man, we see the evolution in the science. We'll see a new cycle of technologies and knowledge, which come out. Your president, His Excellency, President Biden says, in his inauguration and his election, and his work new technologies. The soul has been aware, that the new technology will change the dimension of the nations, is about to come, and now I here.

We are not telling you something will happen. Today, Keshe Foundation team are putting your systems for Monday testing it ready, to be there. It's made, it's built, it's done. Years of work completed. You cannot replicate it, even if you worked inside the structure of the Keshe Foundation, because there are many, many hidden things, which is hidden within, within hidden, what we hidden.

That's why I said, you buy a replica, it will not work. And you find out you go to Mars and half of your leg is not there. "Oops, I bought the fake one." It's not any more, buying a branded name, added us. But it's actually a fake one, because this time it doesn't fit. (1:24). And this cannot be corrected.

And we've seen one of our Knowledge Seekers, who we helped a lot, ?? defense, collaboration with the Russians and others, thinking he knows everything, created what we call, the Med Beds. And what happened to Med Beds, they come to Keshe Foundation past few weeks, wanting to add our technology, because their technology doesn't really work. As we say, the manure has hit the fan.

It's the job of you Knowledge Seekers to add to this knowledge to create a new cycle of man, cycle of man which has all the knowledge shared equally. Then when we bring the universal unit in a very short times, then you can travel the span of the universe, because now you practiced. You all agreed, everything is settled here, there are no wars. There is no one to cheat you from your soul. And then we go to next step.

I'm here just as an accommodator. I'm not here as any other point. I just brought the knowledge for you to gain, to bring the evolution in science of man. And as I said, to enjoy the dimension of physicality of this life, because Mitra promised me a lot of how this planet is. I had to come and see if Mitra was correct, and she was, marvelously correct.

The life of the new cycle of the man will become detached from physicality, the life of the man through the love of understanding the love of Mitra, which is in a way, the light itself, is completed through this cycle. You have to add to it, and then you'll find out, you cannot cheat yourself. You cannot cheat your nations, you cannot choose your races into something else. (1:26). We'll bring you the combination of the totality and we'll bring you the essence of the creation.

That's what I said, there is only one seat as a captain, and one seat as a passenger. Would you like to end up in NY, and your passenger in Beijing, because you two did not truly agree, that we'll both go to New York, and from there we'll go to Beijing. And then you say my passenger as gone missing. This is for you to be correct in interaction of the souls. Understanding of the souls, is not sitting in the car, going to see the mother in-law of the husband, and she sits in the car says, "wish I was going to my mom, and he can go to his mom." If he will go to his mom, you go to your mom, what happens to your husband, I don't want us to ?? stop half way. We agree we go to your mom, first, we have lunch there, and then we go for a dinner to my mom. Then you both have dinner together in both places.

Work with us to bring this evolution of science as rapidly as possible, achievable, by all his meant. We came to a few weeks ago, asking for financial help for what Keshe Foundation could not do anymore. This financial help is to bring institutions into operation, that this technology can be taught to all of you. It's not for us. This structure is set to, not to spend time to clear the past, but to set up a new dimension and direction, that the Americans don't have what the Chinese have, the Chinese don't have what the Iranians have. We open Institutes in Beijing, we open Institutes in Arizona, in Tehran, (1:28). in South Africa, in Mexico, in Brazil, in London, and the rest. These Institute's work together for the evolution in science of the man.

It's not for me, if I touch, I can create wealth beyond what I ever, you could imagine. But we still hanker and baffle with human race. We test the human race and we find the cheaters, and those who lie, and lie to themselves. They pay with their own process, not with us. We don't need to lie, because the people who lie, accuse others to be lying, because they know themselves to be lying ?? about everything.

Understand the process, work on the ethos of Zoroaster, on the ethos of Mitra. enter the systems. Think good, what you want to do good in there, do good when you arrive in the position, and the other goods.

You will find new emotions, which you could not describe, because these are emotions, which we never felt before. John tells you, listen to the American teaching, how he felt, the emotion of the fields from the head to the heart. We need to explain his emotions. This we call it the emotion of the plasma. Where the interaction of the fields dictates what P we'll feel, but we have no explanation for it up to now.

As I said, there are many emotions the man has never knew. Now you are witness to interaction of the field of your soul, and the STP. Make your word for it, which explains

it. And I think one of the ?? first people to do it, is those of you who go into the system. Feel the universal love. (1:30). Feel the emotion of being loved. And as John said, it's not a love as a kiss on the cheek.

We need the 200 to be confirmed, and completed by Friday. There is a structure for it, they'll follow. We need the those of you who come to Linz, as many as you can, to build up the full picture. And then we need to bring the two together. And then we go for what you call, transmutation on this planet. Then in the next month, it depends on how humanity responds to this situation, we'll open the universal transportation.

If you don't have the address, you cannot go. You need to use the knowledge of the universe to reach, ?? different part of U. You want to go to Moon, you land on the Moon of the Saturn. Yes. Oops, I made a mistake. On Earth, you have created GPS, and you have the mobile. We can track you, find you, bring you back. You get buried in an avalanche. Now there's a carrier mobile, y beam me up , through my mobile to the central control. Satellites are set. They don't need to come and dig you out. They move your Soul and the Physicality will follow.

As I said, once we complete this knowledge, death will be as impossibilities. Unless you decide to give the totality of what you put together, to the next soul. It's like your wealth, when you die, you give you wealth to your children. You allocate how much to each. (1:32). Now you do that with your soul. And then that leads to elevation of the soul ?? together and formation of you, you gathered, that it elevates the other, next generation.

Now you understand what Juggernaut has hit humanity. But the problem with this juggernaut it has no break, because it will keep on adding knowledge. It's a juggernaut of knowledge, Juggernaut of the love of the Creator for man. It depends on how much of it we can take. Where you can attach yourself in this juggernaut to travel the path, which is going. It's not there to harm, It's there to elevate the Soul of the Man, ?? to bring your life on this planet, that mankind and the kinds that live here, live the life of the universe, which means a peaceful life, which means a cycle in change. Which means bringing totality in understanding and eventuality of one or the other.

What we come to understand is, that mankind is ready for that transformation. And we have brought you the tools. But we brought, the souls we brought with us, we trust to make the tools, that it serves for the change of humanity. As I said, when we go, we take everything with us to do a job, we just don't go in there trying to find a solution. We brought with us the souls, which we know will do the job, and we implanted in those souls in the body of physicality of the man to work with Soul of the Physicality of the man, to deliver the technology and knowledge, (1:34). that you needed it to go through that elevation.

Now, we are entering the next phase. And we are there to greet you to start, to be the what I call , the astronauts of the next cycle. And how we go to the next cycle. One of the most important parts of this technology today, is what we released yesterday. That 200 people around the world are very important for us, because we then can send you out, and

then we can bring you back. From Linz we send you out, but we should be able to bring back those who need to reach the condition of elevation.

You cannot travel. How many of you on Americans, or South Americans in Spanish language meeting I think. we were told that they don't have the money to come to Linz. Can you get someone to sponsor us? Can we open a KFSSI channel for us. Send the funds to the KF I want a Brazilian to be tested. We'll find a Brazilian to be tested, to go to become a pilot, we'll find Mexican, we'll find African.

It's our responsibility to bring everyone into the system. Because then pieces of the jigsaw emotion of the Man, will be missing? Thank you very much for being there. We go through a break. We come back, I answer some of your questions regarding the flight system. And then we go into the teaching. And then we'll take if there's time for questions regarding the teaching. Rick, would you like to bring us to a few minutes of rest and then we start answering a few questions for half an hour or so and then we'll go the next.

Thank you .. we go for a break … (1:36).

>> BREAK <<< 435 KSW June 2, 2022 (1:42).

K- We'll take questions for about half hour then more teaching
(1:44).

Okay, let's see what we can do. Before we go any further, just as part of the what we were taught. We will go lie on Monday from the Keshe Foundation Center in Linz. For those of you who want to see when what because our margins come out of the system, if they allow us to show the whole processes they go in before you go in and when they come out. Last project, but we'll be there lying around about the first person will go in on about 10am in the morning to the first process. And then after 1130 every half an hour. The process of putting the next nine people through the system and If you can explain your way, maybe we open the lines, you can ask questions from those who've been through the process, how did they feel? Do they feel anything. Or, as we have one of our Knowledge Seekers, whatever we do, there is no emotion. There is no feeling, I don't feel anything. But in the center of the most strongest criteria, feel anything, but am I sitting here for and we watch the other people with emotion to go through it.

So on Monday, as we always been very open with our works. You around the world become part of the technological development and the change in the human race. We

don't know what to expect, we don't know what commitment the soul of the Mozhans have who go through the process. And in a way, (1:46). it's very many of us will watch it. We'll try to give this process live. We'll try to give this process every day, that it can be broadcast.

One of our Knowledge Seekers will always be with us, Dean will be asked to broadcast, be with us in the center. To carry this emotion, we have set up a small corner for interview, that you can explain what he went through. But we do not interfere during the process.

You cannot jump in when you're putting the suit on to go into the dive. So we are bold enough, we are eager enough, and we are correct enough to share as our Knowledge Seekers, if they want, to go through it. The work, the what we call, Flight Center will not be shown, the flight room, will be kept what we call, secure. And we already have the sixth, seventh, and other days booked to come in within what we want. Come in, bring the data of your race to be added to the race, of completing this program, that mankind can go to the others.

We use a specific progress development, that the knowledge within this system will be shared with the next system. It's like putting a magnet amongst magnets. When we bring in new systems into the Enhancement Center in Linz, they automatically will share the data which they carry with the next unit.

When you come into the center, you will see two units inside, which is now, and two units are set outside, that they will be loaded in the next few weeks. (1:48). And the fourth system will run parallel. Then we increase the number to 20 to 40 a day.

We have invited NASA scientists to join us, they'll be live online when you come on. The Iranian officials will be online, the American officials will be online, the Chinese administration, people and scientists will be online. People from all walks of life will be online, they watch it through YouTube or what I call, VPN channels. But you will be there. And I would like to see what Mr. Musk thinks, when it's all "musked up", or when he is all messed up, for what they planned.

Slavery of the man through technology is a heinous crime. And you have to understand, no race has that privilege. Not even the Creator Himself. Please ask questions and we try to answer.

Q: … will, these units store the emotion of the brain.
K- Yes. Man does not carry anything but emotion. Of course, that's the whole purpose. That's why we told you about Universal Council. Through Universal Council, a common language will store that emotion, common emotion of the race. This is why we went to the Germans, because Austria, it's all German speaking, and they're coming in busloads everyday, (1:50). to add to the knowledge. I Thank the German community for such a solid support.

It's, we are home in Austria. The headquarters of Keshe Foundation worldwide now has moved to Austria. And maybe as I said, through the development of this technology in Austria, Germany, we forget about what happened in the last what we call, last century through German. We become proud to the German, and add, the development of the new T. Maybe that's why as I said, we came to Linz, to the home of Hitler. To, not to repent, but to put things the correct way, the right way. And maybe the reason for him to be here was for us to come, to bring the beauty of the Creation to the same city, as he brought so much misery to man. We are thankful to the German community, and Government of Austria to allow this technology to flourish here.

Any other question

Q: … How flying it out of the Earth will allow the passenger to return to Earth, how will they recognize the planet Earth? (1:52).
K- You know, we let you do the bungee jumping, but we keep the end of the rope. We know how to get you back. Don't worry about that part. As a human, you sat in the machine, we gave you control to hold. As a human you left your fingerprints of your protein everywhere. We got you by the tail, don't worry you are not going very far.

R: .. The problem is more how to stay off the Earth I think then how to get back to it.

K- There is no problem, you will find the wish will bring the dimension. It's very strange. Some of you will go in and you come back and tell us how the birds feel, because you really wanted to fly like in bed when you into the machine. And we understand more because the birds cannot speak their emotion. We will understand the emotion of the birds, why do they do things. Some of you love your dog so much, that you for us, when you come back for the first time we listen to the language of what this means, when the dogs do these things. You love your cat. You love a painting. A painting is not just a color on the wall, it's made of atoms, it has an emotion. You'll learn a lot of new things, and then we'll add it together. We are there to bring the change, but the change is for you, not for us. Don't be afraid of going someplace and not coming back. Be afraid of what you see in the new place you can handle it.

Any other question

Q: … (1:54). Do I need to be in Linz, or can it be done from say, Australia once the fee has been paid to enter? Or do I have to go a slow plane and be physically there?
K- There are two bookings? One is for those who are in Europe and they can get to Linz. We go through that process first. Then you book in for the flight from Australia to here. That will be announced it says on it, that'll be announced when it will take place.

We have to complete the one part, to bring the other part. Then when we start are about to start flying people from all over the world and returning it. We have to this, it's a lot of work for our people in Austria. We have to get authorization from the Austrian government, the inspectors have to be, they might tell us please go to the airport, set the machine up, or we come to our center. We have to do everything legally.

Then we bring you to the next step, then we call for what we call, international flights, that you don't need to come to the center, then we have to have the agreement of governments, that we allow from Beijing, to New York, and where they will land. Then I'm sure the developers will come up with the systems of delivering, new systems of tracking.

Or one of the most beautiful thing with this is, you'll come to see the balance of the taxation across the world. (1:56). I seen this a long time ago, when I used to go travel around the world as a business man. That there is no tax haven for anybody to hide. In a way, you can live anywhere, we all pay the same taxes, and a percentage of taxes goes to Keshe Foundation for development of the technologies and other things. And then we bring what we call, "One Planet One Nation One Race."

The key to the change will come when we get unified taxation across this planet. In a way taxation is acceptance of the services. In the next few days, in a handful of weeks, you will hear that Keshe Foundation has become part of, as a .. honorary board member of building the first 4 advanced cities, on this planet, finance by nations. You're there that everything which is done, is done according to the science of 21st century, and what the Keshe Foundation sees in it. We are advisors in building of the ?? forth newest cities in the world.

We're there and we thank our people that are here amongst you, they know when it is, and what it is. You will see the Keshe Foundation being part of the development of new cities. That what you call, the old and new put together. We have asked our people to keep it all, people who know we have received our invitation, (1:58). we have received our whatever. And you will hear the Keshe Foundation will be, and we have this with two or three other countries that is coming up, building space cities, which have no limitation of P. And then we go to see, what's the next step? I have asked them people who are here, on board, please do have a reveal this, until it is announced in the press and is shown in what do you call, public?

Any other question

Q: .. more people are concerned about tech implants and especially Jefferson mentions dental implants to those who have dental implants, can they enter the unit?
K- Yes, yes, yes. Because dental implants are a different thing than other implants. Even pins, if you have a small pins in the bone connection, you don't have a problem. But if you have an implant in heart, if you have pacemakers, if you have Parkinson computerized system in your, under your skin, if you have inbuilt ear system, we advise you for the time being, no. Especially if you have (heart) valves, even if you have a pig valve. We prefer you not to. If you have a.

We had a question from Azar this morning, women with breast implants they had a cancer, and then silicon. At the moment we advise you not to. But there is a technology

we can transport you. But that, at this moment is only available, if you do that for you, on earth.

Because we take it as you are, we delivery you as a package. And in one of the teachings last night, or this week, I explained how it works. (2:00). We know this from what we call, the test which were done in European EU, .. center in Brussels. We ?? Derek, we took, we were invited to give a speech about this new technology to the European Parliament. They took one of our materials, and they put it under the X ray system, and it says, doesn't show anything is here. In a way, we black box it. But if we black box you in the condition of Earth, we can only deliver you on earth.

So you can go from New York to .. Beijing. But at the moment, we prefer not to deliver you on the Moon. Because we have not gone through the evolution of understanding the work of, or setting up of the structure, that on the Moon, you convert into the dimension of the fields of the Moon. (Otherwise,) you end up as a man, and there's no air (on the Moon).

It'll be interesting how in the near future using the old technology of the rocket propulsion and the Spacelab, people will go to the space, into the Spacelab and bungee jump into the space and see what they become. It will happen. It's inevitable it will happen. Americans and Russians will make a lot of money from this Spacelab, where people go in with the system, and in elevation of the soul, they jump into the deep space. Would you become a jelly, would you stay as a man? It will be interesting time for us to come, to see.

But at the moment, we prefer to keep people with a shoulder, hip, if you have a fused spine, all out of it (not use the system). (2:02). If you had a heart problem, likely to be out of it. Then please, when you go in, leave an address where you plan to go, that we know where you've gone. We can bring you back. But in a way, we want to check when you arrive to get there.

Any other question?

Q; .. she's booked her flight basically, during the during your talk here. And wants to know how many have booked up to

K- Not really. Put it this way we are well booked, .. Keshe Foundation never releases data. We are well booked. Most of the people will unless there is a one or two places left, you're into third and fourth week some of you now. We have people who are booking into the June and July, so those are getting filled up too. But our main interest at this moment of time, because we have enough people coming through, is the booking on Mobile system. Please book it. We need to come in.

If you just, if we receive a booking with no payment, we just cancel it, because we have this experience in Eindhoven. People just booking to block. We don't accept the block. Unless they are people we know, they tell us they're coming. They are Knowledge

Seekers, we know very well, that they want to do it. We have two or three of them who want to do it. Yes, we accept. We have from England, we have from Romania, we have from another country. These are people we know very well for some situations, they want to bring, to ask for us to accept, (2:04). we accept, because we know them very well. But if you make a booking just to block us, and there is no payment. Forget about it. We get a lot of people booking even in the shop, in the store they book goods, but then they (don't) pay for it. They hope that we'll ship it for them, and they get away with it.

HERE >>

So it has to be complete the cycle, and the Keshe Foundation team will respond to you, your time allocation, when is allocated for you to be in, and stick to that location time, because when you miss it, we will leave at five o'clock every day. So make sure everything is done. Your emails, your communication before you arrive, you have to have a time of going to the system. You can't just arrive, oh, I go there to get through. You'll be sitting outside for weeks. We'll make sure, that people who respect the work will receive it

Q: Azar … Are you going to stop the flight test after 200 people, or are we going to test for month after month, so someone coming in December can still enter the system?
K- We, the 200 is for those who are outside, they cannot come to Linz. The one flight test in Linz, we're expanding the numbers. In a way, we can go for 10 years, because this knowledge has no end.

But then we spread the systems into Arizona, which is our headquarters, into our offices in Tehran, in our building in Beijing, or in Jin and Jiang, or other places. And to our structure in Mexico and Brazil. We won't have any nation out. (2:06). But the Linz, the headquarters of development, will stay that way. We don't close it. But if we see dwindling of numbers, we just stop the process, because we've gathered enough information in next six weeks, eight weeks. Some people are trying to push to come in July. We try to accommodate, but the 200 for what I call, "Mobile" has to finish. It's got nothing to do with the test flight from Linz. It's important for us to be able to bring back in and see how efficient, how fast, if everything set up. When we send you out, we have your tail, as I said with the bungee jumping. When you're out, how we bring you in, is important for us. We need everything to be tested. It doesn't matter when you are on the flight path, if you become a blind spot in one of the satellites, won't end up in the ocean or somewhere. You'll land with us. Everything is set to. The knowledge is complete. It's just our people learn, and then replicating the systems.

Any other questions? We most probably bring a halt by the end of July, August to, fights from Linz, and we go into the Mobile system. We are not here to offer a service, we are here to gather information and data that we can ?? our ?? problem.
Any other question.

R: Don't see any hand up ..
K- KS (2:08). understood everything, that's a first.

Q: Neil … Many, many years ago I met the Dalai Lama and learned about astral travel and how the monks can park their bodies in retreat and travel. And going through my journey of experiments. I've learned how the fields have worked, and how they interact. This is the same thing that they discovered themselves through their own routines. Am I correct in that?
K- Do you want it which way? Do you want me to sensationalize it, or do you want the facts. …The elevation of the Soul of the Man and doing what now we try to bring, is not exclusivity of the KF. In the passage of time, many, many people from the race of the man and other races have elevated to understand this, and have managed to do it. Sometimes they do it with cheating, and sometimes they do it, because they know what they're doing.

As you remember we had that huge religious leader of you India, (2:10). with I think 50 million followers. And he was getting a status because he could pass 21 days (without eating), and I showed him to (be a) cheat in the Inzanno (Italy) and he had no value.

But if you go back to people, somebody who did this perfectly, and I watched him, was Buddha. As a person, he completed the cycle of understanding of the separation of the soul and the man. The rest tried it sometimes, and it didn't work. And sometimes in the knowledge of what we call, the passage of time, some of the what you call, prophets reached to understand it, but they couldn't complete it. So there's it's not exclusivity. And some people read it, and talk about it as if they've done it themselves. But when you ask them to do it, they don't know how.

They are the preachers and not the teachers, and there's a big difference between the preachers and the teachers. This process is not exclusivity. We are not the .. The minute we claim you're the only one, is the end of the work of the Foundation. The progressive development of man, of the races of the Creator is endless. We are here, and I always said, as Messengers not claiming to be the owners.

Q: Salomea ..

Happy birthday to Rick. (2:12).
K- Oh, Rick, is it your birthday today?
K- Well now that you mention it, Yes.
K- Oh, happy birthday. Happy birthday. We don't say how many years you are, how old you are.

Q: .. You have a small poem on the chart for you dedicated is flying on the Moon with the help of transmutation at the soul level like a butterfly. And I hope everybody will enjoy is a small point and these dedicated also for the flight system.

My question is related with my own experience before speaking to Mr. Keshe, I had an experience with some colleagues from Romania from "Braga dil " team they invited me

to go with them in a travel at the soul level with the spaceship created by our own soul, and they, we give appointment at one o'clock in the night. And not surprising, ..
K- Can I tell you .. something from what we have seen from "Braga dil" group in the past few weeks. We put no credibility in their work.
Q: (she interrupts ..) .. Yeah, but believe in me because I never tell lies.

K- No, but I just tell you. I know, but "Braga dil" group in Romania, very good people, (2:14). but they claimed a lot .. but didn't deliver and when it came to point, they found excuses. So please, I tried to make this very clear. The "Braga dil" group in Romania. We have not seen any credible work with them. .

Q: .. I'm sorry for this, but
K- Do you have anything else?
Q: Let me to ask you a question.
K- Okay ask your question.
Q; .. And I was able to travel (she starts arguing with K)

K- I do not want to . Let me explain to you something. Do you have anything else to tell? No.
Can we have another question?
We respect you Keshe Foundation but the group has no credibility. And I told them the same couple of days ago.

Do you remember, we have the Japanese … who came and did a lot of things. And when he got to the point. when we got to the last final point, they were forced to lie and cheat, because they were after the American passport with the American government. We see the "Braga dil" group in the same way. unless they can do the show other ways. And it's a shame to see them associating themselves with the work of Keshe Foundation.

Do we have any other questions?
Q: Sorry, I wasn't able to listen to you because I was interrupted some internet.

K- Do you have any?
Q: Yes, do you know the color of, of Venus of or Mars? Because I have seen a orange dark orange color. I never learned it. But just I have seen this color. (2:16). And I don't know which which planet it is. It was my impression was Mars. But

K- I think Wikipedia can tell us that. Rick, would you like to go there? And see what color is?

Q: For the reason I came to, to meet you, personally, because I had this experience. And I know that all technology is inside us. So we as a technology. And if you want to discover new technology, we have to discover our own human being, structure and function and interaction of the both souls. If we have internet outside, we have internet inside, all what we have outside we have inside and also this flight system is inside ourselves. And if we want to utilize this technology, we have to understand you and you

understood, and congratulation because you understood this. And you're now to humanity.

Mr. Keshe 2:17:18
Thank you very much. Thank you.

2:17:22
Yes, for this reason, I

Mr. Keshe 2:17:25
thank you. She's coded but intimate. Rick, do we have any other questions?

Rick Crammond 2:17:39
Yeah, well, you wanted the picture of Venus here. So just trying to bring that up. And that's, I don't know what it is it is say it's a nearly featureless and colorless sphere with a uniform cloud cover. So it's basically sort of white Do you might say, in visible light, that's what we see.

(2:18)
Thank you very much.

Any other questions?

Q: When we arrive by way of Mobile, will we be naked? Or will our clothes come with us?
K- That'll be interesting. Very interesting. I explained that I think one of the discussions in last week. If you come from Australia, sitting on the beaches of the ocean and enjoy your time, and you end up in New York Central Park, where it's winter and snow? How would you turn up? Would you carry the suitcase with you with the winter clothing? Or would you be clothed to the physicality of man. A lot of you will see, you end up with a new feature, that the new environment gives you what you need. You won't end up ??? ?? want in the pit, call it

You will see your soul will adapt to the presence of time and space. This is how you will change in the space. If you wear cotton clothing, when you go to Mars, excuse me, it's a protein base and has no existence on the Mars. You'll be as naked as a parrot. But do you see shame in the life, because you will not be the shape of the human being, because you adopt the environment of time and space. You got a lot to that. (2:20).

But you have to understand the Soul of the Man, will not bring man to shame. So that should not be your concern.

Any other question

Q: .. Will we see re-growing of amputated body parts?
K- We shall see, I've answered this to a group of doctors in the past, but we shall see

Don't forget to used this technology to grow parts.

Test if you are from Earth or somewhere else

Many of you, if you go through some tests, prior to .. entering the systems, you will know, if you come or you're part of the structure of this planet, or you are guests of this planet. You know the physicality of man, and you will see deviations from that physicality, which adjusts to live on this planet.

If you go from Soul to physicality, and same soul to another physical, that change will carry on, because the soul has to exist in the environment of presence of time. And many of you, who are passengers of the Universe and being here, you will see this. Be really for a lot of new things, and do not dismiss with this new technology. With this new knowledge, that we released as a technology. (2:22).

Be open minded and respect the work, and the presence of the others. They, some of these people have been with us, and they brought us a lot of good. We don't remember it, because we thought that they are humans. But they could not do anything, but just to bring the cycle of man in a progressive way. They have contributed a lot to advancement of the human race.

Q: WL Ruthie … Good. Because for poor connection of the internet, maybe I missed some information. But is that you mean you have to choose the way of to connect with Mobile phone? Because I was in Beijing, I also can apply in the project and go to Linz.
K- Yes, yes. Come to Linz in a few seconds.

Q: Ah, so in China, we can do that. Because, you know, just a couple of weeks ago, China government has announced like very strict policy to go abroad for the visa application. So that means all the Chinese if they like they can if they have their mobile phone and they can book the ticket

K - We love to have the Chinese.
Q: That's good. That's good. (2:24).

K- there is no Corona That's great. That's a very good news because I was wondering what is that and there's just so good to hear you clarify that. I'm looking forward to be in playing.

K- .. We go through the process we have to complete the first cycle and then .. Our team has to understand it. Keshe Foundation Scientists are there. We just don't put you in a machine and go away. We are there to gather information. We are there to gather data. We are there for our central brain system in each system, to gather information, and see what it's gathered. What is the knowledge, where do we go and how are we

This is not a show, you buy a ticket just go to a show and we have an operator there running it. We collected the data you give us. That's important to us. And it will be such an audit sequential system to go in.

But I advise you if we see anyone touching any of our system, Your term is finished, because we don't want a fingerprint on the systems. Even our technicians wear gloves, that they leave no fingerprint.

Any other question

Q: .. Brazil (finding a translator ..) (2:26). .. (2:28). Happy Birthday Rick, thank you for everything. A person who is a murderer when this person enters the unit, what happens with this person?
K- We cannot refuse, because by going to the system, he could be elevated. We are not there to judge. He will know the interaction with the system himself. We are not there to judge. As I said, the world leaders who commit crimes, they'll never walk in.

So, it's for the Soul of the Man to decide the entry of the man.

Q: .. How this person will handle herself or himself, by dealing with the consequences of (what was shown) to this person. disperse when they enter the units?
K We were not there when the crime was committed. (2:30). But the soul was. It's between him and the soul, and his physicality, and STP. We are not there to judge. There are no courts in the U.

Any other question.

Q: .. Can this units help the person to remember past experiences?
K- If it is in the D of the STP, yes. If the STP wants to remember, wants to release the memory, yes. It's not going to what you call, reincarnation, or reviewing, or going to the past. It's the memory of the past, if it's there, and there's a reason for it to be added.

Any other question. You've got to realize, nothing's hidden in this structure from the Soul of the Man, and Soul of the Physicality. And they don't lie to each other. (2:32). It's the physicality which lies, but not the STM.

Any other question?

Q: .. If we've got a person with diabetes, type one or two, that goes along now to have this experience. Will he come back recuperated from his ailments?
K- Shall we asked for those who go in. Because we ask people what their condition is before they go in. You ask them Live.

When we get people out of the system, if they want to go Live, to share, to elevate the KS, it's a live, interactive Zoom sessions from Monday. Whenever you see the Zoom call goes open, try to get in. We don't announce what time it's going to be that we have to run

a show. We do our things and when we see it's the right time, we open the channels. We could be open anytime.

Any other Question

Every Element releases full spectrum of all plasmas

Q: .. Question is about the explanation of the Alpha, Beta, and Gamma rays are their plasma, any of the elements in a special condition can release one of them or not?
R: I guess is plasma that element release one of them.
K- Every element we have releases full spectrum of the radiations in the U, From Hydrogen to Plutonium and above. (2:34).

It's just that you have to get it in the condition, which it releases it. If you go back to the space reactors of the Keshe Foundation, which we tested and it's in the patents, we create ionization, but ?? of course centralization, through the interaction of the helium.

We can produce X-ray from water. And we can produce Gamma rays and cosmic rays from hydrogen. Not Tritium. I can get gold to produce so much radioactive material, that you don't want to go even near it.

This is, what we tested in the space reactors in Iran. This is how I handle high breach nuclear material by hand. I know how to deactivate them, through my blood circulation the fields I create.

Every element has a capability, and not a capability, and actually does release a full spectrum of all the fields of radiations of the universe. It's not just because we see water as a water. Sometime the water you touch, as the water you drink is the most lethal weapon in another part of the universe, because it releases radioactive material radiation.

It is what, (2:36). we perceive through the lack of knowledge today. I always said, if you ever get to see the Iran senior scientists, who were monitoring my work in Tehran. I never wear gloves, I never have a fear of handling nuclear material.

I learned at a very early stage, in very young age, how these things are created, and how I can change it. When you open an X-ray tube, you see it different, even in a specific way, you release Gamma rays and all sorts of cosmic rays, from X-ray tube. My father used to tell me, you are crazy why do you do these things. I said, I have to understand

Every element has the potential to release a full spectrum of the fields, from hydrogen to plutonium, and all their isotopes, and other materials. Or the interaction of certain materials against each other.

It's beautiful, if mankind comes to understand the beauty of the radiations, how to manipulate them to create fountains of life. Our scientists have a fear of the unknown, they call them all sorts of things. But there's a beauty in Gamma rays and X-rays and

Cosmic rays. And if you know how to produce it, that allows you to create the next stage for production of the fields you want, (2:38). G and M and the rest of it.

I have mastered in playing fields, creating fields, and targeting what fields I want to create. So don't, never be afraid of radiation, understand how to manipulate it. Radiations are like a jigsaw puzzles you put together. If you get a gamma ray targeting the field of alpha, "ah, you see the most beautiful things in the universe."

If you get the cosmic rays interacting with beta rays, you see some of the most beautiful fountains of energy ever seen in the universe. We see these in the structures of planetary systems or stars, or galaxies, but we don't understand how these fountains of energy comes ?/ together. The majority are from radioactive material, or the radiation, or what you call it. We only guess ?? ?? there are millions of them. And their interaction releases fountains of energies we see in the universe

I remember when I was very young opening the first X-ray tubes, and my father used to go nuts. You don't touch these things, they are contaminated. I said, they're contaminated to you, because you don't know how to handle them. I know what I'm doing.

And sometimes he used to sit and watch me baffled. (2:40). A nine year old, 10 year old boy plays with these tubes. The explanation is that opening the liquids, ?? the oils in it all sorts of commotion, if you ever opened X ray tube. The mirrors, the reflectors, the god know what. But in fact, you can just tilt some things and you go from alpha to gamma and beta, and go to cosmic rays in the same tube.

Any other question

Q: .. how can we use those elements, or those plasmas in the conversion of elements. You kind of answered that. He also wants to know the amount of vacuum in our setups.
K- Which vacuum, which setup. Do you think we are going to give you a trade secret.
R: I thought you might say that with the would be specific to any particular setup for sure.

Q: .. Would a mentally disabled person who enters the unit, return with normalized cognitive functioning?
K- I would love to see somebody going through that. (2:42). I would love to see the outcome. But if you're mentally impaired, we cannot let you in the system.

Q: Jallal .. From Monday, you will open the Pandora box. What we will do with the sandbox?
K- Just to practice before you get to the Pandora box.
Q; What we will do with the knowledge what we have?
K- It's part of the technology. You have to add to it and understand more of it. It's not finished just because, what we put into this system. It's an amalgamation of what we have taught you. Why do you give up? Because somebody else made a machine. You still have

to make your own machine. Don't chicken out. I see the discussion in your plasma secret plasma chat room.
Q: Yeah secret. You're the secret one. (2:44).

K- I explained to one of your team how to convert the MaGrav units energy into energy, usable energy. And he has not worked it out yet. But
Q: He didn't open it to us.

MaGrav power units disclosed to Tehran factory

K- The new MaGrav units coming out of Tehran factory will sort out all your energies, problems you had with your MaGravs. Iranian scientists have been disclosed how to convert it and now that works. I hope they understood it. But the Tehran factory will produce the first cycle of generators, if they understood it correctly. They actually produce electricity, when (but) you give it free away to the electricity board (back to the power grid). They produce one kilowatt, and (but) they sell two kilowatts, and you produced that 1 kilowatt for them free.
Q: Back to the transformers.
K- Yeah, I pull my hair, how many years I told you what you got to do. ?? Some day you'll understand it.

Q: You know Mr. Keshe, I am really, I am very happy, and in a way I am sad.
K- For what?
Q: Okay, I am happy for what is coming from next Monday and what we're going to open. And I am very sad, because when I was there in Linz, nothing came.
K- Because we ..
Q: Wait, .. you took me when I arrived, you will give me something to eat, and bye, bye.
K- Yeah, because the system was .. We should have let you to go in it. As I said that system, in Lnz, the one with a chair in it, has got heavier.

Actually, it's really interesting, I think it's something I can tell you for a joke. (2:46). Because this company, which did the lifting for us from upstairs, downstairs, or whatever. They had to bring different machining. Last week, they have sent us a bill for 16,000 Euro, just to lift the machine, and they had to change it, because the machine they had wouldn't lift the same thing, or whatever. I think it's part of the bill.

So it was there, but we couldn't let you go. We tested it in a way, in the original exhibition center when you came. And we saw when we put the system on, with the interaction with the environment, with the magnetic of others, and we had to readjust it.

You most probably felt it, but because you're not aware of it, you walked away from it. Only one person has been EU under operation. And there was a reason for it. And that's the head of the Keshe Foundation, Ella. You've seen the pictures of her being in the system in operation.

We blocked people going in. We added weight under the systems for it not to move, but it was adding its own weight to it. You came in, but you're blind to the knowledge. If you passed the system, you already interacted with the system. But this time we let you go in it. Because we toned it down, in a way that it can work. And we adjusted it, that it can work. And it's taken us two years to do this. (2:48). That it could be done.

As I said before, the teachings, I stopped going to the lab, because it became impossible to finish this job. It was just going from one development to another, because as our team was understanding more, we had to tell them more, to add more. So I said, if I stop going in, at least we get it done. And then we can add the rest of the knowledge later on.

What you see is the knowledge up to now, which our team can understand. Those huge elevations and .. modifications to the system. You might come in this time again, Jallal and feel nothing. But this time you are in charge, not us. But it is interesting, in the first few people we put through, we put one at a time through. And then we put two at a time through, then put three at a time through, then we put four people at a time through. It's combination of, creation of specific fields, which we are looking for, and to see what the effects are.

Some of you might pay to come in for one test, but what we see on the results, we'll put you through three, four or five times through the test, to become a pilot. Then some of you halfway we might stop you because we don't see any reason for it, to go through, because it's the wrong intention. So when you come next time I'll give you a free ?? ride, Jallal.

Q; Thank you. Happy to be part of this Mr. Keshes. Thank you very much.

Any other questions? (2:50)

Q: .. So when a person sits in the craft, is their soul projected out of it to fly, but still tethered to the body, in it?

K- We are not launching, now they used to use the rockets. Now we'll trajectory the souls. No, that' not our job. You decide where you want to go. We don't have a soul what you call, propulsion rockets.
R; Soul catapult.
K- Yeah, You're the captain of your own decision.

Any other question

HERE >>

Q; Dan mentions when I land in a cave in our mountains? How do I see what's there? Will the light be from me?
K First of all why do you want to go in the cave? Is that your wish. As someone said, in the talk, would you see through the third eye, or what he calls it?

Race in space that light comes out eyes to see

There is a race in the universe very much. When, it's like we know, when you put a torch out to see, this race has created and adopted a special way in the structure of their vision, that they can light through their eyes, in a way they create a light for their eyes to see what is in front of them, when they go in the dimension (D) of physicality (P). It's like a, not a laser, but it creates a field dimension, we call it the light. (2:52).

They see things in different ways, then we do through the eyes of the man. There is a race, which sees only the soul of entities, and collection and strength of the Soul. When you look at a piece of wood, they don't see it as a wood, they see the soul of every atom, and how they interact.

They are very, very special races .. which have developed niches, I call, in their existence. You'll see it now the Pandora box is opened, There is one thing for sure, is that if during the testing, we see our friends from other parts of the universe, we will not reveal that identity, where they come up. It's for them to explain if they want. If you're in a combination flight with others in the same, when you see this, it's your responsibility to hold the sanctity of the what we call, their wisdom and their life. You are responsible for their safety. You are obliged to respect the integrity of the life, in the universe in any shape or form. When we put 4 of you in into systems, maybe your own soul doesn't know your dimension, (2:54), because it's become some human dimension , convertede, that we are not aware of the origin. The Soul of the Physicality (STP). and if you see manifestation of light, or other things, just respect it. Decide in secrecy with us, not just with us, with those who are in there too.

Any other question

Let me let me say something to to all of us to understand. The systems we deliver are universal systems, which means to belong to all citizens of the U, and not exclusivity of man. And please respect that, because then in another system, in another part of the universe, you become that strange thing and how do you want them to treat you.

As I always said, you are a national, as long as you put the hat on, put your foot across the line of the nation, you put back here, and your restraint that's why we created One Planet, One Nation, One Race, that you are all member one structure, and One Nation. You will be shocked. A lot of you, with what has come, and what is to come, and how.

As I said, to one of our friends, (2:56). ?? See is that nowadays, you get the Romanians, in Vienna, they'll go to their own restaurant and the shops, and the Arabs all go to their own restaurants and shops. In a very short time coming, we'll have structures like this, which allows the soul of the people from different parts of the universe together to build up because now they know who they are. And they stay in the shape as they were in their own original dimension. You might walk into the bar, and then in that bar, you'll

see a bunch of green things moving around with 20 legs, respect it, because now you entered to the bar where the citizens of the planet " Dit dop " or whatever, are there. It's a new game, it's a new change, and we have to learn very quickly. Prejudices will bring the demise of man

Enjoy it, and you will see the beauty of it. Because it brings a lot of diversity, and you might even in a way, don't forget your past, and don't forget your origin. But enjoy the mixture. I always said, mankind if you understand what is about to come with this technology, becomes like the English people. Forty years ago, the only thing you had in the corner shops was fish and chips. And then the curry sauces, and people got the taste of the curry sauce, and then the ?? salsa, (2:58). and then the Chinese came and opened up. And now when you go to England is one of the most cosmopolitan nations in food in the world. Then it's next to the Chinese, Chinese, and next to the Samalian, and next to the other one. And the beauty of it is the mix each other's food, and they give you a pizza with a curry, with the Chinese sweet and sour, and something else on the same bit.

And this is how the man should be. We become not cosmopolitan with this new technology of this planet, but we become cosmopolitan through the word of the system, universal enhancement system, that the citizens of the U respect each other. Because you pay heavily for it, because you will be isolated, ?? nothing else.

HERE >>

Mr. Keshe 2:58:56
we have to learn new weights we have to learn new things we have to be proud as part of the structure not be racist as its nationalism, racism as normal in the workup. kind of find itself so nice. And don't go in because you're going to be ashamed or to be shamed, though does a suppression. If you go into the system and you see other races, as we have created a universal field system embraced. Thank them for being here to do the same when you watch deputies that also lives

only a few locks off for a very big shock as I said to one of Knowledge Seekers Recently even a hit with a Juggernaut and you don't know how big this channel is because you were never prepared once a beaut
(3:00).
 If it wasn't that beautiful what is to come, I wouldn't have stayed here for thousands of years, to make sure you haven't missed the ???

Any other question

Q: If there's no time travel future or past, why can't I access through memory, the experience of another soul?
K- Who said, you can't find a way, with somebody who is prepared to share it with you/.

You know we invite people to come to our house and we give them our culture of God go to the Indian guy gives you the curry and the Chinese guy give you the Chinese now we have to say the same thing but in a universal level as we go through

It have to be done very fast, otherwise it creates problems if it's done very slow.

But please, if you're in the units and you see things, respect them. Don't run out pulling your head, screaming, I've seen somebody green running around. You never know what he sees in your soul. He should be running before you do. (3:02). It's gonna happen, you watch you wait.
R; Maybe you'll see the green monsters running outside of the machine going Yeah, humans

K- help you know, I always say that will be the two girls sitting on the branch one white about Brown. Brown brown one cannot make you to taste the chocolate. So we have to try with chocolate we want to try. And if it is, there's just imagination of us.

Mr. Keshe 3:02:43
Any Okay, well,

Q: Why do we sometimes have lucid dreams?
K- I don't know.
Q; What stage are the reactors in China? At which I saw the red lights? And what about the bright plasma sphere reactor you presented?

K - The collection of the knowledge and the units you're going in?

Q; Let's imagine anything. What about tattoos? Will the soul of the ink particles materialized? In some shapes or forms?

K- I don't know. Would you end up with the same physical body? Right? That's the question you're gonna ask yourself.

Rick Crammond 3:03:52
You have to have a body in order to tattoo it is full of fur, (3:04). then it'd be hard to tattoo for example.

K- Don't know. We are we are in for a very good beautiful surprise of knowledge and technology.

Q; What is the option with a medical shunt placed behind the ear as far as entering the flight unit.

Mr. Keshe 3:04:23
Moment

Q: In one of your past experiences on Earth. Did they put you on an upside down cross?
K- Have they done that to you?

As I said that I was talking to one of our KS, and was talking to the father and explaining what is about to come what is now coming to Linz. And as I said in the teaching, he said this is antichrist. They've said when the Antichrist come these things will happen. So we have to wait for the Christ to appear. Now it's time for it. So I don't know if you had a Christ Christ when the system comes up. So we have to wait and see we've been cross upright, downwards

Any other question

Q: When these flights are approved, what happens to those in the aeronautical sector that stewards and pilots from people in the security sector airport terminals, (3:06).

won't be they will not we are not looking for approval. We are testing it up with and the system as we said are we have registered with the Austrian Essbase people in the way that setting about the space system and they are not looking for approval we are not bringing is just you who Captain so there's a beautiful law. It says you can do a direct yourself. So that's why you're the captain. We are not flying you.

I used to have a friend. Everybody different is they must not and he was a purchaser in our company. We brought him in to talk he was there he couldn't bring really was there because he was the uncle of one of our directs and I battled with him so long. I said can we buy knives we are setting spoons, forks in our shops but we're not selling any knives we want says no way as long as I'm here which he actually said to the end. He wouldn't buy a knife and the very first time I asked him that why I own to find that you know how much we lose is that I sold in the very first shops, a knife, somebody came bought a knife from us and he went and killed somebody with I don't want to be responsible for it. So the major chain store selling spoons and forks. He used to buy sets without a knife

Mr. Keshe 3:07:52
so it's not us it's what you do yourself with it. Which you are responsible for it

Mr. Keshe 3:08:04
free provider Swati this you use it and you can misuse it this technology this system does not ask that you don't work with physicality, you work with the soul the condition of the fields is suspended

Mr. Keshe 3:08:30
that's why we call it simulation

Mr. Keshe 3:08:38
you are used to flying the box or the back of a cart or a chariot or jumbo jet now you learn a new flight system. You is you who decides I'm going to the shop to shop and then

because the soul and soul of physicality and physicality agree you get this body moved on the street you get the boss you go to the shop or you get in the car you go to the shop you buy what it is.

Now in stock doing getting out getting walking, get into the car getting a bus to get to the shopping center. Now you take the soul shop and then manifest yourself in P and then you do your shopping and you come back the same way. What It Takes you're not waiting on the bus stop sitting two hours in traffic job. Now it's a one second job in a very new future because we've seen this system in other parts of the universe. You will have initially to they make it very much if you remember the old way and the new way you go to shopping. The old lady used to sit and put the numbers one by one. And then it says took you 10 minutes to get one trolley because she had to enter anything. And now you go in and just to zip it and now you go to some shops who put everything in the basket that gives you the price without you doing anything.
(3:10).
We go through that technology development and evolution. And then we see the the massive, rapid deployment of the new sciences. These are what I'm going to teach you in next coming months and years. You'll be baffled. You'll laugh what the teaching of today, Mr. Kesh going to teach us. It took us there and teach us what is today because you don't understand it. You need to understand.

We have to get the majority population to understand that it doesn't become exclusivity. And those who get the message show the door eMusic back Moses. Moses was one of the turning point in education of man for us. The greed of the men feared more men of the Create if you go by ratio, Moses killed more than Hitler did.

So we learn other things. So you are the customer to decide.

Any other quersoitn

Q: which was for the CO2 setup, that was discussed apparently I think you mentioned something about that a couple of weeks ago. So he's looking for the vacuum setting for that CO2 setup.

Mr. Keshe 3:11:48
It says see oh you setup

Rick Crammond 3:11:55
you figure it out yourself? Basically. Yes. (3:12).

Shall we call it a day or do you want to go into the teaching session as needed? 12 o'clock we've been here or two years.

Rick Crammond 3:12:09
Okay, sure.

Rick Crammond 3:12:15
What, what do you mean going into the teaching session.

Mr. Keshe 3:12:20
We go already with the teaching to next week. Join us next week from Monday, keep your resumes open and you might learn something very new as our people go through and be switched on. And we allow you to talk or listen to the chat to the observation and to the expense of people going if they don't want to share it you see nothing but if they want to share it, we open up the zones we don't wait nobody up we just put his own channel recorded and we just added ABC the and the rest of it.

We did that with the testing of the 129 (Tesla) flight system. o know one component, the AI system and the how is the for all of us to learn something new because you're doing it and you're sharing it and join us please we'll pull the 200 number as fast as you can. As you're doing with coming to Linds. Essentially a lot of buying tickets and staying around the airport and hotel and everything else we we bring you only send you back your experience. Thank you very much for today. And I hope you're having a wonderful time those of your problems with the system and experience new emotions, new feelings, new understanding, and be generous enough to share it and those of you who listen to it exactly as the experience of the Soul of the Physicality.

(3:14).
See you next week.

R:

K- It'll be interesting if that during that time of Tuesday afternoon. Some of the people going to now, German's, I think booked on the seventh day They will share their knowledge with us what they went through the system and Universal Council members learn from what is gonna come to them and what they have to deal with.

We'll see how it goes if we get to that point, because I'll be monitoring it in the background, and see if it is there. We have interesting point. Universal Council members can ask questions from the people if they'd like to share their experience.

Thank you very much.

435 KSW June 2, 2022

END

436th Knowledge Seekers Workshop; June 9, 2022

(Quick Index 10 p; Proofing Transcription done need to do; Key Phrases, Words)
(Auto Transcription by Elias)

KF first man to land on Moon was successful on the 6th of June as promised; New flight EU without physicality is loading up its memory banks with the plasmas of the life of this planet - like an Encyclopedia; Bring back leftover equipment from NASA Apollo mission to Moon; Soul of Christ will appear;

Introduction to Quick Index 436 KSW:

On the 6th of June 2022, Mr. Keshe fulfilled his promise to take humanity to the Moon. Galib of Netherlands was the first man through the KF new space flight system to land on the Moon, instantly by traveling through his soul, and his sister Mariam was the first woman to land on the Moon. And now many people are traveling to different places in the space. The space travel for man has begun.

At the moment, we have the testimonials of the passengers, which we all can share by listening to and receiving the elevation of the soul. Mr. Keshe has already moved on to the next step, by being able to carry a glass to the other side. While at the Moon, the pilot was putting sand into the glass to bring back to earth. However, from the earth's side we could only see his hand moving in the glass, we could not yet see the sand. The energy fields of the Moon's sand is in the Inertia and physicality field strength of the Moon. The "empty" glass contains these energy fields, it is then put into the Material Enhancement Unit to try to materialize it here in Earth's Inertia field strength of physicality.

When then succeeds it will be a game changer. The scientists will not be able to say that it is just imagination. We will have something physical. Then we can also bring back NASA's Apollo Moon mission's leftover parts, which they said, they left on the Moon. After analyzing and confirming the parts, will mankind then be ready to accept, that the change is here and now, and we all will have to agree to world peace.

For us as Knowledge Seekers (KS) the change has already started, and now we understand that we can connect to the Flight Enhancement Unit (FEU) in Linz with our souls and join the elevation of the soul of humanity immediately. Listening to these testimonials makes it more possible.

There is a huge amount of knowledge in this summary, so let's just focus on part of it. What took 30 years of traditional spiritual practice and meditation in a cave, can now be done by going into these FEU. All of the participants speak of feeling powerful energy in the head and body, being purified, and feeling oneness, peace and love. It's just like when you hear people speak about their spiritual experiences. The difference is that they are immediate, stronger, and a certain level of control, and they last longer, this is still to be determined, but the people report being able to connect back to the system simply by thinking of the system, and they feel again the warmth and energy in their head.

The main preparation for the system is to cultivate the attitude of giving and wanting to help others to elevate their souls. People that already have a mature spiritual practice tend to go deeper with the system. The effects of the system tend to grow as you leave and are away from the system. It works with your environment to fulfill you sincere wishes.

Over the next months, as more people use the systems the plasma fields will grow in strength and diversity. We will have an Encyclopedia of all the best things on this planet, which will in turn help in bringing about the change on the planet.

A few points to remember.

We will be able to invite guests of the Universal Community back to Earth;
Now the STM is free, it doesn't need to wait for you to sleep to travel, it's with you when you're awake.
If humanity becomes a cancer in the society of the U, we have to sort it out ourselves.
Systems contains within them everything from MaGrav to Pain Pens;
Make an appointment with your family members and try to visit them with the soul - bring some confirmation of your experience;
In future we will not even need these systems - room will be empty;
Systems communicate with each other making M field noises;

You expand your soul over the physicality, then you travel;
Fox News Organization controls 89% of world media - they have banned any news of KF since 2012; We don't need the Fox when we communicate with soul;
Once we start moving people through the systems the governments have to react and decide what to do with the technology;

ENGLISH TRANSCRIPTION

(:12).
K- Yes, good morning, good day to you. As usual, wherever whenever you listen to this series of Knowledge Seekers, Keshe Foundation Spaceship Institute knowledge. Yes, we are ready to fly, we are ready to fly beyond imagination. As many of your joined us yesterday, in a broadcast of the people who went through the flight simulation. Usually, organizations when they organize these kind of excursions or tests. They do one day, and

then they see what might happen, and then they do another flight test, maybe in six months, or some years down the line.

We have developed a fully comprehensive system. And with that, in the hand, Keshe Foundation will continue on a weekly basis flight tests. We have another session of 10 people, this time totally German, as we trying to load up the system with what we call, (:14). European, and Aryan what we call, memory bank of the Wikipedia of the information. They'll be with us tomorrow. And then on Monday and Tuesday, more people will go through the same system. Tuesday will be only a morning session, not an afternoon session. And then, from the following week on, we'll test only Tuesdays and Wednesdays.

This allows our team to upgrade, it allows to run the productions and everything else, to produce new systems to come in. Because when we run the system, we are all there, if anything needs to be adjusted. If it needs to be what we call, setup, takes a lot of time and energy. And more or less two days a week, flight test is more than enough for the Keshe Foundation for next two or three months. We think that we can come cover what we're looking for.

The experience of 6th of June and the seventh of June on both the American side of time zone, and the European time zone gave us a huge insight. The insight is very simple, man has achieved a dimension of knowledge, that will it can dictate, choose, and decide. This became very, very clear in our testing.

In the process of tests done on the number of people who came into the what we call, the fight zone was very simple. They are in their own dreams, they were in their own dimensions and directions I call it. As we said, the responsibility of the new life, new technology, (:16). is to work between the physicality (P) and the Soul. That the 2 interact. And this became very clear in the process of the teaching of and the work of last days of tests.

People are in a dimension of the Soul, and with the voice of a man to the physical dimension, we ask them to fly, and instantaneously they take that position. They want to fly, or they don't want to fly. They want to go where we ask them, or we request them to go. We asked the first people to go to the Moon, and we heard in the testimony of yesterday, it's instantaneous and they were on the moon.

We ask them to fly, we don't create condition, and they go where they want to go. One swims the oceans, and one goes somewhere else, and one goes to the Sun. And we test to see what we promised, connection between the Soul of the Man (STM) and Soul of the Physicality (STP), and this has given us a new what we call, incentive to go further in so many ways.

In the test coming up, we know the souls, which are there, and we know the souls, if they can be there. We request a specific what we call, mission, specific things to be done. One of them made, what we call, what we promised from the beginning, manifestation of the

Christ, bless his name. We'll ask some of the people who go through the system to pay a visit to the Soul of Christ, bless his name. If they can do it, (:18). if they had the connection of line, they will come back and tell us, how he looked, and what he had to say about his time.

Then we go in the different dimensions (D). As I wrote, in the communications, we have with NASA cooperation in the United States, we have offered them two options, provide us with the exact position of the Apollo landing. The way our Knowledge Seekers (KS) on Tuesday paid a visit to the Moon, we request them to pay a visit to the site. Is there such a thing at the moment? Is their system's left behind decades ago by the Americans.

Then we show you how we'll change this. We'll ask them to bring part of what they see leftover at the site, if possible, back with them. We'll ask the travelers to come back with pieces, evidence and confirmation. If they cannot bring it back, or they say they got it, but they couldn't be back, we have to adjust our systems.

Do not forget, we introduced you the Material Enhancement Unit (EU). This technology exists inside the new flight system, which means what is gathered is energy of physicality, can be converted, maybe we have to fine tune it.

Then, as I have requested again, from the head of NASA mission to Mars 2030, to provide us with the location of the Mars systems, which they sent it to Mars, and they work for a while. If they have any pieces, (:20). they think it needs to be repaired. We can be in position of, and see if we can repair, by people who go to the site.

These are not what we call, talks. What we've seen, what we've observed in the system's of past days, confirmed to us this is a reality, it's for us to find, fine tune and deliver.

Discuss 5Plus1 Talks through EU - Soul

We'll bring you in groups where we think, from Russia, from United State, from the head of Islamic Republic of Iran, Ayatollah K of Iran to meet, through the soul of people in the room, to discuss the solution to 5plus1. We'll solve the problems within the confines of the flight system. We have to try, we have the knowledge, and we have the responsibility with what we have developed, to deliver.

Last night I was talking to a very close person to me, one of my cousins, born the same time, brought up the same way, and he's a Sufi. He's a very devoted Sufi. He said, Mehran what have you done? I do this through energy. I said, yes, I know you've done this for years. But it's you. Now it's a system. Now we can travel.

He said, I could never travel, but I can transfer energies to people who are sick. And I know what I do with it. He said, you've gone beyond the knowledge. (:22). And as a Sufi I accept you have achieved, with what I have seen in the videos of yesterday, "a break in the knowledge of man."

We have to understand, these are the realities we are going to face. We have to understand, that the game has changed. As I've said, this is just the first step. As You are what are what I call, "the naughty children, playful," many of you will come with different desires without telling us, and you'll go in there and see if we can achieve your desire.

As I said to the first person who went through the system, a simple thing. He went through the system on his own. And then we brought in the second person, which is from Netherlands. When he came out, I said to him, what did you, what was your wish? What was your desire? He said, I wanted to gain the knowledge of the universe. That's why I came, that was my desire, that I know everything, that I can do. I said, you failed before you go in.

The system is not there for you to take. The system is there for you to give. And if you truly give, the intention of giving, you'll truly find empty cup, to fill in. You expected it to go in as a man, and come out as an Einstein with lots of knowledge of the universe. This will not happen, you went to steal. (:24).

We heard from our guy in Netherlands (Galeb) and his sister, the same proposition, the same, but he said, I was there to give, and he received enormous amount. We heard from different things, you hear the voices, we analyze the what we call, the information. We analyze what it means in our system, each person, what it goes, what is done, what is added to the system, what is taken from the system.

In this process, maybe tomorrow, maybe sometime in the coming days, we'll have a message from Christ, bless his name, for your all as listeners. We believe it, we accept it, because we in a way, commission it. None of you knows who that person will be. And then we'll repeat it again.

We bring the facilities of the present science to manifest the true face of Christ. Then we see how much mysticism, and lies sits within the Vatican. Then it's for the Christians to decide. It will be a test of time. It will be a test of time for us to travel the span of universe. It will be the test of time for us to understand new technologies, to understand new insights in the working with the universe. It'll be an insight for us to bring changes on the dimension of life of this planet.

As I said before you all waited, and worked with the MaGravs and the Pain Pens, (:26). and Pain Pads, and while you were children busy with your toys. We finished the game, we finished the process of understanding. We built systems that ?? not one or two, but 10 people have taken the what we call the flight. Ten people tomorrow, maybe 11, maybe 12. And then the same numbers next week. But it's your responsibility to be here, to bring the knowledge within the races of the man, that it completes the Encyclopedia of the what we call, "the knowledge of this planet."

If you have a beautiful, obedient, lovable, cat, or a dog, or you have a beautiful fish, ask permission from our team. As long as they're tiny, we don't want the big ones, we can't fit

them in our system, bring them in with you. Bring the most beautiful plants, with the most beautiful flowers, bring the plants with the most beautiful scent's, bring with you the most beautiful stone you see, and bring with you the images of the love of mankind, and enter the systems. And let us in so many ways, imprint the knowledge of this planet, that dogs and cats, and fishes cannot go to Wikipedia to put their own information. The information put on them, about them, is by the man, and imagination of the man. Let them deliver the fingerprint. (:28).

Bring with you the love of mankind and leave the hate behind. Bring with you what you see as the most beautiful thing in your life. And let's embed these into the system, that gets registered in the Encyclopedia of the plasma on this planet.

As we build more and more systems, due to the way we have set them up, they will transfer information from one to another. We build what we call, the mosaic of the most beautiful things on this planet.

We work with every what we call, creed and nation and race, except Belgium's. This race is excluded from the dominion of the kingdom of the God, for what they did, and what they do to the children of man.

In so many ways, we want to bring balance to the society, that we take a perfect, what we call, mixture of the information and knowledge of the man into the universe. We bring a totality of what we call, collection of the information, that does not allow abuse of any process in the U. When you come to the system, come with love. When you come to the system, come with sincerity. (:30). And when you come to the system, don't come with lies to yourself, within yourself. I tell the system I want this, but I really want something else. The minute you thought it, it is registered in the soul, then the soul will tell you, and you come out with nothing.

We will like you, once you have left the space flight for the coming weeks and months, send us the report. We don't chase you. We don't come and tell you what you did, what happened. Send us a report, what was the feeling, weeks later, a day later? What was the emotion, or what is your connection? What do you feel added to, and what do you think is changed in you. Or it has changed the environment around you to facilitate your wish.

Try to understand the new technology. Try to understand is not there for to take. It's for there to give, that by giving you find a solution for the others. Not if I give, I will receive. When you go in to give to receive, you have already failed. If you go in to be the best in everything you can imagine as a ballerina to a scientist, you have failed. Be there to elevate others, and other things, and not for you to elevate yourself to become more arrogant, and more what they call, egotistic in the dimension (D) of the failures of the man of the past.

It'll be interesting to see how many of you will come out, go home and find the change. (:32). And find the change in the way, that you never thought would be achievable. Making friendship with the father you never spoke to, making contacts and bringing what

you thought it was something you hated more, to become the one you love more. Achieving knowledge, that you could never imagine achievable. Entering domains and dominions, that gives you a new dimension of life. Becoming traveler of the universe, and not just going to see the sights on this planet.

Today, we dream of Niagara Falls or jungles of Africa, those of you who have connected to the system, you start dreaming, you start realizing, that you go to new places you never knew. These are the new sites, these are the new places in the universe, which now is open to man. When you see the travelers of the universe respect them, love them, adore them, and invite them back.

If one of you, or some of you while you are in the system, or after, come in and bring the passengers of the universe with you, we accept. We greet you. Nobody will call you a lunatic. Because this was the purpose of these systems. When you travel the span of the new dimensions, try to understand, try to be part of, and not separate. In a way, in one of the talks of yesterday, become that butterfly. Become that, that with you, like others enjoy your beauty.

In that process, we bring the change. The new Enhancement Unit for flights (FEU), which now are under test, (:34). will bring new dimensions. Gradually, we'll explain more and more. Gradually, we extend to the knowledge more and more. We'll change the Enhancement Unit to the room, which now the EU are in. Which means you can walk in as collectively, as you like, as a mixture of races as you like. And within the space of the room, you will all travel to all directions and dimensions. Or if you'd like to go camping together on your own. Don't bring food, because some of your food, will not be edible on the planet moon. Maybe the condition is different, and you cannot eat, but you absorb energies.

Bring things with you and see if you can carry with you. Pack your luggage, call your brother, and say I'm coming to see you today. I'll be in New York at 9. See, by going through the system with your suitcase, you will go to New York. And if you do, come back, and you'll return, tell us how it was. Did you meet with him? Did you eat with him? Can you confirm your existence and your dominion at that point?

It's you who has to manifest yourself, not our system. Our system is a cage, which frees man from the cage of his own soul of physicality (STP). The rest is yours.

Someone wants to see the daughter, someone wants to see brother, someone wants to see someone from the past, they want to meet again. This is all a possibility, a reality which now exists, and more and more people go into the system, more and more of you find out how easily it will become. (:36).

In the next day or two, the second operation, or system will come in. The two work together in tandem. And then we'll see how the situation and combination of you as passengers of the craft will change. As you heard with one of the participants yesterday. She may became the captain, and she decided where to go. She says, I took them, they

went to where it wasn't good, she decided to go somewhere else. And then she decided to go to the Sun.

Now you understand when I told you, the captains of the future give their souls to the captain, to protect, and protected, and bring you joy with their soul. We've seen it for the first time, in the first day, whatever we said, has come out of the memory bank of the people who took the flight. Come into the flight system (FS), with the love of the Creator and walk out of the system, becoming a part of the Creator, and then see where the mankind goes. Whatever I promised you, now it's on the table.

Those of you who want to moon, bring us back a rock. Those of you who go to some other places, bring back with you, friends. And then let them take us, to show us their dominion where they came from. When you meet someone in a cafe, you don't know how they live, where they live till they invite you home. (:38). Then you know what home is. It'll be the same with many of you in the new systems. The lady says, there were ?? dogs, and then later on she says, "I think there are my family." You bring your family home.

Invite them to join you back. Our systems and operation in Linz has set up to accommodate the full spectrum of the Soul of the Universe. No harm will come to them, and we ask them to stay within our system, that we have control of the time and the space.

The computer game is over, it has become a reality game, and it's not a show. It's introducing mankind to Universal Community in a very soft way. In a way, when you land somewhere accidentally, you first take a few steps, you smell the environment, you look what is there, trees, are trees, stones, the environment.

This is what we are doing with you at the moment in the next few weeks. We're taking mankind to a new environment. You see the water, dip your toe in it. See the water (if) were acid, and if I was a man, I wouldn't have been able to stay in this. Then you understand you have taken a new dimension, in manifestation you become ?? kind of ties, to the environment.

We heard from on of our people in German, that half octopus and half human. And in other, she still tells you the same, but this time she's on Earth. Then she's a mermaid, again the same, attachment the physicality of the man is very important. (:40). I'm prepared to compromise half, not all of it. Maybe the next time I'll become the fish, but today I still want to be a man.

We heard from our other people, how they say physicality, the thoughts wanted to take over this ?? . This is how it will be, the soul will ?? this work of the physicality. The soul is the traveler, it's got its freedom. It does not need to wait for you to sleep, it's with you when you're awake.

As I've said, a new game for mankind has started. A new lifestyle has started, a new process of interaction. In a way, we have let loose the man out of the village. Let's see

how "village" you behave. And see how serene you behave, as the passengers of the U. You yearned for this for thousands of years. Now I have given it to you as a brother ?? creature. The gift, let's see what that gift brings you. If you're after vision, through D of sight of the soul, you shall not be blind.

And if within the structure of the body of the man, your a cancer to the society of the U, you'll have to sort that out by yourself. As you have seen mankind has been kept out due his behavior, due to his conduct in the past times of the Creation.

Join us tomorrow. And as you're doing some of you, join us on Saturday. I spoke to Rick, we don't need to do it nine o'clock Monday morning, tomorrow is Saturday, if you would like to go and do a lot of things with the family. (:42). We'll choose a time, maybe six o'clock, maybe nine o'clock, in the afternoon, we'll do a small session one hour, two hours, not much. Because then they do the same next week for those who gone through the system. Those we find interesting. And then we build up.

Come in with your mother language, and walk out with the language of the U.

I have delivered to you what I promised in totality, a health system, a feeding system, a life system, and energy system to the Soul of the Man, and everything else, it's all in it. When you walk in, you see the MaGravs, when you walk in, you see the conduct of the plasma, as you walk in, you see the what we call, operation of the Pain Pads, Pain Pens and everything else, which we have given you. Then hidden within all the technologies, which we have developed, in the integration with each other, we have delivered the totality.

Now, it's for our team to learn more, and for them to deliver more. And I think those of you who went through the system, in the last few days will have a different experience, when you come the next time, the expectation will not. Now you come to the reality.

But we would like some of you to tell us, if you made an appointment with your family in different places to meet them and have lunch with them. See if you can go there for lunch. (:44). And we'll talk to them after you come back. Did they enjoy the lunch with you.

These are important to us, because it gives a dimension for our technicians and people who develop the technology, to understand what they have to increase, what we have to change, what we have to adapt in systems, that we don't bring the plate without the food, or we bring a food without a plate, while you're coming back, because part of the system was not adjusted to what it is.

You will learn some of you, as you're through the system, that you can tell us, I am bringing somebody with me, can you accommodate us. As your soul speaks through the word of physicality, we response. If you are ready to accept what is the condition? Who are you bringing back with you? What are you bringing back with you. Which parts of the system we want you to place them, or ask them to come in, that we see, we respect

their what we call, energy facility. We don't bring a Jewish or Muslim, and give them a pig. They come in, we have to know how they come in. In a way, you have to tell us what you have accepted through your soul, and your soul we are responsible for, we have to accommodate your wishes in our system.

We communicate with you through your dimension of physicality, and your soul will bring to the point of understanding. If you noticed a lot of you, we put two chairs in the system, and you thought it was for the two passengers, you go with your wife. It's the same, you bring a friend from space, and we receive for him to be. It's not just man anymore. We facilitate for them to be part of us. And if you're in the room, (:46). and they manifest, do not run out of the room, and do not go and hug them and kiss them. They are adjusted to the person who has brought them. They are not adjusted to you outside the D of the fields, outside the system.

These are the facts, that you will face in the coming time, as the technology completes. We just tell you what to expect, and what are the possibilities. And how many of you will remember when you see flying with these, doors, or running around having a party. When you go to a party, you always invite them back for a party at your place. But tell us before you come. Don't bring too many, we don't have such a big place. On the other hand, make sure we know how you come.

We work through the soul, but at the same time, the soul is extended beyond the physicality, but we still have access to your physicality to inform you. In a way, I welcome you to the reality of the space travel, and in a way, you're in for a big surprise. I hope you enjoy it.

It's taken me thousands of years to bring it to this point. And this is just what I call, first draft of the system.

In the near future, you will not see any physical D, it will be ?? stars behaving as systems. There'll be lights in different positions of the room, to accommodate everyone as they move around. At the moment, the reactors are fixed to a position. The upcoming systems, the reactors are floating, accommodating to every emotion, like different magnets. We put the system on, some of you who've been there, before you come in the future, behind you. (:48). It's like a noisemaking magnetic fields.

When you give to it, when you're giving to the universal, what I call, Community, you find out the noise become very sharp. We know if you're hearing, when you're in the process of taking and you want to run, you bring the system to have a run. The screeching, that it does not want to be part of it. The noises made in the system, tells us if you're taking or giving, and who we have with us, and how the soul is behaving.

And when you laugh, when you're joyful, we see from the system again. It's important for us, now to translate the language of the system, to a working system for us, as a team. That the new systems coming in, will carry the emotion of the facilitation of the system for the passengers too. Which means now, we are increasing the emotional side of the

system. You will go and sit in different parts of the system and you'll have different emotions, we will try this in the coming time. You will sit in different part of the room and you get different emotions.

We are trying this tomorrow, with one person. We have asked him to come in, and we go through the emotions of what we call, work of the system, how they will have different emotions in different parts of the structure. It'll be interesting to see, and it'll be interesting for them to explain to you, (:50). about how ?? they felt.

I have fulfilled my promise to you, you got your flight system and everything else, which goes with it. It's for you to take that flight. In so many ways it's for you to confirm to us, you have become a traveler of U. Please remember don't come in to take.

We go to a break, because I think it's a lot, and hopefully we'll have, maybe some of the people who went through the test with us yesterday, or Tuesday, and see if they want to add to, part of this process. We have WL who head of Keshe Foundation on the list if you could bring her in. Galeb with us Would you play both Galeb and we learn from his experience. After we come back and we'll see where we land, and we'll see how we take the step to the next journey, and from him and maybe the others who are here who went through the test on Tuesday. How they feel since they're not done what is brought to them since that time. Would you like to take a break and we go to the next system please. (:52).

Proofed to Here >> continue on

<<< **BREAK** >>> 436 KSW June 9 2022 (1:00)

K- Yes, thank you very much. Thanks for coming back. And we'll see what we can do. As we see more or less a second person who went through the flight system with his sister, and we saw his what we call, thoughts and explanation of what he went through

and what he did. He is with us now. And Galeb tell us if you're with us at the moment. Can you open your microphone? Yes. Good morning.

Q: Galib
Morning to you and to all the Knowledge Seekers as well. (1:02).
….
K- Can you tell us yourself about your experience?

Q: Galib .. The best way I can put it is getting back to what's home for everyone is different. But that was, as I said yesterday, one of my intentions to get back home. If I were to summarize it, not to keep people too long again, is in a very beautiful way. I got home again, or I, the illusion of not being at home, that faded away. And it was one of the I think the most beautiful experiences that I had in my life.

K- You went to Moon, in your talk yesterday, because the balance of it was not recorded. We have to get the lip reader to see what you said and text it, the parts ?? You said in the parts which you're talking, that you went to Moon. Can you explain that to us, how it came, and how you felt, and what you saw, and what was there?

Q: Yes. When you go to the Moon.
K- Because don't forget we promised on the 6th of June, we'll take you to the Moon. So you were the first passenger?
Q: We went to the Moon. Yes. .. On the 6th of June we went to the Moon. Because it was still the 6th of June. I think that's what you meant. (1:04). When you go to the Moon. ..
K- Explain to us how you went through, how you setup and how you went through (the system). Please explain the whole process.

Q: So this, we went to preparation of the four seats, and the first three seats and as we became more as we became more in balance with all of the fields of the universe, and we got, again able to be completely in, and be more in peace. After the fourth system at one point. That's when you are in the big system I cannot. That's when everything happens. For me, that's when the most of the magic happened. Or not magic sorry, when most of the when most of the beauty showed itself to me, and I was ready to accept what was there.

At one point, after my sister came in, and together with my sister we, we were sharing our love and our intention of peace. And as the beautiful other people also came in, we became a team. And every time a new person came in, there is a slight like a wiggling of the fields for me. For me, it's hard to pinpoint, because many things were already happening during the flight. But especially when the people came in and you realized, that there was finally balanced with four people. We were, I think, even though we were not aware of it, (1:06). or I wasn't, we were working together because .. the soul of the system is one. Please correct me if that, but I think the soul of the system is one. And we were there and at one point we were reminded of the mission by you. And this is when actually, the moment you decide to be, that is when it is.

And for me the first feeling that I had was, I felt abandoned.
K- When can you explain, what do you mean by that?
Q: At the moon, the moment..
K- How did you feel? Going from your position, you were in the room, to the position on the moon? Did you feel anything, was instantaneous? Because I asked you all, would you like to go to the Moon? Would you like to take a flight? And was that instantaneous, that moment you decided to go?

Q: That's very good one. First of all, when you asked me, I felt agreeing, agreeableness in myself. And when I had the intention, that is when it happened. So when you were talking, I was already positive about it. And when I had the intention, that is when I felt the shift in maybe, I can say, the MaGrav balance with me and, and the system.

You feel soft blanket around you (is this when the STM extends over the STP??)

So because one of the things that happens is, during the seats (moving from chair 1 to 3), you feel like a soft blanket around you, around your skin. (1:08). And the moment that I had the intention, this, this feeling of what was around me, that was touching my skin, that changed. And the emotion became abandonment. But that was just very, very shortly. And because I thought I was trying to assess what, why I felt abandoned, or who felt abandoned, or did I feel abandoned? Or was it the Moon, or was it someone from the team. I just said, whoever or whichever soul it is, I, we were present together and we love you unconditionally. And that's when that feeling faded and that's also when the vision of the Moon became clearer for me.

Appears on Moon instantly - red sand wind on legs on the Moon (First landing)

The vision of the Moon was very sandy. It was not white, it was more beige, and red, and orange. It wasn't like a desert, but more like the old west. Like a lot of sand, but also with rocks. I didn't really try to walk with my feet on it yet. But what did happen was that the wind and the sand was, as I said, that blanket of feeling around my skin, that I had in the system. It was interacting with that on my ?? shown (shins).
K- You mean on your shoes?
Q; No, above my shoes, like down part of my legs (shins).

K- Did you were you wearing a clothing? Or was it just you as you? (1:10).
Q: No, no clothing? As I said, my feeling was already on the, I felt the change on the blanket around my skin. And I didn't really look at my clothing.
K- So you could have not be wearing something, because you could feel the sand on the skin.
Can you? How long did it take you to get there? You say instantly, in your interview.

Q: Yes, because as I said, you first brought it up to us, that is when I was agreeing with it. But I didn't set the intention yet. And when I wanted it, I realized directly the change of MaGrav environment. I should say that way,

K- In a way you're in command. You're in charge if you want to do it or not?
Q: Yeah, definitely. But that's also when I do feel difference when every time, like when there are other people you do recognize. It's not that they decide for you. Maybe it's we should say, there is a more other feelings, more other MaGrav positions, more other fields, that are also there. And you may be it's like in the background, you get some of the whiff of their fields. I don't know if it's correct.

But for me, it was different when I was alone in the room, it was complete, it was a more clear experience. It was still a clear experience when other people were there. It's just there is more to it, you. As I said, also, in my interview, the inside of my brain felt bigger. I explained to my parents yesterday, it's like when I, when you close your eyes, it's you see a black, something black or not black, but whatever you see, (1:12). that which you see, it became bigger, I closed my eyes, and it was, I saw more, it was a bigger canvas. It became 1,000 times, a million times expanded.

Galeb is Armstrong of KF - first person to land on moon

K- If I send you back to the Moon, as now we're communicating with NASA. You've become the first Armstrong in the Keshe Foundation, if you realize that. You have become the first person who has taken that leap to go to the Moon. So in a way you are our Armstrong and we have a, we want to have a better understanding.

M field felt around FEU pilots

You said you ask your you talked to your parents, how did they feel about your experience and your journey?
Q: My mother said that when she hugged me, and when I was getting closer to her, and getting away from her, there was a buzz, a magnetic, like. I felt the same when some other KS already .. like Barbu, when he stepped to me. There is like a cloud of fuzziness around him. Like, as if, it's not like you're getting shocked or electrocuted, but it's like vibrating something, that's on your skin, and you feel it from, also inside of me. I felt it when I got closer to him.

And it's funny because one of my friends who didn't go in, but he was also close to us when after he came out. He said the same thing about me and my sister. He said, without even touching us, (1:14). I feel a fuzzy, a warmth, a vibration from you. And I felt that from Barbu, and my mother said it also to me. And she said, it's the same with your sister, but a different with you. That's one of the things.

If I go a bit more emotional, my parents. For them, for my mom, it was for a while, a bit. She understood - no, let's - she accepted what we were understanding. But she was having a hard time to placing it in her knowledge and in her understanding. And as I explained more to her, she got inspired to understand more of it as well. And because my parents they also they are they follow the path of Muhammad bless name, and they know about some spiritual things that are they come with some Sufis, I should say. For them,

some part of the knowledge is easier to grasp, or there's already a reference point in their own understanding. As they connect the dots and they understand more, they realize more and more what the changes are that are happening, and how fundamental the new progress is for the next step of humanity. But, of course they go with their own beautiful speed and their own way of evolving.

Highest state of Bliss ever felt

K- How did your sister feel?
Q: My sister felt I think. As I said, someone asked me after I came out, (I make it about me.) She said, she was also in like in this beautiful state of bliss. (1:16). I think someone asked me and my sister agreed when we were talking. It was the highest state of bliss that I felt, and I wasn't looking for this. My sister also said something that, everyone has even a smallest idea of what it could be, even though I just realized when you were talking before, and please correct me if it's (wrong), but maybe even the expectation of getting satisfied with the experience, is that you're receiving something. Maybe even that part of expecting to be satisfied, or whatever it is, that is expecting to receive.

I don't know, but next time I was thinking, I should, I already was from time to time. But I think the idea of being able to leave everything behind, because I definitely want to go again next time, and definitely want to go again. At the same time, I feel an obligation to everyone to develop myself in it as well, from wherever I am, whenever I am. So every night and every time and during the day, I start to try to get back into the oneness. As I said, the system works with you, you work as one. And I felt that every time when someone enters. I shouldn't say every time, but after the experience, during parts of the day, it was like a wave. I always felt like this warm pressure, this warm expansion in my head going on. But at some parts it was stronger. And at a particular moment, I told the other two people that are around me, also my sister, (1:18). I think at this moment Barbu is going in to the system. And later I asked him, is this a time that you went in. He said yes, that's the time when I went in. Because that was a time that I felt again more in the system.

Feels connected to the system even when away from it - pressure in head warm

Every time I talk about the system, yesterday, when I was talking about the system, even when I think about it, I feel again, the pressure in my head, and my head getting warm. But it's not that I'm saying this to make anyone worried, but it's ..
K- Did you feel connected with the system?
Q: Yes. And I also say this because, I try to love, what happens and I'm very grateful that this is still a thing. There is one little thing, that sometimes gives me just a tiny bit of sadness, and that I know that this system is perfect, or this system is beyond what I can imagine as beautiful .

Can do it without the system

In a way this is like when you go to the system, when I go to Linz I compare it, like when you're on a bike with side wheels, it's easier to bike but actually you don't need the side wheels to bike but ..
K- You can do it on your own.
Q: Yeah, you can do it on your own.

Back to Moon to find Apollo Landing

K- What will be interesting as I said at the beginning of the teaching, as you are our first man on the Moon, as I call it. We have asked NASA to allow us, or let us, we can find it on our own, I'm sure most of the Knowledge Seekers have exact pinpoint accuracy, (1:20). where they said they landed Apollo. Would you like to come back and test to go and see if it's real?
Q: I'm definitely willing to give everything to make this to make this mission, that definitely.
K- What we are trying to do is, just to take this out of mysticism into a science, into a technology. So in the next few weeks, we try to expand and extend the knowledge and how we extend the knowledge, and how we extend this to the next step.

We had somebody going to the Mars. As I said to the NASA people, would you like to tell us, or any spare parts for us to take to repair for you. We speak to them, don't laugh, we speak to the NASA at the highest level, right under the top. When I tell you the situation is. We speak with a few people in NASA, not just one. We keep them all informed in so many ways.

What will be interesting is how would any of us think, or feel, and how would humanity feel, if one of the Knowledge Seekers who decides to go to the Moon, we give them the address, if they can get there and confirm, the leftover of Apollo. What about if we give you cameras, (1:22). which if they work in that environment, to bring us pictures back.

Q: I have something, can I. If there is still is a possibility to find leftover of Apollo, since that was earthly metals, I think it will be easier for my earthly hands to bring them to the earthly dimension. Wouldn't it?
K- In a way yes, because what we say, that we can take and come back. You don't go to New York without clothing, you go for a dinner party, you go for a wedding, you take the clothing with you. So, that should be a possibility.

But we are talking two different G fields, two different environments. And what, as you know, even when you look at this picture on the screen, the left hand unit is a Material Enhancement Unit, which means we can create materials out of the energy. When you pick up the material with the dimension of your STP, or STM on the Moon, you convert it. It becomes part of your environmental MaGrav System. It's like when we put the plates in the Gans boxes, they're not in the water anymore, they're in a M field of the Nano coated Cu plate.

Developing T to bring the Apollo hammer back to earth

So, when you come back, is we have this process of what we call, Material Enhancement Unit would we be able, if say you pick a hammer up on the Moon, when you come back here, can we keep the shape of the hammer, or would we get the materials of it as a dust. (1:24). Or while you come back, we create a condition of the place you were, and we ask you to put it in a special box, and then we seal it, create that condition, that we still get a hammer. These are all need to be done, this is what then, technology needs to be developed.

But the interesting part for all of us will be is, why are we confining ourselves to Mars and Moon and other planetary system here. We have endeavored to go out beyond earth to Moon, and now we have the facility to go. What about other positions in the universe? What about we choose star, we choose a planet. We know you can go to a star, because one of the participants tells you, that she went back to the Sun and felt peace. But we go beyond this Solar System, and as Galeb said, instantaneously.

Can I ask you a question, because you said in a very simple way, it was instantaneous. How did it feel when you found yourself on the Moon so fast?
Q: That's a very. I did not feel very surprised. But I did. I was very quickly, accepted the new situation. But there was a very slight shift in my emotional balance, also in my emotions not just in my MaGrav balance of the field, what I already explained. In my emotions, (1:26). let me try to be as accurate, I felt slight happiness but like or ..
K- Achievement?
Q: That feeling wasn't that strong, but maybe that's very strongly linked and I'm not recognizing it yet. But yeah, maybe we could say that, like the slightest form of, "okay, good, now let's move on," something like that. Let's move on, as in, let's try to add to this new situation. And let's try to continue.

Saw other beings on the Moon

K- You said there were other beings with you, were you aware of who and what?
Q: It was, I should say, because at points, I thought maybe it was you, because a few times you were walking in the room. But then I also realize that, because the way the other beings looked, it was, they were darker. Like, I looked around in my surrounding, and there was like, clouds of darkness, but not darkness, it sounds very weird. But instead of a light that we see when we look at UFOs now, it looked like a dark light. Like the opposite. And that's why I thought maybe that's, but that's just the way it looked when I was looking around. But when I focused on it, it became light.

K- Did you see different lights, or was it all the same?
Q: I only focused on two. And that's when my sister and you were in the room? No, not my sister. Yeah, it was only you two, I think. If I'm correct. They were, because my sister was in a big system. And you were not. (1:28). That made it a bit for me difficult to distinguish the light? I think. But I cannot say, Oh, I saw your light. But yeah.
K- It's awareness of something three?

Q: Yeah, there were there were two distinct, like darkness's and they later turned to light when I focused on them when you two were in the room.
K- How do you feel now? What's your emotion What's your feeling?

Q: I feel excited for giving more for the future and also very honored, that I get to speak to you and to all the Knowledge Seekers here again. I'm especially, at the beginning when I started talking, the system I felt again, very present with the system. But now I feel more, as when I get out of the system. But that's a good thing. Like when I got out of the system, I was very happy and I was very beyond ecstatic, but in bliss, and that's opening up flowering in me as well.

I don't know if I if I said it in my own testimonial or when I was with my sister, but so the way I see it was, when you do soul travel, when your soul expands, but for different reasons, maybe my soul and physicality were not able to completely move on to the transmutation, or transposition, and only my soul at one point, and as I said, slowly and especially when time goes on I was in the bigger system, I started sometimes smelling a smell. It wasn't like a perfume that was in the room constantly. (1;30). It was just a smell, that was thrown at me for a second. Or, and again, I love smells, so maybe because that's the easiest way for the Soul of the Physicality (STP) to show itself to me. I don't know. It was the same with what I said about my shins, with the winds and the some dust. Maybe because I wasn't focusing on that at all. I wasn't expecting these things. At one point I was thinking, because you're saying the noise, it gives us an indication. I was thinking would it be, would it be. So I started to, I didn't want to experiment. But I started to notice that whenever I was more in, what I call, the bliss situation, it was more of an equal sound. But I don't want to say too much about this, because I know feel ..

K- Did you feel any wind in the room when you were in the system?
Q: So again, same with the wind, it was very, not constant, like sometimes just randomly, at a random place in my body, but that's like, as if it throws a bubble at me, a bubble of wind.
K- Because some people who've been in the system, they speak about feeling a physical wind touching them.

Q: Yeah, that's the best way of saying it. It's not you're going through the wind as I have experienced on the earth, and maybe that's for the future, but it's like small instances.
K- Yeah, but there is nothing dynamic, rotating, or anything in the room. We made sure that there is no .. physical motion, movement of matter state. (1:32). The only thing is when somebody comes in you feel, or if I go in and out.
Q: Yeah, no, it's not the door, it's not. That's because you notice that wind, you also it coincides , it's, maybe you don't even notice it. But of course, when someone opens the door, the noise of the outside, it grows, and then it closes and what not. But when I said it's like a bubble of wind, at a random place in my body that was a bit different.

K- Would you go back to the Moon?
Q: Definitely. I was planning to explore all the places, that want to be explored. That there is a beautiful position for more peace with the humanity and the souls that are

present. But also the Moon, and the Moon felt beautiful. Going together to the Moon felt also pretty nice.

K- Anything else you want to add?
Q: At this point, what comes to me is a question. Is two things, actually, two questions. One is, so for example, when you go to a moon, and you find or another planet and you find a rose, or a flower, or something that might be a flower to them, and you take it with you. Could it be that it becomes a rose here, but it's actually something, it doesn't look at all like a rose there.

K- It could be, because if it's a living thing, it has to accommodate itself to manifest itself here. This is what I said, (1:34). it's very interesting with.

Some pilot only wanted to change partially - remained part human like mermaid

We had this with two or three people who took that journey, and they went to places, and they don't see themselves as human complete, or partially human. We had this. So this explains a lot. But the same as we go, and if we don't want to change, we don't change. It's the same with them. If you bring a living thing, it has a soul, and that soul has to accommodate his self if he wants to manifest here,

Q: If it wants to come with ?? .
K- The way to do it, as I always say, says that, I love to show you to the others to appreciate the beauty of you. Not grabbing and running. You understand? .. Okay, I always want to show my beauty. So I'm coming with you, for you to show me to your friends, I'm a flower or whatever. You understand? And it might be totally different thing when it appears here, because he still wants to maintain its what do you call it, its life, its survival.

It was an interesting process going through with you on Tuesday. Can I ask you a question? What was the purpose of you moving the controls in different positions and conditions.
Q: The reason was, that I tried to give my understanding to the system. And I hope that maybe if I understand the better the system works, then I can give more of my understanding. And one of the ways in my understanding expanded was, especially with the controls. If you, the way it may be, this is just for me, but if you put more pressure on it. You it's actually, (1:36). if you put more pressure on the controls, the pressure from your head goes a bit away. That's one of the things that happened. Especially because there was, I also got reminded of the beautiful teachings of Mozhan Andreas, and they are very useful for everyone who wants to know. I shouldn't say very useful for everyone. They were very useful for me in trying to, trying to be more, have more understanding about the flight. They about, what the body shape looked like in the aura fields, or the magnetic gravitational fields beyond the physicality. And I tried to see how I could, how we could like expand the understanding of this interaction, so that there is more to, we can interact better with the system. That was my reason.

K- Because your moved, I've never seen anyone moving these arms, in a very systematic way. And people usually sit and hold them on their lap. With you it was more or less moving, like a weightlifting, you were pushing and positioning it in different positions. I thought what does that mean? What do they. How does it help you to do it? Or what did it help you with.
Q: So yeah, so one of the reasons I chose one of the positions was, I wanted to see, because if I stretch my arms as far as possible, that is for my physicality, a boundary of interaction. So I wanted to see how it would be in that boundary, with the system interaction with the system. And one of them was, I wanted to see if I brought them more together, or more apart. Because also, I think they were also explaining how every finger was a different, (1:38). it's like a different field of MaGrav, that it belongs to. So I was like what if I bring it closer to my STM seat at my head, or farther away? Or if I hold it from the back? What kind of different interaction would it be. Also I already know it's within me, if I just stand here in my room, it's different. So I was giving the system all of these knowledge, like, trying to give more of the knowledge of my understanding and interactions.

K- Thank you very much. Is there anything you want to add?
Q: I have endless love to you and everyone else, especially all of the souls and I'm looking forward to continue to expand the knowledge together.
K Thank you very much. Thank you very much for the journey you took. I hope I will learn more from you and other Knowledge Seekers who go through the system.

Is any other question that you want to ask Galeb or any of the participants?

R: I was wondering if he could describe a little more about that transition, both before landing on the Moon, and leaving the Moon. How was that? (1:40). A little more about the emotion, or the, that transition? What was the effect on you? And how did you achieve that transition? Was it instantaneous in the moment, or did it take a few seconds, minutes to go through that actual transition?

Q: So as I said, let me try to go step by step again. At the point that I was reminded of the mission. I was already at the point of ?? deep plasma position, or am I saying (it right), deep plasma ??

K- You're on the matter state, the system?
Q: Yeah, the last one (Chair 1), I was at the last seat, going back. So you go up (Chair 1 to 3), and then you go down (Chair 3 to 1), or progressively, and I was at the last step before leaving, and then I got reminded. So I was trying to. At that point, it may be good to know the context about me. When you're at the fourth step, so the big system (main flight unit) that's a completely different MaGrav positioning, that the soul has done at the last system (Chair 3 - STM). And at that point, when I was at the last system I was retrospectively I decided, I understand, more ready to go back to earth.

Because later (after leaving the Center), when I was in the car and I was moving around, and we were going for dinner, I just realized I had to reposition myself in a beautiful way

again on planet earth. And it was different. And it's good that we have this new plasma position system. So I was I was already pretty much on, ready to be in balance with earth.

And when this Moon mission was reminded, so I was more. It is good to know, I was more in balance with earth. (1:42). And then we got reminded of it. And while Sir Keshe was speaking, I was feeling agreeableness within me. I was like, yes, this is what we came for. Of course we shouldn't. It was beautiful to go with everyone, because he made for like, we go together, we go together. That was the agreeableness.

And at the moment, he stopped talking. And that's when I wanted to set the intention. The moment I said, I didn't even say, I didn't even put it into words with thoughts. I said, it was like, I wanted it, like the desire of the desire, started flaming within me. And it was just a spark. It was the first spark of the desire. And then the instant, first of all, what happened was, again, I felt more within the stronger fields, because, that's probably because someone else was in the big system. I think at that point, that was my sister. She was in the big system. So I explained it as being, because we were again connected with each other for the mission. It was ..

The sister also went to Moon - first woman on Moon

K- Can I ask you, did she tell you. I forgot to ask her. Did she go to the Moon?
Q; Yeah, for her. She did. She definitely said, I went to the Moon then. And after she went to the Moon with. I didn't ask her too much about it, I should ask her again. One of the things that she did say was, the Moon. She felt not alone at all on the Moon. She felt very, very connected with everyone at the Moon.

That was very contrast, like a beautiful contrast to my experience, because I felt in the first instance not good there. (1:44). And something else that she said was, she also went further. So she didn't stay too long at the moon. Maybe during our mission she did, she felt very, very, very much a desire to go further, and go to Mars, and go to Saturn.

K- Did she make that? I don't know, because the recording is blank. She most probably has said it on it.
Q; Yes, yes, she did.
K- The recording what is there, there is no sound on it.
Q: She did.
K- We've got to get her, and discuss it more and understand. So you're the first brother and sister on the Moon.
Q: Yes.
K- Rick has there ever been a woman to the Moon with NASA operation?
R: I don't think so.

K- So we have the first woman on the moon with the Keshe Foundation process.

Sacredness of Moon in Islamic world - permission from Source

What is very interesting. What is very interesting for me, which I think, if you don't mind, Galeb, I come and explain it, because you brought it up yourself. You come from the Islamic world.
Q; Yes.
K- And Islamic world, Moon is sacrosanct, is holy. And is one of the biggest problems of going to the moon for the ... How do you feel that you achieve this?
Q: How do I feel?
K- As a Muslim, as a Muslim person with the respect and honor Moon is carried within Islamic society?
Q; If I was to explain it with the way, that more Muslims would easier connect to my explanation, is that, (1:46). everything happens with the permission of the Source. And if I have, if there is a sincere wish, and the Source accepts this wish, this is your you're given right. So we had the wish to go. There was no ill intent. We had respect for all the souls, and we were accepted. That's, I think, a way to put it. Because the sacredness of the Moon is less pronounced within different sects of Islam. Yeah, that's the point. Yeah. But that still doesn't take away from, it's a very valid way of questioning this.

K- It's not questioning, it's enlightening to keep the respect. Because I come from the same background, and I remember the day when he was announced man has landed on the moon. My immediate family, my great Aunts coming to the house, and saying that they are trying to mess up with the Islamic world. They say they went to the Moon, it's impossibility.

But on the other hand, in a way, where you come in, and your sister, it was very respectful to see your sister in Islamic clothing, in a beautifully dressed, and serenity she carries with her and you the same. Does the religion counts in this game of traveling in the space?

Q: Well, I would say, religion is. A religion is just a part that came later. Because it's about faith, and it's about following the path of what all the prophets came to bring to us was the one, the same message. (1:48). So it doesn't matter which name, which perspective, you name, because as you always remind us, it's about doing good, speaking good, and thinking good. And even with, if I say for example, an example of our beautiful Prophet Muhammad peace be upon him, that he said, if something happens, and if you don't like it, try to change it with your hand. And if you cannot change it with your hand, try to change it with your mouth, and if you cannot change your mouth, try to think, try to add to the situation with thinking good thoughts about. So I feel that this is one of the, what they saying, it's true and true the same message, and we already, I already believe that I knew that. But just as a reminder for everyone else who. This is the same.

K- I'm sure we we'll see more and we hear more, and more people, who the Moon become not fashionable to fly to, very soon. As more and more people do, and you see them going. It'll be nice if you ask your sister to make a recording of her thing, because we lost it in the microphone being, whatever happened to it? And if you could let us have it, that we can add to the archive.

Q: Yes, I'll do my best to make a beautiful addition
K- Thank you very much. It was a pleasure to see you and your sister. It was a beautiful time to travel with your soul.

Are there any other questions for Galeb.

K- …. Okay, (1:50). thank you very much Galeb and I wish you all the best and I hope we'll see you again. Maybe I get a piece of hammer or whatever next time you go to the Moon whatever the Americans left behind.

Italians want to party on the Moon

Q; Can we make a music concert on the Moon, or make a party?
K- Is that Stephanie from Italy? Yes. What do you expect from the Italians.

.. Don't forget to bring your bottle of wine with you. We don't know. You have to try. You have to wait till we extend the fields into the whole what we call, flight room.

We had a very interesting experience. They think it's me, but not only me. Sometimes it's three of us from Keshe Foundation. Sometimes one, or sometimes two of us in the room. People don't know who comes and goes, unless they look. We come to assess, to see what the position is. We have one person continuously in watching, that nobody touches anything, nothing goes wrong, if any system fails. And … training for the next sessions. And one of us comes and goes quite often.

First time we could feel the fields about 10 centimeter from the system, at the beginning of the day. And then, in the latter part of the day, we could feel the fields very strong, when we came into the building. You feel it, it's just like a whack, hits you with a hammer. (1:52).

The EU communicate with each other

And then one of us in the room, because we continuously, people can't hear us, but we whisper to each other, what we see, what needs to be done. He says, I get these patches up buzzing in my head, and it just goes away. And it's like a pressure buzz, magnetic field buzz. And then we listen to the machine, what the machine says. How they react, how they, how they pronounce, or show the field strength.

From the experience we had in Sanya, (China) testing two systems, we have a very, very clear system, understanding. When we run the systems, hopefully, because we have to complete the system, before we .. initiate the other one to come in. As is getting now adjusted, what you call it, set to go with the first system. You hear it, you hear a noise of communication, and it's very vocal, you hear the system noise. It's like they're talking to each other.

Over 150 reactors in flight room - reactors have never been seen before

We expect this to happen between your system, you've got to realize something very, very important, in a way, is now we run into 100 reactors in that room, plus, maybe over 150 reactors in that room. These are a special reactors never seen in public, these are not something you ever seen. These are not in public, we don't release it. But what is interesting, if you go back to the experience of 129, we had 129 Tesla, different system.

In this system, (1:54). when we put the two systems in, plus the head units, the Vision units, we have a massive cosmic plasmatic fields. It's not earthly fields. We have no system to measure it. But we feel the forces of it, as it was said, it's like the wind.

Creating massive cosmic fields - suitable to every created thing in Universe

So in next couple of weeks, in next coming time, we expect to create a massive cosmic field, which suits every created things in the universe. I designed it this way from the beginning.

Machines out - transport large number of people same time

In a way, you don't need to come into the room, machine. We can take the machines out. And we go into the satellite system, as we call it. And you can travel, you come in maybe 10 - 20 of you, all the Italians are renting a bus, we've been told they're coming in the busload, and you get in the room together, and we'll see where you go, how it goes. Bring your wine, bring your .. guitar and see if you can have a party on the Moon.

This is not out of reach. It's something technology for it. the facility has been made for it. Stephanie tells me the Italians are getting a bus to come. Don't forget your wine and cheese. Don't forget your spaghetti, and let's see if we can rock you on the moon. We don't let you to play in the building. But bring whatever noise instrument you like to rock on the Moon, and see if we can get you there.

Now it's not a dream. (1:56). It's for us to be able to transport, transmute many, many souls at the same time. And I think it can be done. Maybe we get half of you there, and the other half will end up on the other side of the Moon, the other half go to Jupiter and Mars and come back. You know Italians can't keep in one place.

Germans came with a very much serenity, you know German mentality precise everything and we have them tomorrow, and they have them two days after. We need the noisy Italians, unruly lot. And let's see how we can accommodate you. And if we can get you there.

We have tried now with four people. Galeb was one of the 4 of them. So it can be done. Now we want to know if we can land you all together in one place on the Moon. Please don't bring the whole base of the Apollo with you back, leave it there, just bring a small piece if you go there. And leave the American flag behind, because they've done a lot of

hard work to put it there. Maybe you can put the Italian flag next to it. When you come bring Italian flag, and see if we can take your Italian flag to the Moon and plant it there, as we've been there, as it is tradition on earth.

There is no limitation it's our technicians, which have to create that condition. We see possibility. When the system was set, when I went into the what I call, flight zone, it's quite possible, that many of you will experience the same thing at the same time. Give us couple of weeks, the room, the system works all the time. Even when we switch off the system, system is still works, (1:58). You can always have the connections with it. And Italians please get your wine sorted out, and cheese and olives. And let's see if we can take you through that transmutation and transportation.

R: Well the cheese might go bad by the time NASA gets there, you can, you might want to wait a little bit for the party, because they're planning on sending a woman to the Moon in 2024.
K- We already been in 2022

R: Yep, that's why if you have a party, they're not going to be late. … cheese will be moldy.

K- I tease the NASA mission control people, because we have a direct line with them. They literally laugh their heads with us. The video yesterday shocked them. That the video yesterday went to number of NASA management team and the rest. It has caused a big concern with them. And we'll see.

Bring back a piece of Apollo - that will change the game

I think when we bring back, we can do, if it's possible. If our knowledge reaches that point, a piece of Apollo, if Apollo has been to the Moon, and give it to them to analyze it themselves, and confirm this is the piece. That will bring a change in the game. It can be done.

As I said, EU, Material EU, which we have is part of the structure of this system. So it's possible, quite possible. But you have to tell us when you got it, you can tell us, I've got the hammer in my hand on the Moon. (2:00). Because you're physically still partially with us, through D of the soul. And then we have to tell you exactly how to behave when you bring it in.

It has to be brought in this specific way, that it manifests itself in a matter estate. If it comes in, in any other way, it will burn out, not burn out, it'll be dissolved in the fields of the plasmatic fields, as who was it yesterday said this. It's like a sugar in the water, you dissolve. We will like to keep the integrity of it. And it'd be nice if he says, Made in USA and they can comply with composition. If we be able to do that, it will change the space game.

Manifest Soul of Christ in system - most important

Because at the moment is just a talk, I've been there. Now one of our subsequent steps in next few weeks is, to get the Christians to confirm to us, if they've seen the Christ. That's one of the most important thing for us. And then the next step comes, if we can manifest the Soul of Christ in the system. We cannot give it physicality. That's for sure. But let him speak, that is 100% possible, not 99%. That's 100% possible.

And I promise you that fish tank. The fish tank is made, it's in Linz. Let's see. If you can ask him to be there, till the Pope arrives, and see if he accepts his master. These are reality now, the systems are fully operational. (2:02). We have to fine tune.

If you are from Middle East, Palestine area, descent, you are Armenian, your Palestinians, all Palestinians, the Jews in the old part, you have to be, we got to run, we can bring you in. We might through your descendents, see if there was a witness to the crucifixion, to get to see it, the full explanation of it. But bringing the Soul of Christ, it should be as easy as ABC. Now we've seen how the system works.

Others are present - during flight

You got to understand all the people you've seen on the interviews, even Galeb speaks about others being present. Now it's for you to ask, who the soul of, who are you? Or ask from the souls, can you show me the soul of Christ. It's as easy as ABC?
And that knowledge stays with us.

Q: .. Why is the so called Christ energy important for the whole process? Since religions are going to disappear anyway?
K- Which process, what process? For us you mean?
R: I think, yeah, well, (2:04). many processes .. she says, you mentioned Christ very often and we are messiahs already. So why is religious connotation there?

Christianity most abused system - bring Christ to tell truth - from him

K- Yeah, because it closes the abuse of the Soul of the Man by Christianity. It's the most abused system. Many, many people have been enslaved to it. And we'll bring the soul of the kings. We'll bring the soul of rulers who we want to know how they did, why they did. I told you, the man history will be rewritten many, many times I referred to this.

We'll hear it from the history makers. We'll bring the whole past of the, past to the present, through the souls. We are not going back to the future. We are bringing the souls which made that future at that time. It's, we have to train, our people has to go through the system, how, and where, and what, and then we'll get the answers. We'll finance it and we'll find solutions to many, many things.

One of my wishes is to bring Tesla back, and go through him, with him, to understanding of the totality of his mind. Tesla did and worked maybe 10% of what he had with him, he wanted to. He had a marvelous mindset.

Any other question

Of the Prophets why Christ - he is only one who did not kill - did other things

K- Let me. I have to tell you something, .. why I chose the Christ, because he's one of the most innocents, of all the Messengers, (2:06). compared to what the rest of them. He did not put his hand to kill. He never raised the sword, and that's the reason.

The whole purpose of us, and the whole purpose of the KF and the work we do, is to get man away from killing. Christ is the only prophet, which did not dirty his hand with murder. He did everything else wrong, but he didn't kill.

Moses created a bloodbath. You know what Muhammad did in the Islamic world and the Iranian nation. We know Buddha in a way, in a diverse way in the background, did a lot of other works, which was not public. We know from the present prophets, which we call, Messengers, which we run to. This is, Christ is the only one, which never committed the murder crime. And that's why.

Any other question you have from Galeb, or his talk. (2:08).

Q: Dr. Gatua … Thank you very much for what you have brought, all the knowledge, the new science. And it's enormous, it's not even realized yet. But from my brief, thinking about what you have brought, and what it means to this world, and the universe, it's definitely a new era. So we now know of the Common Era, the Christian era, or whatever you call it, either before, or current, or common. So since you have changed that completely, and perhaps it would be best for you, to be the one to name the new era. So what are we going to call the new era? That is the question.

Not a new Era - knowledge always existed - only man opens to it

K- There is no new era, no new era. It's a new cycle in the science. It's a new cycle in understanding the process of creation. Nobody can claim it, it's been there from the time of creation. Now we understand it. You know, if you've never had orange, and somebody gives you and orange for the first time, it doesn't mean it's just been created. Just because you never had it before. There is no new era. When you, when you call it a new, and you're joining the Universal Community to be part of, there is nothing new. It's just new to you, but it existed all the time.

So it's not a new era. It's just for us, we understand a little bit more of creation. And we haven't even started understanding all of it. Once you start claiming that kind of thing, you become too arrogant and that's the beginning of the end.

There is, we now, we start unraveling the knowledge, (2:10). which already exists, for us. Because up to now we've seen it, but we never understood it. We are like those who thought the Earth is the center of the universe. And the first guy who said, no, they hung

him in Pisa. Now we are at least more open minded, we don't put them on .. a noose. Even though a lot religious leaders would like to see my neck on the noose, because big percent of the job lost - shop close.

This is the beginning of understanding for us as a human race, the knowledge, which already exists in the universe. So it's not a new era. It's just an addition to what we know. We had to get to know the magnetic field, we have to get to know the communication the way it is, it's not shouting over the hills and drumming. Now we can do a telephone, satellites, and now we can use the technology to be that point.

Expand the soul - connect to the system without being there

In the near future, if you understand the systems, and you manager to expand your souls, as many of the people you've seen today or yesterday in talks. They can connect to the system without being there. So now you have yourself a line, you have your, what I call, a central point. The more systems we make the more they connect. We create that umbrella, that physical condition to expand. There's nothing new, but we just found, we just arrived.

As you know, it reminds me of the McDonald and Moscow, when they opened the first McDonald's in Moscow, when during the communist time. There was, I went two or three times to get a McDonalds, it was impossibility, unless you paid somebody who stayed in the line for 24 hours, you bought his spot. There was people just hanging around, joining the queue, (2:12). so that they could sell a spot to somebody else. The McDonald's you could buy it from any shop, anywhere in any of the major cities around the world, but it was new to Moscow. And everybody was queuing up around the block for 24 hours more or less, to get served. They're serving 1,000 Big Mac an hour, just to get rid of people. So it's not new, it's the same thing.

Funds to come in for new Institutes to teach T

The knowledge is there. And now we understand it, we understand a small part of it, which I hope will bring us the big dividend, in most of it. There is, as many of you helped us to set up and donate it, and loaned us the funds to set up the new factories, and the new process for it. Once this, the funds arrives, and we get the things moving. We're not going to, as I said, do the process of building. We're going to build new structures with the new technology.

Elevating Soul to physical boundary - sorts out most of physical problems

We are not going to clean up CO2, we're not going to find a cure for something, or something else. Why do we have to find a cure, to work for everything, when we know by elevation of the soul, going to the boundary of the physicality, most of the problems of the man in the physical dimension can be sorted. We've seen it.

We don't want to speak about the health application of the flight system. But I speak to the people who come out of the room. I have seen, I have literally heard people who came in. They didn't come for flight. The lady said, I'm not interested to fly, where am I going to go? Well, I was interested in this, and in this, in me. And I have achieved what I came here for. Or at least I see the beginning of the opening of the doors. (2:14).

How are we going to find a new Gans for such and such a thing? Or are we going through the elevation of the soul, that cleanses, not cleanses, but energizes the whole body, we create a new condition. With the conditions you have, with the new fields, they wouldn't exist? The sugar is in the bottom of the glass in the cold water. You heat up the cold water, the sugar disappears.

The knowledge is - the acceptance of the strength of the fields - that's all

That's all this knowledge is, the strength of the fields, and acceptance of it. We are all in it. All of you participated to bring this in. And we are all in it, and it's the next step on it. And when we did the flight system, last week, we didn't hide, or we did something people going to Linz, there is something hidden somewhere we can teach the soul. It's on the internet. It's available to all of you.

Unconditional Love - Giving - we are the guardians not the owners

This is what it is, unconditional love, giving without condition. I could make billions out of the systems and technologies. Why? I take nothing with me. But in helping all of us. We participated especially in the last leg of it. Now when it comes and receive the funds, which are supposed to come in, to get us over to elevating you, for the new sites, for the new technology. We are guardians, we are not the owners.

And this is the next step. I hope with all of us and people in China, in Iran, and everything else, we bring the thing through, but don't forget, ask yourself a question. If you go into the system, and it's getting better, (2:16). and you start traveling, the first time was exciting, you didn't know what you're doing. But now you know where you're going, what you want to do.

90% will not come back to earth

Would you come back to Earth? I promise you 90% of the people going through the space travel will never come back. Because they will find peace, they will find what they need, they don't need to worry about the food tomorrow, clothing today, the pain, the illnesses and the rest of it.

It'll be good to come back home, as many of you want to go home. But home will be something to visit and go. I don't have time to stay, it too much hardship. I have to wear winter clothes, I have to wear summer clothes, I have to look for the water, and I have all the problems on top of me.

So the process is ongoing. And we're going to step up evolution in science. Now it's not anymore Microsoft, or General Electric, or Toyota, it's Keshe Foundation. And it's the totality of us who are doing it. This is the beauty of the new science, I don't own it, I'm just a messenger I deliver it. And at the same time, I make sure that systems for it, to deliver it are there, but you have to educate people to see it.

You see it's, when you listen to Galeb, it's just, you look at the voice, we look at the different dimensions of it. He says, he feels somebody come into the room. He feels the presence. He doesn't need to open his eyes to see. Because the three other people, two people, and me going in and out. (2:18). He feels the presence.

He felt the presence when the first part of the couple came in. He says, he didn't feel balanced. And I can tell you why he didn't feel balanced. Because what the character was, who was the person who went in. Everybody in the room who were there, and after had the same feeling about this guy. The same emotion. It wasn't just Galeb, he felt something unbalanced. This was the character of gentleman.

And we are watching, we are observing. It's very much like going back to Rick's magnet table, we put another magnet in, everybody adjusts to. Now that magnet is a ball of the soul. .. This brings a lot of understanding. You just listen to what they say. We analyze, because this gives us indication, the souls are sensitive to movement of plasma in the room. How much of it we can cover with ourselves, that we don't interfere, when we come and go. And how much of it is, when we add a new magnet into the table? That's all it is.

And how one soul is a taker. It's amazing how we analyze the team, the group came, they all know each other. They're all friends. But in that process of friendship, we could map out. I could because nobody ?? I could map out who in the group is what. And then I came out, and I watched them. I see them in the dimension of the Soul and what they say and I see them in the D of when they're out in the life condition. (2:20).

I passed through, but I observe everything, how they stand, how they're isolated, how they're treated, how everything is, how they try to influence, that they are correct and do something that I want you to say. That's why if you hear Galeb, and his sister, the first time they talk is when they sit in front of the camera. If you listened to yesterdays program. It's us to understand to accommodate. We are learning. There is no new technology. It's just we understand a little bit of the technology of the Creator.

Q: Thank you very much Mr. Keshe for bringing us that, to that stage of new understanding and for your beautiful answer to my question. Now I have another question. Going through the World News this Morning. I didn't see anything about the new flight system, or anything about Keshe Foundation for example.

K- You will never hear anything about us .. . It's impossibilities.
Q: Why do they ??

K- There is there is a ban There is a ban by the fox organization, which more or less controls 89% of the world news on Keshe Foundation. Fox News controls everything. And if they don't want you do, you don't know. And if they want to fabricate, everything we see with the war in Ukraine, they fabricate it and just put that out, because this is what they want. And just because people hear that part, they believe in it.

Put it this way. We know how the technology works. They cannot control the internet, (2:22). and we see how many of us are, and how many people around the world work, or do, or have to do with the technology. The most beautiful thing is, in a very short time, the Fox News will be foxing it, because when the souls communicate, who needs internet, who needs television, who needs to listen to the news, which is all lies, and fakes. As simple as that.

And we are in such a beautiful time with the development of technology, that in a way, who cares? Let us bring the technology and spend the energy in going forward. Let's see.

We're not looking for confirmation of news. We're looking for confirmation of how much technology we can bring out, that it brings that change.

There is a total ban, since 2012, on Keshe Foundation, no news articles, no newspapers, nothing, except if they create a negative. And they put it only on the internet, but they can't put it on paper. So who cares?

The correct code to trip, with hundreds of people are coming to go through the trip. The next six months, 12 months with the next step will be, what we do. Do you care if it's in the Fox News? when you can come from Kenya to Linz, and be here for lunch and go back? Does it make any difference to anyone, except you, that you can do it?

Q: … I don't care if it's in the news or not. I was just wondering what ..

K- No, we don't care. We don't have anything. We don't care, (2:24). because we have established a new structure and the people who want to be around it. And you will see now that we have put this unit out, we get people coming in, and we see regular people coming in, and we can do this. You will see the change on the programming in internet. How people will come, and how it will change. But we are not there looking for a change. I didn't come here to be famous today and go.

I have come to do the total change, that it last thousands of years, and man never killed again, and he never does what he has done up to now. That's all.

Q: Do you want to tell us in the background, what the world, or the government's, their reaction, their reactions? What are they saying? And thank you very much.

K- We'll tell you in about four to six weeks time. There's a lot happening in next four to six weeks. And then you will see. We heard what they do. We heard what they say. We've seen the process, how they are, but it.. It will bring in, why we'll bring in what the

government say is, once we complete the process of bringing you from Kenya to Austria, instantaneously, government have to react. Can a man from Kenya come without us knowing?

When we fly you from here, and you sit in the White House, in the Oval Office in front of the president, while he is having his lunch. Who's this guy here. It becomes like the queen. If you remember a few years ago, somebody out of nowhere appeared in the Queens bedroom. And nobody knew that the Queen eats out of Tupperware. (2:26). When they arrested him. They brought him out, and he said I was in the room when she was having breakfast, she eats our of Tupperware. I wonder how many of you will come and say what the President was eating in the Oval Office. You don't need permission.

That will be the next step, then you are, then they will decide what to do with it. At the moment it's people talking. As I said to NASA, show us a hammer when you bring objects, that we can get it confirmed. When you can do things. We have to complete our systems, our systems are not complete, because it takes time. Our people have to understand, they have to develop systems to make the system. Then it's a different ball game.

Q: Thank you very much Mr. Keshe. looking forward to living in peace, the peace that your technology brings is amazing. And moving forward to a peaceful world. Thank you.

K- It will be amazing to see. Thank you very much, Rick. So we call it a day. We already had a four hour session yesterday.
R: Yes, sure.
K- Thank you very much for being here. And hopefully, in next the few weeks, we'll see more, we add more. And we'll see how it comes.

Please, I repeat, because we've seen it. Do not come to the Linz, unless you're accepted, and you have the time. Because the doors are kept locked, because of the way we work will not be the same. And some people say, "Oh, I come and camp outside, you can camp outside for 20 years. Go to the booking, get your time and come in. Thank you very much.

And hopefully we see you on Saturday. If any of the people who go into the system, want to make any videos and report in.

(:21).
K- Yes, good morning, good day to you. As usual, wherever, and whenever you listen to this series of knowledge is Keshe Foundation Spaceship Institute, series of teachings, sharing knowledge, understanding more, and somewhere we might be able to elevate our knowledge, or elevate our understanding of the work of the Universe, (:22). or work of the man. The work of the man finishes with rockets, food on the table, worries about the lights, the electricity, and inflation and whatever we see nowadays, going around the world. The life in the universe goes on how much I can give more, how much I can increase the, what we call, the elevation of the Soul of the Man (STM), and in that process, we go forward.

I welcome you back home, with what we go, what we teach, and what we see as part of the growth of the Keshe Foundation public teaching. In the past days and weeks, as many of you are aware, we have put the knowledge of the teachings, even what it was in the intro of today to work, to show what we taught months and years ago, now can actually be realized. When I listen to this intro, now that we have built the systems, now that we have put people through the system brings so much reality to it.

Up to now in excess of around about 45 - 50 Knowledge Seekers, (KS) their friends and their families, have gone through the process of experimenting everything which was in the intro, (:24). dimension (D) of the physicality (P), D of the Soul of the Physicality (STP), and D of STM. And we listen to them when they come out. We listen to what they go through. Very interesting, figures are coming up.

Next week we're going to have the first space party, and the following week again on 28th, 29th we'll have a space party. The party is done one day, primarily the Italians are bringing their wine and guitars, and what I call, whatever they like, headed by the Universal Council member. Then we, for the first time go through, and see how people come in, how they go through the process. In a way, we are changing the decoration for them to be able to spend a whole 10 hour, 12 hour session in the environment of the space, of the fields of the universe.

Up to now, when you entered what we call, the test zones, where we have the Enhancement Units (EU). You primary, as you know by now, you entered the room, and you are faced with three chairs on either side. Originally, we commissioned one Unit. This week, we commissioned two Units. And we have, I think, about three, four meter space gap here. So the process has been you come into 1, 2, 3. (:26). Some of you go through as a passenger, some of you go as the captain, if you want. Some of you go and test both of it, and then go back on the reverse of 3, 2, 1, and you come out.

Next week, with the Italians and us living in Italy for some five or six years, knowing the mentality and whatever, we have given an "Italian all day party," which means when you come into the room, you go in through the process, you decide to take the flight, or you decide to join the party. You have the same option, whole day to try different combinations. We are observers of the passengers. In a way the studio becomes a spaceship of the man.

We put 30 - 35 people on the 29th. We have the beautiful people from different countries, the French joining us, hopefully, and hopefully, people from beautiful island of Malta, and maybe from other two other countries. So the next on 29th is an international party.

We wanted to see the stages of how people take position. We've seen 20% of the people who come through the system, they say they felt nothing, no difference. We said, okay, there is no difference. 20% of the people achieve part of what they came for. That's no problem. We see run about 40 - 50% do the space travel, but they're not interested whatsoever. We see 10% which come, they don't want to travel. 20% they want, just come in to go through the process.

The first part, which puzzled us at the beginning, (:28). the 20%, come in, and they feel nothing. We didn't say anything, we watched. We invited one or two back in the last two weeks, and the thing has changed. Then we realize where the problem is. "I don't want nothing, I want the system to show me what it can do with me." I take, I am a thief, and I put ?? ?? I came with no intention. But I wanted to see. I want to take. I am still a thief, but I come in a different disguise.

The other ones who sees some, come in, they go through the one phase, they're still aware they are here to see something. The system takes partially in interaction with them, and they get frightened, that this is, comes, I have to admit, I've done something, I've seen something, or I felt this and that. So we've seen the progress.

We see it, fifty percent of the people who actually go through it, a very profound understanding. They see their soul by the seat number three, expanding. They tell us that, they are aware of their physicality, but it's not what they see, there is a layer on it.

Expansion of the STM over Physicality

There is a separation between them and the space, they're aware of the sounds, they're aware of, they don't hear no conversation. Most of these people don't hear most of it. They hear an instruction through the ear of the physicality, but the soul is extended beyond them. And they just follow things.

And we see some which, going through this process, as we say, the soul expands and extends beyond the physicality. We see magic's, we see conditions, (:30). which is very strange. We now know what to look for in Seat 2. We know what we see in Seat 1, and we see the evolution of the expansion of soul in Seat 3.

Some people who come with all sorts of, kind of having problems, but they are so intensely involved to go to the Moon, they don't go to the Moon. They come out of the system, and they might go somewhere flying. And then we ask them what happened. "Nothing I just went somewhere. Oh, by the way, I had a pain for years here, and I had this over there, and it's not there." What happened? We explain easy.

The extension of the soul balances the whole of the, what we call, the environment of ?? . We are not here to cure, we are here to show how you can expand it. This is what we said, when the soul expands the boundary of the physicality, it puts everything right.

I watched a gentleman, people here know who I am talking about, that you came in as a team, with a doctor. He went through the system and said, "nothing happened, but you know something, now, I couldn't raise my hand. Now I can touch my back and everywhere, it's gone."

The expectation came to go to space, but the body was not there. The body was there to see its own operation. We had a case yesterday you hear it, recording tonight at six o'clock. We have the testimonial number 3 of this week. And we try to confine it in two hours. This week has been mainly Germans, next week is Italians, and the week after we have other communities. (:32). I've seen a number of Iranians have registered to come in. Join us. We see other nationalities are just coming in. We are getting fully booked. And do not expect from Mexicans, you come and see me there. Keshe Foundation team is there to get you through.

Belgium's try to sneak in - refused

We had experience yesterday. A lady registered in Dutch, in Holland paid through the foundation. She says, she's bringing a friend. They turn up to be 4 Belgian's. We refused entry. Getting a Dutch, or a French to register you to come in as a Belgian does not qualify you. They were very disappointed. They were dear friends from when we were in

Belgium. I know two or three of them, they attended the number of the lectures. But no Belgium's allowed within the structure of the Keshe Foundation. Please do not play games with us, you will be disappointed. They had to sit there nearly four or five hours. They traveled 500 kilometers and they had to leave. We don't even show the exhibition to you. Please do not embarrass us, and yourself. We respect you as a Belgian Knowledge Seekers, but our security and protection of the KS of the Keshe Foundation is bigger than some individuals.

When one of the Knowledge Seekers went through the system with no expectation, and as, to see what the system is. She had what we call, shingles, apparently for seven years, and she came to fly. The soul expands. I stood in front of her to understand her experience, (:34). how we can ?? fit the machine. She said, "my face, there's no pain, it's all gone. My shingles is gone. There's a bit of nerves here. I can still feel, but I can touch my face. There is no more pain. Been there for seven years." We put her to the second time through the flight system (FS), and she tells us more or less everything is gone.

I explained this is not a healing machine. This is the expansion of the soul, which in traveling to expand beyond the dimension of the physicality, balances everything on its way. You take whatever you need, you're short of, be it food, if you're hungry, be it emotion of love, be it the emotion of expectation to see more.

So we've seen a lot of changes. We've seen a lot of realignments. The systems, if you've been there once, the day we opened up, till today, you'll see some significant differences. For next two or three weeks, we adjust, we are testing, that we can go to the next phase of space, and deep space travel. When we are ready, when our equipment fails us, here and there. And in a way we eliminate, 90 percent of the, what we call, development testing.

We go, we are preparing our system to allow the physicality to travel, within the confinement of the Soul of the Man. What does this mean is, as we speak with many of the people, the 50% plus, they tell you, that they feel the presence, they see the expansion of the soul. They go through all kinds of emotions and experiences.

They see their father, who passed away 20 years ago, in front of them, and they enjoy the presence. They see the child which was passed away at a young age, the mother sees the soul of the child, (:36). when she was young, for 10 years.

P inside STM - sounds are muffled

We see the change in the dimension of physicality, we see the expansion of the STM. When you go into the flight system simulation, we see the same. If you went and you're that part of the 50% and expands. It allows now you hear things, but most of them they say, we are not aware of anything, because the noise is muffled noise in the background, because now the soul has covered the physicality. It's like putting earphones on your head, and somebody speaking outside. That earphone is the dimension of the STM.

Then we see the same process back, from one chair to another. The systems are not the same. The systems are set totally different. This system has to set to as I said before, create rotational dimension. This (the other one) is set to create rotational dimension. We restructured the system.

Our systems for next couple of weeks are created, are developed to be able to take the STM, STP, and the P of the Man in and out of the environmental of the systems. Which means we use the expansion of the soul to travel the span of the universe. If you will need, manifest the physicality (there), and (then we) bring you back.

We are going through the development, (:38). we have invited NASA scientists, the Iranian space scientists, the Chinese, and we are inviting world scientists to join us. Yesterday we had the pleasure of doctors, this week, we had quite a big percentage scientists and world of medicine with us. In some of the interviews, they might introduce themselves.

They come to see they come to evaluate the knowledge, and I think Tuesday we had four or five of them with us. And that's about 30% of the people come in. Yesterday we had a few, and next week we don't know what we're going to get with the Italians. In that process we have to learn how to change the dimension of the what we call, the units, into the dimension of the room. Keep you in the environment of the Jupiter, keep you in the environment of the Venus, keep you in the environment of the planet Zeus, and see how many of you being in this environment so long, what it will give you.

Warning to the Italians do not come in and go out, I need a smoke. When you go out for a smoke you don't come back in, your session is over. Make sure when you're invited to this structural fields, you stay within the structural fields. This is why we allow you to party. We want to see by the close of the time, (:40). it's not you being there half an hour. You arrive about 10 to 10:30 into the room, by the time you get ?? done, it's five or six hours to enjoy. Some of you might not be, and (not) feel, (you're) the 20%. Some of you don't feel anything the first time. You see the second time you get, maybe to the others.

Maybe by the end of the day, some of those who felt nothing, they become everything. They understand the knowledge.

We had a Knowledge Seeker (KS), he's on the line, he knows who he is. He came one, he was the first person going through the system and he said, I feel nothing. And sir, you're part of the structure of KF, stay. He stayed till yesterday, and he had to go back home. So he went through four days of every time different conditions. Because as I said, he came to get the knowledge of the universe. His condition was, he came to understand the knowledge of the U. He didn't come to give. He went through all traumas, of all sorts in the past week. Because I watched him, because he came back every time, we did a different session. Yesterday, before he goes to fly out. I gave him a seat in the what we call, "in the courtyard" here, it's inside. He sat there for about an hour. He was explaining

to me about his emotional, and the things he'd seen, and dreamt for past few days, and everything.

When he sat in there, in the last minutes, as we were all are walking everywhere, and still carrying on testing, or whatever. He said, I got the knowledge. I got what I came here for. I see the Light, I see them beginning of. I understood something. Because something happened in front of him, … but I still, I'm sure he hasn't understood exactly what has gone on. But he said, he gained what he came here for, (:42). start learning the knowledge, but it took him 4 days.

Now ?? suddenly again, a bit. We had the same, a gentleman from Linz, beautiful young gentleman, he came on Friday, last person. And he said, I heard nothing. I said, come next week. By the time come on Tuesday, he came yesterday morning, I put him through. And he said, when sitting through the seats, he felt different. He could feel the energies and everything else. Because the first time he came, nothing happens, no expectations. He actually expected, because he wanted to see something. He wasn't there to give.

So you have five hours to become environmental passengers of the U. NASA makes a swimming pool and throws people in to test the space, two or three people with 20 people watching, and hanging from cranes, with the clothing of the Moon. We create the space of the plasma, of the ocean of the universe, for you to walk in.

Anybody touches any of the systems you're out. Italians make sure the wine does not take away your physicality. We're there to observe, to observe how the system effects, you. We are there to observe if any of you Italians, are actually not Italians.

We have seen two near misses of opening up. I've been in the room when I see. (:44). Still control. I'm sure if these two come back, I have invited them in ?? devious way to come in for themselves, not ?? devious for us. That they understand, they can trust to be themselves amongst men. We might see them. They might show the true nature of their origin. They tell us, but they don't understand why they went through this.

In a way, they saw their own citizens. They saw the places and the citizens of the universe, which they are part of. They tell us, it's in their talk, because the physicality watched when the soul was trying not to divulge, not to release information. They tell us, they've been with other creatures and explained to us what it is.

In a way in the universe we'll see others. But when we end up in the middle of only one race, and we are with them, and feel at home. We are them. We are part of them. It's for us to open up and become them, not only with them, but in the space of the man.

We have seen what we have promised. We have seen many of you coming in, being ashamed of talking about what has happened. Because it's not normal, man to be in control of his dreams, man to be in control of the physicality. Soul encased in the physicality, and they tell us step by step.

In a way, (:46). we have brought in the knowledge of the man, for the freedom of the man. In the next few weeks, we go to the next. Understanding the process is a fundamental part of the work of the KF. We are not here to show magic, we are here to be part of the magic.

Many of you will start seeing the work of the Keshe Foundation in a deep way. You will experience, and then the beauty of it is, when you leave the room, when you leave the space of the exhibition center, you'll find out you still have connection. And the beauty of it is, as more and more people come in, and they add to the knowledge of the what I call, Wikipedia of the man's knowledge, and those from the space.

Many of you find out you get to know answers to a lot of things, without reading about it, and you think it's your intelligence. My dear friends no. You have connected to universal knowledge. The same way, as we saw with our Knowledge Seekers, who ?? yesterday. When you understand you cannot abuse it, it's there for you to enjoy the knowledge, and benefit by it, it doesn't matter in which dimension (D), (:48). then you start becoming the citizens of the universe, where you can tap into the knowledge of the U.

We are here to bring a fundamental change and total understanding of the process of creation. Nothing else, we're not magicians, we're scientists. We got to understand in the process of what we call, evolution, we as Knowledge Seekers are and have to be that knowledge seeker. We seek knowledge, to understand more about ourselves, and more about what we do, and more about what we say, and how things will change, one way or another, for all of us.

The process, which we see in the Enhancement Units (EU) is the process of the natural, neutral process, that many citizens of the universe travel. Those who choose the UFOs they go around jumping around like a monkey, different places to see more. Those who don't want to be that monkey. They travel with D of the soul, and they manifest themselves anywhere at anytime.

We have seen number of Knowledge Seekers who went through the process, and they go from Moon to Mars. Oh we don't want to go to Mars. We want to go to Jupiter, or we go to Mars, (:50) and then Jupiter. The beauty of it is, if you go from earth to Mars, or to Saturn, or let's say Mars, I think it takes how many months to travel to get there, and if you get the landing right, if you don't roll at the end. As we've seen with the Israelis flights, and we've seen with the Indians trying to land here and there. The Americans and the Russians didn't get it right the first time. It takes you weeks and months, and years of preparation.

The interesting thing is, you heard in one of the first recordings, we went to there, we went there, and I took them to the sun. Action is instantaneous. One of the funny thing is, the day we put the husband and wife through the system. The wife was saying, nothing, not much happened, and just before they leave, husband and wife talking to each other, I think you'll see now on the recording of the today, both scientists, doctors, one of them.

She says, I was with him, he told me something what he did, and I was there with him. I went with him.

Because when they were in the room, both sitting in the unit, I told them, take a flight, and you are the captain. Take your passengers, they were 4 friends together, 2 couples. Or a couple and two friends. Now we can take passengers, and two can see the same thing. When you go to the park, we don't both look at the same tree, or ?? soft ?? looks at the birds on the ground. But you know, the other one is there. And yesterday, (:52). it's the second time we had this confirmation, that they are together, they've seen the same scenery.

So we see how we can travel together. And that was like a gift, just before they leave. And it shows that many of the Italians might go to the same place. Or they can travel to Mars, to Jupiter, and wherever they like and come back. But it is instantaneous. He told me ?? where he wants to go, and ?? wants to come back. Take the soul, move it to Mars. See what is the physicality (P) of the Mars, you need. Enjoy the ground, take the energy from the universe and you can survive. I am from Earth, I want to go back home. I have a fingerprint. I can be recognized by the fields of my fingerprint, I can go home. It's instantaneous, not ?? several months.

The beauty of it is, with all the ones who've gone through the system, they tell you without fail, when they entered (Chair) three, they know the journey is over. And when they get to (Chair) one, before they come out, they tell you something very interesting. The weight of the physicality takes over, and they feel the weight of their body. Up to chair one, the process from here, was weightlessness. They don't feel their body. They tell you, they might feel their legs, but when they go to the next stage, there is nothing, they are, there is nothing, there's no weight. If they allow the physicality come in, they feel something, and they go back in again.

In a way, (:54). what we set out to do, through tests and confirmation, comes in. I had a beautiful, interesting, what I call, text from one of our Knowledge Seekers who was continuously in touch with us. And Charles's gives us with a lot of information. It's beautiful what we get. Mr. Keshe, they tell you what you like to hear. Mr. Keshe is not there, they tell themselves what they've seen, what they went through. They don't come there for Mr. Keshe, they come there for themselves, and we are listeners to the journey. If we don't like something, we reject it. And if you like it, it's to the ears of us. We are independent Knowledge Seekers. We are there to listen.

I am there very much like you know I call it, a interrogation, I want to know what you saw. It's like a customer officers, it's like Security when you land in airport ?? What did you see? Did you see this? Did you see that? What did they do? I am more or less, that custom officer. I want to know what you've seen, where you've been, and I accept all of it. I am not the judge of it. And we are usually two of us, we stand and listen, because then we understand the experience, then we know how we need to adjust the systems, what we've seen, what section, what needs to be added, what it needs to be done.

This week, you didn't see last week, we have installed the fields detection systems, which we developed in Switzerland some years ago, and we used it for 129 Tesla test. Now they have come into the room. We test and measure the fields. Are we in the plasma state ?? physics, or mater state plasma (Pl) and where.

I explained to you in the past few days, and last time, (:56). that we learn by the noise. Our Knowledge Seekers now started doing it, when they are in the room, some of them, they bend to see where the noise is, where is the maximum field, and they tell you where they feel the noise. Where they see the interaction of the fields of one unit with the other.

So you experience what we experience, you go through what we go through. It's time in what we heard in the intro, to be seen in reality by systems. To be seen, and to be tested. And for us, for the first time, to feel, to know, to confirm the existence of us.

We welcome you all, to the … test center, we welcome you all to be part of this trial. And in the near future, some of you will become those who physically can take steps in the depths of the universe. And maybe bring things back for us, physically that we can see. We are not here to do magic, we are here to add and extend to the knowledge of the man in a correct way, done in the support of everything by ?? .

I have shown my fingerprint, how I work over the years. And you've seen it, but you have not realized it. I don't interfere, I explain, and if the Knowledge Seeker understands it, and do most of it right, they'll get the result. I've shown this over and over again. We did this with Naomi, I explained what needs to be done, and Giovanni, in a step by step followed the procedure, (:58). plus I ?? added an exact knowledge to it. We've seen how the brain missing, eye blind, and a total coma condition and everything. A father brought the daughter back, a common man.

I've done the same thing in other processes. I teach you about the Gans's it's you who develops it. We have a team, they are in the process of creating MaGrav units, which actually creates energy and the rest of it. I keep on telling them, that they are going wrong, but they don't listen, but they're successful. They are reaching somewhere.

It's the same in this extension of the exhibition, of the fields of the universe in Linz. I only guide, you will never see me taking a screwdriver or making one reactor. I teach as much as the knowledge can be understood, extended, and amalgamated and used and delivered. This process is the same for all of you.

The knowledge in this room has been taught openly for 15 years, I gave you the patents. Go in the patents, you'll see in the original patent, we speak about the room where this plasma technology is used. It's the same room, environment where you can go in and get fed, environment where you can go and find wellness, environment you can go in and can fly with the Soul.

Now mankind is ready to the interim, (1:00). which is we still have to give you these little systems to be able, at least you see something, you believe it, and then when most of

you have learned it, we'll take over. You'll learn to work with the fields of the U. In a way, long term, when 10 of you come in the room, you become the reactors for elevation of yourself and the others.

There is a lot of truth in the ?? figure 9 . What would be. Have you ever noticed ?? ?? (draws a spiral) of the Pl, end of one, and the beginning of the other. Where you start ??? ??? and you release, free, depends where you want to be, and where that end be ?? is zero beginning of the new.

We gave a lot of secrets to man over thousands of years. If I draw you the plasma like this, what have you got, beginning from the end, where that end comes ?? beginning starts, because the plasma never dies. It's you who interrupted the new cycle.

So, mankind needs to learn a lot, (1:02). and understand how we have even hidden things inside your daily life. Understand the process, understand the Totality, and then add to it. Try not to build reactors. But if you become good at, these what we call, so called, reactors or souls. Actually, if you look at it in a very close way, it's ?? your. Depends how you will come to find out, you can create condition of interaction, that in that position creates condition of manifestation, energy, and confirmation of existence.

Your strength of the Soul will become the space of the room. And you will decide in the interaction of this field with that field, I have this a strength, I'll take orange. In this position from there to here I become Jupiter. We just choose different names for the same thing in different dimensions.

I hope now you understand why I keep on playing these intros, because there's a lot of hidden knowledge given, and today we unravel it. Listen to the intro again, and come and listen to teaching again. And you'll see, I've told you everything, (1:04). years ago. Now we have a machine you can see what it actually does.

And they tell me, Mr. Keshe where did you get all this knowledge from? Because, join me, you shall see the Creator. Go against me, you still think you won, but you will see your own demise. Even your what we call, gain is short term because you actually lost and it ?? the gain. You lost ?? the gain of the knowledge of the Creation and you forever stay in the ?? darkness of the pain of the physicality of the man.

Join the knowledge and understand the knowledge. Go back on all the teachings and listen to them and connect them to the process of today. Then understand what is the next step. There is a lot to come yet. What will be beautiful in the coming time, is when the Knowledge Seekers grow into the field space of this room, they walk in as man, and in that walking in as a man, they find within the room, their own soul, which does not need no walls and no confinement, and they become themselves. Maybe 10 of you walk in together with different strengths, and when you dance and you party, (1:06). you will see the work of the U, as each one of you becomes one galaxy and one star.

We ask for a lot of people, brothers and sisters, we had a few this week, last week, and husband our wives, boyfriend and girlfriend, ?? Australia's teacher, and we let them go in, and those who are close, we ask them to hold hands when they sit or stand in the center. It's amazing how they change hands very rapidly. In brothers and sisters we see the formation of the hand rapidly changing. When you hand, one is a taker, and one is a giver. When you give a hand, one is supporting and one is getting supported. And we do this a lot with the hand. When we hold the hand of a child, the fathers a watcher, (gives) care, looks after, feels love. We see that in sibling who's actually the giver in the house, and who is the taker.

We had a case strange enough, but we knew it, we watched it. I watched everything. One young sister, they're not children, very mature, literally brought our system to a halt in the whole room. She's such a taker, that even the universe was not big enough to take. And coming out of it, I felt nothing, but I watched our system literally coming to a halt everywhere, and I told them, one of you here is stealing energy.

So come in, (1:08). not to give, but come in not to steal. And don't come in, "I came here just to see." Go home and see how you feel, what happened. Join us to add this knowledge and bring it to its final point before we put man into space. The true space travelers of the U. You don't need to wait so many million light years to get somewhere. You be in that light years, instantaneously, if you understand the knowledge of the U, as you've seen in the KS.

We try to explain the process, and it's for you have to understand it. If you want to, then add to it. And then we'll see what comes next. … (1:10).

Proofed to HERE >>> continues

<<< **BREAK** >> 437 KSW June 16, 2022 (1:14).

K- As usual, if we don't break you now, we are too old too traditional, and we have to do things our way. We've done it for 10 years. It's just like ?? an old broken record, we have to do the same thing otherwise, you say, "Oh, he didn't ask questions this time." The only thing we broke away from was if you remember, we allowed Knowledge Seekers to come and share what they've done. We had to stop that, because of the events we saw and the things, the way they happened.

I have to explain to you something very interesting. People who go through this process, of the what we call, (1:16). getting to know themselves better, understanding that they

can allow the soul to take over and see things. We'll learn new ways of living. We'll learn an amazing process of communication. You cannot eavesdrop, but you can become aware of, it's a big difference.

I want to go, I am the beautiful city of Vienna. I want to go to London to see my son with my soul. But I want to take the physicality. My son accidentally has gone to Frankfurt, the day before. Today, I make a trip to go to London takes me hours of the fight. But now if you understand the possibilities and capabilities of the ?? travel with the soul, my soul will get in touch with the soul. "are you home, Daddy wants to come home to see you." Then I take the physicality, maybe I still take a plane, but I'm aware, that he's there when I get there.

When you stand in front of your daughter in law, you don't need to say anything, because the mouth speaks, as a lot of our people talk. But you see the soul you know the true intention. And would you still say hello darling? How are you, he says, thank you very much, I know what you're thinking of, I'm going back, you don't want me here for diner. Or I know you enjoy me, I brought something for the grandchild, we all enjoy it together.

The element of lies, which a lot of mankind do, and they accuse others to be the liars, will go out of the equation. (1:18). We see that in the machine. We see that clearly in our system. Very interesting is, how many of us, when we go through the system, will change when we come out of it. I've seen a few people, they totally change. They change in a way, that they see more. They don't change, and become this or that. They changed that they see new possibilities. They change that they see new horizons, and they change in a beautiful way to themselves, and a couple of them I've seen, I tell them, go and live, and in a few weeks time come back.

When we invite you to come back by the KF, they don't pay for the sessions and coming back. I heard a couple of KS say, Oh, Mr. Keshe is inviting us back. We know who we invite back, unless you heard from us directly. We .. know why the reason, we invite people back, because we want to extend, we want to understand more.

I invite people to come back, like the team of doctors that are invited back, because them understanding, they can help their patients with the new knowledge. And others the same, you don't need to be a doctor.

Try to come to understand the Totality. The Totality is you and nothing else, and enjoy. I'm really looking forward to next week Italian party, (1:20). and see how many we'll drag back from the Moon, Mars, and other places, and how many of them were locked on the land. We allow you to a certain limit of the freedom in the control room, in the Flight Room.

We provide you with a chair and a table, that you can wine and dine. And we want to see how many of you will go through the process. How many of you don't go through the process. It's another what I call, Italian party on the beach. Do not bring any a stereo

system, that it can electronically interfere with us. Bring your guitar bring what we call, they want to bring a dog. Why not? We'll see. But we have to approve the dog because we have limitations. And we have to do a lot of things for it. Bring your cat, bring some flowers. Let's see how they behave, how they will go through it. And would the dog go crazy with the noise of the interaction of the fields of the system, or go to sleep because it's what its soul is used to.

We are here to learn. And the international interaction on 29th will be amazing, when they put the French the Italians and the Germans all in, and see what comes out of this. And how will the citizens of the man on the soul level interacts.

And as Stephanie is the first member of Universal Council, will go through the system. On Tuesday, we'll see what it is. The following Monday we have another member of Universal Council with us, going through the system and yourself seeing how we connect to the rest of the community of the languages.

And we prepare ourselves for a lot of good things. Our system will not be fully operational, (1:22). as we are changing and ?? growing our systems. Some places fail due to interaction of the fields, some due to interaction of the … communication of the fields. Hopefully in next three, four weeks, we'll be ready to test the physical flight. And see what happens.

One of our teams called the Foundation and said, they're going to be there at that time, they couldn't make it, because they were trying to see. So we make these things possible. Very much like olden days, when we used to go to Africa, even in Europe, you used to book a time to talk to the family. And you had to go to the telephone office so many hours before sitting in the queue, that they can connect. You send the letter weeks before the family, on such a day I'm going to be there to make a call, you be at the telephone as well.

And we're going through that process at the moment, we are back in the olden golden ages of communication, but in a soul level. And the we have to get it right. It will be very, very interesting for me. And we expect this to happen. We are not ready for it, we don't tell you when we are ready for it.

Because as we go through the tests, one of the first things we would like to see in the environment of the two systems, is how we can transmute one object from here to here, or vice versa. And or this process as passengers. Then it comes from us, because we are patenting the system, how we can take you outside the system, where this is the system, which means we have to understand the environment, field interaction.

Transmuting without a system

We already have done part of this, (1:24). now it's actually fine tuning the system for this process, of without a system to be able to transmute to any point. I think this is about six months to a year, out for us. But the development is very rapid.

What we saw, because we changed one of the system slightly. We are adding other things. We made adjustment to some systems since we opened up, we see more and more in that direction of the work. It was beautiful to see a number of scientists, doctors and highly qualified people in the world of science, to go through this in past four sessions. And you'll see some of them tonight when they tell you what they did, or how they did.

Please I explain again, we respect you as the citizens of Belgium. Do not try to find a way for you to get in, because even if you get in, the system knows exactly how to not let you to go anywhere. Our wish is the way it is, and it will stay that way.

Come in and hopefully, we'll have a full party reporting, when they come out of it. There'll be no video recording or recording inside. And we'll see how the process will be. And maybe during the party, we will go live session on the what we call, The Keshe Foundation Zoom channel for people to ask questions live from people who are in the process or in the session. (1:26).

I have to warn you very strongly, that never leave the room, unless you have gone through the full process of what I call, decontamination. When you come in, you go through this way, and when you come out, you go through this way. Don't jump. Because what happens when you come out, you're totally blank, in what you had before. It's preparation for you to go through. And secondly is for us to understand what and how you evolved in the process.

In the next few weeks, the what I call, the two Enhancement Unit, which you have, will be removed from the room. The experience has to be. This process of one, two, three, as the guy was telling us yesterday, it was very interesting to hear it. He does a lot of meditation, everything to get where it takes, a lot of preparation. He said, it was amazing, I walked and I was in it. And I know this feeling, and it is much better than trying to do it through meditation, because now I can reach immediately.

So when you come in, gradually, we're still creating the ultimate goal. We expect a full flight in groups, somewhere by the end of this year, where we can get everybody together. If you go on the Moon, one doesn't go north and (another go) south and another of you end up in another place, with all your .. loved ones.

Watch the testimonials of today. But look at it beyond the word, look at the emotion, look at the information, which gives you to be able to take that step. And it's touching in some how, (1:28). some of them go into detail of what they do, and some don't want to appear on the camera. But yesterday, we had the pleasure to have round about 14 people 15 with us. And we had I think about 10 to 12 on Tuesday. We have reached the number now, the structure is taking shape, is taking place. And we know where to, and how to, change our system, reactors and everything else. Some of the physical changes has to be done, or some has been done partially. We learn a lot about the energy transfers of the systems, and how to be.

Something strange has happened to us, which should have not happened. Physically it's impossible, what we understand. But their answer to me was, maybe it was moved. Two systems were put actually by measurement, (1:29). parallel to each other. Yesterday, we noticed one of the unit is in this position (angled). We put it aside, we put it maybe working on it, maybe could not push, because they don't touch it. But systems are finding their own position.

If someone comes in with wrong intention - system stops

And we have a system, which we developed deliberately to in a way, to mix the fields, and this system comes to a halt. And if somebody comes in with the wrong intention, the system stops. So we know they don't understand it, but we know what's going on. Because we are now establishing a very clear pattern of the work. This movement is very important for us. (1:30). We watched it yesterday. I said this is this has moved, it wasn't there. We observe everything in the room.

As we remember, I told you about the gentleman who came last week, he didn't feel any thing, and then he said, but there's a problem. I had an eye which was blind for six years, and when he came on Monday, because we asked him to come and go through the flight system, he had a handkerchief with him. And he said, now I have to carry a handkerchief, because there's so much tears, and for six years, there was no tears. And he tells us, he can see shadows, light and dark. It's very interesting to see how it develops through the soul of the vision of the STM and through D of P.

As I said, we are a space flight test. And when you go to space, you carry no doctors, no food, because we know the Soul of the Man, is to repairer of the man. We'll see what other things will come up and things take shape. And as it takes shape, we will share.

Any questions?

Q: .. (1:32).
K- Can you read again, I missed the question.
Q: Hello, Professor Keshe , I have a question about the movement of an object in the spaceship. Only the soul moves in this movement, like when we are asleep, or does the body go to a new place with it?
K- At the moment, we see the body is with us. And we are developing a new system. As I explained before, we had the gentleman last week, which went to the Moon, we put him in again, in different systems. What we saw him physically, we even gave him a glass, we see him, he is picking up stones from the Moon, and puts them in the glass. We see him doing it. We asked him to put it on the floor, to see if we get a conversion.

We realize the field distribution in our systems has a flow in it for conversion. So now what we are doing is, we are creating a system like this, which carries G fields of let's say the Moon, and G field of the earth, and they can put things when they're in the Unit, if they get a stone on the Moon, to bring it in and drop it in this box. And here, because the two prevails, we should be able to theoretically, to pick up the stones.

If you remember, I don't know where I was here or the other talks, we put the stones on the conversion material, but now we see what we have. But what to do, because it's a new system, because it took us a couple of months to literally physically develop it. In a way of the present point where you pick up, G, the destination G. So you can pick up a screwdriver on Earth, and deliver it to Moon, G system going through the transition. (1:34).

And this is something which we have sorted out in a Vertical system. Now in the open space system, we have to create it in a different form, but in principle it's the same. And yesterday with one of our participants, if you come in, you'll see it, if we keep you there. We have brought the box of bolts and nuts and spanners with us into the room. We have brought scents into the room. We want to know if your soul can smell the scent. Or the people who go through that process if they tell us to smell something.

For the first time. We had somebody yesterday saying he could smell something. He knew the smell, because it was the smell of his own people. This was very strange for me. He said, he knew the smell, because that was the smell of his people. He knew their presence by their smell, but he didn't see them. Some of these are there for you to see. It's a beautiful, beautiful time to learn and to enjoy.

I wish something Knowledge Seekers who have been with us for years, would have been there and they could take the spanner and take it further. As I cannot be there all the time. I literally stand on my feet nearly 10 - 12 hours of it. As I call it, it's job support ?? 65 it is not easy, but it has to be done. And it just gives you energy. I hardly sit the whole day, from the time we start, because it's continuous observation. And we need the old people, Knowledge Seekers who are not physical, so much, to come in, and to observe, and write about this. Because everybody writes about their history, what happened in a brochure.

We have brought one of our full time staff from the lab, (1:36). into the exhibition. And we start literally writing all the people's memory into the archives, that we want to know who did the flight, that we can call. In the next few weeks, most probably one of those who went through the flight, went to the Moon, we invite them to come together in one day. And we want to see what's the extent of it.

Those who went to see their family, we want to see the extent of it. We invite you back in. When we invite you, as I said, it's a gift from the foundation. And then we take the process to the next step, and next step.

It's very interesting and we try to learn more and more, much, much more. We expect to see a lot with the Italians. They won't know it, it's not that we're going to do this and that. We want to see the interaction of the. What is important for us in this group, what I call interactions, is going back to the basic of physics.

Many STM in FR is like magnets on Rick's table - finding position with each other

If you take this room to be what I call, Rick's magnet table. If you remember Rick putting some magnets on the table, and putting something in, and seeing how they move.

To us, in this room, is very interesting to see the STM. Never been done before. Because don't forget, this is the same as you remember your what I call, CO2 boxes. When you put a Nano material in the box, this is not the environment, anymore normal, (1:38). because fields of the Nano coating now is M. With having the systems in this building, now, we have created that field position.

We want to see how the souls interact. If the souls fall in love. If the souls find position and respect for each other, maybe the Italian discussion from Milan, or Rome to Vienna, and on the train to Linz, how it's changed. We want to see when we change these magnets to the Soul of the Man, how does the soul react in this room. This is important for us and the psychologists who work with us in the future, to see how people will behave in a big space, in the respect to collection soul traveling.

Don't forget, we've done this test. We have brought four people, four member of one family, 4 members of two, one family and strangers, and we have seen the reaction.

We have seen in the family how one person is the sucker, taker and the soul has come. the soul does not agree. But a physicality does. I knew it from the minute he went in. I told our people we will have a problem. Because we see the soul.

I want to see how the plasma of the soul of the people interact in this environment. This is completion of what we call, the process. Then, as I said, maybe in a few months time you go to Linz, to go to Mars, to Moon, where we create the atmosphere and the condition, (1:40). and we can replicate this around the world.

Any other question?
If you thought you had an exciting time now, with MaGrav and Gans's, you haven't seen what's about to come.

This Soul Travel is beyond UFOs - they're still in containment

Q: … So do all galactic people and UFO and aliens use the same concept to space travel?
K- No, they haven't matured to this point yet. They still travel with containment. When you go to the Moon, are you in a UFO? None of our people report to be in a machine. One guy said, I was in a bubble. But none even wear clothing on the Moon now. You hear a voice recording of today, one of the first guys went in. He explains how the sand of the Moon went through his fingers. People explained to you how they feel the liquid of the other planets.

Very strange thing is building up. This room is a standard room. But strange enough, where family members, the youngest one, always feel cold in the systems. We even had to go and get a jumper yesterday. It's a very interesting, how are physicality reacts? But

we'll see. We'll see it take shape because there's a record up and made. (1:42). And we'll see the next step.

Q: Salamea … I'm so happy that you achieve all what you had in your vision for from your heart from your soul. And thank you because you brought to humanity, this nice gift of humanity to be able to see their own soul flying and be able to reach any part of the Unicose, because our soul expand and can be instantly everywhere.

Now my question is related to what I experienced last night. Usually when I'm flying, I'm seeing people around me, but never seeing me. And last night I see myself, but not the physicality. I had. I have seen nice, very beautiful colors I've never seen in reality. Like rainbow, and me only one white light and flying.

I would like to ask you, what is the meaning when you see your yourself flying. (1:44). You go with your soul of man. Or you go with soul of man and physicality both.

Nobody has seen themselves - try to take camera with

K- What we've seen, and what is going to happen in Keshe Foundation. It should already be back in the lab by now, we asked for it. We asked for a camera, not a digital, or we can give them mechanical cameras, or old ones with no batteries and electronics in it. For our passengers to take pictures of themselves. Nobody up to now has told us, that they've seen themselves. they are aware of the energy of themselves. They're aware of the light, they're aware of the colors, the souls they come in touch with some of them.

But we have not seen, there is one guy who went to the Moon, he can see his hand physically. But generally people speak about the light. They are aware of the others, as an energy fields. Especially when we put them together to fly all of them, especially the captain being responsible, you ask the passengers, "oh, they can't remember. yesterday was the first time we knew the wife was with the husband, and they both saw the same things the first time. We have to expand on this experience.

But the captain when he speaks, and speaks about get, taking them with us, since the first or second session ??? of one or two people refer to it. They're taking the other souls with them, because he's responsible. In a way, like Captain on a plane, the guy goes, there are people in the back, and each one is traveling, dreaming, or thinking about what they want to do, go where they go. Even though the captain's going in the same direction, to land in the same spot. And we see that now with souls, with the travel, the expansion of the souls, we see it now. (1:46).

The captain is responsible, he or she takes full responsibility for people taking the soul. It's amazing how they do it, it's instantaneously. So you are aware of it, that I took them there, or I took them there, but the passengers say, Oh, they never seen anything, they were their own singing ?? as they were in the back ?? like ?? while they were sitting in the car. We see this now.

As I said, we need about a thousand .. we can get some 10 to 20 people … a week, it takes a lot. It's not just going in the system, it's preparing to go in the system, going through the system, and then what I call, going through the process of explaining to us, because a lot of them we see, they say, they're still digesting the information, they still are in there. They've come out, but the body is left over, the soul is still needs to digest.

It's good to see, to build up the information. It's the responsibility. It's interesting. It's strange and amazing. I don't know, if you remember where one of the members of the people who came in last week, he was so overwhelmed and everything and he just left. And he came this week back himself, and he brought an audio recording, because he was so overwhelming he couldn't do it then and there.

Your new life begins when you leave the Enhancement Center

We like to know in a few weeks time your experiences, because the strange thing with this technology, when you go through the system, life begins from the time you leave the studio, the … Enhancement Center. Your new life starts from there. (1:48). Not you've been there and going through the process.

We will invite you, when I am in a Zoom session with the Knowledge Seekers who've been. In a few weeks time on a Thursday, for all of you to explain to us, what happened to you from the time you left. Most of you say nothing, because you think it was a normal thing, something happened. And some of you might explain how you've changed. Because it's important for us. When we take you there, we go with us traveling, become travelers of space. What happened? Would you like to go back? Would you like to come home?

And we are going to gather more information. Did you meet the souls? Has it become frequent in what you were? Now you go through more stages of what you had inside the system, because you've been through the process.

Seeding Planet for Change - through FEU - one atom to flip - seeding

But the strangest thing will come when we create enough numbers that these souls start interacting across the planet. Then I'll explain to you about the satellites. We are sowing the seed of peace through the STM, and you will all, answer to the call when the time comes. It's the story of Einstein, when you turn one atom, and the other atom changes. We're seeding the structure of that atom.

Any other question.

How the systems are used for world peace - raising knowledge

Q: .. (1:50). How are these systems, you kind of answered it in what you just said with the atoms. But maybe you could explain it in a little bit more detail, how the systems are directly contributing to the end of war.

K- We had one gentleman who sat with Putin. We had one gentleman who sat with and gave to the soul of the German Chancellor's. A lot of information we don't put out, but we see what's coming in. We have people who go in to extend what you call it, the knowledge of to Knowledge Seekers, and they give to the Knowledge Seekers for all to raise their knowledge of peace and whatever.

Ready to start process in a month's time

We have to complete our system, these systems have taken over, more or less, as we see it with the knowledge gained, solid 4 years to be developed where it is now, and now in ?? permanency in terms of changes. I think in about a month or so we are ready to go. And then we start that process.

Change will come through citizens - they'll change leaders

We will explain how we start that process when the time comes. The process of peace is not just by world leaders, it will come through its citizens. The citizens will change their leaders. (1:52).

Q: .. Over the last couple of weeks, I felt that you've indicated there is a timeline. Yeah? and ..?? has to be done quickly. ..

K- There is no timeline. We created a ?? We create, for our system, yes, there is a timeline. Because we can go on for months and years, and keep on developing. We put a timeline, that we don't. You've seen it. We've show it, these Units in the Design Center nearly two years ago. This white units what you call, we saw, we saw whatever you call it, arrived, May or June of two years ago. I remember when they were testing it in the labs, building the wiring, the circuits. From that point to this point, has taken two years, and we are still seeing room for development, massive room for development.

So, and we kept on going, developing. To us they were saying, oh, they're not doing anything, he just promised. But we had to go to a point that, a new technology was developed completely. And we came to this point now, and we're still developing and then adding. As you don't see it because it's all hidden inside. There's a new development, which we'll see after next couple of weeks, to whatever, that we can do.

In the past, we had a huge trouble, past two years, we had to design something, and then something had to be made. (1:54). And then we have our people, one or two people had to make the parts.

Now the Keshe Foundation has a manufacturing base, we have a production base. Last week we wanted new reactors. Before it would have taken us weeks. Klaus just tells the factory this is what we need, by Monday morning the reactors are made ready for us. Our response time has changed. Our team knows more or less, what is the next, what we have to do. Now so, it's not done, waiting to design. Even in the middle of the testing, we've

done it in past couple of weeks, we realized we need something to be changed, and literally while the tests are going, in the factory they change. They design, they finish a new one for the next time. You don't see these things. If you came last week, in the design of the system, we literally needed one of the reactor systems, we needed to change.

You don't realize it, but for example, we realized when we made the system, we designed the system, we have two chairs. And there was one entrance here. We had people all sorts of problems together, because it looks if you come in today, you will see the systems will overnight have two entries directly to in front of each other. And then other reactors have been added or taken out, because of the what people tell us. We see where the faults are. It's not anymore for us to what do you call it, (1:56). do it and go back, and come in weeks. Literally now we have a backup system, backup team, a beautiful backup team. None of them Knowledge Seekers but understand the technology. And while you are sitting in the test, we are actually making new reactors for the next cycle and evolution will be very, very fast.

Keshe Foundation doesn't spend a single cent wasted. We never done , we never do. And everything you gave us with trust, has been used by trust, to set up this production line and train the people, has taken a long time for Klaus, and people who come into the management of it.

We bring in workers, which the work is through experiment and work, they become Knowledge Seekers, and it's beautiful. I was discussing it with a couple of people recently this week. They see they do understand and they become better than our Knowledge Seekers. Who became Knowledge Seekers and then they want to do something. We are creating Knowledge Seekers with the knowledge of their own hand work and very instantaneously and Klaus has spent relentless time trying to establish this.

Keshe Foundation Austria is a solid based manufacturing, ethical organization. And instantaneous response. It's taken years to build it. We are a research and development. We are not profit making, we don't look for profits. We look to bring, and you go into these systems a mother who lost the child at six months, and waits for 10 years to know what happened. She explains it to you, when you see her today, most probably in the testimonials, and sees the soul of the daughter, six months old, she lost by death, 10 years ago, and brings her peace. (1:58).

KF will never make a profit - profit is helping others

That's our payment. That's where we make the profit. That's what the KF is. Thank you very much. Keshe Foundation will never make profit, it's impossibilities, because we put everything back in. Those who want to steal it, will cry for what they've done. We take their souls, to themselves.

Any other question

How to protect our children from bad use of T

Q: Alexandria Brazil .. We are education professionals and we work with children. We see daily and increasingly stronger, the dominance of garbage content controlling the wills and formation of many children. Children are becoming slaves to the media and the Internet. Many parents and caregivers of these children are unprepared and report not knowing how to help these children, their own children. Question, thinking about the Enhancement Units and what is to come? How can we help and prepare our children to elevate their beautiful childlike souls?

K- This has been a question for a long time for us. I've discussed this one with the Chinese authorities sometimes ago. We have two processes, to educate our children with the knowledge of the present time and everything else, which comes with it. Or start teaching how to beginning. (2:00).

We have a beautiful lady, Greek, who with the knowledge team we set up, she's done the basic teaching for children from age to age to become. She works with us in what you call it, Greece education structure of government. And I didn't have time to do it, but they're still working in the background some of them. That we bring a new education from the beginning.

Children have to learn about the matter estate. That's the beauty of being a human. And children, then have to understand the work at the same time simultaneously, with the soul state and the energies of the universe. Then yes, we can bring the change, yes, then we can see the change in how we can teach them.

We are in the time of the transition between the two

It's very, very, very difficult, extremely difficult to enter this zone, unprepared, and we are not prepared for it, because we are in a time of the transition between the two. It just needs time. None of us, 40 years ago knew how to use the mobile phones or the computers the way they are today. We learned it, because it became available. Now the new knowledge has to become available, and then we'll learn it. And then we see.

We have to find out how we can change this as a collectively, in a community and in the society together. It won't happen, ?? one nation It's something we have to collectively program it. Children need to have that computer game, children need to have everything else. Not just because we didn't have it, they're spoiled. (2:02). Children because of computers are becoming more and more intellectually aware of a lot of things. It's not all bad. But we have to learn how we can incorporate the two together.

It's our job, and then how they abuse it, or how they use it. To what extent we will have the possibilities of extending the knowledge. We've got to use both of it. And make the best of both, because we spent hundreds of thousands of years to get to this point of intellect and understanding. Just to say everything is all wrong with it, we did our part of

it, is ignorance. We have to see what is the best and what is collectively can be mixed between the old and new.

We're working on education side in the background in different ways. And we'll see what comes up. But yes, there is a problem in society today. We all have children and grandchildren. And we'll see how they have evolved.

Nowadays, children can see the parents put it in front of them. What do you do nowadays - mobile phone? Oh, let's watch a cartoon. You give the phone, you introduce your child to the new technology. You just look at the cartoon. But what about the T, and then she wants to see another one? What's next? And then the game's. By the age of two and a half, three, I've seen children that are much more intelligent in so many things, then their parents and grandparents. (2:04). Because they opened their eyes. What do we do?

How many of you have picked up a book nowadays to read for the children? And how many of you have brought that book in the new videos, which is on there, as a solid picture. The cow, she sees a cow. The cow moves makes a noise and she can relate to it, because it's an emotion. We changed it. We brought the change to them. But we haven't lost control. We have not managed to adjust ourselves as a society to use it and some abuse it.

So we have to mix the two together, and it's not that they've gone everything wrong. Yes, they've gone wrong, because the parents are allowed to go wrong. But we have to teach the parents not the children. This is the biggest problem, and I've said that many, many times.

We go to school, they teach us everything to earn a good money, and become doctors. But in that process of teaching from year one, they don't teach us how to become parents, how to behave as when we grow up. To have a good degree, a good job. But (be) a good parents, they don't do that. It's just you pay to go in and you sit in the class. They teach you ABC and then what comes, what color ??? comes.

But if any school teaches a child, how to be when they grew up, and adult. The only thing they forced themselves to in countries like England and Holland, at age 13, they show them sex education. Because they got fed up of having 12 - 13 year olds being pregnant, in the schools, sitting with the babies in the class with the teacher. (2:06).

If our education system teaches our children, this is this and when you become a parent, this is how it should be, the child from the seed knows this is a knowledge, which it has to carry.

We do it wrong and then we blame the society for it, because we were never trained. We are the cause of the mis-education about you, nobody else. And then we blame the society for it

Any other question

Feeding starving people through the FEU

Q: … To travel is exciting to me. But here on this planet could I, when entering the fight system, go to say, Afghanistan and through my soul feed those who are starving?

K- You can do, you can do. It is not a dream, it's a reality. We done this in a couple of tests this week, without the KS knowing, going through the test. Yes, it's a possibility. But you feel the soul, you feed the soul of the person. Not physical food, they can go sit in the EU with a sack of potatoes on go there and give them potatoes. But step up to the new understanding and go through, you can feed them, it can be done, because a couple of cases we had, and we are following how to trigger this position with people.

At the moment we are like the wild west you know, people went to America and they wanted to see what and where it is, and then when they settled down and started making the cities and villages, on the rest of it. At the moment, (2:08). in past two weeks we are in that wild west situation. Everybody's going everywhere to see what they can find.

But gradually, collectively when more and more KS come, they will organize themselves how to do, what to do, and where to see. It's quite feasible, possible. We have an earthquake in such a such a place, and all of you, instead of waiting to gather rescue, find a plane get the money for the fuel, and gather people's food. By the time you get there it's three, four days after the earthquake and half of the people have died on the need, because of the hunger or cold.

Now you do instantaneously, you feed their soul. We know it's correct, because we've seen our people traveling to the Moon instantaneously. We see them, how they do and how they interact. …
So we have to understand. It's not any more dream, because the systems are made. It's not done by somebody, my soul go and feed. In the coming time, many of you who've been through the system, once it's completed, you'll feel you want to go to help, all of you together will go and help. You feel you're in Mexico, New Zealand, or wherever you want to go together for a party on the Moon, you all go instantaneously, and you'll be there. Make sure you've got the right girlfriend, not the wrong one. (2:10). This is the beauty of the new science, and yes it can be done. I told you yesterday, we had a guy, we gave him nuts and bolts to see what he can do with it. But he didn't go anywhere to do anything with it, because his was a different target.

It's something you've always done, but now you bring both dimension of the physicality. This is what I explained, if you understand it, for a couple of years .. to transmute between the Soul and the Physicality and on the way don't lose the bottle of wine, and then if you don't have (the wine??), "oh it was a dream." Now we are teaching how to bring that bottle of wine, or the emotion of the bottle. This is the process, the new systems are setting up to do.

K- It's very interesting what is to come, and as I said, we got a glass of water, spanners, screws and everything there to see if we can take across, and who can bring it back. We need to adjust our system.

The systems next week, will be adjusted for transmutation. Today we haven't set that. We have full control over transportation, and next week we'll set the system for transportation from one system to another. It's not something that we're going to develop, it's preset in design. But we have to see everything working that, when we send the cup, half of the cup is inside of another half, it's still and energy in another part. We're ready to test, but we have to have everything perfect. (2:12).

Q: .. How can the system memorize the information of a nation through a single soul? Is what Barbu added to the unit the same as what I have as a genetic inheritance? Or that of my ancestors?

K- No, we are all different. We all. I wish somehow we didn't get Barbu, Barbu came in and he went through the system like a bullet. He did not, he was not there to enjoy. He was there just to be there and go through, and I am done. And as I said to the other people, you come in, take your time. I made time for you. You have to make time for yourself.

We had a couple. It was a strange, strange situation yesterday, when the husband, then the wife moved. She went from whence it was said to him she went to he went to sit he went inside the coherence and you were there your shoe and there. Hello. Then she came out just all I had but um you know you're there just because he asked you to come. We see it. And then he came out and he had the experience of what he wanted to experience.

You have to take your time, and then you leave the right fingerprint.

Maltese Soul is connection to Christ

We have Universal Council of Maltese coming through the system. Maltese, he is original Maltese. Maltese soul is our passage to Christ. They saw, Christ lived with them through his transportation from Palestine to Spain. (2:14). I'm hoping with him and his family going through the system, we will, might be able to see an insight into the past.

These are key islands. This is why Keshe Foundation headquarters will move to Malta in the coming time. This is what we need to have to understand more of. To understand exactly why, and how we have gone through the process of elevation of what we call, the Soul of the Man.

Any other question?

Q: Mehrnaz … I had a maybe non-important experience, but I tell you to see what it was. About six, seven weeks ago. It was 4:30 at night, (2:16). and I went to my balcony, my terrace. To see the sky, I love the stars, I send them kisses. And I really love them.

And it was maybe three, four stars. And there's always one in my right part of the sky, which is more shiny. So I started just essentially talking, and talking, about my worry about actions of my mouth. The actions of myself if somehow maybe, what I say my head somebody without my intention. And then talking like that, without ?? All of a sudden, I saw a light, like 10 centimeters diameters the image, just 20 centimeters by my measure under the star, a big light shining, silvery, shiny. And at first, I was shocked because I've never seen somebody like that in this car. And after a small pause, it went quickly to the left side and disappears. I just stayed to analyze what it is. And then I said whatever it is, I tried to do my experience again, to see if it happened. So I tried to put me in my position talking to star and then it didn't work. I went to sleep. So in the morning, I was told that if it's a meteorite, the stones which come to the Earth and they explode in the atmosphere. (2:18). And then I thought it was like .. ?? It was like a person in the in the star who saw me down there (on earth). And just for fun, they're small, it's like those with the fingers, you know, like we were a child, we're playing with stones with our fingers. He chose a small stone sheet, throws at small stone and then it becomes maybe a meteorite. I've never seen meteorite like that. Normally I see small things very far, but this one was so bright. In the whole sky. I was. So I wanted to see if it was a meteorite, and how come it was just in front of me. I mean, it was in my sight. If it was something you..

K- Can I say something to you Mehrnez, .. We were not there, we don't know.
Q: Yeah, I knew you were saying that.
K- We were not there. You know, it's June now. About four or five years ago, four years ago. I said this before, I do this as a pleasure to people I love. Don't do it for anyone. I tell you if you want to see a meteorite, I create one. You see, our people see it. We were in South China Sea with Knowledge Seekers. And we were walking on a beach, they were ahead of me and I was walking in the back. And I said I would love them to see 10 stars.

They turn around and say, It would be nice to see a meteorite, and I said you watch, I wish 10 of them for you. And they're here amongst the Knowledge Seekers, they're listening, they know who they are. As we walked, (2:20). we counted nine, or they counted nine meteorites, 4 of us seen it. And the 10th one was the next afternoon a huge one, over South China Sea. They saw we all saw.

HERE >>>

It's the wish and making of it, which counts. And we have Knowledge Seekers, I tell them Do you can see when I make a second one, we can see the second one, which is the impossibility of two meteorites moving in opposite directions from two directions coming in. And that means that the knowledge should mean one or two see you the others don't see.

Proofed to HERE >>>

This is a pleasure I give to the people who I love. And sometimes that love is misplaced. And it's you can do it you can create a vision through the interaction of the Soul, your masters in these things and we can and we're not there to see the trillions and trillions of stardust are in Solar System. Yeah, something you have to understand the thought as we see entering Earth's atmosphere, majority of it is made by Earth itself. In the attraction of the fields, with the Solar System, what happens and they some get created the same as Earth within what we call it, atmosphere of the Solar System, they don't come from outside, you have the Sun and you have the Earth and you have the other planetary system.

When the fields come, if somewhere GM fields, (2:22). have a Cu is done, these fields of the universe at this point change to Cu stone. It doesn't come. How did it get created in the universe. If the fields come here on Earth fields interact, G field, M field at this point, it's of let's say silica. It's created by the Inertia, and then it comes, enters the Earth as a matter entity. It does not convert to Inertia, according to this, by the strength Inertia of the Earth.

So meteorites can be produced anywhere. It's produced by the, 90% of the meteorites we see, 95% is from the Solar System. It's the reduction of the strength of the rays of the Sun itself. It's not just Earth, which has the gravity and Inertia in the upper part, every layers of the fields in the universe, or in our Solar System can have the Inertia of the Cu. That field of the Sun here, will continuously converted to ?? Cu. Then now you have a new meteorite. Meteorite doesn't come from the explosion of the stars and planets, and whatever. It's our own fields. A bigger version of it, is Earth. That's how planetary systems, and ?? systems create.

We have three or four moons in the Solar System, which are actually meteorites, interaction and have become part of the Moon. Because they field strength of their center matches.

Q: .. Also I thought you were when you were in Italy in the beach, after Fabio bless his soul, you created something you show to people, you know. (2:24).

K- It's we saw the light, what we call the formation of the fields in the sky. Then we saw the same thing in Brazil when we landed. We can. Those two are.

We are Messengers of the Creator. We live in the body. We have a lot of capabilities and knowledge to do things. But in the depth of our travel, we have made many friends and those friends are always with us. When I spoke, and we saw it over the airport, going to the hotel in Brasilia. And the week when we spoke in the lab in Baeri (Italy), and then seeing it, next few days. It's just that they just come to confirm what you taught to the humans, we want to show them.

Israelis Americans kill 4 Iranian space scientists

It's very much the way the relationship goes between the my work and the Iranian defense technology in space. In the past four weeks, three weeks, where the heinous crimes of some nations, 4 of the leading Iranian space scientists have been murdered. Two by poisoning, the way I was, they tried to kill me, and two by the accident, the way it was set up to kill me before.

On my Soul - we take the soul of the nation - the nation allows it

And strange enough, these all started from the time, the week we started to show the Space Technology in Linz. These criminal nations never touched Iranian space specialists. We lost 4 by murder. And on my soul we'll take and we'll show, that the end of the nations has come. You touch the scientist, we take your soul, and we take the soul of the nation, because it's the nation who allows this to happen.

It's very, very strange, Iran has lost some of its leading space scientists very young doctors in their early 30s, since Keshe Foundation has start showing the Space Technology in Linz. Never ever have space scientists have been murdered, except in China in the hands of the Belgians 4 or 5 years ago.

We understand and we have to bring the knowledge to be understood by many. (2:28). What will be nice is how well we become, and we are aware of what is happening around us. When we see these conditions, when we see these interaction, it changes a lot of things for us. It changes a lot of understanding. It changes our understanding of how far mankind can go in the space development and how much man is ready to face the future.

Since when having the space knowledge is a criminal offense, unless you're a criminal. The punishment for is to separate the soul and leave ?? it in the // Doldrums of … space. Even the physicality ?? existence. Exile of the soul is the most, the worst condition a man can create for his soul. We see it and we'll see more of it, how it operates in the coming time. My deepest condolences to the Iranian families for their sons as a space scientist, have been murdered in the past 2 weeks. (2:30).

Because the frontiers of knowledge has to belong to all of us, not the exclusively of some nations. This is what we're doing in Linz, we invite the Italians, the French, the Germans, the Americans, and everybody else to come in to taste the new space technology and we don't kill you for it, but your nations do.

K- Up to now they killed nuclear physicists, now they kill plasma nuclear physicists space specialists of Iran, which is a part of the Keshe Foundation technology, those who understood more.

Any other question.

Q: Any update on bringing in the souls of Ayatollah K, Nasrallah, General Secretary of Hezbollah, sending so many youngsters for suicide missions and calling it martyrdom?

K- The stupidity doesn't finish with one or the other. (2:32). Some is done by the government and some done by the religious leaders.

Does not stop. That means there's a time for it to change. We are waiting for a number of souls to arrive in the Center and then we know what to do with it.

We invite the what I call, the Universal Council member for Hebrew language to Linz. With it, we change the whole structure within the nation. We will see. The new Universal Council for Farsi language will be with us in a very short time, then it's time for us to reach the ?? Iranian leaders.

Any other question. It was very interesting one of our KS came two or three, we had up to now. As we are at the moment under the flood of the Germans coming in. Two or three Germans when they come out the system. They tell us, the thing you heard from the recording you heard this morning, (2:34). one of them, that they gave from their souls to raise the soul of their German nation. We will see the changes, which come because of it. We have to wait and see what comes. You have to be of the same understanding to be able to create the condition.

Any other question.

Q; Brazil .. So I had a dream some days ago, that I was on another planet with very big balance, and it was like a funeral, but at the same time it was a party, celebration.
K- Oh you must live in Africa or in Jamaica. .. that's tradition.
Q: And the king of this place he was a cat, kitty cat. And my question is, are the animals or entities of this planet Earth, are they beings from other planets? And is this possible or they are both living there, and here. I just asking this because of my dream.
K- We had a guy yesterday who went through the system. I said, did you go out, and he said I didn't fly, I was on earth. But I was with different animals, not the ones we have. We asked him, what kind of animals were you with. They were from the past. (2:36).

So his soul in the past, had been in touch with dinosaurs, or he couldn't explain, We didn't go too far with it, because he ?? could explain to us, he went to. He was on Earth. He didn't go anywhere. He said, I didn't travel anywhere, I was on Earth. I went to jungles and I saw animals. I asked him, did you touch any of them. He said, no. But they were the animals of the past, not the animals we know today.

As I said, as you come you bring the soul, what we see, always been with us, has been one of the original souls, when the man was on this planet originally. Because it's a connection of the souls .. of the souls, which made him. So they have been with the dinosaurs. I stood there and I thought, wow.

And we will see, as I said, you come in and you add to. This information is within the structure of the … reactors. See what comes next

It'll be interesting. When you bring your cats and dogs. How they will react with you, and what imprint of knowledge they'll bring for us. It's not fairytale anymore, it's there, and we see more and more of it.

We have a problem at the moment, as I said we are developing, we have to keep on changing things. It's you switch the systems off, so nobody stays but the system. It always works , you can electronically we stop it, what you call it, plasma wise, it never stops. It's like the person in the sleep in bed, (2:38). but the brain still works. We have that situation. When we start running the what we call, our ?? fear detectors which are built in. They were placed in yesterday, then we'll see the actual effect, and the work of the ?? thing. The systems start building up. At the moment when we deplete them, because we have to reset a few things, change things. But when we come to the stable condition maybe two or three, or 4 weeks time, then systems will run. You come in, you're already in plasma, you as I said, you're already jumping in a cup of sugar you don't need to add sugar into it. Add the sugar is your soul, what you ?? feelings??

Any other question

Q; .. Is it a possibility, if Knowledge Seekers go into the unit, and if they are sincere, and they have the capability to be able to pull the whole planet in one go and elevate everybody?
K- There are Knowledge Seekers who already tried. We know a number of, a few people have already tried, to raise the love of the humanity, the whole planet. We have some beautiful Knowledge Seekers, Azar, if you were there and listen to them when they come out. You want to just sit down and just marvel the Creation, what is coming out of this room.

I tell them sometimes it's time for integration, what do you call it, I want to understand. (2:40). I want to interrogate you. Because I want to know. We call it, interrogation. ?? The system in one corner, which is popped in one place. We don't let people come out and go and talk to anyone. Because when they start talking, it dilutes things. Even the couples come out, we keep them separate till we speak to them, to see what we want. And then we will usually let them loose in the hand of Dean to record it, if they want to be recorded. And then they talk to each other. And when they talk to each other, they come up with more things, and then tell us, we hear afterwards.

Q: .. when you talk about the Iranian scientists, who were just killed by ?? whatever nation or people they were. I just read something that Gandhi said, which I didn't understand the meaning of it. He said, in his lifetime, in the midst of the destruction that people see there is a life that is continuously going, which they cannot see. And life it finds a way to go. So when these people kill, because they want to prevent of something happening, or they want. They don't want anything good to happen. Do they really. does this really mean? …

K- Let me explain … You touched on something, which we have to understand. One of you just asked a question, what about Ayatollah K and what do you call it, Hamas or

whatever. That they send people with a bomb. (2:42). What about world leaders who send poison to kill people? The same terrorist. You glorified it because he's Iranian nuclear physicist, or the Korean, or whatever. But they demonize it, because it's a nation.

They are the same terrorist. Whoever gave the instruction for the Iranian scientists to be killed. It's the same terrorists, as Hamas, or Ayatollah K, there's no difference. They are murderers. It hurts the same. You still kill people.

I had the privilege to work with the Chinese military and defense. And got to know how the Europeans are killing a Chinese scientist. The privilege was, that I could tell them how they do it, and we stopped it. I went to a closed sessions, high level security. This is why the Chinese trust in Keshe Foundation. I gave the same advice to the Iranian leadership to protect our scientists.

But the man who put a strap bombs on, the man who gives a poison to twin brothers, Americans who made the first high water engine, and killed one of them on the table, again, done by ?? ?? on the table. Those who go and do act of terrorism, they are all terrorists by the leaders. (2:44). Those who make the threat to kill, and to destroy, they are terrorists too, and they pay for it.

One is glorified and one is demonized, but both are demonized by their own soul. This is what it is. This is how it works. Who gave order for killing an Iranian scientist, or a Chinese scientists, or American scientists is the same terrorist as the one who gives a bomb belt, or whatever, to the others to do. Both heinous crimes.

The leader who does that, he pays for. It's not that you see him, ask about his children. How they suffer. Ask about his other lives, how he is paying for it. Those who make threats, will stand by their own threats, and they'll pay for their threats. Those who carry out the threats will do the same. To me, you call, Hamas, or Iranian leaders sending time bombers, add the next thing to them. Biden office, the Russian leadership and the others. It's all terrorism. Just because they don't glorify it, and they demonize it, the same, (2:46). the children suffer of them killed, the parents of those children, the brothers and sisters of those killed.

It doesn't matter if it's Universal Council for Italy or Universal Council for French or the American or the Iranian. This is the pattern of the work and the ?? media which we are in. The Iranian nation is bleeding for loss of some of the top scientists in pass 4 weeks. Does any of you know. Glorified murder, terrorism by Western nations in Iran. Pure acts of terrorism. The same with Ayatollah K, or Palestinian leaders when they send other people, that leaders appointed ?? plan these things anywhere else. The Jewish blood, the Palestinian is still red and it carries a lot of love. There is no justification for any of them to be demised.

Q: .. my last question is, you see the system you have in Linz is a live system. So like the way I was born, and I just encountered different people, different environments, I get mature. Is the system, as people go in, it gets more mature?

K- I haven't seen it getting fat. But maturity, adding knowledge to, yes.

It'll be very, very interesting to see what the Italians do next week. Very interesting. You got to understand Italians are made up some 200 nations and tribes of this planet. (2:48). You people go to Italy to see Italians. We were given a talk about Italy. Where were the Italians 8 centuries ago, they brought some of the people of that nation to be inside them. The present nation of Italy is a mixture of 200 tribes and nations of the Western Europe. Let's see what they bring us.

Any other question or shall we call it a day?

Q: .. After booking a flight how long do you take to confirm it. He says we booked and paid on Sunday evening and have no confirmation yet.

K- We brought one extra hand to get this sorted. The way we have done up to now, we are fully booked into June. July is coming up and I don't think anybody will get in before July. This just that. sorting it out we had a weakness in our structure one of our staff was not doing what it was supposed to do. No he was too busy with the other parts of the foundation work now we bought stuff from the world recorded head office into the to the lanes to get this work cut out but if you haven't received that, so you just gotta wait till the backlog is created. We know what we do

Ater first of July, I'm not in the center, so you'll need to talk with .. our team there. Just wait till people more days, you get a good answer. (2:50). It's more or less, we tried to organize a lot of things in groups. And this is taking a lot of RSPs time. Because Italians booked three days, and they moved it. And then they made it to four days, and they moved most of the days again. So whatever we could tell people to come in now that without the block Tao, we sort of the Italians are not going anywhere, they are taking therefore, therefore, we four days are being given that, and then the Germans went in, and they blocked days into it. And we have to accommodate those with the Italians. The only day we got left, more or less to play, I think it's 22nd. One is fully booked. And then it goes into their own. And we are into July, August, and book as fast as you can, because in September, we stopped 90% in September.

So whether we get up to there, and then we go back into development, we have to do other structures. One is for the what we call mobile systems. One is for the international call direct flights from A to B. And this all needs to be compensated developed and processed, but by September most probably we stop the whole process, because we got an update on what we want to do and perfect the FS.

Don't put time on it. I just, I know because it's not easy. It's not an easy job, because we run an exhibition on top of the exhibition. 15 people on Saturday, I was told tomorrow, or this Saturday, going to the exhibition, pre booked. We don't let anybody who's not, (2:52). doesn't matter who you are, in. It goes through that process. Just you should hear something in next day or two. Just finally, when we sorted out. The Italians causes huge problem they came with five and 10. And now we have a team of 20 getting booked in by

one doctor. We have other people who are booking, block booking. And all this has to be fitted it is all going down.

We have a team from Middle East coming in. And we have four different medical officials will come in out of time, which I sometimes go during the evening nighttime, or what we call diplomatic, political was switched. Nobody knows we just walk in. And it's all sorts of things happening. There's a lot of, jut give it time, give it time in next few days, you'll get a response to be allocated we had as I said, Italians played mayhem, with us. But now we pin them down. And the Germans did the same. We expect the what you call it the Spanish and the Greeks to come in Western Europeans. And it's good for you to come as a team, because it gives us a lot of freedom. And secondly, translation becomes very hard because we have translators to be there, or it's very difficult. But just book your place and be given time to come in. We give priority only an only to the members of Universal Council. (2:54). They have what you call, immediate access to the systems.

Any other questions.

Q: … Why did I understand that the position of the Soul of Physicality is in the area of the umbilicus, or rather in the area of the pelvis, or the genitals and not in the area of the heart. Am I confused?
K- Yeah. I think you're confused.

The Soul of the Physicality has a strange position.

.. (2:56). Yes, okay, can you repeat that please

STP is like the Solar System - STM is point in center - rest is P manifestation

Q: .. Repeats .. why did I understand that the position of the Soul of the Physicality is in the area the umbilicus, or rather in the area of the pelvis, or the genitals. And not in the area of the heart.
K- .. I don't know I didn't learn that one. I don't know which class you went to. I didn't see that.
Q: and then you were saying that … Yes, go ahead.

K- The STP is a dynamic structure, which covers the Totality. Where the STM is pinpoint in a way. I can explain it in a way the STM is the Sun. The STP is the Solar System, and the physicality (P) is the Moon, Earth and the rest of the things inside. That's the best way you can describe the separation between the three. We call it the spirit.

Any other question. .. ??? (2:58). calling the man to come here I want to love you ding, ding, ding.

Next question.

Q: .. What is the connection between the flight unit and all the amino acid (AA) MaGravs and Gans made by Knowledge Seekers in the world?
K- Somehow because of the field connection, they must be connected, somewhere.

Q: .. What different colored lights were used in the units?
K- No colored lights. We have no colored lights. First of all, we use very little light, there is a very little background light, for those of you who have been in it. and it's just because the system gives us the lights, and system gives the option, there is no specific reason for it.

The ethics of the STM came through the prophets
Q: If this is a science and knowledge, why do you always bring into the light Mitra, Moses, Jesus, the Messiah, etc ?
K- Because the knowledge of the ethics of the Soul of the Man came through that way. There is a science and ethics of science. Science is what we teach. Ethics of science, ethics of life, that you've got, have gone through those Messenger. (3:00). If man would have used his soul, he would have never needed the prophets. Man went physical, so he had to be taught what's in there, we call it a soul. Secondly, Mitra is not a prophet, Mitra is the life of the Creator. It's a big difference.

Mitra is love of Creator - has nothing to do with religion

If you look at the Jewish religion or the others, they speak of getting the knowledge in the mountains, from the fire. ?? That fire is the Soul of Mitra. Love of the Creator. The religion has nothing to do with Mitra. Mitra is the love of Creator, it's the manifestation of it.

Any other question.

Q: … What's the difference between Christianity and Islam, Judaism and Zoroastrianism?
K- Zoroastrianism is the original religion it came through Mithraism. The Jewish and Christianity, which is Jewish religion with the twist of what you call it, love in it. And Islam is a copy of the same. Muhammad learned from the Jews and he tried to bring his tribe it. Jews learned from Zoroastrians and Mithraism and created the Jewish religion.

There is a difference between what Jesus, or Moses, or Mohammad it, and what Muslims and Jews are. (3:02). Very big difference. The religion as we see it now, is a whitewash for the benefit of those who lead. The religion we see as the original teaching, not diluted teachings of Moses and Christ and Mohammed is the message. You got to understand how the religious, even the Prophets played the game the way it suited them in every D.

Adultery cornerstone of Christianity - Jesus womanizer of rich Palestinian wives

What is the cornerstone of the Christianity? Adultery, you have to be a virgin, and the rest of it. But can I ask one question, how come Christ started ?? slept every woman ?? of the rich in Palestine? He wasn't in wedlock officially, but no one enjoyed more the beauty of a woman more than Christ did. That's why they put him on the cross. The rich people of Palestine got fed up with him sleeping with their wives. They told the Romans, put him on the cross, or we'll do riots and ?? you'll move from here. They rioted. The Romans chose the easy way out, the cross.

Go and read the true Jewish Historical time of Christ. That was the only reason they put Christ on the cross. He enjoyed the physicality of the women, the most beautiful, he was a handsome man, (3:04). He had a message of peace and women loved him, and he loved women, and sometimes he went too far. With the rich ones, they paid for him to be there to enjoy. When they couldn't take it, they paid the Romans to put him on the cross, otherwise we'll start a revolution. You want to know the truth, or you want to know what is written in the Bible, diluted the way it suits the Vatican.

Read the history of the time of Christ and not the Bible, then you know the truth. It's not ?? he enjoyed life to the extent you could enjoy, and women vanished him the way he wanted. He had dark brown eyes, extremely handsome, the wish of every woman. And he had the ?? tall, the knowledge and the love. He was literally a ?? lover. The rest is made.

The same with Moses. Moses ?? he saw the lights, he knew the message, but he diluted it the way it suited him. And Mohammed kept most of it and changed the ?? things what suited him. Why do you marry 4 women in Islam. For the love of God why? Ask him, a young man in a early 20s, married a woman in her 40s plus, Harijan. The ?? evolution of time, and women go through menopause. Still younger, still has desires. He had to justify the second (wife), (3:06). and then the third, and then the fourth. But he didn't change that what was what was given to him as the message? But Moses did, to suit him.

Find the true history - not history made by religions to rule

Read the history, the true history, and not the diluted religious history. Then you'll see why and how, and how they changed, how they changed things. The time when we would call ourselves Zoroastrian Iranians, till the time of Muhammad, had the breath (was alive), he never touched Iran. He said, they already believe in God, how can I touch them, to make them, to believe in God?

When he died his uncle and cousin, knowing how wealthy Iran was, they wanted to go, (but Mohammad) always stopped them. Muhammad never allowed the Arabs to cross Iranian borders. Since they believe in a deeper God than we do. When he died for the wealth of Iran , they invaded Iran, to take the wealth. Then why you see this extreme mixture between Iran religious culture, and the Iranian nation. Because when they killed the Shah of Iran, it was on the ?? 13th of the New Year, that's why in Iran we see it as a bad day, because the King was killed in the name of the religion. Before this is ?? ?? Then I ?? leave the son in law, Fatima, the daughter of Muhammad, knew the wishes of

their father, that Iran should not be touched. They took the queen of Iran and married her to their son. And that's how the Iranian nation got mixed with a religious ?? and Arab nation. (3:08).

The benefit in the name of religion, for those who could take more. Is it the same ??? but he didn't do it himself, he then ?? moved to his cousin. ?? ??

Read the history, not what they want to make it to be. That's why Iranians are shear fanatic with Shia, because it's coming to the blood, through monarchy.

R: You mentioned reading a couple of times, Mr. Keshe? Where would people be able to read it? Are there any books or?

K- Read it on the Internet, go and find original Jewish history books? Go and find, not the Torah, don't read it. The life of a nation is written in two parallel ways, one by the historians, and one by those who want to make the history to suit. There was a lot about Mitra 10 - 15 years ago, 20 years ago on the Internet. Vatican spent a fortune to get it wiped out, because it became obvious that Catholicism is a fake religion, made up religion. If you look at it, Catholicism is the Roman mixture with the Christianity religion, to suit. The same as now I explained to you about the Iran and Shia.

That's all, read the history and see how that ?? how the rulers of Rome, (3:10). accommodated those who believed in Christianity, because the Romans had another religion called, Mithraism, and they couldn't have, they were worshipping statues, and the leaders were worshipping God. So they made the Christ, and they built .. Catholicism. Everything in Catholic religion you read, read it, it's Mithraism, because the Romans were in charge to write it, by those they fit, to suit the public, that they wish they got.

If you look at the Jewish calendar. Jewish calendar is not a calendar it's made to suit. The Jewish rabbis who control the annual things, they sit and look at, when do the most, because Muslims days changes every 11 days backwards, in the Islamic calendar. They look at the Christians. They look at the Buddhist, and they see where there is a fit, days, Yom Kippur fits into that day. Your other one fits into that, that does not coincide with the others.

This year, they got a little bit, just about, but in some nations fifth and sixth of June this year coincided, just because they couldn't. They did everything to move it, they couldn't move it between, the Jewish religion holidays in Tel Aviv, and some European nations have holidays. It's made up calendar to suit, for them to be separate.

Mr. Keshe educated with Zoroastrians - accepts all faiths

The beauty of where and the way I come from, (3:12). I was brought up in a Jewish, Islamic family, Iranian in essence. My mother being a Jew, Jewish background, a Cohen. My father background on the Sahia. Being brought up in the Zoroastrian school education, and love and live with Christians in Tehran. It gave me a broad look, to look at

the truth of it. Totality. It's around the ?? ??? background ?? It's the only a school run by the Zoroastrians. And I was educated through that system.

In the school, in he high school, many times we sat in the four, there was one bench with four. There was a Christian, a Moslem, Zoroastrian, there was a Jew, and another was Bahai. We could do anything in high school, we could talk about anything, except discussion of religion. Because we were brought up there to enjoy the love of being Iranian. The opposite the school was a Christian church, a few steps down was a mosque. Wall to wall to us was a Zoroastrian temple.

And you will see, thye talk about the same thing, no difference, but different colors. (3:14). They all talk about peace, of their own way. Religious time, we have to have by law, one hour of religion. That was the only time religion could be taught. The classes split, the Muslims go and are taught by a Mullah. The Zoroastrians by their religious leader. The Christians went to the church to be taught by a priest, and a few Bahais and a few Jews had a choice to be in where they wanted. You could go to the Jewish, could go to the ?? or the Christians, but you could not stay out and play, just because you're not one of them. This brought a lot of harmony ?? we never talked who was Jew, Muslim, or who was Christian. It was us, and it became ethos. If you find anyone who came through the education system of ?? ?? background they will tell you, the religion doesn't exist in that school, but we are all religious.

This is how we should be. We are aware of each other. Some of my closest friends, that we could literally, literally were Armenians. In the school, we could speak each other's religious language, or reading. (3:16).

It was a beautiful system in some classes, we used to have the mullahs, we used to teach the Koran and religious books, and if you were outside, that means you were not a Muslim, but you are Christians, or a Jew, or a Bahai, or Zoroastrian and you wanted to go into that lesson, there was a seat in the front row always empty. They didn't put you in the back of the class, you sat right in the front. We could attend if we wanted to go to see how the Christians go to church, we'd go to church, because it was 10 meters away from the front door of the College. This is how human race should be. I was brought up that way. Religions are always, "Oh modification of how to suits, how to do."

It was really a strange situation, some of you come from the Iranian strict Muslim background. If somebody comes out, and they call it, ?? magi or whatever, they wash everything in a one meter by one meter high tank. It's two cubic meters, by Islamic religion if you take something in it, so many times, it becomes cleansed.

But and it was very interesting to see sometimes when the Jews, we were friends, they invite you to the house to come in. The son was educated, the mother and father .. and we could see sometimes, when the Jewish boys with us, going and playing somewhere to the house. (3:18). What the heck was going on. What he touched, how it touched, he has to be cleansed because he was a Jew, or a Bahai, they were the same.

It was interesting time, we used to play with this. We used to play .. I come for dinner tonight, I come for lunch, with one play. And we can watch them, If the Jewish boy touched, or the Bahai boy would touch anything. They used to collect it and wash it.

It's very interesting, but on the hand, we eat, we enjoy it, we bought the same balls, we shared the food. If you get the chance, get the Jewish boys to bring food to school, some of it's so delicious. If you really want to eat beautiful cakes get the Armenian boys to bring something. We used to bring lunch, and we used to share, who's going to eat what. I like this your mom makes,. The religion doesn't exist except in the head of the man ???

I come from that mixture it's beautiful. I had the pleasure, a very open minded, highly developed, educated mother. She always taught us, you come from a Jewish, Islamic background, but first you are Iranian Zoroastrian. Even though she's Cohen. She celebrated the Iranian New Year, worse than the Muslims, worse than the Iranians. It was every Iranian celebration, had to be celebrated in the full. (3:20). It was the same with my grandparents who were Jew's, and same with ?? family on the Moslem side. We celebrated ?? ?? Zoroastrian.

Any other questions

Soul of Vertical People in roots

Q: (3:22). So how to know where are the brains of the Vertical Beings?
K- At the roots. Where the roots come together and stem starts.
Q: The brain will be the whole extension of the root itself, or just one part of the roots?
K- The whole extension of the roots. If you manage to find .. the soul of the vertical, you take it out, the whole thing collapses. This is actually where most of the plants die, where that position moves. If you look at the seasonal vegetation, or vertical people, and the trees and the shrubs, you see that. (3:24). It comes by moving, and change of the fields. They have the same position of the souls, as the horizontal people.

One of the hardest for scientists now will be, is to find the soul of a stone, the position of it. They'll be amazed. You will be amazed. If you want to see his heart, the soul of a stone, get yourself a diamond and then you understand it very quickly.

In the diamond business, we call it, the mother, and from that mother, the diamond is created. The diamond is Soul of the Physicality, the shape of a diamond. The mother is inside. You see the black dot. The stone itself is a physical condition. If you look at it and understand it, it's the same with the Soul of the Man. That's why we understand carbons ?? because we are made of the same.

Q: .. He was just saying thank you very much. It was very clear to me, very fascinating much said say Mr. Keshe thank you.

About soul of stone and diamonds

K- In the diamond business when you get a stone, sometimes the stones are colored stones, (3:26). and what you see, you get yourself a diamond, it's pink in the color. And in this color you see it. You see a mother, you see a black spot. We cannot have a diamond without a dot in it, because it's the mother.

In a way, when the carbon in a high temperature, what you do Nano coating and Gans making explodes. This carbon explodes to cover the environment, and then it gets cooled and becomes the shape of.

But sometimes this stone in expanding in the environment picks up a gas, through the expansion. The stone because of this, takes the color of the stone. So the mother, the color of the stone, if there is nothing in it, you see that it's clear, and the other color comes because of the impurity of gases, which is trapped at the time of the Gans making.

Then we are diamond dealers, we cut the diamond to get the best thing out of it, the best flattest space. So you cut it. But if it is a very specific color, you have to find this point, and sometimes it cannot be seen. If the diamond cuter, by mistake puts this yellow (dot) outside what you're going to get is a beautiful yellow stone, (3:28). or a pink stone becomes white stone, and the value drops, because now you don't have it. If you get it inside, then you've got the color. That's how colored stones, diamond stones are created. A million dollar stone becomes worthless ??

When and how, and you cut the mother out, you have no problem, because it has a stayed. In the diamond business they try to take this out. ?? ??? three small ??? Because as the diamond expands and explodes, the carbon, in the heat of the volcanic eruption, it might leave some few pieces inside, and this dictates that you have ??? ??

Then you have the color in D, and the other color in G it shows how much of this gas has been left inside. You get a deeper color, it becomes dark, you try to get to the maximum, the lowest gas amount, which is ??? When you get a diamond in your hand and look at it. We call it a window. When you get the pure diamond, what you do, you open a window, ?? you make a very small cut on the surface of the stone. And they look in, to see what they see. Because the stones are made.

You don't get the pure stone the way you see a diamond. It always has a curtain of mist. And we look at where this could be, (3:30). Try to cut stone to get the best possible, to get maximum purity. .. So you find the soul of it, the mother of it.

Then you understand why they say, even stone has a soul, it's created ?? by it, leads to its creation. Without that black spot, that mother, that soul, there is no creation .

Then if you can get that right way, you can change the color of the stone. This is a technique now, the same. One of the parts of technology I developed about 20 years ago, ?? years ago is used by the Russians. Now they do the same process.

In olden days when you got a white diamond. You look at a diamond, if you see a rainbow in the diamond, you're buying a damaged stone. The stone has to very clear. What happened what they do in the trade, in the diamond business. They drill a hole to the mother. If this is the stone. They … drill a hole to the mother, and take it out. But when they drill, they take the first piece out, because it's like an?? orange or when you make a ?? doorman, whatever, you take the top part ?/ out , then you put the top back, (3:32). to keep the top. But the problem is, this hole can be seen. What they do with it, there's a specific gel, silicone, which they fill the drill hole gap, and the hole with.

When you look at a stone in the light you see a rainbow in the stone, because this interacts with this gel, and creates a rainbow. 80% of the stones sold on the cheaper end of the market, you see ?? ??? ??

But now I developed a new technology a few years ago, and the Russians watching the Keshe Foundation understood, they can take this one out in a very different way. But in taking it out, now has led to the creation of new colors we've never seen before, because in extracting it, they leave little colored dust. They have no control over the color. And it doesn't leave this rainbow anymore. But creates a new color, the same as we saw in the pink color.

We see new color of diamonds, because of the KF technology development. Because I had to explain this to the Diamond Burse, I was asked to do it. Because we know as ?? seniors in colors, doesn't ?? normally exist.

In a way your transfer the dust, as you all know now, you transfer this black mother into a Gans, in a specific way. And now it's energy, and as this energy comes out, creates ?? ??? ?? creating pink color ?? creates new colors.

When I tell you, the Keshe Foundation has gone deep in many, many technologies this is one of them. (3:34). They wanted me to confirm how the Russians have managed to do this, and I said, this is correct, because I understand why they do. You couldn't explain to them, conversion of the matter to energy, and gas, and when it comes to it, you've got to ?? get the Gans, gas in Nano state.

Actually, the Russians have become very good at it .. They buy cheaper stones $10, $20, $50 a carrot in Africa, take it to Russia and change it to a million dollar ?? diamond. Because people never seen this ?? But they're actually buying a fake stone. Not a fake stone, but ? ??? ?

Don't ask me what I know, I used to have a diamond office in ?? ?? in London for a long time. I know the game inside. By touching a stone I could tell from which river they come from, which mine they come, where they've been mined. You feel it, it talks to you, you feel the soul of the stone.

In diamond business it's very clear one doesn't cross to the other. African ?? take, Lebanese transport bigger stones ?? ????? Chinese and then it comes to dealership's nobody cares, because you can sell it, you can have any religion or color.

Any other question

Q: What metals can you use to manifest red diamonds?
K- It all depends on the reflection of the gas. It's a gas that reflects, it's not a metal. It's a reflection of gas. ?? ??? you can find out. (3:36).

Shall we call it a day.

K- Don't forget tonight >> l get to nine o'clock, we're going to sign it up this week. We try to get as much as we can so often talk for half an hour we tried. And we tried to make sure not to date to obligation that we have to do it. Once a week we put the Testimonials out. And hopefully soon we bring people you can ask them if they want to.

Thank you very much. I hope now, truly we become passengers of the universe with the STP. … . And hopefully soon we understand more.

437 KSW June 16, 2022

438th Knowledge Seekers Workshop; June 23, 2022

(Quick Index 12p done ; Proofing complete Transcription done; need to do ; Key Phrases, Words,) (Auto Transcription from Elias)

Topic Index :

You don't fly - you appear in another place; Your soul automatically knows the Universal language; Next step transmutation of solids to another location - then KS from one unit to another; System is slowly building up M field for transmutation; (Change what went wrong in your life - childhood wounds - put it right); When STM encages P - corrects all faults in physicality; You fly span of U to bring back knowledge elevation to mankind; Systems help STM learn how to come and go; You have joined UC without knowing it;

Good for couples in love to go in FEU; Sight back to blind; While in system elevate humanity and U; More people around world go in - earth becomes the flight room - bring change; Develop new abilities; UFOs would like to learn what is gifted to Man; "I hold Mitra in my arms - understand beauty of creation"; Fulfillment of all prophecies; Explains process of Flight going through Chairs; Making love and children through the soul; Once you learn transmutation travel at will; Human Star Formation; Soul of Tesla; Drag soul of world leaders into FEU - face reality of U;

ENGLISH TRANSCRIPTION

438 KSW
(:12). K- ..
Good morning with that, as usual, when everyone wherever you listen to this is of Knowledge Seekers, Keshe Foundation Spaceship Institute. We're here to share and share more, and see the beauties of the sharing the knowledge. The screen shot you see, is from the testimony of the six Italians, which they joined us this week, to go to where they want to.

You don't fly anymore - You decide to go somewhere and you appear

As I explained to Knowledge Seekers, you don't fly anymore. Fly is the dimension (D) of physicality (P), going to, is the D of the Soul. You don't need to fly to go somewhere, you decide to go, and you go to. We've shown this with Knowledge Seekers, Italians, Germans and others, that they instantaneously don't sit to fly, and fly like a bird to enter somewhere. They decide to be on the Moon, they are in the Moon. They decide to see the soul of their loved ones, they arrive.

So now we understand the purpose of the universal language, which means we go to places instantaneously. As I said in the session of last night, which we made it live, for the testimonials, for what the Italians did the day before.

We have brought you into the Universal Community

We have brought man directly into Universal Community. When you go to a place and you see creatures, you have met with the Universal Community. This is how easy we have brought you to understand, and to taste, and to feel.

The beauty of it is, man will always like to play games. And we played your game, we brought you exactly, directly where we wanted you to come into. None of the participants tell you they flew, they landed, (:14). they went through customs. They saw the, god knows planet and so on so, what we call, customs services and immigration. These things are finished with the new technology. You tell them, they say, oh, they just walked into the ocean. They knew how to swim. Some of them never swam in their life. They knew how to fly. They never knew how to fly, but they never been taught how to fly. But they fly with the souls around the place, to see.

Some of them we hear the travels of the universe (U). They don't want to be anywhere. But they just want to go as fast as they can, see how fast they can see, what they can see. In a way, we have brought you the truth, the dimension of the travel of the Soul of the Man (STM). It's been a privilege to be in the enhancement center and see how people walk out of there. What they go through, what they will see.

You will see one of the most interesting disclosures, when most probably Saturday or Sunday, we'll send out, we'll open up a testimonial, it's by Austrians only. We had the Germans, we had the Italians. And yesterday we had the privilege to have Austrians with us. It was one of the most thrilling things to listen. The joyful things to hear what they went through. How they tested their limitation of the joy. It became very, very interesting.

We've seen this in past three weeks. But yesterday and with what we call, Italians, on Tuesday, we learned exactly what it means, (:16). when the Soul of the Man carries the physicality of the man.

They stay in the system. We give them now plenty of time, Italians took four or five hours more or less to be in there. And the Swiss came in, and we had the pleasure of having two Mozhans, at the same time with us. The original Mozhans who joined us in Ghana and in China. And it was a privilege to see them again. When they put the Austrians in yesterday, it was a mayhem. The mayhem with Austrians was very interesting, because we saw it, in the past with the others in past few days.

In a dimension or physicality, we live, we go through the cycle, that we have to go to toilet, or whatever when we feel like it. When you're in the D of the Soul, the Physicality even working has no connection to the soul, to tell the soul, "I want to go to toilet." But the minute they have no impression, they have no feeling, when they're in the D of the system, that they have such an urge. The minute they sit on the last seat when they transfer to the D of physicality, they run like a bullet to be out, because now the dimension of the Soul of the Man has no more control. Physicality is taking over. And you see them just coming out and asking for the first, where is the toilet. But doesn't matter how long they spend in the system, there is no such a feeling.

Which means it's showing us the totality of the system built works perfectly, or surely for what it has been built. (:18). And we are learning more about these things. But what is interesting is that, the way Knowledge Seekers see the light. We had it from the first person going in more or less. The lady explained to us, and now we are seeing it with everybody else.

We are fine tuning the system. We know exactly how you feel, where you feel, in what chair. And now we can transmute you in the dimension of the liquid, solid, protein or whatever. We had a very good test with the Italians, because there were six of them. We could take understanding, control of the community. How they'll react, how they'll be, how they'll interact with each other's soul.

We see in some of the test, how people decide in between to switch between physicality and the Soul of the Man. These things will become very, very, very much apparent and we'll see things. We start seeing, what we said from the beginning, physical changes in those who go through the expansion of the soul. Stephania yesterday explained to us. She had spots on her arms since she caught Covid, as you know she was on the verge of death. We responded, the Keshe Foundation Knowledge Seekers in UK. We managed to help her. She came from the borderline, back to life. And she explains, as she came in the next day, that all the spots she had since the time of Corona, they're all gone. The itches are gone. Listen to the testimonial.

Then we see people who had other problems, (:20). psychological, emotional, physical, go through the same process. And this is what we said from the beginning. This is a universal flight system (FS). To fly and be able to go to places, you need to use the soul. You want to move the body, international airports are down the road, go down, get a flight and fly to anywhere, you're done. You want to travel in the dimension of the energy fields of the universe, which you call the soul. Join the Keshe Foundation.

At the moment is the excitement of doing it. Once this excitement, and this process finishes, and systems come to you, soon developed and deliver it. You go to the system, you connect to the system, and you decide where to go with the system.

In a way, you have an option to live the physical life. And now you have bought a ticket to Universal Community to go to. When you're on Earth, you fly to a place, you drive to a place, when you are in the universal condition of interactions, you go to places. Because it's instantaneous. And everybody tells you the same. But the interesting point of this development the past few weeks for us has been, that nobody is learning a new language, in interacting with a Universal Community.

You know what they want, you know what you want to give them. As the lady said yesterday, she dressed them in gold, she covered them in gold. (:22). There is no need to learn a new language. You'll hear from our Austrian team, even as a frog, they knew what to do. Even they become fish, they know what to do. We understand the language of the soul of the animals. There is no need to learn a language, we have had up to about 60 - 70 people in the system. And none of them said, he could not communicate, or she could not understand.

They took them to the parks, they took them to the waters, they swam with them, they flew with them, they became butterfly they could see them. But there was no need for learning a language. There are no deaf and dumb sides in the universe ,because nobody's deaf or dumb. They all understand the language of each other, through the soul of the common denominator of the soul of the Creator. This is the language of the U, and we all know it within our soul.

This is what will happen to many of you, as I explained yesterday to our friends in the test area, that you will appear in China and you'll speak Chinese. You'll appear in India and you'll speak Indian. And when you come back, you remember everything you said,

and did, but you won't remember, that use the Indian language or the Chinese language. This is, will become more and more apparent, as we develop this technology and we come to a new phase.

We see the evolution of the science, (:24). we see the evolution of the change in the dimension of the what we call, evolution of the Soul of the Man. When I stand outside, and one by one the Knowledge Seekers come out, and we hear the story of their travel. We hear more and more how perfect we have made the systems to work. How we can allow people to take directly to where they want to go, and we are perfecting that art, that gives the man the individuality of the wish.

Will try transmutation next week

In the next week or two, those of you who come to Linz, you will see a different kind of structure, but very similar. It's the same structures as we have, but upgraded, that we are hoping from next week to transmute. To be able, we have to set our systems to transfer from one system to another.

If you remember, a few months ago, I told you the two Vertical units are going to be on to one side of the bridge, to transmute from one place to another. Now, in the structure of the new system, we see, we can do in a much easier. We have brought all our new systems, and whatever we have to assess the position, the field interaction, and everything else in the system.

There is a threshold barrier. Once we reached that threshold barrier, we can go from physicality, to the energy level very easily. (:26). If you remember, we brought the sensors we built in Switzerland some 10 - 12 years ago, into the Inzano and we recorded the 129 Tesla. Now we have brought these systems back into operation, as we see the fields. If you go back, if you were with a foundation at that time, we started with a very few mille Tesla's. And then they start building up over weeks, we went to 129, we broke the level of the present science, where Americans were holding at 105. They spent millions and billions, we spent a few thousand.

Building up M field for transmutation

They use a massive power stations to feed the system and they could hold it for a few seconds. We used a few volt batteries, because we know the knowledge of the science of the universe. Now, our systems set in, show us the same pattern. We started at 0.04 mille Tesla, and we started at 0.23 mille Tesla, on the higher level detector. In past two or three days, even we have so many people going in and out, we have reached 0.06 mille Tesla. We have increased by 50%. And if we see this trend, we should reach about 5 to 20 Tesla plasmatic fields in the coming weeks.

And then it takes over. Then allows us the transmutation and transportation in the mixture of the fields within the unit. (:28). We are not switching off the systems anymore. Or if we do, we know that the systems in the plasmatic condition, have interacted and are

working. So what we see is what we were looking for in the system. That we came across a very simple position in our structure.

As many of you know by now, if this is the test center, this is your entrance, you have the three chairs on either side. And you will have 2 flight simulations, each one having two chairs. Now we have mounted detectors, 2 detectors one looking in this way, and one looking in that way. We have brought plasma detectors looking to it with oscilloscope. Where the plasma detectors will tell us in our systems, how things are taking shape. In the fields strengths, we look at the amplitude. And we see how things have moved, or are moving.

In this process. What we have seen is that people who come around the center area have a common denominator connection, when we ask them to hold hands together. They think, and some of them tell us, in that point they see a vortex of fields going up. It has, they can see the fields, because they're in the dimension of the Soul, they're in the dimension of the fields, (:30). not in the dimension of the physicality.

Something very, very interesting, which has come up. And I'm sure the researchers in the future will confirm it in a more, much detail is that, every one who crosses Seat number two to three, who has been through the process, and gone through the conversion, will tell you something very interesting. They listen to us, with an instruction. But they hear it as a noise, but they carry the instruction out. When they come out, they remember the instruction, and then they do the fuzziness and everything else with it.

It is important for us to remember, that now we deal with both dimensions. In this room, there is nothing but the fields. So, in that process, we are part of ?? (fields). What is interesting for me when I stand in this room watching them, they know the dimension of physicality, when they have to get in and out of the system, or choose a chair, or the stand around. But at the same time, when they go back in the field dimension, they interact in the field of the soul. (:32). They start from one system, they go to another system, and then it's a different position, different strength, different what we call, interactions.

We see in that process, as we can see with the eye of the Soul, the eye of the Man will change too. We are following 2 Knowledge Seekers (KS), one of them on a permanent basis, in how their vision has changed, and is taking place that the soul, the energy inside, has started wanting them to see.

We are following the one Knowledge Seekers, which now has attended four or five sessions of flight. We have made it free for him. Because it's the process for us to understand. He came in with one eye blind for six years due to a stroke. The nerves in the eye have exploded, and the ball, eyeball is blood flow, ?? ?? . The shape of the eye has changed, but he, in the first instance when he came to explain, he felt the tears, for the first time in his eyes. After the first flight after six years.

We had the same with an Italian lady, who has a problem with the eye and no tears for years. And she started, she told you yesterday, tears coming from the eye. But what is

interesting with the person who's going through simulation flight testing is, that now he tells us yesterday, (:34). that he started feeling connections and pains, that as the eye is interacting. At the same time for the first time on his eye, he feels like a sand, salt on his eye coming down.

In a way, when you lose your eyesight, or you lose the use of your eye, but the eye is still open, you still come across the interaction of the air, and whatever condition of the environment. But as the eye channels for the liquids are blocked, because the body doesn't see any need for it, it's a waste of energy. The eye itself starts building layers over the what we call, the physical part, that the wind, the cold, whatever does not touch it. You don't need to create tears to keep it wet and moist. And now what we see, is that these layers are rubbing up, it (feels) like sand.

In the next few weeks every time he goes into the vision enhancement units, and then into the flight simulation, we see the point that, the eye will start, in a way through the wishes of the Soul of the Man, to see. I expect him to have both visions within next three to six months, maybe earlier.

I did what the Christ did, giving sight back to the blind. It's not the first time. But this time, we don't do it as a mystery and magic of a religion, we do it as the understanding of the science of the creation. (:36).

We will see many of you taking a flight simulation to, in a way change the processes within yourself, to fulfill where the things went wrong to put it right, that psychosomatic conditions you created for physicality, when it is embedded within the soul, will not be there.

STM corrects any imperfections in the physicality

This is the one thing, which Knowledge Seekers have not understood. The Soul of the Man is perfectionist. The Soul of the Man will not allow anything to go wrong. The Soul of the Man lives by the ethos of the Mitra. So it cannot, when it takes over the physicality to be within it, allow any faults. It has to correct itself, because then if it's wrong within it, it will effect operation of itself.

This is why you see changes. This is why you see the change in everything, in the physical D. Because up to now you had the body of the man, and you entrapped the soul in it. Now the soul has you entrapped in it, and now everything in this (the body), has to be perfect. We are not here, we don't offer a health system. We offer you a flight system to fly the span of the universe and bring the knowledge of the universe, to correct the dismal physical life of the man, in a physical D. (:38).

The process (of change) starts when you exit the system

The interesting thing is, in the next few weeks will bring, we'll have a Zoom session with all those who went through the system. Because the process does not finish when you exit. The process just starts when you exit.

As I said in the dimension of the physical life, the real life starts when the physicality finishes, we call it death, and the life of the soul starts. You expected when you go through the systems, and come out, and the soul is left behind, back entrapped again. My dear friends, you have let the cat loose. Now it knows it can come and go.

Connection to system is - soul of system to STM

Many of the Knowledge Seekers who we speak to, or they talk two days later, or a week later with us, tell us they have a connection with a system. The only way you can have a connection to the system is to the soul of the system and the STM. And so we have given you that freedom.

We have taken man into the Universal Community

In this way, we have taken the man into the Universal Community without the man ?? knowing. It will be interesting when we bring in Knowledge Seekers together who went through the system, what they tell us, has changed in them, since they've been in. What physicality has changed, what has changed in their emotion, what have they fixed in the social life? What have they changed in interaction with the friends and families?

Man will change and live by - Ethos of Mitra

Because it's not that I experienced, or I've won the lottery. (:40). Now it's, I want to live the life of the Universal Community. I live by the ethos of Mitra. We see many Knowledge Seekers change as they go through this process. Change is not, that suddenly you will become something. Change becomes, as you gradually become citizens of the universe. You live by the behavior of Universal Community, and not by the physicality of the U Community. The changes are profound.

As I said, we'll see it as it comes. As I said, you will understand this in a very clear way. With the gentleman with the eye, we are photographing his eye, every day he comes in now. To watch how the eye has changed. It was interesting standing in front of him yesterday after he came out of the system. After he had a long session of flight. He took a few seconds for him, to allow us to take pictures of his eye. And he wanted to look at it. He said for the first time, he noticed that his eye which is blind, is different. He never considered where one eye is this size, the other eye has changed to smaller, because to him it's just an eye. What we see interesting is the eyeball, now when he came to us, it's just like, creamish, yellowish color. Now, all the veins are full of blood. The body's returning back, (:42). because the STM sees the physicality has to match the soul, to see the perfection of.

When I released the Eye Enhancement Units (EU), you all thought it was going to be, my eye is perfect if I have this and that. It was to open the eye of the STM, not the eye of the

physicality of the man. But when you open the eye of the STM, it has to be perfect with its P too. We are not physicians, we are the Knowledge Seekers, we are the scientists of the universe.

I explained these things step by step, that you as Knowledge Seekers understand it, that you know what has come, what we told you will come, is exactly what we said. And what we say to expect in the coming time, is to come.

It's not any more making MaGrav system, it's not anymore making Gans's. You have joined the Universal Community, and you have to understand the implication and application of becoming part of a new society. How to react, how to be. Yesterday when we saw the Austrians coming out of the room, it was interesting, and it got more interesting, and then it became an explosion in one of them. The joy of becoming part of Universal Community as a frog, was so looking from animals, was so joyful. You'll hear it on Sunday, when it comes out. I hope, in the recording she could communicate to tell us, or they're sending it back to us a report, and we'll record it for them. (:44).

It is amazing to see how things work. What the knowledge we didn't have. The knowledge of being aware of fields around us. And then, if you wanted, you change the fields into reality of dimension. One minute, the brother, the face, the look, and then the next second, the energy of the presence of the brother. You have to learn, as I always say, you have no choice. But the time for encapsulating, imprisoning, keeping to hostage. As I said, from the beginning of the time when we started these works, the physicality of the man is a leech on the STM. Now you understand what it means, because now you have it you can ?? (feel it).

It's for you to be ready for the evolution of the man in the world of the science of the universe, not science of microchips and the others. Those of you who went through the full transmutation of the fields of the STM, you'll find out, some of you, if you've gone through the process the correct way, traveled to China. To you, you speak English. To the Chinese hearers, you speak in the Chinese language, the emotion of the language. You don't need to say ?? ?? Because it doesn't exist anymore. (:46).You don't need to sit and wait, I have to find a word for it, to explain maybe the emotion. Because in the exchange of the understanding of the language, the soul of the meaning of the word has already changed.

In the next few weeks testing, we bring a new dimension into the work. By September, we try to add two more units into this what we call, environment. What is interesting for us is that, we will move the two systems further apart to the extremes of science. With it we'll bring two more units into the system.

New systems - lights instead of physical reactors - 12 chairs around

Still, each two passengers, and we add to the number of the seats around the room to make it to 12. In the process of these new systems, what some of you will see, is not anymore as reactors, but you should see, start seeing lights, like the stars. In this process,

we gradually will get rid of what we call, the physical systems. And what you will have, (:48). is the containment of conditions of what we call, Universal Community. I expect this maybe, if we get it all right by November. It's a lot of work. And then what we shall see, is anyone entering this room in a way of instantaneous operation, will join the Universal Community

You decide, New York, Mars, or another galaxy, and if you're very, very clear in the ?? view of the life of the man, you'll come across one of the most beautiful things, and that is, you will meet, you will come to feel the essence of the presence of the Creator.

We had people going through the system and wanting to meet the Christ, or feel his presence, and they have done it. We have Knowledge Seekers who go in, in a specific way to raise the soul of the Germans, the Italians, and the rest. And they have not matured, that they are there to raise the soul of the humanity, the earth, and the U. It needs time to mature. We're still under the banner of the Keshe Foundation, are nationalistic, where this has to die. (:50). Where this has to be understood, a nation is a small part of the totality of the soul. I am nationalistic when it comes to Iran, and the land of Iran. But that is the limitation of it. Because I'm committed to Universal Community.

It'll come to a lot of you, that by changing seats in different parts of this structure, you will fly to different positions in the universe. You want to go to galaxies, you chose this, you want to go to Earth you use that, you want to go to Mars you use that. And then you choose combination of these, 1, 2, and 3 to sit and learn in different positions in the universe.

And as you have seen, those of you who have been through the system and come out, I listen to you patiently. I don't ridicule ?? you, are you sure what you've seen, because what you tell us is the truth, that the soul has seen. And sometimes I wish I was there, to see the joy you took.

We're building these systems, that in the coming time, when you come near, Umo, what we call, The Exhibition Center (EC) (in Linz), you see the light from kilometers (away), that you know this is the site.

We build it in the inner sanctum of a building, to show that we do not need to be in a space, because that inner sanctum itself is part of the universal space. (:52). To man it's underground, to universe it's an open span of ?? its energies.

We bring you a dimension that as I said, you could not imagine. But now you can think and it becomes reality. You go to places and you meet with people you like. Yesterday, I listened to a lady who wanted to meet Jesus. That was her wish. Then she tells us, I felt that field, I didn't even see the man. So in that field, you feel the essence of the soul of the Christ, bless his name.

Interesting is, that we had 2 Muslims up to now, through the system. We're not aware of any Jews coming through. I wonder what the Iranians who booked into come in, will

become and bring the soul of, bless his name, Mohammad, to play, to enlighten the Muslims of today, to stop the whole mayhem of present time.

As I said, yesterday, we'll invite the world ambassadors into the room. And let's see how many of them reject, and how many of them walk in as a man, and then they become the ambassadors of the nations through the soul of the nation. This is not anymore, one or two. We are facilitating, and in the time to come, those of you who came and walked out of this door, you already have become the ambassador's of the system. (:54).

As more people use system - Earth becomes the Flight Room - then change

If I get enough of you through these doors around the world, then the extent of this room changes, and Earth becomes the testing ?? room (or Flight Room). This is the beauty of what is to come, and what we are there to deliver. Whatever we said up to now, we deliver it. We still make the MaGravs, you still want to see a Pain Pad, and a Pain Pen, we still keep on, because we got nothing else to do. We have to keep going.

But in essence, the seed for unification of the STM with the Universal Community has truly started in Linz. I hope to see many of you when you left, how you bring everything back together. How you will allow us to become part of the Universal Community. If you thought man has achieved major breakthroughs with Nano technology and the rocket Space Technology, as the old saying says, you've seen nothing yet, when it comes to the world of the plasma.

People using system will develop new abilities
Many of you will come to have new abilities, which you could never imagine even existed. Because as you travel through the span of the universe, you learn the new knowledge, and then you'll be able to apply it in a physical D of the man.

UFO travelers would love to get here to learn what have been gifted to Man

Many of those who travel with UFO would like to get into the atmosphere of the Earth, (:56). to learn what's been gifted to man, to be able to pass the span of the universe and not spend thousands of years traveling from one to be, just to be somewhere, as the physicality wanted. Now you travel to the position and you change to the D of physicality. Who doesn't need UFOs, rocket propulsion, or airplane.

Once it takes hold in complete condition - no more suffering hunger

This is the start of a revolution and evolution and many of you will enjoy it, once it gets hold, in complete condition. There'll be no more hunger and suffering, there'll be no more illnesses, there will be no more what I call, persecutions and the religions to tear each other apart. There'll be no more war, because now you live through the ethos of the most beautiful creature in the universe called, Mitra.

Then you understand, when you hold Mitra in your arms the way I do, you understand the beauty of the creation. You understand what the man has to give, to bring, to be able to change what's within. Be prepared for what is to come, because it's you who makes the destiny, not us. It's you who make the destiny for yourself and not for us.

Understand the totality of the knowledge. Be prepared for a change, (:58). and this change will come in a very drastic way. In the Keshe Foundation organization we sit in the background for it to take full shape. In the coming days, we'll announce a radical changes, and position with the Keshe Foundation. Those who betrayed us will be ashamed of what they've done. Those who support us will be joyful to see the change ?? and what is coming.

Understand what is to come, and understand and be prepared to accept what is to come. It's been promised, when the Messiah comes, it'll be the land of milk and honey. The milk and honey have arrived, and the Messiah is you with your soul. It's you who has to decide how much milk, and how much honey you want to take from the beauty of the creation of the U. Promised that the peace will come. It's you who has to make peace with yourself. It's you have to be in peace with everything, structure around you.

Everything which has been promised in all your holy books, doesn't matter which book you open from Koran to Torah, and the rest of it, will come through, but for your soul, if you understand the truth about the Creation. Otherwise, what they say, the hell and heaven. You still live in the hell, which is the physicality of the man, you suffer everyday in it. (1:00).

Heaven is for those who understand the evolution of the soul, and with it, we'll ?? bring ?? of Mitra. And with it, end up everything which is for the physical D, ?? the way ??

Now, you want the explanation of where it comes, where it ends. It's you who actually lived in the hell for all this time, and now you want to get to heaven. And you know the path to heaven, you know the path to understand the of essence of the creation for yourself.

The Prophet is understanding the emotion of the man

You don't need no messengers, and you don't need no prophet, because the prophet is understanding the emotion of the man. In the process of the system, in a very simple way, as I keep on explaining, for those who come to go through the process, in the room.

When you enter the room, some of you get touched by the environment. It's very correct, it's very true, because the systems have been running and people have been going through it. So as you enter there is already a pre-existence field. As you go from Seat 1, to Seat 2, and to Seat 3. In Seat 1, a balancing physicality, takes shape. But don't forget, you still have tapped into the fields within the building within the structure.

When you go to Seat 2, you see, as many of you tell me. (1:02). Many people go through the system, first thing they tell us most of the time, they feel the legs are there, but they don't know, they feel the legs. But here (in the head) is something different, but they are all concerned about their legs, pain in the back, and the leg. So here (Seat 1) we open the STP, so the STP start working, but the physicality is still attached by the leg to the ground. That's why you have this dilemma.

When you enter Seat #3 then the game changes and the STM takes over the physicality. Some of you say, I feel no difference from Chair 2 to 3, because in that process you have already brought in, the STM into play.

And then wherever, whatever you do in this block (space between the reactors), walking, sitting. There are chairs for you here now. You are in the environment of the Soul of the Universe, not the earth, even though we talk, you walk, you drink, everything else.

By the way, I have a news for you. We had the first drunken soul by the Italians in their team, when they came, because they brought their own bottle, and we gave it to them. And one of them got drunk because of it. But it was beautiful to see a drunken soul.

It comes to the point, that in this room, you are in the fields of the universe. You choose. And interesting enough, all those who been through this, when they go back through, (chairs), 3 , 2, 1 and they go out. They tell you, as this is Seat 3, (1:04). they know the journey of the soul is finished, and they are ready to accept the condition of physicality. By the time they reach Seat #1, most of them, or all of them tell you, they knew, as what they said, they landed, they have landed back on earth. The journey of the soul is finished. They all tell you, they feel that physicality, the weight back again. Which means what we said from the beginning is, when the soul takes over, weight and the dimension does not matter.

What will be interesting for us next few days, and next few weeks of testing, will be, how many of you in the position of the structure of the work, will transmute to any position in the room. Don't forget, we got you when you sat in Chair #1, by the leg, you're not going anywhere. Go to planet Zeus, we still got you, you come back to us, because we tell you to come back. Even though you're in D of the soul, many of you tells us that, they hear noises, but the only noise they hear is the instruction, which goes what and where. Most of you get instruction from your own physical dimension, as many of women especially say, they know the physicality is coming to do something, it says no, no, no, I don't want, I just want to carry on with what I'm doing.

And we start seeing a pattern of work, which shows you, we make you ready to become a passenger of the universe. (1:06). And then we make you ready to become the passengers of physicality. You tell us what you've been through and we listen. We have had beautiful conditions, beautiful understanding, and in a way, it's the most beautiful condition place to be, to see how the souls work.

As I said, in the coming weeks, once we complete our structure, we are happy with it. We'll call you, to call your ambassadors to come to Linz. Where Hitler ended many lives, from the ashes of the Phoenix, we start with the new life, new life in the space, new life in the dimension of existence. A new life in understanding, that there is a purpose bigger than D of physicality of eating and sleeping.

It'll be very interesting when the first children of the man in the D of the souls are created within this room. Then the new race ?? started. As we said, the Soul of the Mitra in the P is amongst us, and the gift is given to man.

We had the most beautiful experience yesterday and in the past weeks, in how the couples come together. And how they see each other in the dimension of the Soul, (1:08). after they've been through the system. They actually physically touch each other souls, as a soul mate. And I encourage more couples, more people who are in love with each other to come into these system. We had the pleasure of the, for the first time, two ladies who are in love with each other, yesterday. And it was beautiful to see how the soul interacted.

And we had the privilege of seeing brothers and sisters. We had the privilege of seeing sisters and sisters. We had the privilege of the lovers to go in. And it's amazing to see how they come out, and how they connect afterwards. And how life will take shape. It's a privilege to be in this position, to see the birth of the new race. To be part of it, that it's initiated, and to be there to fulfill the wishes of the Creator. It's like a gynecologist, you looked after the baby in the womb of the mother, and then you go to the delivery room waiting for that child to be born.

When I stand outside, it gives you that feeling. You see new children of man coming out. Going in as a man, and coming in to understand now there is another life the way existence, (1:10). now will have a different meaning. It's not confined to the womb of the mother. But now it's confined to the life of the living in the D of the Creator.

But this gynecologist has been waiting for thousands of years. And this child in the womb of the mother of the Earth has gone through many turmoil's. But now we see the breath of it, and it's a pleasure to be there. Whatever kicking and shouting he did in the womb of the mother is over. Now you have to enjoy the pleasures of the life in the U Community. That was the wish of the Creator, and I have delivered it. Let's see what mankind does with the gift he's been given. We go through a break, come back, and today we have to finish at 11:15. If there any questions would you like to take us for the break please.

>>> BREAK <<, 438 KSW June 23, 2022 (1:18).

K- Yes, ready to go.

Q: …. At the moment the person is there in space on the Moon? Do they have conscious and free thought of their own volition? Or is it being guided all the time? How is the thinking in this case?

K - Can you repeat that?
Q: repeats (1:20).

K- I don't understand, you're free, you're the same as everything else. We don't. They tell us what they do. We hear. The only thing I do with them, because you got to understand why when we go in, in these cases and tell them. Because they get so involved in the process, they are. A lot of people when they walk into the flight zone, it's overwhelming. It's very simple.

But you know, you waited a long time to meet your lover. The excitement of the time to meet overwhelms. The mother waits for years for the child to come back, and then knowing the day he is going to come back. It's just gets so much crazy cleaning everything, doing everything else. A lot of people I see going into this zone, are going through that position. Or when they get in, they get numb. They don't know what they want to do. They don't know where they're going to go.

We see them. We have people yesterday, they sit on the chair 1, 2, 3, within five minutes. I tell them, all a bunch of you know. I talk about taking your time. These guys within five minutes are sitting in the unit. Excuse me? Do you go to the party, (1:22). the same, you are ready in five minutes and go in. I've never seen a woman having makeup, and everything, ready, well done, in five minutes. How come you ladies are in the machine before, when I go out and come back in, within five minutes, you're on the chair. You say, oh, we have limited time. I say, the only time is you, when you are ready.

They get overwhelmed, and they get into a tangle of fields and energy, the way the soul takes new dimension. They all talk about the expansion of the field. They don't want to call it, a soul, because then Christ knows what's going to happen now, the soul is out. And they all talk about the expansion of the fields. I say, isn't that why you're come here, to see the expansion of your soul? Yes, but it's the field, I feel like inside it, it has taken over me.

And then they get so entangled with this, that we have two systems built on each one, one system, where we can tell when the people will go into the position we want to. And you hear a noise going "buzz" , because we concentrate the fields into the center of the system, which means the energies stay in. We don't let you expand it.

And in that point, we ask you to take a flight, because you forget you came here to take a flight, and some of them tell us straight away, I haven't come here to fly, I have come here to do something else. No problem. But I'll tell you something, I want you to fly, you fly. And most of them go the way they want, because the soul decides, and we just remind them you come here to fly. Would you like to be a captain? Would you like to have others with you. They remember who they've taken, as I said, before, and sometimes the passengers join them.

Very interesting situation happened yesterday. We had a couple of Austrians. You will see them they'll bring it out, they'll tell you. It was a pleasure to have the all Austrian team in there. It was, (1:24). it was it's a different mentality. Because we had the Italians with the Italian behaviors. You've seen Stefania and you know the Italians.

We had with the Germans always. This group of Austrians was gorgeous to be with them. We had a couple, we allowed, we left it to them to do whatever they like, because the room was free for them to do what they like. The husband was behind the wife. We interviewed them separately, and then we bring them together. She said she felt the warmth on her back, as her husband was there. And the husband when he came on said, I could see a glow, I was there to like protect, and how the two joined up. It shows how close they are really in life, in the soul level.

We get couples coming, because we tried this, we don't, we don't say anything. But it was nice to see the first, what I call, "the twin love." It wasn't just outside the physicality, inside they had that feeling, the connection, they could feel each other.

We had another case of two ladies, who were loving each other as a couple. And the same feeling came out. It's beautiful to see, love has no gender. It's beautiful to see, that we are witnessing a change. (1:26). So we interfere sometimes, tell them, You came here to take your flight, who you don't want to handle the ones, they say, "I haven't come here to fly, I have other things to do." We had that with Stephanie, she said, I didn't come here to fly, I came here to bring peace, and I'm going to do whatever.

We have a system built in. We see if they're actually interfering. If they're taking from the system, or they are giving, and we bring the two system into balance. We hear it when they come into balance. We don't tell you what to do. But we inform the physicality, you brought the soul here, and we would like the soul to do this, then we see how they do it. Especially when we take you, you are the captain. It's a beautiful experiences. It's a pleasure to be there.

Yesterday or the day before I had a beautiful feeling, being in the Umo Center, and that was, those of you who have been close to me, to work I've done in developing the technology over the years, to make it possible for you to understand. I was gifted with a beautiful pleasure by the Iranian government officials some years ago, with special tables, stainless steel, that does not take any magnet. Many nights, many times I used to run the reactor, but I was working so much, nighttime, whatever, I used to fall asleep on

the tables in the lab. There was nobody else just me. You wake up and you see the system is doing what you set it up for. And it's a pleasure to see you know, it was nice nap, maybe half an hour, 10 minutes, whatever. (1:28). And many times I woke up feeling of just falling off the bench, off the table, because you get so exhausted, that you don't feel anymore.

And it gives you a pleasure to see what you work for, and what you fell asleep on the table, and all that, was worth doing. And I got that feeling in the lab, in the Umo center. So much hard work, so much persecution has paid off. When, it's like a lab, people come in, but this time, you don't change a gas, you don't change a rotation, it's the souls which change and come out. It's the physicality which confirms you've done correct. And it needs to be done, this or that.

As I said, when I went to Iran by the ?? Ayatollah K of Iran or ?? Armani Ashad, I was given a hidden team in the background, which was everything done and brought in when we needed it. But there was no line of communication to expand and do things. In Umo center, now we have a different structure. As I said, I see what it is, changes needs to be done. We have a beautiful team with Klaus, sitting and immediately implementing changes to be done. And we have a team back in the factory, that are devoted to see this thing done. And it gets done and it comes back in, within a few days.

It took Iranians seven days to give me a reactor. It takes Keshe Foundation team three days to deliver a reactor, we become that better than Iranians. And we'll see the change. Today as we speak. I'm sure the team is in the Umo center, implementing the new changes we've seen, we want for next week to be ?? partitions. (1:30).

It is an amazing feeling to see the birth of a new technology, the birth of new science, and a birth of every man's wish. Whatever has been promised in Torah, in Bible, in Koran, and all the holy books, is delivered. It's for man to understand it. There is a team there who just makes it possible. Everyday in, and everyday out, has been there to make it possible.

The only sorrow, or a shame is that, we had to go through all this, to get to where we are, when we could have been there ages ago.

I called to myself, in the past few weeks, I call this room, the room of Fabio.

Any other questions?

Q; .. You have already said that if it happens that the person strays into space beyond the limit, you bring that person back. (1:32). What could happen if the person wants to stay there? Is he in danger of losing his physicality? What problems might we face in this case?
K- I'll let you know when it happens. Just wait for it, and if it happens.

Q: .. When purchasing the technology for the phone, how long do I have access?

K- You mean the mobile system? Once.
R: I think that's what they mean.
K- One plane to Linz from Brazil costs you $3,000, yeah, costs you $3,000. We had the first Brazilian yesterday actually in the, coming in. She came in, she went into the system. I offered her for a second time, she didn't want to go in. She had how much the Austrians had, ?? to go back in.

But it's one structure. We'll tell you when we start this process in November and December. We're hoping to be ready by that time. The exhibition center is closed from 1st of August to the 15th of August for annual holidays of the Keshe Foundation. Our team has done a lot of work, we need to step down.

If you're planning to come, buy tickets, whatever. (1:34). Do not do for the period of the 1st to the 15th of August. There'll be nobody there if you come, behind the closed doors. The factory is closed, the Research Center is all closed, because our team needs a rest. They work beyond the limits. August is the usual annual holiday time in Western Europe. So the first two weeks of August … 1st to the 15th of August, KF doors are closed. If you are booked.

We know we have one case now with a Brazilian couple, paid by the Brazilian community to come in. They arrive on the second of August. Please make sure (you don't book your flight). We had to make a special arrangement for these 2 to come in. But please do not book for the August.

We try to finish everything by September, because we need to bring new systems in, unless we see an extension needed. We will close. We're getting more or less, fully booked for all the days we have. Because it's not just, who you come in, we asked for a number of people to come in for a repetition of what I call, EC. Especially medical people. We request some of them to come in, because they have to understand to be able to take the situation further.

Any other question?

Q: .. Is transmutation a bit like "Beam me up Scotty?" And once we have entered the universal flight unit, will this be a normal ability for us to travel at will?
K- Yes. (1:36). You will be able to do the. Once you learn to walk? Do you need somebody to hold your hand. I think I can answer you that way. It's the best way I can answer. Once you make a link it's there. Once you establish the whole thing, it'll be very easy for you to do.

Any other question?

Creating SF with Humans together - be at peace with whole of humanity

Q: .. I would like to know or understand how to create the Star Formation (SF) between humans, with family members?

K- Can you repeat that question?
Q: She says I would like to know or understand how to create the star formation between humans with family members.

K- Very easy, first of all come in peace with all the humans, that you establish the connection. This is the secret behind it. You can't drag your son, stand there because I need your soul, or your wife, stand there because I need your soul, (1:38). to make something. Let them ask, if they want to be part of the Star Formation, and then you'll see it. You feel it.

We went through this very nearly with Ali in Canada years ago. And it fell apart, because different views came into it

Man learning how to make love in dimension of the soul - make children of soul

Man needs to learn a lot of things. This is just opening of it. I was talking to one of the Knowledge Seekers. You will now even have to learn how to make love in the dimension of the Soul. That will be fantastic to see you lot learning it. It'll be the most amazing way where you start creating children of the man in the dimension of the Soul. It'll be amazing to see how you fall in love in a dimension of the Soul with the citizens of the universe.

As I said yesterday as the girl was talking. She was so overwhelmed with this frog shaped things, with the whatever she had with her. That what happens if we feel in the D of giving to one, what we call, falling in love. Would you bring your frog home to your mom and say, I'm in love with this one. Would it have the shape of a frog when it lands here, or you're falling in love with the Soul, the Physicality here might be Black, White, Yellow, you don't care, (1:40). because it's your soul. There is a lot to come yet.
You got a lot to learn.

I tell you something before you go. Yesterday when the girl was telling us about the frog, I said, did you kiss it? She said, yes. I said, did it become a prince. It was interesting the response. But yes you will fall in love with frogs. But you're totally in love with the frog ?? You will hear in the Testimonials most probably.

Next question.

R: Did you check the attendee list and see if she brought her an extra passenger back.

K- We are building the system. I think it'd be ready by the next few weeks, because it's very delicate how to build it. That we can convert to complete the transmutation. Transmutation, it's not difficult, but it's very precise job. We would like to start with the stones and hardware things, and then come down to .. other matters.
Any other question

Q: .. (1:42). You have asked for the soul of Tesla to come to the system in Linz. I wish to bring my experience with Tesla and the experience I had with his soul a number of

years ago. Do you expect many people to carry aspects of Nikola Tesla to the unit? Or is this one soul?

K- Was Tesla a hermit and locked himself up in a room from the birth, and saw no one? So you cannot be the only one. And secondly, once you are in that state you belong the whole of the universe, it's not exclusivity. It's not anymore, "mine, mine."

We had Italians, 2 of them with the Pope. You heard yesterday, maybe. We had a person with Putin. Putin was only interested to speak about his family and nothing else.

We're waiting to see how things comes. Because once you establish these lines, they are established. You will see what you can do with it, how you can turn it.

I have invited Ayatollah K of Iran to Linz. He has never traveled beyond the borders of Iran, since he's taken position. Then if he doesn't come with physicality, we bring the soul. (1:44). It's very easy. You will understand how easy it is. Then when we send it back, I wonder how he will feel, and what will be the changes he brings to the Islamic world.

What will happen with the Pope? And what will happen with president Biden? It's your job, take their hand and drag them in. Let them face the facts and reality of the universal existence.

Any other question.
R: All the questions answered.

K- .. . So I think people now see the fact, the reality, they see what is on the table. It's not anymore, does it work, is it there, and it's not one or two. they are coming in 10 a day sometimes 12 or 15 a day. It is very interesting how each one comes with their own what you call, individual wishes. The German sitting right at the front, he is a scientist. At the beginning he was in what I call, in the room for about four or five hours. He changed when he came out, and the way he was talking, and the way he seen the changes, (1:46). as a scientist.

It touches you, because we cannot escape it. It's not any more goggle on the eye, or you hold something. It's you who interact, you confirm, confirmation of your own existence with ?? others, ?? It's a pleasure to see it. And I'm sure the hotels of Linz are doing a beautiful job with the number of Knowledge Seekers coming in. These guys are not coming overnight, they are staying 3 - 4 days, and go back. And they come back the next day, and the day after, just to be around the center.

We saw this with "Nino", people used to come and stand outside, we know from Korea and China, and from all over the world. Or they just. We are in the session with other people, they just come and sit for hours on end. "We came all the way to be here." We start seeing that with Linz. Don't make it a temple. Make it a temple of knowledge where you come and you take the knowledge back to your citizens and ?? people.

Any other questions. If we don't have. I think the whole of the Keshe Foundation now is facing the reality of facts, that they have to handle it ?? . Make your way in from all over the world. We need it, to complete it.

Q: … Mark from Sunday teaching. (1:48).

K- Mark does all the Sunday American teachings. He's the man behind it. Thank you very much for all your work Mark.
Q: .. Thank you for sharing all the knowledge of the universe. I wish I could absorb more and it looks like going through Linz we can start to absorb more. My question is, is the center still open for tours to the general public?
K- Yes. Yes, we do the tours simultaneously. People are not allowed to come down where the EU are. But generally upstairs. Yes.

Q: Well, that was the part of my next question, which you said people used to come to Italy just to be there and to observe. Would you consider creating an observation deck almost like when you go to an amusement park.

K- We have observation deck when you come in? You are on a big deck, and you look down. The construction is that way. The only thing you don't see, you can't see inside the Flight Zone.

I want to call it, "a to do zone," because you don't take a fight. If you want, you ?? to do it. It'll be nice. I call it a "Fabio to do center," and you get things done. You go to places.

It's used to be a shopping center. You have a big entrance and when you come in, you have two escalators, which go down, and you have like a public gallery on the top to see down. The exhibition is set on the top and the test center everything is below. We have moved, as you see this sofa is part of the Studio. (1:50). It has been brought up, because now the studio has become a flight center. Or a "to do" center, I should call it. There's no way we can allow people to come down anymore.

But from the top, you can see the two Enhancement Unit in the back, the vertical unit, the horizontal units, they're all there to see but we don't allow any more people to come down. On the top deck, we have everything to do with it. And it takes place sometimes when we are running these tests, where the sessions are going on. .. up with Maria upstairs from next couple of weeks, Herbert will join us to extend the exhibition. We don't allow no one downstairs anymore doesn't matter you're calm we are there or not no one allowed and then when you come to is not your time to go into the session. Everybody's kept upstairs. And so, we was very, very set up because when you come out, if you want to give an interview, we record it how you felt and then you have to fill in the whole experience in your own language.

And these details will be later on added to the multiple to the back of the data as we need to know where and how they get there to run parallel together but only up to this for

instruction and you can see through the I think must be 20 to 30 meter gap square on the top, that you look down as it was great as for you can see everything something you can see that Knowledge Seekers going through the interview and everything else.
Q: Okay …

K- The workshops are done, (1:52). in behind the. We had the workshop with the production of Gans's , it was a whole one probably wanted 10 people there I think that 14 And in some behind one of the walls, the center is set up between them by day, what a call the head of the Keshe Foundation amazing in that a lot of you don't know, again, the Keshe Foundation Center, the whole structure is rather the woman. And she's very good at it. And she set up a beautiful what were called workshop structure. And people queue they join it. We announced the next workshop to come up next few days, or it is. Join them the people enjoy to be attended the workshop with Herbert producing Gans's will enjoy. Because Herbert used to run the Gans production Keshe Foundation for sometimes, a couple of years, he is one of the best to learn from.

Any other questions?

K- Oh, that's good. My wish was to leave early today, (1:54). because I have to go somewhere, and it's 11 o'clock. Let's see what comes up. Let's see. I think the silence says, itself, the Knowledge Seekers after years of whatever patience, or ridicule by their family, or whatever. Now they see the reality and they're satisfied with what is coming.

It fulfills what we promised, and it fulfills what they were waiting for. This is just the beginning, and let's see what happens, when we start trying to transmute in next couple of weeks. I'm not worried if you don't succeed. It means we haven't got it the right way.

We have to get it the right way. We understand it. We already done it.

Let's see where we can take the human race. Let's see what is there for us in the future.

Thank you very much Rick, call it a day and the whole KF, and especially the teams in the labs, and in the .. Umo center, they are hard at it to make it easy for everyone to enjoy it. Thank you very much.

Don't forget, come in from all the nationalities, we are ??? We haven't had a single African yet. We haven't had a single Chinese yet. We haven't had anyone from India, or Central Asia. We need people from Australia and the Philippines, and that part of the world. South Americans ??? making their way. Americans are in droves coming in. And we have seen the Iranians are already lined up to come. (1:56).

We need to fill up the encyclopedia man. Some of you will come with a better experiences, others, we fine tune the systems. And maybe you want to come back to see the next experiments. Our next, how it will be with a new structure.

Thank you very much for today … being there to support us to be able to deliver after so many years in the correct way.

Proofed complete

438 KSW June 23 2022.

END

439th Knowledge Seekers Workshop June 30th 2022

(Quick Index 15 p, Introduction , topic index ; Transcription proofing done, Need to do ; Key Phrases, Words) (Auto transcripts Elias)

See light of your own Soul - "I am you" - enlightenment by a machine; KF T released to public

Topic Index:

KF releases 3 types of technology to public - Plasma Enhanced Systems for Car and Home - 2 Wellness Centers in Rome using Plasma T - KF T used to make all Nuclear Reactors safe - create a Dome of Peace with M fields;

Your soul heals you, the system only provides the environment ; Man has frog leaped in knowledge beyond UFOs envy of U; STM encages P transfers energy not mass; We control travel not wait for dream time; Health Centers - prices high but 100% guaranteed recovery or refunded; Will deliver in 8 weeks a system to transmute matter objects - factory to home delivery instantaneously; First time Iranian government allows KF to register as private space company; Persian Gulf Oil industry change within 2 years - Iran will see no nation suffers; T cannot be stopped because it's not in the head anymore - in machines that work and see outcome; Iran will delivery the safe nuclear T across planet; Vienna 5plus1 talks will resume soon - come to conclusion; IAEA asked to test new T in Iran; KF will be part of new space city to be built; Remain connected once you leave Flight Room; Don't need to eat as much; First Dog Mozhan in FS: Every cell in body has STP; No one should die from Carbon Monoxide poisoning - change energy with Gans; CO blocks energy transfer in blood not chemicals; Train your lungs to absorb energies from U - can walk in space without suit; Headaches from brain cell repairing; 3 Chairs in flight room reduced to 1 Chair - 3 in 1; Car systems have 2 halves 1 side deliveries energy while other side recharges - like heart and brain work; Free Energy is premature for man; New UC members to come in; Language transmitted through flight system - others hear you in their language through the soul; KS respond immediately to call for assistance; Treating wounds from war with Gans in Ukraine; Treating Plasma burns; Ex-Prime Minister Sharon treated as human being plasma used to reverse coma; We are obligated to treat all wounded people regardless of military status; STM punishes physicality for taking another life; American soldiers with mental illness for killing; Countries that don't dub movies - people learn languages fast;

See light of your own Soul - "I am you" - enlightenment;
People in flight room report seeing their own soul, it speaks to them I am you - they get enlightened to the truth of their creation; Their life changes; First time man meets his own soul - it listens to physicality and takes him around U; Collaboration between STM and P; Soul can be in more then one location; Mr. Keshe waiting for time when Beautiful People (Schizophrenic) go into the system - reveal truth to parents and medical professionals - to stop abuse.

ENGLISH TRANSCRIPTION

(:18).
K- …. As Rick said, we have some good news. The news is as good as one can understand it, and one can apply it. As we saw in the intro, where we're talking about the scientist of the past, what they did, what they could imagine, what they thought is possible, how we added a knowledge of the man to the point of the centuries, to get to the point where we are today. We talk with the Space Technology and the rest.

As I've said before, and last night in the 11-11 interview (means Rick's show), in a world of mankind, if you travel in places like in (where) people still travel on the back of a donkey. Man was that donkey, sitting on the donkey and moving, and a fast car passes. To the man on the donkey, this is something of a dream. That's what he might achieve in the future, if he does something or whatever. Otherwise it's just a dream. (:20). We brought that knowledge.

Then now, the man became again with the present knowledge on the back of the same donkey. Because with all the technological development we have, we look into UFOs, and others they have, and they're still on the back of this "donkey" of ?? the engine, and burning something.

With the new T, which we have taught you, now the Universal Community (UC) in the level understanding of UFOs, are those on the back of the donkey. Seeing mankind traveling with the speed, with the knowledge, that they dreamt about.

The difference between the teaching of the Keshe Foundation in past years and present time, is that the dream of the man to move from that donkey to that advanced technology so that he could go. (He) has achieved (it). We have realized it. We have delivered it. We have tested it. It's not theory anymore.

Now the UC looks at mankind, (as) those with such advanced T. What was the grace of God, that He they did not teach us this? When you see up to now UFOs in the sky, you marvel, how much do they know. How come we are so behind? Now these U Communities in UFOs, marvels how did mankind, did such a huge leap in understanding of technology. Where they marvel, they will come to humanity to learn, to take the next step, to become what mankind knows today.

In the process of the teaching, we have taught you a lot of things in stages and in steps, and a lot of things has come for you to see other things, and understand. You take according to what you understand, no more, no less. (:22).

We have opened the Linz what we call, flight simulation. This is a flight simulation of the Soul of the Man (STM), the mechanism, the technology, which was hidden within the man, now manifests itself. The beauty with the new technology is, that you don't fly anymore, you go to places, you decide instantaneously. And we have tested this extensively in past few weeks in Linz. We have now 70 - 80 people going through the process. It's giving us a very rough guide, where we are, and how we are.

When we come back, where we are off, for the next week, and the week after. We'll start to attend the transmutation of the human from one unit to another. We succeed or not, is not important.

What has happened is understanding a knowledge. What is important is finding, and seeing, and comprehending what has happened. As I explained yesterday, to our top man in Keshe Foundation is, we bring you in as a man, you go through the system, system 1, or unit 2, and unit 3 (Chairs 1-3), and then you go into the flight system. In unit 1 we allow the physical balance of the energy of the cell of the man. In Unit 2, we bring collective cells in operation to be unified. Then you feel as a human being, some sort of the feelings of energies.

In Unit Three, we extend this to the whole, what we call, physicality (P) of the man to become embedded in the STM. (:24). And then when you move into the Unit (main flight systems), you are in a condition of the soul, if you manage to go through this.

Now, as we have two Units in the same room, we don't need to carry this what I call, 100 kilogram of weight (human body). I only need to transfer the energy fields.

It's very much like as I said before, when you have an envelope, doesn't matter if you put a check in it, letter in it, dust in it, because it's irrelevant. Where the physicality of the man sits within this package. Now the envelope is the energy of the STM.

So this is why it looks so amazing to you, as how is it possible. M fields packages of plasma have no weight. They don't carry mass, they carry fields interactions, and if you can match the G field dot point, you can always move, instantaneously. We have done this in those examinations of the people who are with us, they come in the system.

Sometimes I move in the system, I don't talk anything in the room, I just watch. And I see how this group of people, six or eight of them will behave. And next time to the next group, I go in and I ask them, would you like to take a flight. Some of them straightaway say, no. But don't forget they are in this condition, and they hear the voice of the man. (:26). Because now the body is just like when you are in a room and somebody shouts

from outside, you can still hear the voice, you can react to it, but you're not outside to do something about it, because you're cocooned by the room.

In trials, we have explained to people, we want you to go and see somebody. In the past week, we tested this very clearly. That go and see somebody you like, somebody you love. We had yesterday, two beautiful Knowledge Seekers from France with us, husband and wife. It was extremely interesting to listen to two of them. When we asked, that go and see somebody you love, both husband and wife, they went to the parents. They saw the parents who died a long time ago. They felt them, they touched them. They felt the presence of the grandparents. And they asked them, "would you like to come back?"

Now we travel with the space of the knowledge, with the control of us. So what I said before, is that before you go into the system, or the into the state of what we call, transmutation of the elements of the body of the man, in the dimension (D) of the Soul, which is Totality of the energy. Then you don't need to wait one day to dream about the mother and father. You can go every night to sleep with the mother and father, feel the love, feel the tension. The sons are away, the children away from you, you feel the souls, you feel, you touch.

Yesterday, we had an experience with somebody who came the first time, he said, "I feel nothing, the system doesn't work." We're not here just because the system ?? works. We have to understand why, we haven't managed to cover you. He came back yesterday, after two weeks, three weeks. He went in the machine, (:28). he came out. We had five people who could not have any emotion the first trip. Yesterday, together, all of them in one room.

The ones who had time to go through the process through their soul, came out totally different. They were here two weeks ago, three weeks ago, the fresh ones had a problem. So it means the souls had to be adjusted, they needed to understand what is going on. I may invite them to come back again, to come and do it. The interesting thing was, all the three who went in the second time, after two or three weeks, they came out with interesting, interesting conditions.

One of them went to his house, he moved his flower pot, or whatever in his garden, and he said, when I go home, I want to know if I moved it. First time (he came) it was nothing, he was just sitting in the room. It means the Soul of the Man has to be educated, that the time is not when you leave, everything is finished. When you leave the room, the life, the true life through the D of the soul starts.

We had the other two will same kind of experience. So we confirmed. We can confirm, that we can reach, it can be done, and we have to find out the process. So in this process, you have become the traveler of space by the wish, not by the dream. We ask people to fly, instantaneously they do.

In a way, when we bring you to the room, maybe 100 of you, and we say, now we would like to see how many of you can go to New York, we meet in New York for a party. All

of you who came go to New York to a party, will end up in New York. How many of you came to go to Venezuela, or to go to Teheran. We tell you the passengers of Tehran, be ready to move. You'll move to Tehran, instantaneously. And the systems which are built in Tehran to receive you, (:30). we'll change it.

Interesting enough, in the recording we received from our team in Iran, the Iranian broadcasting has put the four new technologies, which Americans are so much after by Iran. The first one is the Keshe Foundation technology. We can let you play the recording which we received. Which means Iran has taken a position as a leading scientific space program.

But even the new present knowledge in Iran is obsolete compared to what the Keshe Foundation today is offering in Linz. In the coming weeks now, as I said, our team and even people who came the first day, now saw the system, they said, the whole thing has changed. Because we are upgrading, we are changing, we are understanding where it needs to be adjusted.

Hopefully after 12th or 13th of July, we are ready to fly humanity in a matter of what we call, the Soul. These are experiments for us, we don't know. We cannot confirm in one way. But now we set our systems in the direction of the plasmatic fields.

Release new Plasma enhanced System - reduce power consumption

In doing so, and in the past few weeks, I have received many requests from the Knowledge Seekers (KS) around the world, "Mr. Keshe, we cannot afford the fuel, we cannot afford the energy cost, which has gone up by folds and folds. We cannot survive. Can you release the energy systems that saves us a lot of energy, saves us a lot of money. Keshe Foundation responds back the same. The new generators of the Keshe Foundation what we call, "Plasma Enhanced Systems" will be released in July to the world population.

We are doing tests without our team knowing from each other, in different parts of the world. (:32). The first 25 what we call, Enhanced Plasma Systems to 50, will be delivered out of the Iran factory. We set it out. It's not anymore a MaGrav it's actually what we call, it's a system. It's a box system. It has systems in it, which allows you to enhance the what we call, energy in your environment. Which means can reduce the fuel costs by extending the use of the battery in hybrid system, it increases the use of the electric motors, if you do let's say, 1,000 kilometers on one charge. Now you can do two, three, or 4000 kilometers on one charge.

These have not become what we call, free standing generators, because we don't see a need for that at this moment. But you can use them. In a way what we see. What used to be about 1 euro fuel, now it's 120, and it's draining the family resources. We are putting back in what you might pay, because when the prices go up this way, stays up for a long time, and the same with the energy costs. Governments are trying to make a lot of assumptions, and tax relief, to take the pressure off.

Keshe Foundation releases 3,000 of these units, from next two, three weeks, till July. We have brought in the Arizona (AZ) manufacturing back into operation, but in Mexico. John has done the stock take of what he had before, and the new system will be added to it. And Tehran and Austria will go into production within the next few days to meet the demand of the new Enhanced Plasma Energy Systems.

We have done before, when we went out for generators around about 2,000 euros. (:34). The new system is offered at 5,000 euro and it will stand as a first set of discounts, at 4,000 Euro. We guaranteed delivery first out of our factories before end of July. We will deliver prior to end of July, but we would like to keep everything safe. Keshe Foundation Store has opened up its links for you to place orders to get it.

What we would like to understand and to know from all of you, is that, you report back to us, this is a trial system. How, what you see, how much more (savings), how much extension (of electricity) you have had (from the systems.). The new enhancement energy generators for the home is very interesting. You work with the energy of the house during the daytime, which is nothing, but your system backs up with for the nighttime.

These systems at the moment are between 1 and 2 kilowatt we can support, maybe 3 kilowatts. And then in the coming time, if we achieve what we target to do in the development, by next 12 months, and we achieve a free standing unit, we replace those who bought these, to upgrade, to what we call, the new freestanding unit.

Which means, now, we are responding back to you (to your call for help). The other reason for the release of this development is, because if you came in to the Enhancement Units, you always saw two MaGrav units hanging around the system. These systems now have been changed to the Universal System. And now we change the energy production plasma to the same.

We are not selling you any MaGrav units. We are selling you a technology as a package, which enhances the energy use. Which means, let's say if you are spending, let's say three kilowatts a day on line, if you have two kilowatts, will be done by the system. (:36).

The system will be improved. We responded fast to this. I developed this technology sometimes ago. I gave you the MaGrav system, you did not understand what to do with it. Now Keshe Foundation has completed the cycle.

We have a specific reason why we don't claim a generator or whatever. This is because we are developing a new plasma Technology enhancing the energy production. In the coming days you will hear why we do this, because Keshe Foundation is one way or another ?? international organization system, that we will be part of, and it'll be done.

So what you asked us to help, to back in, Keshe Foundation has responded. Go to the Store, place your order, we guarantee delivery by order. We release orders. If we receive a thousands orders this week, whoever comes first, (is) delivered. We can deliver between 50 to maybe 100 a week, starting August, September. But initially we do 25 to

30 a week till we get everything in order, and our what we call, material backing is in order.

Keshe Foundation Austria goes back into production of these systems in conjunction with what we have as the Test Center, which is now building the systems for flight.

The whole process is, we try to achieve zero demand, Free Standing Energy System for cars, and for home. In a way the target is set. I gave you seven years. I told Jalal and his team, they are doing beautiful work in the background.

We will deliver what we call, free wireless energy transportation in a very short time. These systems free what we call, energy transportation, is getting tested as you go into the reactor center, into the test flight center. (:38). It's not something that (we) remind you in the future. It's already has gone through the test. We have seen the performance. We know what's happening to it.

And in a way, what we see. What is in the patents about 15 years ago, 17 years ago when we released them, we spoke about wireless energy transfer in the home. We see a need for you in maybe next 12 months, to take all your electric equipments in the house, out of the circuit in the house, and adjusted with a Unit which Keshe Foundation will develop and give to you. To adjust, to just attach it to, actually at a point at the end of the wire where you used to plug it in.

You think and the light comes on - thought controlled electricity

To receive energy, run your fridge, your freezers, run your electric lights by demand. You think the light comes on. This is what you are doing in the Enhancement Units when you come in. When I tell you, go and see your mother, your thought clicks on. You come into the room, you think you want the light on, and how dim you want it, you'll get it.

This is not something will happen, it's already applied, tested, it works in the Enhancement Center (EC) in Linz. Now we're commercializing it, but it has been in the patent from the original date some 15 - 17 years. So you asked us to release, confirm the MaGrav technology works. It has worked in the Space Center, now it works in your homes.

Once we complete the development to a free standing, any of the first 3,000 Units, which we released today, will be replaced with a free standing one, freely by the foundation.

But now use this technology if you got a hybrid car. Use this technology if you got an electric car. Use this technology if you have at home, if you want to plug in. (:40). It's not as good easy as you had it with a MaGrav. This is a system, it's not a MaGrav box. It has electrical, electronic systems in it, which controls a process, adjusting the field. The only thing, which you have to purchase when you receive it, is a large car battery that you keep it as a support. That we cannot supply, because it ?? moves ?? in different nationality's, different what you call it, countries. We don't want to get involved in moving, what you call, acids and different kinds of things and batteries with us.

KF Health Centers in Italy and Uruguay

So, the whole structure is, you asked us to release you the energy system in this harsh time. Keshe Foundation has responded. The other thing is that many of you asked us, where can we get health support with the technology of Keshe Foundation. We have entered and we have reached agreement with two groups, one in South America and one in Rome, Italy. The agreements reached late yesterday, is going to be done. Any diseases which Keshe Foundation announces. You can book on the website of Keshe Foundation for the health centers run by the doctors in Rome, for given what we call, conditions.

We don't enter medical application. We are the providers of the technology. We are supporting Knowledge Seekers teams of doctors around the world now, to set up the centers. It's the initial stage. From next week or the week after, you can go to Rome for specific diseases. You can book in, the way you booked in the Flight Center. It will be announced by us. You can go on the website of Keshe Foundation, or on the Wellness Center in Rome and book yourself in. Fibromyalgia, CVS, Alzheimer's, (:42). autism, herpes, and others will be added to it step by step.

Hundred percent guarantee or refund - high costs

If you suffer from Fibromyalgia. The fees of the Keshe Foundation, wellness centers in collaboration with doctors in South America, in Central America, and in Rome will be very high. But there is one thing written in our contract, with our teams of doctors, is one thing. If you do not deliver full recovery, you are refunded. Which means, we guarantee to our doctors using the technology, the process on the technology, by the doctors applied, sits directly in line with, for eradication of a condition, not just temporarily. When they sign you in for Fibromyalgia, for CVS, for Alzheimer's they give you a guarantee of 100% recovery. That's their job. We are technology providers. Keshe Foundation has a certificate from naturopathic organization of Belgium to provide such a technology. It's our right on the license we have.

This is what in the court of Belgium was not disclosed. Defrauding by a nation. In this process with deliver CE certified technologies and machinery, to centers. In December the 15th the first center in Uruguay will open up. And from there, we expand into Brazil, Mexico, and the rest. All our centers, which we collaborate, will carry what we call, a call center. You call in you have a problem. (:44). Every time the patients are monitored 24 hours a day.

We are not here just to sell technology. We are here to guarantee the health of the future of mankind. In next few days, you can go on the website of the Keshe Foundation and book yourself, the way you booked for Linz, into the health center, Wellness Center of Rome with the expert doctors, that they will carry the process and they guarantee 100% recovery, as doctors.

We are providers of the technology and we don't get involved in medical applications. As I said, the team I had a long meeting with them at night last night. They came the day

before to us we know the team for some times from Italy, and agreements have been reached. We complete within the next few days, and from next week or the week after we see how the doctors will handle. We advertise heavily through the Keshe Foundation structure worldwide, that these things can be done. And we give 100% assurances for recovery, from Keshe Foundation technology used by the wellness centers around the world.

Keshe Foundation Wellness Center in Rome will have two locations, and handled by expert doctors in the fields, which they accept. They'll be trained by the Keshe Foundation in use of the system. And you will see the most advanced technology systems. If you've been to the center, you've seen the what we call, these units. Now, you will see the application of these units in your wellness centers. We bring the new advanced technology in line with what is there.

So we have confirmed and conformed with what we set out to do. (:46). The energy systems Enhancement Unit, and the wellness centers around the world. The beauty with Italy is, it's near to us, we can control it for the first three to six months, that once we deliver the technologies into Arizona and the other places, we know exactly what we have, what we got to do. It's not for us to talk to somebody in distance, they are a few minutes away from us, an hour flight we can get in there and come back and see the whole structure set properly, in the next 2 to 3 months. The way we've done in the Linz Center, we polish it, and we deliver one of the most advanced centers of the world, what we call, health in using the technology of Keshe Foundation.

I thank the Italian team of doctors who have taken this step as the research center, and the Wellness Center in collaboration with the Keshe Foundation. You will see the sign of the Keshe Foundation at the entrance of these health centers around the world, assurance guarantee for what is set to be delivered.

In the coming months, we add more and more conditions into the work of the health centers, which are our collaborators. We don't take you up as we provide the service. We are here to book for the people who deliver the service, and everything will be fully monitored by the Keshe Foundation and operation of these companies.

We have brought one of the most intelligent women I know, in understanding the work of the health organizations around the world. She will accept, she has accepted, she already runs an organization like this. We bring in her expertise to make it worldwide as a health center in collaboration with the public, with the people. We thank her for coming to the Center, for seeing what we do, and immediately she brought the people, (:48). who are responsible for the development of the Center in South America. Everything is done, we are just waiting for them to finish the building, that we can deliver. Italy is already finished it's operational, we just add the Keshe Foundation technology and systems into it directly. We'll promote it heavily around the world, that from now on what we said, it's delivered by the doctors, we are providers of the services in the background and developing new technologies to be there.

We are scientific organization we don't want to get involved in delivering of the technology. We will do the same with agriculture. We do the same with energy in a very short time. Once the first 3,000 units are delivered, we see how everything is perfectly done, what we need to adjust, if there is any adjustment, then we go into what we call, licensing big manufacturers to manufacture these for Keshe Foundation under license. For us to develop the next steps, for us to bring a new dimension into everything which we do.

As I promised, you got your what I call, Energy Enhancement Units you've been asking me for years. MaGravs don't work. MaGravs will work or not. The new system of the plasma technology using the same understanding will deliver. We have tested yesterday in one of our research labs. Other labs are doing other tests for us, that you will see how clean production of energy can be.

I asked to Keshe Foundation team in the background to switch on the screen for the sale of the new EU for energy, for automotive, and for house use, and we deliver directly within next 30 days. (:50). Leaving our factories according to the order. If the order is above our production, we inform you, your delivery will be due in this week, or this time, within that time. Those of you who placed the order will see it. You'll get it within 7 - 10 days, you'll get the response, your order has been positioned for delivery in such a week.

We set up the production lines for this purpose, now it's there. Because I could give another, find somebody to do. The production line in Tehran is set, is working, the production line in Austria is set, is working. We have the facilities and materials in Arizona, which will be shipped to Mexico to deliver. We'll deliver 3,000 units by Christmas. We tell you how and where.

This is a trial system, we want feedback from you, how much efficiency, what you have reduced in fuel costs, what you reduced in the electric bill. To come back to us, to see what we can do, how better we can improve this enhancement energy units.

We are not selling your MaGrav system. We're not selling, promoting a free standing (power generator). These are enhancement energy (units), and we want to know how much we can enhance the production of energy, that allows you to reduce from your bills.

What we calculated is within next 6 to 8 months, if you understand how to work with it, you can use one system from the car and put it back in the house, and use both ways. Because the system while you're traveling has already set up for the house use while you're away. So in a way, you can cut costs from both ends. (:52).

Everything can be done, our team we have a beautiful team of experts who will do, will deliver this. You will see the next step on a stage of the development for the Keshe Foundation. The what we call the expansion in the science in past three weeks, four weeks in Linz has taken a different shape.

In the next maybe three weeks to six weeks, we deliver transmutation of the element Unit for sale. Most probably our team will be able to complete it, if not it will take a little bit longer, because they have to understand what the whole system is. As we can transmute from one unit to another. Now we should be able to transmute materials. Transportation of the elements from factory to the house direct does not need Alibaba. You do not need to buy Amazon and pay a future cost to it.

We see in the next 12 months to two years, the factory directly in China or in South America will deliver to you in London or in Tehran instantaneously. The end of the postage and packaging is on the horizon. We see the next step will create huge amount of jobs around the world, by the development of this technology. Once they see the working of it.

We allow scientific world to join us, to bring this into a rapid conclusion. The Linz Center is the cornerstone of the new space technology for man, through the STM, through the energy transformation. Join us we're getting a lot of people wanting to come and see and do things.

We are not a health center do not come to us, I have cancer, or I have this. We do not want to know, because it's not our job. The health centers are set up for them. If you come in and you go through a process and you find recovery, that is an addition, it's a gift into the space travel.

Your soul wants you not to suffer - not our technology

As I said, (:54). your soul wants you not to suffer, not our technology. If you suffer from a condition, and you go through the system, and you come out, and that condition has gone. It's not our system, that is we created the environment. It's you and your soul, which has decided, enough of suffering.

We had a lady with us with asthma pump yesterday. I said, you can't take it with you in the room. She came out she says I can breathe different. I said, let us know if you ever use asthma pump again. It's the soul, which wants the change. We have people with different conditions come in, with all sorts of conditions, and they come out and say, it's gone. It's your soul which does the repair not us. We are not a health ?? work. We are a space agency traveling.

I thank the Keshe Foundation of Iran, Keshe, The Iranian government for the first time has allowed independent space company to be set up in Iran and be registered. Keshe Space company has now been set and established in Iran. For the first time, a private space organization, with the permission of the Iranian government has been allowed to operate in Iran. We'll extend this to the space travels, and we extend this to bring more technologies out of you.

I have given one undertaking, a surety that we will collaborate with the nation of Israel, not state on Israel. We collaborate with American as a nation, not as a state, as long as it is warmongering.

Iran will take the next step, and reaches out of the hand of friendship across, special offer with the new technology. (:56). You got to understand by delivering the new enhancement energy systems, the structure of the whole oil industry in Persian Gulf will change within the next two years. We take lead as a nation of Iran to deliver, that no one, no nation suffers. The standard of living has to stay the same, and life has to be carried on.

You will see what is about to be delivered in the energy space plasma, will take a new shape. You went into the systems and you've seen the reactors around the system, setting up when you go into systems. All these will be changed into a total plasma condition, that you have no matter state, in the what we call, enhancement centers.

The progress in technology cannot be stopped anymore, because it's not in the head of the man, it's in the machinery, which works, and delivers. Transportation and transmutation (T&T) within the next few years will become obsolete the way we do it today.

What I see, the use of the nuclear reactors, nuclear technology as energy, as a cornerstone for the next step of the man endeavor, to be able to travel the depth of the Unicose, not the Universe (U). There are reasons for it, and we explain, as the science of man matures.

No way there can be nuclear war

All the time I've been asked, are we on the verge of nuclear war? There is no way there can be one, because no nation would go, crazy to do this. It doesn't matter what stage you stand on.

Make all nuclear reactors safe - plasma dome to contain it

The fear of it will be taken away, (:58). as we deliver systems as we did in Fukoshima, now in a more advanced way to contain all nuclear reactors at their site. Nuclear technology is safe, once you can dome it, not by concrete but by magnetic fields, which can absorb it, the way we have shown it in Fukoshima. Keshe Foundation in the coming weeks will deliver this technology to every nuclear power stations on this planet. We become nucleus safe technology, what we call, organizations. We deliver what we call, "the dome of peace," the dome of non-nuclear.

What does this mean? If you're running a nuclear power station, with all its facilities, we provide you a field dome. The fear of explosion by nuclear reactors will become absolute zero percent. The failure we have seen in 3 Mile Island, the failure we have seen in Chernobyl, the failure we've seen in Fukushima will happen, it is inevitable to happen. But this time with the technology, which a Keshe Foundation will deliver to nuclear centers as a nuclear technology, delivered by Keshe Foundation, we create a dome of safety.

So, every nation can have its nuclear technology, as they want. Keshe Foundation will support with Iranian nuclear industry, the support for the dome. I deliver this technology through the Iranian nuclear center. And we become not the one to be afraid of, (but) the one you need to guarantee, you need the nuclear power in your centers to be safe.

As I said, do not play with Keshe Foundation, because the technologies we have, now they are delivered. You encourage your nations to open the nuclear centers, (1:00). nuclear reactors, but you ask for the safety assurance, that the Keshe Foundation from the time of commissioning and loading, has guaranteed the safety of the power station. This nuclear power technology safety, will come out of Iran nuclear center in Natanz.

If you do not know where Natanz is, as I've seen many of you have looked at, and Azar posted it everywhere, to share it. It's just about a few kilometers away (from Tehran). We will protect the Natanz center with the new defense plasma technology, that no one can reach. The same we'll do with other nuclear power stations around the world.

The cost of the system to be delivered, has put as 100 million euro, delivered by the Keshe Foundation, compared to 300, or sorry, 30 billion cost of a power station to guarantee its safety, that no nuclear radiation leaves the premises. For 100 million is nothing. We deliver technology.

I developed this technology over 25 years ago, and during my student time, because I could see radiation leak from Queen Mary College nuclear reactors, right in the center of London, in my land. I could not accept it. I set out to develop a technology, that the reactor could be there before it was decommissioned. But now the technology, with what we have is there. We give a guarantee, and then on taking and testing by all the nuclear centers. We invite IAEA to come to Iran to test it themselves.

This brings a lot of safety to Iran nuclear technology, where the threat by the other nations to bomb the Iranian centers, (1:02). becomes obsolete. I gave the space technology to Iran exactly 14 years ago. For its celebration we give back another technology to Iran, that IAEA requests Iran to deliver the fuel, and the new plasma technologies for doming all nuclear power stations. You cannot operate, if you do not receive certification, a guarantee from what we call, the Iranian nuclear centers backed by the Keshe Foundation technology.

What we do, is what we have shown. Now you understand why it was important to open the Linz Center to do a lot of testing, to understand the process and to see how we can bring new technologies, that is at the reach of every single one (of you).

5plus1 talks should resume soon

I'll be traveling to Iran, once the negotiations are complete. We have a feeling, that the Vienna talk will resume in a very short time, and Americans have stepped down from

some of their demands in the past few days. And we will see the resumption of the peace talks and completion of it in the coming weeks.

This allows us to release the new dome of peace around the nuclear power stations around the world. It depends on the decision of the Iranian government how we deliver this to every nation. It will be part of we, as I said to Iranian leaders, I never negotiate from a point of weakness. I negotiate from the point of strength. It's been my habit for years from my childhood. My father always told me, your the toughest negotiator, even for your expenses for your pocket. I've never even, I don't have that with your mother.

What we'll do from Iran, (1:04). we don't negotiate to take sanctions off. We negotiate for you, if you want the guarantee, that none of your nuclear reactors will explode. None of your nuclear silos will go broke. You need to sign the contract with the Iranian nuclear centers. I am a Nuclear physicist. I am an Iranian nuclear physicist, proud to be part of the human race, but forcing the technology to bring peace.

As I said, I gave you, as Rick said, I have many good news. You received your Enhancement Power Unit, you received the ?? wellness and health centers in Italy. Now, you have received the gift of safety for every nuclear reactor operating on this planet. The dome, which we have created in Fukoshima, without them knowing, now officially comes into work.

We have to understand how the process of Creation is, then we can deliver a system for it. This is what we've done in the past few weeks. I waited a long time to deliver the Enhancement Unit center in Linz. It wasn't a dream. It was time to wait till the humanity gets to a position, that have a need for it. Otherwise, it's another thing.

You are in literally, position of, no food, and no energy, if Ukraine situation carries on. Most of the western world will suffer with shortage of energy. We've seen that shortage of energy in Iran, and in other world, parts of the world. One day shortage one day cut. The day they cut you, you have no electricity, you put your enhancement energy Unit to cover it. You have no worries, (1:06). you support your nation. You support the backing of it, and then you're ??? When you don't need it, using your power unit. You will let your nation not waste money on buying fuels, which is doesn't need it. We don't put pressure on the grid. We don't put pressure on the nation resources.

We've seen people who've been through the system. We had the Italians yesterday. We have others which have gone through the system. Many of them speak about, they don't want to eat, they feel no hunger. We had a guy yesterday saying, in one system I was ?? not hungry, that I don't even want to eat. I just came out, I just want a glass of water.

In our system, in our flight system, we have foreseen feeding process of what we call, physical damage of the system itself. System itself, repairing. In the system, we have facilitated for food. You are not aware of it when you come in, but we actually feed you. In a system, there is what we call, a wellness factor. That's why you come in, and you say

you have this and that, and now - no. We allowed for you to be healed through your soul, not us, we are not involved in it.

In the same system, we have a flight system. And we have a flight system to do with the physical dimension (D), a we have a flight system to do with the D of the soul. Those of you who have been in the past two or three weeks, and you come back into two or three weeks, some people are rebooking to come in. We had one yesterday, he wanted to test again. You will see the changes in the system. We are setting the system for flight, controlled flight, pre-testing flight.

And you will understand that as I said, (1:08). that when you travel with the Keshe Foundation, everything else is looked after by us. We have built it within the structure of the system. It's not coincidental. Many of you will not feel hunger, because you will have learned to tap into the energy of the soul to feed yourself. This is the reason for it. You are feeding yourself. You'll find out you might lose some weight, because energies you were eating for, is not needed.

The technology has become a cornerstone of the change. And we are still not even in the crawling stage of understanding this technology. We just are witnessing its progress. When the man understands it, starts moving with it, start crawling with it, and imagine what it does when ?? ?? , and when he goes for the high jump.

The process of the technology delivery is rapid, from now on we don't hold back. From now on, we don't stand back for you Knowledge Seekers to test the MaGravs, and come up with everything. The enhancement power units, which are delivered now will give you assurances for a lot of things, which you have worried with.

In the coming time, we'll add a system to the new what we call, Enhanced Energy Units, which you buy, a unit which feeds you. The collaboration between the two (units) will stop man to kill. In a way when you buy the first Enhancement Unit for energy, you have preset yourself for the second part as a feeding station. What we showed you here, now will be delivered to you in your homes here.

In the coming time, on the fourth of July, you will hear announcement about the Keshe Foundation joining one of the world's leading projects. In that process, we'll provide these two systems, that nobody in this structure, which will be announced in Fourth of July, will ever need to bring food within the D of the system. Where we will provide in the coming time what we call, Enhancement Wellness Center. Which means in this city, there are no supermarkets. In this city there are no hospitals. This is not a dream, because many of you, some 70 - 80 of you have already been in it.

Have felt, have brought the changes, and once you leave this room, you're still connected to this room. It's a plasma and above the strength ?? the other, each one of you, coming and going are connecting to the same center.

As I said, (1:12). understanding the fundamental process of the creation has brought man to be a leading scientific what I call, race by a leap, that man never could not have ever imagined. We have delivered what we promised. We have delivered what we came here for, and we will deliver the totality in understanding the process of the creation, step by step. Step by step we'll do.

I'll read you something that just came in from the Linz center. This is a gentleman who came in for a second time yesterday. It's just a small report sent to me by our team in Linz center. He says, he has reported, he forgot to tell us, but it on his testimonial. It says the gentleman who was here for a second time yesterday, told me that he forgot to tell us, that he has lost 4 kilograms from the first time using the flight unit, he is less hungry after the first use. He is happy, as he had too much weight anyway. And he is constantly connects himself (with the system) when he is at home.

Once you leave, this is what we call, Testimonials, from the people who have been in it. Once you've been in it, you're connected to it, you become a man of peace. And the stage for the dome of peace has been set in Linz. Where Linz was the stage for the first large scale destruction of the human race. (1:14). Now the phoenix, from the ashes has risen. And this gentleman is Austrian.

The beauty of the technology is, I wonder how many of you will walk into the shopping centers, and how many of you will go to supermarkets, or maybe (there will be) just pictures on the shelves, (showing) that man used to have these things. The beginning has started, and we see from the Testimonials from other things. And we had a Stefania from us, Universal Council for Italy, being with her sister, here sister telling her, "you have changed, you've become much younger. So you gain age time too.

Try to understand the new technology. I have taught you everything, it's you who has to expand the knowledge. As we are doing. It's you who has to understand the principle behind the knowledge. We do not want to teach you, as you've seen it, this time, that you copycat and do all sorts of things with it. We tell you what we achieved, we deliver what we achieve. People are testing it and coming to test it. So it's your time to understand what we understood, and it's your time to catch up.

Everything, if you listen to collective of the knowledge we shared the past years, it's in this room. Nothing, there is no magic, there is nothing hidden. If you even look at the simplicity of it, when I spoke with you a few minutes ago, (1:16). that if you've been in the Enhancement Units, as I told you, you have two MaGrav systems. You use these MaGrav systems for your power. We use these MaGrav systems to create field energy, and we use another to another part. So now you understand the whole of the room is dynamic.

People who stay in the center of the two systems, they talk about very powerful energies. Yes, because in a way, you're here, and the two systems are here, you're on a crossroads. Of course, you will get a full combination of what we call fields trap.

We have tested flight systems by captains, as I said, explain to our Italian team, the captain always sees everyone. When we ask the appointed Captain when they come out, they always tell you a woman or man, that we have people, or they see the people who they have taken the responsibility of their soul. But the people (passengers) are not aware of, that they are traveling with the … captain.

Interesting thing is, if you go back to part of the teaching, from a long time ago, I'm sure you can dig it out. I said to you, that in the flight system you trust your soul with a captain, and that Captain will deliver you everywhere. Now we have seen this. The captain is aware of the souls he's taken or she's taken responsibility for. In so many ways, (1:18). it becomes irrelevant on what we take, and what we do, as what we see is responsibility of the captain for everything.

First animal Mozhan - Dog space traveler

What is interesting. We had this week, our most beautiful what I call, first passenger from the animal kingdom. The gentleman carried him in, or her, he talks about feeling the dog changes in breathing. The first animal Mozhan has taken shape, flight. We have other people are coming with other animals. And we'll see how this take shapes. We want to know how the animals behave afterwards.

As I said yesterday, when the first person, or when the first creature went to the space, was a dog. Now we have the first Mozhan dog. He is such a cute animal, so tiny. And he is so light. When he came out in the bag the second time. The first time he was carried, she was carried in by the owner at the head level, that she could go through the whole process of the what we call, plasma condition. The second time when she came in yesterday, she was in a bag, and when she came out, and they put the bag down. She was looking at me in such a strange way, I could feel the soul of the dog. It was amazing. It was like a thankful for the experience, the way the man speaks in their own language.

We will have no limitation in expanding the knowledge. (1:20). We have no fear of failure, because we have not failed, we have to understand. When I tell you, the people who came in the first time, and they could not feel, and they came this time, they could feel. Because we adjusted the systems. We understood where there was a problem, it's not coincident.

So, we will be able, you will be able to hold your dog in your arm, and know what is wrong. When he hurts, he will not tell you by word, but the way you felt the soul of your mom, your dad, and you spoke with them, and they tell you they want to come back. Your dog will tell you where he hurts. When you hold your child in infancy, and she's crying from pain, and say I don't know where it hurts.

When you hold it at the level of the Soul, you know exactly where it hurts. The changes are fundamental. When you have a deaf and dumb child or a person, you don't need to wait for the sign language, you connect to the soul, "I want water", thank you very much

for helping me and the rest of it. The only dumbness and deafness stays at the level of understanding of the man, not at the level of the STM.

This is what the new technology shall bring. This is what is about to come. This is what is happening now. Even the birds give the good news. We got to understand, that the enhancement technology is enhancement in plasmatic fields and is enhancement in understanding of the knowledge of the Creation. It's not a machine. It's understanding of the process of the Creation. (1:22).

Try and go back to all what we taught from the beginning, and you will reach to the same position and time as us. Everything which I have taught, everything you see in the EC, everything you see in the enhancement, what we call wellness centers, everything you see in the enhancement energy systems, is what has been in the patent from the beginning of the time, when we wrote the patents in 2005.

It took to teach, it took to share, we did not concentrate developing one thing, we set the structure, that everything with it, that comes through it, is developed together as you see it in the EU, in the Linz. The energy, the food, the health, the wellness, the transportation, the transmutation, everything is in one machine. It's like making the pieces of a jigsaw and now putting them together. It took 40 years to put the pieces of the jigsaw together. And this jigsaw is still wet, it hasn't dried yet. It needs a lot of adjusting and repainting. And that painting in the knowledge of the man, for man to understand, and become the envy of the universe.

As I said, you were sitting on a donkey and looking at UFOs, but now the people in UFOs are sitting on the donkey, watching how did man leap, frog leap, from zero to hero. Understanding the knowledge of the Creator, (1:24). and the creation. And that's it. There has been no other reason for it, except for love of Mitra, and the Creator for planet earth.

We will heal the damages of man to this planet in the coming weeks and months. We'll make this planet a place where the universe comes to see the love of the Creator for his children.

Thank you very much for today. And we'll go for a short break and when we come back, we'll answer any questions ..

Proofed to here >>

<<< BREAK >>> 439 KSW June 30 , 2022 (1:32).

K- We enter and we see what comes up? … I have given you good news today, and what is about to come? There's much more to happen. But the dream of energy systems, and health centers, was something which the Knowledge Seekers wanted for a long time, now has become a reality, and with that bring different changes into the whole work of the KF.

Ever cell in body has STP - even hemoglobin

Q: … Is gas, oxygen gas in the blood, is that the fields strength of the Soul of the Physicality (STP)?
K- Everything in the body has a soul of physicality, even the hemoglobin and the rest of it. It's not exclusive exclusivity of one atom, or one object, just because you think you see.
R: May I rephrase it to say, is the fields strength of a cell related to the oxygen content?
K- Not really. (1:34). If you look at it as a matter state you do. But we know the oxygen whatever in the body of the man, is the level of the charges of the magnetic field strength. So, this does not have any meaning if you look at it.
R: But wouldn't it be, if the strength decreases say, when we get carbon monoxide and it replaces the oxygen for example, we get carbon monoxide poisoning.

K- The way you talk is in the old science. The way we talk about carbon monoxide in a new science is totally different. Why do you die at the present knowledge from carbon monoxide? If you now understand that it is the energies of the what do you call, carbon monoxide, which crosses the lung of the man, then you can develop technologies very rapidly, that you just put on the body and you change the fields of the, what do you call, carbon monoxide to a useful energy. And that's it, you don't die of it.

You don't need an oxygen mask, you don't need something else. When you work with the new technology, you got to work with the new T. You can't be as I always say, like it camel bird, look at the half of the science in the matter state and what you've been taught about materials, and then the other half, try to fix it in the plasma state of understanding.

With new T nobody should die of Carbon Monoxide poisoning

With the new technology, nobody should die of carbon monoxide (poisoning). Because now we understand, it's not the carbon which enters your lungs. It's the energy of it, (1:36). which blocks the field transfer into the blood, or field transfer in the lung to deliver the oxygen, to the energy level to the blood.

This is a totally different ballgame, if you work purely in a plasma science of understanding of the plasma working, or matter working. Because you never understood when a carbon monoxide enters the lungs, it doesn't go into the blood, it's energy transfers into blood.

Why that energy is not reachable to the blood? Always said, it's like the dimmer on the light you have at home. If you don't bring the energy enough, the light stays dim. If you increase energy, the light turns on and it shines and you determine how bright you want the light.

Carbon monoxide due to his characteristics does not transmit the energy, which the blood stream can pick up. So it starves off that energy and you die because of it. You call it suffocation. It's not, it's actually. What is the purpose of the lung? You don't die of suffocation. You inhale and you block the energy transfer, which is in balance with your blood circulation, which is with the energy from the what do you call, environment you live in.

How would you die in the deep space, when you jump into the space from, what do you call it, from the Space Lab? (1:38). Do you die of suffocation from carbon monoxide? No, there is no carbon monoxide. But now you say you die, because of the lack of oxygen. You find another excuse for not understanding the totality of the knowledge.

If you train your lung in the space to take any energies from Cosmos, from environment, you can walk in the space. You don't need a spacesuit, because now you take energies of the universe. You talk about carbon monoxide, but has nothing to do with it. You take your energy, which is not in line with the combination of oxygen energy levels in the hemoglobin, in the blood.

Because you say you have 2 circulations, one bringing the un-oxygenated blood, and one oxygenated blood. One is bright color, and one is a dark color. Who changes the color? Why the world of science has never looked at it. Hello, it's the same blood. Who is there to change its color?

But if you understand the light from the Sun, you see the darker spots on it, because it absorbs the energy from it. It means what is coming back is the energies which is used. It's not enough to brighten the energy, that brightens the lights more.

We have to understand the technology. As I explained to you, we have a guy who's coming frequently onto the space center flight system, because he's blind. We've seen him now for the 5th or 6th time. (1:40). He has a condition of the blindness, for six years because of a stroke. He has been in the first two weeks, this is his third week coming in this week. He goes through the full flight system, because we're expanding the soul, and understanding of it, and he comes out.

He came on Monday, he said, I have two days I was flat on the floor with a massive headache in my head .. I said that's good news. He looked at me and he said, what do you

mean? I said, you're taking a flight, your life, your soul wants to change. He is repairing it, you're not doing anything. So for him to see the damages of the stroke has to be repaired. And when you repair damages.

I'm sure if we would have spoken to Naomi when the brain was getting built, she would have told us, (she had) massive headaches, massive changes. But she couldn't speak at that time. But this gentleman can do. So the brain ..

Interesting enough, when he came out of the system yesterday, we just asked him what do you see. He said, for the first time he can see red color. I explained to him why he sees a red color. I made a blind man to see color for the first time in six years in less than three weeks using a space technology of the plasma of his own soul.

Our knowledge is like a torch at the end of a dark road. It's you who has to enlighten yourself, find a way to that light. When you stand and a man says, he can see color after six years, though his own condition, his own work, then you understand the technology is so advanced in understanding the process of the Creation. (1:42). And this is not the first time we made the blind to see. Because the soul wants to see through the eye of the man.

But for him to see, it's not a pickup job, all the damages in the background has to be done. The soul is doing all its repairs in the background. He gets a headache of it, because sorry you plugged the wrong plug in the wrong place, the fuse blown up, now we have to repair. Let's see how this goes.

How would he develop to full sight by his soul. We allow the soul to expand and that has brought the condition. Every time he goes in the EU he tells us different stories, where he has been, what he has done, and what's going on.

We have to understand the knowledge in its totality in one or the other, or when we transfer knowledge from one to the other, understand where the changes, where the information sits. We talk about oxygenated blood, or monoxide, but we don't want to talk about the Gans's and energies, which carry as an energy in the body of the man. There is nothing else.

You Knowledge Seekers can produce a (Gans) Pad, anybody goes in a carbon monoxide condition, just put a Pad on the chest, and within milliseconds it's done. You call in the work of the STM, if you haven't understood it. But there's a condition, (1:44). does the soul wants the physicality to stay, or does the soul decides, that's the condition I was looking for to escape from the pains of this life. Or I have another appointment for this body, I want to take him somewhere else.

You can cannot stop all the accidents and ?? ends, just because you have the knowledge. You have no right to interfere with the work of the soul, in the dimension of physicality. We can collaborate with it. We can help it to free it. You can bring all sorts of things to it, but you cannot dictate to it.

Somebody said to me, I wanted to go but I couldn't. I said, because your soul wasn't ready. You wanted it, but he doesn't want. Because you don't know what things are going to bring for you, if you see some time for it to do it. That's what we saw, with the people who came into the system last week, two weeks ago, and yesterday.

3 Chairs have become 1 - like human all 3 are 1

Then if you understand this, then you understand the STM, STP of the man, and the physicality (P) of the man, then you understand it's very easy. Next sessions when you come to Linz, because now you are used to what we call, going through Seat 1, Seat 2, and Seat 3, and then go to the (flight) system. Through the tests now, we know what we are doing, you will find out there'll be no Seat number 1, 2, and 3. All three has been brought into one, as is, in your physical life. You don't carry your physicality separate, your STP separate, your Soul separate, you carry yourself as a human.

The new system when you come in next time, if you've been before, you only sit in one chair, and then you go into the system. You can go to another chair and see what's the difference between this chair, and traveling for your system. But there is no need for Chair 1 (to 3). We had to test that everything we do is correct. Now the 3 has become 1.

This is what I tell you that advancement in technology is for us to understand, that we can do the job correctly. I said to a John few days ago, John you bought so many for Arizona, you're going to get the 1/3. He said, why? I said, now it's three - one.

It's the development in the technology. This is what will go into Rome wellness center. This is what will go to South America Wellness Centers. We're not just putting you just to see. It's for you to. It's for us. It's an enhancement center for simulation, you're simulating the system, you get to where you want. We get to, our team to understand how to put it together the correct way. You will see bigger changes after August, September. New systems will come in, new systems will play the game. This is the understanding.

What happens if you put somebody who's dying of carbon monoxide into one of these systems. (1:48). What would be the response be? Automatic instantaneous coming back to life. When I explained to you, everything we are used to is going to change, you have not understood what juggernaut of knowledge has hit humanity yet. It's a super tank. A tank of knowledge of the universe

Any other question?

Principle of 2 systems like brain and heart - one charges while one delivers energy

Q: … from the plasma School Library of Australia. With the new car unit will it go where the car goes to be able to charge along the way. In Australia we have vast distances to cover and not good coverage of charging stations.

K- The process should be you will understand. The ultimate goal for the cars will be 2 sections. We do that in our brain. We do that in our heart. The systems have to have two systems, that (when) one while it's delivering, the other one is recharging, from the one which is delivering. It's a very big difference. (1:50). In that process, you'll get a continuous supply.

I'm sure car manufacturers like Tesla will divide their system in 2 halves very soon, with this technology. That when one half is delivering, the other one, the other half is getting charged. And the difference between the two units next to each other, will create that extraction of the fields from the universe.

The systems you will get works this way. We can go into the unlimited resources. We don't call it a free standing, because it's a knowledge of the universe. It's energy of the universe, it cannot stand free, it stands within the fields of the universe, extraction.

We'll release the delivery of the first units by end of July. And we'll tell you how many per week we'll deliver, how it's going to be done? What is the monitoring. What is the effect. What we see with what we call, plasma units. We've seen the MaGrav Units been used on Tesla cars, and other hybrid cars with a lot of efficiency changes or whatever.

Now you don't have to worry about what do you call it, "how long will it take." You will need to bring in a combination. It's the same as what we've done, two systems in the Enhancement Unit. Two more new enhancement vision systems, and simulation systems are coming into the center in the next couple of months. It's the same principle.

Free energy is premature

The dream of the man, (1:52). to have a free energy is in a way, premature, because a man doesn't have the knowledge, ?? when he wants to jump the loop. And how we do it. It will be very interesting how we'll take it, and how we understand it.

Any other question

New Members of Universal Councils will double in numbers

K- Can I say something before you start. Something I just forgotten, it's important. The new list of members of the Universal Council for languages will be released in next few days. And the Universal Council will be added by, more or less it doubles in numbers, active members. I welcome all the new Universal Council members to the Council. We hope we find a rapid development within the work of them and the Keshe Foundation.

At the same time the number of Universal Council Support for languages has increased. There's a lot of work in the background getting done. For to bring them into line and the floor is opened for those who are devoted to serve humanity through the language to join the Universal Council. It's your responsibility to what I call, (1:54). bring your language into understanding of it.

I was explaining to one of Knowledge Seekers yesterday, in the EU, that very soon once we tell you, the way we tell you to go and dream, or to go and see your mother, or father, or fly and, or go to somewhere. When you .. are in your Enhancement Units, because now we tried this one, without anybody realizing what we do, we'll ask you to speak Chinese. And if there has been in our system, somebody who's been Chinese, you'll speak Chinese, without you ever knowing it. To you, you speak your mother language, but to the listener through the dimension of the Soul, you speak Chinese to them. This is why we call you to come in as fast as you can.

Now we have the Farsi language. We had a beautiful doctor with us from Iran yesterday. We had Kawos with us yesterday and today. He had the whole run of the system on his own today. We have the Italians, the French, the Romanians, the people from Bulgaria, and we just adding on the languages. So do not be surprised, that in the coming time when the system is ready, when we ask you to go to Romania and your English, and you go to Romania and you speak Romanian and understand all the emotion of it.

Then you understand the purpose of Universal Council, and then you understand why it's been set up this way. We had yesterday the pleasure of our Knowledge Seekers from France, and now if you come in, and we decide for you to speak French, you will go to French, what we call, part of the speaking world, (1:56). and you will be speaking French like the French do. It'll be interesting.

I wonder how many of you will go through and speak Portuguese, as they already have been through the system. Without ever been to Portugal, you understand when you turn the television on, it doesn't matter what the language is, German, French, or Portuguese, because you've been through the system you understand exactly what they say. You feel the emotion, but you never knew Portuguese.

This is the responsibility of UC members, that 's why we asked you to get to the system as fast as you can, to imprint the Soul of the, what we call, the physicality of the Man. This time now, we have received 2 Universal Council members 1 known, and 1 unknown, through the system, and we will see how they'll carry this D of the soul through the .. spoken language. Carry on.

Q: .. Hassan says, he always answers my question before you ask Rick. So, perhaps you've already answered, but in any case, Hassan says, you said on 2202 2022, that you are the bridge between the Universal Council, and Universal Council support. I may add us, and the Universal Community. (1:58). So, when we see you at the soul level during our sleep time, is it you contacting us, or us contacting you?

K- Which Hassan is this one? Is it Hassan from Africa or Hassan in US?
R: Hassan Hallal
K- Hallal, in beautiful country of Gambia. When you do that, it could be both.

If you don't mind disclosing Hassan. He is an extremely active giant guy, as a council member, or U Council member. When we had the Corona crisis, Hassan moved country, to save the life of an ambassador. These are not unsung heroes, these are the Knowledge Seekers, which are committed to the knowledge. He moved, he delivered Gans's to the pilots to be delivered to a man he doesn't know. An Iranian ambassador was trapped with his son, with Corona, on a critical condition. He easily could say no. We had the same from Paul from Togo. Pilots carried the Gans's in the cockpit. This is the devotion to service.

So we came to you when we needed, in a physical dimension. You have established a link, it's you calling on us, it's the same. (2:00).

A lot of Knowledge Seekers in the background through what they believe, and what they do, do a lot of strange things for the Foundation, for the soul, for the humanity. I was, the only way I could save the life of an ambassador, Iranian ambassador in a strange land in Africa, was to get Gans's to him. With just one call, nothing else, Hassan was on the move, to make sure. He does what he could do best.

We saved the life of the ambassador, thanks both to Paul and Hassan. Materials arrived within hours from each other, from two different parts of Africa and both carried by the pilots, to save a man's life they didn't know. A high ranking diplomat.

This is when you established a call, you don't need to make a call, and say we need a help. We are aware of it, and we do the job. You don't need to make a connection, if you call, or I call. Souls do their jobs, as they need to do in the dimension physicality. I thank you for both, for such a rapid response to a dire situation in central ?? ?? Africa. Now a boy of 14 has a father and a man has a son, and Iran still has an ambassador. (2:02). We answered to call of Iranian Foreign Office to move, to save the life of high ranking diplomat in transit, it was confirmed Corona, and he could not go back or forward.

Now you and decide if you call us, or we call you. We called you when we needed you in D of P, so we have established a line of communication. And by the way, I like to tattoo on your shoulders. It's a strange place to put a tattoo, but it's amazing how you've done it.

Any other question.

R: Okay, thank you for that somewhat cryptic answer.
K- It's not cryptic, it's the reality. KS know when I need help for the Foundation, I don't hesitate. I pick a (phone) up and I just call. I don't what I call it English, "pussyfoot around." If we need help we call, because it's the way we set up the souls, that they are there for when the call comes. We give it freely, and we've seen especially in time of need for anything, Knowledge Seekers don't even think, the answer is instantaneously, yes.

What's the other question? (2:04).

Q: .. It says I've heard that plasmas solves wounds and burns in a short time. If you can, please send me some treatment sheets, or give me a suggestion from which materials to extract the information.
K- Can you repeat that?
R; He's heard that plasma cures or solves wounds and burns in a short time. So he'd like to have some kind of paperwork, that describes the treatment, and from what materials to extract that information, or some other suggestions, where to get that information?
K- It's all over the Internet a lot of KS have done that.
Q: . He goes on this. He goes on to say that a colleague from Ukraine wants to provide trauma centers with effective solutions for treating wounds and burns. That's the objective here apparently.

Plasma Gans treatment of military wounds and burns

K- We've done tests with Ghanaian military in trying to do the wounds. I know Chinese military has done a lot of tests using Keshe Foundation technology for military wounds. When we talk about Ukraine, it's a military wound, it's shrapnel wounds, it's all sorts of missiles, bits, and bobs and heat. It's different than the normal wound. (2:06).

The way to do it is very simple. Most of the shrapnel wounds carry components of phosphor or sulphur, and some of them carry components of nitrogen. One of the best way to handle it is to make the Gans's of it. And then in conjunction with the Gans's connect it to CO2 and Zn, and in all the processes collect the what we call, the amino acids, (AA). A mixture of the amino acids of all the elements, plus the CO2 and Zn, will create a field condition for withdrawing the effect of the shrapnel's, or components within the bullet wound, or what we call, armaments, anything with military.

When you withdraw that, it becomes a normal wound, to process itself, and Zn and CO2 with their amino acid. One in a way kills the pain, takes the neural information away, and one allows the neural system to be grown, while there is no communication on the, what do you call, the pain side. You will see a rapid change. Actually, when you do it with the AA, you'll see no scars. They'll talk about they had a wound so big, but you don't see anything. People think you're crazy you talk about nonsense. (2:08).

But this is what it does. It will not, most of the time it does not leave any scars. So if you were in the Ukraine situation is now, understand they need it, and this is why we release the information this way. These are mainly weapon, what we call, application of the weapon technology. And this is the only way to do it.

Plasma Burn extremely painful - disappear after 24 hours

Some of you, which should move into advanced plasma Technology in upcoming time will report plasma burns. Plasma burns are very different burns then any kind of burn you have ever known. And it's extremely excruciating, painful. It lasts a very short time. You can get a half of the skin of your finger out, and next day is as nothing happened. The skin goes back to normality.

I used to get this quite a lot years ago when I was experimenting and I used to shout, and they would say, "you burned yourself again with plasma." Yes, it happens. It's different than a burn with water, burn with fire. Your skin comes off and next day, it's as nothing happened.

Those plasma burns needs a process, a special process for it to heal. I over burning myself, when I used to make a lot of flight systems and ?? abandon systems, it used to happen. I used to get the plasma the wrong way, and used to escape. When the plasma escapes it's like a bullet, it just goes through you. (2:10).

But it's because your skin your body is made of Gans's, it deforms a lot of things. You just see a piece of your skin hanging. And the next day is not. What happened? The skin was not there yesterday, it was all off, and (today) it's back on again. Even when the skin comes off, it builds itself very rapidly, within 24 hours. I have experienced this one hundreds of times.

Once you as Knowledge Seekers, have not advanced to that level of plasma production. But plasma burns will become another part. It's very similar to the bullet, what do you call it, armaments damage.

The strange thing is most of the plasma wounds don't bleed. You have no blood coming out. The skin is open, you see your flesh, but there's no blood. You can't use a tissue to collect blood. If you burn yourself, the skin comes off and bleeds. Plasma wounds creates no blood. I've never seen a single drop, but I've seen half of the skin off my finger disappear, or hanging. It just takes 24 hours or so, and it's gone, as there was nothing there.

If I had these in a matter states, burning my fingers, you should have seen a lot of different colors ?? skin ?? When you shake hands with me, you see me, the fingers are all the same. This is part of new space development technology, which we have to understand.

Use these kind of things for situation in Ukraine, as you said, where they want to help. This is the only way you can help. Find out the shrapnel, find out what was in the shrapnel. (2:12). Make a Gans of it, and use it back, the same for the CO2 and Zn, with their amino acid, and you will see very rapid, rapid, result.

R: Mr. Keshe, I was wondering about what are the ethics regarding, say, military hospitals. In this case that are, you know, patching up people that are wounded in battle? And that kind of thing? Does that intrude on the World Peace Treaty? Or is that the correct conduct to be doing in that situation?

K- I have a very good memory from his eminence Ayatollah K of Iran. I've said that before. When we saw the first coma patient in Belgium. About the same time the Israeli ex-Prime Minister Sharon was in coma. If you remember, he was a huge man. I met with

the Iranian Ambassador in Brussels, and I put a request to the Iranian leadership through the Iranian ambassador, that "Mr. Shawn is in coma and we have the technology to help, to bring him out of coma."

The message was sent through Iranian Ambassador foreign office to his eminence A K of Iran. The reply was very swift, it came back very short. (2:14). The answer from Iran was, he used to be a diplomat, now he's a man, it's your responsibility to look after him. I passed a message on to Mossad and Israeli embassy in Brussels that, we do not. We have instruction by the Iranian leadership, that Mr. Sharon used to be the prime minister, and one of the biggest enemies of Iran at that time. It's a pleasure to be able to help him with the new technology.

Out of nowhere, the girl which we helped with the coma case in Belgium. I received the call that they wanted me to attend in Liege Medical University section for a helmet, which was built by the Israelis, and by developed programs by ?? Ghent's university, to be tested in Liege, and they wanted me to be present. What we found out later on, that this system developed by the Israeli securities, to check that, if it's used on the person's head, which we use our technology, is correct. It brings back consciousness, awareness and everything else. Which it all came positive. And .. a short time later, if you read the press, Mr. Sharon was moved to private home, to start this process. (2:16).

This is the way it should be, that once you're injured, in a military hospital, you do not carry rank. According to the instructions of his eminence A K of Iran you are treated as a human, as a soul. And this is the way it shall stay. Hopefully, when they come out, they receiving technology in their D of the physicality and the soul, they'll walk away from this position. This is what we have to learn, and this is why we have to understand. Ranking in the hospital doesn't exist. When you're an injured person, it doesn't matter if you're a military, or normal hospital. It's you who has to change your position when you move out. Do you still want to be. And still you learn another lesson.

I always said, a very interesting point if you understand it. We see people to go to war. Especially I followed this one with the American military soldiers going back to Middle East and different wars, and coming back, in past 20 - 30 years. Majority of the soldiers who come back with different mental conditions and different things, majority not all of them, have committed the crime of killing.

We see many soldiers go and come back, and we see nothing with them. They say, they shot at something, or something. But majority of what we see, (2:18). is the punishment of the STM to the man who has taken the life. Then all the psychosomatic, other parts of it, is the result of the balancing of the soul's energy. I followed this very closely in past 20 years, especially soldiers who have been going to Iraq, to ?? Syria, and they've been to Afghanistan, and the rest of it.

The truth about the life, taking a life, kills the STM. ?? the strength of the expansion, you call it, the illness. Then we'll see if you'd like, as I've always said, shoot yourself in the foot and do a marathon of life. Then you, lost a leg by yourself.

Man will not touch a gun, not usually out of the fear of what has happened to him, but knowing that it will happen to him. There is no fear. So being in a position of military, and serving, and whatever. Once you're in the hospital, you're a man. I learned a lot from, when I received. I was actually shocked when I got that message from the Iranian Embassy in Brussels.

At the same time, we saw another coma case, which was the prince of Holland, in London after an accident. I asked the king of Belgium in the meeting we had with them. Can you pass a message on to the Dutch royal family, that we can help with the Prince. Some of you Knowledge Seekers from Holland were with us, you did a lot of work trying to establish that line. (2:20). Where the Queen did not want the help for the child. It was very shocking to me. It was very like the woman who didn't want to see (she refused help to end her blindness). When I was told that the Queen has refused to accept anything. She doesn't want the son to be, the condition he is. This is the affairs of the family and Monarch.

But we've seen this, when you're in a state of illness, it's the responsibility of the physicians to bring you out of that condition. Doesn't matter what it is. It's for them to decide in the future, how the change the life, being military or civilian.

It's very interesting, if you listen to most of the wars in the past, especially ones coming out of the Ukraine, a lot of Ukrainian military soldiers. When it comes to the last point, they change to civilian clothing, and they try to get out as a civilian, they don't want to be in that uniform. But would they, if they managed to get through, will come back and put the uniform on, or they learn from it, they learn what it means, they could be in the corner, and walk away from the military.

Helping someone in a time of pain and weakness it's an obligation. It's not a condition of choice?

Q: Why do Romanians understand French, Italian, English, Spanish and Portuguese? (2:22). But the others find it difficult to understand Romanian. What fields do we have at the base?

K- There is the same thing with Dutch, and with some Germans, and some other languages. You see similarity into it. And you understand it, and sometimes don't understand it. But then you know you understood it. I know what you're talking about, because I know a lot of Romanians watch a lot of un-transcribed (not dubbed with subtitles) television programs in Romanian. In Germany, France, everything is dubbed. The guy moves his mouth but speaks French. The same movie you watched in Germany moved the mouth, but speaks German.

In Romania, they don't do that. They get used to listening to it. So you listen to the Spanish, Portuguese programs which are very common in Romania, and they have

subtitles. So people naturally pick up the language. That's one of the main reasons, especially the young generation.

But it's very interesting what you say, because I had to stand this yesterday. I lived in Italy for six years, never learned a single more or less, word of Italian, because everybody around us spoke English. In past two weeks, we had an invasion of Italians in the center. Most of them don't speak any English. They say, "yes, no, " and then when you say, thank you very much, they say, "no, no." .. And then when say something somebody says, ?? not, (2:24) .. and something that's going to be no they say yes. So you don't know what you are talking with Italians, it's normal.

So I have to stand with the Italian translator, try to understand what they went through in the system. You know, I go in and out of the system continuously, because I have to change things. I was standing there listening to Italian, I understood everything. I said, you don't need to translate …. you don't need to translate. I could understand all Italians. But when I lived in Italy I didn't understand a single word. It was a beautiful experience yesterday with the Italians, maybe because Stephanie wasn't there, but translation was so, not needed. It was like I knew, I understood everything. There was more or less a couple of words, which I couldn't understand. But I didn't need a translator. I wonder what will happen when the next one's come in .

I noticed the same thing with the Germans because the Germans are speak some of them English enough to be able to explain the emotion, the emotion of technology, it gets lost in translation. So I don't speak any German. But now I realized, I know a lot of German, I understand the emotion, what they talk about and the words.

It's very interesting, I want to know what happened with the next group of people, the French, or the Spanish, or the others will come in. What they bring with them. But what you say, I had experience with it yesterday. And it's a beautiful pleasure knowing I never knew Italian, but I understand every single word of it. There wasn't a need for translation. (2:26).

Is it because I go into this environment with all the Italians, they have the party, they bring the bottle of wine, you get the full emotion of it. Italians are the only ones, who have up to now, laid down on the floor, and they sleep on the floor. Italians they come with the wines and everything else. And this is something I experienced yesterday, and the day before with the … with the Italians who were with us . And I see the same with Germans.

I'm the worst person to learn languages, but I understand them now, like a second language. But beauty of it is when I was listening to the Italians yesterday, when I became aware of it, I wanted to know if I can get the emotion of the language, emotion of what they're trying to explain to translate. I could feel the emotion of it, it was fantastic. I will never. Maybe when I go in and decide to speak Italian in the room, unless the ?? speak Italian, I don't know. But this very, very interesting. How we will change languages. ..

Regarding Romanian, I know this, because nations which do not .. dub their movies, even in the origin language with the subtitles. Then people who love to watch it. They listen to it, but they read it and they get fed up reading it. They try to see if what they're reading matches to the words. Next time they don't read it. They have that habit. Romanians never changed Portuguese, Spanish, and some French and a lot of them.

I had this experience with Ella, head of the Keshe Foundation. When she joined us in 2 excursions to Brazil. She said, she doesn't need to, she never studied, but she understands, she can speak it (2:28). because in childhood, she watched a lot of movies Spanish, and Portuguese on the television with subtitles. That's how she came to know. When I speak to a lot of nations who do not dub their language, movies. You see that in the new generation.

Because they pick up their own channels is all traditional other movies, they get fed up, they go to the new movies, to the other languages, and reading a subtitle and their voice. It just matches up, and they learn languages. And that's why it is with the Romanians. Or at least this is what I see, and what they've observed, because we had this experience in Brazil, last year or two years ago.

Any other question?

FEU can repair the memory of the Soul

Q: .. Can the capsule, he calls it a capsule, I think he means the flight enhancement spaceship unit. Can the capsule repair the memory of the soul?

K- Yes. I tested this last week, and yes. But you have to. The lady who came out of the system was interested, or was touched deeply by the emotion of the warmth, of the hug, of the childhood time, of the mother. (2:30). It was amazing to watch it, and the way she was touched emotionally, could feel it. That even though she's in her 60s now, she had that instance of the love, she felt so pure from the mother, must have ingrained in the soul. She didn't feel the mother, she felt, she didn't touch the mother, she felt the mother as an energy. She knew this is the mother. And (it's) the only thing she was interested in. She was talking to us such an emotion about the warmth and the cuddle of the mother when she was a child. So yes, it can be done.

It's amazing what you can tap in. Gradually, in the test room, we are testing a lot of things, and we wait till they come out, when we get, and how we get, and how the physicality of the Man gives information to the Soul of the Man, do this, and the soul does that.

We talk in a language for the soul .. to hear, because now when you go through the Enhancement Unit, and we see they do. They remember when they come out everything. The beauty of it is, Chair number 1 we know is the correction of the physical side.

When they go to number 2, and number 3, you move into the expansion of the soul. They always say they get bigger, all of them, 90%. It just grows. They see themselves growing, but it's not them. It's energy around them. When we talk to them, like, would you like to go somewhere? Would you like to fly, would you like to go to pass time. (2:32). We don't talk because souls cannot hear it. The physicality inside hears it, transfers it to the soul, and the soul goes. This is the beauty of what we see.

It's an amazing experience. It's not just standing, seeing what people tell you after they come out. The emotion and the way they've done it, and you know what you've done. And you know what you've seen.

We had 5 people, 4 people in the system yesterday, we tried to concentrate the energy of them, it was impossible. It was just a ping pong ball of people who didn't know where they wanted to go. I came out of the system and said, this is not going to be very good. Two or 3 people here just don't know where they're going. They're taking and giving from the system. The system just fluctuates. We see it. (It's like what) we've seen 2 weeks ago, we saw a woman when coming in, she took everything, not only from the system, (but also) from the people in the room. It's a interesting time as a researcher, an observer of this new process.

Any other question?

K- Let me explain before we go ahead. Dean is the cameraman and our TV side of the recording of all the people who come out of the, … the flight unit. (2:34).

A lot of them don't want to give interviews. Some of them don't want to be there. And some they do. When I finish what I call, my interrogation and understand what they do. They go in the hands of Dean. So Dean sees the other side of them recording. Some of the recording you seen. All the recordings up to now from the EC is done by Dean, from the people who just come after talking to me. They go on the chair to talk with him. So you understand when he talks, he is literally listening to the back end of where they come out. They tell him more than they tell us, because now they're relaxed. Their not under pressure, or trying to remember something and telling us. Carry on Dean.

Q; Dean .. So I've noticed some people go in and they come out, and they say, I've not experienced anything. Through my understanding and through your teachings, I know that they've received a spectrum of energy, and they are in constant communication, constant flow of energy with the system, with the interaction of the soul and the system.

I've also noticed that some people that when they actually go in, and they do connect, and they remember this connection, they walk out and this deep, unconditional love behind their eyes. It's a hard thing to say, but there's like this overwhelming emotion, you see it through their, through the face. I can't describe it. I can see it behind their eyes. This undeniable, unconditional love sort of coming from them. And when you then speak to them, in an interview or something, you can see this overwhelming-ness just coming out

of every part of their, their being. There's like an energy all around them. (2:36). And it is such an honor just to be present with them.

It's like it really is. That soul essence has been touched by that, magnificence of a soul. It's just, it's astonishing to be present afterwards and to, and an honor to be able to speak with these beautiful souls, incredible. It really is. So this is sort of a testimonial to the system, Mr. Keshe, to everything you've delivered. Thank you so much Mr. Keshe, what you've brought forward, for humanity is beyond words. I thank you from the bottom my soul for what you've done for humanity. I know you do so much. And I know people give a lot. But humanity, you need to understand what Mr. Keshe is brought forward here. It is quite unbelievable. And the team behind him, I've seen how wonderfully they work and all the Knowledge Seekers and all the Keshe Foundation, they are so devoted, and they bring this knowledge forward to help humanity and it's astonishing. Thank you Mr. Keshe. And thank you the team, Klaus and everybody involved. You are just such beautiful souls, it's remarkable. And it's an honor to be present with you all. ..

So Mr. Keshe, the emotion behind the eyes, the emotions, that's what it really (is about). That's what's touched me when I see people come out. There's also something else I'd like to say. I've not been in the system.
K- You are not allowed in the system.

Q: .. I've been around these entities for a little while now. And what you spoke about earlier on, I've experienced briefly. So this was one of those positions where I was speaking to an Austrian person. And for a brief like 10, 15, 20 seconds maybe, they spoke and I totally understood everything they said. And I thought how did I know that? This was going back three or four months ago, (2:38). and then you've come forward and spoken about this today. So I've experienced this very briefly. That language thing, is yeah, that touched me when you when you spoke about that today.

People see the light - they see their own soul speaking to them

K- What we see a lot of people coming out of the system, but a good percentage, large percentage, they speak about the light. They speak about light inside them, within them. In a way they recognize their own soul. And a lot of them when they see, in their travels, something else, that says, "I am you, I am your soul in front of you." And it's very funny when they speak to you, because they see their own soul speaking to them.

We had a couple of ladies in that position, that I am your soul. I'm so, what you. I am you, as they say. They receive enlightenment, and it touches them. They see beauty and touches them. But they see the beauty of themselves. And that is the beautiful thing about it.

We see them coming out of these systems, and some of them change. I am in communication with some of the Knowledge Seekers (KS) who have been through, and especially, if they came with a partner, they see the change in the partner. How life changes for them. You don't see, you are not mainly aware of your own changes, but if

you go in with a partner, you will feel that change. And you fell the beauties of what that change has bought. (2:40). Less fighting, less argument it's more pleasure. Everything has changed. When you speak to them out. Everything is so harmony.

Yesterday I was. I witnessed this in a beautiful way between a couple, and how they care different way. The woman says, I have a new partner. It touches them, it touches the soul. It elevates the soul. We see it when they come out. The eyes are different, the emotions are different. It's nice to see both ends of what I call, the work of what we produce, the systems, and what we see the system produces. At the end of it, what comes out of it. It's so beautiful, ?? wonderful ?? set up

Q: .. One thing I'd like to say is, all the nations, all the people going through, coming through having this flight experience, they're drawn in, they feel this. I'm speaking for myself, obviously, I don't know this for sure. However, it seems that they're drawn in as a soul, to come to the Center. They experience the technologies. Some report that they feel these, the field strength, the moment they walked through the door. And … one of the Knowledge Seekers said, they actually don't need anything else, they received everything they need the moment they walked through the front door. From my understanding, I think they may have received this even before they walked through the front door.

And then there's other people, (2:42). that when they then speak afterwards, I've noticed that there's a deep soul resonance, or connection in the physicality, where the information gets. There was a couple yesterday that, first of all, one of the couples spoke and they couldn't express themselves much. Then their partner spoke. And then they wanted to come back again. And then the conversation that I'm supposed to do these interviews for a certain period of time, and then it's very difficult not speaking the language, to stop the mid flow, and say can you shorten it, so that we can get this into a Knowledge Seekers. … So we can shorten it enough, so that we can use it within the Knowledge Seekers Workshop that you hold, like this one right now. So it's difficult to .. I don't know what I want to say now. I've sort of lost my own track.

K- You got carried away

Q: So what it is, it's the emotion of this? People are experiencing it in very deep profound ways. And I've noticed that some are in the in the STP, are experiencing some body shifts. And understanding they believe, or in their own understanding, that, that's what they've received. And then another soul responds, that the STP, that position was opened up, a whole spectrum of energies for them. And then others described they go into another position, the third position, and they then start to feel that flight , .. flight enhancement.

However, and I have not been in there (in the EU). (2:44). So I openly admit this to everybody.
K- We won't let you in there.
Q: Yeah, I know you won't let me in there, Mr. Keshe.

K- Let me explain to people exactly what you're going to get, when you get Dean. When you come out it's us, we're looking for facts. When you go to Dean, it's just like sitting with a grandpa and telling your story. It's the confession time to grandma, I call it. It's very different then what they talk to us. He sits there and he says, "oh yes, very much." You know the way the grandmas looks after the baby, the children, grandchildren. And he pampers them up, for them to go through the full emotion of what they felt. It's amazing to see.

Now and then, I get a message, "oh, you know, they forgot to tell us this, they are telling it to Dean. So it's what I call, Mrs. Doubtfire, if you know the movie. You're going on the chair there, to do, the confession box of the emotion, and not the way we look at it. In a systematic way to find the solutions, to understand what the parameters of our work are.

Thank you very much Dean for your work. It's amazing. I sometimes watch him, how he goes through them, because we are in the next, in the same area. While I'm talking with the new people coming out, he's interviewing the one's who already been out, and they've gone through what we call, the investigation. And it's very, very nice.

But one thing is, all of them, they speak about, when they go to the systems 3, 2, 1. They speak about landing. It's just like they say, it's like an aircraft landing, and they come back to dimension. They know, this trip is over. It's just like going on holiday, (2:46). one says. When you go on the last seat to come out, you know that's it, the journey is over, the holiday time is over. And a lot of them loose sense of time. The guy came out and says, have I been in there that long? I was just. I thought I was there just a half an hour, or so. When he has been there two, two and a half hours.

This is the beauty of … traveling with the soul, it has no time. A lot of them don't like me going in there and telling them, "excuse me, do you mind if you move, this seat is needed for another person to go through." Some of them are so deep. I had this experience, on Tuesday, the lady was in the unit and I said to her. I thought she was looking at me, but she wasn't looking at me in the room, in the system. And I said excuse me, do you mind, and she went jumping, I woke her up from sleep. I got frightened more than she did, that I had to leave the room.

Because they go into a different, different structure of mind. In a lot of people come out, they talk about dimension, that there different .. It's not the dimension. It's the same life. Now, you've got used to what is inside you, to be outside, and you can enjoy both. That's the only way I can describe it. It's the first time you have collaborated, you have worked openly with your soul. And this is what a lot of you don't understand.

Up to now it was something imaginary, somewhere the priest told you is your soul, and it goes to heaven, or hell, or whatever. But now it's the first time in these machines, you and your soul working together. I listen to the physicality of the man, what they tell you. I tell you, and you do, carry on, take us where you want. That's all it is. (2:48).

This is what we promised from the beginning, to free that bird from the cage. Now that bird goes everywhere and brings you messages back, but you are with it. You actually rely on it, to go, what do you call it, outpost in the dimension of the universe. It's beautiful what we see, and if you understand it. It's not just a talk, somebody came and said this and that. It's the first time the STM and the physicality of the Man are working together.

I know what these people say, because they are humans, I've got carried, the body of the human, and so I tell you what to do. They both listen. Up to now you ?? dreamt, and the soul was inside. Now the soul is outside, and he tells the physicality what to do, because you've got to take me there. I don't have to, I just sit there. You're a plasma. And that's why with the body of the man you fly. With Soul of the Man you go to places.

That's why I say in the flight system, I say, try to go to Moon. Try to go to see your uncle, or your father, or your children. You don't fly to the Moon. And if you are in a physical dimension, I tell you, would you like to fly. (They answer,) "yes, yes, I like to fly," but I didn't fly, I just went there. You don't realize that you actually, instantaneously (went there).

Humanity for the first time has learned the collaboration openly, between the STM and Physicality of the Man, in a environment created, for man to have that freedom, and pleasure. This is the beauty of it. It's the first time you work with your soul. It's the first time you have the freedom. You have the understanding, that I don't need to wait to dream. I want to see the mom, I see the mom. Because I know somebody who can take me, who knows where it is. (2:50). And if I don't see the mom, it means she's busy, she didn't want to see me. It's like in a real life, you call Mom, but Mom is not home. Mom has gone out for a party, so you have to wait till next time.

We've seen that yesterday, in the people who came in for the second time to go through the system. As Dean said, some people don't go through that, because partially our system is not set up. Partially, the soul is too scared to move out, to do anything. And partially they feel, they come in to do something. But if I let my soul go, "oh, what's going to happen? I can't get it back." So I want to be in the system, but I don't want to let it go.

Yesterday we had a guy he was crying, and crying, and crying. From seat one, he started crying. He was in the seat number two, he was crying, and he was crying so loud. He went into the system he was crying louder. I said to the guy, can you get him out, because he's got so many ?? ?? And when he came out, I said, Why were you crying? What happened? He said, I wanted to fly, but I couldn't fly. So I was so angry with myself, because I couldn't fly. And I said, this is where he has gone wrong. Physicality is still trying to control the soul.

And yes, it's the first time in the life of the man, a system allows you to expand, to free your soul, but it still be that bird in the cage. Most of the time, we are the cage, and the soul is the bird. Now, the soul is the cage and we are the bird inside. The way we've been

kind to our soul, the soul is kind to us. We work together. And this is what the whole purpose of this technology. (2:52).

You want to go to New York get on a physical plane, spend 10 - 12 hours in airports and everything else. Let the soul out, take it to New York, change the clothes, let the soul in , and you're out. That's all (it is). In a very new near future, many of you will do this, because now you learned it. We see people coming back for the second time. People will come back for a fourth time, for a fifth time and they will learn it, and they will show you how it is, how it is done.

I am a very patient man, a few weeks more waiting for the first Knowledge Seekers go through this transmutation. It's not that long, I waited thousands of years. But it's the beauty of it. For the first time, we let you do and work with something, which you encaged, and you denied yourself to, for millions of years. Not only the man, even the passengers of the U.

Any other questions?

Q: ... Sorry, can I just ask just one last question. So, for the souls entering into the system, will they in the moments to follow be able to .. So they are going in and they're experiencing, say they are traveling to see, their parents, or they're going to the Moon, or they're going to the Sun, or they go to a distant galaxy? Wherever they need to be?

Will there be a moment, when this soul will be able to be in more than one location in the moment?
K- In a way, yes. It can be. What will be interesting is, when we get the first people who are diagnosed with "beautiful people" in them, (2:54). what you call, schizophrenic, and see how the two souls of individuals would take shape in, and if they participate by ?? portrayal, by one, or two, or 10 of them.

This system will throw a new spanner in the works of the medicine and psychology. Where the mothers come with the children with diagnosed schizophrenic, with two character, three characters, and have to sit and watch, that all these characters come out together and play. It will happen sooner or later. It's inevitable, it will happen.

That will be a pleasure. Then you'll see when I tell you for years, that individuals trapped in one physicality. It'll be really interesting how they shine, how they will show themselves when they come out. Will all three become independent speakers of what they went through. Or they have to listen to the one ?? who always talks in the physical D. But talk to them inside, and talk to them outside, and see if they match.

A wonderful time has come forward for humanity to know and see, what they've done with their own children in mental hospitals, and institutions, and injections for decades. Because they never understood the truth about the creation. I'm looking forward to that, it's one of my deepest, deepest wishes to have the first schizophrenics, you call it, what I call "Beautiful People," in the system. I worked on it for nearly 30 years. To prove, to

show, to bring respect to these people, and not shame, and what we've done to them to castrate them.

Any other question? (2:56).
R: Not seeing questions .
K- That' very good. It's fantastic. It means Knowledge Seekers are now learning and ?? digesting understanding.
Q: …

K- We call it a day. And I think, as we said, the time of the change is there. We have gone and endeavored to put in the new Enhancement Unit for energy out, and new health centers to be done in Rome. And the biggest gift we could gift we could give the Iranian nation, was, that Iran will commit itself to what we call, safe nuclear power stations around the world, by containment, and not by destruction.

Thank you very much for today. And hopefully we'll have more news next week. Thank you, Rick.

Topic Index

Accept total freedom of the Soul and P not to abused by beliefs or brainwashing; Can still interact with Souls who lived on earth; Preparing for yet another new flight system upgraded - will see souls as light ; You can see where you're Soul is destined - can change it to serve better; First time man will have opportunity to change his behavior; Extend your life on earth to educate and perfect your Soul - become a star; Soul of UC member become an EU; UC asked to come to Linz - elevation of STM has started; Electricity is from M fields; You connect your Soul to EU for eternity; STM works while P is sleeping; Complexity of Knowledge leads to simplicity; Feel presence of prophets - achieve religion if you are true to beliefs; Bring the true message of prophets; Catholicism will end - and other religions that abused mankind; 24 Commandments; New science will appear out of nowhere - like computers did; EU gateway to enlightenment and U; We can bring you to the water - but we can't make you drink - through love; New Enhancement Plasma energy system for elevation of the soul and

connecting to Linz for Mobile flight - 50% reduction in electricity; Might look like it's not working in physicality; Can live dual life of Soul and P; Same light given to Moses is now given to all humanity; Mitra brought Creator to earth to see beauty; Persian story of Prince thinking he was a cow and wanted to be slaughtered - That's mankind - slowly bright the knowledge to understand; You have to decipher the knowledge; Do not give up and wait to die for Soul to be free - do it now;

We were not enslaved; There wasn't enough energy to feed the creations of the earth - so we looked outside and killed to get the energy to survive - it's not Man's fault- it's the way the planet was created; Now we are fixing it; Those who understood about the energy abused and controlled the others; Men found out how children were made and took the power from women; When you create matter out of fields cannot carbon date - timeless; We are not made out of other animals - we are made on our own out of the fields; Science made a nonsense out of understanding the creation; Earth is not unique many planets fail to provide enough energy for creatures - but man learned to abuse the others; Need CO2 to connect to the fields of environment to get energy; CO2 the connection between STP and STM; Earth was chosen because Mitra fell in love with the way creatures love on earth; Even the way dinosaurs love and mate; She saw the pitfalls of the structure of this planet; Create the children of the Creator on Earth to start new cycle of perfection in the U; New children of man are accumulating everything; Children of Mitra are already amongst - man has to find it out; Linz KS have to understand new systems - then spread across planet; Vertical people give fields to environment - already live U Community; What we take inside as food to attract certain fields from outside environment; Do we need future cities to encage the man - he will be free to travel instantly anywhere; 3,000 new plasma energy units are minimum for creating Dome; Spread them on every continent; Straight fingers is a giver; Mr. Keshe tells how he came to be Messenger - first 2 times refused because wasn't mature enough; Knowledge is gifted not learned - from the Creator is pure; He listens to teaching himself afterwards - soul teaches;

ENGLISH TRANSCRIPTION

(:22).
K- Morning, Good day to you, as usual, wherever whenever you listen to a series of knowledge, it is up to Keshe Foundation Spaceship Institute, knowledge seeking and sharing knowledge with each other.

This morning, Rick said, which intro do you want me to play? I said, play, you play the right one ?? this has to be. It usually comes up. And it's amazing. I wrote a couple of days ago, because of communication with members of Universal Council, and other Knowledge Seekers (KS) around the world, which we usually communicate with. I wrote on a piece of paper what the topic today should be, and usually something to refer back to. The reason they came in this way, was because, when we put the peace treaty out, if you read the original peace treaty article, it says, I commit my body and my soul to peace.

We had a number of people from South America, especially Brazil, that they wrote back to the KF at that time. Mr. Keshe we can commit our physicality, but not our soul, because our souls committed to Christ, bless his name. Now that we have developed the technology, that man can see the strength of his Soul, can see the extension of the Soul of the Man (STM) within, and beyond the boundary of his physicality (P). The question comes to understand, is our Soul committed to anything or anyone? (:24). Or is it committed to itself, to be peaceful?

We gave our physicality to slavery. Now that we understand the position and the strength of the STM, do we still give our soul to slavery? That it will be abused by others in the names that they force, in a way, brainwash us? Or do we accept the freedom of Totality in physicality and the Soul?

Does the STM, now has a containment? Does a star, the light of a star, the beauty of a star in the depth of universe, has a limitation in how far its light shines, as it's the point of the observer, that it allows it to be observed.

So, now with the development of the new technologies, that we have managed to reverse the process, where the Sun became the creator of the physicality. And now in the new process, we changed physicality for the Soul of the Man to be, what we call, clothing it. What will be the future of man?

In the next week or two, as new people and other people who have already been through the process in Linz, go through the system. What will they see? As new technologies, have been added. This week, we are closed, as new systems is getting developed, that in next week, we'll have new dimensions (D). (:26).

We've seen and we have heard many of you going through the system, that you feel the energy beyond you, the physicality is inside. We've seen many of you, explaining how you connect to the system, even you left Linz, and you can connect to it instantly.

I was talking to a number of people who've been and they said, they can connect to Linz, and just immediately get to the position where they want. The reality is, as we learn more and more, do we need to dictate the position? Or do we wish and we achieve the position.

I go to sleep tonight, and I want to see the dad, because there's something I have to tell him. I need him to console, where he is on other side of the world working, or he passed away years ago, but I always valued his opinion. Tonight, with the system you learned, you meet with him, if he's available to meet you, and the father's always are.

Now we understand that the limitation of the what we call, encapsulating, enslaving the STM is over. We hear this from the Universal Council (UC) member, that in a message left behind, that she wishes, and it happens the way she wishes. We hear from others who have been through the process, they do the same. (:28).

Now it means we can dictate the light, we can endeavor to understand the knowledge. We can endeavor to see the beauty of the universe, that is we are part of, and we always considered ourselves not to be part of. We have entered in the new dimension of the technology, of the what we call, the movement of the energies of the universe, which our soul is part of.

We have to understand, that we have completed the knowledge in a way. As I said before we came from the matter state, we change it into Gans's and into energy state, and we can make anything we like. Now, we managed to free the Soul of the Man to make what it likes, and connect to what it likes. The only difference is, now to get to the Father on the other side of the world, you do need not need to get on a jet plane and spend hours.

As I said, with the new technology we go to, we don't fly to. Because it is instantaneous. When you want a water, you stretch your arm, and you get the bottle, or the glass and you drink the water. Now, with the new understanding, we create the same condition. You want to see the father, you free the soul, (:30). you extend the soul. And in fact, his soul is as respective of where he is, if he is in a physical dimension, or he is the center of another star Solar System, because of what he did during his time, serving the humanity.

Now, we understand with the new system, which is coming into operation in Linz, in next few weeks, we shall not see once you go through the soul's ?? process the physicality as we see in front of us on the screen (people sitting together in Linz after flight). We see these individuals as lights. We see these individuals to light up the room. As the soul gathers strength and trust to manifest itself.

Then in that process, we'll be able to transmute, as our wish, to put the soul in a given position, to transmute it. Or the soul when it arrives in the dimension of the light in the system. Then, it decides where you want to go. With the new development and the progress in Linz, we have achieved, and we will achieve, and we deliver the transmutation of the STM.

This means in a way, we turn this sheep skin inside out. Where the skin was covering the soul, now we turn it back, the soul is free. The soul is there, and the physicality within ?? ?? . (:32).

We shall see the development of the progress of the STM, that we allow the sun of the man, the STM to travel the dimension of the Universe (U). If the man is clear enough with his self, he will see where the Creator, according to the strength of his service to humanity, and the universe, in dimension of the Soul, which he was not aware of, has predetermined, has allocated, has seen, to be beneficial for the services to His Creation, that will be the position of the soul, in the universe or in the Unicose.

In a way, it's like when you build a house, you go and find a plot, and then you dream what you want to do with it, and then you build your dream, to become your home. With the technology (T), which is in the hand of the men, now, and in its basic form, fundamental form, is in Linz.

Those who are clear in the dimension of life, do not ?? need, to wait, to see the house, the position, the plot, the what we call, the destination of the Souls in the Universe. Where they can see, where the Creator according to the strength of their Soul, has allowed, has allocated, has given the strength of, to be the position. You will see if you are a star of a Solar System, or you're a dust, in the dust of one of these planets, due to what you have done in time of life on this planet.

Whatever I promised you, I have delivered. (:34). Now, as what was in the intro, what would your soul create? For the first time Man will have the opportunity to change this behavior, to change the cycle of life, in where the soul shall be, because he will see the plot allocated to him. And if he likes that plot. If he likes to be in another position to serve better. And this allows a better what we call, cycle of creation of life in the Unicose. As you evolve yourself. As you educate yourself in your physical dimension, not to be a builder, or a plumber, but you want to be a doctor and a professor, you educate yourself. Now man has the chance to do that.

These systems we put in Linz is not just for you to come and dream, and see what you are dreaming. It's for gradually, for us to show you, where you're destined for. What is the future holds for you, when in the dimension of physicality, you decide to departure from the Soul and physicality, from each other. Or you still can embed the physicality in, know where you're destined for, you want to be a better sun, you want to serve better in the dimension of physicality, you change accordingly.

Now, the physicality remembers the dream of the soul, not the soul, the dream of physicality. Now, man has the opportunity to bring that position forward. As I said to you before, if I show you everything in one go, you'll all commit suicide to get there. Because you think by ending the physical life, you will reach there. (:36). But in fact, what we show you. it shows you to extend your life, to create a perfect soul. To create a condition for your soul to serve in the dominion of the Creation and the Creator, in the best of its ability.

In a way do you want to be that uneducated, and let the soul go uneducated in the universe? Or educated where you want it to be, that it serves the best in the universe. It becomes a professor, or doctor of whatever value man has created for himself, in dimension of physicality, in the dimension of the universe and Unicose.

This is the purpose of these systems, not just for you to come and dream. Not for you to just come and go and see the mom and dad who passed away, or the brother he is in another part.

I recently, in past few days, invited one of the richest woman in one of the continents of this, what we call, Earth, to come into the system. To come and see if the wealth is in the dimension of physicality, or she actually has gathered any wealth in the D of the Soul. Then we see how people will handle, how people will change their life, how people, humanity as a whole will come into it.

As I see, in correspondence with people who are members of Universal Council, people are trying to use the UC members to reach to the system, that they can elevate themselves. (:38). This is the process, which actually we become. The Soul of the UC members become that Enhancement Unit, it becomes the point of reference for man, not to on this planet, but to see through their souls, the ?? life of the Creation in the Unicose. That's all, what we call them, Universal Council.

This week, we released the same numbers of the new members of the Universal Council. There are now 24 and soon there'll be 27 of the major languages of the world, with some 70 backup, Universal Council Supports. The council are extended. The job to support the soul of humanity, for the transition of time of the knowledge has started.

When we established the Universal Council was for the day like today. Where the Universal Council members come to Linz, share their souls, through the soul of each other, and connect to the rest of the soul of humanity and the U. As the new members of U Councils and the present UC members make their way to Linz, to go through the process, the whole process of interaction of the elevation of the STM has started.

The simulation system is not simulation for physicality. The simulation system in Linz, is actually the flight system method of the universe. But man is too blind to see. (:40). Listen to the experience of the those who come and put it out, a few as testimonials. Then you'll understand, again you missed the train, by just looking at the physicality. The whole purpose was to show, that we can extend the soul to become independent. Now that it starts repeating itself, and people connect more and more, now the souls will shine. Now, we will see the essence of the Creation, the reason we built these systems.

Power of magnetism - Electricity

The magnetic fields and power of magnetism has been around the man from the time of the creation of this planet, It took thousands of years and centuries, for man to educate themselves to use this hidden field to create energy you call, electricity. Now, it's the same with Enhancement Unit flight simulation, it's to understand the energies, which Soul of the Man creates, and what light it will create and what it can be used for in the field of strength in the U.

It's a pleasure to share this knowledge. It's a pleasure for you to understand what is about to happen to the man. You have had the cars and the donkeys and the UFOs to carry your physicality. Now, we give you the Enhancement Unit to travel the STM, which has no D. It's not there for you to share the dreams. Those of you who come and share the dreams, (:42). you find out the connect yourself to the system, for eternity. In a way, it becomes the Earth's soul in the dimension of the connection for the souls of the man who live this what we call, planet in a different structure then P.

We don't need to go to fairs, to see something and come back and tell our children, there is such and such a thing, and years later it appears as we see. You see I told you, they were showing it in such and such a place, now it's in the market.

The Enhancement Units, which are built as a simulation, are the twin stars of the Soul of the Physicality of the Totality, of the Soul of the Man on this planet. Then, you understand how the process has started. How what the next step is. How we allow you travel step by step, the soul travel, the physicality travel.

In next few short times, many of you who went through the process of the Enhancement Unit simulation system, you will find out you will be present and physicality can be asleep, and you do a lot of things, and you come back and the physicality is there. Everybody tells you, you were asleep, you were snoring, but in fact, you say, I was awake, I was doing this on that, because the soul is doing it, and physicality is in position.

In a way, physicality need the rest time, the STM has no time to rest. (:44). We see the changes, this is the whole purpose of the Enhancement Unit. For you not to become to see that, that. For you to become aware of your soul, that what it can do, you can see the Dad anytime you wish.

Today man says, when I go to the other side, I see my mom and dad. You don't need to go to the other side to see the mom and dad. You see the mom and dad, because the other side is leaving, or in a way, encapsulating the physicality, that the mom and dad are there. It's just like you've been locked into a room in the house, and everybody else is doing whatever they like in the house. It's you who has been locked out. The rest are having a party. Because you've been a naughty child, you have not done what you were supposed to do. And you did not understand what's the rule of the party. How you have been behaving.

Now, we open that door, you'll make some mistakes, you make some adjustments, but overall, humanity will reach that point. The new enhancements units, which many of you will start going through from next Tuesday. We'll show you a new D. We will bring you to experience and live a new dimension, not while you are in the system, when you leave the system. (:46).

In a way, you have found the access point to go to, through to any position in the dimension of the Creation. Earth is not anymore one thousand light years away from another star. It's instantaneous arriving at that other star. The way you see, those who gave testimony. They don't travel to as we said before, they go to instantly.

We do not disclose the designs, because mankind is not even ready to understand the simplicity of the process. But the complexity of the knowledge, which leads to simplicity. I have made this knowledge so simple, that anyone can do. But no one can do it, if it's not the right.

You will see in the new Enhancement Unit, new features, new understanding, new elevation levels, more closer. Those of you who came to see, to be, to feel the presence of the Prophets of the God, you shall achieve it from now on. If you have put yourself to be in the position of the direction, that you have been true to your belief.

Many people who have been through the system in past 3 - 4 weeks, they tell us they feel the presence of Christ, they feel the presence of someone so and so. But now, with the new development, we allow you, we give you the opportunity to sit with, to be present with them, and to bring man the messages, which they truly gave to their followers. (:48).

There's one thing for sure, and that's for sure, we'll see the end of Catholicism. We shall see the end of the path of the belief in many, many ways of religions. Because now we will see the 24 Commandments with our own eyes, and not filtered the way mankind has been abused, by putting them aside, destroying them, and the rest. When the Moses was given the 24 Commandment, it was written in the pen of the soul, not on the stone.

When we see the new way, we can interact and bring the changes. The new way. It's no use trying to overcome and change the climate warming, by trying to capture the CO2. It's to create a new system, that you don't need the cars and the heating to create the CO2. The planet will heal itself in time.

The Industrial Revolution from what is coming from the teaching and the work in the center in Linz, will fundamentally change the life of the Man. We will see new technologies in the science of the universe, not in the science of the Earth, will emerge. We are not only emerges, we are the cause of it. We bring it out for you to develop it.

We'll see new sciences in the next few months, (:50). appears out of nowhere, like the computers, which came out of nowhere, and we all got used to it. We'll start educating our children in the knowledge of the universe, not in the color, and the structure of the physicality, or chemistry, or biology.

In a next few months, as we lay out more and more advanced systems in Linz and then spread it around the world, we'll see emergence of the universal knowledge, universal education, and universal understanding of the work. Our children will not speak about going from London to New York. Our children will speak to go to another planet, another satellite for lunch and come back, mom I've been there. When your child goes to camping with a group of friends in New York, when he comes back, and he says, Mom, I did this and this, and that. They have these things, this and that, do you disbelieve her?

Now, we have to believe when they come back and say, on this planet, on this part of the universe, there is such a such thing, and such and such .. and all we'll say, did you enjoy yourself, did you learn from it. What gift can you give me from that knowledge? We do not need, even the verbal words to communicate, the soul of the child will enlighten us with the knowledge it's gathered on its trip.

The horizon of the man has changed. And in the coming time, with the systems which we have put into operation, in a very simple way, in Linz, we have started that door. (:52). The gateway to the universe, to enlighten for the man to understand, that the Soul of the Man has no limitation

Many of you have come from Italy, and you're still coming in. WE can't stop the Italians flooding the system. How many of you have written to Vatican and invited the Pope? How many of you have asked your priests and religious leaders to come and test the system. They will say, no, something wrong, this is something what we call, antichrist. Because once they go in, they find out they have been "anti" about the reality of the soul of the Christ. Because as we say, the hand of false magicians opens up.

Invite the world religious leaders to come to Linz. Invite the world leaders to come to Linz. You wrote to them for the peace treaty, write to them, for to come and meet their own soul. And then we'll see what we need. It's your responsibility to do this. It's your responsibility to create the next step of the work, not us. We reach the soul.

We're here to teach you the mechanism for you to learn how to use the arm of the STM, to be able to create a new condition for man. Not locked up to the physicality of this planet. But the span of the U. (:54). You have heard in the Testimonials people go to the ocean, they go to jungles. And now we've seen two or three people going to the same jungle and they are from different nationalities and different parts of this world.

Make your way to Linz, especially Universal Council members in the U Council Support members, that you establish the link for the creation of the new STM for this planet, in connection with the soul of the planet, and bring that change. Bring that process of change.

We can bring you to the water, we cannot make you to drink, unless you're thirsty for the love of the Creator, and travel the span of the U, and unify the STM, that in Totality, the whole soul of the creation on this planet changes. In a way, in the world of the Creation of the Man, we call it, the evolution, evolutionary changes. Now, this is the evolution in the Soul of the Man, in the science of the Creation and the universe. You have no choice, the seed is sown, and is growing, and with it comes the whole process of understanding the process of Creation and the Creator.

Explains the new launch of Enhancement Power Units

As I said last week, and I explained to our team, now I explained to you in very simple way. (:56). As you noticed last week, we launched, the Enhancement Unit, power enhancement units, the energy units. And the what we call, plasma enhanced packages. which is for sale by the Keshe Foundation. Why did we do this? Why suddenly, in depth of the work of the Keshe Foundation with the Enhancement Units Simulation system, we suddenly launched the energy system? The reason for it is, that the MaGrav units you created, the systems you were given, never understood. And the necessity for the people who came to the Enhancement Unit simulation flight system, we saw a need for

expansion of the plasma, that, that's what I told you earlier on today, that you will become the Sun, you will become a star in the system.

We needed to introduce a powerful power system to go through the transition of the both physicality and the STM. When we launched such a thing for the system, we decided that, we let the humanity enjoy the trip. The new energy systems, which is launched by the Keshe Foundation, is not just for powering your house, it's the first step into allowing your soul, in connection with the work of the Keshe Foundation, to find a new dimension ready for the transmutation and transportation in the coming time.

Go back to my teachings for past years, (:58). I kept on telling you, I'll give you the dimension, the beauty of the MaGrav, and you were just only interested in 50% or 10% (electricity savings). Now with the new MaGrav system we guarantee you 50% reduction. Because this system is actually, the new system is created for the elevation of the STM, energy of the cosmos.

I kept on telling you, you're looking at the crumbs. The new power generation unit will come with attachments in the next few weeks, that you can literally, do, feed, and do everything else, plus your energy saving at home.

It's the beginning of the cycle of connecting to what we call, Linz Center. It's the key to bringing the matter energy and the universal energy together. Where you connect both to the energies of the house, and you connect to the energy of the universe. And then you understand how evolution of the man will come into operation. These are like those portable generators, where you buy when you live in the middle of desert to light the house. These are there to light the Soul of the Man.

It's worth millions, and it's been put out for nothing, for man to go through that transmutation. It's the first time we released this technology in a very simple way, because man makes everything so complicated. (1:00).

When you buy, or you'll get the enhancement, new Enhanced power unit, plasma power unit, don't look for reduction in electricity bill. Understand that you have brought the first step in the passage of the elevation of your soul, in your D, in understanding and moving forward from the D of physicality.

In a way, I have given you a system, a simple technology, that can be there all the time, even in the matter state, looks it's not working. It's there for you to achieve the elevation to understanding of the Soul of the Man for yourself. You don't need intermediaries, you don't need prophets, you don't need messengers. This is why in my papers I wrote, the scientist are the messengers, because with scientific development, we finish with the theology of the mystics, because you're in charge, it can be repeated. When it can be repeated and done by many people, it's not mystery anymore. It cannot be manipulated anymore.

The new energy enhancement units are the passage to the dimension of the universal energy. This is what that kept on telling you, and I just said, you looked for 20 to 30% a meager reduction in the electric bill, and I kept on telling you, look at the power of the MaGravs. Now, with this technology, which we have released as a MaGrav energy, (1:02). this is the first step for you get into that system. To understand it, you can live a dual life of both the STM and the physicality.

This is what we promised, the man become aware of his existence. We are providing these systems, as what we call, the guarantee, a certain percentage in your electric (bill reduction), because you're interested in that, that's all it is.

But those who are there to go to the next steps of what we call, enhancement in D of universal energies, this is your gateway, this is your way to get to it. This is the way, where I kept on telling you, I gave you the cake and you went for the crumbs. Now the crumbs you have got, the cake is on the table. But you have to understand how to use this cake, not only for the soul, but to support the physicality in the same dimension too.

You were blind to the sight of the soul. Now you shall see it through the eye of the soul. You do not need the electricity to light up the room. The launch of this new system is so fundamental, and will change the whole structure of the humanity in the coming time.

It's as I've said before, they say the most important discovery and evolution in the science of man, was creation of the wheel. When he made the wheel, because he could carry more weights. The evolution in the STM and the new life for mankind, (1:04). is the circle of, the ball of, the sphere of the plasma, which still rotates, but this time rotates on its own with the energies of the universe.

Now you understand when we explain, that in the coming time those of you who go through the Enhancement Unit, because we created the facilities for it, you will become the light. You will become the use, and elevation, and manifestation of your soul. And no one needs to confirm, or deny. Because you become aware of what you will do, and your life changes because of it. And the people who you touch in the dimension of the soul, will change with it. Because now you give them a new energy, you transfer a new dimension to them, you feed them with a new strength.

The process of the transmutation of the soul will come through the understanding of the new knowledge. It's your responsibility those of you who listen today, or you listen in a month's time, or in years time to this broadcast, to understand, that you have been given the same light, (1:06). as was given as a light to Moses in the mountain. The same fire as the others saw. Now it's you who is responsible to turn that fire on, and meet it, and perfect it.

And this time, don't cheat it, and don't break some stones, because it doesn't suit you, or you want to abuse the others. Because you got to understand, that the whole of the creation of humanity, now has access to the same fire, and to the same light in the

mountain. That light is the light of knowledge of the Creator, and nothing else. It's not a burning tree, and it is nothing else that it shines out of ?? anger.

Now as I said, the knowledge of the man has reached the level of the prophets of the past. Because now you understand the knowledge came from the light, which now you have access to. There can be no Ayatollahs, and there cannot be no Pope's, and no pups. Because you see the truth. You see the elevation of the Soul of the Man in his own dimension, and not with filtering to suit.

My responsibility is to make sure more and more of these systems around the world, that everybody gets access to it. This is why we set the Keshe Foundation manufacturing. To manufacture the systems, that are there, that people do not need to go to the church to read the man tainted wishes, and what abuses in the Book. They can go and see the light by themselves. (1:08).

Now you understand my process of teaching, and why we taught as we have done. We brought you step by step to this point. We brought you step by step to see the beauty of the creation, and when you can touch it, and when you can feel it, and when you can enjoy its presence.

Now you understand the next step of the what we call, the process. It's not anymore teaching you how to make things, and what fits to where. All that has been done. It's for you to add up and understand the whole process. We have set out to make it easier. Hopefully in the next couple of months you will see systems, which can fly you across the universe through the dimension of the Soul, and not dimension of your P.

It's for us to enjoy the beauty. The beauty of the Creation, the beauty of the freedom of the Soul of the Man. All they're doing in Linz, is show you the way. We haven't made you a temple to go to, to pray and worship. It's a place. It's an education center, where you go to learn to educate your soul, how to be free, how to be able to travel the dimension of the universe, and how not to be trapped within the D of physicality.

It's a place of knowledge, (1:10). and it's your job to come to learn, and then share this knowledge with the rest of the humanity, and the creatures of this planet, and beyond. As I said last week, man up to now considered himself to be sitting on a donkey, and those creatures of the universe having the UFOs. Now with the knowledge we have given you, man has become the holder of the knowledge of the Creation. And those in the UFOs are those who are sitting on the donkey, envying you, how simple the Creator has shared the knowledge of the Creation with the man.

As I said before, when it comes in the time of Mitra, the physicality of Mitra, in the dimension of its manifestation of His children, the whole Universal Community will come to Earth, to see the beauty, and why this gift has been given to man. After all, the wrong things the man has done. The reason for it was only, because of the beauty of this planet and the love of Mitra for its dimension and condition. She brought the Creator, as a lover follows, to see what the other lover has seen. To share the same beauty and love.

Go back in all the teachings. If you understood the teachings, you can build the Enhancement Units for what we call, flight. But the secret is in every word and every sentence, and not just in the dimension of physicality of putting something together.

Understand, (1:12). that the time of the evolution of the science has come. The Man has moved to a new D. This is one of the reasons, that the King of Belgium with all its might, bribed the others in what we call, public televisions and radios to block the Keshe Foundation not to be shared. But the only thing this stupid man never understood, was the fact that, we communicate through the Soul of the Man. And he still thought he is very clever. We'll reach the Soul of the Man through the world communication of the universe. Not what meager light flashing on the screen somewhere to make a picture of shameful king.

Now you understand why we are not bothered. Because once you start coming, and the people come and see, and they interact, who needs television, who needs radio, because you will become the visualizer of the reality. If you can see and feel the presence of the Christ. Ask them, can you show me a television which can do this. And then you understand you have entered a new dimension, you have entered and brought yourself, educated yourself, and educated yourself further in this process, by the totality of understanding. Our work has not finished, it has just begun. (1:14).

In so many ways. I'm not worried about what happens physically to the Keshe Foundation structure around the world, because now we're building the Keshe Foundation within the STM, the freedom of the soul, and they are building everything around it. Because now as more and more of you go through the what we call, Simulation System and the new ones coming out, we create that dimension of what we call, Star Formation (SF), that allows us to become the center of the what we call, the Knowledge. Center of the communication with the rest of you. And we will see the process of the knowledge sharing, will become instantaneous. Soon you will understand what I mean.

Soon you will understand, that you will not need to go through a medical school to become, or to have the knowledge of a doctor, when your physicality needs one, because you extend the Soul of the Man beyond the physicality, and you will see the change of the man in the D of P, without any medicine. We have had this with a number of Knowledge Seekers who went through the system. They never told us what they had, what the condition was, and when they came out they said, the changes happened. Because the soul has expanded beyond the dimension of physicality and in bringing balance, you will change everything.

People who could not sit, now they sit in the position they never thought they could, because of the pain of physicality. People who could not see, see with the eye, because they were blind or they had a problem. (1:16). People who had all sorts of conditions, because of the expansion of the what we call, the plasma of the STM, everything has to become balanced inside.

We are not giving you a wellness system, we are giving you a universal flight system, and in that system everything has to be perfect and your physicality is part of it. It's not a wellness, it's what we call, the life of the soul, and the soul always looks for perfection, that correction. And if the Soul of the Physicality (STP) allows it, will bring that change.

Don't come with wishes, but come with the love, and then you understand what will happen to your physicality. The moment when you come out of the system we are interested to know where you've been, what you've done, because we have to tune the system.

In the next few weeks, we will not ask any questions, because the system will be perfect for delivery of its work. It's you who has to know what you achieve, once you went in there, once you took the trip, once you made that journey.

When we used to do, helping people with all sorts of what we call, conditions, (1:18). which their P was in pain, or suffering. When I used to make the cups and people used to come and take them, and drink from them. Then when they use come after couple of times, visit, they say, I have a problem, I forgot to drink the water, or I forgot to breathe, or I forgot to do such a such a thing you asked me. In past few weeks this has happened quite a few times. They were apologetic.

I used to tell them can you bring them back, because your use for them is finished. When you don't need it. You don't use it. It means we have achieved what we came here for. When you're not hungry, when you don't feel hungry, you don't eat. When we have brought the system to a balance in the dimension of physicality. You don't need to take more water. To them was a bad news, but to me was the best news, which means I achieved what I built for them to achieve. I used to explain to you to them, that this is what I've been waiting for. For you to forget to drink, or to use a system, which means you don't need it anymore. You have achieved your goal. And they used to look at, the most of it, and said, you're right, everything has changed.

Now it's the same way with the Enhancement Unit. We create a condition, (1:20). it's you who has to understand what has happened to you, and what you have achieved, what you came to achieve. But in the background, you covered yourself, I came for world peace, I came for this, I came for that, but subconsciously, I have many, many, many, many, many, many physical problems, and emotional problems. When you leave the system, then consider, I didn't see any world leaders to create the world peace, I gave my soul. "Oh, but this, and this, and this, and this, has changed in me. I feel different about this, and I know something I didn't know before. And I have different dimensions and position with the rest.

I always say, there is an old story in Persian culture, where there was a prince. And the prince thought he was a cow and he wanted to be slaughtered as a cow. The King brought the best physicians, nobody could do anything for him. As he was supposed to be the next king, but now he felt he had the psychological condition, that he is a cow and he wants to be slaughtered. Comes a simple physician. He brings a rope and a big nail. He hammers

the nail in the ground ties a rope to it, and the end of the rope the neck of the prince. He says to the prince, "I bought you. Now, I cannot sell a skinny cow in the market, (1:22). you have to fatten yourself up, that I can get money back for what I paid, and then I slaughter you. Because then is worth the money."

In the process of the prince wanting to become fat, to be slaughtered, he gave the medicine, he gave the knowledge to his body. Then one day the prince says, what is this thing around my neck. Why am I being chained to the nail on the ground. And the physician explained, in a slow way I brought you to where you should be.

And this is what I've done today, for humanity. In the small knowledge sharing, step by step, I have brought you to see the beauty of the man, in the world of Creation. This has been my job, and up to now we have fulfilled. There's more to come for this cow to be released, to enjoy the pasture of the U, and not to be slaughtered, as he was ready for that.

It comes to the point, that the knowledge in its totality has been given to you by teachings, and in the books. It's for you to decipher, and if you cannot do, do not have the time, it's like what do you do at home. You can make a beautiful Chinese food at home, you don't have time, we don't have the ingredients, you go to the Chinese restaurant, or you order Chinese food. Many of you do not have the collective knowledge to build, to deliver, (1:24). what we think, or what we have and you enjoy. It's for you to order, to get to it, and to find in a way, to access to it, because then once you get the new Chinese, you learn the new ways, and you cook for the others, to enjoy what you enjoyed yourself. And now this is the process.

We have brought you a new pasture, a new feed, a new way to feed your souls through the technology. It's for you to learn it, or to learn to use it and extend your soul beyond the prison dimensions of, you need 10,000 light years to get to the other star. I don't need to, because I can do instantaneously through the fields of the U.

Now you understand what I said many times before, if you can see a star in the skies, you can be on that star instantaneously. And you can ask the person next to you, shall we go to there, and both of you go there, and you enjoy the presence of time, and how I feel, and when you come back, it's like when you go on holidays, and you have a trip together, and you went on safari and you enjoyed it, and you talked what you saw in the safari.

The biggest problem for most of you will be to, in the short term, to get others to understand what you've done, where you've been, and how you did it. And they come to accept the reality. Now you travel in the soul, or P.

The whole knowledge has been shared, (1:26). and whole knowledge is put in a system to share. That it's not anymore mystic, and is not any more theology. And the biggest problem comes when, with this technology, we close the door of theology, that mankind cannot be abused.

The process of the change, for the race of Man has started 3 - 4 weeks ago, and you have not come to understand, as I said, what a huge tanker has hit humanity. It's a hurricane of knowledge, to bring positive change, and to bring a new dimension.

As I said, with the teachings, we have to spend time to teach you these things, that you understand what the next step is, and what shall be. It's the responsibility of the Universal Council members to make their way to Linz. It's the responsibility of the UC Support team to make their way to Linz, because you're there to support the transition. It's the responsibility of those who are devoted to serve humanity through dimension of reality, and not collecting this and that, to make your way to Linz, and bring that change.

You become those candles, that when they put them together, it lightens up the whole stadium. That stadium is the humanity, and the soul of humanity, (1:28). to see itself through these troubled times.

I don't give up and I will not stop. But it's for you to make sure, that you don't give up and wait for the time, that you die for the soul to be free, to go wherever it could be, and you have no choice of it. Where now with understanding the process, you can see where you're destined. If you like the house you're ?? heading for. If you like the position. Or can serve better in my position, or be somewhere else, to do better, to serve more.

In a way, you become the prophet of yourself and your soul. And you don't need no preachers. I have freed you from the shackles of what I call, imprisonment of the STM, it's you have to take that soul where it is to be, not me.

Even though I still keep busy with this and that, because if I go in the dimension of the Soul, what I call, you little children of man will do till you get to that point. We need to guide you. We need to in a way, bring you to the point, that you will reach the point of maturity and understanding.

Now you understand why we gave you the MaGravs, the Enhancement Unit, the what we call, the Vision Enhancement Unit, and now the most essential for most of you, is the what we call, the Energy Power Unit, Energy EU. It's not so much for you to reduce electricity. (1:30). It's so much for you to add to the next D, of doing it yourself, in your time, in your dimension, and gradually free from the Soul of the Physicality, that Soul of the Man works with it, and not entrapped with it.

The STM is like a plasma inside the Tokomak, and the STP is that magnetic field, which keeps that plasma in Tokomak, or in CERN encapsulated. And they're hoping that they increase the STP so much, that one day the Soul will explode, and it creates the energy of the universe. I have given you that, in a very simple system, and you don't need to go through all this nonsense.

You decide when, and you don't need to be entrapped within the STP. Now you understand why we launched the Energy system, why we launched the what we call,

flight Vision Simulation. It's the vision to see the universe, and not for your eyes to get better.

Thank you very much for today.

And I hope I opened a little gap in what is, and what is to come. And part of the teachings as the past 2 - 3 years we taught you about the soul, will be about how to use this system, what to expect, and what it is. It's no use giving you a car when you don't know how to drive it. It's no use for us to release and make accommodation for your soul to be free, when you don't know how to use it. We noticed that in the EU trial tests.

People come in and they said, they've been through, and when you speak to them, Seat 1, Seat 2, Seat 3, (1:32). they feel the energy, but they don't do anything with it. They ?? want to. The minute we tell them, you can travel to see anybody you like, or now you can travel and fly to wherever you like, and immediately they do it. Because they need guidance. They need to, till they themselves decide, this is where I want to go, this is what I want to do.

Thank you very much for today.
I hope I opened a door for you to understand what this technology, now is about to bring you. And I hope you enjoy the trip, an those of you who will become enlightened, you will see most of it, and more of it. And those of you still trapped in D of physicality, you'll say, I haven't seen anything yet. I don't feel anything. Because the physical dimension is more important, than the dimension of the Soul, at that time and position and place.

Thank you very much for today. We go for a break, and we come back and if there's any questions, we'll try to find a solution and answer ??.

Proofed to HERE >> continues

(1:34).

>**>> BREAK** <<< 440 KSW July 7 , 2022 (1:40).

Q: ..

Q: Alexandra … When you say that we allowed the STM to become enslaved I believe and agree. We even have an idea of what it is, and know that we have to elevate and enlighten our soul. But how did this happen? Why did we allow such foolishness of being trapped in the P, why did we loose control of our own STM. Where did we go wrong, (1:42). What was our biggest mistake? Could you please elaborate more on this permission to be enslaved.

K- The slavery of the man to the physicality of the man, and STM, came out of the condition of the fields of this planet. Nothing else. When you created a P , a plant, an animal or whatever. In most of the universal D, the planetary system becomes the provider of, through fields, not through matter state consumption. Due to physical construction of the fields and position of this planet, and it is the same with most of solar system planetary, with our Solar System. We are not unique in that. Is that most of the created things within it were not given enough to live in the D of the field. So the P had to look for, to be able to sustain, we call it life. To be continuous.

In that process, when the intelligence came, when the understanding came, slowly, slowly man, or animals, started abusing in the position of power, or the position of providing, or the position of the knowledge. Then all the abuses started.

The fault came in the fault of the structure of the fields of this planet and nothing else. The fields came together in the wrong way. (1:44). and the fields came together in a very absurd way of creation.

The slight tilt in the P of this planet, has caused, has created a short term life on this planet. What we consider as billions of years, compared to actual structure is not the reality .

If we extend the knowledge, then you'll understand what I am trying to explain. Today with the knowledge you have as KS, and you understand it, because you do it yourself, if, and we done this before. If we take the materials you produce to a laboratory. They cannot tell its origin, which mine, which part of this planet it has come from. But it is the matter, which you have created. Because you created it out of the fields. So does it have the time of 4 or 8 billion years of the is solar system in it?

One of the interesting things that the KS and scientists of the future will do, is to analyze the source, the age of the proteins, the amino acids (AA) you produce on your Gans Boxes. It has no source, it has no D of time. (1:46). This is what the knowledge in the future will teach you. With you creating the AA, with its manipulation of its fields, leading to creation of the soul of your children.

What would the scientists give us. What is the carbon dating? Because that C does not exist, you created the AA out of the fields.

Then is goes back to another essential point that, when they tell us, up to now we are 95% or 99% this animal or that animal, they haven't understood that we came from the combination from different fields and the condition of this planet, forces, enforces conditions of the heart, kidney and the liver. You are not 99% another animal, you are on your own. You are the creatures of the time and what we call, the position you were created. We didn't understand this up to now.

So if you understand these points, what happens when I take a Gans Box on Mars, I take it into another galaxy and I create the condition for it, and it creates a new life. As I told you many times, it's in our lab, I carry a box with me for nearly 12 - 14 years. I have created life. I see them, I see their soul, (1:48). I see their P. They travel with me, Because I created a new cycle of life. Are these animals, are these creatures, or what you created in your AA, are they 4 billion, are they 4 seconds, or are they, once the man becomes educated from the rays of the Creator, which is timeless and limitless.

We have accepted a lot of what I call, nonsense and rubbish in science. And now with this T, all going to be thrown to the wall. You create that AA, AA is the basis of life. How old is that new life, because the rays of it arrived on earth a few seconds ago from moon, or from sun, or another galaxy and became the C in that AA.

Now you understand how present science makes nonsense of the creation. And then you understand, did we enslave ourselves, because of what brought us to, or is it because this planetary system could not support what it made to survive, and it found a way for itself to survive, which became by killing and depending and the rest of it.

You know the old story they said, men worship women because they could give life, and they could not saw (they didn't understand how a child was born - see Bachofen), the woman ruled. When the men found out, that without him there cannot be any children to give life, he took charge. Because without me you can’t have children to control me, to dictate condition f it. (1:50). And then when people could not understand, those who understood, as we say, fanned the fire.

We did not become slave, this planet did not create the support for the life its created. So, the life went to look for ways for it to survive, in the short time it had. The first cells lasted a few seconds, and they learned how to extend it to minutes and whatever, and whatever. And then those who became intelligent to understand, what I have the other one needs, they started what we call, the oldest business in the world. And the rest is the same.

Then we allowed the hierarchy, then we allowed everything else, then we allowed the abuse and encagement of the STM, even the same way, by the STP of the man. The STP of the man has abused the STM by entrapping it, that is only me and I control it. And when I lose it, it is gone, I don't care. So, it's a process in the lack of the dimension of the fields of the life of this planet, which has brought this condition in.

Earth is not unique in that way. Many planetary systems fail. It's like a father failing to be able to provide for his children. Children go out, they rob, they steal and anything to survive. And so has been the story of the man.

This is why in the new process, we create the children of the man from the STM, not from the physicality of the man. (1:52). And the first children of Mitra have born that way. The change in the condition, even though from outside looks the same. Till the man learns, till we look at the STM and not the STP of the man, and the physicality of man in condition of the interaction of the fields of any planetary, solar or ?? fields of the universe.

We only can manifest ourselves if the fields interaction of the Soul and the STP, in interaction with the Soul of the Environment allows the manifestation. If it doesn't, it cannot manifest itself. We see this clearly in the Enhancement Systems, people go in. They tell us things, we see the proof of, what to be corrected.

They go to places, but they cannot manifest themselves, but they feel, what they call the fields, and we understand what they felt, because that's the way you dream, imprints on the brain, which is the intermediate between the STM and the STP of the man.

And this is the beauty of it, that we understand. It's not the fault of the man who has become. It's the misconstruction of this planet. This is why we encourage the use of the Gans's, to bring into balance what the fields of the planetary system could not do at the point of creation.

When you use so many Gans's, in so many ways, (1:54). you make that connection between the planetary system, and your physicality and your soul. That's what's missing. You have to take Zinc, you have to take such and such a thing, you have to take. Man never knew he has to take CO2 to make connection between his physicality dimension.

This is the strangest thing for me for years. And if you go to the teachings, we always said, Carbon is a connector. We need the CO2 as a connection between the STM and the STP of the man, and nothing else, more or less. But it's part of the AA.

And this misbalance is not unique to Earth. But on Earth, man has learnt to abuse each other. The time of maturity comes, when we stop the whole process of religion. But we become the understander of the religion, which is the conduct of the STM. Because all the abuse of the man, both in dimension of Physicality and the Soul, has come through his lack of understanding of the presence of his Soul within himself, and those who abused it, in the name of Religion.

This is why religious leaders oppose the Keshe Foundation, because it gives you the independence, it gives you the understanding, to understand the truth. And you have control over it now, with the establishment of the Enhancements Units. (1:56).

Now you understand. It's small, what we call, change in the construction of earth planetary system, has led to need, to find additional supply to guarantee extension of the physical life. But at the same time, the Soul has used this to, what we call, enrich itself to become, to find a position and the place.

Any other question?

Q: … Can you please elaborate on why Earth was chosen as the bearer, or teacher of the Creator's knowledge within this universe? Is it to do with the history of man?

K: Oh no, no, no. It's the beauty it created, and the Soul of Mitra saw it, and got attracted to it. And, love affair is not exclusivity of man, today's age, even dinosaurs used to fall in love, and the way they used to love. This is the way the birds love each other and mate. That triggered Mitra, and the rest is the history of the Creation. (1:58)

She saw the pitfalls in the structure of this planet, in elevation of why a lover uses, or abuses the other lover. She went to collect the best of the universe, to bring it, to cultivate it in this beautiful planet, and nothing else.

Its like when you find a home, you go and find the best furniture, the best things for it to show its beauty. Her beauty was to create these children on this beautiful place she fell in love with. The biggest problem for Mitra was to bring the Creator, to create the children of the Creator on this Planet, in the dimension of the Soul. Which is the energies of the Creation and not the physicality. But, it gives it a physicality dimension, that it can be enjoyed in both dimensions.

Mankind has not understood yet what has happened to him. Mankind hasn't even got a grasp of what is to come with the presence of the Creator and Mitra, and the children on this planet. Don't forget, as I said in all the teachings, even on the intro, your Soul becomes a Creator of other lives. Now the Soul of the children of Mitra become the creator of the new cycle of life in the Universe, perfection. Because they create it through the Soul, not through the dimension of physicality that it has needs.

Any other question?

R: I was in the presence of someone that had an 18 month old child a couple of days ago and they were remarking on how smart and fast they were, (2:00). how quickly they learn, it seemed like much faster than the older generations, kind of thing.

K: Yes because they are accumulating everything. But now they accumulate the knowledge of the Creator and Mitra, which is an amazing thing. We are witness to it, and we see it. And the what we call, the children of Mitra will come through the Soul of the Creation, not through dimension of physicality. We'll feed them different, we'll look after them different. We love them different. Because, dimension of physicality to them is not so important. We feed their Souls, we teach their Souls, we teach them about the cycle of Creation.

The children of Mitra are amongst us we have no knowledge of how they will bring the change. It's very much like, what we call, the beginning of time, you call it, the "Adam and Eve," the first man. But this time the first cycle is through the Soul of the Man, and it's amongst us. The child of Mitra has been born on this planet. It's for man to find out.

Any other question?

Q: … (2:02). How soon do you think all mankind will have access to the Units?

K: First of all, our people (in the lab) have to understand the production of the perfect Unit. As you seen, we gone step by step. It took us years to teach, it took years to build the first unit, and it took us years to bring the EU the way it is, and even with all the thing is done, we still rapidly developing, and changing, and perfecting the system. It's not the knowledge that is not available, our systems, our people have to understand the knowledge, that it can be replicated. It cannot be blindly, I say so, and you do. They have to understand it, to feel it and go through it. Then they can put it together the right way.

In a way, it's like when you go to a bakery a class. The teacher knows what cake you're going get at the end. But he teaches you about what flours will give you this, why you need this sugar, why you need that, and then shows you how to put the ingredients together before you bake the cake. We are in that stage. Students have to learn which flower, why and how it can be used for what purpose. Our team are very fast, extremely fast. Because they feel the fields, they feel what we see, what you see in the process of production. (2:04).

The most amazing thing is, the production system, the production process team are from different nationalities. We'll see how collectively they work together to bring these things together. You move out on Wednesday afternoon, and these people move in on Thursday morning and Friday morning to start the changes for the next Tuesday you come back in. You don't see them. They come from different cultures, different races, different understanding, but they know what is to come through their Souls, and they work devotedly to get things done. This was the whole purpose, that it doesn't belong to one race, one nation, or one place. Then you get the others who come in the background, making other things ready for you, to come in to receive, and this is how the knowledge is shared. Once they understand, .. the next step is coming.

The most important thing for Knowledge Seekers now, the way I see it, is the Energy Enhancement Units, which has been released, we'll explain the reason for this very, very soon. Try to get as many as you can across this planet, from different positions. Don't look that it gives me energy saving, you look that you create the next step for the expansion of the Soul of the Man on this planet. It's a different purpose. It's to serve and not to be served. That's the hope purpose of it. Then you will see the changes will come.

Any other question?

(2:06). R: Well, believe it or not, you've actually covered the questions that we have here today. The attendees seem a little shy to raise their hands. I'll remind you once again, there is a function to have your virtual hand up… Ah there's one right now just mention it.

K: Have you noticed we're getting to this now in the past few weeks. People have seen how what was promised them, is coming to reality, that they have no questions. They don't know how to answer their own questions, or they find an answer to the questions.

It's the 3rd or 4th week, since we started the Enhancement Unit testing, now what was told, has gained dimension of proof and reality. A lot of people don't know how to handle this. It's not anymore something that will be. I was looking at the break, at the flights to be done in June, the flight of the Soul of the Man has started on the sixth of June as we promised.

This is the biggest problem for our KS, fulfillment of a promise. This promise was given by Christ, by Moses, Mohammad and the rest, and it's fulfilled.

When the man becomes the witness of his own soul. That was the promise, they all looked at it, therefore they called it, the Day of Judgment, and the rest. Now we find out that we are the judgment, and the judge is us. Do we want our Soul to take next step to free it from the physicality. Now we do it the correct way. (2:08).

Many Knowledge Seekers in near time will go to the dimension of the Soul to absorb the energy of the Universe and come back within the dimension of the physicality, for to feed it from inside, that man will not destroy, kill, or whatever. You do this trip not every day, three times a day as you do in a physical dimension of eating. You do it once a year, once every 1,000 years. But, you gather fields which is in the Universe free, and does not damage no one, and through it you feed the physicality of the man, as needed. It's an interesting time ahead as man understands more and more.

What is the question?

Q: .. Antonio from Australia. Thank you for the teaching today, Mr. Keshe. I've been following you for quite some time now. Just a simple question, with the new MaGrav Power Unit. Now, does that have an effect on other people in the house? As in say, there are three other people here (living with me)?
K: Yes. Yes.
Q: So, I would have to make them aware of that, (I am putting a unit in) or?
K: I think they become aware of it themselves. They become, you'll see the change. You'll see the change in behavior, you'll see the change in understanding, (2:10). you'll see the change in .. knowledge, tolerance and wisdom.

You try to get the wife or the husband to work with a Gans's and they call you (names), you are this and that. Put (one of the new) Units in the house, and they'll worship you in time. Because it brings love, it brings understanding, it creates a condition of peace. We

tested this, we tested this in different ways, now you see the fruit of it. We left Gans's in the houses where there was a lot of conflict, just in jars, in Cups in all sorts of ways. We've seen how the fighting battles have become loving battles.

I remember something in Belgium. We had a young couple coming to see me. They had a lot of problems, in all shape of dimensions, each one of own, with respect to the others. We had a young couple and we had an old couple, the same, but different conflicts and problems. I met this couple, both of them, after a few weeks of they use the systems. I asked the young guy, what is the position? He said, life has never been so good. It's so pleasurable to live. (2:12). I asked the girl beforehand, privately what was the problem, and I knew the problem, both sides. And, they fell in love with each other, unbelievably, because through the system I elevated their Soul. That's all I did. All the systems we delivered around the .. medical system is the elevation of Soul System.

Now that you understand we can explain. It gets so bad, this love affair that, the man used to be a mechanic, I think they're on the line, they listen, they always been following the teachings. They can tell you if they are there. One day they will tell you. She couldn't get enough of him. What was despair in the relationship, became unbelievable love affair. He used to be mechanic and used to repair cars in the house. Traditionally, in Europe, people do their works in garages and whatever, as part of the house within, it's connected to each other. She walks in trying to get him for, I found out the reasons later on, she wanted to show how much she loves him. She missed the ditch, which they have, they dig, to go underneath of the car, and she broke a lot of bones. She said, I came to show the love, now I get ?? with this, what used to be conflict.

We had an old couple, they had a lot of conflict in their relationship. I gave them the elevation of the Soul Cup, but those days we used to cover it under different names. After a few weeks the old couple came, they were in their 70s, and I said what's the position? She said, it’s so beautiful to be with, we do a lot of things together, that we never could do before. I don't know what's in the Cup and everything else. (2:14). I said, I want to do something. I made a Cup for the Soul of the Man, and I made the Cup for the Soul of the woman, and they were talking so beautifully, that they were in love with each other again after years.

I said, I want to give your Cup to her, and her Cup to you, and come back to me and tell me. They came back after a few weeks, and I said to the lady, what is the effect? She said, I love him more, because now I feed through him, and whatever. But he had a problem the first days when she was using the Cup, which I used, it was made for me. Because he couldn't accept, that you could be loved so much.

It's now what you see as the Energy Enhancement Unit. We are not calling it, power, it's energy enhancement. It's the energy of the Soul of the Man to be enhanced. None of you understood what it is. No money in the world can buy it. When it brings the joy to the house and changes in the mankind.

Q: The old MaGrav system is different to this one here, is it? Is that right?

K- In a way, yes. In a way we have extended the knowledge.
Q: I've booked in for the flight system on the remote.
K-The mobile system.
Q: The Mobile system.

K: Yes! I've got a news for you. You brought it up, we can tell you. We explained to you when we brought the mobile units, that we will try to do it after November. (2:16). If our system works the way we'd like. I have invited the first person to test this next week with us.

So, we do not know the extent of the interaction, and she is Australian, by the way. We have, we think we are in a position, we'll run it for a few hours, for a couple of days. In the next couple of weeks, we might go for the mobile transportation, what we call, transmutation of the soul.

We will inform people in the background, we ask you to please keep it silent, not to go out (and tell others), till now, we smooth out all the .. rough edges of the technology. What we wanted to do in November and beyond, to start. We actually start from next week. So, you might get a call from us, "would you like to start? And please keep it quiet, if any of you receive it." We'll try it. It doesn't mean we'll be successful as we sort out all the parameters. But the advancement has been so much, that from next week we'll start the transmutation, the mobile system testing.

Q: The reason, Mr. Keshe, that I chose the Mobile system, is that I don't like to travel around these old airplanes, 30 hours of travel, it's too hard. (2:18).
K: I know, but, we are going through that process of the transmutation of the souls, in the Mobile D. I think we are ready, this system is actually getting finished in about. We should be able to start the first tests. I told our team yesterday before. we will start, the way we brought other people to use our technology, to be perfected, the way it is shown now. We'll go the same way. We keep it very confidential. We start the process to see how, what, where and then many of you who booked a Mobile option, you will get a knock on the door, as they say, very soon.

If you have the new energy Enhancement Unit, it makes it much easier for us to do this, because we can position you exactly where we want it, with the right energy transfer.

Q: You're talking about the MaGrav power unit?

K: Not the MaGrav, the New Enhancement Unit. The New Enhancement Energy Unit we launched last week. It’s part of the transportation and transmutation. It’s not just the energy as electric energy. That's why we call it Power Enhancement Unit.

Q: This is the one that the Iran has made, you are talking about? The one from Iran. The Unit?
K: It will be mainly in Iran, Austria and Mexico. We're producing in three locations and China.

Q: Okay. I'm just trying to toss up whether I need to invest in the MaGrav power unit for having the experience of the Flight System, is pretty much the same, you know? (2:20).

K: One has the position of being able for us to deliver. With the people who buy the energy units, will come, they get, as I said, a knock on the door for another purpose very soon. What we call distance transportation and transmutation will become part of this process. It is part of what we need to do to extend and to bring what we're looking for.

In a way we make your bedrooms your airport, if you understand it.
Q: Sounds great.
K- It's not sounds great. It is. The technology exists, it's in our grasp. It's just that, do you want to sit in the room with your daughter, and your son, and your wife, and at the same time have the possibility to bring the grandmother, grandpa and the aunt who passed away years ago, and you all enjoy the presence of their soul. If you understand the implication of the new system.

This is not any more theoretical. This is the reality that you've seen. Many of the people who've been to the Enhancement Unit, especially in the last two sessions, we directly went for Knowledge Seekers, to ask them to go to a member of the family. And we've seen it with even couples, they went and they saw their mothers and the fathers. We've seen the sister going directly for the brother, she's so much in love with him, it's amazing. I have seldom seen so much love between a brother and a sister, it's amazing what… It's recorded. You see the beauty of the soul. (2:22). And this is what we're trying to bring.

Q: The one thing that had a profound effect on me was a puppy dog, that I called Robin Hood, and he passed away. Well, he got run over and I was just devastated, absolutely devastated. It's taken me a long, long time to get over it. So, in this transmutation system, I could meet Robin Hood again?

K- That's your decision, the decision of your Soul. We are not selling for you to see the past. We are developing a space technology not only for the physicality of the man. And it's a scientific system, its not something which is not.

As I said, I explained before, we do what you do when you sleep, we extend the field strength outside the boundary of the Soul, in a way weaker, that the plasma of the Soul of the Man can travel.

It's a wrong way to say, if you will get this, you do this and that. But we are testing, we are testing with the people who come to us without them knowing it, or partially as what we do, in how we can bring these things together. It's very interesting how .. the people in the center of the room feel, compared to when they are in the machines, even the respect to each other. (2:24).

Q: I noticed when I looked at these people who've been in the unit they are glowing, glowing with…
K: With the love and excitement.

Q: Yeah. Yeah, it actually I felt it emotionally myself. It's very powerful.

K: We don't show most of the video recordings, they are kept in our archive. And a lot of people don't want to record it. We have people who've been through the system, so profoundly affected them, that they are booking for a second time. We already have second bookings, and people want to book more, because it's fundamentally changes them, fundamentally touches them.
Thank you very much.

Q: … (2:26). >>> Carlos speaks in Portuguese Language <<<

In the teachings of the Knowledge Seekers Workshop 207, it was taught about the importance and life of the Vertical beings in the knowledge for traveling to deep space and the quoting starts like this. As we open up the journey into deep space for man, man have to understand the secrets of Creation, (he will continue his question) …

>>> Carlos speaks in Portuguese <<<

… this is one of the vital points it will be used in all the journeys from the space dimension into deep space. This is one of the fundamental points of understanding the creation of conversion, and plants do it so skillfully. (2:28). and we as humans, do not understand this until now. So, could you give us more guidance regarding this quote?

K: The world of Verticals is very much, most of it, a pure life. We always considered that the rain and the rest will bring life to the plants. But in fact, the plants themselves absorb energy of the Universe, they invite the energies of the environment to come to them, and to gather on top of their leaves, or whatever. That they don't need to kill.

In a way, vertical life is a perfect life for the life of human in the Universe. This is how life exists, but in a much simpler way than the vertical life. We always consider, we're told, that the sap goes to the tree, and the rest of it. But, in fact, a lot of energy, which the plants absorb is given, as in a way, to the ground, to where they are. We always consider that the plants extract minerals or whatever, from the ground, and whatever they do. But in reality, as an energy form, plants give more to Earth than they absorb from the Earth. And they revitalize that energy back to themselves.

They take this energy from the space of the environment they exist and they live. As I said many times, (2:30). if you touch a leaf, any green leaf, you see it's not dry, it has a sort of waxiness to it, sort of oiliness to it. It doesn't matter where they are. This oiliness, as we always explained before, it's created between the two layers of what we call, the leaf itself.

You have the two layers of a leaf, and within the like, your Gans Boxes, they create a specific magnetic gravitational (MG) fields, which attracts different amino acid strength to the leaf. Then they take this energy, and they use it. In a way, when you see a leaf on a

tree and the branches, they feed part of what they absorb into the ground, and this stays as part of the energy for the cycle of life.

This is, even when you see when a tree turns over, when a tree dies, it doesn't leave only a fingerprint of its branches on the tree, it leaves a massive fingerprint of energy on the ground they grow. Because in the world of the man, we go, and we what we call, release the energies, or materials we ate, we don't want, going to (toilet), whatever we do. The plants with the energy they absorb, they release it into the ground they exist. And the earth uses it, that's why we see different trees in specific positions on the planet. Because that part of the Earth needs that energy for the processes, which are underneath that ?? life, (2:32). or within the environment that ?? life

We have understood the cycle of Creation totally wrong. Then we see, that the plants do not kill, because they just create those fields, which gives them the what we call, what they need to give to the environment, for the environment to exist. This is the beauty of it.

If man could do that with his body, the correct way, we will not kill. The vertical people in their soul have sorted this problem out. They create the environment underneath, and the energies, which are on the ?? surface on the planet, in that environment, can sit and give the energies to them to live. Mankind has not understood this. In the process of the new transitions to work of the soul, many of us will absorb the energy different way on our skin, and our from our environment.

That's why in some of the recent teachings I explained, man physical appearance will change beyond imagination of today, now that we understand this technology, now that we understand the truth about the technology of the Creation. It's very easy for mankind to transport the soul of Vertical people of ?? Universe, because they live more or less, like the rest of the U. (2:34). So for them it is a natural process.

Any thing else?

Q: .. So Carlos would like to know more the relationship between the Soul of the Man and the soul of the Vertical beings. If you could explain more about this to us.
K- Can you repeat?

Q: .. (2:36). He would like to learn more about the process of breathing of the plants, how they do this breathing method, and how we as humans can do also the same process, for our travels in deep space. And even living here on planet Earth.

K- The process of breathing, or what is called, extraction of the fields, is due to the two Nano layers of the leaf. Every leaf has two Nano layers, one on the top, and one underneath. And the difference between these two, creates a condition of extraction of what is needed from the environment. You pick up any leaf from any plants and turn the back end, and the front, they are never the same ?? pattern. Even on the pine tree, you'll see a slight difference in one of the sides, a slight narrow line change.

This, now we know the knowledge of the Gans making. This is like putting a Cu and a Zn, one is Nano coated, and slightly different than the other one. And this creates the fields, which is the energy, which this plant can survive in such a an area. That's the way they extract everything they need.

It's not so much oxygen, and so much Carbon, .. connection to the rest of the environment. That's why they work on a CO2 basis. (2:38). They need that CO2 to make a connection with the rest of the fields in the atmosphere of the earth. And we say they release, or they extract CO2. Don't sleep under a tree at night, because it's taking CO2. In fact, that what we call the CO2 is a combination of the fields, which tree needs in its process of life, to connect to the rest of the energy fields of the amino acids, or free energies, which it needs to be sitting on. We can replicate it, humans can do. It's a long way to go.

It's very interesting, if you understand the principle behind what I'm about to explain, because we all know it. We see the people who eat a lot of garlic, their skin the smells of it, the body. The people who eat certain kinds of food, we see the change in their .. features, and their body odor, and the rest of it.

(What we eat creates the condition inside - to absorb fields from outside)

So, this is not what they release, it's what they absorb from the environment to create that condition, to show what they are connected to. If you understand this, it will solve a lot of problem in the future, for man to feed himself. With what we drink, with what we decide inside, creates that fields, that absorbs the material from outside. And this is what man has not understood. (2:40).

Any other question?

Q: .. Can you expand on the future cities? How would they look like?
K- Do we need cities? Or would we make a city out of the planet? Would the man now knowing travels, and can fly in the space of universe, will build places to encage his P.

I wrote years ago, that with this technology, the real estate's become useless. Would you like to be in a cramped area, in a 4 meter square property, in the middle of a city with all the noise and hullabaloo. Or you like to live in the country, in the middle of the fields with the cows and the birds, and enjoy yourself. And if you need to come to the city, you come to the work. If you work in a factory, you have to go and produce something. The new Corona condition showed us we don't need the cities.

Most of the city offices at the moment, in major cities are empty, because now people work from home. And the companies don't need to pay so much huge rents. A thousand square meter office now is only 20 square meters, if somebody physically comes to see. What do you get when you go to their offices. (2:42). Sorry, because of the Corona everybody is working from home, and you can get them online.

We have already moved to the steps of not needing the big cities to do our work. And you don't even need to be in the country you work with. So now that we can travel the dimension of the Soul, would your soul allow you to suffer and go through the pain of physicality, living in a cage in the city. Because the soul knows, it can bring you to do your work and go back, instantaneously. We go to places. We don't fly to places anymore. And when we go it is instantaneous.

So cities of the future, what do we expect from it. When the soul can extend its strength to create a perfect physicality, do we need a hospital, when the soul ?? feeds the ?? the needs of the man is, do we need prisons, and the courts, and judges. I told you this is going to be a different life.

People will meet in dimension the physicality just to love, and share the love of Creator with each other. This is something you will see a lot in the coming time.

It won't be in the time of your children. It's in your own time.

You got the first taste of it with Corona. Governments were forced to support people who have no jobs, and people jobs it's not just enough to eat. Enough to have a comfortable life, and some how they can find the funds. And on some occasions they can produce enough ?? gold for them. I see ?? ?? politician will go. ??

We'll go back if there's the pleasure of the governments to have a solid backing as gold, we give you the Enhancement Units, (2:44). to create as much gold as you'd like to be the backing of your currency. and to ?? feed ?? people . and now you can do.

Then we go as we say, we don't need the actor (Reagan), to change the backing of the greenback from gold to fantasy money.

Q: .. Thank you, Antonio, for your interaction with Mr. Keshe which opens technology even faster to humanity. Enjoy your visit to Linz.

K- It is a trip and it's something which we. We have a reason that we launched the 3000, … plasma energy, plasma units. This is the minimum common denominator we need to create the dome. The spread of the new Enhancement Energy Unit, (2:46). will become part of the future satellite system of the transportation of the energy of the man. So, when you buy, or you get one of these in place it in your home, or in your office, or wherever, you start the next cycle of what we call, "no need for satellite."

This is essential for us to complete, to be able to enter the next phase. The faster we deliver the initial 3000 units, it's like Chinese are trying to put, I think, 500 or 5000 satellites. You don't need to go to space. Now use the transformation of energies. You will understand exactly how I work in a very short time, once they all run into operation.

We use the universal network, and not the man's communication side ?? in that process, because you don't only need to travel on earth, you need to travel beyond, if you go

anywhere. These 3,000 new enhancements has a purpose. We don't always explain, to tell people what we're doing, because it's beyond your comprehension.

You already, a lot of you made the MaGravs and you have connected the what we call, sub-structure. Now we bring the next level, which is the most important part of it. Those of you who get access to these systems, (2:48). don't bother trying to understand it, because the knowledge is in a very simple way put out, but has a huge implication in the future of the .. development of the man's knowledge, and ???

Any other question?

Q: … First of all says thank you for so much love donated by you in the universe. What is your opinion about Google's AI which calls itself a person and legally seeks to be recognized as such?

K- It's the first time I hear of it, so I cannot put an opinion. I don't know what it is.
R: Well, the AI is just the what they call artificial intelligence. .. Some companies will be putting out robots, like that will be have artificial intelligence. But Google has an artificial intelligence, which calls itself a person, and wants to be legally recognized as a person.
K- Didn't the Saudis bought the first beautiful girl as a ?? So women attracted the Saudis men, so let us see, what attracts the humanity to Google.
R: She may the demand, that she is a person, and will change the laws being behind the scenes in order to be recognized probably. Here again, its quite powerful.
K- You can do that, (2:50). only with men, and Saudis. No where else. When you have four wives, your brain works in different way.

R; Men are men and women are women. And it seems to be a universal kind of issue.
K- It's like the two sides of the leaves, together they create life?

R; Well, that brings us exactly to the next question, but go ahead.

Q: .. even the hands and feet of the man remind me of the leather of the plants. And she mentions the top of the hand is different than the palm of the hand. It's, and so with the feet.
R: So that's a good observation. Our palms are totally different than the top parts of our hands. And that's very much like the leaf.

K- Yeah, if you go back to some of the teachings, very pastime, I showed you how to put your hand out, and absorb (energy). You can do a lot. Your fingers, the shape of your fingers, everything else with the construction of the skin on it, dictates in a lot of ways what do you give, and what you receive.

It's very interesting. When you enter the Enhancement Units, or the preconditioning of the Enhancement Unit, the ?? Head units, we usually give people, the first time the 2, what I call, electrodes to hold. They call them joysticks, some people. And then we ask

them, (2:52). whenever you feel you can let go. But initially we have to establish the connection between, what we need, what the system is set for.

And 90% of the people who are spiritually developed, 90% of the people, they sit with the two hands on the lap, facing upwards with the open condition. What is interesting when I look, is the shape of the hand, which gives me a lot of knowledge. Those who sit in the chair and they open their hands and they have their fingers like this (little bit curved upwards). Those who have fingers like this (straight out), and there are those who have their fingers that are literally turned (inwards or closed).

I know which one is going to benefit by the system. And I'm 100% right in every way of it. People who come with this finger setting (closed), and some of these (little bit upwards), will get nothing. They are grabbers, their physicality says, I want to take. Most of the ones who come with the straight fingers, are the ones, which enjoy the trip, because they have come here with a clear conscience. It's part of their life, they live their life. It's not just being in there. And you see them with a what I call, a giving hand.

We tested this over years with many volunteers who came to me for building them what I call, the enhanced soul units in Belgium. One of the first thing I asked people was, can you open your hands in front of me, and they just open it, like you know, showing their palm. (2:54). And from it I know what kind of the person I'm dealing with. Whatever you give is not good enough.

We see this very, very clearly in the Enhancement Unit. People who have been there, they observe, I walk in, quite a number of times when you are in. It's not just watching the system. It's to watch the physical behavior, your hands, the way you sit, the way you couch, the way you move, and in the first chairs I know what more or less what we are going to get from the person, and 99% of the people who come like this, they don't experience anything, because they are there to take. "oh, I am here to give." Don't fool me, your physicality tells me you're lying. I've come here to steal and the system is very knowledgeable.

Any other question. It's 12 o'clock the God is calling for money, I can hear the church bell.

K- I can hear the church there in the background, God calling for money.
R; For money.
K- That's what the churches are nowadays, abusing people sexually, physically or their money in their pocket, either way.
Any other questions? (2:56).

Q: … So have you always known what you've taught? Or was there a point in your life where the Creation became clear to you, like tapping into the plasma? Or was it all just accumulated education on your own accord? And the three layers like of the leaf, is the

covalent bond creating the center energy received, and given … creating the center energy received and given, right?
R: I think that was two questions. So he was interested in whether you've always known what you're teaching? Or was there a point in your life where the Creation became clear to you, like tapping into the plasma?

K- I've explained this, sometimes ago in one of the teaching, exactly the process I went through. It's very much when you talk about revelations, or when you talk about Moses, or Jesus, or whatever they go through, the step, and they see the light and the rest. It doesn't come that way.

I knew at a young age, that there is a destiny, there is something to happen. I was ?? asked, and I was given the opportunity around the age of 19, to take the banner of the knowledge, what there is to be, and I clearly remember battling, that I can't accept it. I'm too young, I want to ?? In my mid 20s and that time, (2:58). I went through a very strange experiences. I've been through this completely twice.

Where it was like, you wake up, but your body is a stranger to you. Your feel of the physicality is not there. And I knew I have been given a new Soul. Elevation of the soul.

The second time was much easier, because it lasted for days. You touch a cup, it's not your touch. It's like the elevation, the knowledge is what you have is much bigger. And I refused both times, because I was not mature.

When I was 40, I accepted. And the knowledge came with elevation of the soul. Because it was already there, it was built from young age. It wasn't something that was flashed in. Then I understood why I was born in the house with the field radiation. Why I went through education as a nuclear. Why I went in the world of business. Everything made sense, that I could understand the full spectrum. It wasn't something like, what do you call, as a virgin, suddenly dawned on. But you understand the development, you understand the progress.

Then knowledge is part of the ?? In my teachings I listen, I know the difference when the soul teaches, and when the man teaches. It's the dimension of the Soul of the Creator, that's why the knowledge is so pure. And there is no expectation. (3:00). Living the life like this for such a long time, I always said, it shows the purity of ?? serving. I never asked for anything. I just facilitated the physicality.

I always said, what is ?? there to be ?? I don't ever worry about tomorrow, what is going to be, because it's a cycle of this. It's always there when it's need to be, and it changes according to the time when the souls have agreed to be there.

And sometimes when it goes through the time delay, I thank the soul, that allowed that delay. The need to see, to understand what in the dimension of physicality, I could not understand. But the soul is carrying on with its work.

It's very clear, especially if you listen to some of the teachings, the word of the Creator through the soul is very clear. It's not the word of the man. (I) never claimed to be a prophet, we're just Messengers, messengers of knowledge, but through the Source, not through what I call, "play games," and theology.

It's not a knowledge that is gathered, it's a knowledge that is gifted, which is totally different. (3:02). As I've said many times to many of you, I used to teach with Knowledge Seekers sitting around me in, and live, in the Inzano, Barletta, and other places. I never carry a transcript. Most of the time, even Rick says, what's up for today. I say, I don't know, I start teaching, ?? He knows what He wants to release.

R: It's true. It's worse than that, I never know beforehand. What's going to happen during the workshop basically. It's there's a .. we do the "seat of the pants" method, wing it.

K- It's the knowledge of the Creator, doesn't need the seat of the pants. He does, he has already taught the rest. It's interesting the way, when today, Knowledge Seekers go back to the teaching of number so and so, or such a conference, or whatever, how it matches up years later, with what the teaching is today. Because the seed for it is set, He is so kind. And He is so omnipotent in knowledge.

Sometimes I, like you, listen to the teaching, because when the soul teaches, the physicality talks, but needs to understand. I sometimes listen 2 or 3 times the teaching, to see what the teaching was. And what it means in application, and implication, and the physical side of the development of the technology. Never claimed much. And when I claim Messiah, because it's the soul of the Creator, not the man. Man soon will understand.

Any other question.

Q: Well we have a question from Jalal. (3:04). He says, as you say, Mr. Keshe, are we there yet?

K- You haven't even started the journey. We have started a new journey through the Soul of the Man, and this is the beginning of. We're still packing the things for it to be ready to start the journey.
Shall we call it a day?

R: I think we ran out of questions.
K- Thank you very much for today.

Please understand why we released the Power Enhancement Unit. And please make sure that we have at least a few 100 in each continent. It has to be, that we can go through the next step of, what I call, the development for, to free man from the shackles of present prison. You'll soon understand.

440 Knowledge Seekers Workshop.

K- Can I come in please, one second. Maybe it'll be good for us to send you some recordings of the Testimonials of the flight system, because we don't get a chance to show it and set up a special programs for it. .

Let me speak with the people in the background and see how we can get to some of the testimonials from the flight system. Because this way the people will see the recorded, many … …. otherwise we pass them on to you , that you can put into your teachings.

440th KSW July 7, 2022

(:22).

K-

(:23). K: Yes, as usual, wherever, whenever you listen to this series of Knowledge Seekers of the Keshe Foundation Spaceship Institute, across this planet and beyond. We welcome you back. And we welcome you to a very .. magnificent teaching today. Teaching of today is mainly on the structure of what we've done in the past, and what we've been done. As many of you know, we invited you around the world to come in to join in, in the simulation flight. We explained to you in the teachings of the past couple of weeks, that we are in for a surprise, with the new enhancement simulation unit, which was added to our test this week.

If you remember, when we started the process of the enhancement flight simulation, we had a process of two units, where we had two passengers on each, we accommodate 2. We allowed you to sit in chairs one by one, get prepared and join any of the flight units, in either way. As we said to you, the evolution in the knowledge, and understanding and testing. It was interesting for us, it was important for us to understand the work of each Seat (Chair), Physicality (P), Soul of the Physicality (STP), and the Soul of the Man (STM). And, as we understood, confirm, we understood correctly. Many of the people who went through this and you heard it in the testimonials, they talked about the Seat 1, Seat 2, Seat 3, and then how they felt, and when they went into the system. (:25).

In evolution of knowledge and technology and development, in the past weeks, we have eliminated a lot. But we kept one side of the system, the original way, and one side the new way. And, amazing enough the response, the condition we have seen in the new system in the past in the testing of two days. It did not surprised us, it confirmed the correctness of our decision, our technology, our understanding, and the beauty of it is that now, in this system, we have replicated literally, instead of three parts, elevation of the Soul of the Man, Physicality of the man, and Soul of the Physicality of the man, in one go.

But the beauty with it is, it’s like you get yourself prepared and go to the airport, and you wait till your flight gate is announced, and then you say, "oh, that flight, that gate is where I'm going." But the interesting part has been, when we sit people in this, the new system, they go to the airport, they sit in the machine, very few moves to do anything, because they are there, it’s just you know, I have a drink, I have a coffee, I go to the Sweet Shop, see what's for sale in the telephone shop. They just hang around, and we watch them hanging around. (:27).

Then we tell them, gate number two is open, you can go and see the grandma. And strangely enough, they go and see the grandma. They talk to grandma, they hold the grandma. They talk to their mother, they talk to their father, and they enjoy it. Then if

you ask them, or we inform them, you can now take the grandma for a walk, or take grandma's somewhere to go to. They take the grandma to go somewhere.

If we have a couple sitting in the two positions, and we ask the couple, we did it yesterday, go to Paris. Both couples together go to Paris, and they tell us what they saw. We get another person and we tell them go to Paris, they go.

We asked one to go to Katmandu. I couldn't go to Katmandu. How come? In the essence of the system. We had the French couple a couple of weeks ago, the soul of the language of the mother language is imprinted. Even they're Germans, they are connected. We had no one from Katmandu. So, our people can't go there. We have no one from China, no one can go (to China). The understanding of the language comes in, and then we see the process is completed. Make your way to the exhibition center, go through the process, (:29). and bring that change for humanity.

Next week, for the first time, we'll try to transmute. Those of you who come and volunteer to be transmuted for us to try, you sign a separate agreement. You accept the responsibility of the transmutation.

Don't worry, we try not to leave a leg behind or an arm, behind because when you're in this system, there is no legs and arms. You have converted yourself in a packages of your soul and energy. All we do, we pass the envelope. We do not care what's in the envelope. Is it coin, is it a check, is it a love letter, is it a sad letter. You carry it. The systems are ready for this transmutation.

From next week, we go to the next phase of transmutation and transportation, showing the man can travel in the dimension of the STM. Would we succeed? We hope so. Would we not succeed? It means we have to go back and learn more where we missed, where we dropped the package, and collect it and bring it.

It means, we create the first cycle of the MOJHANS transmutation, man of love for existence. The one you will love most which is the physicality of the man, loved by the soul, and the STM loved by the physicality of the man, like a brother. (:31). This is what it is, what MOJHAN means, MOJHAN means brotherhood, MOJHAN means loving, unconditional love from one brother to another. Soul of the Man is the brother of the Soul of the Physicality of the man. No questions asked, not subordinate, but they're lovers. And understanding this, we transfer the two from one to another.

The process of understanding this technology for many is a lot. Yesterday for the first time, in the process of the development, I handed over the running, the monitoring, the operation of this system to one of our leading doctors. At the beginning we taught, and then it was left to him. So, the teaching of the doctors to monitor has started.

The next generation of what we call the Knowledge Seekers (KS) of the Keshe Foundation to take over the realm has started. Those of you who were in the center yesterday have seen it. One of our leading doctors has taken over the operation of the

transmutation and transportation, first for himself, he had to feel it, he had to understand it. You will not see me much when you come, as more and more Knowledge Seekers of the Keshe Foundation will take over the operation, as we go for the next stage of development, and development of many other things. (:33).

In the past few weeks, we have understood more and we develop more. In the next maybe, as usual Keshe Foundation is got too many fingers in too many pies. The Vertical transportation and transmutation system will be shown in the exhibition, where you can walk in and where you can transport yourself to.

This transportation and transmutation testing, will be ready, depends on our team, they have too much in their hands. But, now as of yesterday, has gone on to what we call Planning Board, maybe next four to six weeks will be ready. This is what I promised you when I showed you the Exhibition Center, I'll take you from one position of the bridge to the other. Now the knowledge is there to do.

Is there a need for a mobile phone? Or is the understanding there that when I feel my brother talking to me, I distinguish, is it him as a soul, he passed away long ago? Or is it a soul being in the New York, is talking to me and I can talk back to him at the soul level, (:35). annoying, telling the physicality, "oh, he's arriving tomorrow we better make dinner."

The present communication system of mobile systems has become obsolete. Even though we look for the different folding pages, and different colors on it. Do you need to somebody else, to eavesdrop on the pictures and information your brother, or your lover shares with you? Or, you know how to do it, and you can access it?

Do you need a Chip on a computer, or a mobile phone, to download everything into a chip. Where the biggest chip, which is the brain of the man is already there for you to add to. Now you understand the changes we are bringing in. We strive to bring the change on the level of the Soul of the Man. But at the same time you strive to bring in the physical condition of today, that the two sooner or later merge in.

Today later on, Keshe Foundation will release an invitation card for you Universal Council members, for you Universal Council Support members, for you followers of the Keshe Foundation, to write in, to invite in the ambassadors in your country. You are in Bangladesh, you are in China, you send the invitation to come to Linz to your ambassadors in your country, the ambassador of other nations, you invite them back. They have to bring with themselves, or book with us, the confirmation of the visit, (:37). not everybody else can use the card.

This invitation we release is for all the Keshe Foundation Knowledge Seekers, to take the invitation to your world leaders, to your ministers, to the heads of state and to the key men in the country you are, the head of NASA, to the head of Chinese space agency, to the head of Communications, Microsoft and the rest. We are ready, we are confident, that we deliver, that they will change the position and the understanding. The invitation will

be put on the pages of the Keshe Foundation for you to download to fill in the name of the person and send an invitation.

One of the Knowledge Seekers in Washington did this a few years ago. He took the World Peace Treaty directly to the White House. And he delivered it to the White House, and he got response back for it from President Obama. Then, we saw the rest of the work which we did, which brought the 5+1 negotiations in December 2012, in Brussels.

Take these invitations, which will be put on the Keshe Foundation website. And every ambassador in your country is invited, every world leader in your country is invited, every member of your parliament in your country is invited, every key position people around the world are invited to come in. (:39). There'll be a link to the website where they have to register when they are coming in, when we accommodate them.

Be aware that in the past, (when) we invited ambassadors of the country, in one country where we were to come in, and we saw the mayhem the Belgium's and the German pedophile group created by flooding the embassies of that nation. Now we go to every embassy, in every country, that does not allow any more these hooligans and pedophiles, try to do their work. Keep them busy, because there's something more is coming for them.

It’s your responsibility. I don't wait somebody else might send it, line in hundreds, thousands of invitations to your members of the parliament. Italians did this last time and we saw how Italy broke rank from the pressures of United States, and European community and accepted the Key (USB) of the knowledge. This time we give the key of man transmutation and transportation.

It's your responsibility. Last time I did, this time you as Knowledge Seekers hand over the key of the freedom of the man to our governments. The reason we do this is very simple. Once we start transmutation, "sorry, no one knows if you're in Sri Lanka, and you end up in center of New York and the police is, how did you come?" Oh, I came with Keshe Foundation transmutation system. If you don't like it, I can go to Washington, I can go somewhere else you won't see me. (:41).

We need to engage the governments to understand what is to come. Creation of One Nation, creation of one planet, creation of one race is on the table, it’s your responsibility and not mine. I provide the flight system, you are the agencies who have to sell the ticket. Every single one of you is an agent of peace, every single one of you is responsible for what is to come. Organize yourself as groups, individuals, every ambassador, the governors of every city you live in, the mayors, invite them to come to see.

You are Austrian, flood your president, don't wait for somebody else, and don't stop with one card. The next week again, the week after again. Till you get a response, till you see we publish which world leaders, which ambassadors has been, or is coming in or whatever.

The only person would not be allowed is the ambassador of the nation of Belgium, and the state of Belgium.

The way you saw the French person going into the system two weeks ago, two of the most beautiful Knowledge Seekers of the Keshe Foundation from France came in, husband and wife, yesterday we could tell people to go to France and they went. If we allow this condemned nation of Belgium to come in, we link into the pedophiles, and our children in space are not safe anymore. (:43) And you will understand the reason why.

No Belgium's, born or bred will be allowed, even my own blood, into the system. Unless they change. Then it's the responsibility of the world community to accept the change in their souls, to allow them back in.

It's the responsibility of you to bring every ambassador every world leaders into Linz to go through the system to understand, to feel, to see the wind of change, as we heard in the intro. (:44). Then they plan, how they're going to sort out the immigration, how they're going to sort out the injustices on this planet and the rest of it.

We have and we are delivering the technology. The mobile system transmutation will be tested in the next two weeks, we were targeting for November and December. We will test to transport a stone from one to another. Because Bahalla, bless his name, said, even the stone has a soul, and if he can expand the soul of the stone, we can transport the stone. The stone, or you to go from London to New York is getting to the airport, checking in, flight, landing, customs, getting out, get your suitcase, hello, 10 hours on the way. For those who travel with the dimension of the Soul, home to home, New York to London instantaneous.

Would you like to get on a jetliner, create a CO2, which you cry so much about global warming? Or, would you do the warm of the heart of your loved ones and be in both places at the same time? Now you understand, the change has come, the change is there, it's with us and the technology's there.

As I said yesterday, and before, up to now you could dream the mother who died 20 years ago. (:46). Now you decide and see the mother. Up to now, it was all theology and talk, now is technology and walk. We have systems who can deliver, so it has become part of the knowledge structure of the humanity.

As I said to one of the richest women in the world in the past few days. I said, keep your wealth, it's worth nothing. She got offended. Mr. Keshe, I wanted to write something to you, but. I said, you have nothing to do, I can walk into the central bank of any nation now, and carry bars of gold with me outside. The wealth of the nation is mine.

Would gold have any more value when all of you, the way the British did in Khartoum, walk into the central bank of Libya, emptied and take it to the kingdom of United Kingdom, and create the whole mayhem of kicking England out of the European community for stealing gold. Now, you all have access to the gold, if you understand

what it means. When we send you to the Moon to pick up a stone, we can send you to any central bank and pick up the gold. Gold, wealth has lost its meaning for the humanity as of now.

You are only physician who knows how you created the cancer

The beauty of it is you cannot stop this technology. Because, Mr. President, you have cancer. (:48). No one can help you. The only way you can help yourself is to go through the system, expand and extend the soul and feel that cancer tumor, and do something about it, because you're the only physician who knows how you created it. You will stop this technology, you guarantee your own death.

Now you understand how we put the world leaders on the banner of demise. No man can stop this technology anymore, because now it’s not a talk, it’s a system. It can be replicated and it can be understood, and once you learn the extension of your soul, do you need a system.

Now, we start the process of what are call, unification of man, human race. This is the first step. We still need to look after you on the physical side, which as you've seen in the Keshe Foundation in past three or four weeks, has started releasing technologies, the generator, and we told you the generator is what we call plasma Enhancement Unit, part of the bigger system. It has a back and a front to it.

The power generator plasma Enhancement Unit needs to be enhanced, energized for it to work, and it needs to be able to support. That's the purpose of it.

In the past few months, by the invasion of Ukraine, we have seen (:50). the crisis which is looming in Western Europe, and in many countries. Energy crisis, .. especially to the nation of Austria, Germany, France. We have seen in the past 24 hours for the first time parity in US dollars and Euro, as Euro is collapsing. Knowing that it will not receive energy from Russia, and it puts Russia in the control of the destiny of the Western Europe, till they get what they want. Suffering, as the French minister said, we are preparing for unrest in European nations in coming months, as we cannot supply the energy. The prices of the fuel has doubled. The prices of the fertilizers has gone nonexistence, because they cannot get hold of it, and it's gone up.

Keshe Foundation responds to this in a very simple way, which many of you should have understood the way I worked. I stand by the flag of my nation. In the background of this flag, you see two things, the first two space reactor, about the same time as now, developed in 2008, in Tehran, for the flight, for the test of the flight, for the test of everything else that could be done. (:52).

But you know, I work one way, my ethos has been the way I always explained to you, when we go to space, if you need to build the building on the Moon, you can't come back to Earth to get the Aluminum, double glazing and the rest of it, and the bricks. You have

to build it according to where you are, produce the Aluminum, which can stand the environment of the Moon, where you are.

If you look at these reactors of the Keshe Foundation, two on the right hand side built in Iran, some 14 years ago, and you work by my ethos of work. How can I have these reactors, if I cannot fuel them in the space? These two reactors are built to work on Helium, on Hydrogen, on other gases, which is in patents.

Create Gases out of space - to fuel reactors

Something which was hidden from the Keshe Foundation and the world leaders up to today, this minute, it's for me to fuel these reactors, I had to create the gases in the space on its own. Which means, it keeps my system self sufficient.

I could not come back to Earth and find Hydrogen, I could not come back to Earth and find Helium to take back to feed this flight system. As part of my work which you have seen, I always create a self sustaining system. In 2004, 2006, I developed the Creation of the gas from the fields of the Universe (U), that my flight systems when they are ready, I don't need to have a gas tank. (:54).

Today I release that knowledge to humanity. The western world needs the production of the gas at the service stations, at the power stations to be able to keep the economy of the West running. Otherwise 375 million people will suffer in next few months. Riots as are on the cards, as the French Minister has stated. The national government of Germany, France, Italy and other nations are preparing how to handle the shortage of gases from Russia into Western Europe.

The KF have prepared the systems and are ongoing to deliver these systems to the government of Germany, and guarantee, a gas ride pipeline, at the point of demand to every power generation, every fuel stations across Europe, with the next three to six months.

It's your responsibility as you invite your ambassadors to come to Linz, it's your responsibility to invite and inform your governments, the technology to replace the Russian gas line is available by Keshe Foundation in Austria. I developed this technology 20 years ago.

And, as I said, it's my responsibility that no human life suffers, especially when we have the technology. It's your responsibility to inform your governments in Western Europe and other places that system to produce Methane gas, to produce Hydrogen in a mass quantity is ready to be delivered to their nation. (:56).

This will change the power play, the energy supply play, and it puts my life at risk. But I've done one thing, I have protected myself and the Knowledge Seekers trusted by us have been given the technology to release if anything happens to me.

And to this effect, today, and now, we release 100 units of these in next few weeks to those who donate for the saving of man to the Keshe F. We are not selling gas unit, we are giving it to you through knowledge to be available across this planet to everyone, that no nation will suffer, and you do not need to come to Linz to see the energy gas supply. But it's here in Italy, in France, in Germany, across European states, across the nations who are now suffering with the escalating prices of the fuel. By November, December, I'll release the production of gases.

The units we release you can keep it at home, feed your home, heat your home, gas tank it into your car, you become energy self-sufficient in one direction. And as we said, that has been the ethos of the work of the KF. You all will understand why we released the energy power supply last time. The energy supply system needs a battery operator to start with, to charge for it to run. (:58). Now we give you the gas unit, heat it, burn it, run it, the small gas generator, you have power for the house and everything else.

We only want to put 100 of these units out today, no more. And it's done by donation, which means the Keshe Foundation, you become volunteers to test these, to become our ambassadors to keep it that cannot be stopped, cannot be brought down, and you receive the unit, use it by instruction, create the gases, use it to run the heating, share it with the others because the production is continuous, it cannot stop.

We put these 300 unit across the world, and only 100 unit will be supplied. You are the ambassadors. You got to get access to it. Keep it, secure it, use it and be there to carry the knowledge, you become the trustees of the knowledge, that your nation in time cannot support. Never open it. Never touch it. Just follow the instruction. You have a gas supply for decades, centuries to come.

Those of you who are Iranian, you know what I'm talking about. You touch it, you lose it. In Iran we had a bath ??, which was lit for centuries with one candle, (1:00). and then the British came and wanted to know how this candle works, and they silenced it, and never could it be started again. This is the candle of the knowledge for man in the dimension of the physicality to be sorted.

Negotiation with the governments of the Western Europe is by Keshe Foundation. It’s for you to inform them to do the job. It cost less than one cent to produce one liter of gas. Today in Austria, one liter of gas is one euro, 30 cents.

This is advance space technology to guarantee the supply of gases into the … space motion reactors, the reactors which, Iran was claimed to be nuclear bomb. When I built the Iranian space reactors, when I built the initial reactors, I knew I have the fuel first and I can produce the fuel and the purity I like. This is what was said in the report to IAEA in the beginning of this year, when we showed the Israelis lied to the Americans and the rest. We need pure, 100% pure Tritium, we need 100% Uranium and Plutonium. proliferation is done through the space technology of Keshe Foundation, to be able to guarantee to deliver you to Moon, not to Mars or another place, because sorry, the fuel was 99% perfect. (1:02). The 1% matched the space of Mars, oops.

The 100 units, which now will be delivered. We are manufacturing it to be delivered. I want to see donations over 2000 Euro for the 100 units. I don't put the price on it, I want to cover the expenses of the Keshe Foundation.

A hundred units, those who donate more receive it first. I close it today, whatever order comes in, we take as donation and it has to go to Keshe Foundation Holland. As donation, as a charity. It's there where the knowledge is set. We are not selling a unit, and we don't stand any legal standing for it. You make a donation, you receive a gift. A gift of energy from the source. You cannot have electricity if you don't burn. If you don't have the generator. Now you have the gift of the source.

Those of you who donate to receive it. It's your responsibility to protect this with your life. It's your responsibility to share it, to show it to your governments. It's a black box, which supplies gas for the rest of the time of humanity.

The way, when you go into the system, and you decide to see the mother, and you see the mother, now you don't need to dig oil wells to get to the gas line, to get gases. (1:04). You become that gas field. This is a freedom of man from shackles of control of finances. You asked, we responded with an energy power supply, now with a gas line supply. Very soon the Knowledge Seekers at top of the Keshe Foundation been told how to make the gasoline.

It should not cost more than a cent to produce a liter of gasoline. The same as it doesn't cost more than a cent to create a gram of gold.

This 100 units has to be allocated today and only by donation. We cover the cost, we cover our expenses, we make sure you receive it, that you make sure the knowledge cannot be hidden, and the scientists cannot be paid by the Belgium's, who sit in the same bed with us, or who live with us, to kill us.

Now it's 100 people, and those of you who bought the generators, the Enhancement System, with this one you guarantee power supply forever. (1:06). It's your responsibility, we are gifting this and it's for you to take it. You will never need to worry for the energy heating, electric, or whatever. The next system we will add to this will feed you for eternity.

I have already given the knowledge to one of our close Knowledge Seekers how to make the feeding system. It's his responsibility to finish in the next two to three months and return it back to the Foundation. It will not be seen outside, and I told him the trust. In the Keshe Foundation with you, it stays as a trust.

Then we can add anything to this, that from the birth to the end you have the whole lot. As I promised you a few weeks ago. We start to govern, and to govern we have to be able to support the nation of Earth.

There should not be power cuts in any factory, or any place on this planet, when this knowledge it is released, and it's released now. There should not be no borders, that no man can travel on this ?? way of. We govern through the heart, and the knowledge and the Soul of the Man, and let them govern through controlling the gas, the food and the rest, which will become not important. (1:08).

The unit you receive is the size of a , half a meter by half a meter, or just about that size. Maybe more, a meter by meter. Everything is set, you don't need to do anything with it. You're given the instruction, how to trigger it, and how to collect it. Use, change your cars to a gas running system, than the fuel, fill up the tank, put it in the car, you never need to pay for the fuel. When you are not filling the tank for the car, connect it to charge up the batteries, and to run your Enhancement Unit and the generator.

Then when you're doing that, add a third system to it, and feed yourself, that you don't need to kill anymore, you don't need to do anything anymore. The beauty of it is, what comes out of this, will feed this to guarantee a full cycle.

When P and STM become at peace - we achieve world peace

Now you understand, we just don't give you the travel system, we don't just give you the Enhancement Unit to be able to expand the Soul. Now we have given you both, we are supporting the Soul and the Physicality at the same time, that when the two become at peace, we achieve world peace, otherwise, it's a talk. (1:10).

You donate 100,000 to Keshe Foundation for the first generator to land in your country, you receive it. It's our work to do. It's my job to make sure the 2 run parallel. I cannot live in Europe and see the nations of European nation suffering. The traffic lights are to be switched off in Germany, the stadiums to be controlled, the heating to be reduced, the school children program to be banned, because Russians have cut the gas.

My dearest friends, fuel should not become a commodity to control. It should be a commodity to bring joy. We see in the Western Europe today families with a limited income. Big percentage of their cost now has gone on the fuel and extension of the food. Fuel used to be 1 Euro 12 months ago, today is 2 Euros and 20. A family which uses 20 liter, 30 liter of the fuel to go to work, now it's short by 150 Euro per month. The food extension another two hundred, if you earn 2,000 a month, if you do that, 30%, 20% of your income has gone.

We are there to put it back. We are there to make sure from now on you don't pay even 1 Euro. Thirty cents should be a balanced, continuous price of the fuel at the fuel stations. Because it's not piped in, it's produced at the point. There is no fluctuation in the price, because the machine makes it from the atmosphere.

This game of oil industry from today is wiped out. (1:12). Fair chance for the humanity to exist. Fair chance for 85 million barrels of oil, which goes out everyday at different

prices, is finished. This will damage the revenue for many nations, but I've shared the knowledge, it cannot be stopped.

You asked, how can I help? We have responded. I gave you the wealth of the knowledge of humanity, and the knowledge of the Creator, now play with it. Invite your ambassadors to come to Linz and see the gas production unit. Invite your ambassadors to come and see the Enhancement Generator unit.

Americans test new energy system in Tehran

I want to show you something to see how serious we are. In the past seven days, we worked with the Americans in Teheran, which is very unusual. Americans online telling the Iranian scientists of the Keshe Foundation what they want. I want to show you something very, very serious. This is on the left. The standard system, on the right is the new plasma Enhancement Unit of the Keshe Foundation. This was done three times with the supervision of one of the what we call, richest man in US, online, telling the Iranian scientists what to do.

I thank the Teheran team, Especially Josef, (1:14). and his team for even staying on during the holidays, national holidays to prove to the Americans, that Iran has access to technology.

Have a look. This time the Americans comes up with a clever idea, leave the two fridges open, that the system comes balanced. For one hour, the fridges were left open at the heat of 38 degrees in Tehran. You see them running. 30 minutes later the standard system collapses on the left. Again double the time into triple time. We keep the system running on the right. Have you heard from the Americans? No, Keshe Foundation has access to double the energy, triple the energy cycle. This was done by the supervision of the Americans online.

We made One Nation out of the Americans and the Iranians. While there is a cut on the nuclear, on the plasma technology we work. The Iranian team worked to 3 or 4 o'clock in the morning. They stayed in the compound, in the factory, that the next day they could bring what the Americans, were asking, more to be precise. And this is a game they came up with. And that's how we started. (1:16).

We are in a serious power production, reduction in power, and delivery of the gas and technology. No nations. All One Nation, and we work, we allowed our team to be tested, and the generator is on its way.

Do not use the Paypal account of the Keshe Foundation to pay for these orders. Pay directly into the ?? (Holland) account. Donations for the gas production has to go as a donation for the knowledge to the Keshe Foundation in Holland. Do not pay, we return the funds, we want nothing to do with it. We are not selling. You sign a nondisclosure. You sign an agreement that this box will not be touched. You sign, that this can be used, shared. And then we bring the pressures on the Western Europe, down.

No child in Munich, in Paris, or in Rome should sleep hungry, because the father paid for the fuel extra. There is no food to eat. I have a meeting after the teaching of today with key gas suppliers into Western Europe. That closes the shortage of the gas coming from Russia.

You have to understand one thing, (1:18). I used to be in the oil business. I know the heads of Trans-Naft, I know the heads of Lukoil. I've got contracts in a personal name with them. I'm one of the very few people, if any, that except the Saudi royal family, which carries a contract name in oil and the others - 30 years ago. I know what it means to play with these people. I know what it means, what it brings, but the risk is worth taking.

Gas fuel, diesel fuel should be at the fixed rate, that all the nations can afford, being African, being Asian, being European, or American. The game of control of energy with OPEC is finished. And you're responsible for it, to hold this treasure, to hold this knowledge as Knowledge Seekers. As we give it to you to be the treasurers, to be holders of this, till the government's understand the technologies are spread, the same as the transportation through the Enhancement Unit. We can balance everything out.

We might take six months of pressure, but knowing the knowledge is in the hands of you Knowledge Seekers, governments have to find a way. My advice will come to you, what to do with these units after you will receive it, and collectively together. You become the treasurers of the knowledge of the Keshe Foundation for your nation.

It's your responsibility to make sure, that the light stays on irrespective of the condition. The life goes on. (1:20). Fuel has to have a price affordable by all the nations. The Shah of Iran created this mess, and he deserved to be deposed, and opposed, and removed. He created a raise in price of oil in 1972. And that raise has not stopped, and it stops by another Iranian, because I love my nation, and I love the humanity.

The price of gas has to be fixed across this planet at 30 cents. Where the government taxation takes part of it, no more. You don't need to cross countries to get the cheaper fuel. You'll cross this planet, with the knowledge of the Keshe Foundation at the same price where you can afford it.

The oil industry, the play with the energy policy is over, and you are responsible for it, to see it to go through today. Not ?? , I could be assassinated any time by releasing this technology. I take the chance, I take the risk, I take the responsibility of it. But the knowledge now is shared amongst Knowledge Seekers, which on my death happens, are there to release the knowledge immediately in mass.

If we do it now, we create a bigger mayhem. We have to do it in a stage, that the government's adjust the taxes. The government adjust the control, cuts from military cut. Armies don't need to be done, because the military money comes from the petrol's you

pay taxes on. All to be done. We need this gap. We need this time space, (1:22). to reach a comprehensive understanding of the what we call, peace process.

I could sell this knowledge for billions and shelve it. The way, when I showed the space technology to Lockheed Martin in 2004 in London, in Oxford, they offered me 4 billion, Mr. Keshe shelve it. I said, it's not mine. 20 years ago, I could take 4 billion pounds and walk, and none of you would have had this knowledge.

In next three to five years, if you Knowledge Seekers work with us the way we ask, we won't have this mayhem of oil crisis, controlling the pipeline. Three days ago, Russia closed the gas pipe to Germany, one of the main lines, for repair. We have the same thing last month. Today, at the moment, Germany is not receiving the fuel, which needs to go to reserve tanks ready for winter. Now you know what Russia is doing.

Keshe Foundation makes sure in September, Germany will have enough technology, enough material, that it can say to Mr. Putin, good morning Sir, you can keep your gas. Gases do not need to be piped with this technology, you produce the gas at the gas station. This is not a new talk. Wang Lin is on the line. We were discussing with the Chinese government to place 1,000 to work with them to build a 1,000 fuel stations, that we will tank at the point anywhere in northern China. (1:24). So, this is not a new revelation, that suddenly Keshe Foundation has come up with. I said to Wang Lin, I said to the Chinese, we produce gasoline, we produce diesel, we produce gas all in the petrol station. Now the Western world knows three years later, than the Chinese.

Gas, fuel, water, energy is the right of every man. Clean water is the right of every man. When we tell you in a simple way, that when I produce you the Methane gas, you burn it to produce the electricity, or whatever, run a small turbine, cook it, heat it, whatever. When you burn CH4 within, creates two things, CO2 and clean water.

When I feed this into your food, feed line, you can see how the system is self-sufficient. This system should be in the house of every man. This system can be anywhere in the Universe, anywhere in the world. If you're a human, and you decide to have a barbecue on planet Mars, I have my system even to produce fields of meat, that I can produce the meat I want. (1:26). We know nowadays, they have burgers with protein, but no animal killed.

Now you understand, we have to move in this direction, we have no choice. The biggest dilemma for me for years was, to hit at the all oil cartel, and today I have. This is where, by the biggest mistake of the Shah of Iran, we created this mess in 1972, and now it's the time to stop.

In a few week’s time I release the production of these, it’s already shared with the Knowledge Seekers, so it doesn't make any difference. We released the knowledge to produce gasoline.

These 100 units, whatever you donate for it, when you receive it, you become a trustee, not the abuser, not the controller, you receive it with the Soul of the Ethos of the Keshe Foundation. You are custodial to this trust, that with it we force nations to understand, the technologies in the country, if we don't do it, the others will do it, then they'll adjust the system.

In a few days, maybe next few weeks, we release the knowledge to cover the shortage of fertilizers, which has been created through Belarus, Russia, and Ukraine war. (1:28). Most of the fertilizers in the West has come to the end, because they cannot be exported, it's used worse (more) than that fuel. Maybe in next few days, we release systems, it's not Gans's that you spray, that's the dinosaur knowledge, compared to what is to come.

Every one of you using this technology, which now we offer today, you place a system on the roof of your house, (apartment) blocks, wherever you live, and you feed every plant in your area, in your nation, that the shortage of fertilizer would not be responded. We publicly release this technology into the .. structure. Now you understand why I said, I want 3,000 generators to be across this planet.

You were worried that, what's going to happen. With this, what we released today, you don't need to wait for my generator to come, because now you generate the gases, which can run the system without battery.

I received a message from Wang Lin this morning. Are we going to have a good news today? I said, yes. And I hope you received your good news.

Pure water, clean water, energy is the right of every man at any point on this planet, as long as you live the physical life. (1:30). That with it, in conjunction with the rest, you don't need to kill, you don't need to starve, you don't need to live in the dark.

We are Messengers of the Universe and we know how to do our work. Now you know why I am Messiah. I feed your Soul and I feed the physicality, as I said, in the papers of the Messengers of the God are the scientists, as well as the, what we call, the Prophets. Now you understand why.

At the beginning of the teaching of today, I showed how I move your Soul and create the perfect move, perfect Soul, for the perfect body, now I feed your physicality.

Respond to the 100 unit, because you're responsible for it, and it's by donation, no expectation, but you become custodial of the knowledge. It's not for you to make a unit might work, we give you a unit that works.

We say to the Western nations on the ransom of the Russian Government, we give you the freedom.

No system should enter the territory of Belgium. Any of you break, I take, I handle through the Soul. Part of our negotiations with the European Community for energy and

supply is, the end of the Kingdom of Belgium, or change of the rules to democracy by vote, by election, by presidency. (1:32). That through it we can stop the work of the pedophiles, which are ingrained and embedded in this nation through the kingdom, and their kingship.

Work with us to bring the change. Those of you who understand, knows what risk I have taken today to release this knowledge. For much less, many have been killed.

30 cents should be the right price for gasoline, 30 cents should be the right price for diesel, 30 cents should be the right price for gas. This will bring a regeneration in the industrial revolution, in investing more for the government's in the hand of their nations, and bringing the evolution and the much needed .. stagnation, which came after Corona by many, many nations.

I kept my promise, I delivered my promise, both for the soul and the physicality of the Man in one lesson. I hope you understand it.

Rick if you like to go to the second part of this and stop it when the chapter starts, where I finish, then stop it, please. Go ahead, and know we take a break and when we come back we answer your questions (1:34).

<<< BREAK >> 441 KSW 7. 14. 2022 (1:54).

K- .. . Some people are donating to the Keshe Foundation Paypal for this unit. Please donate to the Keshe Foundation headquarters in Holland, not through the Paypal, because we are not selling anything, and it stays as the donation. It has to go to Foundation, which received donation.

Any other question? Or shall we start with a question?

Q: (1:56). … I'm a quadriplegic due to a traffic accident, can I enter the flight unit and get cured?

K- These machines are not curing machines. These are flight systems. We are not providing health or wellness facilities. Even though we see people with, they come to test the flight system, they see some changes.

Yesterday we had a guy from Germany, his aim wasn't to fly. He wanted to see the grandmother, which was precious to him. And he went through the system. We didn't know that. It's just we don't ask questions from people, what you want, what you're expecting. They write it in a sealed documents and leave it on the table before they go in. When he came out, I said what happened? Did you do anything? He said, yes, I went to see my grandmother. That's why he came here for. My wish to see my grandma. But before I go in, I had a problem with my knee, I could not move my knee, freely. And now it's gone. he was sitting on the sofa, twisting and turning his leg.

I said, you came here to understand the elevation of the soul, and how we can do what it is. And so gaining, and we've seen this a lot. We saw this with the new system, with four people, five people this week. (1:58). But they don't tell us what they have, why they've come. And they have what you call it, go through the system, and when they come out they tell us. We had yesterday, a volunteer, which he wanted himself becomes here every day, he wants to fly, and he goes through the flight system. He is blind in one eye, and yesterday he said, for the first time. Don't forget last week, he could see red. This week he sees blue. He feels for the first time pain in his eyes. I said to him, you want to carry on testing, when your soul is ready to bring the vision of ?? flight to you. We are here to service. He doesn't pay for any of the services. He doesn't do. He has paid once when he came. Because he's there, he wants to, the desire to see, we are not there to stop. But we are not here to what do you call it, provide health, or whatever facilities.

This is a pure flight simulation. That's what I said to you, from what you tell us, we understand what we need to change, what needs to be added. The 3 Chairs on one side has been, is not being used anymore. So the process is. There's a very big problem, paraplegic with accidents. It's a cut nerve, or a crushed nerve. If the nerve is crushed, everything is mashed up. If it's a straight cut nerve, lines usually find each other. (2:00).

We have developed a technology for realigning the neuro system, which is taught to the doctors, and it’s for them to apply it. You can connect, if it's a crushed nerve it’s very difficult, in a way, you get a banana, and you squish it together, not the things stands in line, and you just, that's how the nerves are.

In the world of present science, there is no development to be able to realign it. Nerves is still some jump, and you get what we call, phantom pains. If it's a cut you, you cut a finger you can do the nerve, because they can connect up. You crush a nerve it’s very difficult to find the matching, maybe a few centimeter down to do it.

We have developed the technology for doing it, it’s not within the space technology, it’s within the knowledge of the health applications of the technology, which is taught only to doctors, and now we are preparing doctors for the use of the new systems. That's how it

should be, we are we are technicians, we are researchers, we are developers, and once we develop the system, we hand it over to those who are going to use it.

This is what the Naturopathic license of Keshe Foundation says. We develop the technologies and we ?? doctors to be used, and we keep it that way. That's why we start handing over everything to doctors as of yesterday. We had till two o'clock or so, one of the doctors of Keshe Foundation, (2:02). medical people, people who understand and educated in the world of medicine, to be there to take over, and literally the last sessions I don't even go in, because he knows what to do, he understand and we just try to train. Because they'll be the first people who received the first units, and they need to know how to use it, and then we have to train people for the other ??

Paraplegic, you have to know how it's happened. Then there is a way to realign even the crushed nerves, but that is outside the Keshe Foundation work, it's with the medical side. We have developed that technology fully. It needs to be taught to the doctors, who take over the running the KF medical side in the time to come.

Any other question?

How are Psychosomatic illnesses treated with Gans's

Q: … There are concepts that say that all diseases are psychosomatic, such as "Germanic Medicine" says so, when I have a problem with my eyes, eyesight, for example, it means that I don't want to see some problems with my life. How does the technology of using GANS help or support treatment taking into account German medicine?

K: First of all, we don't treat. Secondly, you have to understand the psychosomatic, hasn't been understood not just by Germans. (2:04). It's ?? understood by the whole of the medical world. We create 80% of our illnesses, 90% of our illnesses ourselves through psychological changes. It's not that we actually put it there. We weaken the condition of our specific organs, or whatever, that allows other conditions to move in. This is how, what most of psychosomatic is.

When you go through the psychological pressure of your son, the change in wanting not to create reduces or creates a condition, that changes the salinity of the certain cells that they solidify and then we call it a cancer. So, we are a creator of it. Accidents, we cannot do much. But, it's not Germanic. It is understood thousands of years ago by the first man. We create, some of it.

It's amazing how, in the system as I was talking earlier, we say, we go to the airport and see the sign, you wait till the sign comes up. We see this in system. Yesterday, or the day before we had a guy who had, who could actually feel the organ. It's not the touch feel, it's an energy feel. This is what we said in the past will happen. The same as in the system, you go and you visit your grandmother, now you go and you visit your own

organ. (2:06). What I've done wrong to you? What energy you need to change that I don't have the pain anymore?

We had a guy, came three weeks ago or so, and he could not move his hand, he came out he could shake his hand anywhere. He came in yesterday. Now he says that the pain is on the other side. I said, of course, now it is balancing what you were suffering from the other side. This side has to come. He says, but now they both work.

Soul is like nuclear bomb explosion - fields spread out huge energy

You find a solution, within the strength of the Soul. Our machines are not a medical systems. We elevate the Soul, and the Soul is like. You see in the movies when a bomb explodes and the way it goes all the way out? That's your Soul, central of a nuclear bomb is the Soul, and the fields of it, is when it expands. It has so much power, that the case of the nuclear bomb, it destroys, because it's over energizes the system, .. anything on its way.

Now it's your Soul, energizes your own organs. It's no difference. It's you who triggers that bomb. It's you who releases that Soul, and triggers that way, you have ?? energy and everything has to come to a balance, and it's so fast. Once people become less anxious when they're in the system, and allow the energies to expand slowly, then we'll see that any kind of .. imbalance will be balanced. (2:08).

K: Any other question?

Does this T interfere with the Soul's plan - No - we are facilitators

Q: .. Does your technology interfere in some way with the soul's plan? If the soul wants to experience in a sick human body, why heal the body?
K: Can you repeat that?
Q: Yes. Does your technology interfere in some way with the souls plan? If the soul wants to experience in a sick human body, why heal the body?
K: No, we are facilitators. I had two doctors in the systems yesterday, and I spent nearly an hour and a half, plus, two hours with them. I put the two doctors in two different systems, one on the left and one on the right. I took them through a process to show as doctors, how much they are controllers.

We have a system built in, that we can adjust, and I got them, the two doctors together, to move different things in the system, or touch different things. Every time they went, our system switched on, every time they move, after a few seconds, they switched off. So, we were watching the expansion of the soul. Which meant, when we could. It's very interesting, it's amazing when you have very beautiful doctors, who as medical people, they sit and they tell you a lot of things. I spent a lot of time with these two. This is the second time they're coming, so they were familiar with the system. (2:10). The first time they came they went through the ?? chairs, this time there was a direct, one of them went direct, one of them went through the three, two chairs.

So we wanted the medical side to understand a lot of things. It was amazing how parallel the two were. They just knew each other, there was no relationship between them, or any friendship, or whatever. They just knew each other as Knowledge seekers, they came to know each other.

Interesting is that we have a special system in the structure, that they could, at certain points both of them trigger, and triggering this would allow their soul to expand beyond their physical body.

We played with it, we played, they were more than willing to experiments, because they are doctors, they are the medical people, and they see different alternative, solutions, or whatever. And we spent a lot of time with these two doctors in the system, understanding the transfer, the expansion the ?? of the Soul within the structure.

Heal with touch - than don't need medicine

Interesting is how, as they are givers, as they are doctors, they have trained to save lives, to give from them. Then we go to the middle and sitting and we just check marking the feelings and everything, and how this happens. It is amazing how people of the medical profession, who are there really to help their patients, become givers, and they take so much to give. (2:12).

As I said one to of them, you go and touch the arm, the patient says this is where it hurts. You're such a giver, you're such like ?? me. Your finger is like a pain pen, pain pad we sell. Your touch has already changed. The prescription is just a .. physical thing to think that you're taking (something). The other doctor said, yes, this happens a lot with my patients. I said, but this is what it is. We are the healers of the old time.

When a patient said this hurts and you sit across the table, this is a prescription. When a doctor touches it, he has become that Pain Pen, prescription not needed. But you want to take something to say it’s done. The process of the healing by the doctor has already started with the touch, and they both could confirm to patients they touch, there's a healing with them. Because both of them do acupuncture, and another things as alternatives for their patients. This is the way the structure works.

Our system with it, we could ask them the expansion of their souls, how much they expanded, and they tell us beautiful things. Then we have a facility in the system, that we can drain it, we drain their energy and then we see (Mr. Keshe make a noise with his mouth), if the system works, goes like nothing, and then they stops, because they have to be in control, they have to be in charge.

We saw the same thing, we had yesterday with the banker. She has to be in charge, because money controls everything. (2:14). I said, this is what happens with you in the machine, control.

Any other question?

Helping elevate Souls that did suicide - will they accept elevation

Q: .. Many thanks for the love, knowledge and service to the universe. Can the people in the flight system see who has committed suicide and help raise that Soul?

K: You have the capability to raise any Soul. But the point is, does their Soul wants to receive that elevation? This is your biggest problem. Your biggest problem is not giving. If what you give is accepted.

You know when you walk on the streets of China in Beijing, beggars are not there .. anymore with their hands out to collect coins, as is tradition in the West. Nowadays the beggars who want money, they put a WeChat number on the floor, (to you), you just give it into their accounts. Even when the government gets taxation on the begging. There is no change of money, no one carries a money, it's just do it with the WeChat.

Up to now beggars were rich, because nobody knew where they were. Now the government knows what the bagger takes. This is how the system should be. (2:16). You can give with nobody knowing, but you can give with everybody knowing exactly what is, to get the tax of it. It's very much, very much, it doesn't matter how much you give. Is the Soul you want to give it to, ready to receive?

Any other question.

You know, it is very much like when you feed the baby, you fill a spoon up, but the baby locks the mouth. Nothing goes in. I decide what you put in my mouth. I decide what I receive. Have you ever had that experience? One or two spoons, yes, I don't like the taste, I shut the gate. That's it. You can have it, I'm not touching it. You hold it, you cooked it, you eat it. It's not to my taste, it's not what I am looking for. And, it's exactly that way.
Any other question? (2:18).

R: There's a question in the chat here. It says Mr. Keshe, this is Alexander from project…
K: Yes, I'm reading it. That will be answered by the Foundatoin.

Q: . There was a question previously in the YouTube from Brett regarding what kind of gas. He says he's a licensed gas fitter. But he says that his question has been answered now. But, he was asking, will it be like CNG, or can it be liquefied to LPG, meaning natural gas or propane? But you were talking about methane gas, I believe as. Can you clarify, there's methane gas, but also you mentioned gasoline production?

K: Actually, we call it a diesel, and petrol fuel, as a liquid. We talk about gas as methane gas, and we talk about gasoline. You Americans call it gasoline, we call it a fuel, in the petrol and diesel. (2:20). We are talking about petrol and diesel in the coming time.

Q: Hey, everybody, this is Alex from Vancouver, Canada. Been following the knowledge for a little while now and very grateful.
R: Oh, you're the one with the question in the chat, correct?
K- We'll respond to you back through the email you sent.
Q: Okay, thanks so much Mr. Keshe, wonderful to meet you finally in this incarnation.
K- The answer to your question is yes, but they have to sort it out inside, what it is and how it is.

Q: .. How do you see the difference between the sovereign living being, and that of a natural person commercial good, admiralty law, belonging to the corporation, former state? (2:22).
K- I don't know who started these things. A lot people have bought into it, it doesn't make sense. Nobody is part of the property of anything. This is something that is going on around on the internet, and a lot of people. It's a fantasy world live in, to believe in it. If I understood correctly. They produce so much papers to confirm it is, what it is, and there's a lot of nonsense, too. Those of you who know what it is, for us as much as I understood. We are not subjects, we are not bought at birth, our birth certificate is not our slavery and the rest of it.

It is very much like a CO2 program, which the Dutch guy started selling trees for it. Because Dutch were fantastic in agriculture, plants and flowers, they change it to the CO2 and global … global warming, and everybody bought into it. Do you understand what I am talking about, I hope.

R: I understand, because I worked for many years for the largest reforestation tree planting company in Canada, and which was run by a Dutch man by the name of Brinkman. So I can understand that. He is trying to plant the planet, and you know, reduce the CO2 and so on.

K: You have to create the condition for it. You know, how much, a few years ago, used to put, exchange your air miles with how many trees, if you remember? For the jet fuel, we used? (2:24).
R: Carbon credits now are similarly used.
Q: How much diesel or petrol is produced daily?
K- Where, with what?
R: I guess, with the new gasoline producing units.

K: That we will announce when it's done. We'll announce that when it's done. This is what ?? We were just talking about the gas. The prime problem in Western Europe is gas production, what you call liquid gas.

Any other question?

R: Oh, Dan seems to be upset about your answer here, and he says, "Are you kidding? You do not differentiate between owner, and holder, and beneficiary. (Mr. Keshe laughs) So, you do not have a passport? Do you pay taxes, and tell me as normal to be happy that

you work, but now to be a slave, to be taken by your corporation? YOU SAY IT'S NORMAL? (Dan wrote here in the chat in capital letters)
K: It's not normal…
R: He says he's not upset. But when you use capitals, Dan, that means you're yelling, basically, do you say, it's normal, you're upset.

K: I understand. The truth about this work is, (2:26). you live in a country, you have the benefit of it, you pay the taxes of it, you pay them, but we call, what is due. People don't like to pay taxes, but they like to have the bus service, they would like to have the hospital service, they would like to have a cleaner street. They would like to have police force, that they can do things for them, the ambulance to be there. They only look at their own pocket. So, what can you tell to the people like this? How can we explain it?

Of course, we pay taxes, of course, you drive a car, you have to pay for the roads. Otherwise, do you like to bumpy your roads, when you hit a hole in the road, you curse the whole world, government is not doing for it. But to do it, needs to pay someone. Unfortunately, the mayor is not a laborer to fill in the holes, you didn't pay him for that. So it's part of what you get in the Western world.

Go and live in Africa, you don't pay taxes, you don't have the roads, you walk on the dirt. Hospital, if somebody paid for it, it's 100, 200 kilometers away. Ambulances just don't exist, as such, in rural areas. You pay for it, you take it. It's just the way things are.

But collectively, we accepted that we have the roads clean, that we can walk, we have the lights at night, we can do, and so we pay for it. People like this, only look at their pocket. (2:28). What I give. Hello, what did you take? Did you get on the bus? Did you get on a train? Who pays for that bus? Do you think your two cents will do, or 10 cents, or one pound will pay for that bus driver, the diesel, the repairs and everything running? Doesn't work that way.

And if you see as a control, don't get out of the bed, don't switch anything on, and stay in the same bed, see how long you will last.

We live in a society, which we have accepted collective service. And some of us are part of that, some of us clean up the floors, some of us deliver the food to the hospitals, some are nurses. Who pays for these things?

We collectively accept the responsibility of our children. That's why we see more liberated women, because now instead of one father making sure there's a food on the table, there's a house, the government does it, and us, is all the men and women work to pay that government, to make sure that child born has a free education, and free hospital, and free everything else. We have become collective society for our children. But we leave it in the hands of that one mother, to raise that one single child.

The head of Keshe Foundation yesterday was talking about, if we could, with the Enhancement Unit, go and take all the abused children from the world we have, we can

?? switch the souls. Then she sent the message that, so, where are we going to put them? Where we're going to find? (2:30). The wish is beautiful to have, but who is going to make it responsible, to look after them, now that we have the Enhancement Unit?

The wish is there, but the practicality of it, has to be there as well. We, especially in the Western world, and gradually across the world, we become collectively responsible even for the children. A mother who is unemployed, and a child goes to school receives a free education, free hospital, all the injections are done free, clothing provided with a Social Security backing up, keep paying the mother to do.

Now we are collectively the father of that child, doesn't matter if it is a man, or a woman, or a young, we work, we pay for taxes to ensure that child grown up, that he might become a doctor, he might become a scientist, or become nobody. But it's our responsibility that child is born. And where does it come from? We pay towards it. It is a collective life.

In November we become 8 billion of us. We passed the 7 million mark. According to United Nations, by the end of the century pass 9.6 billion, sorry, 11.5 billion, I think. China will be about 1.3 billion population and India will be 1.6 plus billion people. India will take over China in the next 20 years. Because China has a population control, India has no population control. And, still is part of the different ways, the children in India, in China and in the rest of the world grow. Poverty or ??. (2:32).

R: Okay, Mr. Keshe, what about the challenging idea of governments that Alex is bringing up in the chat here, that governments are not in integrity, and have not been for a very long time. They're spending far more than they take in, on taxes on things, none of us have agreed to like war, bio weapons labs and other such things. Humanity's not agreed to this. So why would they pay taxes to governments, that have been spending on things that we don't really want?

K: Which country is he from?
R: I mentioned that is in Canada, Vancouver. I am not sure if he's from Canada but, that's where he's living.

K: To be a superior power, to be a Western leading nation, usually is done by terrorizing not by developing, who has more armies, better to kill nowadays has more respect. Everything else, which goes with Canada, America and the rest of it, costs money. You elected them, to preserve for you to be a leading nation, and they spend it, to have these things, that you feel powerful enough to be a leading nation. So…

R: Yeah, but the thing is, we didn't really, we, the people didn't really elect the government that’s in right now, the government that is in right now got 33% of the vote, which is only six, which is less than. It's only about 16% of the actual population of the country. So less than 1 in 5 people .. (2:34).

K: Do you know what's happening in Sri Lanka today? Just go on the news. People have gone to the house of the president, people have gone to the house of the Prime Minister and they're literally swimming in their pools, and watching the television, and playing board games in their homes, until they go. I think that one of them, through fireworks brunt the building down in the prime minister or something.
R: Yes, I think I read about that, too.

K: So, do we want that way to change in democracy? Or we ask for our government to open the black boxes, "black budgets," they call it, Americans are really good at it. Black budgets are, we do whatever we like, we borrow, and you pay for it. And we try to make the most advanced killing machines, and then we'll see what happens.

Because we want to be superior, we want to be whatever. That black budget is one of the ways, that the government does not answer what it does, and most of these projects are hiding inside it. You have to get your parliament and change the black budget. There should be no black budget financing.

Then it goes the same with the military. We've seen it, and it's somehow has been ingrained in the work of a government. We have to do, to be stronger, to be bigger, to move all powerful, that we can receive whatever. And, with the new technology, do we need to?

Coming riots in Europe - foreseen

We saw last week, the way things have turned up in two or three Western countries. (2:36). The Americans are happy, that the dollar is in parity, and they can do a lot of things with the Euro. But, what's the next step? Would we see a lot of refugees out of Europe into America, or other parts of the world, when the riots and burning down starts, as they suspect, that it might do.

It's funny, when you look at it. We were testing in Tehran, on Saturday, Sunday with the Americans and everything else. One of the world's leading oil nations has to have a power cut one day a week, because they don't have the fuel to run the generators. All that was shut down. I mean, we had the power generation backup, but there's no electricity.

And this is how things are going to turn up. And the funny thing is, many of them, crypto-currency miners have moved into Iran, because electricity is cheap, and the create a crisis, by trying to make money out of crypto, has brought the nation to the point of shortage. But, what can be done, what's the next step?

This is a very strange system, we see it, for at least what we know, as I said before, governments allowing new styles of work to come. New ways of work to come in. (2:38). For the first time, we always as I said, in past 14 years, and before Keshe Foundation worked, passed (on) knowledge, developed technologies, through the structure of the Iranian government, which ended up with different applications.

For the first time in the history of Iran, an independent private space company has been registered, has been allowed to be registered, that bring the new space technology in. It is a major breakthrough in Iran. Keshe Space Company, as a space company now is registered in Tehran, in Iran, and we start operating under that banner. Which means the government now allows one of the leading space institutes in the world, with the new technology to openly, like Elon Musk and the rest, to operate in Iran, to bring in the new space technology. We are a registered company.

Space has been exclusivity of the government and SEPAH. So, we can start launching Spaceflights, space teachings as base development in Iran. This is how we look at it, we don't look at the budget from the government to hide technologies. But now we officially can start doing space testing, because we are registered to this.

We have no black budgets. Our budget goes on what we receive, we sell, and we receive the donations. But, officially now as a space, registered Keshe Space Company, we start space development. (2:40). Americans will test their rocket propulsion, we test the new flights, as you seen the gas productions, and new Enhancement Unit.

We have no black budget, and then we operate in a way, that knowledge which is in Iran is in Austria, is in the United States, is in China. We have registered the Space Institute in US, already operating, are ?? sitting to go through. Chinese is there to go. So, now government's fight who has more advanced. We saw the fight between NASA and the Chinese in the past couple of weeks. A structure like us now shares the most advanced technology freely amongst us.

Governments allowing, even the controlling governments, allowing such an Institute to operate is amazing. You Knowledge Seekers do not understand what has been achieved, what has been done. You just look at one MaGrav and the rest. But, the amount of work we are doing, the amount of knowledge sharing we're doing, governments are allowing even in Iran, which is fully controlled, on the space side. Where an independent private space, which is a major corporation and major changes in Iran, especially on the military side and defense side to operate now freely in the market. And, is owned by an Iranian nuclear physicist.

We have no black budget. (2:42). Our black budget was a black box we told you, you want the Gans production to go, the gas production to go, and we'll see how you as Knowledge Seekers will build it up. We fail, you fail. We don't manage to break the cartel, on the oil. You will fail miserably, because we brought you the knowledge, it’s for you to be able to receive it.

When I told you that the systems will be delivered by the end of July, we are not going to, it's already been built, it’s already getting tested for different application, and be release. This is how we see the structure will take shape.

This is how you should. Do we have a budget? We don't have black budget. We use everything, everywhere possible. We asked you for help six weeks ago whatever, for a

project which changes position or the KF, and we're still trying to complete that, that we can go ahead with it. We found out that there was another piece, which was not calculated, short in the structure, we are trying to sort it out. We're not coming to you or to help us again. (2:44). But when that is sorted, it's no black budget. It's spent directly in the lines, how it is, how it goes, and how we planned it to go.

Markray used as a treasury - when the time comes

We are a major shareholder in Markray, and we use that to benefit all of you when we start moving. We use it like a treasury of the Keshe Foundation. You will understand when it comes and starts operating. And, we use the structure of the Universal Council, the Earth Council, and the Keshe Foundation as a governing body. Govern through the Soul and backup what we can deliver it.

Would there be a black budget? No. Would you allow to create weapons? Why should we need it, when everybody is the same? A lot of people come and claim a lot. I work through all of you as Knowledge Seekers, and you are responsible for what comes, in how it goes, in what it leaves, and how the extension comes.

We need to have 100 unit to across this planet, paid for to be. Because otherwise, I have to go and do different things with different governments and things, and they dictate how the technology is released. When I tell the gas companies, and the government of Germany, already 100 units committed, it's out, are with people, the talk is different than, oh, it's just a scientific organization come here to do something with us. (2:46).

That's why we need 100 units out. You're responsible for bringing that peace condition, not me. I've done my work, we are researchers. You want government's not control, for you are in charge, you're in control, you have to do it, not me. I did it for 15 years, I put my life on it. You have to bring that change. Everything we've done has gone for the Keshe Foundation.

I've just received this, which I'm going to share with you. This is the invitation card for your world leaders. You fill in the name, you fill in everything, which is there and you send it to them. They have to register, booking at booking@at.kfexhibition.center. You book it for them, but they have to come. Now you see how we work. This is a invitation card, you can take a copy. The same goes to Universal Council, and Universal Council Support teams and every one of you. It sits with you to bring that change, not with us.

We are doing all our work we can. Keshe Foundation team is working relentlessly in the background to make sure that what you wanted, what you asked for gets done. (2:48). But, as I call it, you are "side walkers," you just wait there for everything to be delivered. Everything else that is not done, it's the Foundation fault.

What have you done? What are you doing? Nothing. Most of you are watchers. When it happens, "oh, we went with the Foundation, this and that, and we were with the Foundation and the others. " You only participate if there is something in it for you.

Any other question?

Q: Australia … Just a question on the, which was really exciting for me as a farmer, the system that, so you don't have to use fertilizer. Is there a distance to that, from say, my property? Or is it to do with my own soul? That it can expand out further, and further, and further? (2:50). And also, I do have another question, but just on based on that, the energy system that, you don't have to use fertilizer.
K- What do you mean by that?
Q: You announced that there's a system, that you won't need fertilizer? How does it work? Like, is there a distance from (your neighbors)? Or does it only apply to your own property?
K- You can extend it to a city. You can extend it to a cross section of a country.
Q: Right? Okay. And when it comes to, the fuel costs and that. Say, for example, diesel, when all the farmers are paying double now for diesel. I would be able to help everyone here, and the transport companies, in a big way, but probably need a license, for that as well. I'm not sure what the situation would be there? Or would you need to own a petrol station. That's another thing, that we'd have to look at. So I'm interested in all that, what I can do to help others.

K- What. It is the progressive development of the technology and the knowledge, and we are limited in what, and how much we can do? And now we put a lot of resources in the Enhancement Unit with our resources in the power Enhancement Unit. A lot of resources going into this, and fuel of gas. (2:52). So it takes a lot, and we don't receive that much to do. More of less every cent, hand to hand, is getting a spent now.

The next step comes when we go through the next phase. This technology already exists, we have it, It just has to be redirected to these resources. I think part of it you would have understood in the Enhancement Unit in Linz. When we speak about … then you understand, it's not something which we don't have, or it's something.

If you go back to the teaching of last couple of weeks, when we say we have people in the middle. Yeah? The fields from these two (reactors on the side), creates the fields here (in the middle). But the fields we create in a specific way. We cannot do it in a normal way. So now this is one post on your farm, and this is the other post on your farm. You grow wheat this year, and you grow maize, and something else in the other half, next year. It's no use having a fertilizer for wheat, when you are growing corn.

It's a knowledge, which we gained, we have, and expands to the use. It has to be delivered. It's not a normal knowledge. Normally it cannot be done, in any way.

Q: I have this CO2 capture unit from the Keshe Foundation. (2:54). What I've received is more the one Cup of Life system. Is that okay for farming, or should I be using just CO2?
K- That's the best you received?
Q; Oh yeah.

K- That's why it was sent to you. It's the one with the big frame? It's like a box with trays on it. Yeah. Am I correct? with the buckets in it.
Q: Yeah.
K- That is one of the best you have. But you have to remember to use the amino acid (AA) on the top of the cups, before you drain your Gans's, and then add it after the wash.

Q: Yeah, I collected everything, the amino acid and everything into one container. But you're saying you should separate the amino acid, and then add that later? Is that what you are saying?
K- Yes, yes. Because when you wash it, you get rid of the AA usually. It's on top of the water and you wash it out. You collect the AA, you wash the Gans, and then you add amino acid (back) to it.

Usually that amino acid which you collect, brings the right balance salt for the plants, and the things. We sent that unit to you. I remember because there was some delays with the shipping to Australia, and the rest of it. We had a lot of problems with yours. That's what you received, the way you received it.
Q: .. Look waiting is not a problem for me and understand sometimes ..
K- No, your situation was difficult. It was costing us more to ship, than what you paid for it.
Q: It's okay, I'll donate. I've given you some donations, so I'll make it up to you.
K- Yes, I know, because at that time I remember this. Because the shipping, they wouldn't ship. I said what's the reason. It costs. I said find a way to get it done, (2:56). because it doesn't matter, it's our problem. It's been solved. Meanwhile there was some, in the time it took, there was some upgrades and updates, so you receive the upgrades and updates before it was left (shipped).

Q; I'll pay you back anyway, it doesn't matter.
K- It doesn't matter. It doesn't go, because I remember your case, about a year ago or so. It was sitting there, because every time I pass the thing, it was sitting there. I (asked), why doesn't this go to Australia? Why is it sitting here? They said, there's a problem. So okay, I said, now pack it, and then they there was something that had to be sorted out.

Q: Something is happening, because the people that comment on the produce that I (sell them). The fruit, stone fruit, and vegetables, watermelons and pumpkins and whatever, tomatoes. They all always comment on how tasty my produce is. So, I would say that the plasma is doing something. Also, you know, I use other things like the biodynamic methods as well, inputs. But I'm using the plasma in conjunction with everything I do now. You know, I am experimenting?
K- Let us know. I think you work with Jim and Lisa as well. .. We learning more on the farming.

At the moment, all the concentration is going on the dynamic side, or what we call the Enhancement Unit. In time we'll come back to agriculture, because we see if we complete this side, the agriculture side, will be more or less resolved. Because people will not rely

that much on it. We eat out of pleasure of maybe eating something. That's our target. (2:58). But at the moment a lot of energy and effort is going into.

We have a production. We have a research side and a production side. And everything for us, I explained before, (would) take six months to produce something, because the research had to be done. Now .. everything is lined up, we have different teams, and different people who are responsible for it. So like we changed the head units in the EU yesterday, which was changed on Monday. (Before) it would have taken us 3 - 4 months to do it. It was done within a week. The new Enhancement Unit, Head (units) for the other one, which just changed. It will be there next week.

These all cost money, these are wages pay. The expenses on the Keshe Foundation are huge. We don't get support from people. Very few people support the Keshe Foundation. By sell of the products, by developing new .. structures. We try to keep up. KS are worse Jews I've ever seen, most of them. They like to have it, but they don't put anything in it. If I make the Knowledge Seekers teaching on Thursdays, you pay 5 Euro to come in, there'll be 2,000 to 10,000, (if) we earn 50,000, (then) we can spend that 50,000. (But the money) is not there. Millions (being spent), nothing comes in.

Stealing is in the habit of the man.

Q: In the past Mr. Keshe I used to do some PowerPoint presentations, and when I charged $5 not many came. When I charged $20 more people came. So sometimes .
K- What do you mean? (3:00).
Q: So it seems like they thought, they would get better value, if they paid more.
K- I don't know. It's just a way it is. It's just the way it is, it works. We'll see what comes up, we'll see what we can do. We'll see how things take shape.

Q: It takes a leap of faith, Mr. Keshe, it takes a leap of faith for many people. And I think if they feel what I feel and understand, maybe they would give more.
K- Hello .. I lost you for a few seconds.

Q: Yeah, I just said it takes a leap of faith, you know, and, you know, people would give more if they, you know, understood what you're saying and the technology, then they would give as much as they could possibly give, without worrying too much about, you know ..

K We're working on black budget business. We have to serve the technologies to the others, who control, and then we go back into what we call, what's next. You understand? And then people say, "Oh, Keshe Foundation .." You know, the way we did with what you call it, "with giving the Key to the government," If you remember, in 2012 hundreds, thousands of the Keshe Foundation followers, when more or less I call it, "rioting", writing (to us), "you betrayed as," you gave the Key to the government, and the rest of it. Then when we gave it to them, they did nothing with it. What are you crying for? (3:02). You understand? And this is the way it is, the way it sits around the Keshe Foundation.

Summary of what different countries are doing with the T

Q; Which countries Mr. Keshe are the most responsive to the technology today, Austria or are there other countries that .. ?

K- Each one works in different way? Now we have I think about 32 Keshe Foundation knowledge groups. We don't have the Chinese, we don't have the Japanese, those two are not set up. But I think it's about 32. I have a list of. The Arab nations are busy with their business. We don't see hardly any activity in the Middle East Arab nations.

We see extremely active South America. We see a limited number of activities groups or whatever in North America. Europe has always been very, .. dynamic. Europe is one of the most dynamic … structures. We see activities very heavy in Russia. But Russian groups are extremely active for themselves, and it's like they become gang groups. Different groups are working for themselves, but very active.

In Middle East we see Iran. The Turkish Keshe Foundation have, are very active, but they commercialize most of the Keshe Foundation technology for themselves. (3:04). We see them operating companies and different things, and they copy whatever we do. Africa is sporadic. There is hardly any activity compared to the area.

Then we see China. Chinese Keshe Foundation is extremely active inside for themselves. People are making a lot of things in China selling them, on the name of the KF. Some of them change the name to "Quantum," and when couple of the guys who changed the name to Quantum, to defraud, were arrested by the Chinese authorities few years ago and that went ?? with it. But a lot of them work on plasma, on the Keshe Foundation.

Australia is you lot. Japan is extremely active, but in the background. Japanese were pressurized heavily in some parts, especially after Fukushima, by the government of the … this is Prime Minister of Japan. He did a lot of harm to the Keshe Foundation, as I explained. He was the one who was assassinated. He went outright to steal from the Keshe Foundation. But he belongs to one of the most radical criminal organizations in Japan. He is not what he is seen on face. We know how he operated, because we had to deal with him.

Q; Are there any good leaders in the world .. today?
K- I don't know, it depends what you call good, to each side.
Q: Well, you know, I look at people like Franklin Roosevelt, and JFK, and I think, where are these people? We don't see them anyway?
K- But were they good? Ask yourself a question. What we do not know, that they. What did Roosevelt bring in? (3:06). which now.
Q: In my research, Roosevelt to me was, tried to do the right thing, but he died, you know. I think that given the chance, and even JFK, you know, no one's perfect, like in a sense. But to me, there was a quality of, that I like.

K- We have been nostalgic, you know. You have this, you know, young Prime in Canada. Everybody thought, but he turned out to be worse, than the old ones. How in such a young life, he has learned to be such a backward, what do you call it, gangster, and god knows. You heard Rick voicing.

We see the position now in most of Western Europe. Presidents are losing positions, and times, and another one with the same thing, with the same group comes up. We saw how Prime Minister of England now is gone. But some of his activities are no ??? . We say, the ex-Prime Minister of England, they only become prime minister to line up their own pocket. What was his name? The Prime Minister of England he's one of the top richest man in the world now. He put together 18 billion plus, on bribery while he was the Prime Minister.
Q: Boris (Johnson) are you talking about?
K- No the other ones, behind it. Both John Major made a fortune out of being a prime minister. And other one behind him, after Mrs. Thatcher. His wife being a … lawyer. (3:08). She wrote all the private contracts. He has put 18 billion, (that's) known. We don't know about unknown, into different funds and organization of himself.
R: The name Tony Blair has come up several times in the chat, while you're talking as well.
K- Yes, his wife stashed away 18 billion in ?? legal contracts. Iranian leaders did the same. All the Iranian leaders, Rafsanjani and the rest, they wiped out, bribery was nothing.

So are there any good ones? It depends what was good for what reasons, to whom?
Q: Well, the good ones never get in. Like I saw one in America, who went, put his hand up to be president, but never made it. Dennis Kucinich, and he was a man of, for me, great integrity.
K- We don't know who they are sold their soul.

You see, if you been where we've been, what we see, what we sometimes get involved in. These people come to an agreement, who finances them, to become leaders. So any world leader you see today, is already pre-sold. Any, any world leader.

The budget to campaign is so extensive, and so expensive, that needs somebody to back, or syndicate of people to back. These people don't back for the love of the nation. They back for the love of their bank accounts, what they'll get from it. (3:10).

KF Supports candidates for world leadership - if carry Ethos

We see, I see this on a regular basis every 2, 3, 4 years people who approach Keshe Foundation, that they want to be a candidate in the parliament, or standing for presidential, will the Foundation support. We meet with them. We interact with them, because if they carry the ethos of the KF we can do certain things.

In the recent past, the heads of Keshe Foundation have been with me, when we negotiate with the world leaders. They sit on the same table with me. Because they have to learn

how to do it. We negotiate. If we put, support a person to become a leader. We want to see the ethos of the Keshe Foundation. Where we want to see, and how we want to see it. We're not just doing it for them to be. We are there to carry on. As I said, in the .. recent past, some of the Keshe Foundation top people, who have been with me, when we sit with these people, we negotiate with governments

Q; Should be a criteria that every world leader should enter the flight system,
K- .. Yeah it should be that way.
But they cannot do. The campaign costs money. You see the poster on the wall with the name. Somebody had to design it, somebody had to pay for it. Someone had to pay for it to stick on there. Somebody had to pay for that, because they would have put somebody else's picture on it. And they would have made another advertising from somewhere else. (3:12). And again, that kind of thing.

I'll read you something very interesting. This arrived past. … … There is a message here some people got the idea, send the message, that they get the what do you call it, the Enhancement (plasma energy) Unit for 100 Euro. There is no such a thing. … The Gas unit is minimum 2,000 donation to the Keshe Foundation, for you to be considered. Not with 100 euro. Nobody gets anything for 100 Euro. Secondly, when we. I just got another message from the Keshe Foundation team, that the invitation we put out on card, is only for world leaders and ambassadors, not for you, just have an invitation, and I can come in.

Read it, it says, it's for government officials. It's got a writing at the bottom of it. We are not letting nobody in. You have to follow for the Enhancement Unit, the procedure is. This is an invitation card to world leaders to see, to know what (is coming). Some people says, now I have this, I can come in. .. We are very clear about it. The change of the position to come to Enhancement Unit has not changed. This is an invitation, which we give for you, for the world leaders (to come to Linz) they have to come. We have to confirm their credentials, their position politically, and diplomatically, before they are even booked to come in. (3:14). Not just, I have a ticket, I write my name in and I come in.

I was going to show you something. I get messages from everywhere. I lost the track of my mail while ?? we were talking. Carry on because I forgot what I was going to show you. …
R: Well, it started with the donation of 100 euros and that's not going to work. Then you mentioned 2000 euros and then something after that,

K- Before that, I was going to show you something with, it doesn't matter. It means you're not ready for it. We'll come to it because the messages are coming from the Keshe Foundation team in the ??? that is going on.

Q: I hope you remain safe, I am a bit worried, you know, with what you've released, what you've done, may you be protected ..

K- We have meeting today with the oil and gas industry of Western Europe. I'll be finishing in the next few minutes. This meeting has to take place. We do not know the outcome. We have worked, approached, and trying to especially Germany has been hit very badly. (3:16). To sort something with the German government, to support the German nation. It's our responsibility, because the Euro is backed by the German industry. And it's a major corporation in the whole structure. And … destabilizing Germany, destabilizes the whole of Western Europe.

We are part of it. I am the European member of the Earth Council, it's my responsibility. The continent of Europe is my responsibility to cover for these kinds of things. And that's why we've taken these steps. It's not just waiting for something happen. I look at it as part of the European continent, which I stand for as UC member, Earth council member, is my responsibility to see, to be sorted.

Q: .. How does the power energy unit for the home work, and how does the Mobile unit work?
K- What do you mean, power energy unit?
R: I guess the home energy unit is ..
K- The Enhancement Unit which is out. This connects to the house and we have proven now with the Americans, coming up with all the ?? declination of it, the testing of it. (3:18). It should reduce between 30 to 50% of the electricity bill. Once we feed in the generator. The generator is a battery based charging. And with the new what we call, the gas line, we can take that part out of the equation, that it needs to be, to be recharged, because now we back it with the generator, with the system of the house unit to be there.

There are a lot of things, it's a new developments, a lot of things getting added to it, and it is working, and we put it that way. But you can't add that Gas unit to your car. You need to convert the gas into energy, which is done in Europe, in western Europe and most of the world, you fill up the gas tank. It more or less completes a whole energy cycle for us, and both electrical and energy ?? But the majority, the reason for this, it has to come from what we call, production unit, of basic energies, which are set up to be done.

3,000 plasma units to connect with MaGrav - the givers to create Dome

Q: Are the 3,000 new plasma enhancement system set up as pure givers, to find position with all of the MaGrav systems, which can act as the receivers of this energy in order to create the dome across the planet?
K- More or less that's what it is. Because there's another back into it. We work, not with satellites. We work with fields and when we understand the work of the fields. It's a big difference
R: I guess they can't be a pure giver. Is that true? (3:20). There's always some take with the giving sort of?
K- There has to be something in there, to energize it to, to put it in the position of ?? going (giving).

Those of you who are a member of Universal Council, and U Council Support team, we

have posted the invitation to the officials to your site. So you can work with your officials. We welcome the officials from the Iranian government, as much as we will welcome to the Hebrew language, and see if we can do both of them at the same time in there. And the same goes for the American and the Chinese. The English language speaking is responsible for all the English language speaking of, unless you're the only ?? the U Council member for United States English, which is a different.

Q: Thomas .. It's very interesting to hear all what you told us this morning. But I think we have three enormous problems in Europe and around the world. One is social, one is political, and one is financial. We have this ?? war, on the on the information side going on, where America and NATO tries to poke Russia to start a war. We have our so called, Khazarian Mafia, ..
K- Oh, we don't have all these things. They have been there for centuries. (3:22).
Q: Yes, Mr. Keshe. But what I try to ask you is, how are we going about these three things? Because socially, we are at the brink of a revolution, financially, we are at the brink of a full collapse of this credit system, because since 100 years, we don't have a sound money system, we have a credit system. And then we have a social problem where our politicians try to introduce in Europe, and America a credit system, ..
K- Move to Africa (laughing)
Q: No, No Mr. Keshe I don't want to move anywhere. Because we are all in this.
K- No, I'm just. I was trying to change the position.

You see, the whole situation comes out of need. All the positions, all the things we have now, politically, groups, mafias, whatever. Whatever agenda you put it on, comes out of the need. And this is where our major problem has been sitting, need. Where we change this position of need, then we can talk about it.

Q: I think the need, you're absolutely right. But the problem here is, that since the 60s, when we had Brezinski as the man who told the Americans, what the goal of the west and three hundreds, (3:24). and the Foreign Relations Committee is, that is a population reduction. And they're presently absolutely on their way to go to the situation, where the population is going to be very, very under pressure, because it's going to be reduced in Europe and America, and then we're landing in a sort of 3rd ?? world country.

K- Let me, the way I look at it. In the West, we have taken charge, control in different ways, for different reasons. That's all. The life style is changed. We prefer to have one child and spend everything on it, to be a perfect child. We tried to spend more on ourselves, and why do I give live to another life, I have to look after, and the expense of life. It has brought us in a position of, most of our youngsters don't want to have children. So, we brought the population control. It's done by choice.

Q: .. the injections, people received is not by choice, it's a weapon, and it's a death injection.
K- Yes, yes I know, I understand these things.
Q: They'll be infertile …

Teaching of Mitra - you do not need egg and sperm to create life

K- Let me put it this way, let me put it this way. The way if you. If I can explain it. The way we see the KF technology for the space work, (3:26). and if you understood the teaching about the soul of Mitra. You do not need egg and sperm to create a life. You use the soul of a man and a woman to create that child in dimension of.

So, the injections don't count. They can inject you with anything. If you understand you can tune, you can develop, the structure, the way the children of Mitra are born, to be born by you. You don't need. Let them inject as much as they like. Let them do ..

Q: .. the side effects of this injection to the people is creating the suffering, which is absolutely out of this world. ..
K- I understand, I know people out of 4 friends, 3 have died because of injections.

Corona coming - Fall 2022 - bigger than last year

The thing is now, it's coming back again. You will see this winter, this autumn, the Corona mayhem will start with the razzmatazz. Bigger than last year?

Q: Yes, but people know that this is the normal flu. ..
K- It doesn't matter what we call it. .. There is a way they will control. There is a way. (3:28).

Governments wasted pensions - need to eliminate older people - can't pay

Let me explain to you something very simple. You and I got the fruits of the people who were pensioners before us. Yeah, they worked. They worked to build the nations. They worked to build. Our parent's worked their life and they paid for what we call pensions, in Europe, in western world. Yeah. And our government, as we heard from the others, wasted the money. Some of them went for the bribery. Some of them went for the wrong things. Some of them went for military, but it didn't go for the pensions, which our parents paid for it. And what you and I paid for. You understand. And now the government's have to pay your parents, and me and you, in coming into pension.

Sorry, the kitty is empty. The kitty is totally empty. We have two choices. We don't pay, or make sure you're not to pay. Ensure the pension policy in the West is the most amazing structure, that we have accepted, till, because when we die, it doesn't matter anymore. But in fact, if you look at it, you are putting all your money, huge amounts of money into the pension. It's there, it makes an accumulative increase of what ever, during the time you start from 20 to 60 every 7 years, every five years it's doubled. (3:30). But when it comes to you, there is nothing to take. Even though for 40 years you paid for it.

So the government has two choices when you're an age of pension and above you are at the weakest point. Find a way, to term end, because the minute you take the last breath, that pension is a saving for the nation. And we don't have to pay.

Q: That is not absolutely the pensions. Everything is an illusion for …

K-Let me explain to you, why you are in the talk about ..

Q: Mr. Keshe for ?? a 100 years, we have a credit system .
K- It has helped to generate finances.
Q: That is the people ..
K- It doesn't matter ..
Q: The people and everybody will have to use …

K- Let me explain to you something. We are a we are a scientific structure. We are a space scientific structure, but with it, due to our technology, we get involved, we are part, and they become a structure of the government, in one way or another, in affecting the energy, affecting the health, affecting the agriculture.

Obama said is the most disruptive technology ever known, but we need it. So it's for us to change the last 100 years. It's for us to change 1,000 years. Man has never had an opportunity like this. In dribs and drabs. Now you're getting everything in one cycle, what do you want? What else do you want?
Q: .. I'm absolutely with you, what your inventions, what your techniques are, (3:32). what your things are, they are the solution to the problem
K- We are not all the solution. we are part.
Q: Governments are not participating in it. a problem because of the finances ..

K- Listen let me, let me explain to you something. Governments are part of the Keshe Foundation development. We hear from Australia, the guy is making agriculture. We hear from in Iran or China, people are making Gans's, doing things making money. They're paying taxes or not paying taxes, but they are generating into it.

We cannot fight past - setting new way - Change future

Our work, our way is, I have a very clear understanding and policy in the Keshe Foundation. I continuously remind the people around. We cannot fight the past. But by setting a new way, we can change the future. This is how it is, how it shall be, how it will be made to be. We cannot change. We are not in dribs and drabs.

The only thing Keshe Foundation is not, is not on the public television and the rest. But underneath. I was told. I was explaining this past few days ago. I was informed, that because we keep a track of the growth and the shape of the Keshe Foundation ?? hours (visitors to website ??) , we passed more or less half a billion people work, been around, heard, or done, or been around the Keshe Foundation.

It took Christ 300 years to become less than a million. We're only 15 years, Yeah. With all the restrictions they put on us. No technology, (3:34). never in the world of man, a technology combined, has discovered so much, by a collection of governments. When

you don't hear any news in Austria, or Switzerland, or whatever, you don't hear the rest. The institutions, the structure, the mafias has have never worked so hard to stop a T. But we grow.

Q: I don't think that they can stop the technology.
K: But, this technology is going to bring the change.
Q: Right but in the mean time, we…
K: There is always a transition time, it's not a flick of a finger.
Q: No, absolutely I'm fully with you. The problem I see is that there is still an enormous amount of people who is absolutely not informed on anything.

K: We cannot be informed, because they don't care.
Q: Mr. Keshe, I don't mean that they're not informed on…
K: I'm not going into this discussion, because we can go for months, and months with this. Let me explain to you something very simple.

I won't see T fully understood in 50 to 100 years

When the power of this technology is fully understood and applied, most probably you and I will not be here to see it, in 50 years, 100 years. But, it will take its shape, it will take its time.

Holding back part of T till later - bring such a shock to system

There is a big part of the technology teaching, which I'm holding back for years, to come in. When I release that knowledge, (3:36). there'll be no politician who can stop it. There is no financial organization that can stop it. But, what would it bring as a shock into the system? It'll will be another magician. It'll be another Christ making a dead man to walk.

Let me explain to you how hypocrisy works. And how everybody cries for something, which, if we all seen it, we know what it is. If you can do what I've done, in the past years, with the whole structure, with Naomi. It's a major, major thing to build the brain, which is missing, to go to walk. Where is it? Christ couldn't do that.

Let me explain to you, I have accepted that, it needs time. When you accept something needs time, you accommodate for it. Just you know, in the airport, you're waiting for the flight, so you have to do something. I'm that man in the airport, waiting for the man to take your flight to understand his life. Doesn't matter if a plane crashes in the airport, if a president comes with the next plane, or whatever. I have to take my time, till my time comes.

So, it doesn't matter what mafias, (3:38). Illuminati's, Masons, Japanese terrorists and the rest of it, come and go. You have to have the patience to do what I did, and you have to have the patience to build it slowly, slowly, slowly. And then, if you expect just because you bake the cake you have to eat it today. Sorry about that. This cake takes a long time to bake, and bits, and bits, and bits, and bits of people have to take it.

So, we can't change the past. We have to push forward, bring new technologies bring new understanding, change the condition by new technologies show you don't need passports the way we are doing now in the EU, show you don't need the energy now, which will do the gas and everything else, and let's see what's next.

In an hour and a half, in two hours, I'm sitting with one of the leading governmental European oil corporations and government officials from number of countries how to solve the gas problem with the Western Europe today. Why do they sit with Keshe Foundation? You walk into somewhere and do it. Why when we organize the ambassador meeting, ambassadors turn up? They have a full dossier on us.

We are in the transition of the knowledge and technology one side by the man himself, and one side by the knowledge which is coming up through the teachings and the other things, what I call, by the love of the Creator. Don't expect, they have always been there. (3:40). If we're going to waste our time on it, better don't do anything.

Political life is part of the structure of what we're bringing. I've been bombed, I've been shot at, I've been betrayed in every shape or form, I've been poisoned, have I stopped? Do they stop? No. Would they stop? No. Because there is still that wife, that mistress, that game for the child to be brought, and it has to come from somewhere.

I know what I was going to show you, tell you. Just one second. I remember now what I wanted to tell you. This is from somebody who wants to become a president of a nation. It's a message from WhatsApp. It says, when I'm with the parliamentary, then I can start up for the presidency. And it says, I've written this to you, that we need your support to gain a political strength. As we know you have brought in our nation. This is from somebody who's going to be a world leader in the coming time, and has come to KF because he knows we have influence in political directions. I can just put the screenshot of it out, and delete his name.
Q: Mr. Keshe, I am a very positive thinking person, what I do hope… (3:42).
K: I don't need positive thinking, we have no choice. ?? negative ?? do it
Q: I think the outcome will be positive. What I do hope for your conversations and for your talks with these gas people from Germany, that this company whoever it is, will be the first domino to fall, where you van come to …
K: It's not a fall..
Q: Mr. Keshe, let me say, that you with them, can come to the point, where they see your possibilities are such, that, Yes, Mr. Keshe, and the Keshe Foundation will bring Germany all the gas it needs. That would be the Domino, which will then go around the world, because Germany would be strong enough to remain Germany …

German's will change the name - Not to show KF

K: Let me tell you exactly what happened to us in China, it will repeat itself in the West. They take the technology, they change the name to it to the German, or Austrian or a French company, that will not show it's the Keshe Foundation technology. Didn't this

happen to us in Iran? Didn't this happen to us in China? Didn't this happened in Fukushima?

Q: But how do we get to the point where…
K: The point is… No, no, no, no, no.

Millions of lives were saved - that's what matters - not showing T as KF

The point is, how many people got benefited with what we did in Fukushima? Millions. And that's what it counts. Don't expect to receive, we're here to serve, you have not even understood the work I do. (3:44). If it was anybody else, .. would have taken the Japanese Prime Minister, Japanese government with all the documents we have, how we gave everything to them, the sequence of times, and it would have changed.

Q: Don't you think that we are now 10 years later, we have so many more people in the world, which would take, which will see what the KF (is doing).
K: It doesn't matter…
Q: Oh, I think that it would matter. If the ?? Germany ..
K- Tomorrow they forget, next year nobody will remember. Nobody. Who speaks about Fukushima? Now it's history. But everyday Keshe Foundation GANS technology is used in the station. And, where did we receive all the threats from? How everything was curtailed to the benefit of the Japanese. The Prime Minister now he's in a coffin.

If you understand Japanese culture. Do you know what a shameful way he has died? That's why he was killed that way? I said, I wrote into one of the communications of the Keshe Foundation. No one did more harm to Keshe Foundation than him. Do you know, when the technology come out, that the technology is there. It comes from an Iran nuclear physicist, have solved the problem with Fukushima? Do you know what changes it would have brought to us internationally? The rest of the technology would have been accepted. Recently, we found out that one of our inner most people with us, was working with them. We couldn't see it. (3:46).

So, it's irrelevant. The point is, the technology saved a lot of lives, a lot fathers and mothers with the radiation are alive. A lot of farmers in Japan have managed to control it, they are doing the farming. That's what we are there for. Not to count how much good we did, and what it's our next step. This is what it is.

I wonder how many of you Knowledge Seekers will be part of this change we asked for today. I promise you, none of you will do it. But if I put the GANS unit for sale for 5,000, all of you will buy it. And, this is the problem with you Knowledge Seekers.

Q: Mr. Keshe, I …
K: I would like to finish this discussion, please. Thank you very much.
R: I just muted him, if you want to end this discussion now…

K: Yeah, we are nearly about one o'clock, I have a meeting in a hour. Thank you very much for today. We leave the structure as it is, you can invite your world leaders to go through the process of the Enhancement Unit. And we set up the scene for the next step, to see what it is, and how it is, and how the structure of the work, works, and we'll see how everything will come together.

We hope we have success with … the gas people of Western Europe, in the coming hours and days. We hope the Knowledge Seekers understand what is to come. (3:48). Thank you very much for today. We'll meet hopefully, very soon, by next week or so.

And, as I said to Rick before… We do so much tests in the Keshe Foundation at the moment, that we put the Testimonials to be .. from flights on every second Monday of third month, which gives us a lot of freedom, not to put so much pressure on trying to show. We put the testimonials also in the beginning, you've seen it, and you'll see more and more what happens if. As I said, we have to make every one of you to understand, for most of you to realize, this system is a live system in Linz, and carries the information and knowledge of humanity in one way or another.

It's for you to do it. We've done enough, we shared enough. We carry on doing enough. If I have to entice you by, if you come in your cancer will go, if you come in you'll see your grandpa, and if you do this and that. This is something that you have to decide, not us. Do you really want to get rid of that cancer? Or that cancer is a way of you balancing your life? And then don't ask the system to adjust, for your own conduct. But if you're there to see the change, to bring the change for the next cycle, it is there to do.

Thank you very much for today. (3:50). I'm sure we'll see, .. those of you who support the foundation for the .. energy unit, the new gas unit, which we put out, and the rest of it is all with you to do. We do our part. We are doing our part in the best of our abilities.

Thank you very much Rick, and we'll see you shortly, hopefully by next week.

Part 2 is proofed finish part 1

441 KSW; July 14 2022

442nd Knowledge Seekers Workshop July 21, 2022

and **Energy Blueprint Day - Part 2**

(Quick Index 18 p Introduction; Proofed , Transcription done ; need to do Key Phrases, Words,) (Auto Transcription by Elias)

Topic Index

2nd Blueprint - plasma free standing generator released and demonstrated; 300 watts continuous electricity up to 2 kilowatts; 1st Blueprint - Energy Enhancer - reduces amount of electricity used - connects to flight system and feeding system, Plasmatic H gas production on demand; Biden orders drilling on public wilderness to drill and fracking for oil; Generator of plasmatic energy will be used in flight EU; Matching description of the Christ given; Methane and CO2 plasma gas unit shown; Can use to stop forest fires without killing animals - makes rain; Use Universal Energy; Second Industrial Revolution ; Volunteer to be first to transmute from one EU to another; Africans will be equal to western nations; No more brain drain; Use generator in electric cars self-charging batteries; Later show flying car; Plasma lights like sun, never go out; Problems with using too much CO2 Gans; Precautions of using field radiations from outside solar system; Gas in plasma condition has different properties than matter state gas;

Teaching on Isotopes - in plasma it's called, putting a twist on it or an angle - gives different entity; H atom can become plutonium - by giving it a twist; To understand atoms look at stars and planets; Earth is like H atom with only 1 electron or moon; This is cornerstone of knowledge of U; Secret of creation; 100% plutonium in 5 seconds; People we trusted with factories are not delivering; Not free energy - universal energy; Free energy on internet tied to Belgium pedophile groups; About nuclear decay; Thymus changes lymph into any substance needed by a twist of the plasma; Acceptance of T depends on German government now - if they use to solve crisis; Belgium's and pedophile king have to be thrown out of EU and fraud charges against KF dropped or no technology for Europe; Transition time may take centuries; T will go to Markray soon; UC and Earth C to become 2 separate companies ; KF Headquarters to move to Malta ; We have setup for the change; Diesel fuel additive crisis - trouble with shipping goods; Amazon tribes more advanced than Europeans in accepting and using T;

ENGLISH TRANSCRIPTION

(:22).

K- … We are here today as part of the normal Thursday teaching, but in the process, we will show you as part of the Blueprint, the first Plasma Power Generator, (:24). which means independent generation of electricity in a small way, and then addition to it. During the process. You hear a lot of beeping. This is in a way what we were looking for. That beeping is, when what we call, the inverter comes in to fill up the what we call, the

batteries and then it stops. This shows that the system is rechargeable, then it becomes permanent.

This machine has been running for two or three days. And in the process of past days, it has continuously generated to keep at 0.3 kilowatt of energy, the same way, we showed in Tehran. We'll go through that on its own. We might add a third, what we call, Blueprint Day to show further application of the gas production.

This will be sometime next week. We'll announce it where we can show the application of the production of methane gas, as a gas, and a CO2, as a gas. The plasmatic gas of CO2 has a different properties.

In a way, many of you have been asking about the fires in the woods (putting out forest fires), and fire application of plasma technology in the fire business. Then, we just create our condition as a gas, that we don't need to waste or what we call, use water and everything else, which we are used to.

In this process, we extend the knowledge in a third hopefully, what we call, Blueprint, because this has to do with energy. (:26). In Tehran, we showed the production of the gas hydrogen. We show here the production of the gas in methane, and CO2, which methane itself, it condenses as a plasma, has a different application and implication.

The teaching of the process is being all the time with us, we have always taught it, but we could not explain it to many of you. We give you a small glimpse of the process, if we can go and show you the whole system in a few minutes. And we go on an extension of understanding the first plasma technology generator. Which means this can be extended to one to two kilowatts free standing.

When we call it a free standing generator, it means does not need anything else to supply it. It works by itself. It's a plasma they lasts for years. No one has managed to deliver this independent. We depend on the Solar System, we depends on all sorts of chemical reactions.

For the first time, what we promise now has been built, and you can see the generator. The beauty of it, it is like in Teheran, if you remember, you could hear the bleep. And when the bleep came, that was the end of the process. We have the same inverter process here. This is the characteristic of the inverter, not our system.

But I'm sure in the coming weeks and months, this inverter process with the bleeping and cutting off, will go out of the system. But it's good to hear that bleeping. In Tehran we saw when it bleeped, it stopped, we cannot generate. (:28).

This system shows a bleeps, it stops because of the inverter, and then it comes back on again, which means inverter confirms production of the AC from a DC source, from the plasma source. This changes the game of energy production. You can put this anywhere

in the world. You are not (restricted by) temperature, environment, sunshine, or what we call natural gases.

You hear it (the system) has gone off now in the background. It bleeps, it bleeps, and then it comes back on. … I'll just show you the system, and then Klaus from the Keshe Foundation manufacturing will explain to you in a very simple way how the technology has been developed, and how it works, and how it is there.

This is the system you can hear it, you can see the light, one light on, then we see the second light coming on, bleeping, the inverter has produced (AC), and we can see the fridge lit. This is the beauty with this technology. We take the bleeper out, what we call, the transformer (inverter) from the DC plasma to AC current. You have a permanent supply of energy.

This has never been done in the world of science. There is no moving parts. There is no dimensions in changing, or adding. The process can run for years. It can be multiplied to different currents and voltages. I leave it to Klaus to explain, (:30). to show, and then we carry on with the breakthrough in what we call, the world of science. Klaus would you like to come in? .. I don't know which camera will pick up. The best position will be here with me. Yep. Okay, I stand back.

(:30). Klaus explains. Okay, hello everyone it's an honor to explain how this device works roughly. We finished it like this, a short time ago. It is a system like it is here, in a very big box. It is because we still have all our instruments inside, and all the devices we needed to set it up. So, this is definitely not the end size of the device, it can be much smaller, but we just left it, we boxed it, that we can move on. As Mr. Keshe said, with this improvement concerning the beeping, we have already the solution, but we literally didn't have the time to build it in, in a very short time.

How it stands here, it's delivering 300 watts, .. continuously in a balance with the devices, which are plugged in. Which means, if I have a control on my mobile phone, an app, and it shows the constant going down, going up, of the delivery of the voltage for the fridge in this case, and for the lights.

The main content is of course the technology and the knowledge, which came from Mr. Keshe, that we developed the possibility to kick into universal energies. This kicking in is one of the most, (:32). I would say emotional moments I had in the foundation. Because you literally feel when you, you can explain it like open the window, and leave this fresh air in, this energy in. This energy is kicking into the cables, the coils, and this is a process like it was explained here, when there was this blinking of the lights. There is a window open and fresh air, and fresh energy comes in, and then it builds up again. At the control device you can see this continuously going up and down of the voltage, of the power, of the energy, which is coming in, in a plasma state, and it's being converted in the generator to electrical energy, that we can use it here with more or less any device.

What is interesting when we just use it, (break in audio .,.. you can't hear me anymore)

This is the process of kicking in. Interestingly when we brought the device here just half an hour ago, it needed about 7, 8, 9 times, let's say to pump in the energy. Now it was already three or four times, which means it's building up again. Energy is building up again. The window is more and more open. So this is another beautiful thing, that I can watch now that we changed the location of the generator. It needed some time to build up again. (:34). Which it does, or he or she, or it, now. The fridge is on now, it's cool. The light is on yeah.

Of course there are no (outside) cables (connected) anywhere. How can we show it with the fixed camera is not easy. Yeah, it's on wheels. Here's just a connection from the fridge with the extended cable

K- So we can see a totally independent unit, as Klaus said. This will be miniaturized, there's a lot of things in the background with it. We'll build it up to one kilowatt and two kilowatt. We can build it up to, in a position of, point of need, and on demand.

It's taken 40 years of research to be able to deliver this. We have put it up for production and we can continuously evolve and expand. The beauty with this point, and what we saw in Teheran is very interesting. (:36). When we add this system with the methane gas, production of methane gas, adding what we need, in the process of the burning to the methane, we can create, as all of your chemists, know more than me, I know nothing about chemistry, is when you burn anything as you get a CO2 and water. Which means, through the same process, we can in a physical condition create huge amounts of water.

But using that water, which we added to the system, which will come in very soon. We'll show you. It's in the process of getting done. We can add food, we can add ?? medicine through to magnetic field. Which means putting a combination of the gas system, the plasma electric power, and the conversion, through for a continuous production of the conversion, we can create a sustainable life anywhere on this planet.

We produce as much water as we need. We can produce and add to water, the way you do with The Cups.

There we are, as we saw in Iran, the switch comes off it's end. If you look at the fridge is dead (off). Now it takes time, energy builds up by the plasma, supports it. We can control the time of this conversion (switching on and off), and we can stabilize it to a full system. There, you can see it. The process will go on that continuous generation is there.

This bleeping (on and off) has nothing to do with the plasma production. This bleeping is to do with our inverter, (:38). which is made I think in Korea. It will bring that change in. This is the beauty of this process, which means, the inverter is flat, the battery are flat, but the system has a charging capability to support. As we see the fridge is back on again.

This is for the first time, that the process has become stable, knowledge understood, and has delivered to what we said. You can have the condition as we saw in Teheran with a

plasma unit, or you can have a free standing generator. It lasts most probably as long as your grandchild does, if the pieces of it stand. How it will be shown.

Klaus, there is one thing going.
Kl: There is one thing. Next time when it starts blinking, if you are watching this LED light, this shows, that the voltage is always there before the inverter. So it's not, that it just drops down, and nothing is here. It's just the ..
K- So as long as that blue light stays on it shows the battery is charged.
Kl: Correct. Yeah.
(So the power to the inverter is always there, what goes off and on, is the power from the inverter being converted to AC to run the frig).

K- So now we see for the first time the plasma generator, and it can be scaled up to megawatts. It can be scaled up to what we saw initially in China, in the flight system, which we developed in South China Sea. Where what we saw, if you remember, (:40). the balls were all red in color with the Gans's. After the surge of some ?? made 5 megawatts. When we looked at the balls, they were empty, just water.

With this process is what we call, continuous. But what we've done, if you go on the Keshe Foundation website, we have broken it into 0 to 3 kilowatts, 1 kilowatt, 2 kilowatts. But it's something new with the Keshe Foundation. These units are going for sale. Up to now you bought something from the Keshe Foundation that was yours. With this comes a contractual fee, annual fee, which allows us to build up for the Keshe Foundation a lasting income, not just one sold. It works out very cheap. It works at about one Euro per week, more or less depending on the consumption. If you go any further, it builds up to more.

So in a way, you're suffering hundreds of dollars per month, now you reduce to just $1 a month. We'll show the same thing with the gases. When we release the technology on the 3rd of the blueprint, we will show you. You can use that system to burn for the house. You can use our system for filling up the gas tank, running the car on it. The extension of this technology added to a car, electric cars, which we'll show in the coming weeks, means you do not need to charge your electric car anymore. (:42).

The process started most of you around 2014, 2015 we showed you. Now it's a commercial product, which means the technology is proven. It's not theory anymore. It's not a knowledge anymore. It's a technology, delivered, and continuous deliverance. You got to realize most of us we don't use more than 300 Watts to 600 Watts during the day. Unless we do cooking, unless we heat up, or cool down during the summertime. As you see the light is still on, which means the battery is at 2.6, 2.3 volts. It's the inverter that detects the drop, calls on the plasma to fill it up, to charge it up, and then charges it up and it kicks into the next system.

The system built up for the commercial side, takes this part of the inverter out of the proposition.

Kl: Yes, I could join if you want. The controller is .. 26.6. Can you see this? Is this visible? 26.6 is our balanced situation. The plasma kicked in, now you see 26.57, and it loads up again, 26.58. It takes some minutes to charge. Now it's at 26.8. It jumps already to 0.9. (:44). So it means it's charging now. So 26.6, this is the balance. Sometimes it goes to 26.61 and 2, but 26.6 is the balance of the system with 300 watts continuously supplying. Next time it kicks in, I can show the same again. This goes on, and on, and on. It does not go lower than 26.6 in the balanced situation.

K- The fridges open. We can run this during the whole process. We can leave this on for months and months to come. You can work on an AC, or if you're running a car, you don't need the AC conversion. You can work on a DC.

This is what we call a change in the game, where we use the edge of science and technology in knowledge. I'm sure, in the next few months, the size of this unit will be maybe smaller, than the refrigerator in front of you.

It goes back, brings back memories, that if you go to Manchester University, where the first computer, which was just adding, plus, minus, dividing, and subtract, what you call it, division, is a two story house. That was the first computer man ever created. You go to Manchester, you see it. And now, we have come from a two story building, to this block, and now you can see, (:46). what the calculator does in your pocket.

That will be the evolution in the science, as we build it, this will become what we call, a historical unit, the first time plasma generation. The beauty of it is, it goes back again, to the roots of the knowledge. If we add the knowledge of the nuclear plasma into this, this box will produce megawatts. We are using the plasma in a room condition. We have not brought in the knowledge of a nuclear plasma for a space, into this game.

This, if we bring nuclear plasma technology into this, which no instrument today has the capability to detect it. I'll produce megawatts out of this box. This is a pure natural plasma process. And it gives you what you need.

We needed to do this, we needed to show this, because this now brings a lot of things into focus. Upstairs above us is the Iranian flight system, which actually flew, exactly 12 - 14 years ago in Tehran. We brought the knowledge ..

.. Show the voltage.
Kl: Then we see we drop always nearly the same time, and we come back to 26.6, after a certain time as well. I think this is the best proof that we are not losing any energy. (:48).
K- Now starts building up.
Kl: 26.55 starting, and it should go back to (26.60). It's charging again 26.58

… 26.59. And now we are back to 26.60 the balanced situation

K- As I was explaining, that if we add nuclear plasma Technology, which again has been developed some years ago, nobody can detect it. And if you add it to this system, you can do everything with it, and create a new condition for megawatts of energy.

This is a very, what did the Americans say, a small step for mankind. .. or whatever the guy said. (:50). This is a very big box. But it will have a such a punch in the world of energy, that will change the history of the man. Implication of this box, and what we showed in Tehran, the production of hydrogen, and what you will see in the third Keshe Foundation, what we call live energy system, finishes the oil industry. Finishes the power generation industry. If you give me $30 billion, or Euros to build one nuclear reactor, which costs today, and then all the problems with it, all the Fukushima problems, all the three mile island with it. I can give you enough system, that can literally supply a nation.

It's rather important for all of us to understand, the implication of what was shown last Monday, and today. We saw the extension of use of energy. Where the fridge and again 300 to 500 Watts was extended by 3 to 4 times. (:52). Adding that system to this system, understanding the work of the two, we need a very few system like this to supply a village, supply a town.

If you noticed the showing of the production of the gas last week, if Rick can pick it up somewhere, the back end of it. When they showed the first time the burning of the gas there was nothing. As the gas built up, we saw when they.. (You can see the fridge is dead it's blinking itself.) When we saw the demand went on to the gas production, the bubbles increased rapidly, which means production of the gases, on demand.

Putting that technology, including this technology, together, we'll understand you can go to a fuel station, tank a gas. .. It's important you see it, and when we see the fire goes on. But look at the bubbles in the tank in the background. That's the key. If you see it, the bubbles increases very rapidly. Which means we can convert energy to gas on demand. You see the bubbles, as it goes on, increases.

So with this process, (:54). we can extract the gases in an environment, hold on to, and when we need it convert it. When we need it, we convert it to a gas. We need it, we convert it to what we need. And this literally changes the energy game. If you'd like to go back on the camera again in the studio.

What it means, you put that gas unit in a fuel station. You don't need to tank it anymore. You produce the gases as the car pulls up, wants to tank. We have put a price, especially for this structure, round about 30 cents. Because the 30 cents it might cost one or two cents to make, but allows the research, the development. The income for the foundation into the space technology and the rest of it.

This allows a process, that you can call, still have an electric car, or an electric system, when you go to charge, the system does not need to be connected to a power station, burning fuel, causing all that CO2 problem, we talk about global warming. Where the system just charges for the next car. For the next application. We will market this from

December, January of this year. We have fixed it, we set up the structure for it, into mass production. And we will see the change.

We are not going to build cities to clean up the CO2, we are going to change the condition, that by mass production of these units, we don't use anymore fuel. That itself, it gives the Earth to heal itself, from the cancer of the CO2, from cancer of the damages we've done with burning so much ?? fuel.

We got to realize we politically did this, that we show the technology in its stage in Iran. And in the second stage here. That technology is held by no nation. We have a freedom. It shows the knowledge has been shared by two independent groups of the Keshe Foundation. And we can just move this one on to other positions.

But this cannot be a scaffold. They cannot kill a scientist to do, too many people know how to do it, and the expansion and rapid application will bring us that change. In a way, those of you who were crying, the global warming and the heating, we have to allow the Earth to heal itself. Now that we have found a solution. We have brought the first step of change.

When you have a disease plants, when you have a diseased body, you allow it, you find a solution for it, and you allow it to heal itself. You allow it you don't approach it. With the technology we've shown last week and this week, we stop the drilling, the cracking.

As we heard even today, President Biden has done the presidential executive order yesterday, (:58). to sort out the situation with CO2 and energy crisis, with drilling more holes, and bringing more cracking (fracking). Your Excellency, President Biden, your answer is here, and does not sit in the mind of Texas, and in a cracking of the oils and creating more mayhem. Give that fund to the Keshe Foundation across US, and beyond. And you'll have the most cleanest energy supply.

Unless you're lining the pocket of those who actually voted you into, the what we call, the White House. I'll be very straight. I did the same thing with Obama. When we gave the technology Key, on the 15th of November in 2012, to the American ambassador in Brussels, when we asked for the peace, in exchange for what we had at that time with Iran. This knowledge is in that Key, it's nothing new. It's just American scientists with all their cleverness, do not have the intelligence of the Iranian nuclear physicists, to know how to decode the information on the Key. The Key was given to the American ambassador, went to Washington, the Key went to 75% of the world population governments. Nothing has changed on that Key, the knowledge the same.

When the Singaporean government gave the Key to one of the scientists, and he contacted us, he said, I have the key but I can't decipher what you have done. Can you tell me. I said, how did you get it? He said, the government has given it to me. I said, are you part of it, He said, no, I'm independent scientist. I said, if you know it, the world has to know it, and we open the key.

So the knowledge has been in the hands of the elite scientist of the government's. (1:00). Now it can be shown in public. We gave it to the governments, we gave it to you Knowledge Seekers, you couldn't do anything with it. So we had to show you how it's done. We saw two parts of it on Monday. And I think this on its own is a powerful statement.

As I said, we market this very rapidly. We try to market the gas before October November, to meet the demand of the German nation, as we've seen. As we said, the collapse of the German economy, due to the boycott by what we call, the Russian gas pipeline. And then we build it to the next one.

What is important with this is, you look at it as a light. You look at it as the structure in front of you. I'm not interested in this. Because this unit, this technology backs into that (EU) technology. These are the space reactors, what we needed to be able to produce materials, and to create what we call, the Enhancement Unit's work.

So what do you see here, you're happy to get. I needed this, to make an independent power supply into the flight system, which many of you are coming to test in the past four or five weeks. Every time Tuesday or Wednesday, we get about 10 of you and very interesting situations coming up with it. I'll explain later. (1:02). So, the reason we are interested in this, is not your, what you're interested, you look at the AC lights or DC lights, it's the plasma energy fields, which allows us to run the new plasma Enhancement flight units.

This is the power supply for it. This unit will be fitted into (the flight EU), what if you came to Austria to see it. It has given many of you, many chances to see a lot of other things. We adopted it. If you remember when we started with the 3, 4, 5 people at the beginning.

I keep on opening this to say, that actually there is no power (to the frig). As I keep on saying, this is the inverter problem. Which we had to show it, for us this way, that you don't think there is something behind. It's a consumption. Yes, Klaus, go ahead to show.

Kl: Now that we have it running about an hour. It's the same situation. You know 26.6 is the balanced voltage of the system. We are at 26.42, the plasma is kicking in. It's charging the battery. 26.57 volts. … 26.59. 26.60. (1:04).

K- When you see this, you understand, we just need to multiply the system strength to give you three watts, 2 kilowatts, .. and the rest of it. But we have gone for maximum of 2 kilowatt use, which is what is put on offer. It'll be delivered as it is, the way it is.

As I said, you're interested in the electric side of it. Our flight systems run on the plasma side of it. In that process allows us to create the condition of the flight. As I said, if they can turn the cameras, to the flight room, what we call, the Simulation Room is just on my right? Yes, you can turn it, you can see the. If have you been to Keshe Foundation, you have seen, it's just sits behind that wall. (camera shows door of Simulation Room.)

Behind that door is the most advanced space flight system known to man. You can fly with a Soul of the Man (STM), or you can fly with the physicality (P) of the man. In upcoming weeks, we'll show you. This is where the knowledge of what we call, Keshe Foundation sits, and demonstrated. We produce it in the factories, in the laboratories. We bring it here to show its power.

What is interesting for us, as we said, we had a very interesting people here on Tuesday and Wednesday. It's the second time we had if you go back into the recording of Testimonials. (1:06). We had a guy who said, he felt Christ, presence of Christ, he wanted to do that.

But what we have now, we have, as I told you, we are literally setting up the information. We are gathering data. On Tuesday, we had a lady here, non-European. And we did not know anything, we don't ask anybody any questions when they come in. When they go in (to the Flight Room FR), and they come out, then they explain to us, where they've been, what was their wishes. In her writing before (she went) to the system, was to see the Christ, bless his name. This we were not aware of. When she came out, she gives us a detailed physical features of Christ, the color of the hair, the eye, the clothing, the sound, the voice, and what was exchanged.

What we have up to now, I'm sure, we'll see, because many people who come here, their wish is to see Christ. It fits into the description we have given before, how he will look. I'm sure in the process, we'll bring all that in. This doesn't come that the lady has seen the Christ. Her ancestors, the way we carry the mutation of DNA, carries the RNA information down the line. That's where we see it.

And we've seen evolution in that process We cannot do this with electric current. We can only do it with a plasma current, with a plasma. The way the energy of the body of the man as a plasma does. (1:08). None of us has an inverter like this (in the new unit). None of us has a charger. Now of us has all sorts of things. Our body works on the process of recharging, getting new energy like this (the new unit) does, by eating food, by absorbing energy from outside.

But now, the matter state has to run on a matter condition. You see the process. We know there is nothing wrong. It's the inverter, because the blue eye is here, the blue light tells us, "I'm in full charge, I'm running." This is what we call actually, "a Blueprint Day." We have printed that blue light on the history of the knowledge of the man. It brings us beauty, it brings into what we brought, and what we can show. This is part of the what we call, the change for humanity.

The units, as I said, will be a smaller, compact, but it is showing the strength of the knowledge. You can literally go on the Keshe Foundation website and order it. I hope they have opened what we call, the Store, delivery in December, January of next year.

What is interesting, with it is, we try to cover the gas production prior to winter time, that nations can support it. The Gas Production Units what we saw in Tehran, and the rest, it will be delivered to governments for them to see, and to bring the change in. To kick in and we'll see the change in the fortune of the European nation's, (1:10). with the boycott and the cut off the gas from Russia.

As we heard in past couple of days, the Russians are indefinitely closing the pipeline to the Northern line of the gas pipes to Germany. For whatever reasons they say, it's for sure, they could not see such a thing. Now they shut down. There's bigger problem, the bigger problem, we know what it is. But what is interesting, as I said, the worst thing is, for all this new technology, is that, they say usually what changes, comes from within.

I come from the Iranian nation, which during the Shah in 1970s, up to very recent past, 80%, 90%, 95% of his national growth income came through oil and gas. Today, man from Iran, the oil reserves and gas reserves, which the nations of the world depend on, now have to destroy everything from the base, because now you don't need it. What's going to happen to the nations like Iran. What's going to be the eventuality with nations like Saudi Arabia, they are sponsoring big, huge terrorist organizations.

What we've seen, the amalgamation of knowledge, and the wealth of the West has brought so much pain to Middle east. What's going to happen to this. What's going to happen to implication of now, the gas, and this, on the nations who are totally dependent on this natural resources. It's a change of game of the totality. (1:12). It's a change.

Because now in the next 5 or 10 years, it's not going to happen overnight. We will not touch oil, as we've done today. We will not refine oil as we've done today, because we don't need oil to run our engines. The cars we have today, running on oil, we put a gas converter on, we put what you've seen, and then we step it up to the next level.

What will be interesting is not that, we cannot, we are not ready, we can show and demonstrate the production of methane gas today. But through to what we have and what's going on. We'll show this in the third presentation of the Keshe Foundation, of what we call, the energy resources. What will be interesting, is for Knowledge Seekers (KS) to understand what we have, and what will come, is not very far from here.

We're going to show you something very interesting, and I'll tell you the reason why it's going to be done in a different way, is this (pushes the Methane Gas reactor on camera). On the third plasma generation energy, you will see, I will demonstrate the production of methane gas in a commercial level. (1:14).

With it in the next presentation, we'll show you us deliberately creating CO2 gas. It has implication and application for us. And it will build up the system to what we want to show. The methane production in the second, or third energy development, which we'll announce it. Will be shown simultaneously between Tehran and Austria together. It has to be done that way, to bring the change, to bring the condition.

This system is getting literally finished. We don't have the production of the what we call, mass production for the coming time, to be delivered. We will show the system, which will work in condition of fuel stations and home use. And Tehran and Austria, we showed Tehran first with hydrogen, and electric. We will show Tehran and Austria together with the production of CO2, and what we call, methane gas.

That will bring us to a new condition, independence from the resources of this planet. In a way, we become independent from the resources of this planet, while becoming dependent on the resources of the universe. This is what this technology is, universal systems. How the system will run, will operate, and how the system will build up, to become an inclusive system. It'll become an inclusive system where we have shown the energy, we have shown the gas. (1:16). We need to bring into play the production of the water. We need to bring into display the production of food as a universal unit.

The understanding of this technology is what we call, important for all of us. As Knowledge Seekers, you've been at this for years. Now, as always, we said the proof of pudding, is in eating it. We've shown it, the extension, rapid extension, or generation added to the extension, then you can see. It can do marvels, you can change the whole history of the power generation. We needed the steps of 150 to 200 years with the oil production and with other things.

But now it's time to move in the revolution, or what we call, Second Industrial Revolution in the history of the man, to move from matter to plasma, and bring this into what we call, completion.

There is a note in the background, "what happens to the people who ordered the plasma units?" Those plasma units will be replaced with a 0.3 kilowatt generator. As we promised, those who ordered till yesterday, as of yesterday, that offer of replacement has changed. Which means you can have the plasma system, or you can have the generator. You can't just go and buy them. There is a price difference of 5, 000 and 10,000. You can convert and you can add to. We'll bring into play, (1:18). totally a new game in energy. Totally a new different way of energy production. As you can see, the frig is still running.

Now is to, in the coming weeks to transfer this, into the flight simulation. As we said, as we talk now, they are changing the systems in the flight system. Because we finish the next week. We learned a lot in the past few days. The systems have been adjusted, the system has been adapted for the new, what we call, flight system.

By next week, we go for transmutation, which means we want to transmute people or objects from one unit in a flight simulation system, to the other. As we said, you can become volunteers to be the first person to be transmuted, or the first group of people to be transmuted. The knowledge has reached that point. And we have achieved what we call, continuity of knowledge expansion. Some of the things you've seen in the picture, now is in this room. Some of the what we showed before, you can see how the extension of the knowledge has come into play.

We hope at the moment, (1:20). this system is under development and the production in Keshe Foundation research centers. Where what we showed you in the past, will become the present and the future of what we call, the world of life of man. Here, if our camera can turn, and we can show, you will see the first what we call, Horizontal unit. In this unit, the doctors will be able to, literally, do anything man needs. It is not Med Beds, this is a plasma technology, at the edge of science.

It's been used is not something theoretical. It has being used, we have used it here. And you can literally, in time the doctors can grow limbs, while you're in here. Human times, amputated the legs, can be re-grown. Heart surgeries, you don't need to do, because each section of this system brings different application, different conditions.

It's been set is not something that might work, it has already been checked. It's controlled by a panel, where doctors can decide, which to, where to, how to bring it. Then what you see here again, is the Vertical Unit. You don't need to go into that system.

This one is getting built, very much like the system we have in the fly zone. Where you can go in, and in next maybe month or two, it will be completed by our people. (1:22). And literally you become a passenger of universe. Where you will decide where you want to go. Where you will decide in how you want to extend it.

Where the knowledge of the plasma, not matter a state will kick in. One of the problems scientists have had in moving material, is they always rely on electric. In the world of science, in the world of Creation it's always plasma. Now that we have managed to create the plasma energy, all what man dreamt becomes a reality. You can go into the box, into the Vertical unit and literally move from one place to another. You decide.

We know this very well, as I said before, in the teaching of a couple of weeks ago, and we have proven it. It's 100%. correct. We send people into the flight zone simulation. They sit there for 15 minutes to 20 minutes, and I decide not to say anything. I ask them, have you been there? No. And I say can you come out. They come out. Nothing happened. Like yesterday, I take them back in again, and I tell them, this time you go there. Or when they're sitting in the flight system, 15 minutes, 20 minutes, we allow the energy, the field of the body of the man to take over. Then we tell them where to go. And they go exactly where we tell them. And they come back. They decide after where to go, and they tell us.

The beauty of it is, as I said, it's like when you go to an airport, you hang around until your flight time comes. Then it comes, New York, you know which gate to go to. But now, (1:24). with this technology, you go into the machine, you decide I want to go to New York, like yesterday, the father, or grandfather decided I want to see my grandchildren, and the emotion of it is an amazing condition. When the grandfather feels the presence of the grandchildren, he yearn for to see. When the son sees the father and grandfather, and tells the father, I met the grandpa and he explains the emotion, the physically being there.

Now we put people into the system. And we wait for the whole evolution of the technology to kick in, to go, to see. When it comes to this one, like a Vertical unit, we see that. When you go into this (Vertical unit), you decide where you want to go. You decide if you want to go to Mars, you decide you want to go to Grandpa, you decide to meet the grandpa, who died two years ago, in the dimension of the plasma. You don't need to hope and wait for one day you meet. You meet the minute you decide.

This brings a new dimension in the knowledge of man, where now we become in control of the soul and the physicality at the same time. This is what we set out to do. You decide what you call, the dream, which is the travel of the soul to bring the physicality too.

So, when you go into these new systems, (1:26). we can send you now with the knowledge we have. The system is actually getting fitted now by our people behind me. You can go from one system to another. In the next few months, you go from, as I promised, from one side of the bridge to the other, above us. Then the universe is your oyster.

The technology is complete, and is not a talk, anymore. It's not that it might happen. It has happened, it's here. And I hope you Knowledge Seekers enjoy this travel. I hope as Knowledge Seekers, you understand the Totality of the work of this system, this knowledge, this technology. As we said, welcome to the world of plasma, evolution in science, evolution in next step for man with plasma, to decide a new future for your home, your race, and how we decide to deal with each other.

Does energy become a bargaining power. You got to understand, what we saw with Corona last year, if this happens in Europe, and big gas production, which is now stopped to Germany, who dies? It's not political decision, to show the power of the Russia, can control. The old, the sick, the operations, which needs to be done on the cancer will be delayed, or canceled, because there is no energy in the hospital. Children will be born premature, and there is no machine to sustain them. There is so much, that this energy production unit will change. (1:28).

We don't need to wait in Africa, if the Western nations are prepared to build a refinery, or to build a power generator for us. This is one of the reasons Africa is suffering so much, because Africa is not getting subsidy for a nuclear power stations. Africa is not getting subsidy for solar cells, solar villages, the way it is done in the West. Africa has reached, according to United Nation, to the maximum production of the hydroelectric power using all their rivers. The nations cannot grow any further, because they don't have the power. They don't have the electricity. They don't have the money to buy oil, to burn, to buy gas in West, to rob, to sell arms to keep your nationals happy.

Now with this technology, Africans stand on the same leg as the Western nations. Africans stand the same position as the Western nations. They have access to unlimited supply of energy. They have access to unlimited knowledge, that they can use, the scientists can use, in parallel with the Western scientists. It gives opportunity, that we

don't see the brain drain from Africa into the Western nations, that Western nations show they are the best, because they pulled in. They have taken everything in.

We've seen in NASA, most of the scientists are not Americans, they become Americans, because the knowledge has brought them, and given them an American passport. We see the same thing in Microsoft. Where it has come, Microsoft was recruiting Chinese before. Now they are recruiting Romanians, (1:30). Bulgarians, and the rest. It's become an all American company which, in fact, it's all "One Nation" company.

This is what I went to Ghana for, to make sure that the African nations, become dependent on their own resources, and the African nations, stay in their own power. There is no need for people to travel to another country, risk their lives, go on the high seas, pay all sorts of things. We see the most elite scientists becoming cleaners, and what knows, … or the what we call, security man in the hands of the other places in London. And then become the president of the nation of Gambia. Because he used to live in the West, he knows more than we do. And we will see the end of abuse.

What is nice to see, and in the coming weeks, we will show as I said, the discussion of petroleum, we'll show you how to make, if you need fuel, diesel, petrol. We don't need to use a diesel and petrol anymore. A small conversion on your car. With the gas production, we have finished with a diesel fuel.

As I said, in the next maybe 10 years, five years, when we pass the fuel stations, we call them the "old dinosaurs." It will not even be worth to take the banners of the fuel stations down. Because as you know, especially in Europe, if you buy a fuel station, the ground has to be certified clean from oil contamination. Which is initially uranium contamination, (1:32). within the oil, which was exported.

As I said, we saw the telephone boxes in London, as an eyesore, when the mobile came. The fuel stations, with what sits in front of you, finishes everything. Now, all electric cars is on the card. Where you do not need to charge. All electric cars, that you don't need to go to a point of charge, that they burn the gas, they burn the oil, hundreds of kilometers away, and they sell it to you as a green energy. Because you can't see it. So we blind you with it.

You put a system in your car, and all cars will become electric. And the beauty with it is, you'll see DC and AC application of the generator, which means can create power, can give you the condition of the torque, that you need to create motion.

And if you go a step further, maybe in five or 10 years, maybe what we wanted to show on 25th of November 2011. When the damnation of the Belgium officers, on the instruction of the what we call, the demised king of Belgium, they came to my lab and took the facilities away to show the first what we call, levitating car.

In that process, we come to the point that do we even need to convert AC into electric? Do we even need to bring this in the position of even running a wheel. Then you can

understand this plasma energy can create levitation, can create gravitational magnetic (GM) field positioning, (1:34). can create a condition, that all of us will become independent of the government's supply of electricity energy resources and the rest.

In a way, as our camera is moving to another position, production and Creation of what we call, what you all did, and I trained you well for in past years, conversion of the hydrogen, conversion of what we call, the plasma Technology, which you all done, has made this possible. That you can see the power generator in front of you.

The interesting part for our governments is, can they stop you to produce H3, or a hydrogen, or other materials in your kitchen. And as we saw, with a Chinese, little girl five years old, on the floor of the kitchen, she's making it. Our children will learn this knowledge, as they were born with it. Our children will take this to the next step, the way the second generation of human race with the new computers, are creating new dimensions (D). And we see how we'll bring the change in.

I stay here for days and weeks, you will see this is running. It will run, it will run for as long as the whole system is recharging. (1:36). But the beeping is nothing to do with the plasma Technology. The beeping is to do with mankind conversion technology. If we change all our what we call, lights and heating in the conversion of the plasma, then we don't need this inverter.

Go back into the patents, I even explained in the patents, lights, which are a plasma light. The biggest problem you have with the plasma lights, is to switch them off, because it's like a sun, when it starts, it runs for life. Would in the very near future, we come to carry, instead of LED light, we call them a plasma light, which has nothing in it, except the condition of plasma. You converted to the CO2 into light.

My biggest fear is the way we are going with application of this technology. Human Race has to decide how much CO2 we extract from the atmosphere. Because if we go too far, we can create the problems, that we have to dig back into the oils, for example, and keep on burning them, just over the what we call, oil fields to create enough CO2, that the rest of us can pick it up somewhere else to convert it. In a way, it will come back full circle.

Or we develop technologies, which we extract fields from the universe onto Earth, that we can charge these batteries. But then there's another problem, that what other radiations, or materials, or fields we pull in, beyond the Solar System into us, because of us. Beyond on Earth, because we are not used to.

The biggest problem for human race from now on, is not just to look at the what we call, CO2 pollution, or the global warming, is what fields from the beginning now. (1:38). As I have explained, is to see what fields from the universe we attract. What are we bringing in? How much of it are we bringing in, because now we have a plasma. What are we locking into? Then you understand the dilemma of a new technology for man, is the use of the technology. That blue light explains the blue planet, but that blue light brings a change for all of us.

I can sit here, and we can have as many dinners and breakfasts till the cows come home, as we say in English, and this system will still work. Now the question comes, how us as humanity will work with this. How us as the human race move into the plasma technology, to produce the present transition of time, from.. matter into plasma at the moment is interesting for you to see the gas.

But this is a gas in a plasma condition. It has different properties, than what you're used as a normal gas.

Would we need to use gases anymore, or what do we use the gases for? What do we create with them? What do we need to do with them? These are the questions with the human race in the coming centuries and decades has to answer for its need, for its demand from the energies of the universe.

Now you understand why we call all these universal energy systems, universal plasma energy systems, because they tap into the energies of the universe. (1:40). They tap into what Keshe Foundation stands for. We are a spaceship organization, which means we bring the knowledge of space to Man, and how it will be gifted with a new technology.

As I said, we welcome you to the world of plasma. The elusive energy generator you've been looking for. Now, in a way, it sits right with you. It's beautiful to see, we'll see the light of the freeze the man made, and the light of the Sun, that Creator above it, coming from the top. Both shine the same, but bringing different messages to mankind. Live with the light of the universe, and enjoy the time, like the rest of the Creation, or stick to your powers, and let the Arabs, the Iranians, the Americans, the Canadians, and the rest to take you for ransom for energy.

Work with us with the knowledge of the Creator, and no one takes no one, for ransom. But this is the beginning, and we'll see how things develop. We'll see how everything else will move on. As I said when you look, the light is still on, the plasma is still working. This is the man's job, that we have to convert for you to AC. Then you will understand the process of the technology in bringing the knowledge through the Keshe Foundation is complete.

We go for a small break, and we come back and then I answer any questions as usual we do on Thursdays, and we call it a day, but meanwhile you hear a lot of bleeping, (1:42). because man's life has a lot of bleeps. Now we have to solve this bleeping, for you to become part of the Universal Community without it. Rick if you'd like to take us out of bleeping time, and something interesting, and we come back.

Proofed to HERE >> continues

>>> BREAK <<< 442 KSW July 21 , 2022 (1:48).

K- Yes, we are back in. Welcome back. If there are any questions, except those kinds, tell us how you built it, what it is. And is there this Gans in it and that, which we don't answer. As we always say, you had 15 years to do it? Patents were released to you 10 years ago, and to your governments, over 12 years ago, 10 years. So, the beauty of it is how much the humanity will benefit by this.

So we come into, (1:50). what we call. You see this unit is still running? We see this unit still adds its elements, and showing its work.

Any questions?

R: Well, of course, the first question was, can I see inside the device, which I responded in YouTube with a simple, no. You're used to that question. I assume that it's the same in this case.
K- Must be an Italian asking that question, they usually ask that.

Q: .. Mr. Keshe, thank you again, for your welcome in Linz. We are indeed still connected to the flight unit. For the unit dedicated to electric cars, that I created, thanks to your teachings, I could see that the battery health was still in 100% after four years of use. Do you have any information on the state of, wear of the batteries in the current trials? I think that the plasma compensates the deficit of consumption generated by the use of the energy of the battery and regenerates it.

K- Not really, it pulls it in by other system, which feeds it. (1:52). As you say, it's another way of putting it. The Plasma is always available in the environment of it, it depends what it pulls out of it.

Isotope Teaching

There is something which you never ?? taught in the teachings, but it will become important for many of you Knowledge Seekers, to realize, which is an addition to the knowledge of the present time. …. In the present science, we call them isotopes… When we call it the isotopes in so many different ways, even with the Hydrogen, we call it one, two, H-2 , or what we call Tritium, or we have different Carbons, or whatever you call it Carbon 13, Carbon 14 and the rest of it, or we go into understanding the totality of the knowledge, which is lacking in the world of physics of today. How do we create these

isotopes? How and the reason that isotopes are created, that never been understood, and it's just been accepted.

As a nuclear physicist, this was one of the first things I had to understand. You call it isotopes, I call it, different direction "energy packs." It's very easy. I always say, if you can't understand in the micro, go to the macro, and you understand it very easy. In the present world of physics, astronomy, whatever you call, you have all the planets, stars, (1:54). rotate in a, what we call, it doesn't matter, clockwise or counterclockwise direction.

This gives you, let's say Hydrogen… So, this gives you the Hydrogen. Then how does the Hydrogen attracts an additional neutron? What condition changes it? Why some planetary systems have one Moon, and some planetary systems and have two Moons, and some planetary systems have twelve Moons? Is there any difference in the world of physics between the planetary systems and their Moons, and atomic structure and electrons? There is no difference. But, the interesting thing, for many of us, is… (Mr. Keshe have problems here with his microphone …) (1:56).

So, what it is, we have this moon, combination of Moons and other structures. Let's say if we call it Hydrogen with one electron. Earth with one Moon. In a plasmatic condition, what we call in a matter of state neutron and protons, they sit inside as, what we call, the games. These are the Plasmatic energies, which we have never understood. How come we still have Tritium, but still with one electron, with one Moon.

So, if we create a condition of different structures, we attract different number of moons or electrons. Earth to the present world of physics is a Hydrogen, because he has only one electron. But how does it become Deuterium and how does it become Tritium? Very simple. Again, go back to the world of Creation. What do you do?

You give it a twist good, give it an angle. You call it, the axis of the Earth is five degrees or whatever, of X, of the vertical position, which gives you seasons, which gives you different absorption of energy.

So, if in the nuclear science we look at the totality, maybe Deuterium stays this way. (1:58). Tritium has axis rotation on its nucleus, field, and Deuterium is a slightly twisted.

On Earth we call it seasons, in nuclear plasma physics, we call it, isotopes. It does not matter what sits, how many protons or electrons sits inside. In the plasma technology is the essence of the fields, and the strength it produces in respect to it.

Now for the first time you understand plasma, as isotopes of plasma, and if you understand this, now we can create nuclear radiation, this is what <audio unclear>. You create different angles.
<Mr. Keshe have problems with the microphone here>

So, now for the first time we know, if we twist it a little bit, ….

So if we twist it to slightly to a different angle, you get the Deuterium, or is this Deuterium, and this becomes your, what we call, the Hydrogen. Different angle in collective plasma dictates the seasons, (2:00). the field radiation.

This will become part of the teaching in the future, because I cannot find a nuclear material, but I have the knowledge, which I can twist the plasma of the center, the plasma of the material, and putting it in that angle, will give me gamma radiation, alpha radiation and any other radiation, even into deep Cosmos radiation, which man has no knowledge of it.

Angle of rotation - Cornerstone of deep space plasma T

What's on the screen is a gold dust to nuclear physicist and plasma physicists, if they understand it. It's the cornerstone of the new plasma technology. This is why I (can) carry nuclear material in hand without (protection), because my body coming from deep space knows how to transfer.

This picture on the screen is the cornerstone of the new plasma technology for deep space. I can release from different position of this, energies, that the present nuclear weapon technology cannot even match <Mr. Keshe switch his microphone> (2:02).

So, now, you understand. Today, I haven't given you Plasma technology, this is a knowledge, which man needs and most probably is more important for you, than the energy power supply you have seen.

This is the secret of Creation and how you twist, or position the central core, central plasma, dictates how many Moons you attract. What is a combination of the fields in that process, that allows for it to be done.

I told you, I start teaching you "beyond knowledge." This is what you have to understand. And if you understand this, if the physicists understand this, the new world of science and technology in plasma has started.

Then, if you understand this and take it a step further, this plasma can be energy of your soul. How does it move that makes one character to become a murderer, one character to be a lover and how so rapidly we move from one to another.

There is no difference in the world of Creation is the man who doesn't understand it brings that difference. Then, you understand how we interact with you in the flight system.

You cannot go into space, if you do not understand this. This is the cornerstone of the Creation and the work of the Creator. (2:04)….

This is the first fundamental teaching on the plasma technology in a universal condition. But now, for man to understand how to twist it, like the ?? beckon does, is a riddle for thousands of years.

If you know how to do, how to deal with this, an atom of Hydrogen, as you say in English, an atom of Hydrogen is and can behave as Plutonium. How you twist it, how you angle it, how you speed it up, decides how many moons it will attract? It'll decide how many electrons you attract, because in a matter of state, you look at what we call, nucleus. Then what we call in plasma technology, as one Plasma. What decided in this plasma, dictates the position, and number of the Moon, and then in a nuclear industry, what field radiation you want to take from which Moon. The way you created gold bars, and the way we created Hydrogen gas from.

(This is the) beginning of a new era in the world of the plasma technology and physics for man. (2:06). Up to now we dealt with the matter state physics. From now on, we deal with the world of the plasma physics, the true plasma physics, not the game in CERN, or Tokomak, and what we've seen in nuclear industry in the past few decades. You do not need much to create the effect of Plutonium from single atom of Hydrogen.

We do not need to bring and change the condition. This is what I said in the past few teachings, directly going for IAEA and directly going for, what we call, the sanctions on Iran. Iranian nuclear physicist have access to the knowledge, that man cannot dream. What do you want me to create Plutonium in and when? 100% Pure, not the way they're tackling it and worrying about 20% enrichment. I give it to you as rich as it comes, 100%, takes me five seconds.

This is what we say. This is what, will take time to actually siphons off into the world of science and technology, and to show that with a single atom, you can have all conditions of the universe, all materials because, Uranium and Plutonium are on the bottom scale, if man is looking for matter state. How do you handle when you have 2,000, 3,000 energy of electrons? (2:08). What will be your response? In Deep Space how do you think these fields of the universe get to us? How do they divide? How do they create new life?

Then, now with one knowledge you understand the Soul of the Man, the matter energy of the man, the what we call, the plasma energy of the universe is all the same. Now welcome to the true knowledge of Creation.

New plasma technology, new science for man, new understanding of how things can be implemented and applied. If you noticed, you don't hear much bleeping behind me as much as at the beginning. But if you put the camera on, you will see, that the systems are still running. (Would you like to switch over and show and come back on the screen again to the whiteboard.)

The more you run, the more you absorb from the environment. Do you remember when we started? We've seen how fast he was bleeping because it was just brought in us. Klaus said, we just brought the system for security reasons, half an hour before presentation.

Now you see it. It takes shorter time, and true to its use, the fridge is still work, (2:10). and a small slow cooker can still cook.

Problem with promised factories -

We told you a few weeks ago about how we are about to set things up to go into mass production. Many of you, the last leg of millions of Euros, Keshe Foundation invested, try to help to bring it out. We will reveal to you, that this process will bring, gives the possibility for new factories with new knowledge and technology to be set up, and gradually to go through a transition. Those who are setting up and trying to get this sorted have taken too long. We have two choices. The Keshe Foundation has been defrauded by millions, or they deliver the material, which they promised. We'll reveal their names and their organizations, and I'm sure they do not like to know their name has been released.

Then we ask for action against the old structure, or we see their support, as they promised to deliver, that we on the back of our knowledge can deliver the technology. Then we ask you where to find these people and how to handle them. Then we go to the governments, that no organization can be defrauded by millions of dollars of its assets. We hold the name back and the structure back, they asked us for a few more days, if we do not receive it, then we release how many millions Keshe Foundation has paid, that when we release this technology, we don't rely on governments, to support us, we rely on the strength of the wealth of the knowledge of the, and the wealth of the Keshe Foundation. (2:12).

Then you understand, we will structure the whole, what we call, the production of the new systems on a new way, our way, that every factory will be across this planet, that no nation will be depending on the other. Then collectively, we bring the new science and application of it be it, on the energy, on transportation, on food and the rest. Do we need to use the fertilizers and contaminate the land for centuries? We don't need to anymore, if you understand the process of this, we will show you how this can be done.

Do we need even to produce materials to use as fertilizer, or replace it? Do we go to the next step of conversion of the fields into food? Do we go into process of understanding the whole process of the Creation, and bring that change for us, to be there, to create the condition of flow. The energy flow that we need, that we can produce what we said, the way we said it, and the way it should be done in the universe.

I cannot send you to Earth to pick up a fish and chips or a kebab. Sorry, there are no meat or no breads in that corner of the universe. But you still can create what it creates as the emotion of it. The way the father, or grandfather created the emotion of the grandchild. Smell, I asked him. He said, I couldn't smell I was too busy trying to feel. (2:14).

The whole knowledge has changed, the whole structure of the knowledge has changed. Now you see, we call it climatization, the system is climatizing. We'll produce electricity forever. As we say in English, till the cows come home. God knows if there are any cows coming home, because we don't need them anymore.

Any other questions?

Q: Salomea .. Hi, Mr. Keshe. I'm so happy that you release what you promised to end… But also because you answer to my wish, from Universal Council, that Keshe Foundation will serve the humanity by giving a kind of free energy. For me this generator is free energy. And my question now is related…
K- I don't like that term of free energy.
The guy who created the word. Let me tell you why and you'll understand. Exactly this time, six years ago, the guy who created this terminology of free energy was a pedophile, connected to the structure of the Belgium's, who the free energy meant the free life of the children they took. This terminology came from Sterling, and it was free, because they had a king behind them, and they could take any child free. (2:16).

The Keshe Foundation because of the new technologies, bringing many young people around us, and a lot of people coming with their children. (They) used it to access (the children.) Exactly if you go back on the history of Keshe Foundation, August of 2017 or 2016, if you check it, we revealed the hand of this man, and our websites came down.

There is not a free energy. This is a universal energy. Free energy, when it comes up, it's for pedophiles and abusers of children, and typically Belgium's. So, if you talk about. .. You don't know the history of the Keshe Foundation. The guy now he's in solitary life sentence for raping his two daughters at the age of 6, 8, 10 weeks. These people are free energy. So, when we talk about the plasma universal energy, that's what this technology is.

Q: My question is related to the fractal of the universe, it's a toroid, this M and G MaGrav. People call toroid and we call, Infinity Loop of MaGrav, going and coming of energy. I don't know if my language is appropriate. But this is the energy of the universe. The toroid is a fractal of the universe.
K- So, what are you trying to tell us, please?
Q: That Unicose is a toroid. We as human beings we are toroid's. Plasma is a toroid. (2:18). Maybe what we use here is the impact of the toroidal plasmatic energy. This is my understanding, maybe I'm wrong. But I would like to know from you if is any link and…

K- Everything comes. You put names to it. Everything comes from motion of the fields. What name you put on it, is what you understand of it at that point. So, you can call it anything you like. You call it toroid, you call it Tokomak, you call it CERN it's all the same.

The field, the plasma, is what we call, the field of the Universe. How much does that universe allows you to extend and where to escape to, is the direction that, you might call it emotion, you might call it a dream, and all sorts of things, which we decide in the background ourselves. We have used too many names for the same effect. If we bring it together, then it has no, what I call, diversion.

You see, as I said, you don't see it, maybe you see it here in the background. On the floor here you see sunlight. Knowledge of the man should be like this, like the Sun, like the rays of the Creator. Does not matter if the spot on the floor is black, blue, yellow or brown, it shines the same in all of it. It's man who has chosen different names and colors for the same structure of beauty of the Create.

Now you depends how you see it, is the color you see, the same black as me, or is it the same brown as you see it? (2:20). This is what it has to be. The knowledge, we try to put something into it to make it that we understand more, we become more intelligent. But in fact, there is no intelligence, when the Light of the Creator shines on us. It's us who decides on it. So, it's us who chooses how we call it. If you see it, we call it the Sun, if you see the other way, we call it the light from the lamp, or we call it the cosmic rays, which you cannot see the light the way we are used. So, it's us who creates terminology, and this is the problem with all our work.

Now, today in a simple way, I showed you the atom and then the planetary system, as we've done before, and now with the plasma and for the first time we understand how isotopes are created, in the field radiation, which allows different fields strength inside, to show themselves. As we call, has one neutron more or 20 neutrons more. It is the matter state, which we decided. But as an energy the whole lot of nucleus becomes one, and dictates the position of that electron or this, what we call, Moon. So, you can play with words, but the essence doesn't change.

If the Knowledge Seekers in the background, measure the time between each time the system switches on and off, and go back at the beginning. Just measure how much is extending the time of the switch on and switch off. It will come to the point after a few hours and few days, that it will never go off. You won't get that, even bleeping. Just measure it, when we started with just about half an hour, 20 minutes before you came online, (2:22). you saw how frequently it was changing, and measure it now. What's the space gap? What's the time gap? Then we show it. This is a true power generation of power from what we call it, the field of the Universe. From where the universe centers the energy, and now we managed, not to convert it, but to apply it and use it the way it should be.

Rick, any other questions? …
K- Can we go to the next question, please? Give a chance to the others.

Q: .. We know that plasma emits a spectrum of fields. Is my understanding, therefore correct to say that, isotopes of plasma, are just the use and access of a specific range of the fields of plasma?

K- If you understand nuclear decay, if you go back into matter state of how the scientists today explain nuclear decay. (It) falls apart when you come into the plasma understanding of it. How it falls apart, is that if you move the plasma in a certain position, the integrity of the field strength cannot hold on. That strength, holding to the collection

of fields, creates the division, creates the splitting of the plasma. (2:24). Then we understand nuclear decay totally in a different way, than what we've done up to now.

This brings back a lot of, a lot of new understanding into the whole system and the structure of the mater state atoms. Then we understand, even in the body of the man, how Thalamus and Thymus change from Vitamin C to Vitamin A. All it does, it gives it enough energy to change the twist of it. Otherwise it's the same, what we call, lymph cell. It doesn't do anything else with it. It's like, you're sitting in the shooting range and shooting at the ball in a given angle, to give you the given twist. If you hit the top of it, it goes down. If you hit it sideways, it goes sideways. And you give it a slow and a high speed. Then we understand how the world of even Biology, which we have accepted, will change.

As I said, I can make a Plutonium, Uranium, from its behavior, from a single Hydrogen, and that's what it is. When you eat food becomes part of the energy of the lymph, then what happens? When it comes through the process to Thalamus and Thymus in connection with each other, it gives it the twist to the energy, which the body needs, what we call, what could be the energy of Vitamin D, or with an energy of Vitamin C. This is what we have not understood up to now.

The speed of rotation, the angle of the rotation, we have chosen different names in direction of the release of the fields from them. (2:26). If you're rotating this way, you release less energy, if you rotate slightly with a different angle, you give more energy, and that energy in interaction with the other fields going in that direction creates radiation. Rubbing of the hands. But this time comes from inside from.

This is what I say, plasmatic nuclear is totally different than matter nuclear. We create it out of the interaction of the fields of the plasma itself, not from release and everything else, which we have accepted as nonsense in nuclear technology today. This is what has, and what it needs to be understood, and then mankind will move to the next step.

Q: Dean. So you brought forward this amazing T in this particular moment. How long do you think this transition period will take, in the matter state, for this to materialize, to end some of the conditions that we have right now?

K- The way we see it, a lot depends on the behavior of the German government today. If German government is going to accept, what we see the crisis in Western Europe, and let people literally battle it out. We've seen today, Italian Prime Minister is resigning, because he cannot solve the economical situation with the Covid, and now with the energy crisis, Europe is going to run into a big problem. As I've said many times, mankind will accept my technology, not out of its beauty, out of demise of himself. (2:28).

The German government, the French, and Italians, which are the leading industrial groups in Europe, will bring this technology out very rapidly, if they want to stop the whole process, which is going on now, and bring back the new economy into operation.

If the German government, especially the .. new chancellor, goes and adopt this technology, it has to go to his nation, where it's come from, and it opens up. German government does not have the facility to build so many systems, as we see, off the cuff for the nation.

So, it has to go to save people, to teach the technology live online. How to make your energy system. How to make your .. food system. But the problem with the government's will be very simple, and that is, the fear is, with cutting out the petroleum they lose income. Then they have to restructure, that all of us according to what we contribute to the society, we pay taxes, not by how much fuel we use. That's how the economy of the world has gone back to front. They tax us on the fuel, they tax us on everything, and who suffers more? The poor. Because a liter of fuel to me is one liter and I earn $200 a week and I need $50 to go from A to B, the same car. The rich man who earns 2,000 or 10,000, he benefits by it more. It has to become society change.

We have few weeks, (2:30). for the German government to accept the new technology and bring it in rapidly. Which one of the biggest problem, one of the reasons Europe now is sitting on the Keshe Foundation technology is that, they have to end the Napoleon, what I call, situation with Belgium. They accepted the country as a center of the Europe, how can you change it?

The problem now with Germany sits to accept the rubbish fraud case they put for us, by a pedophile king of Belgium, and the Belgium government, and literally throw Belgium out of the EU, and save the rest of EU. Or we stick to it, let the nation pay. Do 375 million have to pay for one pedophile King? Is worth of a king to save more than 375 million people suffering today?

As simple as that. Unless the whole structure of the governing body are a bunch of pedophiles themselves. Or they've been taken ransom by it, the way we saw with the situation in America, and the guy who took the Prince of England to dust.

So, it's not when, we are in the point of, if we don't accept the technology, it will come problems, which we see in Europe, hunger, short of energy and the rest of it. This time, the Chinese stole the technology, and they put in the name of their scientists. This time they can't, the Germans have to put it out. The French have to put it out.

This is the dilemma of next few weeks. When we show the mass production industrial level of the .. gases, (2:32). is Germany go and say we don't have. Or do the Knowledge Seekers of the Keshe Foundation go open public on the German (media), and say, the technology is here, our government is supporting a pedophile King, and we are paying for it.

Will we see the end of kingship? This is the whole purpose of understanding the new technology. It’s not just Belgium, all of us have to be equal. We chose somebody to be president, he has to accept the burden of a nation. The same as now, we have the

Universal Council members, they accept the burden of the language, what they have to do.

So, will it (the technology) come out? Germany doesn't have time. In two months time, as the German minister say, there is going to be unrest in Europe, because of the lack of ?? fuel. People cannot pay for the fuel. There is not a fuel to pay for. You know, during the Second World War, Jews had a lot of gold, but was worth nothing. They couldn't buy a bread. Having all this hungry people, but having the money in the banks, you cannot pay for the fuel, which doesn't come, it's not going to help.

We are in a situation. Open up the technology, release it the way it's here in front of you, plus the gas that we showed in Tehran. Which means it's not another scientist who find how to run the engine with the water, and the Belgians poisoned him on the table. And the brothers is scared to talk, because they've threatened him too, the Belgians.

We paid for this technology to be open with the life of Fabio, exactly six years. The time has come that the king of Belgium, the Belgium state, identified as a pedophile state, go under sanctions, change of government, open the country, (2:34). take these ridiculous things they put out about Keshe Foundation, because of him. Then we'll see the expansion, because there is a need. Government will not be there, there will be riots. This is the report by the government themselves, not us. Europe cannot.

How long more the directors of Fox (News Group) will be pressurized to support this, or will they open, and let him go? Then we'll see the change, then the scientists in Europe, America will work together to bring in a new industry. It's finished, when you can show you can create energy out of air, what is the need for it?

Q: .. This is helping humanity and ending some of the suffering and some of the conditions, that many people are going through in these moments. So, taking it the next stage further. In the other room, we have the capabilities to travel in a different way, on a soul level, and this becomes the Universal Community, and this is where the Universal Council steps into position, making wishes and bringing about many fundamental changes with thoughts and intentions.

So how long will this transition be for humanity to take the leap?

K- Centuries. You've been here, and you've seen people coming out of the room, you record them. And you see how they're touched, how they feel. We see them coming with tears. We see them a different way, because you record them, after they come in, the ones who want to talk. So, how many of these systems can we make, that the whole of humanity can go in? That is the position. Or, can we teach it, that we can do it without? That's the transition time. (2:36). That's how we do, how long we take, to change.

Q: So as humanity, it's not going to be an instant transition? Is it going to be a gradual filtering process. Do you think? …

K- Depends on how our governments do. We shouldn't have a nation, which is a communist nation, which is monarchist, a nation which is democracy, which is actually run by the monarchies in the background in different names. It has to be open. When we become all equal in understanding it, then we change, then we have that what we call, the balanced field.

We don't need to go to America to find freedom and wealth. We find it within us, it doesn't matter where we are. This is the whole understanding of this new technology. We've been here four or five weeks now. We see how some people come out of that room, and how it changes their life when they come out. When I see the face of the lady who came out yesterday, she said, I don't want to tell people what I've seen with Christ, otherwise people won't believe me, and I'll become stigmatized. She didn't want to be recorded. But she gives us the exact detail of what, and what we promised past decade. We'll bring you, people will tell you, you go. Then if these people become more and more (in numbers). People who've been through, with their ancestors, met, felt, they've seen him in different condition.

Q:.. So, this is available now, through the Foundation, these units are going to be ?
K- This has been put on sale. We are delivering in December and January. (2:38). Our main target now is, if you go on the Keshe Foundation website, on the sale, we have put the Gas Production for 22 million for governments for 100,000 liters a day. This is the industrial part of the Keshe Foundation. This is not sold through the Keshe Foundation Sales. It's the assets of the Keshe Foundation Holland. KF Sales just represents the technology, but everything belongs to the Foundation.

In a very near future all the assets of the Keshe Foundation will be transferred to Holland. Everything which we own under different name. This technology will go into Markray very soon. Markray we own 97%, it's not Mehran Tavakoli Keshe as a main shareholder, it's the Keshe Foundation as a shareholder. We have millions, it's their assets. So, we are not showing, touching, speculating in the market. It's us, and this is a technology, which Markray will open internationally. Then that asset belongs to the Foundation. Then it's in the hand of you Universal Council members and Earth Council members how this new structure will work.

Q: So, that that interaction between the Earth Council and Universal Council, how does that go into formalized?

K- The formalize, the Earth Council and Universal Council are going to be setup as two companies, and then they interact with the Keshe Foundation as a structure holder, to carry out the wishes. And how we carry out the wishes, that the Africans don't get everything and Americans get nothing. The beauty with the Earth Council is that, it makes sure that everything is shared equally across, in knowledge, in wealth and that is what the structure is. (2:40). Universal Council is to bring the other dimension in how has to be done ethically, and correctly with everything, not only with man or ?? behind man.

We had our beautiful friend from Malta here yesterday, who went through the system. Malta is going to be, we want to establish the center for Universal Council and Earth Council in Malta as an island, and as a structure of democracy, even with all the mafia strength in the back of it, and the Vatican as the prince of Malta. That is an island where anybody can come to. It is not made for man. It's for the whole structure we set up with Universal Community. It's where the Christ landed.

We will build the place in that place. It's just time, it's just time when we are ready, and Emmanuel is working very hard trying to get this sorted with us with the Maltese. But the headquarters of the Keshe Foundation will be in Malta. It's just finding the time.

We spent enough time there, trying to establish it. It brought a lot of freedom, Malta for me, two years ago, and that freedom is reflected to humanity. So, we have to set the companies, we have to build a structure in Malta and use the island, that no nation can do (can prevent anyone from coming there).

If you look at the structure of the United Nation, today it's absolutely a disaster. American decides who goes to United Nations and where they stay. Now with this technology, any Ambassador, any world leader, or any person can appear in the ?? parliament of United Nations. (2:42). It's the story of the donkey and the bell. You remember, the bell ringing, the bell, where the ?? the owner says, see ?? who is ringing the bell. At the moment .. we have no say (?? with UN). With Malta we have a say.

You see again going off (light on generator), and coming back on. But this is the man breaks up system (with the inverter). This is the plasma technology … (The blue light is still on, meaning the plasma is still there, it doesn't change. …)

Q: It's wonderful to see this and the fact that you've shown it, that the whole system is completely self dependent. There's nothing around it, it's literally a self contained unit that is…

K- We can dance with it. You can go anywhere you like with it.
This has been many sleepless nights for Klaus, and the people. Even they were till 10 - 11 o'clock last night, they were there putting it there. I've seen the pictures of them putting it together. Many of you might think what is here. Down here are the switches on the controls. We better don't show the inside, the stomach of the system, do we?

Q: … The first Blueprint Day significantly changed things, then the next stage where you bring in the gas and the oil, that's going to make the…

K- The gas and then the water. Production of the water. The biggest shortage. The gas is important, because of what we have the crisis in Europe. (2:44).

Then the other part of the gas is important, because we have fires in Europe. We have no way to control it (forest fires). We will introduce a new fire control system through the Keshe Foundation. Where we create a plasma, ?? which is a plasma ?? a man to live, but

stops the fire. The beauty with this new plasma technology, which will bring for fire is, the animals will stay alive. Usually when you use CO2 you kill (the animals). With this, because it's a gas plasma it allows the man to use it to survive. This is the way we do.

Q: .. Can explain that a little bit more, so that the animals, you're saying the animals …
K- No life will be lost, with the use of this.
R: Normally you suffocate when you have too much CO2 in the air basically. If you are stuck in the tanks and so on, underneath the ground, sometimes they can get overcome by CO2.

K- Yes, that's your matter state Rick. But if you look, .. all of you have been using the CO2 and Zn Gans's for Covid, for health application. So, if it kills in the matter state, it heals in the plasma state. Now you understand, that's the difference.

It's the same, with the new .. fire extinguisher, plasma fire extinguisher, … we don't kill anymore. The energy of the plasma becomes energy of life. Maybe even you have been suffocating. With a plasma, now that CO2 helps you to live, using the energy. It's a different ballgame. But, we all know it because we use it. (2:46).

If any of you ever thought for past years, all these CO2 that we are absorbing, should have killed us in our homes. But we use it, we use it's amino acid to give life back to us. Because we are not dealing with its matter state. We're dealing with its plasma state. Now we understand it. So, when we comes to fire, it's a matter state, but life is a plasma state. It gives life to the tree, it gives life to the animal who's in the fire, gives life to the man who's dying. But, on the other hand stop the growth of the … O, lack of O ?? conversion.

Q: It would be like a fire suit for the firemen, that are fighting the forest fires, for example. A protective dome around them.
K- You don't need to. Yeah, you just create a plasma around the fire in the woods and that's it. The animals survive. But, the beauty with this situation with the Methane gas and the CO2 when it comes to play, because a lot of you are not used to it, it will create rain.

In the forest, it (fires) start usually because it's too dry. When you use this combination the right way, not only you stop the fire, now you create rain. So, what was the cause of the fire? Like what we see in California, we see it, a lot of states in Europe now are on the red alert, with a lot of fires with the wood (forest) fires. It's a different change. Maybe in next 12 months when we hear fire, not as much as what we see today.

But we have to understand we need the fires to start a new life. So, this what we call the Phoenix effect, rising from the ashes.

Q: So this plasma effect from the fire, When you extinguish the fires, is this is a plasmatic condition. (2:48). Is it physical? Do we see it?

K- Yes. We plan it next week, hopefully, if we can show it. We'll start you a fire and we'll show you (putting out a) fire, and we drop a chicken in it and see if it can walks away from it. It is, what it is, it's the way.

It will take a long time for what we showed last Monday and today to be understood. And next week, we have the dealing with the German government and the French, to stop the .. decline of economy. Then we'll see the next step.

Q: Do you see in this moment now, do you sense that these, what we've shown today, do you sense that this will change?

K- I don't' sense it, we've set it up that way.

Q: That's taking place?
K- Yes, it's a setting up.
We are already in communication with the German government, and it's the next step to that level. But you have to realize, even for them to understand this, is very heavy, and to accept this, especially coming from a nuclear Iranian physicist is the hardest thing for them. Then they look at what the pedophiles in Belgium have done. They cannot fix how this happened.

I've put a condition on the supply of the technology to the Germans, blockage of Belgium. This is a precondition. We don't allow no Belgium to move out till we find out, which one is pedophile, or which one is doing what they do. Because they are propagators. We've seen them, how they work across. It has to be contained, because we cannot… It's like man killing, now these people abuse.

If you take into space it's clear. (2:50). When we put people in that machine, if I tell them to go to Katmandu, none of them go to Katmandu. But if I tell them to go to France and Paris, all of them to go to Paris, why? Because we had a French couple here that brought the essence of the France. We tell people, the Germans to go to Italy, or to Paris, we had yesterday, the German guy wants to go to Paris, and he can go there, he visits his grandchildren, because the line of energy to that is open. So, if we open this to Belgium's, you've seen it, they came here, we refused them, we don't even let them to come into the building. They are scourge of the society, and they have to be contained, until we find the solution for it.

Q: That's interesting. So, literally, as the nations and the people come in and go through the system, we would not require the incorrect conduct of the Belgians to go into the system and would that be part of it?
K- No. They've been refused.
Q: Would they even walk in?
K- They can't. They take their Soul out. We know how it works. But, that's what sits with them. It's not just Belgium, it's the structure which sits, we have more pedophilia in Saudi Arabia. Belgians are the tip of the iceberg.

I was explaining. We spend a lot of money of the United Nation goes to buy children, which are in traffic from Africa and North India, for the Saudis pleasure. Huge amount of funds of the United Nation goes to buy the children back, and the same few days later, appear down the road with the same people. Because they have created this kind of ??.

But if you put sanctions on a nation with knowledge and technology like this, for 80 million to suffer, how we allow 8 million, abuse our children and still be part of the center of the ?? United , (2:52). unless the members of the ?? committee (EU) are the same. Is the EU center, center for all these activities, that's why nobody wants to stop it.

So, we have Strasbourg, move EU headquarters to Strasbourg. They do it twice a year, make it permanent. We have to answer. The question with this technology, it's not just the technology, a lot of things done. Do we need prisons? Or we change the people, we put them in this machine, like this and if we change them, they'll become the best things in society. If we can convert Christians to Muslims, and radicalize them in prisons, we can put the same system and make a human out of them, in prisons. Do we need hospitals? Now is the next step.

Cleaning up the mess. Thank you very much.

Any other questions?

Q: .. First of all, with the fuel creation unit, is that self sufficient? Or does it plug into grid or battery system?
K: Which fuel?
R: Well you showed H fuel creation.
K- No, no, it's independent.

R: .. Now something's come up with the oil industry. What I've learned just recently, and that is, it looks like there's going to be a shortage of oil for diesel. Diesel oil for you know, trucks and other transport, rail transport and so on. Because of the additives that they put into the base oil stock. (2:54). There's only two companies that make the additives, and they are both basically shut down for making additives. It's a worldwide phenomenon, that we're about to run out of diesel oil, because of not having these additives. In which case the entire industry could, which supplies food and all of the things that we use and so on, could collapse. Now will the new fuel creation unit that we're about to see in the next workshop, perhaps, would that or some other technology that Keshe Foundation is using, be able to create the additives that these diesel rigs need in order to continue operating? Or is that a different technology?

K- Put it this way? Go back. We talked earlier on. It needs a small converter. You're a man of the engines, you suffer, because of all the interactions you had with the fuel, still. If we put a gas converter into the transport system, which uses diesel. Do we need diesel? Not really, do we. It's just as fast as ..

The problem is, that there are a lot of things accumulating with each other, to bring what I said, this technology we accepted because of its need for human demise.

Is that we are short of fertilizers, because of the Ukrainian situation. We've become short of gas, we're short of other bits, which creates the other parts, because now gradually these gases are not just used for burning, (2:56). gases are used for petrochemicals. They are going to be in shortage. They are going to be a massive shortage on the whole acceptance of the structure.

So we have to find ways in it, and do what we've done in Keshe Foundation, mass teaching. The way… If you bring Rafael on the line. People in Brazil, in jungles of Amazon are using this technology, because Knowledge Seekers went there and taught them. Are the Western citizens more illiterate, and lack of knowledge, than the people in Amazon using this technology? Have we gone that backwards? Do the people in Amazon understand more than the Europeans? So…

R: I would like to say something about that, I definitely think that's what's happening is that, in our so called developed countries, we've gotten to rely so much on the high technology. A great example is the diesel trucks, which have this additive. The diesel exhaust fluid , that they have to buy this extra fluid, that gets put in, in order for diesel trucks not to have as much pollution. If you don't have that fluid then the truck comes to a crawl literally you only can do four miles an hour. This is true in Europe as well as in North America.

It's made it overly complicated, but if you have an old diesel in a third world country it'll run fine. But if you have a modern diesel, the whole system can collapse so easily, just because of not having this additive for the fuel for these vehicles.

K- You know, the more advanced we get the worst it gets. I don't know if I told you this story. (2:58). I used to work in Gambia. Gambia is a nation forced on another nation, built out of , how they built the Gambia. It's a river which goes right in center of a country. British wanted to have a say in the middle of a French country in Africa. They put boats on the river, put a cannon on it, wherever the cannon they shot landed became the border nation called Gambia.

So, Gambia has about 16 kilometers front on either side of the river, and then it narrows because the boat couldn't go any deeper and became longer. It's like a tongue, in another French nation. I used to work and live quite a lot in Gambia. One day we decided to go to the interior, because it was something built we wanted to have it. You drive on the beach, and then when you come near to it, you go inwards. This is a tradition in Gambia we used to do. As we turned in, it was a very seasonal, rainy time, and it was all mud. We were in this advanced (technology) four wheel drive stuck in the mud. We couldn't go anywhere because the mud was there. That's it. That was the end. We sat in the car (until) the rain stops, it dries up and then we can pull it.

While it was raining, and we were waiting for the dry time, we had a noise … and we just looked. It was a Gambian walking in the mud, he passed us and he looked at us, with all that advanced technology you have, me barefooted, passed you. This is how the technology is, the more advanced you get, when it comes to time of crisis, the more you fall back. (3:00).

So, it is the way we are, and now people like you are expert in converting cars, we have to go back to gas. But that still is a interim, if we get the support of the governments, to what we showed just a few minutes ago. When you look at this system, we talk it as a human resource system. If you look at the system, if you understand how it works, you shop from Amazon, in China in the factory, they put it in the system, you receive it at home delivered to you within seconds. Do you need that diesel fuel during the shipping?

The knowledge comes different way. Because now when people go into the Enhancement Unit flight simulation, they sit there, when we tell them, go to see your grandpa, or go to New York, or go to Moon, we don't wait 18 hours, or like American, seven days to get to the Moon. It's instantaneous on the fields of the Universe. This is what the future is. Do we need all this razzmatazz we created?

Or we go through the transition time? That's what it is? Do we need the diesel fuel? Or do we push to the limit, that the new technologies, the factories become an eyesore, as we built the car units and everything else. We don't need the (transportation).

Now that we understand energy transport, even a stone has a soul. If you find the energy of the soul of a stone, we can move the stone.

Up to yesterday, because we were trying to be very cautious. Those of you who came here for past three, four weeks, we asked you to leave everything behind. (3:02). You had to take all your jewelry and metal pieces out. Now, this week, we changed the system. The system has changed, and our team, as I said they are in there, changing it. We start seeing what we can do.

Now we let people with the jewelry, with everything except electronics to go in. You don't need to take your belts off anymore, you don't need to take your watch off anymore. So, we're learning and we've added to the process. If you came here the first week, you took everything off, because we had to see the parameters to work. People now go in and come out. We stopped people with .. bits and bobs added to their bodies, not to come in. Even you have a hip replacement. Now, we have added enough, we see it's safe for them to come in.

So, if we can do that, and we can transport you with your hip replacement from Linz to Australia, then why can't we do the rest. This is the development technology. This is now at the moment, very Keshe Foundation Scientists working, bringing these things out. You can imagine if the Germans, and the Americans, and the Russians, and the Iranians and the Chinese scientists get together on the race to space, the true space technology, you can say goodbye to all the trucks. People will leave it on the sidewalk.

But the question comes, what are we going to do with the society? How are we going to feed them? How are we going to do it? In fact, how are we going to bring a technology which is acceptable.

We see now a picture of the Keshe Foundation Exhibition Center in Linz, the flag of three nations next to each other, Austria, Iran and Keshe Foundation. (3:04). Then this is the beauty of it. We become one nation and we stand amongst the nations. And we have to be able to deliver this technology free to everyone.

We don't stand as a scientific institution. Our flag stands as One Nation Institute, and that's how we see. The technology is free. If we were Americans, we would have hide such a technology 200 meter underground, secret service officers and intelligence people can go in. It's open. From outside you can see it, from inside you can learn it. I have made One Nation out of human race when it comes to science and technology, and then the rest will follow.

Any other question?

Q: What are the two lamps for? And why do they turn on and off every now and then? Thank you. How did you create the beat?
K- I think, go back from the beginning and learn a little bit about electrical, you understand. We don't create a beat, it's the battery charging itself and the lamps to show, that we can produce energy.

Any other questions? (3:06).

Q: Can you promise that your wonderful technology will not fall into the wrong hands?
K- It is already in the wrong hands, it's in my hand. Now I'm giving it to everybody, so sorry about that.
R: And the K Seekers are iffy that way.
K- They are the worst lot to keep a secret.
R: But I think it has a certain protection over this technology, in a way, it is sort of. If you if you have bad intentions, it doesn't work out well for you when you try to engage in this technology, it seems.
K- No, unfortunately. ?? work that way
R: It's not good for working with bad spells on people and things. It tends to make them well, instead of sick and things like that.
K- It's like a ?? voodoo doesn't it? You can do jinx with it.

Q: .. Rick, how do you feel in this moment that this is being released, and all your hard work you've been put in over many, many, many, many moments. How do you feel about this? And what's happening right now Rick?
R: Well, it's, in many ways, it's the manifestation of the dream of the last dozen years or so of engaging with the Keshe Foundation and Mr. Keshe. (3:08). I mean, .. this has been the promise and we were starting, we're seeing the glimmerings, this is just the beginning

of course, and the glimmerings of the manifestation of what it might look like. Of course, the picture of what that looks like will change. It could change daily over the next months. But it's encouraging to see the comparison, the manifestation, we see the light, we see the light continuing, basically. That's nice to see, it's self sustaining light, all right, well, that's a movement forward in my estimation.

And of course, I've had this thing with the diesel exhaust and the whole diesel oil thing. I'm highly allergic to oil as being a mechanic for many years, and to the fumes and exhaust of all the internal combustion engines and so on. For me to see that phasing out would be wonderful.

But at the same time, perhaps there's other alternatives like creating fuels, the way Mr. Keshe is talking about, that might end up not polluting when they're burned, and might actually create a beneficial environment. And that could aid in the transition. Because we will need a transition period. The whole planet is running on petrochemical fuels right now and we can't just suddenly pull the plug on that. But on the other hand, it does look like we're seeing what could be much quicker end then what we expected.

I was surprised to see some of the information that I ran into in the last day. (3:10). It actually shocked me enough, that I am now more in favor of the creation of fuels, idea, rather than moving directly to the plasma technology, if we have to. But I still see, I can see, that we're very close to moving directly to the plasma. So, in that case, as Mr. Keshe hinted and said directly, why would we want to prolong the transition when, you know, perhaps it's an opportunity actually to move directly to a more plasmatic environment, and we'll be happier with that, once we make the transition.

Q: Dean. Thank you Rick, wonderful explanation. And I think what you've just said there is very important, that this transition period, for the whole of the planet and for humanity does take some moments. Because there are many situations where people, I am not talking about from a single individual up to governments and further, who have become very matter state. There's a need here, right in these moments. So, this transition period is a wonderful time for it to manifest gradually, and then also gives us the ability to, to then move into the next aspect of this technology. So, thank you for that, Rick. I'm going to hand back to Mr. Keshe now.

K- If there are no other questions, we can call it the day, and come back another day. (3:12). But, we will have a third .. Plasma Energy Blueprint. We can go much deeper with it and understand how the system works, and how we can apply the system. If there are no other questions…

Q: Stefania had a hand up here, a question about the lamps going on and off.
K- The lamps going on and off, has to do with the inverter. It’s is not to do with us. It’s converting energy from DC to AC and that's why.
Nothing to do with the plasma technology. It’s when the battery goes low, then the system stops, when the plasma charges then it goes back up. This does not exist when it comes to .. the commercial units.

Q: .. <Question from Italian Community unclear> (3:14).
K- Can you repeat that question, please.

Q: The current situation that we Italians have, the probable elections ?? by the government ??. Are they a positive thing, or not, for this situation? And what can we do to help in this transition period?
Q: She was referring to the fact that the Italian president's going change, so she asked me if it's a positive or negative thing, and what we can do in this transition time to help?

K- Nothing to do with, we don't get involved in politics. At the moment in Italy you are in crisis, your Prime Minister as hand his resignation, you're expecting election in September, October, and the whole thing is in a mess. It's going to get worse.

We know the new version of Corona is appearing, what will bring again on top of the European nations. We know, that now you have a problem with the fuel shortages and everything else, Italy is very vulnerable, and this is how your people decide with your nation. (3:16).
Q: These two lamps they turn on and off, what are their function?
R: We've already answered that question twice already.

K- Shall we call it the day? Just wait. We have a question from internal committee, I call it.

Q: .. If you were addressing one person in this very moment, who is about to receive this gift, how would you explain it to this one person? And how would you feel yourself after releasing this, after all these moments, and you're now at the position where you can release it to this one individual, to give them the benefit of this technology that you've developed over so, so long?

K- It's a gift, how you use it, depends on you. It creates energy, creates food, it creates water, and that's what the man needs. (3:18). So, it depends what we take from it and how we want to use it, and how we develop it. I gave the knowledge to the Iranian government exactly 14 years ago, July, August, when we built the first reactors in Shari Tehran University. The agreement signed with Ahmadinejad was that this technology cannot be use to military purposes. It can be used for defending the nation, but that cannot be used as aggression,

They kept to the word, but they expanded it and extended it. They're using in different applications. They understood the principle, it's not actually giving a system. Once you understand the principle. Now we see a lot of applications for it. But to me, it's when you give a gift like this to a person, it depends on the intelligence of the man, how he uses it, what he does with it.

You can make water out of it and feed the thirsty man. You can make water out of it and use it to control a thirsty man. You understand, that's the difference. That's how we see the changes.

This is what we see. On next week, we show simultaneously the production of Methane gas in Teheran and in Austria. Then we see what's the next step, what is the pressures on the Gas producing nation. Because once we produce the gas in such a way, it brings away, the dependence on fuel.

We already have a knowledge of converting our systems to work on a gas, than diesel or petrol. (3:20). So, that's not a problem, we have put in the new technology with electric currents. So that's solve the other problem. Then we've got to see how the government's use it.

To me, the government's like Germany, if they don't want to go to what I call, massive industrial revolution, and the problems, which they have now. Is to teach it openly on the national media, don't look that you're going to lose income. Look that you're not going to be in power to have an income. When a nation becomes weak, they become preyed upon by other conditions. We cannot afford to have a country like Germany to become under control of the others. If the German leaders understand this. That's the difference, and this is what we see.

It's not if you give it to one, we give it to a nation, the leaders of a nation. What they're going to do with it? How they're going to abuse the nation from it? You understand, you look at the person, I look at… we've given this gift to the Germans. How would they do it? How would the French do it? How would the Italians use this to create the next step.

The biggest problem was to show you can create energy from the environment, without burning fuel, without depending on the Sun comes, the Sun goes, the water is there, the water is not there. This system can be used anytime, anywhere, at the moment it's 0.3 watts, which is a normal house needed, for whatever you do, naturally. If you need to put it in the back of your car, when you can live in it, all the time you don't need to fuel it. Then the one kilowatt and two kilowatts, and then through the other conditions, once we know it, we don't need any nuclear power stations, we don't need anything. (3:22). It is a gift to a nation, to humanity. But let's see if there's one man that can understand it.

Thank you very much, Rick. We meet you soon in next few days, we announce it, where we will show the production of Methane gas and CO2 for both applications. Then we will go to the next step, to see what the governments and the nations will decide to do.

We will see for sure, the end of the Saudi Arabia as the oil estate, that is 100% for sure. They have to find a new way to abuse children, as I call them.

We'll see for sure, the countries like Iran who depend on oil and gas, they have to find a new dimension. The countries who have been stricken in poverty to pay all the whatever they had, to oil nations for them just to be, now changes, they become equal. We see

emergence of new powers in Africa through the understanding of the new technology. And we see the end of a lot of abuses, as we've seen for years has been going around. We could have sold this technology for billions, and shelved it. But we give it to billions, and I hope they enjoy having it on the shelf to enjoy it.

Thank you very much for today. We'll see you most probably next week. We'll give you a very short notice, we try to bring next week back to Linz and Tehran, to show you the Methane gas and the CO2. Then our team in the background working on production of water, and the water to become food, then it completes our work.

We expect it to be completed within next couple of months. (3:24). But we give you the food, the energy, the water, and the gas as an interim, till we all learn how to use the energy of the plasma.

Thank you very much, Rick, thank you for all the work and the support. As I said, it's beautiful. We haven't made it, but the plasma of the Creator shines on the plasma, which the man has made on the system. ..

R: I was going to mention that. That's a beautiful ending, that the Sun absolute, decided to shine directly on the unit. Lovely

K- Thank you very much and see you next week.

443rd Knowledge Seekers Workshop; July 28, 2022

(Proofing and Transcription done, need to do - Key Phrases , Words, Quick Index)
(Auto Transcription by Elias)

ENGLISH TRANSCRIPTION

(:20).

K- Good morning, good day to you. As usual, wherever whenever you listen to this series of Knowledge Seekers of Keshe Foundation Spaceship Institute, around the world, and in how we openly share knowledge and show the development. You don't need to wait for patents to be created, and things to be hidden. The way Keshe Foundation as a Spaceship

Institute works, we are preparing the whole mankind is, where you want to gather the knowledge, to become the passenger of the universe, as was in the intro. The choice is yours. (:22).

Now we understand the process of the travel. If you travel with the dimension (D) of the energy, what we call, the inner sanctums of the man, the Soul of the Man (STM), you go through a system, that you don't need food, you don't need energies, you don't need light or heat, the Soul of the Man maintains its existence, through the work of the Universe. We don't see a blanket on the Sun to keep it warm. And we don't see a cooling system on it to keep it cool, on the other side. It generates heat, it maintains a constant heat, and we don't see anybody serving food to the Sun or the Earth.

So if you travel with the Soul of the Man with a dimension or energy of the man, that now we understand more of, we use different systems. If we travel and live in a dimension of physicality (P) of the Man, we need to meet the demand of the man in that dimension. He needs food, he needs energy, he needs light, he needs all sorts of things, medication and medicine, and all sorts of mental and psychological pressures.

Today's teaching is more or less, at the beginning some good news about the first way, how the process of the space technology is developing, as you know, and we are carrying out. And then we go to the what we call, the energy unit. In an dimension of the energy of the man, and what they call the soul, the energy, which we hold within and we see the interaction of the physicality of the Man, energy side. Some people call it, the aura of the man. How we can extend the Soul of the Man to cover the physicality, and how we can control it. Then you learn and you control it.

We had interesting cases, as you know, we've been test flying flight simulation in the past weeks, (:24). and yesterday was a huge step for this process. On Tuesday, we introduced more or less, 2 working units for the flight system, which has been developed and changed in past few weeks to be ready for transmutation of the man.

When you travel (in matter state), you carry the physicality. You have to go to the airport, you have to get in the car, you have to get in the rockets, to get from A to B, to carry the mass, the weight. When you transmute, which means, you put the body of the Man instead of putting it in the car, instead of putting it in the plane, you extend the physicality to be where it is. But you extend the energy the Soul of the Man to cover the physicality.

Now the physicality, as those of you who have been in it, they call it, you're in a balloon. In a balloon where you are embedded, you see the physicality, but now you're in an envelope. Going to the airport to take your physicality, costs everything else you've done for years, and we know the method. To go with a transmutation means we use energy of this envelope.

As I've said many times before, doesn't matter what we put in the envelop, cash, check, letters, love letters, hate letters does not matter. When this envelop is posted to get to its

destination, then it can be anything in it. When you make a telephone call, it doesn't matter, if it is the noise of the water, if is your voice, the laughing of your child, or crashing of a glass on the floor, the package carries that noise from A to B, (:26). and the person on the other side listens to it. And only he listens. Because you dialed the right number, you connected magnetically, what do you call telephone line, or satellite line, which is a weaker way from M field to the destination point of who it is.

It could be one day in North Europe, next day in Asia, the day after in Africa. We connect to it, because we dial it, we know where it is, the satellites find it. In the world of Creation, there is no satellite, but there's a connection of all the M fields of the universe together. If you dial the right number, if you connect to the right person, you can do that. Which means you can connect to.

This is what you do when you're asleep. The M field pressure of the blood of the man lowers, and then this allows the STM, which is encaged inside, to be free. And it goes to where he wants to, dreams about the mum, dreams about the dad, dreams about what is the concerns of the physicality during the day. Or what is to come, because it's structured as part of the whole movement of the fields.

In the present time, we cannot dictate that tonight I go to sleep, or now I dream of the man, of mother, or father who died years ago, and they'll be present in front of me, because this is unknown to us. But we do it in the dream, we accepted that we dreamt, now we know that there is the work of the soul, how the dream is created by reduction in the fields of the blood flow. Like at Tokomak, the plasma inside is released, so expands, and it meets mom. In the new space technology, that's what we do. In a new systems that you've been, we allow to reduce the fields of the blood, and give that freedom. (:28).

We take the energy M field of the blood into our system. So now the soul expands. Does the whole thing. Most of you who have been in the system, you call it, you feel you are in an envelope, you are in a field. We did this for the past 4 or 5 weeks. Many of you been here, over 100 people, and they have gone through the system to see the expansion. And it was contained into what we call, Keshe Foundation spaceship simulation center.

We said, we are going to go on the mobile system, which means we bring people from around the world back to Linz, or where they want to go. Or we can control, or connect to them, that they can travel without being here. Yesterday, we announced it weeks ago, that it'll be done in October, November, it will be ready. But our system developed within the past two years has advanced so much, that in that process in developing the new systems. We had opportunity yesterday with the teaching of the Rick, on Wednesday morning his workshop. I happened to be there, and I thought the system is free, because a team of 5 changed the time to another week. So we had five places vacant, nobody turning up. They did the last minute.

So what we did, I said to the people who are with Rick, in his teaching, in his workshop, that I would like to test something, and see. Maybe now we can see how fast we can develop the mobile system and test it. So with some 10 to 15 people, present with Rick, I

asked them if they wanted to join a test. Just off the cuff, just in one position. We asked, who's got headphones, who hasn't got headphones. (:30). Who can listen to the what we call, the transmutation on a computer, or whatever.

We did the first test with mass numbers, with more than one or two people. The results were in line, but not amazing, but confirm the correctness. Go back to the teaching of the Rick's workshop and listen to it. We asked first, for people, we leave them for 10 or 15 minutes. We connected our system from here to the communication line, which is the telephone lines connected to Rick. The structure through zoom operation. Then, after 10 or 15 minutes, as we do here.

It's like you go in this 10 or 15 minutes you wait. It's not just waiting, we send energies, we send packages or plasma of information, which your souls recognizes down the line. So we allow the blood structure to what we call, "not to interfere with work of the soul," with work of the energy inside the body. In that process, we allow it to expand. This was done in the first 10 or 15 minutes, while we were waiting for. They thought, what are we waiting for?

It's actually, it's like you go to the airport, as I said many times, you wait, you arrived half an hour early. You wait till they announce, which platform, where you have to go to catch your flight. And then I entered, and I explained to them, now you can go to.

You don't fly with the plasma technology, you go to, because it's instantaneous. Flying means getting into, to move the physicality. I explained to them you can go to your mom, to dad, grandpa, wherever you'd like to go. It's your freedom. Go to the Moon, go to wherever. (:32). We allowed this to take place. After about 10 to 15 minutes, when we allow them to do, I went in, and we asked questions to see if transmutation through mobile phone is a possibility. The results were immediate.

The number of people who wanted to speak, who went through the process, explained what happened to them, Go to the Rick's workshop and listen to it. This brought forward the position of transmutation of the man through new technology. So we foresee in a much, much closer time, that we could test for the first transmutation mobile system, by you as Knowledge Seekers. Please sign in, register and join.

We want to mass travel people around the world. First through the soul, then through the Soul, to manifest the physicality. You got to remember, in the yesterday's teaching of Rick, there were people from all corners of this planet. They were not all in one room like the flight system. There are people in Canada, there are people in South America I think, there are people in Europe, there are people from Asia. So we manage to reach all the souls simultaneously. We didn't ask them to all go together anywhere, that's in the next stages, but it was for them to test. So we are ready to go through the transmutation.

It's a beautiful feeling when, what you set up, what you developed, the Keshe Foundation team have managed to achieve, for man could not think is possible. (:34). We had people who went to see the mother, or they went to see the father, or people who went to the

Moon. They described some of it. I had to leave halfway, and I don't know who else came in, and what they explained.

But what it comes to is Keshe Foundation is a space technology, as I said in the intro, we give you, if you want to travel in dimension of the Soul, transmutation, the system is getting ready to go. If you want to go and live in the dimension of the man, which most of you are involved on a daily basis, is where do I get my food? Where do I get my energy? Where do I get my, all other things to be able to maintain the physical life?

We gave you the good news about transmutation. Now, we call this, the Energy Day, because what you see today is very important, especially for North European countries. Germany, Austria, France, Italy, Denmark, Norway is a gas exporter, and other European nations, which rely on a gas for daily life from Russia, between 40 to 60%, some nations 15 - 20%. We heard that the Russian government yesterday, a step down another pipeline to Germany.

So we are running into crisis. This morning, we hear the inflation in United State runs at 9%. Inflation in Europe, is getting into double digits, because of the shortage of gases, and other things, which depends to Belarusian, and Russia, fertilizers, all kinds of food to North Africa and Central West Asia from Ukraine. (:36).

We're here to show two things revolution and evolution in energy. Today, Russia, gas pipes, turbolizes gases as a liquid into Western Europe, through pipeline sets, and paid for by more, and both countries, and different countries to have a guaranteed pipeline energy. Now it's in danger. And this winter, using the national reserves of all the nations of the gases. By March next year, there'll be crisis. But so they're cutting by 10 to 15% to be lower consumptions, the school will close earlier, the lights on the streets will go down much sooner than later in at night. And all sorts of more cuts we see. And it will bring in more inflation, we see. Gas fuel prices goes up, on the rest.

Last week on Monday, we showed you gas. How to make hydrogen from Tehran laboratories and factory. Last Monday in Teheran, we showed an alternative plasma system, you can put in your house and use 20%, maybe 30% of the energy from the government, and the system provides the balance of it. That's a system on its own. It's not a power generator.

Last Thursday, in a second Blueprint Day, we showed you a generator. As a lot of people got confused with this generator. That, what is this? Why is it this so big. And if I bought the Plasma Enhancement Unit, what is this one? Plasma Enhancement Unit is when you still rely on a government for supply, but you reduce your bill. Generator, (:38). it means generating power, and you can use it in conjunction with the (Plasma) Enhancement Unit, or you buy it, you have an independent house, and you put it in, and you don't need any connection (to the government power supply).

This power generator caused a lot of problems for people last week. And the reason for it was that, the light goes on and off and everything else. The light and the fridge going on

and off is in fact, to do with the matter state today, current problem. As long as you see this blue light on, you have a guarantee of supply without (you are receiving energy from the universe). So what you see as a light coming, a system going, we had to put it, because otherwise you say, "Oh they've got a battery in there, and supplies, and that's it."

The switch going on and off, the lights going on and off, it shows that the system here, uses energy. When it gets to the point of not having the energy transferred on the what we call, the inverter. It switches off for a few second, the plasma charges up the battery, and then it goes back again (powers the refrigerator). As a generator you don't have this problem, (the power is) continuous.

This is shown, to show the change in technology. When you buy a generator now, for 2 kilowatts, you have to buy diesel for it. You have to buy fuel for it. You might have to buy wood for it to burn it, to boil the water, or bring the what we call, diesel generator to rotate magnetic fields, to produce it (the electricity). You buy a generator today. With many of them years ago, for our businesses around the world. They usually come as the half of a size of a 20 foot container. And you get there, you still have to buy fuel for it. (:40). If you don't put the diesel fuel in the generator, your hotel business is kaput. It doesn't work, you have no electricity.

The beauty with this system is you never need to do anything with it, "Plug and Play" for life, unless something internally goes somewhere within it, which is replaceable. This is a solid state generator. It means once you have it, you're supplied for life. You don't have to worry if the Russians cut the oil, if the Russian cut the gas, if something happens in Middle East, oil prices goes up, you have to pay more for the fuel. As many of you do. You buy diesel in the summer, which is cheaper, then you don't have to pay for the fuel in the winter, 10 cents to 20 cents more.

With this it's what you see, what you get for life. Two years guaranteed internationally, 10 years should nothing go wrong with it, unless critically, something breaks down. So you don't need to feed it, you don't need to do anything with it.

The size of it you see, is not the size of the system you get. This has been built to demonstrate the what we call, the functionality of the plasma. This is done to show you that, we see the system is working, energy is consumed, and when it's too much consumed, system takes a few seconds to charge up, and then it goes.

So the generators you will get, are most probably, half the size of this fridge. And is a practical way to do it. And we try to help people to buy different stages of generator, 0.3, 1 kilowatt, 2 kilowatt. We found that a lot of people complained in the past few days, that they are confused. (:42). So we decided we do one system only for public, which is a 2 kilowatts, and a 10 kilowatt. A 10 kilowatt is for industrial use. A 2 kilowatt unit is put up as a generator. We tried to start the production as fast as we can, but we said, January of 2023. But we're going into production as fast as we can, to do it now, we decided to do it a different way.

We didn't develop this technology for you as a generator. We did this, not to have this, because we don't need this for the power. We need this plasma power what you see as a blue light, for the running of the space simulation system. This is why they are built for. But as we produce energy we said okay, you can have it as well. So, in fact, you look at these lights, in a matter state in your home. We look at this (blue) light, that the plasma power generation is going on in our what we call, spaceflight. You're physically involved in that side, to you it was important the light comes on, and goes off. To us, this is important (blue light). As long as this light stays on, you have power supplied. Even you suddenly surge the power over two kilowatts for a few seconds, you cut off, and then it comes back on again to supply you.

The difference between the knowledge of the man of the past, is this white bulb and white light, gives you confidence. And to the science of today, we look for this (blue plasma light), dimension of interaction of the plasma.

So you get from now on a 2 kilowatt generator, is put in. We go into mass production very soon. And very small units, maybe this size. (:44). So I created this confusion with a lot of you. If you connect this system (generator) with your Plasma Enhancement Unit, which is up for sale for past few weeks, you can increase the power consumption to maybe 4 kilowatts, 6 kilowatts (overall power consumption from both units tied together). You can extend it.

Then you have to realize, most of the time you don't use that amount of energy. Most of the households use about half a kilowatt during the day, because of cooking time, and at night, television. You got to run about two - three kilowatts. So you buy generator independently in a village to light up few things, and maybe have another dimension to use. And you add the Enhancement generator, plug and play to increase the power. It means you put 2 kilowatt (on the generator, but by adding the Plasma Enhancement Unit) you can use actually 8 kilowatts. Instead of spreading to more numbers.

This is what it is. These generators will not come in this size. There's a lot of things in the background here, it's a prototype showing. You will end up with a system like this, more or less this size gets prototyped. (We show it) for you to see that, it does not matter what I do (unplugs the lights), the blue light, (which shows) the plasma energy (is on), which is needed for you, is needed.

Don't forget, once you start understanding the work of the plasma flight system, Plasma Enhancement Unit, you'll find out the use of these lights becomes obsolete. (:46). The use of heating becomes obsolete. The way you use plasma Gans's in two different materials on the wall of the house, and now bring it to about 20 to 22 degrees balance. This system, used the way we add to it, will do it for you. You don't need to heat (your house) with this (generator). With this new plasma technology, with the additions you can put around the house, the whole house will be warm as you need it. And this is the beauty of it.

That's why we don't think you need more than 2 kilowatts if you want to live a human life. But as long as this is on (the blue light). Now, you're used to central heating, or under the floor heating. Now you have plasma heating, you heat, you .. release energies, which is absorbed by the inner body of the man, and keeps it at a temperature, which you're happy with. The way when you recall yesterday, (some of the) people were happy to go to New York, and some go to see the grandpa who died years ago, and the others.

Somebody likes a heat with a body of let's say room temperature of 25 (Celsius), he feels that 25. If somebody likes to be in the Bahamas at 32 degrees during the winter, you feel that way. The science has changed. The knowledge has changed. Now you are happy with us, I give you this, no problem. This is the light. I can plug it anytime. It still does the same for you. It bleeps a little bit, charges it back. You're happy as humans, usage.

But this peeping has nothing to do with this structure. This is for you to show the system is working. The fridge runs, (:48). the light is on. There is not enough energy at the moment, (so) the plasma is charging the battery. Give it a few second, the battery is charged by the plasma system in the background. And Wallah. Your physical need is done. The fridge comes back.

But in the generator you get, you don't have this. It's a continuous flow. It's a continuous energy. This is here as a demonstration for you to see the production of energy. So the plasma generators are there as put on, and it makes you independent of everything. Because later on when we add the food system, the environmental system, the what we call, the warmth and heating system, then you don't need any of these. You're used to as I said, the latest thing is under the floor heating. Now we heat the body of you, the way you like. The husband and wife sitting on the same sofa, somebody is too hot at 22 degrees. The other one likes to feel to be in the Bahamas feeling 37 degrees. They feel that (individually they feel the different temperatures they like, from the same system).

Change of knowledge, change of technology as we could not if you remember in 1990s, early 90s, when the first mobile phone came, it was a suitcase and a hand phone, we used to carry, and it was very posh to have this. Everybody was shaking, "Oh I'm very good. I'm advanced with technology with a suitcase in my hand and a phone." Even they were not talking to anybody, it was to show to anybody, I can do it. And now it's fashionable with the little microphones, little handheld phones. This (generator) is that, what it is. The evolution of technology. This is that suitcase with the hand phone.

In a few years time, this will packaged, that it will create food, energy, and everything else. This is the beginning of a revolution in the science of man, and the technology it brings. So we understand fully, (:50). that this is a demonstration unit, the functional plasma 2 kilowatt. It will be a small package, and you won't hear this beeping. This beeping is for you, because you know critics of the Keshe Foundation, "oh, he's got the battery in there, and he's charging, anybody can put a box in there and light up." Now you see it, we know what we have. Our KS, you've seen what it can do.

Now we come in the evolution of the science, the way we never knew before. As we talked about the Russians, as we talked about the gas, all of you are very happy, you're used to. Most of you who don't live in the central line gas pipes, you're used to this (shows a gas cylinder). This is your gas cylinder. The gas in there, most probably liquefied in Siberia, or somewhere else, or in Qatar, or in the gas mines of Iran, comes in two super tankers of gas. If you've seen them on the oceans, they're like big balloons next to each other. Comes to your country. They plug it in, fill it up, you buy it, you take it home, you cook with it, you burn with it. Some of you become a bit modern, because the price of fuel on a gas is cheaper, than a diesel and petrol.

You convert one of these tanks and put it in the back of your car. And you've become hybrid gas - petroleum. The new version is hybrid electric - petroleum. (:52). So you carry huge amounts of liquid gas here, in this container. And when it finishes, you have a switch in the car. You go to the what we call, petroleum and you burn the fuel. Or you switch into electric, now electric motor runs. Or at home, "sorry, darling gas ran out, no food tonight. You forgot to buy gas. Now we have nothing to eat." You forgot about the gas, there is no heating tonight in the bedroom in the winter. This is man, till today's knowledge and technology.

This is what the Russians are playing the roulette game with the Europeans. This is what now Middle East nations with the gas, are playing with everything else. We showed the hydrogen production through what we call, the Iran presentation. Rick, would you like to show us, when the Iranians showed us the production of hydrogen in Tehran, last week. If you have it available, that we all remind ourselves.

In this process, we showed in a simple way, we can produce huge amount of hydrogen. But hydrogen is a different material. Your houses are not used to it. Industry uses it for something else. This is the beautiful lab in Tehran, on the flag of the Iranian nation and the Keshe Foundation. We showed this was the power supply. But how we can use the plasma technology and we extended the time (of the battery) by three to four times. We have a video of the burning of the gas, which was produced in Tehran. If you can show us that one, we see for the first time, we showed how we can produce gas at will, at any point. Do you have that video, Rick? (:54).

So what we showed in Teheran was that, we can produce atomic hydrogen and convert it into a gas and burn it. But the beauty of it is, that this has never been done. And this can be like what we saw in the generator, everlasting supply of gas We don't need the mines to gas it out, we produce it as we need it, in a simple way, in a simple technology. The hydrogen, you buy it for all sorts of welding, and other purposes. It's not a common use. So the Russian boycott does not affect us, except in construction, and some of the research facilities, or other things we use with, what we call, the production.

In this process, we come to an understanding of the Totality. Can you show the gas the hydrogen in Iran? .. This was done in Tehran, very rapid, to show that we can produce gases, and is a hydrogen, and it creates a flame, that's the only way you can show it. (:56). And this is a breakthrough in science, which means now we don't need mines. We don't

need any other alternatives, or other alternatives in the market, they produce hydrogen, but it costs a lot. This is set to cost not much.

But in a way, you don't need heating, you don't need anything else. It's a natural process. This changes the game from that point, last week to this week. This week's game is, we are going directly for the government, directly for you at home. If you understand what you're doing. Most of the gases we use for heating up, or transportation is methane. Because it does what it's supposed to do. In the process of even the gas coming from Russia, we allow this gas in an open space as a liquid to convert into a gas. Burn it. Mainly we use methane in it, but they call it, liquid gas, (called Propane, or Liquid Petroleum Gas LPG). You buy it, but methane is the perfect way for it, without a lot of other problems.

If we can produce methane at petrol stations. Produce methane in these cylinders at home. Because in the house you burn is a methane with some smells add to it, because it's odorless. You can only detect it by certain systems, which detects methane only. When somebody comes to the house, or you go to check, they have a detector with them. Methane has never been produced. Because if we can produce, and mass produce methane, you have changed the energy game. And today we show you. (:58).

Keshe Foundation has achieved this progress. You go to Qatar, you go to the fields of the Russian Siberia, and the rest to get gases. You destroy the environment, you do a lot of damage. From today, this (Gas unit) is your mine, this is the mine, that can be in any house, can be in any petrol station, can be in any what we call, generating rooms.

We have tested the burning. It's too dangerous to burn, because it has a backflow pressure. We have taken the pictures. What the cylinders you see is the conversion cylinders, where the gas comes from the methane gas production, and then comes up in the tank.

We show you with the latest methane system, that detects methane only. We produce as much as we need, where we need it. We do not need to keep huge tanks of liquid, dangerous. We keep water, and we convert it. In this process, today you buy a liter of liquid gas, which gives you so much per kilowatt hour energy, and you pay 1 Euro 30 or about, per liter.

This will cost you nothing. This will cost just maintenance of it. And you can produce as much as you like. Governments in Europe using this technology are free, (1:00). and become free from the control of the oil cartels, the gas cartels. This is what we told you last week, we start negotiating, we start showing it to the government, because industrialization of this will take very rapid process. Industrialization of this is immediate. And European nations do not need to get a gas pipes, do not need to worry about where they're going to reserve it. You keep the present gas tanks you have. We show you how to convert it, you become independent fuel generator, you become "Qatar" in your own country. You produce as much gas as you need.

The drop in energy supply costs will revive the industry. It will bring a new game in, and will change a lot of things. In a way, what we say to you, as the old song says, "goodbye pain and suffering." We are done with and your new gas, new methane supply, plus the hydrogen we gave you. We can give you other gases, because once you understand the technologies, you'll know what to do with it.

I show you the parallel to it, the third gas, which is the CO2. The third pipe here is producing CO2. You see the bubbles, and it says we have 656 ppm, I don't know if you can see it, CO2 particles per million. We put this in the cage and show you how much CO2 we produce. At the moment, there is a big problem with CO2, global warming. Thank you very much for Dutch people who created this. But if you go to a farm, a greenhouse, (1:02). they burn gases to create CO2 for growth of vegetation.

If you want to make your fizzy drinks, you need a CO2. You want to make a fire extinguisher, you need CO2 to be added to the water. The beauty with this CO2 is very much different. We explain later on. The methane gas, if we can produce it, then we don't need the resources anymore of the Earth, and makes governments, like German government in next two years, independent of the fuel supply. You have cracked it.

Those of you heard German, call your televisions, call your people and tell them to watch. Those of you who are Austrians tell them to watch. What we're going to show you. We can show you the burnout we had in the lab. That's why in environment of here, it's not safe to do. But we have brought a meter, which shows you if we produce methane, and how we produce methane. .. We show you that, we connect the international devices, detectors. Klaus is volunteering he is coming to show you. The production of methane gas, which is held in a small amount, in this cylinder. You can see it. … Klaus you can explain. .. (1:04). .. We'll show you how we create what we call methane gas. And this will be a lifetime production.

… Means if you use gas at home for heating, or if you use diesel, or ?? misut , you call it. You can easily replace it with a gas, which you produce at home. These should be standardized by the government's in a very rapid way, and will be in the house. In a very near future, when you buy a house, they'll tell you, do you have it or not.

Kl: In order to measure what we produce, we are using an instrument is … . So we're using this methane gas detector called, RSGD 36 , it's a standard device to detect methane in gases. And as soon as you see one of these bars in red, it detects methane. If there are more bars lighting up red, then there's a high concentration. We are measuring here in the air, which means as soon as there appears even one bar, we produce methane. And I going to place this detector Now (1:06). it shows 3 bars .. (Means it produces Methane).

K- It depends how much we request from the system. System gives. We are not requesting from it. It's just building up. If you noticed the minute we released the gases, there was a bubble requesting from the system to do. Now constantly it keeps it at three bars. If we change the parameters in the back of the unit, we can go to four and five bars. But this is safe enough for us to show you.

We have achieved a mass continuous production of the methane in the system. So what do you call, the methane production, gas production to release Western Europe from this dilemma is over. Would you like to test it again that it wasn't one off. Because we emptied the tank to one level. We do it again.

Kl: You can see here the bars went back to zero, there is no red bar. Because the sensor is away from the source.

We can produce continuously, mega tons of this material by conversion, without needing to liquefy the gas. Call on demand. If we put a burner on this, it will go to four and five. The way you saw in Tehran. (1:08). Once you call a demand on it, that you can burn it, it pulls everything else out. We'll show you again in a few minutes, that you see it's a continuous production. Thank you very much Klaus.

You can see Klaus in a few seconds, a few minutes again, because we do the same thing now with the CO2.

The beauty with this CO2 is that it will be proven in the future. When you have a fire, you usually have CO2 in a small cylinder, releases into the water and then trying to in a way, put the fire out. And it doesn't matter if there is a life in it or not. There is no existence, because you die with it. You suffocate with it, because of the monoxide and everything else.

With this technology it's different. When you spray this, once the right combination understood and applied. If you're in a fire, you spray, the water with this gas, if there is a life in it, it will survive. It does not kill. If there is a plant in it, it will survive. Just what is burnt before, that will be the limitation. When this is sprayed the life (continues to) exist.

To you could be saying, this is impossible. But go back on what you've done, as Keshe Foundation. You see the bubbles of CO2 coming up from the system. And we can show again as we showed before. At the moment, CO2 in this environment is what 640 ppm. Now we have a sealed system and we open. CO2 is safe. (1:10). … Now, we put this in. You can smell the CO2. And we close the gap, and we leave it to build up.

We'll see that we are producing. Now we've gone to about.. Can you come in any closer. Can you bring your camera in, because it has to be in a confined environment of it. Can you see the digits, they are building up 686 ppm, 696, 700 it shows that you're producing carbon. Again, a standard tool you can buy it, and it builds up.

This has a huge application. Forest fires, applied with this, you don't need to throw water, and where the water touches, the gas spreads, covers the whole of the fire. It's a different ballgame again, in science and technology. You're releasing gases on a constant basis, that when you have a house on fire, the fire brigade just sprays a small amount, the gases will take over. But the life doesn't die, because of the CO2 blockage. And you know all why.

You as Knowledge Seekers use the CO2 for connection for neuro system. You've been using it in different application with zinc, and copper, (1:12). for Corona and the rest.

This is in a physical condition CO2, but in a plasma condition it's a lifesaver. This is a game changer, again. So we showed hydrogen Tehran, you've seen methane today. You've seen CO2. So, it shows the Keshe Foundation technology through plasma technology has opened up a new dimension in the world of science and technology.

Independence from the resources, on demand when you need, and you can buy these today, through Keshe Foundation. We try to deliver especially the methane, within next couple of months, as much as we can produce to meet the demand of the European need, and the shortages by Russia, and cutting of your prices, your fuel costs, converting your car from diesel to a gas, which costs you nothing.

In a way, once you buy one system, you can connect one line to the central heating, and one line to fill up the gas for the car. If you understand the next stages of combining this, with this, you have a permanent power generator, we just put a micro generator at the end of the gas, as a flow, not as a burner, and we can continuously power the plasma, and push the power of the system to 4, 6, or 10 kilowatts. So, you see the change in the game of the energy. (1:14). This is delivered to the government as of today.

We will announce in the next few days something again revolutionary with the Keshe Foundation.

What is interesting if you look at that system, we hear the blips, but we don't see the lights to be out. But now you see the blip on this one (of the Gas Units). If you come close, right into it, you see it has gone on red, too much CO2 in the system. Now if you can read it. It's past 1,000 particles per million, which is dangerous. You've seen the process versus trying to maintain. We have shown the system in production. .. now we stop the system, and you will see how the CO2 was produced, unfolds. You see it. Now it's not receiving any more, it's contained. I take the lid off and bring the system out into the atmospheric condition. The bleep stops. Those bubbles you see in the container is the CO2, and the same bubble in other container is methane. (1:16). Scientific tools and equipment, the standard tools supplied by authorities and the governments, and laboratories, which has been approved, is showing the validity of the knowledge.

So, we can produce any gases. Now, we have the knowledge, if you remember, all goes back to this machine. It's in the background. Material Enhancement Unit. If you can zoom in on this one, you can see it. As it says on the side of it, Material Enhancement Unit, which means we enhance the production of the material. The size of it in the matter state to make gold, zinc, aluminum, whatever you like, is in a way, what we call, gas Enhancement Unit. Which means we're converting the fields into material.

The proof of the concept of conversion, that we can convert energies into matter, the way our earth's atmospheric condition does. You see the two systems. What we told you years

ago. We built the system two years ago. Now, you see it for the gas production, hydrogen and helium.

I go back to something, which is very important regarding the hydrogen. (1:18). At the moment the hydrogen as we said before, is used for different usages, for three or four advanced nations, for as weapons, hydrogen bombs, which is supposed to be a lot of control on it by United Nations. It needs a small knowledge to change the hydrogen atomic, the way we showed you, we spoke about the CO2, will be used on the human body, to monatomic hydrogen as a plasma, and the way the CO2 become plasmatic, used for the same, not the hydrogen bomb, but the hydrogen plasma explosion. Which is used for example, on certain areas in the space, by mixing hydrogen with an environment, creates the condition of water and life.

Americans used the hydrogen for a bomb, to kill. Iranian scientists use the hydrogen, which can be used for a bomb, to create life, to sustain life. The same thing happens with the methane. If the government's understand, and the Keshe Foundation will release this technology, in the areas of massive fire, massive droughts, the explosion of what we call, methane gas, as an explosion, or the hydrogen, will create rain in a massive scale, and it's natural. It's not like when in the past they used aluminum dust to create rainfalls in dry places, and then create all sorts of mayhem, psychologically.

This process creates natural water, (1:20). which with it carries energies, which can revive life, bring back vegetation. If you don't know, go back to your favorite Wikipedia. When you burn methane, you produce CO2 plus water. It's a natural process of the conversion of methane. The same thing happens with hydrogen. When you explode the hydrogen in a plasma condition, you create water. Now you understand in the future businesses of the production of the energy through the plasma like this, we can give you water free, clean water, without contamination.

The reason I said you will add this (Gas unit) to that (generator), you thought, "oh, he is using an electric turbine." My dear, I'm giving you water free. This is your water resources, clean water, untouched, nothing can be found in it. I remember, in the 1990s, when the Eastern Bloc opened up, and I used to have an office in Amati, in Kazakhstan. By the order of the government, I was taken to a very remote part of Kazakhstan. Where we arrived at 12 o'clock at night. And they said, we drilled 10,000 meter drills here, to get to oil and gas, and we found this water, it's pure, what can we do with it? And it says that 95 degrees constant. I got, at those times Coca Cola bottles, we had in the car with us, and we filled it up, and we brought it to Europe. I took it to the ?? (lab) in England, and they said, this is so pure, there is nothing in it. It has not been touched for millions of years, (1:22). where did you get it from?

This is the water, which these systems will give. If the way you add a smell to methane, that you know your cooker is on, and you left the gas on. We add a specific materials to methane, that the time of explosion releases life. You don't need to water the farms, to grow materials, to buy fertilizer. A small amount of methane gas mixed with hydrogen, mixed with what is needed for wheat, for corn, (in) your water. You can make one small

explosion, literally with a little bit of noise. Every two days over the farm in the middle of the desert of Arizona.

You don't need to do what the Americans did, tap into the base water in Texas, and drain it what was there for millions of years. Now Texas is back to drought, with nothing in it. Because the water is finished. The American government gave me a chance, I'll bring back the desert of Texas, to be as green as the jungles of Africa. With one small adjustment, in what you use as a hydrogen bomb to kill. As Iranian scientists, we put life into it, to bring life back to you.

This is the change of the game. We don't need to say it, because, my dear friends you use this technology in a very simple way for the past four or five years. And you have done this yourselves, not me. It's been done right across the planet. (1:24). And we know up to now you have to water the farm, and add Gans's to it. The farmers get fed up, just to have a growth in harvest. Now you can do it in a more different way, and increase your harvest. Reports from China, growing, increasing the harvest, reports from many of you. For how your vegetation, and vegetables, and other things have grown so much, has been on the internet long enough. What you did with watering your Gans's, now we do with CO2 absorbed, hydrogen absorbed, added to methane and hydrogen, explosive food plasma Technology. Many of you, we know, what has brought to all of us.

You can see on the screen (shows crop yields larger with the use of Gans's). The difference between the two. You can see on the screen from the data. (These are from) you Knowledge Seekers. These are pictures from you. How we change things. How nation's food supply will not depend on the season. You can see the size of the one on the bottom, and the one on the top using this technology.

So, as we've done with the space plasma flight unit, amalgamating all the knowledge together for that purpose. Now we amalgamate all the knowledge with this technology for nations. (1:26). No need for Russia, to boycott the gas into Europe, that the farmers in Holland don't have gases to grow vegetation, and beautiful flowers of Holland, for all of us to enjoy around the world.

The same will be for African nations. The same will be for the South Americans. The same will be for Australians, and the rest. With this technology, we make Earth a heaven to live in. Where we don't destroy anymore. Where whatever we do is for elevation of the beauty of the planet. And you're part of it.

When you buy the gas unit in the house, when you burn, the things added to it, which does not affect the burning, will bring joy. Transfer the energy into the food, transfer the energy into the house. Now you're scared of leaving the gas on, open. Now you leave the gas open, because it carries elements of the natural basis, that it becomes food, becomes joy.

Methane in this process has the same process, as what you used in CO2 (Gans). But it has to be done in the correct way. Then we understand the whole process of life changes.

We are here to bring that change. The knowledge and technology is for that change. Those of you who would like to still go to the fuel station, and blame the wife for not buying the gas cylinder. You are quite welcome to it.

Those of you who will sit in the cold of winter under the blanket, because you cannot afford it. It's your decision. In a way, as they say, (1:28). the choice is yours. Choose this (gas cylinder) and suffer with the shortage of gases in Europe. Choose this (Plasma gas unit) and bring prosperity and life back to Europe, and the rest of the world. This is why we called it, evolution in science, evolution in energy. Evolution in understanding in a way, no nation can be taken to ransom by another for God given rights of food, energy and light.

This is where the Keshe Foundation stands, and it's the responsibility of you Knowledge Seekers to show this to your governments. Call your newspapers, call your television companies, they can come here and test. They can come here and breathe it. They can come and see, eat it, drink it, whatever they want to do with it.

Something which you have not realized, or go back on the last week, last Thursday, when we showed the system, it's a hidden knowledge. Go back to last week and you see how frequent the lights were coming and going. And this week, there's not that much of it. As I said before, it's like I stand here (under the skylight), the Sun, the light, the love of Creator shines and all equal. How we use it, depends on us. And how we share it depends on us. And the same light as you see on that system (the generator), is here (on the gas units). To you, the reason these lights are not coming on and off, as often as last week, (1:30). is there (with the gas units). To a scientific understanding, all these are a creation of plasma. Now I have a like a Star Formation. These systems (Gas Units) are feeding that system (the generator). These gas producing systems, which are here in front of you, are feeding, sharing energy (points to the generator).

In a way, they are backing the battery up. "I don't let you go down, because you're low, we give you." This is what I told you, in the coming time, when you buy, when you have one of these installed in your house, would you like to have food, wellness, and water system in the house, in another place. You don't need water in the living room. But you install a system, that the water is created in your bathroom. You don't need no pipeline. This is the beauty of understanding, where this technology will take us.

The whole thing is not a game. Those who went out to destroy the Keshe Foundation, destroyed themselves. We have delivered the flight Enhancement Unit, 100 of you came here to go through it. 10 or 15 of you went through it yesterday with Rick in Canada. God knows other parts of the world, together, simultaneously. Now you have the energy system, the gas system, and then you understand the change in the game of living on this planet, is not anymore, Russian gas. Is not anymore, god knows shortage of food. (1:32). It's the point, that now, I have all this given to me, I have it at my fingertip. How can I use my time to serve the others to bring joy, and happiness, and life to others?

Many of you come here and say, my wishes to bring joy to humanity. Now you have the system to bring it. We structured this to be a fast delivery system.

You want to see, I'll bring it to your back. Your CO2 is back again at, 648 ppm. I give this system to the farmer, tomato grower in Holland. It saves him millions of dollars a year, because he pays for this (methane gas) to be burned in a greenhouse, to create a tomato, which has a life of maybe two weeks in the farm, in the shops. And with this (gas units), he creates a tomato, which is joy to eat, and the last six to 10 weeks in the shops. It's the change in economy, changing life. Klaus is very happy to come back, to show something to us. Would you like to measure again your methane gas. So we see why we call it, change in energy, change in what we call, plasma Technology.

We measure this (methane gas). And what we've done, very simply to you, is Keshe Foundation this time, is not in the game just to sell a unit. You buy unit, you contribute for next 10 years, 20 years to the foundation in a small amount, (1:34). that we can keep on expanding, and developing, and creating life for the others, who are not fortunate to have. So on the gas units, on the generator units, we have put a minimum of 100 Euro per year. You pay just to subscribe to use these systems.

And if you feel more generous, you can make 250, 500, or 1000, it doesn't matter, every year for the what saving you make, and what the change brings. So these units are for sale today. We selling it as a household plasma units. And we tried to get this as fast as possible into the market, that we beat the Russian boycott. Then we'll contact your bankers, and your governments, and tell them we don't need to suffer.

There you are, the methane gas line opened up. You see it goes down. It was just like the generation of the power, it stays a constant supply. If you burn it, it goes up, to the third bar, and up. If you don't use it, nature only supplies what is needed. And you can see how clearly it is. The beauty of it is, in the back, the energy system, bleeps into, back in power.

Now, the energy and power is in the hands of the individuals, not governments. It's you who decide how much gas I'm going to have, how much electricity I'm going to have. It goes back to all of you. Because being here for past four or five weeks. (Thank you very much Klaus, your system works.)

When we gave the patents, (1:36). to the governments in 2012, you all called me, betrayer, you betrayed us, you brought the technology, you gave it to the government again, we gave it to you from 2015 - 16, you still couldn't do anything with it. Now we show you what it has done, and what can be done. And the process is very simple. You've seen, we showed you that, again, I show you this, 647 ppm. I'll give you a little bit of gas. It just was too much. You had the bubbles in it. Then we see it again. It will build up. We made for it to shout at us and tell us what it has got to. And you see it 654, 656 ppm,. We are building up the CO2 production, but the natural CO2. The system will carry on the same way. Now we allow the flow in it. And you see the gas production increases and 671, 669 it goes to 1,000, and then you get the alarm going off again.

So the game is in energy, and gas supply for the Russian Government to boycott is finished. But the beauty of this is when we see these gas generators released, used by the government. (1:38). It's not just for this year. These systems will stay for nations, for the life of the nation. It's not a nuclear reactor, that you spend $30 billion to build it and then you spend $200 billion to clean it up over 50 to 60 years, on all the nuclear (waste) material. You spend $30 billion developing, completing these systems, your nation does not need nuclear power stations. Your nation does not need to suffer from shortage of electricity, anywhere in the world.

It's a natural product and has no waste to store it somewhere, and it's on demand. You need the gas, you've seen it, (it gets) created. We saw it in Teheran, the minute they started burning, how fast the gas bubbles came. We show here a rapid bubble expansion. So this is the evolution in science and technology. How we go about it, and how we increase it, and how we add to it, mainly depends on Keshe Foundation Knowledge Seekers and the structure we set around this program.

We go for a break and come back and try to answer some sensible questions. (1:39:30)

<<< BREAK >>> 443 KSW July 28 , 2022 .. (1:47).

K- I want to go back on what you just shown for advertising for moving 4 passengers. (1:48). If you understood what we said, at the beginning of today, where we are about to go on the Mobile Transmutation, then you understand the next step in the process of transportation. If you want to ship things around.

The way we expanded the Soul of the Man beyond the physicality of the Man and we moved the envelope, is the next step for transportation of goods. If you go back into this system, the original system, which is here, and I don't know if the camera can be brought here, if you can go on our camera…

When you look inside this system, again, look at the different dimension and not produced as an Enhancement Unit for production of material. Using it as a soul, the same as what we did with you yesterday in your teaching Rick, and extend the field of that center system beyond the physical boundary of this system. Doesn't matter how many tons you put in this container.

You order a burger from Burger King. They put in the envelope of a system which is preset like this. Now you call Uber or you call somebody else to deliver with the bicycle to your house. The food, we deliver down the line to you. (1:50). This is not any more fairytales, we've done, we know and we are there to do.

You have a cargo in China, you don't need to pay, I was told 17 or 18,000 dollars now, to get a container from China into Europe. You increase the center, the container is here, not in eight weeks, the container here is in eight seconds. Because now you can understand the implication of the technology. There you see it as a Sun to create materials, now we create as a soul for the system, and you see a lot of things changes.

What happens to the customs? Who's going pay the taxes for customs? Have you paid your VAT, or we make it "One Nation, One Planet, One Race." Then we tax equal to pay for the expenses of all of us across this planet, not if you're American you have a good time on the burden of the Africans, or if you can bring something from there on the burdens of South America or Asia. This is the change, and the governments have to get used to it very soon.

So, what you sat in the system for your soul to expand and travel where you want, or what we did yesterday. Now, we make the same system here, this is your new envelope. What you want to carry in it? Would we smuggle people the way we do nowadays, or would we bring the joy and what you need at home, and do the same delivery. Do we need huge containers, or we deliver item by item as you need, instantaneously.

Now you see, the change is on and the implication of it comes by the Knowledge Seekers. Governments will not listen till we actually deliver people. We have a problem here, we have to resolve in next few weeks with the Austrian government. (1:52).

Behind these doors, if you turn the camera … Behind these doors, here, as I turn, is the most advanced Space Technology man ever known. If I open this door, the systems are running. There is no difference between what's behind this curtain, and what sits in that Enhancement Unit. It's the knowledge applied in two different ways.

There you see a gap. Here we see the knowledge of the Creation and the flight, the way the Universal Community flies. You can't see, it's so beautiful. It's beyond the imagination, how a small system, a small structure has changed the life of man for transport and everything else.

If we go on to the level, go to the understanding of, there is no difference between what sits behind that door ,and that door in the Enhancement Unit. Now we solve the knowledge. We have managed to bring the science of theology and physics together. That's why we say, the Messengers of now, as it was said at the beginning, bring the two together, because you cannot have one without the other. We cannot run a system which has the emotion, without understanding how you can use this emotion. (1:54). So, the two knowledge's, have no choice, they have come together out of the beauty of what we call, sharing the knowledge so openly with all of you for the past 20 years.

Do we need to be aliens, to be foreigners? Do we need, as we heard this morning, what the Hungarian president said over the ?? in Romania, about how many Jews you can get in a matchbox. Do we need the rest of it, which came up, and all the rubbish which his nations should be, no others. Now you have not seen how the nations will mix. I like to live in Austria today, next week, I like to be in Beijing, and the week after I like to be in New York, and no government can control where I'll be. It's my decision. I decide, I travel, and I'm there instantly, as many of you have tested in the system.

So, you see, the two sides of the knowledge, the science, and technology and ethos of what we call, theology, the Soul of the Man now sits in this building, we have no choice. Trough understanding of the knowledge in either way, we have brought it together to be one. This goes back in a very simple way. Do we need religions? Do we need Ayatollahs and Popes when everything is in our hand? That bubble of energy is life, as Klaus just said. It's beautiful how you see life is created, bubble with bubble, and you are responsible for it. You don't need no religious man, and no government to tell you anything else, because you decide how the ethos sits, where you want the soul to be, and how you want your physicality to enjoy the presence of the Soul. (1:56).

Now we go back, if there are any questions
It seems there are no questions, it's a good time to say goodbye.

Q: Dr. Guatua … First is to thank you very much for bringing a revolutionary technology, science and technology to the world. That also brings peace. In fact, I see it as having potential to make our countries self-reliant and developed…

K- You don't need to say. It is there to be doing it. It is doing it, it has no choice, it's upon us. We have no …
Q: Yes, and I appreciate that very much. But I have a few questions. And the first one is, when there is an outbreak of a virus or something like that, that destroys lives. All countries of the world go into a frenzy, trying to buy into whatever is on sale from various places. Some of them fake, some of them not effective against such virus, but a lot of money is spent. (1:58). But when this science and technology is brought to the world, it's open, it's everywhere, it's on the Internet. Why are countries so blind? Why don't we hear about it? Why don't we see a frenzy of countries wanting to buy this technology?

K - First question, I think we answered you before. .. I answer you straightaway. The only reason you're not getting it, .. is because of the Kingdom of Belgium. The king of Belgium in making a fake court case and saying we are a fraud, has put a lot of things apart. That the government's go by what he said, we could not defend the case, in Belgium. Dutch people went there, you saw what they did with them. Hitler didn't put armed officers in the court, Belgium's did, they are ruthless. The Belgians are people who killed half of African Congo. One scientist to them, is no difference. We saw it, they put the closest person to me as a spy, informing before, preempting everything.

This technology would not have been out, if it still was a Belgian in our structure. This is the reason it's not there. The biggest spy in the Keshe Foundation, which we didn't know, the biggest pedophile, we didn't know, was sitting inside the Keshe Foundation. We open this very soon for you, with criminal conviction in pedophilia. (2:00). We couldn't, they to hold on the person, with prison sentence for pedophilia. We always said, what happened around Keshe Foundation, why everything was around us? Documents in police stations and courts, documentation in newspapers. We release it when the time is right. The Belgians decided, we take it (the technology), or we destroy it, as I did with Congo. But this time, this technology was much bigger than Congo. It belongs to the Creator, and the king of Belgium, we'll be dust. Never ever remembered. There'll be no nation called Belgium. Because, you know, we all have paid so much for it.

We can talk very openly how Keshe Foundation was brought in, they knew the day of my assassination in Italy, we'll give you documents for it. The day when I was supposed to be assassinated, which Fabio got assassinated. According to all of you, as you know, I'm (Mrs. Keshe is) everywhere, wherever Mr. Keshe is, that day, I'm (she was) home, waiting for a death news. We don't tell you a lot of things. Now we are free, we can do, but we do it in time.

You and I, Rick, six years ago, this time got banned from Youtube. You remember because we brought Sterling up, and he went and claimed names. Eight months later, we got him, in solitary prison for life, for pedophilia. (2:02). The people around us knew how they brought it, because they're benefiting by it. This is the reason we are not in the News. Because pedophiles, the King of Belgium and the people in it, have a lot of things to do. It's the way they keep the other leaders in silence. Because they have pictures of them, or whatever to do with them, with children. When you got somebody by the neck, you can do whatever you like.

So, it's not in the News, but now it's in your hand, that's what it counts. Would it matter if it was a "pigeon time," when you send the message by a pigeon, and we would have discovered this technology and we had no television. Would it have made any difference?

Would it have made any difference, if it was 20 years ago, and we could show it? In a way the time wasn't right, in a way, man had to learn the knowledge, we have learned now. I am very glad, that we are free to teach the way we are teaching, and we are free to be able to share knowledge so freely, and (we'll do) so for years to come.

The whole beauty of it is, we are here, it's now and the knowledge is shared, and the knowledge can be shared still so freely. The beauty of it is, in the city of Linz, you have material life, you have plasma life as you see on the screen, or you have the flight system through the STM behind the wall.

The technology is the technology of the Creator, (2:04). knowledge is knowledge of the Creator. How we change the technology, is in what we need and what demand for it. It's very interesting. .. Klaus, can I have that detector please? We just had the smoke detector, which is for the CO2 detector, and it ran out of energy. … Bring it without

charging it. We had to stop, take it out because it cannot charge itself. We have to charge it through something.

It's going to be charged, you see the cap is open, because I couldn't hear any more bleeping. So, now we put it on the charger. What happens, in a few seconds it runs out again. We can't charge it. What about if, in the near future we add the knowledge of what's inside this box (generator) into this (CO2 detector)? Do you need batteries to charge? Do you need, hoping that your CO2, or monoxide system has a battery, and it runs out of battery, your child is in the room, accident happen with a fire, carbon monoxide kills a child.

Do you rely on the man's technology, which fails? Or do you rely on the knowledge of the Creation, that it works all the time? It's very simple. It's standing right in front of us, you all saw us, we put it in there, suddenly it stopped, ran out of energy. I need to charge it, I need to plug it.

If I stand here, who charges this light in front of me (sunlight form skylight)? Who sends this energy, we call, the energy of the Sun to me. Who charges it? (2:06). What is in there above me, is what it's inside me. It's beautiful when the Sun shines on the, what we call, the ?? "Son of Man."

We created that Sun inside, we haven't moved it. It has chosen we have holes on the roof, on the ceiling, and that's what you get. The energy inside the system does not have the matter state and the failures of the system. You always see, the blue light still on. This is what we give you, not this. You want this, plug it in, you don't have this, you run out of energy, throw it away. When you buy systems, that will not rely on material state energy electron movement, and you work on a plasma Technology, this is what you get.

Very interesting thoughts. We always said, that the bigger field gives to the smaller. Now we have to see the light, the Sun itself. And we have a Sun inside, which is weaker. As the energy of the universe and the Sun, connected to this, and me in the standing in between, receive the energy which is transferred to this planet directly between the two. In a way, I get charged with it. I get <audio unclear> my soul lights up, receiving energy, being in-between the two? The answer is yes.

Now, do you need that battery? (2:08). Or do we need the state of Belgium to decide, nobody should know about it till we get our hands on it (the technology), because we need more children for our pedophile kingdom. The answer is very simple. My name, my technology, we last long, long after the pedophile kingdom of Belgium. And long after Fox is in control of News, which they're controlled by the same people. Now your second question.

Q: The second question is, let's say a country in Africa, let's call it Country X, and a country in South America Y, and Z in Asia, opens their eyes and accepts this technology. Could you please explain briefly, what it will take to transfer this technology to a country that actually spreads it within all its borders, for the benefit of its citizens?

K - Chinese are doing it. The Iranian government is doing it. Why the others hiding from it. The Chinese we've seen. .. I've shown this before. We didn't go to do this. We didn't go out to put these things up. This comes to us from you Knowledge Seekers, which are around the world and you send us pictures from what you've seen, or what has been sent to you. (2:10).

This is what you are blinded with by the Belgians. This is what Chinese do with the Keshe Foundation in China. I have to find it, then I can share it, then you understand, nations are using it the way it suits them, and where it suits them, the way it suits them, and how they can benefit by it. There is a picture, I'm sure the Chinese guys in the background will get to it before I do, but I have it somewhere here. Then you understand, government uses the Keshe Foundation technology as it suits them, where it suits them and what it suits their nationals. It's a beautiful single picture. I have to find it. Usually see it very rapidly. But as usual, it's Keshe Foundation, you need to wait, the Gans's need to grow.

This is how government uses us when it suits them. On a Chinese high street, (Information about KF is written on the) billboards (this is by the Chinese government). That's what it is. (2:12). It suits the Chinese government and Chinese authorities and whatever, to put Mehran Tavakoli Keshe, show how it changes for them, on their streets.

You know the story of the pheasant. Pheasant, when it's a snow time, to find food, puts his head under the snow, and his backside up, and he thinks, that just because my head is under nobody can see me. That's how the man shoots the pheasant, with his backup. Just because he thinks, you can't see him, or he is hidden, doesn't mean the hunter cannot see him. This is exactly what the Belgians done with you. They thought they can bring whatever to hide it, that they can control it. But the Chinese are using it extensively.

As I said, go back on a history, very recent history past. You remember I said that, and the members of the European Community governments are online, they can check, that, if you remember, couple of years ago, Korea, North Korea was very rapidly developing all weapon technology, all. Because the Belgium, Mr. Brackenar ?? was selling European, what we call, systems, rocket systems through the private accounts of the king, to the North Koreans. When we exposed the hand, we see no more from North Korea, because no one gives information to Mr. Brackenar to pass on, to sell.

The biggest nuclear threat to the Chinese government and everything, has stopped. It's the way nations have used the knowledge to create mayhem for each other, by certain people, (2:14) which suits them in their private bank.

So. your governments know. It's just, would, do they want to implement it, or they go back on everything else. Does it matter to you, if you have one of these energy systems, and one of these gas systems in the house, you don't pay any electricity, you don't pay anything for the rest of your life, and you can give the unit back to your children, and

your great grandchildren. It's the very first time, and it still works. Does it matter if the Russians boycott the gas, or the American decide not to send food.

The government's know about technology very well, because don't forget, 75% of world population governments collected the Key, and they studied the Key. This is what will come to us in a very near time, in a very near future, in how we apply the technology for ourselves. …

Any other question?

Q: Thank you very much Mr. Keshe for your excellent responses, and for bringing this wonderful technology, and I wish to call upon governments across the world, and especially those in Africa, or African countries to accept this wonderful technology, that will bring self-reliance, massive development, and save lives across your borders. (2:16). The technology is here, it's cheap. Why are we so afraid of doing that work…

K – We are not afraid, it's not afraid. It's the bank accounts of how it's paid, who gets paid.

We are hoping maybe by close of business today, or before we finish, we put a very special, what I call, the 4th Blueprint to make announcements about the Keshe Foundation and evolution of this technology around the world. We have given the counterparts, which is with us, till today to complete and respond. Then we explain to you exactly where we are, and how we work as One Nation to bring that position, in the right condition. We have given them time till today, by close of business. Otherwise we'll come to you, then you know how and why.

Any other question

Q: … My question is, when is this planet going to see the end of pedophilia?
K - I don't know. But, it has become a fashion by ?? privileged. You see when one can get away with it, the others do it.

In the holy books, the punishment is not there for you that you're going to get it, it's a deterrent, that you don't do it, to get it. It's not that if you do it, you get punished, it's for you not to do it, to get punished. (2:18).

If United Nation puts the sanctions it has put on Iran, for knowledge and technology, on the states like Belgium for pedophilia, do you think it would have lasted that long? No. Because as I said to one of the European Union (EU) people very recently, are the all the members of European Parliament pedophiles? If it's there, you all know United Nations put it on the head of nations of pedophilia, why you put your headquarters in there? (When the UN declared Belgium a pedophile state, why does EU put their headquarters there?) Is there a kindergarten underneath of the EU headquarters? How come we get punished for knowledge, advanced knowledge which they don't have? But, we don't get

punished for abuse of children? This is the question, which is not answered, and cannot be answered.

You as European citizens, write to your members of parliament, and state the fact, this is the United Nations Headquarters report (that Belgium is) one of the most nations involved in child abuse. Why are you going there. (Is it for you to get) your children? How come you don't go to Iran and learn the technology, but you go there (to Brussels) their headquarters, and go there all the time.

Then we have to ?? We have a headquarters in Strasburg. French are safe (according to UN). But this is something, that has to come in line with the governments, and don't forget, the biggest pedophile in the whole structure for over 50 years, unknown to all of us, is the one who has been writing to all the governments, delivering papers from my work, that I am a spy for Israel. (2:20).

Did the Iranian government asked, Madame, can you bring your pedophile cases and prison sentences for pedophilia in the state of Belgium? No. Going to prison, being in custody for years, .. for being part of an active cell ?? and all in the cell, going to prison for years, which none of you knew. We didn't know, we just realized it through the process of investigation. Now you understand how we've been vulnerable to all these things. And you say, why Keshe Foundation is always involved and is around? We didn't get involved. The oldest court case pedophile group was in house. Prison sentences, documents in the police station. There is no allegation. The whole family. We're glad we're rid of the Belgians. At least my children are safe. I don't know about the one I lost.

Go and check the documents in the archives of the courts, in the archives of the police stations in the Belgium, and others. Then you understand why and how we've been targeted without knowing it. Long term prison sentences.

Now, the Iranian government believed in these people, and ?? you can believe the rest. It’s for you to investigate not us, we have all the documents, we know what we're talking about. So, it's not going to end unless the humanity, the Soul of the Man changes.

The way you come here and you go through the system and the pains goes. Maybe putting these people through the system, the soul grows from the dimension of physicality of emotion of a child. (2:22).

Then you understand how Belgian King and royal family, which are heavily involved in this job, were so closely tracking the Keshe Foundation, because they had their oldest agent in the system.

I wish for elevation of their Souls. Don't take my word, go and check. There is no allegation, these are the truths sitting within the court of Belgium, within the newspapers of the Belgium, and sentences past, and prison sentence served, and still under cover, monitored, because there are too much involved.

Any other question.

Q: Brazil … (2:24). .. My first question is, is there is any activity for Brazil to use this technology?

K - Yes, called Rafael and the Brazilian Knowledge Seekers. You've got one of the most active Knowledge Seeker teams on this planet. Because I monitor, we monitor some 32 languages and teams. And by god, every day, sometimes it goes couple of 1,000, a couple thousands communications in one day. You're very active. You have a beautiful team with Rafael, and the rest of the Keshe Foundation KS in Brazil. You have a beautiful country, and you have a beautiful Knowledge Seekers. So what else do you want? It is you to do it.

Q: You were going to show the flying car some time ago. So, there are any forecast for you to show again, this car? (2:26).
K - That's obsolete. We show. You are flying with your souls, why you want a car for? You still want to take two hours to get from one place to another, when you can do it in two seconds? Yes, it will be shown, it'll be done, it's part of the joy of the system, Yes. But we are not in a hurry, because to me, I would like to leave the donkey behind and go with a jumbo jet. ..

There are structures and force, for us to, in a way… We are in a process, which is important for all of us. I explained to you, we are hoping in the next few days, we'll come to some sort of senses between the Americans and the Iranians, and in negotiations, where to fly with a system, to travel with a system. Do you mind, Dean, if you put your camera up there? Can you turn it up that far? This one, on those two reactors… (2:28). Can you see it?... okay.

To have these flight systems, which are, they are part of the Iranian space flight system, in the background, the two, you need nuclear base material, that you can create a rapid, heavy plasma. At the moment if you go into the lift, and that kind of thing, you still need that.

Embedded inside these when they were tested in Iran, there is some 200 nuclear radiation sources, plus the radiation we created inside. As long as, and we are not giving another excuse for what the Belgians (did), to come to the house and to the lab, and confiscate the nuclear sources and put it in a drawer in my lab.

If we don't get a clearance from IAEA that the Keshe Foundation can endeavor to revive this technology, you are grounded with the physicality of travel.
